Terracon Project No. LA227414

Dear Mrs. Hoffer:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced site. This assessment was performed in accordance with Terracon Proposal No. PLA227414, dated September 21, 2022.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide geotechnical, environmental, construction materials, and facilities services on a wide variety of projects locally, regionally and nationally. For more detailed information on all of Terracon's services please visit our website at [www.terracon.com](http://www.terracon.com). If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,  
**Terracon Consultants, Inc.**

## **EXECUTIVE SUMMARY**

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal No. PLA227414, dated September 21, 2022, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The ESA was conducted under the supervision or responsible charge of Carl A. Parten, Environmental Professional. Sarah M. Workman performed the site reconnaissance on September 29, 2022.

### **Findings and Opinions**

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

#### Site Description and Use

The site is located at 11171 Cherry Avenue in Fontana, San Bernardino County, California (Assessor Parcel Numbers (APNs): 023619125 and 023619114) and consists of an approximate 29.6-acre parcel improved with two industrial buildings; an approximately 20,300-square-foot (SF) and an approximately 16,200 SF building located on the northern portion of the site. The majority of the site is used for equipment storage, other site improvements include limited landscaping and utilities. At the time of the site reconnaissance, the site was occupied by Tutor Perini Corporation, a building contractor.

#### Historical Information

Based on a review of historical information, the site consisted of undeveloped land from as early as 1896 until the late 1930s, when the site consisted of agricultural land. By the late 1940s, the site was developed with two agricultural buildings on the southwestern portion, one apparent agricultural building on the west central portion of the site and an agricultural structure on the northwestern portion of the site. By the early 1950s, all of the structures were cleared and the site consisted of agricultural land. By the mid-1980s, one commercial building was developed on the northwestern portion of the site with apparent tractor trailer storage on the northern portion of the site. By the early 1990s, the northeastern portion of the site is developed with an additional commercial building and the commercial building on the northwestern portion of the site is expanded. By the early 2000s, the southern portion of the site is redeveloped with an asphalt-paved area with apparent equipment storage and has remained relatively unchanged through the present. Prior on-site occupants were identified as Desert Mechanical Incorporated, Heavy Equipment Repair and Owl Crane And Rigging Co.

The surrounding properties consisted of undeveloped land from as early as 1896 until the late 1930s, when the surrounding properties consisted of agricultural land. By the late 1940s, the northern, southern and western adjoining properties were developed with single-family

## Phase I Environmental Site Assessment

Proposed Industrial Buildings ■ Fontana, California  
November 28, 2022 ■ Terracon Project No. LA227414

residences and by the early 1950s, the single-family residential homes were cleared, and the surrounding properties consisted of agricultural land. By the mid-1980s, the northern adjoining property was developed with a total of three commercial buildings, the eastern adjoining property was developed with one commercial building. By the early 1990s, the eastern adjoining property was developed with apparent raw material storage, asphalt-paved parking lots, and material storage and the southern adjoining property was developed with the existing residential neighborhood. By the mid-1990s, the raw material storage and asphalt-paved parking lot to the northeast was cleared. By the early 2000s, the western adjoining property was developed with the existing baseball and recreational fields, the northern adjoining property was developed with an additional commercial building, and the eastern adjoining property was cleared of material storage and consisted of vacant land along with asphalt-paved parking lots. By the mid-2000s through the early 2010s, the eastern adjoining property was developed with a total of 10 commercial buildings. The surrounding properties have remained relatively unchanged through the present. Based on review of historical documentation, indication of recognized environmental conditions (RECs) were not identified in connection with the site.

The site and surrounding properties had been utilized as agricultural land from the late 1930s through the mid-1980s. The historical agricultural activities on the site and surrounding properties may have included the use of pesticides and herbicides. Most currently used agricultural chemicals do not persist for extended periods of time, if applied appropriately. Information that would indicate the extensive use of pesticides or herbicides on the site or surrounding properties was not identified. Indications of pesticide and/or herbicide misuse or vegetative stress on the site or surrounding property were not observed during the site reconnaissance. Therefore, the historical agricultural use does not represent a REC to the site.

### Prior Reports

The Partner October 2019 Phase I ESA reported the site to consist of 29.72 acres of land with two industrial warehouse buildings, small portable office structures, a yard for machinery storage and maintenance, a small asphalt-paved parking lot on the western portion of the property, and a fabrication yard on the southeastern portion of the property. The Phase I ESA identified RECs associated with a data gap in the regulatory status, removal and closure of the former on-site USTs and the absence of an SPCC for the facility. The ESA also reported the historical industrial use of the property, including the on-site observed clarifier and wash rack on the southeastern site of the central warehouse structure, an on-site septic tank, and documented use of halogenated solvents as the basis for a REC. The report recommended a Limited Subsurface Investigation to determine the presence or absence of contamination due to the historical industrial use of the site as well as the implementation of an Operations and Maintenance (O & M) Program to safely manage the suspect Asbestos-Containing Material (ACM) and Lead-Based Paint (LBP) in place at the property.

The Roux Associates May 2020 LSI reported the site consist of an approximately 29.72-acres industrial property used for storage of heavy construction equipment, two industrial warehouse

## Phase I Environmental Site Assessment

Proposed Industrial Buildings ■ Fontana, California  
November 28, 2022 ■ Terracon Project No. LA227414

buildings, a portable office trailer, an outdoor fabrication area, and parking areas. The LSI included the advancement of four soil borings to a depth of 15 feet bgs to collect soil samples near hazardous materials storage areas near the north shop area, the on-site diesel AST, and the fabrication area on the southeastern portion of the property, as well as the advancement of five borings to a depth of 15 feet bgs to collect soil and soil vapor samples near the hazardous materials storage area at the shop buildings, the septic tank, and the wash rack/clarifier. The soil samples indicated the presence of 1,2,4-trimethylbenzene, acetone, benzene, para-Isopropyl toluene, TBA, and bis(2-ethylhexyl) phthalates concentrations were well below the applicable residential and commercial Soil Environmental Screening Levels (SFRWQCB, 2019). The residual detected concentrations in soil were primarily near the northeastern end of the maintenance warehouse on the site, at various depths collected from SV-1, SV-2 and SV-5.

