CERS Description: Chemical Storage Facilities

Violations:

Site ID: 37973

Site Name: INDEPENDENCE AUTO BODY

Violation Date: 07-22-2016

Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Hazardous waste paint booth exhaust filters stored beyond accumulation time limit; facility is currently storing over 220 lbs. of hazardous waste. Schedule a pick up immediately of all hazardous waste paint booth exhaust filters.

Violation Division: Santa Clara County Environmental Health

Violation Program: HW

Violation Source: CERS

Site ID: 37973

Site Name: INDEPENDENCE AUTO BODY

Violation Date: 07-22-2016

Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)

Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.

Violation Notes: Returned to compliance on 07/22/2016. Emergency Information is not posted in the shop; provided poster today.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.  
HAZARDOUS WASTE BIENNIAL REPORTER

CA BOND EXP. PLAN:  
 Responsible Party: RWQCB REFERRAL SITE  
 Project Revenue Source Company: Not reported  
 Project Revenue Source Addr: Not reported  
 Project Revenue Source City,St,Zip: Not reported  
 Project Revenue Source Desc: This site is proposed for the National Priority List. The RWQCB will continue to have lead responsibility for monitoring the RP's remedial activities. Until such time as the RWQCB refers the site to DHS for follow-up using Bond funds, no money will be budgeted from the fund for this site.  
 Site Description: CTS Printex Corporation (Printex) is located on 5.6 acres of land at 1950 Colony Street in Mountain View, California. Currently, the site is inactive. From 1966 to 1985 Printex operated a printed circuit board manufacturing facility onsite.  
 Hazardous Waste Desc: Soil under the site contains elevated levels of copper, lead, trichloroethylene (TCE) and 1,1,1-trichloroethane (TCA). Contaminants in the ground water include TCA, TCE and 1,1-dichloroethylene (DCE).  
 Threat To Public Health & Env: Roughly 188,000 people in Mountain View depend on ground water drawn from the aquifer of concern for their drinking water. The nearest municipal well drawing from the aquifer, Mountain View #10, is 1.1 mile from the site. The alternative surface drinking water sources appear to be inadequate to supply the large population currently relying on local ground water.  
 Site Activity Status: Site investigation and remediation activities at the Printex facility were

started in December, 1984. Organic chemical contamination appears to have resulted from the wet floor operation. Approximately 255 cubic yards of soil from the wet floor area were excavated for offsite disposal. A quarterly monitoring program has been in implementation for all existing wells. The down gradient spread of chemicals has tentatively been established at approximately 600 feet beyond the property boundary. Ground water extraction facilities have been designed and wells constructed in order to contain the spread of contaminants in ground water. The Regional Water Quality Control Board issued a cleanup and abatement order in March, 1987.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Latitude: 37.41865  
 Longitude: -122.09235  
 Case Type: Cleanup Program Site  
 Case Worker: TLF  
 Local Agency: SANTA CLARA COUNTY LOP  
 RB Case Number: Not reported  
 File Location: All Files are on GeoTracker or in the Local Agency Database  
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil Vapor  
 Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE)  
 Site History: The Site consists of one parcel of land totaling approximately 0.8 acre located on the south side of Leghorn Street within a mixed commercial and residential area of Santa Clara County, California. The Site is currently developed with two unoccupied two-story buildings and six single-story buildings (slated for demolition), which were constructed in 1950-1963 and were previously occupied by residential tenants. In addition to the current structures, the Site is also improved with an asphalt-paved driveway, associated landscaping, and a wooden fence around the perimeter of the property. The Site is bound by single-family residential and commercial properties to the north across Leghorn Street; multi-family residential and a vacant lot used for light industrial storage to the south; a commercial property to the east; and a commercial property to the west. A superfund site (CTX Printex) is located approximately

1,000 feet to the southwest of the site. Concentrations of TCE have been detected in groundwater beneath the site. A redevelopment is planned for the property and a two story commercial building is proposed to be constructed. Additional site assessment is required to define the extent of contamination and develop a complete conceptual site model.

POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Status Date: 03/15/2010  
 Global Id: T10000000079  
 Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
 Lead Agency Case Number: 2020312  
 Latitude: 37.41234  
 Longitude: -122.098072  
 Case Type: Cleanup Program Site  
 Case Worker: UUU  
 Local Agency: Not reported  
 RB Case Number: 43S1121  
 File Location: Regional Board  
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor  
 Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE)  
 Site History: Middlefield Plaza, LLC (MP) purchased the site on July 24, 2001. MP plans to redevelop the site into residential apartments. The site is the former Middlefield Plaza shopping center and is located within a mixed residential/commercial neighborhood. The site is 1.87-acres in size and consists of a dry cleaners, as well as several commercial operations including restaurants, ice cream shop, hair salon, tanning salon, printing shop and an analytical laboratory. Sparkle Cleaners operated from 1991 to 2001 and appeared to have a minor release of volatile organic compounds (VOCs) such as perchloroethene (PCE). A soil and groundwater assessment was conducted in 2005. PCE was detected in soil at up to 3.4 milligrams per kilogram. The following were the maximum concentrations detected in groundwater: PCE at 18 micrograms per liter (ug/L); total petroleum hydrocarbons (TPH) as gasoline at 130 ug/L; TPH as diesel at 1,200 ug/L; TPH as motor oil at 1,700 ug/L; and MTBE at 40 ug/L. TPH contamination at the site appears to be from an up-gradient offsite source.

 Case Worker: UST  
 RB Case Number: Not reported  
 Local Agency: SANTA CLARA COUNTY LOP  
 File Location: All Files are on GeoTracker or in the Local Agency Database  
 Local Case Number: 06S2W09N01f  
 Potential Media Affect: Other Groundwater (uses other than drinking water), Soil, Soil Vapor  
 Potential Contaminants of Concern: Gasoline  
 Site History: Site History: The site and adjacent parcel currently comprise a McDonalds restaurant with a drive-thru. This case was reopened following the submittal of new groundwater and soil vapor data that exceeded previously high historical concentrations and failed to satisfy low-threat case closure criteria. Additional assessment was conducted to complete a new conceptual site model and a site-specific vapor intrusion risk assessment, which included sub-slab vapor, indoor air, and outdoor ambient air sampling at the McDonalds restaurant. Benzene is not present in sub-slab vapor, and the detected ethylbenzene and naphthalene concentrations in sub-slab vapor were below their respective Regional Water Quality Control Board Tier 1 environmental screening levels. Elevated soil, groundwater, and soil vapor concentrations remain below the former dispenser, but the site satisfies all low-threat case closure criteria. Site Management Requirements: Residual contamination in soil, groundwater, and soil vapor remains at the site that could pose an unacceptable risk under certain site development activities such as, but not limited to, site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities,

excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.

File Location: All Files are on GeoTracker or in the Local Agency Database  
Potential Media Affected: Soil  
Potential Contaminants of Concern: DDD / DDE / DDT, Other Insecticides / Pesticide / Fumigants / Herbicides, Arsenic, Lead  
  
Site History: DEH was notified on June 25, 2019 by the City of Mountain View that the project entitlement expired. Development will not move forward without going through a new entitlement process with the City. The Phase I Environmental Site Assessment dated May 15, 2015 indicates that site was previously used for agricultural purposes (orchard) and for storage of commercial construction equipment. Residual contamination may remain at the site that could pose an unacceptable risk under certain conditions such as digging, grading, or change in land use. If a property development is pursued in the future, additional assessment of residual contamination is recommended in order to determine potential contaminant exposure risk. The DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, or excavation.

and a final SI work plan was prepared in August 2000. The grease rack was constructed in the early 1950s and is no longer used. The Army considers the wash rack to be a compliance (RCRA) issue for funding purposes. Minimal shallow soil sampling was conducted in 1997 around the grease rack. Contaminants of concern are primarily grease oil, fuels, and solvents. Groundwater is shallow, approx 15 ft below ground surface. Impacts to groundwater are unknown, but will be determined by the August 2000 SI field work.

Comments Date: 01222002  
 Comments: PEA - GRSRK -- Completed site investigation of soil and groundwater at Site 3 (Grease Rack). TPH (gasoline) was found in one groundwater water sample above Water Board screening levels. Facility presented evidence that contamination was from off-site. Facility was transferred to Water Board lead.

MAP FINDINGS

**COSTCO/ INDEPENDENCE/CHARLESTON (Continued)**

**S106235112**

Site History:

1. Site Location: The site is located at 1000 - 1100 North Rengstorff Avenue, Mountain View, California and is known as Rengstorff Center Costco. The site is bordered by Charleston Road to the north, Independence Street to the west, Leghorn Street to the south, and Rengstorff Avenue to the east. The site covers approximately 3 acres. The site has been redeveloped and now consists of a Costco building and adjacent parking spaces. Neighboring properties are developed for commercial and light industrial use. 2. Site History: Nearon Enterprises owned the property from 1960 to 1992. Costco Wholesale Corporation purchased the property in February 1992 and currently operates a retail warehouse store at the site. The Nicholson Company initiated soil and groundwater investigation and developed the site for Costco. Site tenants include the following: a. Syntex (1967 - 1976) was involved in biochemical, medical, and other scientific research work. Syntex used the site as an animal testing and research facility, as well as for office space. No hazardous materials usage can be established during its occupancy. b. Davila International Circuits, Inc. (1976 to 1987) manufactured printed circuit boards. VOCs were commonly used in the manufacturing process during this period. Wastewater was discharged through three below grade sumps located at the rear of the building. The sumps housed polypropylene tanks used for pH neutralization and heavy metal precipitation. Previous investigations identified the sump area as a source of VOC contamination of soil and groundwater. c. Various small tenants leased the site after Davila' occupancy. Uses included truck parking, storage space, art studios, and a writing studio. 3. Dischargers: Davila International Circuits, Inc. is a discharger because its past activities caused soil and groundwater pollution at the site. Costco Wholesale Corporation is a discharger because it is the current owner of the property. 4. Regulatory Status: This site is currently not subject to Board order. 5. Site Hydrogeology: The shallow water bearing zone is located between 5 and 20 feet below ground surface. The shallow zone is a 10 foot thick zone of medium stiff; moderately low permeability clays containing lenses of higher permeability silty sands and sandy gravels. These higher permeability lenses are interpreted as buried stream channels. Groundwater flow is north-northwest at a gradient of about 0.003 ft/ft. 6. Remedial Investigation: The principal VOC at the site is Trichloroethene (TCE) up to 4.5 ppm in soil and 2,400 ppb in groundwater. Remedial investigations began in 1992. 11 onsite (MW-I to MW-II) and 2 offsite (MW-12 and MW-13) monitoring wells have been installed to monitor groundwater quality. Monitoring wells MW-I to MW-5 were destroyed when the Costco building was constructed. The suspected source area is a former chemical storage and sump area located in the southeastern portion of the property. A groundwater plume extending from the former sump area to the property boundary has been identified. Monitoring data indicate that the plume is limited to the first aquifer, but additional investigations are required to define the lateral definition of the plume. 7. Interim Remedial Measures: The former chemical storage and sump area was removed during construction of the Costco building. The Nicholson Company excavated soils (including soils in and around the former sumps) to 3 feet below grade. The excavated soil was stockpiled, aerated, returned to the excavation, and recompact. The Costco building foundation was then constructed over the recompact soil. Groundwater Monitoring: A quarterly groundwater monitoring program was instituted from 1999 through 2001 at the Site. Monitoring during that period included

