

**Lake Creek Industrial  
Wilson Avenue Industrial Project  
Mitigation Monitoring and Reporting Program**

**Terms and Definitions:**

1. **Property Owner/Developer** – Owner or developer of Lake Creek Industrial Wilson Avenue Industrial Project.
2. **Environmental Equivalent/Timing** – Any mitigation measure and timing thereof, subject to the approval of the City, which will have the same or superior result and will have the same or superior effect on the environment. The Planning Department, in conjunction with any appropriate agencies or City departments, shall determine the adequacy of any proposed "environmental equivalent/timing" and, if determined necessary, may refer said determination to the City Council. Any costs associated with information required in order to make a determination of environmental equivalency/timing shall be done by the property owner/developer. Staff time for reviews will be charged on a time and materials basis at the rate in the City's adopted Fee Schedule.
3. **Implementation Timing** – This is the point where a mitigation measure must be monitored for compliance. In the case where multiple action items are indicated, it is the first point where compliance associated with the mitigation measure must be monitored. Once the initial action item has been complied with, no additional monitoring pursuant to the Mitigation Monitoring Plan will occur, as routine County practices and procedures will ensure that the intent of the measure has been complied with. For example, if the timing is "to be shown on approved building plans" subsequent to issuance of the building permit consistent with the approved plans will be final building and zoning inspections pursuant to the building permit to ensure compliance.
4. **Responsibility Monitoring Party** – Shall mean that compliance with the subject mitigation measure(s) shall be reviewed and determined adequate by all departments listed for each mitigation measure. Outside public agency review is limited to those public agencies specified in the Mitigation Monitoring Plan which have permit authority in conjunction with the mitigation measure.
5. **Ongoing Mitigation Measures** – The mitigation measures that are designated to occur on an ongoing basis as part of this Mitigation Monitoring Plan will be monitored in the form of an annual letter from the property owner/developer in January of each year demonstrating how compliance with the subject measure(s) has been achieved. When compliance with a measure has been demonstrated for a period of one year, monitoring of the measure will be deemed to be satisfied and no further monitoring will occur. For measures that are to be monitored "Ongoing During Construction", the annual letter will review those measures only while construction is occurring; monitoring will be discontinued after construction is complete. A final annual letter will be provided at the close of construction.
6. **Building Permit** – For purposes of this Mitigation Monitoring Plan, a building permit shall be defined as any permit issued for construction of a new building or structural expansion or modification of any existing building but shall not include any permits required for interior tenant improvements or minor additions to an existing structure or building.

	(http://www.aqmd.gov). Tenants will be required to use those funds, if awarded.			
<b>Air Quality</b>	<p><b>MM Air 18:</b> Prior to the approval of each implementing development project, the Riverside Transit Agency (RTA) shall be contacted to determine if the RTA has plans for the future provision of bus routing within any street that is adjacent to the implementing development project that would require bus stops at the project access points. If the RTA has future plans for the establishment of a bus route that will serve the implementing development project, road improvements adjacent to the Project Site shall be designed to accommodate future bus turnouts at locations established through consultation with the RTA. RTA shall be responsible for the construction and maintenance of the bus stop facilities. The area set aside for bus turnouts shall conform to RTA design standards, including the design of the contact between sidewalks and curb and gutter at bus stops and the use of ADA-compliant paths to the major building entrances in the project. <u>Compliance Note:</u> The Applicant has contacted the RTA, requesting comment as to the provision of bus routing within any street adjacent to the Project. The RTA responded that it had no comments from the Agency.</p>	<b>Mitigation measure completed with preparation of the IS-MND</b>		