The soil vapor samples collected at the site did not detect concentrations of VOCs above the laboratory method reporting limits (non-detect) at each sampled location. At that time, the LSI report compared the findings to the US EPA Regional Screening Levels (RSLs) and Department of Toxic Substance Control (DTSC) Human and Ecological Risk Office (HERO) Human Health Risk Assessment Note 3 Screening levels (DTSC-SL) for commercial and industrial land use, and the soil vapor reporting limits were not above the calculated RSLs at that time. The report recommended no further investigation and the preparation of an updated Spill Prevention, Control, and Countermeasure (SPCC) plan.

It should be noted that the laboratory reporting limits for select compounds (i.e., benzene, TCE, and vinyl chloride) exceed the current applicable residential and/or commercial screening levels for soil vapor. However, based on the absence of VOCs in soil with the exception of trace concentrations of VOCs (i.e., benzene in soil at SV-5 located near the clarifier) concentrations of VOCs in soil vapor were not detected; therefore, the potential for petroleum and solvent impacts in the equipment maintenance areas/clarifier appears de minimis, and does not represent a REC in connection with the site.

### Records Review

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed. The site was identified as Desert Mechanical Incorporated, Heavy Equipt. Repair, Owl Crane And Rigging Co. and Tutor Saliba Corp and were identified in the various regulatory databases. Based on a review of the FINDS, ECHO, CERS, CERS HAZ WASTE, HAZNET, HWTS, RCRA-SQG and the San Bern. Co. Permit regulatory listings, Tutor Saliba Corporation has been permitted as a generator since 1990. Waste streams were identified as alkaline solution (pH $\geq$ 12.5) without metals (2015), AQ Sol (2 < pH < 12.5) with organic residues < 10% (1998, 2016-17, 2019, 2022), off-specified, aged or surplus inorganics (2010), other inorganic solid waste (2004 and 2009), waste oil and mixed oil (2002, 2006-2007, 2009, 2013-2022), oil/water separation sludge (2002 and 2004), unspecified oil containing waste (2002 and 2022), tank bottom waste (2009), off-specified, aged or surplus organics (2002, 2009-10, 2014), unspecified organic liquid mixture (2002, 2004-2005, 2013-2015), other organic solids (1995, 2002, 2009, 2011, 2013-2022), unidentified sludge waste (2002), liquid with halogenated

## Phase I Environmental Site Assessment

Proposed Industrial Buildings ■ Fontana, California  
November 28, 2022 ■ Terracon Project No. LA227414

organic compounds  $\geq 1,000$  mg/L (1994) and liquids with pH  $\leq 2$  (2002). Desert Mechanical Incorporated was formerly permitted as a generator in 2012. Waste streams were identified as off-specification, aged or surplus inorganics (2012), other inorganic solid waste (2012), off-specification, aged or surplus organics (2012) and liquid with halogenated organic compounds (2012). Records of inspection provided by the San Bernardino County Office of the Fire Marshal indicated steam cleaning associated with equipment maintenance operations, which drains residues to a 3-stage clarifier that is then discharged to a leach field. This record indicates that these features are tested monthly for total dissolved solids (TDS), chloride, and boron. Based on a review of the HAULERS listing, Heavy Equipment Repair was permitted as a facility with waste discharge requirements. The following violations were reported associated with this facility: failure to provide training (2020), failure to resubmit business plan (2020), failure to manage used oil and or fuel filters (2020), failure to provide spill prevention plan (2020), failure to complete hazardous waste labels (2016), failure to review SPCC plan (2016). The reported violations have since been returned to compliance. The use of the site for construction equipment maintenance, storage, and repair on-site for approximately 30 years and presence of the clarifier (oil/water separator) and associated leach field, and documented use of halogenated solvents, the on-site equipment / vehicle maintenance, storage, and repair operations, are further discussed in Section 3.7..

Based on a review of the UST, AST and the CERS TANKS listings, Tutor Saliba Corp is permitted with an unknown number of ASTs. Refer to Section 5.4 for ASTs observed during the site reconnaissance. Additionally, Owl Crane was formerly permitted to operate one 10,000-gallon diesel UST and one 6,000-gallon gasoline UST. Based on an interview with Mr. Jim Foster, the site has not had USTs in approximately 15-20 years. A review of files provided by the San Bernardino County Office of the Fire Marshal indicates the removal of the USTs and subsequent soil testing in July of 2009. Based on a review of the analytical soil sampling, there was no detection at reporting limits for diesel and gasoline range organics, Ethyl tertiary-butyl ether (ETBE), Methyl tertiary-butyl ether (MTBE), Tertiary butyl alcohol (TBA), Isopropyl Ether (DIPE), and Tertiary Amyl methyl ether (TAME), and volatile organic compounds (VOCs). Based on a letter from the San Bernardino County Fire Department, dated January 8, 2010, Tutor – Saliba Corporations received a no further action letter. Based on the removal of the former USTs, the regulatory closure with the San Bernardino County Fire Department and analytical soil data, the former 10,000-gallon diesel and 6,000-gallon gasoline USTs do not represent a REC to the site.