evaluation of natural attenuation parameters. On January 24, 2002 Costco was granted approval from the San Francisco Regional Water Quality Control Board (RWQCB) to reduce monitoring frequency from quarterly to semi-annually and to discontinue monitoring for natural attenuation parameters. The January 2002 monitoring event (Kleinfelder, 2002) was the first semi-annual event under this new schedule. In 2005, Costco was granted approval from the RWQCB to reduce monitoring frequency from semi-annual to annual. In order to accommodate Costco's warehouse expansion, monitoring wells MW-7, MW-8, MW-9, MW-10 and MW-11 were destroyed (in accordance with Santa Clara Valley Water District (SCVWD) requirements) during the period from March 31, 2005 through April 1, 2005. Well decommissioning activities are summarized in Kleinfelder's March 2005 Groundwater Monitoring and Well Destruction Report (Kleinfelder, 2005). 8. Adjacent Sites: Charleston Business Park (CBP), an industrial park located at 2400 to 2476 Charleston Road, is located directly downgradient from the site. Investigations indicate that an offsite plume emanating from the Nicholson site has impacted CBP. CBP will receive separate site cleanup requirements to address contamination from onsite sources.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or

Completed Document Type: Removal Action Workplan  
Completed Date: 09/30/1998  
Comments: RAW to address pesticide-impacted soil approved.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 10/07/1997  
Comments: Completed Site Screening. Investigations found primarily DDT and chlordane. Between 1985 and 1986, the on-site structures were demolished and cleared from the site. The Site was regraded and construction of residential townhouses began. The construction was discontinued due to the discovery of pesticide impacted soils.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 04/28/2014  
Comments: The Department of Toxic Substances Control (DTSC) performed a Five-Year Review to assure that the implemented remedy continues to be protective of public health, safety, and the environment. DTSC conducted a site visit as part of the Five-Year Review and observed the capped area to be in good condition and did not observe evidence of any activities prohibited by the Land Use Covenant. DTSC concluded that the remedy remains protective of human health and the environment.

Completed Document Type: Site Screening  
Completed Date: 04/11/2001  
Comments: DTSC completed a Site Inspection Re-Assessment for the U.S. Environmental Protection Agency. As the lead regulatory agency for the Site, DTSC had approved a Removal Action Workplan for the Site on October 30, 1998. It was noted in the Site Inspection Re-Assessment that implementation of the Removal Action Workplan had been significantly delayed due to the City of Mountain View's building permit process and the Site owner's funding problem for construction of the multifamily residential buildings. Based on the Site Inspection Re-Assessment it was determined the Site did not qualify for further remedial site assessment under the Comprehensive Environmental Response, Compensation, and Liability Act.

Completed Document Type: Operation and Maintenance Report  
Completed Date: 10/02/2020  
Comments: The Department of Toxic Substance Control (DTSC) has reviewed the Cal West Properties (Sierra Vista) Inspection Report (Report). The Report documented that a cap inspection was performed on July 2, 2020. The property was found to be in compliance with the restrictions and requirements of the Land Use Covenant (LUC) and that the cap is in good condition. Therefore, DTSC approves the report. In order to return to the schedule previously established for annual inspections, the next inspection report is due February 3, 2021. -EC, 10/2/2020

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Certification  
Completed Date: 10/18/2004  
Comments: Certification amendment to add parcels located at 1905 San Ramon Avenue. As part of the cleanup, all contaminated soil was excavated to unrestricted levels and removed from this parcel.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 12/16/2015. 2x55 gallon drums oily debris (cartridge style filters) marked as "drained used oil filters" and 1x55 oily debris marked as Hazardous waste, but missing start date. UNCASSED FILTERS MUST BE MARKED AND MANAGED AS HAZARDOUS WASTES, AND ARE NOT ELIGIBLE FOR THE REDUCED MARKING AND MANAGEMENT STANDARDS OF CASSED FILTERS. Pallet holding boxes with various unusable or expired chemicals (muriatic acid, floor seal, etc) was unlabeled. Various 5 gallon buckets holding oil debris (cartridge filters) throughout the work area were without labels (at work stations, at roll up door by fan, 18x15 gallon rolling used oil and 3x15 antifreeze dollies were unlabeled except for their contents. 5 gallon bucket holding saturated oily rags at the 5th workstation right of the roll up door along back wall was unlabeled. 3x5 gallon bucket of used antifreeze at dyno, and work stations were unlabeled. Oil drain pan holding draining oil filters in storage area (ATF exchange machine storage area) [Truncated]

Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Facility generates waste from routine maintenance of vehicles. Oil and antifreeze generally drained to rolling carts and then air pumped to tanks. Tanks double walled, fitted with working audible overfill alarms. Buckets used for collection filters prior to consolidation. --have a filter crusher and drain station, but noted no crushed filters in the filter drum. -- also noted a lot of oil in bottoms of filter buckets. RECOMMEND ALLOWING FILTERS TO DRAIN IN THE MOBILE OIL COLLECTION CONTAINER FUNNELS FOR A SHORT DURATION PRIOR TO PLACING THEM IN BUCKETS. Emergency equipment in good condition, accessible throughout shop. Extinguishers serviced June 2013. Rags and uniforms serviced by Aramark. Batteries collected by parts, returned to Toyota via agreement with Interstate Batteries. Wash rack clarifier water and sludge removed annually as non-hazardous waste. Tested in past for materials of concern Copper, nickel, lead. Brake turnings non-hazardous. tested in 2010. [Truncated]

Eval Date: 07-31-2013  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Facility generates waste from routine maintenance of vehicles. Oil and antifreeze generally drained to rolling carts and then air pumped to tanks. Tanks double walled, fitted with working audible overflow alarms. Buckets used for collection filters prior to consolidation. --have a filter crusher and drain station, but noted no crushed filters in the filter drum. -- also noted a lot of oil in bottoms of filter buckets. RECOMMEND ALLOWING FILTERS TO DRAIN IN THE MOBILE OIL COLLECTION CONTAINER FUNNELS FOR A SHORT DURATION PRIOR TO PLACING THEM IN BUCKETS. Emergency equipment in good condition, accessible throughout shop. Extinguishers serviced June 2013. Rags and uniforms serviced by Aramark. Batteries collected by parts, returned to Toyota via agreement with Interstate Batteries. Wash rack clarifier water and sludge removed annually as non-hazardous waste. Tested in past for materials of concern Copper, nickel, lead. Brake turnings non-hazardous. tested in 2010. [Truncated]

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1  
Completed Date: 04/15/2016  
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require DTSC to pursue corrective actions. Arrowhead Development Company operated an amusement park equipment manufacturing facility from 1960 through 1980 on an 8-acre project that included the site. TCE was reportedly used at the facility for vapor degreasing. There were subsequent changes in the site ownership. Sanmina purchased the property in 1999 and operated four hazardous waste treatment units under permit-by-rule, including two Memtek wastewater treatment units, a batch treatment unit, and ion-exchange unit. The site is part of the Plymouth Street Site where the Regional Water Quality Control Board has been overseeing the investigation and remediation.

Lead Agency Case Number: Not reported  
Latitude: 37.4159988845966  
Longitude: -122.084155082703  
Case Type: Cleanup Program Site  
Case Worker: RWP  
Local Agency: SANTA CLARA VALLEY WATER DISTRICT  
RB Case Number: 43S0217  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)  
Site History: The Montwood plume is within a much larger plume extending from the Teledyne/Spectra-Physics Superfund site. Groundwater extraction reduced on-property and nearby chlorinated VOCs (CVOCs) in groundwater to asymptotic levels. However, the CVOC plume extends off-property through and beyond the downgradient site at 1600 Plymouth Street,- presently owned by Peery/Arrillaga (P/A). The

off-property characterization of the groundwater-CVOC plume has been completed with grab groundwater samples and additional wells. Off-property groundwater-CVOC extent has attenuated with natural attenuation. Responding to persistent Regional Water Board suggestions to re-characterize the site with high-resolution technology, the Responsible Party (UP) used MIP data plus three other data layers to successfully locate on-site CVOC source areas. Based on the data, the consultant selected enhanced reductive dechlorination (ERD) as the final remedy that is now in process at the on-property area. ERD has significantly decreased the on-property groundwater-CVOC levels with TCE now below MCLs. UP is about to conduct the first off-property ERD remedial task after extended access negotiations with Google.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: \* Discovery  
Completed Date: 03/27/1992  
Comments: DTSC received EPAs Preliminary Assessment dated 02/07/92. EPA recommends higher-priority SSI under CERCLA. EPA PA: EPA recommends further action because groundwater contamination may be attributed to the storage and use of hazardous materials by a previous Building 2420 tenant, and a release of hazardous chemicals to the air is suspected.