**Lake Creek Industrial

	<p>“This property is presently located in the vicinity of an airport, within what is known as an airport influence area. For that reason, the property may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (for example, noise, vibration, or odors). Individual sensitivities to those annoyances can vary from person to person. You may wish to consider what airport annoyances, if any, are associated with the property before you complete your purchase and determine whether they are acceptable to you. Business &amp; Profession Code 11010 13(A)”</p>	<p style="text-align: center;"><b>tenant improvements</b></p>		
<p style="text-align: center;"><b>Hazards and Hazardous Materials</b></p>	<p><b>MM Haz 5:</b> The following uses shall be prohibited:</p> <ul style="list-style-type: none"> <li>• Any use which would direct a steady light or flashing light of red, white, green, or amber colors associated with airport operations toward an aircraft engaged in an initial straight climb following takeoff or toward an aircraft engaged in a straight final approach toward a landing at an airport, other than an FAA-approved navigational signal light or visual approach slope indicator.</li> <li>• Any use which would cause sunlight to be reflected towards an aircraft engaged in an initial straight climb following takeoff or towards an aircraft engaged in a straight</li> </ul>	<p style="text-align: center;"><b>During plot plan/architectural plan review</b></p>	<p style="text-align: center;"><b>Planning Division</b></p>	<p style="text-align: center;"><b>Confirmation that prohibited uses and actions are included in executed lease agreements</b></p>

	If FAA determines that the implementing development project would potentially be an obstruction unless reduced to a specified height, the implementing development project applicant and the Perris Planning Division will work with FAA to resolve any adverse effects on aeronautical operations.			
<b>Noise</b>	<b>MM Noise 1:</b> During all Project Site excavation and grading on-site, the construction contractors shall equip all construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers consistent with manufacturer's standards. The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from the noise sensitive receptors nearest the Project Site.	<p style="text-align: center;"><b>Prior to issuance of grading permits</b></p> <p style="text-align: center;"><b>During excavation and grading</b></p>	<b>Building Division</b>	<p style="text-align: center;"><b>Confirmation that this requirement is included in Contractor Specifications</b></p> <p style="text-align: center;"><b>Periodic construction site inspection</b></p>
<b>Noise</b>	<b>MM Noise 2:</b> During construction, stationary construction equipment, stockpiling and vehicle staging areas will be placed a minimum of 446 feet away from the closest sensitive receptor.	<p style="text-align: center;"><b>Prior to issuance of grading and building permits</b></p> <p style="text-align: center;"><b>During grading and construction</b></p>	<b>Building Division</b>	<p style="text-align: center;"><b>Confirmation that this requirement is included in Contractor Specifications</b></p> <p style="text-align: center;"><b>Periodic construction site inspections</b></p>
<b>Noise</b>	<b>MM Noise 3:</b> No combustion-powered equipment, such as pumps or generators, shall be allowed to operate within 446 feet of any occupied residence unless the equipment is surrounded by a noise protection barrier.	<p style="text-align: center;"><b>Prior to issuance of grading and building permits</b></p> <p style="text-align: center;"><b>During grading and construction</b></p>	<b>Building Division</b>	<p style="text-align: center;"><b>Confirmation that this requirement is included in Contractor Specifications</b></p> <p style="text-align: center;"><b>Periodic construction site inspections</b></p>

Noise	<b>MM Noise 4:</b> Construction contractors of implementing development projects shall limit haul truck deliveries to the same hours specified for construction equipment. To the extent feasible, haul routes shall not pass sensitive land uses or residential dwellings.	Prior to issuance of grading and building permits  During grading and construction	Building Division	Confirmation that this requirement is included in Contractor Specifications  Periodic construction site inspections
Noise	<b>MM NOISE-5:</b> Equipment shall be shut off and not left to idle when not in use.	Prior to issuance of grading and building permits  During grading and construction	Building Division	Confirmation that this requirement is included in Contractor Specifications  Periodic construction site inspections
Noise	<b>MM NOISE-6:</b> Jackhammers, pneumatic equipment and all other portable stationary noise sources shall be shielded, and noise shall be directed away from sensitive receptors.	Prior to issuance of grading and building permits  During grading and construction	Building Division	Confirmation that this requirement is included in Contractor Specifications  Periodic construction site inspections
Noise	<b>MM NOISE-7:</b> The project proponent shall mandate that the construction contractor prohibit the use of music or sound amplification on the project site during construction.	Prior to issuance of grading and building permits  During grading and construction	Building Division	Confirmation that this requirement is included in Contractor Specifications  Periodic construction site inspections
Noise	<b>MM NOISE-8:</b> The construction contractor shall limit haul truck deliveries to the same hours specified for construction equipment.	Prior to issuance of grading and building permits  During grading and construction	Building Division	Confirmation that this requirement is included in Contractor Specifications  Periodic construction site inspections