### Site Reconnaissance

At the time of the site reconnaissance the site consisted of two warehouse buildings, concrete paved areas, landscaped areas, and utilities. The site operations consisted of construction equipment storage, repair and maintenance, with extensive storage of equipment and supplies throughout, that obscured and limited access across the site. Site observations included solid waste dumpsters, a pad-mounted transformer, a mechanic pit that drains to an oil/water separator/clarifier and associated leach field, 13 portable diesel-powered generators (in storage), two 1,000-gallon diesel fuel ASTs, one 500-gallon diesel fuel AST, 4 500-gallon oil and hydraulic oil tanks, 1 250-gallon oil tank, 27 55-gallon drums containing waste oil, antifreeze, and hydraulic fluid, 30 5-gallon buckets containing paint and paint thinner, 23 5-gallon plastic buckets containing

waste oil, 12 5-gallon metal buckets containing bromide, water tanks, approximately 10 cubic yards of construction/demolition debris, 4 500-gallon (empty) fuel tanks, stained pavement, and stained soil. Based on the site observations at the time of the reconnaissance, the site operations include industrial vehicle maintenance and storage of construction materials. The duration of operations, suspect clarifier, and the observed staining on the site and the current and former industrial vehicle operations are further discussed in Section 3.7.

#### Adjoining Properties

The northern adjoining property consists of Truck Driver Academy (11081 Cherry Avenue) and Lopez Pallets, Inc. (11080 Redwood Avenue). The eastern adjoining property consists of American Metal Recycling (11150 Redwood Avenue) and TMT Industries (14774 Jurupa Avenue). The southern adjoining property consists of single-family residences (14698-14606 Argentine Court and 14606-14560 Woodland Drive). The western adjoining property consists of Henry J. Kaiser High School (11155 Almond Avenue). RECs were not observed with the adjoining properties.

#### **Significant Data Gaps**

At the time of the site reconnaissance, Terracon was not able to visually assess the entirety of the site due to equipment and trailer storage. Based on the historical information available indicating historical industrial operations on the site, obscured pavement and/or surface areas represent a significant data gap to the site.

#### **Conclusions**

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 1527-13 at 11171 Cherry Avenue, Fontana, San Bernardino County, California, the site. RECs or Controlled RECs (CRECs) were not identified in connection with the site.

#### **Recommendations**

Additional investigation in connection with the current and historical vehicle maintenance operations, OWS/clarifier, service pit, and former UST system does not appear warranted at this time. Based on the findings of this report and review of prior investigations, Terracon recommends preparation of a Soil Management Plan (SMP) to assist in the management of soil during planned future development.

## 1.0 INTRODUCTION

### 1.1 Site Description

<b>Site Name</b>	Proposed Industrial Buildings
<b>Site Location/Address</b>	11171 Cherry Ave, Fontana, San Bernardino County, California Assessor Parcel Number (APN): 023619125 and 023619114
<b>Land Area</b>	Approximately 29.6-acres
<b>Site Improvements</b>	The site is improved with two industrial buildings; an approximately 20,300-square-foot (SF) and an approximately 16,200 SF building located on the northern portion of the site. The majority of the site is used for equipment storage, other site improvements include limited landscaping and utilities.
<b>Anticipated Future Site Use</b>	Development of two industrial buildings.
<b>Reason for the ESA</b>	Development.

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

### 1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal No. PLA227414, dated September 21, 2022, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-13 contains a new definition of "migrate/migration," which refers to "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." By including this explicit reference to migration in ASTM E1527-13, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the site.

### **1.3 Standard of Care**

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

### **1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps**

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- During the site reconnaissance, significant portions of the site could not be observed due to vehicular and equipment obstructions. Due to the lack of access, this represents a significant data gap.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

## **1.5 Reliance**

This ESA report is prepared for the exclusive use and reliance of Hillwood Investment Properties, Inc. Use or reliance by any other party is prohibited without the written authorization of Hillwood Investment Properties, Inc. and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Consulting Agreement. The limitation of liability defined in the Consulting Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-13.

## **1.6 Client Provided Information**

Prior to the site visit, the client was asked to provide the following user questionnaire information as described in ASTM E1527-13 Section 6.

### Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client's Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.			X
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.			X
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.			X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.			X
Obvious Indicators of Contamination at the site.			X

The client did not provide the requested User's information as of the issuance date of the report, Terracon assumes the client is evaluating the questionnaire information outside the context of the Terracon's Phase I ESA scope of work and report.

## 2.0 PHYSICAL SETTING

Physical Setting Information		Source
<b>Topography</b>		
Site Elevation	Approximately 960 feet above sea level	USGS Topographic Map, Fontana and Guasti, California, Dated 2018 (Appendix A).
Topographic Gradient	Slopes toward the southwest.	
Closest Surface Water	An unnamed retention basin, approximately 3,140 feet southeast of the site.	
<b>Soil Characteristics</b>		
Soil Type	Delhi fine sand Tujunga loamy sand, 0 to 5 percent slopes	San Bernardino County, California Soil Source issued September 6, 2022
Description	Delhi fine sand is somewhat excessively drained. A typical soil profile consists of 0 to 18 inches of fine sand and 18 to 60 inches of sand. Tujunga loamy sand is somewhat excessively drained. A typical soil profile consists of 0 to 60 inches of loamy sand.	

Physical Setting Information		Source
<b>Geology/Hydrogeology</b>		
Formation	Quaternary Deposits	Geological Map of California, dated 2010
Description	Alluvium lake, playa and terrace deposits; unconsolidated and semi-consolidated	
Estimated Depth to First Occurrence of Groundwater	Approximately 290 feet below sea level (bgs) measured in a groundwater monitoring well (AOS-4) located approximately 1,530 feet northwest of the site.	GeoTracker Cleanup Site Global ID L10007609502 SA-RWQCB Case # 8362169001 Alumax Fontana, Waste Pile (Closed) 10825 Beech Avenue San Bernardino, California
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (primarily to the southwest).	

\* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

### 3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

#### 3.1 Historical Topographic Maps, Aerial Photographs, Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10 to 15-year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps, aerial photographs and Sanborn maps are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the site and surrounding properties. Based upon inquiries to the above-listed Sanborn provider, Sanborn maps were not available for the site.

- Topographic maps:
  - San Bernardino, California, published in **1896, 1898, 1901, 1954** (1:62,500), and **1942, 1975** (1:50,000)
  - Cucamonga, California, published in **1897, 1900** (1:65,500) **1944** (1:50,000)

- Guasti, California, published in **1941** (1:31,680) **1953, 1966, 1973, 1981, 2012, 2015** and **2018** (1:24,000)
- Fontana, California, published in **1943** (1:31,680), **1953, 1967, 1973, 1980, 2012, 2015** and **2018** (1:24,000)
- Ontario, California, published in **1954** (1:52,500); **1976** (1:50,000)
- Aerial photographs:
  - USDA, **1938, 1953, 1959, 1967, 1985, 1990**, 1"=500'
  - USGS, **1948, 1975**, 1"=500'
  - USGS/DOQQ, **1994, 2002**, 1"=500'
  - USDA/NAIP, **2006, 2009, 2012, 2016**, 1"=500'

### Historical Maps and Aerial Photographs

Direction	Description
Site	Undeveloped land (1896-1901); agricultural land (1938); developed with two apparent agricultural buildings on the southwestern portion of the site, an apparent agricultural building on the west central portion of the site, and an agricultural structure on the northwestern portion of the site (1948); all structures are cleared and consists of agricultural land (1953-1975); the northern portion of the site is developed with one commercial building on the northwestern portion of the site with apparent tractor trailer storage on the northern portion of the site while the southern portion of the site consists of agricultural land (1985); northern portion of the site is developed with an additional commercial building on the northeastern portion of the site, and the commercial building on the northwestern portion is expanded with apparent tractor trailer storage (1990-1994); the southern portion of the site is redeveloped with an asphalt-paved area with apparent storage (2002-2018).
North	Undeveloped land (1896-1901); agricultural land (1938); developed with a total of three single-family residential homes (1948); all single-family residences are cleared and consists of agricultural land (1953-1975); developed with three commercial buildings (1985-1994); developed with an additional commercial building (2002-2018).
East	Undeveloped land (1896-1901); agricultural land (1938-1975); developed with one commercial building (1985); developed with apparent raw material storage on the northeast, automotive parking and material storage (1990); raw material storage and automotive parking to the northeast is cleared (1994); material storage to the southeast is cleared and consists of vacant land with automotive parking (2002); developed with a total of five commercial buildings with apparent storage (2006); developed with two commercial buildings and material storage to the southeast is cleared (2009); developed with three additional commercial buildings (2012-2018).
South	Undeveloped land (1896-1901); agricultural land (1938); developed with one single-family residence (1948); single-family residence is cleared (1953-1985); developed with the existing single-family residences (1990-2018).
West	Undeveloped land (1896-1901); agricultural land (1938); developed with three single-family residences (1948); single-family residences are cleared and consists of graded land (1953-1994); developed with the existing baseball and recreational field (2002-2018).

The site and surrounding properties had been utilized as agricultural land from the late 1930s through the mid-1980s. The historical agricultural activities on the site and surrounding properties may have included the use of pesticides and herbicides. Most currently used agricultural chemicals do not persist for extended periods of time, if applied appropriately. Information that would indicate the extensive use of pesticides or herbicides on the site or surrounding properties was not identified. Indications of pesticide and/or herbicide misuse or vegetative stress on the site or surrounding property were not observed during the site reconnaissance. Therefore, the historical agricultural use does not represent a REC to the site.

### 3.2 Historical City Directories

The Cole Information Services, Haines Company, Inc., SBC Pacific Bell, GTE Directories, Luskey Brothers & Co city directories used in this study were made available through EDR (selected years reviewed: 1960-2017) and were reviewed at approximate five-year intervals, if readily available. Street listings not available prior to 1960. The current street address for the site was identified as 11171 Cherry Avenue.

#### Historical City Directories

Direction	Description
Site	<b><u>11171 Cherry Avenue</u></b> – No Listings (1960-1989); <i>Owl Crane &amp; Rigging Co (1990-1994); Ronald Tutor (2003-2004); Tutor Saliba Corp (2009).</i>
North	<b><u>11081 Cherry Avenue</u></b> – No Listings (1960-1989); <i>Industrial Freight System Inc. (1990-1994); Cresent Truck Lines Incorporated (1999); Matheson Fast Freight Inc. (2002-2009); LTL Express (2014).</i> <b>11941 Rose Court</b> – No Listings (1960-2017). <b><u>11080 Redwood Avenue</u></b> – No Listings (1960-1989); <i>Rancho Steel Inc., T &amp; G Rebar, Brothers Transportation (1990); T&amp;G Rebar and Brothers Transportation Inc (1991); All Imports Auto Dismantler (1994); Dorriz Michael (2003); Lopez Pallets (2008-2017).</i> <b>11080 Cherry Avenue</b> – No Listings (1960-1989); <i>Weaver Transportation Business Systems Inc. East	<b>14774 Jurupa Avenue</b> – No Listings (1960-2017). <b>11175 Redwood Avenue</b> – No Listings (1960-2017).
South	<b>14698-14606 Argentine Court</b> – No Listings (1960-2017). <b>14606-14560 Woodland Drive</b> – No Listings (1960-2017). <b>11335-11327 Dogwood Court</b> – No Listings (1960-2017).
West	<b>11155 Almond Avenue</b> – No Listings (1960-1998); <i>Advance Mechanical Contractors Inc (1999); San Bernardino County (2002); Henry J Kaiser High School (2003-2014).</i>

### 3.3 Site Ownership

According to the San Bernardino County Tax Assessor database, the site is currently owned by Aliaron Investments Limited.