Comments: DTSC and Green Environment, Inc. held a conference call on 5/15/2015 to discuss DTSC input on the Technical Memo-Facility Investigation Scoping Document for Additional Soil, Soil Vapor, and Groundwater Sampling. DTSC input on the Technical Memo will be incorporated in the Facility Investigation Work Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Supplemental Site Investigation Workplan  
Completed Date: 07/23/2015  
Comments: The Facility Investigation Work Plan outlines investigation activities to collect information required to develop a conceptual site model, to evaluate human health and ecological risk, and to support remedy selection.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Supplemental Site Investigation Report  
Completed Date: 10/17/2016  
Comments: The Supplemental Site Investigation Report summarizes the results of the additional investigation that was performed to define the extent of the contamination. The Report recommends further assessment of the potential vapor intrusion into the buildings and additional investigation to define the vertical and lateral extent of the groundwater contamination. The Report also recommends an interim removal action at 882 Commercial Street to remove a soil hot spot.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Community Profile  
Completed Date: 07/27/2016  
Comments: The Community Profile documents community demographics and land uses and documents the results of a community survey that was mailed out to determine the potential concerns that the community has or might have regarding health risks and cleanup at the site. It describes anticipated public participation activities. Recommended activities include publishing a notice of the draft Removal Action Workplan, providing a public comment period of 30 days, holding a public meeting if necessary and preparing a response to public comments.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Supplemental Site Investigation Workplan  
Completed Date: 12/08/2017  
Comments: The Expanded Facility Investigation Workplan (Workplan) was prepared as recommended by the Final Facility Investigation Report, dated September 12, 2016. The Workplan details activities planned to further investigate subsurface impacts onsite and off-site, and details the methodology to conduct an evaluation of potential for vapor intrusion in the three buildings at the Site. Sub-slab vapor, deep soil vapor, shallow groundwater, deep groundwater, indoor air, and outdoor air samples will be collected.

Comments: The purpose of the interim removal action is to target a volatile organic compound hot spot in soil. Approximately 50 cubic yards of contaminated soil is expected to be removed and disposed at an offsite disposal facility.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 09/24/2020  
Comments: Change of Project Manager notification letter informing Hammon Plating Corporation that DTSC has a new project manager for the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Annual Oversight Cost Estimate  
Completed Date: 09/24/2015  
Comments: DTSC letter with oversight cost estimate for project activities anticipated for fiscal year 2015/2016.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Notice of Exemption  
Completed Date: 04/06/2017  
Comments: DTSC prepared the CEQA Notice of Exemption for the interim removal action to remove a volatile organic compound hot spot. Approximately 50 cubic yards of contaminated soil is proposed to be excavated and disposed at an offsite disposal facility.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Annual Oversight Cost Estimate  
Completed Date: 09/22/2016  
Comments: DTSC letter with oversight cost estimate for project activities anticipated for fiscal year 2016/2017.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Pre-HARP Form  
Completed Date: 05/03/2017  
Comments: Pre-HARP Form for cleanup oversight. Potential hazards include solvents in soil, soil gas, and groundwater from site operations.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Annual Oversight Cost Estimate  
Completed Date: 10/05/2017  
Comments: DTSC letter with oversight cost estimate for project activities anticipated for fiscal year 2017/2018.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 08/28/2017  
Comments: Letter to project proponent providing notification of change in DTSC Project Manager from Henry Chui to Sagar Bhatt.

Secondary Waste Type: Not reported  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: Not reported  
POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site Name: HAMMON PLATING CORP  
Violation Date: 08-25-2015  
Citation: 22 CCR 45 67450.13(a)(1) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.13(a)(1)  
Violation Description: Failure to prepare a written estimate of the cost of closing each unit which includes the cost that would be incurred for closing a treatment unit when using the owner or operator or generator's own staff and/or personal equipment taking into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. This estimate shall be submitted as an attachment to the Certification of Financial Assurance for Permit by Rule and Conditionally Authorized Operations/ Maintenance page(s) of the Unified Program Consolidated Form (x/99)).  
Violation Notes: Returned to compliance on 09/23/2015. Estimate is incomplete as it does not account for the closure of CERS identified units 3, 4, 5, or 6 (Inspector identified units 2 and 3) and does address the costs of disposal of any unit parts (piping, tanks) for all units or the permit costs for closure

Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple  
Violation Description: RCRA Large Quantity Generator Program - Administration/Documentation - General  
Violation Notes: Returned to compliance on 10/17/2017. The facility failed to accumulate hazardous waste in a suitable tank, container, or containment building with a proper assessment from a professional engineer, as per California Code of Regulations, section 66262.34 (a)(1)(A). -- Wet floors in acid portion of the acid/cyanide room are not properly draining and are accumulating liquid waste and sludge. Facility employees stated that the floors are thoroughly cleaned out once per year. If the floor is allowed to continuously hold waste, it is considered a storage tank and subject to all hazardous waste tank rules and regulations. -- Repair acid drainage system to ensure that all waste is properly drained to the sump or Ccean up drips and spills at the end of each working day or after a shift is completed. Copy of DTSC's wet floor guidance will be provided with this inspection report.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 10/17/2017. Receiving Area: one trash can used to accumulate gloves and wipes contaminated/saturated with perchloroethylene that are managed as hazardous waste is un-labeled. Filter Press: One hopper used to accumulate pressed sludge until it is transferred to the totes (every 2-3 weeks) is un-labeled. Outside Entrance to Plating Line: One trash bin used to accumulate contaminated gloves and personal protective equipment that is managed as hazardous waste is un-labeled. NOTE: Ensure that trash can is tightly closed when waste it not being added or removed. Cyanide Batch Treatment Tank: One tank used to accumulate cyanide first rinse waste solution before being treated every 1-2 weeks is marked as hazardous waste and with an initial accumulation date of "weekly," but with no other required information. NOTE: An initial accumulation date of "emptied daily," if the container/tank is emptied daily or a month/day/year date may be used. Container Treatment Area: One tank used to [Truncated]

Eval Date: 08-25-2015  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Onsite treatment system consists of four main treatment processes: batch treatment of select cyanide wastes, treatment of cyanide containing rinse waters, treatment of metal bearing rinse wasters, and neutralization of acid and alkaline cleaner solutions (with metals). Annual PBR renewal last submitted via CERS ID 10078564 on 2/19/14. Treatment unit 1 consists of treatment of cyanide bearing wastes, which after cyanide destruct is commingled with metal bearing wastes for pH adjustment and metals removal and pressing to dry. Additional input to system comes from sludge removed from Unit 3 (acid and alkaline cleaner neutralization) Noted that plating area is fitted with spray rinses for cyanide, and that specific cyanide related training materials were available and had been presented to personnel (training logs reviewed - 12/18/14) Closure plan modified June 2015, now address CERS identified units 3, 4, 5, and 6 (inspector ID units 2, 3). Reviewed Waste analysis [Truncated]

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 08-25-2015  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Inspection includes buildings with addresses of 890 (main plating areas), 882 (storage, future activity) and 855 (polishing, some waste storage). Change of ownership of business February, 2015. Prior ownership and management failed to respond to previously issued NOI. 855 is across street from 890/882 but is contiguous with access directly across street driveway to driveway. Buffing and polishing rooms at 855 are swept daily and waste is placed in containers located behind 882/890. Buffing wheels handled same manner once spent. Storing empty containers behind building, each marked with date. Storing waste gold waste and zincate. All containers properly and completely labeled. 882 no waste in building. totes for storage of solid wastes behind this building. 890 Cyanide rinse station has welled bottom of station used to collect day's spray, at end of each work shift

Eval Date: 09-11-2017  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On-site to conduct a routine hazardous waste inspection. The facility specializes in gold and electroless nickel plating for small to medium sized metal products made of aluminum, copper, stainless steel, and other metals. Wastes generated include waste plating solutions, waste rinse baths and spray rinse water (e.g. wet floors), filter cake from hazardous waste treatment unit, solvent-contaminated wipes, contaminated personal protective equipment, and universal wastes from general building maintenance and upkeep. Metal plating solutions, filter cake, and waste hydrofluoric acid are collected and managed as hazardous waste. Rinse water baths are re-used until spent and then treated on-site. Spray rinses directed over the plating baths to minimize waste generation are also used. Plating Area: Main plating area consists of two rooms with grated wet floors. Wet floors are designed to drain to their designated lift station (one for cyanide rinse water, one for G heavy metalG [Truncated])

floor drainage. Rinse water gravity flows through its own piping run (that shares a trench with the secondarily-containing CN rinse water pipe) to a designated sump that continuously pumps the heavy metal rinsewater to the equalization tank. The equalization tank is a poly tank with integral secondary containment that is fitted with an overflow alarm and, per Mr. Walker, a leak detection sensor in the interstitial space of the tank. Heavy metal rinse water is continuously pumped to the G AcidG and then the G pH ControlG tanks where the rinsewaters are pH adjusted with caustic soda, polymer is added as a flocculant, and ferrous sulfate is added as a precipitant. The caustic soda, polymer, and ferrous [Truncated]

Eval Notes: Unit 3 of three fixed treatment units on-site and identified as HM003 via CERS. Unit 3 is used to batch treat waste acid and alkaline cleaners, including nitric acid, Tech SC, Tech Etch, Desmuit B10, Bright Dip, and Bright Dip rinse. The waste acid and alkaline cleaners are stored in one of the twelve 55 gallon Nalgene containers in the bermed container containment pad. Per facility staff, the acid and alkaline cleaners are stored for anywhere between one week and three months before being pH neutralized and the metals allowed to precipitate out of solution. The sludge is stored in a metal holding tank where it gravitationally separates from the liquid fraction. After a measurable amount of sludge accumulates, it is manually pumped to the filter press in Unit 1 for further treatment. The liquid fraction is pumped to the pH Control of Unit 1 for further treatment. The following documents were reviewed: - Waste Analysis Plan - Inspection Schedule and Logs - Tank [Truncated]

Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Unit 2 (CERS Identified as unit 3)-- cyanide batch treatment Treatment takes place in single small tank, independent of cyanide rinse water treatment.

Eval Division: Santa Clara County Environmental Health  
Eval Program: PBR  
Eval Source: CERS

Eval General Type: Other/Unknown  
Eval Date: 02-13-2020  
Violations Found: Yes  
Eval Type: Other, not routine, done by local agency  
Eval Notes: Inspection today was to discuss changes to facility with management team from Hammon and to observe noted changes to the layout of the facility regarding the location of batch treatment of cyanide bearing zincate rinses. Onsite with Michelle Santos, HMSII and Max Potter, City of Palo Alto Public Works. Observed change to process of treating zincate cyanide rinses. Wastes no longer treated in tank within the electroless nickel room, but now transferred to a series of nalgene containers on the building's exterior. Process as described by site personnel is that zincate rinses are moved daily to the "old" batch treat tank. From there, waters are moved as needed to nalgene drums in the bermed covered area exterior the building. Bleach is added, and solution is stirred with approximately 8 hour retention time. Site then uses a colorimetric indicator vial to measure the bleach content of the solution, under the assumption that if excess bleach is noted, all cyanide will be [Truncated]

Violations Found: Yes  
Eval Type: Other, not routine, done by local agency  
Eval Notes: Limited inspection in response to items noted in 8/25/15 NOI which were not noted as corrected as of date of inspection as well as POTW referral. On February 1, Palo Alto Regional Water Quality Control Senior Industrial Waste Inspector James Stuart shared information obtained through sampling showing that cyanide was being found commingled with acidic nickel containing wastestreams. Data provided by Mr. Stuart showed the presence of cyanide in the the plating area transfer sump as well as in the first stage of the treatment system AFTER cyanide treatment. On Feb 2, I met with Hammon Plating to discuss the possible sources of contamination. Hamman has undertaken the following potential remedies: -Replacement of cyanide management area containment pan piping to larger piping to better facilitate removal of standing liquids and prevent overflow and spill to non-cyanide areas. -Isolation and repair of piping from containment sump trench to lift stations. Pipe was [Truncated]

Eval Notes: Inspection to discuss changes to facility with management team of Hammon Plating. Inspector was made aware of changes to configuration and placement of cyanide batch treatment tank. Visited site on Thursday, April 14 for confirmation and photograph. Tank has been moved from its longstanding location within the building to a containment area outside. Tank is now placed on top of shallow containment structure within a bermed area. Bermed area also holds up to 10x70 gallon nalgene containers used for the neutralization of strong acid and caustic solutions. Two nalgene containers share a single shallow containment structure within the berm. In order for authorization to treat (1) Cyanide bearing wastes and/or (2) concentrated acid solutions, the bermed areas must first be segregated. - Title 22, CCR, section 66265.193(e)(1)(A) requires an "external liner system" to be able to contain 100% of the capacity of the largest tank within its boundary IN ADDITION TO THE [Truncated]

Eval Notes: Unit 2 of three fixed treatment units on-site and identified as HM002 via CERS. Unit 2 is used to batch treat G first rinse cyanide rinse waters from the rinse tanks. The rinse waters are accumulated in a holding tank in the acid/cyanide plating room and batch treated with the manual addition of sodium hypochlorite every 1-2 weeks. After treatment, the treated cyanide rinse water is discharged to the cyanide sump and pumped into Unit 1, along with the other cyanide-containing rinse water wastes, for further treatment. The following documents were reviewed: - Waste Analysis Plan - Inspection Schedule and Logs - Tank Inspection Records - Tank System Assessment - Closure Plan - Closure Cost Estimate - 2017 Annual Notification

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN  
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)  
provides California with information on hazardous waste shipments for  
generators, transporters, and treatment, storage, and disposal  
facilities.  
RCRAInfo is a national information system that supports the Resource  
Conservation and Recovery Act (RCRA) program through the tracking of  
events and activities related to facilities that generate, transport,  
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA  
program staff to track the notification, permit, compliance, and  
corrective action activities required under RCRA.

Local Agency: SANTA CLARA VALLEY WATER DISTRICT  
RB Case Number: 43S0128  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil  
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride  
Site History: The Teledyne property is part of a two-property Superfund site along with the adjacent Spectra-Physics property. The responsible parties (RPs) for the Teledyne/Spectra-Physics site completed a Monitored Natural Attenuation (MNA) study in the off-property area north of and downgradient of the site. The MNA study concluded that natural breakdown of the chlorinated volatile organic compounds of concern is occurring naturally and at the same rate as groundwater extraction. As a result, only a few of the off-property downgradient extraction wells were operating mainly to maintain hydraulic control of the plume. The RPs completed a pilot study to test the feasibility of enhanced reductive dechlorination (ERD) and concluded that ERD is feasible with bioaugmentation of the Shallow Zone. Within the last ten years, the RPs detected elevated source areas at the Teledyne property using high resolution technology and continuously logged and screened ERD injection well boreholes. Implementing a full-scale ERD treatability study, they have been and are currently remediating the property with groundwater-CVOC levels dropping from as much as over 80,000 ug/l to low multiples of MCLs. Several rounds of ERD injections successfully cleaned up most of the Shallow Zone at the Teledyne property and the adjacent Spring Street residential area to drinking water standards and the treatability study was even more successful in the underlying Upper and Lower Intermediate Zones. More recently, the RPs also assertively evaluated potential IA VI in the off-property commercial North Bayshore and residential Spring Street areas to conclude that IA VI is not occurring in most of the commercial area and is occasionally occurring in several homes in the residential area. The RPs installed sub-slab depressurization systems in the impacted on-property commercial buildings and offered the affected off-property residents crawl space fans to address the issue.

Background Info: Teledyne Semiconductor has operated a semiconductor manufacturing facility at this one-acre site since 1962. Chemicals used in the manufacturing process and wastes generated by the process are handled and stored onsite.  
In 1982, Teledyne notified the RWQCB that soil and groundwater near underground solvent storage tanks was contaminated. Further study revealed that a groundwater contaminant plume had migrated northward and contaminated forty private domestic wells. The contaminants identified in soil and groundwater include trichloroethylene (TCE), dichloroethylene (DCE), Freon-113, dichlorobenzene (DCB), perchloroethylene (PCE), and xylene.  
About 270,000 people residing within three miles of the site depend on groundwater as a source of drinking water. The groundwater contamination represents a potential threat to municipal and other wells.

Threat To Public Health & Env: are trichloroethylene (TCE), dichloroethylene (DCE), Freon-113, dichlorobenzene (DCB), perchloroethylene (PCE) and xylene. About 270,000 people residing within 3 miles of the site depend on ground water as a source of drinking water. The ground water contamination represents a potential threat to municipal and other wells.

Site Activity Status: An investigation conducted in June, 1984, revealed that solvents had contaminated private wells to the north of the site. Contaminated wells were closed and an alternate drinking water supply was provided to affected residents. A ground water extraction system was installed onsite and began operating in October, 1986. Characterization of soil and ground water contamination is continuing.

 Quarterly Update: Teledyne, Inc. originally operated their facility under Tiered Permitting but submitted a Part A application on 11/19/1980 and received an ISD on 4/6/1981. Over the years Teledyne applied for many permits including variance requests, a Part B, and Permit by Rule. They have also gone through many name changes which include Teledyne Inc, Teledyne Components, Telcom, and finally Teledyne Semiconductor Inc (TSI). By 1994 TSI began looking into closing their Interim Status units and operate as a generator. Microchip Technology Inc. purchased all of TSI's permits in 2001 and now operates the site.

 Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.  
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Completed Info:

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 07/01/1991  
Comments: Site Screening done. This 1/3 acre site was leased by Fairchild Semiconductor Corporation from its owners, Edward & Gladys Schlaager in 1957. Fairchild's operation through 1967 involved use of small quantities of trichlorethylene (TCE) and acetone. Advalloy leased the property in 1968 and purchased it in 1971. Advalloy manufactured lead mounting frames for printed circuit boards at this facility until closure of operation in December 1989. Currently, Advalloy is in bankruptcy and the site is unoccupied. Prompted by discovery of volatile organic compounds in groundwater at a downgradient site, RWQCB advised groundwater investigation at Advalloy site. Shallow monitoring well samples showed the presence of 1,1 dichloroethane, 1,1 dichloroethene, trans-1,2 dichloroethene, trichloroethylene, and ethylbenzene in groundwater. In view of the use of the various solvents at the site and a history of spillages and violations, Advalloy was determined to be a source of groundwater contamination. However, the impacted shallow aquifer has no beneficial use and is not locally interconnected with the deeper aquifer. Despite some potential, release of hazardous chemicals is not evident through routes of surface water, air, or soil.

Status: Completed - Case Closed  
Status Date: 04/15/2015  
Case Worker: AC  
RB Case Number: 19-049  
Local Agency: SANTA CLARA COUNTY LOP  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Local Case Number: 06S2W17R01f  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Benzene, Diesel, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene  
Site History: The site is currently an active Shell-branded service station located on the northwest corner at the intersection of North Rengstorff and Central Expressway. The station facilities consist of a small kiosk, a car wash, three fuel dispenser islands and four underground storage tanks (USTs). Remediation has been conducted since 1991 to address contamination associated with leaking USTs. Remediation activities included excavation of 1,800 cubic yards of soil, soil vapor extraction, and groundwater extraction. Case closure was previously

issued by the County of Santa Clara DEH on April 11, 2005, and fifteen of the twenty existing monitoring wells were destroyed. Remaining wells were maintained by Shell as part of an ongoing groundwater assessment program. The case was re-opened in August 2006 and groundwater extraction resumed until June 2008.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Standard Voluntary Agreement  
Completed Date: 06/19/2018  
Comments: DTSC and Lennar executed the Voluntary Cleanup Agreement, Docket No. HSA-FY17/18-136, for overseeing activities performed at the project site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction  
Completed Date: 08/02/2019  
Comments: DTSC executed and recorded the Land Use Covenant and Agreement, Environmental Restrictions (LUC), Santa Clara County Series Number 24246045, for the Mora Drive project, also known as the Estancia residential development, comprising of approximately 4.53 acres. In general, the LUC prohibits Building any structures intended for human occupancy without an engineered vapor intrusion mitigation system approved by DTSC; Construction of any groundwater well without prior DTSC written approval; Extraction, utilization, or consumption of groundwater without prior DTSC written approval; Conducting activity that may alter, interfere with, or otherwise affect the integrity or effectiveness of, or the access to, the groundwater monitoring wells without prior DTSC written approval; Conducting activity that may alter, interfere with, or otherwise affect the integrity or effectiveness of, or the access to, any vapor intrusion mitigation systems as it pertains to each building on the property without prior DTSC written approval; and Conducting any sub-slab construction work or modification of vapor barriers and sub-slab venting systems associated with vapor intrusion mitigation systems installed at the property without prior DTSC written approval.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Responsible Agency Review  
Completed Date: 06/28/2019  
Comments: DTSC approved a Removal Action Workplan (RAW) for the site on June 8, 2019. The RAW requires (a) installation of vapor intrusion mitigation systems (VIMS) beneath all new building foundations and (b) execution of a land use covenant to restrict extraction of groundwater or installation of wells without DTSC s approval and construction of any building without installation of the DTSC-approved VIMS. In accordance with CEQA, DTSC approved the Notice of Determination in support of DTSC s discretionary decision on the RAW.