### 3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

### 3.5 Environmental Liens and Activity and Use Limitations

At the direction of the client, performance of a review of environmental liens and activity and use limitations was not included as part of the scope of services. The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases.

### 3.6 Interviews Regarding Current and Historical Site Uses

The following individual was interviewed regarding the current and historical use of the site.

#### Interviewee

Interviewer	Name / Phone #	Title	Date/Time
Sarah M. Workman	James Foster / (818) 519-8242	Site Manager	October 13, 2022 / 3:00 pm

Terracon interviewed Mr. James Foster, site manager, following the site reconnaissance. Mr. Foster indicated that he has been familiar with the site for 30 years. Mr. Foster noted that in that time the site operations have been in the construction equipment maintenance and storage industry and that prior to Tutor Perini the company was called Tutor Saliba, both owned by Mr. Ron Tutor. Mr. Foster indicated that the site has not had USTs in approximately 15-20 years and that the tanks were previously located on the central-western portion of the site. Mr. Foster was not aware of any spills or releases of hazardous materials associated with the site or adjoining properties. Mr. Foster indicated that the area has been primarily industrial during his tenure. Mr. Foster was not aware of pending or threatened environmental litigation, past environmental litigation, or violations of environmental laws. Terracon's consideration of the client's responses did not indicate RECs.

### 3.7 Prior Report Review

Terracon requested the client provide any previous environmental investigations they are aware of for the site. The following previous reports were provided by the client to Terracon for review:

## Phase I Environmental Site Assessment

Proposed Industrial Buildings ■ Fontana, California  
November 28, 2022 ■ Terracon Project No. LA227414

- Phase I Environmental Site Assessment (ESA)  
11171 Cherry Avenue  
Fontana, CA 92337  
Dated: October 14, 2019  
Prepared by: Partner Engineering & Science  
For: Mr. Ronald N. Tutor

The Partner October 2019 Phase I ESA reported the site to consist of 29.72 acres of land with two industrial warehouse buildings, small portable office structures, a yard for machinery storage and maintenance, a small asphalt-paved parking lot on the western portion of the property, and a fabrication yard on the southeastern portion of the property. The Phase I ESA identified RECs associated with a data gap in the regulatory status, removal and closure of the former on-site USTs and the absence of an SPCC for the facility. The ESA also reported the historical industrial use of the property, including the on-site observed clarifier and wash rack on the southeastern site of the central warehouse structure, an on-site septic tank, and documented use of halogenated solvents as the basis for a REC. The report recommended a Limited Subsurface Investigation to determine the presence or absence of contamination due to the historical industrial use of the site as well as the implementation of an Operations and Maintenance (O & M) Program to safely manage the suspect Asbestos-Containing Material (ACM) and Lead-Based Paint (LBP) in place at the property.

- Limited Subsurface Investigation Report (LSI)  
11171 Cherry Avenue  
Fontana, CA 92337  
Dated: May 5, 2020  
Prepared by: Roux Associates Inc.  
For: Mr. Ronald N. Tutor

The Roux Associates May 2020 LSI reported the site consist of an approximately 29.72-acres industrial property used for storage of heavy construction equipment, two industrial warehouse buildings, a portable office trailer, an outdoor fabrication area, and parking areas. The LSI included the advancement of four soil borings to a depth of 15 feet bgs to collect soil samples near hazardous materials storage areas near the north shop area, the on-site diesel AST, and the fabrication area on the southeastern portion of the property, as well as the advancement of five borings to a depth of 15 feet bgs to collect soil and soil vapor samples near the hazardous materials storage area at the shop buildings, the septic tank, and the wash rack/clarifier. The soil samples indicated the presence of 1,2,4-trimethylbenzene, acetone, benzene, para-Isopropyl toluene, TBA, and bis(2-ethylhexyl) phthalates concentrations were well below the applicable residential and commercial Soil Environmental Screening Levels (SFRWQCB, 2019). The residual detected concentrations in soil were primarily near the northeastern end of the maintenance warehouse on the site, at various depths collected from SV-1, SV-2 and SV-5.

The soil vapor samples collected at the site did not detect concentrations of VOCs above the laboratory method reporting limits (non-detect) at each sampled location. At that time, the LSI report compared the findings to the US EPA Regional Screening Levels (RSLs) and Department of Toxic Substance Control (DTSC) Human and Ecological Risk Office (HERO) Human Health Risk Assessment Note 3 Screening levels (DTSC-SL) for commercial and industrial land use, and the soil vapor reporting limits were not above the calculated RSLs at that time. The report recommended no further investigation and the preparation of an updated Spill Prevention, Control, and Countermeasure (SPCC) plan.

It should be noted that the laboratory reporting limits for select compounds (i.e., benzene, TCE, and vinyl chloride) exceed the current applicable residential and/or commercial screening levels for soil vapor. However, based on the absence of VOCs in soil with the exception of trace concentrations of VOCs (i.e., benzene in soil at SV-5 located near the clarifier) concentrations of VOCs in soil vapor were not detected; therefore, the potential for petroleum and solvent impacts in the equipment maintenance areas/clarifier appears de minimis, and does not represent a REC in connection with the site.