Completed Sub Area Name: Not reported  
Completed Document Type: Certification  
Completed Date: 09/24/2019  
Comments: DTSC issued the Removal Action Certification for Building 1 attesting that Lennar (a) had implemented the removal action by installing a passive sub-slab venting system at Building 1 in accordance with the Removal Action Workplan and Vapor Intrusion Mitigation Plan, (b) had performed ambient air, indoor air, and sub-slab gas sampling events for Building 1 consistent with the Operation and Maintenance Plan, and (c) had implemented the required institutional control remedy for the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operation & Maintenance Order/Agreement  
Completed Date: 08/02/2019  
Comments: DTSC executed an Operation and Maintenance Agreement with Lennar for (a) implementation of the DTSC-approved Vapor Intrusion Mitigation Plan dated 6/28/19, (b) operation and maintenance of the installed vapor intrusion mitigation system as specified in the DTSC-approved Operation and Maintenance Plan dated 6/28/19, and (c) reimbursement of DTSC oversight costs.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 07/03/2019  
Comments: On May 14, 2019, DTSC started the 30-day public comment period requesting comments on the draft RAW. During the public comment period DTSC received comments via emails and a comment letter. DTSC prepared the Responsiveness Summary responding to public comments.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Annual Oversight Cost Estimate  
Completed Date: 10/22/2019  
Comments: The cost estimate projects hours to be incurred (by staff classification) for planned oversight activities in fiscal year 2019/2020, which starts July 1, 2019 and ends June 30, 2020, and identifies the personnel labor rates.

Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 11/21/2019  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by installing a passive sub-slab venting systems at Buildings 19, 20, and 21 in accordance with the Removal Action Workplan and Vapor Intrusion Mitigation Plan and (b) had performed ambient air, indoor air, and sub-slab gas sampling events for the subject buildings consistent with the Operation and Maintenance Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 09/19/2019  
Comments: Previously, Lennar had prepared two Vapor Intrusion Mitigation Plan (VIMP) versions dated May 28, 2017 and June 28, 2019; and DTSC approved these plans on May 31, 2017 and July 3, 2019, respectively. The September 18, 2019 VIMP updates certain design elements and supersedes the earlier VIMP versions. The VIMP describes the design and installation of a vapor intrusion mitigation system beneath every new building within the 5.2-acre Mora Drive project area.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Plan Amendment  
Completed Date: 09/19/2019  
Comments: Previously, Lennar had prepared the Operation and Maintenance Plan (O&M Plan) dated June 28, 2019; and DTSC approved such plan on July 3, 2019. The September 18, 2019 O&M Plan updates certain design elements and supersedes the previous O&M Plan. The O&M Plan outlines the inspection, maintenance, and monitoring program for maintaining the proper function of the vapor intrusion mitigation systems for buildings within the 4.5-acre residential area currently owned by Lennar.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported

Completed Document Type: Removal Action Completion Report  
Completed Date: 12/16/2020  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by installing the passive VIMS in accordance with the RAW and VIMP, (b) had performed ambient air, indoor air, and sub-slab gas sampling events consistent with the O&M Plan, and (c) had converted the passive VIMS to active VIMS for Buildings 8, 12, 13, 14, 15 and 23 pursuant to the O&M Plan and BAAQMD permit.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 11/04/2020  
Comments: Lennar intends to establish that volatile organic compound (VOC) concentrations in vent riser gas collected from vent riser monitoring stations would be equivalent to the VOC concentrations in sub-slab gas collected from the sub-slab gas sampling probes (i.e., quick connect fittings). Lennar proposes to show this equivalency by

sampling vent riser gas and sub-slab gas on the same building at four active vapor intrusion mitigation systems (VIMS) and three passive VIMS.

- Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 05/31/2017  
Comments: Lennar Homes of California, Incorporated's consultant Trihydro Corporation prepared the Vapor Intrusion Mitigation Plan (VIMP) for the approximately 5.15-acre Mora-Ortega Parcel. The approximately 1-acre Plessey Micro Science site is located within the Mora-Ortega Parcel, which is owned by Lennar. The VIMP describes the design and installation of a sub-slab passive venting system coupled with a vapor barrier/gas membrane system beneath every new building within the Mora-Ortega Parcel.

Mitigation Plan and (b) had performed ambient air, indoor air, and sub-slab gas sampling events for the subject buildings consistent with the Operation and Maintenance Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Community Profile  
Completed Date: 05/06/2019  
Comments: The Community Profile provides the public with a description of the Site and the community in which it is located, and helps DTSC determine potential community interest in the cleanup, and recommends future public participation activities for the cleanup. In addition, the Community Profile also describes community demographics and land uses in areas surrounding the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 10/15/2019  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by installing a passive sub-slab venting system (SSVS) at Building 5 in accordance with the Removal Action Workplan and Vapor Intrusion Mitigation Plan, (b) had performed ambient air, indoor air, and sub-slab gas sampling events for Building 5 consistent with the Operation and Maintenance Plan (O&M Plan), and (c) had converted the passive SSVS to active sub-slab depressurization system for Building 5 pursuant to the Bay Area Air Quality Management District's Temporary Permit to Operate and O&M Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Application  
Completed Date: 04/27/2017  
Comments: Application for a Voluntary Cleanup Agreement requesting DTSC to provide review and approval of a Site Management Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Soils Management Plan  
Completed Date: 05/19/2017  
Comments: The Site Management Plan (SMP) establishes general protocols for handling soil, soil vapor, and groundwater during utility line removal, soil excavation, and future construction at the Mora Drive site. The SMP includes the Health and Safety Plan as Appendix A and a separate SMP for the future city park as Appendix B.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Voluntary Cleanup Agreement Termination Notification  
Completed Date: 09/19/2017  
Comments: The Voluntary Cleanup Agreement's (VCA) scope of work specifies that DTSC review and provide comments on the Site Management Plan. Since DTSC completed the Site Management Plan review process, the VCA's scope of work is fulfilled. DTSC notified Lennar that the VCA will be terminated on October 19, 2017.

Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 07/03/2019  
Comments: Lennar had prepared the Vapor Intrusion Mitigation Plan (VIMP) dated May 28, 2017 and DTSC approved such plan on May 31, 2017. The 2019 VIMP updates certain design elements and supersedes the 2017 VIMP. The VIMP describes the design and installation of a vapor intrusion mitigation system beneath every new building within the 5.2-acre Mora Drive project area.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Workplan  
Completed Date: 06/28/2019  
Comments: DTSC approved a Removal Action Workplan (RAW) for the site on June 8, 2019. The RAW requires (a) installation of vapor intrusion mitigation systems (VIMS) beneath all new building foundations and (b) execution of a land use covenant to restrict extraction of groundwater or installing of wells without DTSC's approval and construction of any building without installation of the DTSC-approved VIMS. In accordance with CEQA, DTSC approved the Notice of Determination in support of DTSC's discretionary decision on the RAW.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fact Sheets  
Completed Date: 05/10/2019  
Comments: DTSC mailed the Community Update on 5/10/2019 to approximately 550 addresses on the project's mailing list announcing the 30-day public comment period for the Removal Action Workplan to begin on 5/14/2019.

general, the LUC prohibits Building any structures intended for human occupancy without an engineered vapor intrusion mitigation system approved by DTSC; Construction of any groundwater well without prior DTSC written approval; Extraction, utilization, or consumption of groundwater without prior DTSC written approval; Conducting activity that may alter, interfere with, or otherwise affect the integrity or effectiveness of, or the access to, the groundwater monitoring wells without prior DTSC written approval; Conducting activity that may alter, interfere with, or otherwise affect the integrity or effectiveness of, or the access to, any vapor intrusion mitigation systems as it pertains to each building on the property without prior DTSC written approval; and Conducting any sub-slab construction work or modification of vapor barriers and sub-slab venting systems associated with vapor intrusion mitigation systems installed at the property without prior DTSC written approval.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Responsible Agency Review  
Completed Date: 06/28/2019  
Comments: DTSC approved a Removal Action Workplan (RAW) for the site on June 8, 2019. The RAW requires (a) installation of vapor intrusion mitigation systems (VIMS) beneath all new building foundations and (b) execution of a land use covenant to restrict extraction of groundwater or installation of wells without DTSC s approval and construction of any building without installation of the DTSC-approved VIMS. In accordance with CEQA, DTSC approved the Notice of Determination in support of DTSC s discretionary decision on the RAW.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Certification  
Completed Date: 09/24/2019  
Comments: DTSC issued the Removal Action Certification for Building 1 attesting that Lennar (a) had implemented the removal action by installing a passive sub-slab venting system at Building 1 in accordance with the Removal Action Workplan and Vapor Intrusion Mitigation Plan, (b) had performed ambient air, indoor air, and sub-slab gas sampling events for Building 1 consistent with the Operation and Maintenance Plan, and (c) had implemented the required institutional control remedy for the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operation & Maintenance Order/Agreement  
Completed Date: 08/02/2019  
Comments: DTSC executed an Operation and Maintenance Agreement with Lennar for (a) implementation of the DTSC-approved Vapor Intrusion Mitigation Plan dated 6/28/19, (b) operation and maintenance of the installed vapor intrusion mitigation system as specified in the DTSC-approved Operation and Maintenance Plan dated 6/28/19, and (c) reimbursement of DTSC oversight costs.

Completed Document Type: Operations and Maintenance Plan Amendment  
Completed Date: 09/19/2019  
Comments: Previously, Lennar had prepared the Operation and Maintenance Plan (O&M Plan) dated June 28, 2019; and DTSC approved such plan on July 3, 2019. The September 18, 2019 O&M Plan updates certain design elements and supersedes the previous O&M Plan. The O&M Plan outlines the inspection, maintenance, and monitoring program for maintaining the proper function of the vapor intrusion mitigation systems for buildings within the 4.5-acre residential area currently owned by Lennar.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 12/17/2019  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by installing passive sub-slab venting system (SSVS) at Buildings 2, 7, 24, and 25 in accordance with the Removal Action Workplan and Vapor Intrusion Mitigation Plan, (b) had performed ambient air, indoor air, and sub-slab gas sampling events for the subject buildings consistent with the Operation and Maintenance Plan (O&M Plan), and (c) had converted the passive SSVS to active sub-slab depressurization system for Buildings 2, 7, 24, and 25 pursuant to the Bay Area Air Quality Management District's Temporary Permit to Operate and O&M Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 01/07/2020  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by installing a passive sub-slab venting system at Building 9 in accordance with the Removal Action Workplan and Vapor Intrusion Mitigation Plan and (b) had performed ambient air, indoor air, and sub-slab gas sampling events for the subject building consistent with the Operation and Maintenance Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 01/16/2020  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by installing a passive sub-slab venting system at Buildings 10, 17, and 18 in accordance with the Removal Action Workplan and Vapor Intrusion Mitigation Plan and (b) had performed ambient air, indoor air, and sub-slab gas sampling events for the subject buildings consistent with the Operation and Maintenance Plan.

Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 01/16/2020  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by installing a passive sub-slab venting system at Buildings 16 and 22 in accordance with the Removal Action Workplan and Vapor Intrusion Mitigation Plan and (b) had performed ambient air, indoor air, and sub-slab gas sampling events for the subject buildings consistent with the Operation and Maintenance Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 12/16/2020  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by installing the passive VIMS in accordance with the RAW and VIMP, (b) had performed ambient air, indoor air, and sub-slab gas sampling events consistent with the O&M Plan, and (c) had converted the passive VIMS to active VIMS for Buildings 8, 12, 13, 14, 15 and 23 pursuant to the O&M Plan and BAAQMD permit.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 11/04/2020  
Comments: Lennar intends to establish that volatile organic compound (VOC) concentrations in vent riser gas collected from vent riser monitoring stations would be equivalent to the VOC concentrations in sub-slab gas collected from the sub-slab gas sampling probes (i.e., quick connect fittings). Lennar proposes to show this equivalency by sampling vent riser gas and sub-slab gas on the same building at four active vapor intrusion mitigation systems (VIMS) and three passive VIMS.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 05/31/2017  
Comments: Lennar Homes of California, Incorporated's consultant Trihydro Corporation prepared the Vapor Intrusion Mitigation Plan (VIMP) for the approximately 5.15-acre Mora-Ortega Parcel. The approximately 1-acre Plessey Micro Science site is located within the Mora-Ortega Parcel, which is owned by Lennar. The VIMP describes the design and installation of a sub-slab passive venting system coupled with a vapor barrier/gas membrane system beneath every new building within the Mora-Ortega Parcel.

Completed Document Type: Removal Action Completion Report  
Completed Date: 02/27/2020  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by  
installing a passive sub-slab venting system at Building 11 in  
accordance with the Removal Action Workplan and Vapor Intrusion  
Mitigation Plan and (b) had performed ambient air, indoor air, and  
sub-slab gas sampling events for the subject buildings consistent  
with the Operation and Maintenance Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Community Profile  
Completed Date: 05/06/2019  
Comments: The Community Profile provides the public with a description of the  
Site and the community in which it is located, and helps DTSC  
determine potential community interest in the cleanup, and recommends  
future public participation activities for the cleanup. In addition,  
the Community Profile also describes community demographics and land  
uses in areas surrounding the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 10/15/2019  
Comments: DTSC concluded that Lennar (a) had implemented the removal action by  
installing a passive sub-slab venting system (SSVS) at Building 5 in  
accordance with the Removal Action Workplan and Vapor Intrusion  
Mitigation Plan, (b) had performed ambient air, indoor air, and  
sub-slab gas sampling events for Building 5 consistent with the  
Operation and Maintenance Plan (O&M Plan), and (c) had converted the  
passive SSVS to active sub-slab depressurization system for Building  
5 pursuant to the Bay Area Air Quality Management District s

Temporary Permit to Operate and O&M Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Application  
Completed Date: 04/27/2017  
Comments: Application for a Voluntary Cleanup Agreement requesting DTSC to provide review and approval of a Site Management Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Soils Management Plan  
Completed Date: 05/19/2017  
Comments: The Site Management Plan (SMP) establishes general protocols for handling soil, soil vapor, and groundwater during utility line removal, soil excavation, and future construction at the Mora Drive site. The SMP includes the Health and Safety Plan as Appendix A and a separate SMP for the future city park as Appendix B.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Voluntary Cleanup Agreement Termination Notification  
Completed Date: 09/19/2017  
Comments: The Voluntary Cleanup Agreement s (VCA) scope of work specifies that DTSC review and provide comments on the Site Management Plan. Since DTSC completed the Site Management Plan review process, the VCA s scope of work is fulfilled. DTSC notified Lennar that the VCA will be terminated on October 19, 2017.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 07/03/2019  
Comments: Lennar had prepared the Vapor Intrusion Mitigation Plan (VIMP) dated May 28, 2017 and DTSC approved such plan on May 31, 2017. The 2019 VIMP updates certain design elements and supersedes the 2017 VIMP. The VIMP describes the design and installation of a vapor intrusion mitigation system beneath every new building within the 5.2-acre Mora Drive project area.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Workplan  
Completed Date: 06/28/2019  
Comments: DTSC approved a Removal Action Workplan (RAW) for the site on June 8, 2019. The RAW requires (a) installation of vapor intrusion mitigation systems (VIMS) beneath all new building foundations and (b) execution of a land use covenant to restrict extraction of groundwater or installing of wells without DTSC s approval and construction of any building without installation of the DTSC-approved VIMS. In accordance with CEQA, DTSC approved the Notice of Determination in support of DTSC s discretionary decision on the RAW.

Background Info: Plessey Micro Sciences began electronic component manufacturing operations at the site in the mid-1960s. Four underground storage tanks were initially installed to collect contaminated rinse water. The collection system was used for xylene reclamation and acid neutralization. In January 1981, Plessey ceased operations and vacated the Site.

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste Type2: Not reported  
 Waste2: Contaminated Ground Water  
 Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.  
 Secondary Waste: Not reported  
 Secondary Waste Type: Not reported  
 Design Flow: 0  
 Baseline Flow: 0  
 Reclamation: No reclamation requirements associated with this facility.  
 POTW: The facility is not a POTW.  
 Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.  
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

**Actual:**  
**54 ft.**

CA BOND EXP. PLAN:  
 Responsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN  
 Project Revenue Source Company: Plessey, Inc.  
 Project Revenue Source Addr: 325 Westchester Avenue  
 Project Revenue Source City,St,Zip: White Plains, NY 10604  
 Project Revenue Source Desc: DHS has issued a remedial action order and Plessey has stipulated to comply with this order. DHS has budgeted \$50,000 for oversight and monitoring of cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with remedial investigations and cleanup activities.  
 Site Description: From about the mid-1960s to 1981, Plessey manufactured electronic components. Chemical processes used included plating and etching. Wastewater was drained to underground storage tanks where material or waste was neutralized and stored prior to disposal.  
 Hazardous Waste Desc: Wastes include perchloroethylene (PCE), trichloroethylene (TCE), chromic acid and xylene.  
 Threat To Public Health & Env: Depth of the shallowest aquifer is about 32 feet. Ground water contamination and its potential impact on drinking water supplies is the primary concern.  
 Site Activity Status: Plessey Micro Sciences, Inc., retained a contractor and completed a preliminary investigation in June, 1987. Result of the investigation indicated ground water contamination by perchloroethylene, trichloroethylene and methylene chloride. A Phase II RI report was submitted September, 1988. It appears that further investigation will be required before the FS and RAP can be Started.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 01/12/2000  
Comments: Approved Design. The remedial enhancement plan to address full plume containment and/or groundwater remediation was approved. Four wells will be installed further downgradient at the northern boundary of the TRW/Vidar site. The extraction wells will be connected to the existing treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 10/13/1999  
Comments: Approved Remedial Design for source control remedial enhancement to address soil and groundwater contamination near the source areas. Ten dual-phase vertical extraction wells will be installed within the Site near the former underground tank locations. The extraction wells will be connected to the existing treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 10/24/2002  
Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 10/24/2002  
Comments: Completed Remedial Action. Ten dual-phase (vapor and groundwater) extraction wells behind the onsite buildings, and four extraction wells downgradient at the northern boundary of the adjacent TRW/Vidar Site (77 Ortega Drive) were installed. The new extraction wells were connected to the existing treatment system at the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 02/07/2000  
Comments: Completed RA. Soil vapor extraction (SVE) and air inlet wells were

abandoned. 600 cubic yards of soil was excavated in the former SVE area, aerated and redeposited.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operation and Maintenance Manual  
Completed Date: 04/15/1997  
Comments: Amended Operation and Maintenance Plan for air stripper

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 09/12/1996  
Comments: Approved design for horizontal extraction wells to enhance the existing remedial system. The design was not implemented due to access issues.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 11/16/1993  
Comments: Completed RA. Groundwater extraction at Well T-6 by the existing remedial system was stopped due to detection of dense non-aqueous phase liquid (DNAPL) of trichloroethylene. The DNAPL was pumped and collected in a baker tank and treated onsite.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 06/24/1993  
Comments: Completed RA. Soil vapor extraction/treatment and groundwater extraction/treatment system constructed with three groundwater extraction wells, and 34 soil vapor extraction and 25 air inlet wells were installed. Soil vapor was treated using carbon absorption. Groundwater was treated using ultra violet light/hydrogen peroxide. The units were constructed inside the building at 2296 Mora Drive and include a volatile organic compound and water separator unit, a UV/peroxide unit, and a liquid carbon absorption unit. Treated water is discharged to the sanitary sewer under permit from the City of Mountain View or to the storm drain under a permit from the Regional Water Quality Control Board.