## 4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

### 4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

#### Federal Databases

Database	Description	Distance (miles)	Listings
CERCLIS	Comprehensive Environmental Response, Compensation, & Liability Information System	0.5	0

Database	Description	Distance (miles)	Listings
CERCLIS / NFRAP	Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	0
ERNS	Emergency Response Notification System	Site	0
IC / EC	Institutional Control/Engineering Control	Site	0
NPL	National Priorities List	1.0	0
NPL (Delisted)	National Priorities Delisted List	0.5	0
RCRA CORRACTS/ TSD	RCRA Corrective Action Activity	1.0	0
RCRA Generators	Resource Conservation and Recovery Act	Site and adjoining properties	4
RCRA Non-CORRACTS/ TSD	RCRA Non-Corrective Action Activity	0.5	0
ECHO	Enforcement & Compliance History Information	Site	1
FINDS	Facility Index System/Facility Registry System	Site	1

### State/Tribal Databases

Database	Description	Distance (miles)	Listings
CA BROWNFIELDS	CA BROWNFIELDS	0.5	0
CALSITES	CalSites Database	1.0	0
CALSITES (AWP)	Active Annual Workplan Sites	1.0	0
CA FID UST	Facility Inventory Database	0.25	3
CERS	California Environmental Reporting System	Site	2
CERS HAZ WASTE	California Environmental Reporting System Hazardous Waste	0.25	7
CERS Tanks	California Environmental Reporting System Tank	0.25	2
CORTESE	"Cortese" Hazardous Waste & Substances Sites List	0.5	2
DEED	Deed Restriction Listing	0.5	1
EMI	Emissions Inventory Data	Site	1
ENVIROSTOR	EnviroStor Database	1.0	4
HAULERS	Registered Waste Tire Haulers Listing	Site	1
HAZNET	Facility and Manifest Data	Site	2
HIST CORTESE	Hazardous Waste & Substance Site List	0.5	2
HIST UST	Hazardous Substance Storage Container Database	0.25	2
HWTS	Hazardous Waste Tracking System	Site	3

Database	Description	Distance (miles)	Listings
CIWQS	California Integrated Water Quality System	Site	1
LUST	Leaking Underground Storage Tanks	0.5	2
SWEEPS UST	SWEEPS UST Listing	0.25	3
SWF/LF	Solid Waste Facilities/Landfills	0.5	
UST	Underground Storage Tank Facilities	0.25	3
AST	Aboveground Petroleum Storage Tank Facilities	Site	1
VCP	Voluntary Cleanup Program	0.5	2
San Bern. Co. Permit	San Bernardino County Permit	0.25	16
CIWQS	California Integrated Water Quality System	Site	1

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in Appendix D.

The site was identified in the regulatory database.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

### Listed Facilities

Facility Name And Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
Desert Mechanical Incorporated	Site	HAZNET, HWTS	No, discussed below.
Heavy Equipt. Repair		CERS, CIWQS,	
Owl Crane And Rigging Co.		EMI, CA FID UST, SWEEPS UST	
Tutor Saliba Corp 11171 Cherry Avenue		AST, CERS, CERS HAZ WASTE, CERS TANKS, HAZNET, HWTS, RCRA-SQG, San Bern. Co. Permit, UST, HAULERS, HWTS	

<b>Facility Name And Location</b>	<b>Estimated Distance / Direction/Gradient</b>	<b>Database Listings</b>	<b>Is a REC, CREC, or HREC to the Site</b>
Industrial Freight System	Adjoining / North / Up-gradient	CA FID UST, Cortese, LUST, San Bern. Co. Permit, SWEEPS UST, HIST CORTESE	No, discussed below.
Truck Driver Academy Inc.		RCRA NONGEN / NLR	
System 99 11081 Cherry Avenue		HIST UST	
American Metal Recycling 11150 Redwood Avenue	Adjoining / North-northeast / Up-gradient	CERS HAZ WASTE, CERS TANKS, DEED, ENVIROSTOR, San Bern. Co. Permit, VCP, AST, PADS, RCRA NONGEN / NLR	No, discussed below.
Reconsteel Placers DB Placers 11080 and 11050 Redwood Avenue	Adjoining / Northeast / Up-gradient	HIST UST, CERS HAZ WASTE, SWEEPS UST, CA FID UST, San Bern. Co. Permit	No, discussed below.
Lopez Pallets Inc. 11080 Redwood Avenue		RCRA NONGEN / NLR	
Team Gmd Truck & Trailer Repair Llc 11060 Cherry Avenue	210 feet / Northwest / Cross-gradient	San Bern. Co. Permit	No, based on the facility's distance, cross-gradient position relative to the site and anticipated depth to groundwater.
Direct Terminal Inc.	320 feet / East / Cross-to-down-gradient	San Bern. Co. Permit	No, based on the facility's distance, cross-to-down-gradient position relative to the site and anticipated depth to groundwater.
Best 1 Trucking 14774 Jurupa Avenue		San Bern. Co. Permit	

Facility Name And Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
Lucas Specialty Rock & Sand Company 11105 Redwood Avenue	330 feet / Northeast / Up-gradient	San Bern. Co. Permit	No, based on the facility's distance and anticipated depth to groundwater.
Thompson Building Materials 11027 Cherry Avenue	330 feet / North / Up-gradient	CERS HAZ WASTE, San Bern. Co. Permit, UST,	No, based on the facility's distance and anticipated depth to groundwater.
Golden West Oil Co. Inc. 11040 Cherry Avenue	360 feet / Northwest / Cross-gradient	San Bern. Co. Permit, ICIS	No, based on the facility's distance, cross-gradient position relative to the site and anticipated depth to groundwater.

Desert Mechanical Incorporated, Heavy Equipt. Repair, Owl Crane And Rigging Co. and Tutor Saliba Corp (11171 Cherry Avenue)

Desert Mechanical Incorporated, Heavy Equipt. Repair, Owl Crane And Rigging Co. and Tutor Saliba Corp located on-site were identified in the AST, CERS, CERS HAZ WASTE, CERS TANKS, HAZNET, HWTS, RCRA-SQG, San Bern. Co. Permit, FINDS, ECHO, UST, HAULERS, CIWQS, EMI, CA FID UST and the SWEEPS UST regulatory database. Based on a review of the FINDS, ECHO, CERS, CERS HAZ WASTE, HAZNET, HWTS, RCRA-SQG and the San Bern. Co. Permit regulatory listings, Tutor Saliba Corporation has been permitted as a generator since 1990. Waste streams were identified as alkaline solution (pH>=12.5) without metals (2015), AQ Sol (2 < pH < 12.5) with organic residues < 10% (1998, 2016-17, 2019, 2022), off-specified, aged or surplus inorganics (2010), other inorganic solid waste (2004 and 2009), waste oil and mixed oil (2002, 2006-2007, 2009, 2013-2022), oil/water separation sludge (2002 and 2004), unspecified oil containing waste (2002 and 2022), tank bottom waste (2009), off-specified, aged or surplus organics (2002, 2009-10, 2014), unspecified organic liquid mixture (2002, 2004-2005, 2013-2015), other organic solids (1995, 2002, 2009, 2011, 2013-2022), unidentified sludge waste (2002), liquid with halogenated organic compounds >=1,000 mg/L (1994) and liquids with pH <=2 (2002). Desert Mechanical Incorporated was formerly permitted as a generator in 2012. Waste streams were identified as off-specification, aged or surplus inorganics (2012), other inorganic solid waste (2012), off-specification, aged or surplus organics (2012) and liquid with halogenated organic compounds (2012). Based on a review of the HAULERS listing, Heavy Equipment Repair was permitted as a facility with waste discharge requirements. The following violations were reported associated with this facility: failure to provide training (2020), failure to resubmit business plan (2020), failure to manage used oil and or fuel filters (2020), failure to provide spill prevention plan (2020), failure to complete hazardous waste labels (2016), failure to review SPCC plan

## Phase I Environmental Site Assessment

Proposed Industrial Buildings ■ Fontana, California  
November 28, 2022 ■ Terracon Project No. LA227414

(2016). All reported violations have since been returned to compliance. The historical use of the site is further discussed in Section 3.7.

Based on a review of the UST, AST and the CERS TANKS listings, Tutor Saliba Corp is permitted with an unknown number of ASTs. Refer to Section 5.4 for ASTs observed during the site reconnaissance. Additionally, Owl Crane was formerly permitted to operate one 10,000-gallon diesel UST and one 6,000-gallon gasoline UST. Based on an interview with Mr. Jim Foster, the site has not had USTs in approximately 15-20 years. A review of files provided by the San Bernardino County Office of the Fire Marshal indicates the removal of the USTs and subsequent soil testing from July of 2009. Based on a review of the analytical soil sampling, indicated no detection at reporting limits for diesel and gasoline range organics, Ethyl tertiary-butyl ether (ETBE), Methyl tertiary-butyl ether (MTBE), Tertiary butyl alcohol (TBA), Isopropyl Ether (DIPE), and Tertiary Amyl methyl ether (TAME), and volatile organic compounds (VOCs). Based on a letter from the San Bernardino County Fire Department, dated January 8, 2010, Tutor – Saliba Corporations received a no further action letter. The property is also discussed in Section 3.7. Based on the removal of the former USTs, the regulatory closure with the San Bernardino County Fire Department and a review of prior reports' analytical soil data, the former USTs do not represent a REC to the site.

### Industrial Freight System, Truck Driver Academy Inc. and System 99 (11081 Cherry Avenue)

Industrial Freight System, Truck Driver Academy Inc. and System, located on the northern adjoining parcel and in a up-gradient position relative to the site was identified in the CA FID UST, Cortese, LUST, San Bern. Co. Permit, SWEEPS UST, HIST CORTESE, RCRA NONGEN / NLR and HIST UST regulatory databases. Based on a review of the RCRA NONGEN / NLR and the San Bern. Co. Permit listing, Truck Driver Academy Inc. has been permitted as a generator since 2017. Waste streams were identified as unspecified oil-containing waste (2017-2018). Matheson Fast Freight was formerly permitted as a generator in 2010, with no waste streams identified. Based on a review of the CA FID UST, Cortese, LUST, SWEEPS UST, HIST CORTESE and HIST UST listings, System 99 and blank was formerly permitted with one 12,000-gallon diesel UST installed in 1978, one 2,000-gallon motor oil UST installed in 1978, one 12,000-gallon diesel UST installed in 1978, one 2,000-gallon waste oil UST installed in 1978.

Based on a review of the Regional Water Quality Control Board (RWQCB) online GeoTracker database, Industrial Freight Systems is identified as a Closed LUST Case with the contaminant of concern listed as diesel and soil as the media of concern. Based on a review of the Remedial Action Completion Certification letter dated January 30, 1996, a closure letter was issued.

Based on the removal of the USTs, regulatory closure with the San Bernardino County and the soils only case, Industrial Freight System, Truck Driver Academy Inc. and System does not represent a REC to the site.

### American Metal Recycling (11150 Redwood Avenue)

American Metal Recycling, located on the northeastern adjoining parcel and in an up-gradient position relative to the site was identified in the CERS HAZ WASTE, CERS TANKS, DEED,

## Phase I Environmental Site Assessment

Proposed Industrial Buildings ■ Fontana, California  
November 28, 2022 ■ Terracon Project No. LA227414

ENVIROSTOR, San Bern. Co. Permit, RCRA NONGEN / NLR, VCP, AST and the PADS regulatory databases. Based on a review of the RCRA NONGEN / NLR, CERS HAZ WASTE, San Bern. Co. Permit listings, American Metal Recycling has been permitted as a generator since 2004. Waste streams were reported as AQ SOL (2 < pH < 12.) (2016-2019), unspecified aqueous solution (2 < pH < 12.5) (2011-2015), other inorganic solid waste (2008, 2016-2022), halogenated solvents (2018), unspecified solvent mixture (2011 and 2018), waste oil and mixed oil (2005-2022), unspecified oil-containing waste (2005-2008, 2019 and 2022), tank bottom waste (2020), polychlorinated biphenyls & metals (2008-2018 and 2020), other organic solids (2004, 2007-2022) and contaminated soils from site clean-up (2017, 2019 and 2021-2022). Based on a review of the AST and CERS TANKS listings, American Metal Recycling is permitted to operate an unknown number of ASTs with unknown substances.