Completed Date: 05/05/1992  
Comments: Approved RAP. Soil cleanup by soil vapor extraction/treatment with activated carbon, and groundwater extraction/ treatment by ultra-violet peroxidation which was constructed during the pilot study.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 10/25/1991  
Comments: Completed RA. Five concrete underground tanks (A,B,C,D and F) were removed from a location behind the commercial buildings located at 2274-2296 Mora Drive. Tank E was removed in August 1989. The excavated pits were backfilled with clean fill approximately 455 cubic yards of soil were removed, aerated and disposed offsite. A soil vapor extraction system was installed to remediate the remaining volatile organic compounds in soil in other site areas. Initiated August 17, 1991 and completed October 25, 1991.

Comments: Completed PA. In January 1982, samples were collected from standing water in two of the tanks and the results detected perchloroethylene (PCE), chromium, and xylene. Investigations were conducted to delineate the lateral extent of the soil and groundwater contamination originating from releases at the tanks. Trichloroethylene (TCE), PCE, dichloroethylene (DCE), benzene, toluene, xylene and ethylbenzene were detected in the groundwater. These chemicals and chromium were also detected in the soils near the tanks.

Completed Document Type: Monitoring Report  
Completed Date: 04/14/2015  
Comments: Based on the results of the December 2014 monitoring event, the following actions are recommended: 1. Continue groundwater monitoring at a reduced schedule (e.g., semiannually) to monitor VOC concentrations over time; 2. Conduct additional in situ injections (3DMe or an alternative) in those areas where total VOC concentrations are greater than 500 µg/L; and 3. Following removal of the buildings (2274 2294 Mora Drive), proceed with VOC source area investigation and delineation in soil beneath the site and conduct excavation and removal, followed by additional treatment (3DMe or an alternative).

Completed Document Type: State/Federal Funded Site Work Order  
Completed Date: 06/19/2018  
Comments: DTSC issued the Stop Work Order for Contract 16-T4229 because (a) all works under this contract were completed and (b) the contract will expire on June 30, 2018.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: State/Federal Funded Site Work Order  
Completed Date: 03/06/2018  
Comments: DTSC issued a Work Order for ERRG to conduct tasks as described in Contract 17-T4411.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: State/Federal Funded Site Work Order  
Completed Date: 07/11/2019  
Comments: The Work Order Amendment specifies the following changes: Deletion of Task 4 Post Injection Groundwater Monitoring Event 4 as described in Work Order 001 issued on March 6, 2018. Addition of the new Tasks 5 and 6. Authorization for Contractor to access and use the funding from the contingency line item of \$10,965.47 as specified in the Work Order 001 issued on March 6, 2018.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: State/Federal Funded Site Contract Fiscal Approval (CFA)  
Completed Date: 10/08/2020  
Comments: The Request for Funding a Contract/Agreement (RFF# 20-0150) extends Contract 17-T4411 end date from 12/31/2020 to 6/30/2023 and adds \$80,000.00 to the contract for continual groundwater monitoring at the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: State/Federal Funded Site Contract  
Completed Date: 11/23/2020  
Comments: Contract 17-T4411 A-1 extends the end date from 12/31/2020 to 6/30/2023, adds Tasks 5, 6, and 7 to the Scope of Work, and adds \$80,000.00 to the contract.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Project Management  
Completed Date: 06/30/2021  
Comments: From July 1, 2020 through June 30 2021, DTSC performed various project management tasks for the subject project site such as EnviroStor update, Terradex Alert response and coordination, weekly/periodic update, project tracking, management briefing, management inquiry response, project history research, public inquiry response, public record act compliance and coordination, and other unspecified activities that are not associated with any document types or activities specified on the Multi Project Code list.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report  
 Completed Date: 12/14/2017  
 Comments: ERRG conducted a groundwater monitoring event in August 2017 at 17 groundwater monitoring wells adjacent to the Plessey Micro Science site. This is the first sampling event following in-situ injections at the Plessey site in April and May 2017.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report  
 Completed Date: 01/22/2019  
 Comments: The Groundwater Monitoring Summary documents the analytical results for groundwater samples collected in October 2018 in 14 groundwater monitoring wells at and adjacent to the Plessey Micro Science project area.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Remedial Action Completion Report  
 Completed Date: 05/22/2018  
 Comments: The Completion Report summarizes the following remediation activities conducted at the site: 1. Excavation and off-site disposal of soil contaminated with hexavalent chromium, cobalt, nickel, and volatile organic compounds (VOCs); and 2. In-situ treatment of VOC-contaminated groundwater to reduce chemical concentrations. These activities were performed pursuant to the January 2017 DTSC-approved "Remedial Implementation Workplan".

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Technical Workplan  
 Completed Date: 04/20/2018  
 Comments: The Work Plan proposes soil gas sampling at an approximately 5.2-acre residential development area located east of the Mora Drive and Ortega Avenue intersection in Mountain View, California. DTSC is overseeing environmental investigation and cleanup of a 1.0-acre parcel, identified as the Plessey Micro Science site, within the 5.2-acre residential development area. Since the Work Plan proposes several soil gas sampling locations within the Plessey Micro Science site, DTSC commented on the Work Plan.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Well Installation Workplan  
 Completed Date: 08/09/2018  
 Comments: The Work Plan proposes installation of five groundwater monitoring wells at the site.

Comments: The Work Plan proposes groundwater sampling at nine locations, four of which (i.e., EGW-1, EGW-2, EGW-3, and EGW-4) are located within the Plessey Micro Science site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 05/23/2018  
Comments: The report presents soil gas sampling results at 40 temporary soil gas wells, 20 wells installed at 5 feet below ground surface (bgs) and 20 wells installed at 10 feet bgs, at the 5.2-acre residential development area. Four nested wells (i.e., SV-3, SV-5, SV-8, and SV-9) are located within the Plessey Micro Science site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 07/03/2018  
Comments: The Groundwater Sampling Report documents groundwater investigation conducted on 5/8/18 at nine temporary borings within the approximately 5.2-acre Mora Drive project area.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 09/17/2018  
Comments: The Soil Vapor Sampling Summary Report presents soil gas sampling results from five temporary soil vapor monitoring wells within the approximate boundaries of excavations PL-A, PL-B, PL-E, PL-I and PL-J. These wells were installed to a depth of 10 feet below ground surface.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 07/03/2019  
Comments: The Groundwater Monitoring Summary presents the analytical results for the March 2019 groundwater monitoring event.

Completed Document Type: Correspondence  
Completed Date: 05/09/2017  
Comments: Excavation at the proposed public park area within the Plessey Micro Science site is now complete and based on the data, no restrictions on soil handling will be required in the proposed public park.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: State/Federal Funded Site Work Order  
Completed Date: 11/29/2016  
Comments: Work Order 001 for Contract 16-T4229 authorizes ERRG to prepare a remedial implementation workplan, conduct fieldwork, prepare a completion report, and submit a letter report following each of the four groundwater monitoring events.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 01/12/2017  
Comments: DTSC understands that that the waste generated during the cleanup activities are not considered a listed waste (either non-specific source or specific source) at the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 03/23/2017  
Comments: Once the excavation work is complete, all known contaminated soils will have been removed. Therefore, because there will be no known soil contamination remaining onsite, DTSC will not require a Site Management Plan to establish protocols for construction activities and long-term maintenance at the Site.

Completed Info:

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 01/12/2000  
Comments: Approved Design. The remedial enhancement plan to address full plume containment and/or groundwater remediation was approved. Four wells will be installed further downgradient at the northern boundary of the TRW/Vidar site. The extraction wells will be connected to the existing treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 10/13/1999  
Comments: Approved Remedial Design for source control remedial enhancement to address soil and groundwater contamination near the source areas. Ten dual-phase vertical extraction wells will be installed within the Site near the former underground tank locations. The extraction wells will be connected to the existing treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 10/24/2002  
Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 10/24/2002  
Comments: Completed Remedial Action. Ten dual-phase (vapor and groundwater) extraction wells behind the onsite buildings, and four extraction wells downgradient at the northern boundary of the adjacent TRW/Vidar Site (77 Ortega Drive) were installed. The new extraction wells were connected to the existing treatment system at the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 02/07/2000  
Comments: Completed RA. Soil vapor extraction (SVE) and air inlet wells were abandoned. 600 cubic yards of soil was excavated in the former SVE area, aerated and redeposited.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operation and Maintenance Manual  
Completed Date: 04/15/1997  
Comments: Amended Operation and Maintenance Plan for air stripper

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 09/12/1996  
Comments: Approved design for horizontal extraction wells to enhance the existing remedial system. The design was not implemented due to access issues.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 11/16/1993  
Comments: Completed RA. Groundwater extraction at Well T-6 by the existing remedial system was stopped due to detection of dense non-aqueous phase liquid (DNAPL) of trichloroethylene. The DNAPL was pumped and collected in a baker tank and treated onsite.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 06/24/1993  
Comments: Completed RA. Soil vapor extraction/treatment and groundwater extraction/treatment system constructed with three groundwater extraction wells, and 34 soil vapor extraction and 25 air inlet wells were installed. Soil vapor was treated using carbon absorption. Groundwater was treated using ultra violet light/hydrogen peroxide. The units were constructed inside the building at 2296 Mora Drive and include a volatile organic compound and water separator unit, a UV/peroxide unit, and a liquid carbon absorption unit. Treated water is discharged to the sanitary sewer under permit from the City of Mountain View or to the storm drain under a permit from the Regional Water Quality Control Board.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported

**S103981838**

Completed Date: 10/25/1991  
Comments: Completed RA. Five concrete underground tanks (A,B,C,D and F) were removed from a location behind the commercial buildings located at 2274-2296 Mora Drive. Tank E was removed in August 1989. The excavated pits were backfilled with clean fill approximately 455 cubic yards of soil were removed, aerated and disposed offsite. A soil vapor extraction system was installed to remediate the remaining volatile organic compounds in soil in other site areas. Initiated August 17, 1991 and completed October 25, 1991.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation / Feasibility Study  
Completed Date: 06/07/1991  
Comments: Completed RIFS.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 10/30/1989  
Comments: Pilot testing of an ultra-violet(UV)/peroxidation system designed to treat groundwater.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Public Participation Plan / Community Relations Plan  
Completed Date: 10/30/1989  
Comments: Approved Public Participation Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 08/11/1989  
Comments: Completed RA. A 200-gallon underground tank (Tank E) was removed. Soil surrounding the tank was contaminated with TCE and PCE. Contaminated soil was excavated and aerated. Excavated pit was backfilled with clean fill.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Assessment Report  
Completed Date: 01/20/1987  
Comments: Completed Site Screening

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Assessment Report  
Completed Date: 12/01/1985  
Comments: Completed PA. In January 1982, samples were collected from standing water in two of the tanks and the results detected perchloroethylene (PCE), chromium, and xylene. Investigations were conducted to delineate the lateral extent of the soil and groundwater contamination originating from releases at the tanks. Trichloroethylene (TCE), PCE, dichloroethylene (DCE), benzene, toluene, xylene and ethylbenzene were detected in the groundwater. These chemicals and chromium were also detected in the soils near the tanks.

Completed Date: 04/14/2015  
Comments: Based on the results of the December 2014 monitoring event, the following actions are recommended: 1. Continue groundwater monitoring at a reduced schedule (e.g., semiannually) to monitor VOC concentrations over time; 2. Conduct additional in situ injections (3DMe or an alternative) in those areas where total VOC concentrations are greater than 500 µg/L; and 3. Following removal of the buildings (2274 2294 Mora Drive), proceed with VOC source area investigation and delineation in soil beneath the site and conduct excavation and removal, followed by additional treatment (3DMe or an alternative).

**S103981838**

Comments: ERRG conducted a groundwater monitoring event in August 2017 at 17 groundwater monitoring wells adjacent to the Plessey Micro Science site. This is the first sampling event following in-situ injections at the Plessey site in April and May 2017.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 01/22/2019  
Comments: The Groundwater Monitoring Summary documents the analytical results for groundwater samples collected in October 2018 in 14 groundwater monitoring wells at and adjacent to the Plessey Micro Science project area.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 05/22/2018  
Comments: The Completion Report summarizes the following remediation activities conducted at the site: 1. Excavation and off-site disposal of soil contaminated with hexavalent chromium, cobalt, nickel, and volatile organic compounds (VOCs); and 2. In-situ treatment of VOC-contaminated groundwater to reduce chemical concentrations. These activities were performed pursuant to the January 2017 DTSC-approved "Remedial Implementation Workplan".

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 04/20/2018  
Comments: The Work Plan proposes soil gas sampling at an approximately 5.2-acre residential development area located east of the Mora Drive and Ortega Avenue intersection in Mountain View, California. DTSC is overseeing environmental investigation and cleanup of a 1.0-acre parcel, identified as the Plessey Micro Science site, within the 5.2-acre residential development area. Since the Work Plan proposes several soil gas sampling locations within the Plessey Micro Science site, DTSC commented on the Work Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Well Installation Workplan  
Completed Date: 08/09/2018  
Comments: The Work Plan proposes installation of five groundwater monitoring wells at the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 05/18/2018  
Comments: The Work Plan proposes groundwater sampling at nine locations, four of which (i.e., EGW-1, EGW-2, EGW-3, and EGW-4) are located within the Plessey Micro Science site.

Completed Document Type: Correspondence  
Completed Date: 01/28/2010  
Comments: Water Production Statement - the prior meter reading (July 1, FQ1-501) was 2266 cu ft (100 multiplier) and last reading was 5589. (No flow to storm drain, or FQ1-500). So,  $5589 - 2266 \times 100 = 332,100$  to convert to acre feet, divide by 43560 = 7.63 acre feet X \$520/acre feet = \$3966.85

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: State/Federal Funded Site Work Order  
Completed Date: 06/30/2010  
Comments: Work order to continue operation & maintenance of GW remedy.

Completed Area Name: PROJECT WIDE

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 11/13/1992  
Comments: Approved PEA. Shallow soil samples showed copper as high as 7,900 ppm and lead as high as 2,000 ppm. Other metal contaminants were also found in soil along with tetrachloroethylene as high as 940 ppm, and 1,1,1-TCA as high as 440 ppm. Although Symtron is located in an area known to have groundwater problems, no groundwater investigation was conducted.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 09/24/1991  
Comments: Completed Site Screening. Copper, lead and volatile organics have been detected in the soil. Site referred to DTSC by Mountain View Fire Department. 2227 Mora Drive address housed Symtron's hazardous materials storage area where acids, bases, oxidizers, & flammable liquids, as well as copper animated plates, were kept. 2235 Mora housed offices, photo darkroom, wet and dry quality control labs, and process operations. 2245 Mora operations included copper etching and black oxide operations & clean rooms used for Symtron's dry process. Symtron operated an onsite waste water treatment plant. Treated waste water and effluent went directly to the Mountain View sewer via an inground sump which served as a final clarifier. Closure sampling was conducted in March 1991 and included soil concrete chip, and wipe samples. Copper was detected as high as 7,900 ppm and 1,600 ppm in soil and concrete chip samples respectively. Lead was detected as high as 1,000 ppm in soil. Volatile organic compounds (VOCs) all tested below 1 ppm.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Other Report  
Completed Date: 09/27/2012  
Comments: Presents results of soil samples collected from this site, and soil and soil gas results from adjacent sites. This work not conducted under DTSC oversight.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)  
Completed Date: 01/16/1997  
Comments: Issued IS&E Order to Elexsys International which was later acquired by Sanmina Corporation requiring site investigation and if appropriate, site remediation.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 12/02/2011  
Comments: Close cost recovery account.

**Environmental Interest/Information System:**

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 12/01/2021
Number of Days to Update: 24	Next Scheduled EDR Contact: 01/10/2022
	Data Release Frequency: Quarterly

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 12/01/2021
Number of Days to Update: 24	Next Scheduled EDR Contact: 01/10/2022
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/20/2021  
Date Data Arrived at EDR: 11/05/2021

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

Telephone: 703-603-8704  
Last EDR Contact: 10/01/2021  
Next Scheduled EDR Contact: 01/10/2022  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 07/12/2021	Source: Department of the Navy
Date Data Arrived at EDR: 08/06/2021	Telephone: 843-820-7326
Date Made Active in Reports: 10/22/2021	Last EDR Contact: 11/08/2021
Number of Days to Update: 77	Next Scheduled EDR Contact: 02/21/2022
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/23/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/23/2021	Telephone: 703-603-0695
Date Made Active in Reports: 11/12/2021	Last EDR Contact: 11/18/2021
Number of Days to Update: 81	Next Scheduled EDR Contact: 03/06/2022
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/23/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/23/2021	Telephone: 703-603-0695

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/10/2021

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## **Local Land Records**

### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/25/2021  
Date Data Arrived at EDR: 09/03/2021  
Date Made Active in Reports: 11/22/2021  
Number of Days to Update: 80

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 11/22/2021  
Next Scheduled EDR Contact: 03/13/2022  
Data Release Frequency: Varies

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 10/20/2021

Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A
Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 09/15/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/03/2022
	Data Release Frequency: Quarterly

### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 08/10/2021	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 08/17/2021	Telephone: 202-528-4285
Date Made Active in Reports: 10/22/2021	Last EDR Contact: 11/16/2021
Number of Days to Update: 66	Next Scheduled EDR Contact: 02/28/2022
	Data Release Frequency: Varies

### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 10/15/2021
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/24/2022
	Data Release Frequency: Semi-Annually

### FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 04/02/2018	Source: U.S. Geological Survey

Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Next Scheduled EDR Contact: 03/14/2022  
Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### **EDR Hist Auto: EDR Exclusive Historical Auto Stations**

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### **EDR Hist Cleaner: EDR Exclusive Historical Cleaners**

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

Date of Government Version: 02/04/2021	Source: Los Angeles County Department of Public Works

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

## CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/23/2021  
Date Data Arrived at EDR: 08/10/2021  
Date Made Active in Reports: 11/08/2021  
Number of Days to Update: 90

Source: Department of Energy & Environmental Protection  
Telephone: 860-424-3375  
Last EDR Contact: 11/12/2021  
Next Scheduled EDR Contact: 02/21/2022  
Data Release Frequency: No Update Planned

## NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2018  
Date Data Arrived at EDR: 04/10/2021  
Date Made Active in Reports: 05/16/2019

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

6374868-ESAI  
2110 OLD MIDDLEFIELD WAY  
MOUNTAIN VIEW, CA 94043

### TARGET PROPERTY COORDINATES

Latitude (North):	37.414796 - 37° 24' 53.27"
Longitude (West):	122.093103 - 122° 5' 35.17"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	580254.6
UTM Y (Meters):	4141070.2
Elevation:	22 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	5641106 MOUNTAIN VIEW, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06085C0037H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06085C0036H	FEMA FIRM Flood data
06085C0038H	FEMA FIRM Flood data
06085C0039H	FEMA FIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
MOUNTAIN VIEW	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile ESE
Site Name:	Sierra Vista Properties
Site EPA ID Number:	CAD982400285
Surficial Aquifer Flow Dir.:	NOT AVAILABLE.
Measured Depth to Water:	12 feet.
Hydraulic Connection:	The surficial aquifer is confined and separated from the lower aquifer by an aquitard. However, the surficial and lower aquifers are interconnected within 1 mile southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Series: Quaternary  
Code: Q (*decoded above as Era, System & Series*)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

<u>DATABASE</u>	<u>SEARCH DISTANCE (miles)</u>
Federal USGS	1.000
Federal FRDS PWS	Nearest PWS within 1 mile
State Database	1.000

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ODIC Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 81EF-4316-813D

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

ODIC Environmental (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