Based on a review of the ENVRIOSTOR, VCP, PADS, CERKS TANKS, DEED listings, American Metal Recycling is identified as a certified O&M – Land Use Restrictions as of 3/22/2021. According to the Department of Toxic Substances Control (DTSC) online EnviroStor database, American Metal Recycling has operated as a metal recycling facility for approximately 13 years and accepts ferrous and non-ferrous scrap metals and discards of metal appliances and generates hazardous waste from large quantities of contaminated soil it stores on-site mixed with scrap metal. It is also noted that there are many unpaved surfaces which became contaminated through its operations. DTSC conducted a facility investigation in January 2017 and collected soil samples from unpaved areas north and south of the stockpiled soils and detected elevated levels of metals and trace concentrations of polychlorinated biphenyls (PCBs). On August 9, 2017, DTSC and American Metal Recycling entered into a Remediation Agreement to investigate and/or remediate the site. Soil investigations were conducted and indicated that PCBs in soil were above applicable residential screening levels, but below commercial screening levels using a statistical evaluation at the facility. However, the concentrations of PCBs at the facility do not pose an unacceptable risk to commercial/industrial site workers and recommended a deed restriction and land use covenant to restrict future use to commercial/industrial. Based on a review of a remedial action certification, dated March 22, 2021, the facility received a no further action letter. Based on the certified remedial action received from the DTSC, and anticipated depth to groundwater, American Metal Recycling does not represent a REC to the site.

### Reconsteel Placers DB Placers and Lopez Pallets, Inc. (11080 and 11050 Redwood Avenue)

Reconsteel Placers DB Placers and Lopez Pallets, Inc., located to the adjoining northeast and in an up-gradient position relative to the site was identified in the RCRA NONGEN / NLR, HIST UST, CERS HAZ WASTE, SWEEPS UST, CA FID UST and the San Bern. Co. Permit regulatory databases. Based on a review of these listings, was formerly permitted to operate one 10,000-gallon gasoline UST and one 1,000-gallon diesel UST. Based on a review of the Regional Water Quality Control Board (RWQCB) GeoTracker online database, this facility was not identified. Additional information on the USTs not provided. Based on the removal of the former USTs and anticipated depth to groundwater, Reconsteel Placers DB Placers and Lopez Pallets, Inc. does not represent a REC to the site.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed five facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, none of these facilities were identified as the site or adjacent properties. These facilities are listed in the database report in Appendix D.

## 4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
San Bernardino Environmental Health Services / By online portal: <a href="https://sanbernardinocounty.nextrequest.com/requests/new">https://sanbernardinocounty.nextrequest.com/requests/new</a>	According to the San Bernardino Environmental Health Services Department, no records were found for the site.
Department of Toxic Substances Control (DTSC)/ by e-mail: <a href="mailto:pubreqact@dtsc.ca.gov">pubreqact@dtsc.ca.gov</a>	According to Tee Xiong with the DTSC, no records were found for the site.
San Bernardino County Fire/ by email: <a href="mailto:hazmatrecords@sbcfire.org">hazmatrecords@sbcfire.org</a>	Files were provided by the SBC Fire Marshal office and are summarized below.
Santa Ana Regional Water Quality Control Board (RWQCB) / by e-mail: <a href="mailto:FileReview8@waterboards.ca.gov">FileReview8@waterboards.ca.gov</a>	According to the SARWQCB, no files were found for the site.
South Coast Air Quality Management District (SCAQMD)/ By online form: <a href="http://www.aqmd.gov/nav/online-services/public-records">http://www.aqmd.gov/nav/online-services/public-records</a>	SCAQM provided a Facility Equipment List Report from 1990 indicating that six portable diesel generators and one gasoline dispenser were permitted to be operated by Owl Crane and Rigging Company on the site.
San Bernardino Building and Safety/ by online portal: <a href="https://sanbernardinocounty.nextrequest.com/requests/new">https://sanbernardinocounty.nextrequest.com/requests/new</a>	According to the San Bernardino Planning and Building Department, no records were found for the site.
City of Fontana / by online request form: <a href="http://fontana.org/FormCenter/City-14/Public-Records-Request-Form-85">fontana.org/FormCenter/City-14/Public-Records-Request-Form-85</a>	Susana Gallardo with the City Clerk's Office provided an approved plumbing permit and permit to conduct restoration work following a fire in 2018 for the property to the adjoining north of the site (11081 Cherry Avenue).

### Tutor Perini, Tutor Saliba Corporation, Owl Crane

The San Bernardino County Office of the Fire Marshal provided records indicating inactive UST permits for the Tutor Perini Corporation and permits for installation, modification, and removal of USTs associated with Tutor Saliba Corp and Owl Crane that are associated with the site. These records included the following:

- Recorded violations of UST inspections and fuel leak detection procedures, violations of waste oil rags and filter storage, notice of failure to comply with UST regulations, violations of proper hazardous material labeling and storage regulations, and administrative violations (1994-2009).
- Recorded removal of one 10,000-gallon Diesel and one 6,000-gallon gasoline UST on July 28, 2009 with laboratory data for 8 soil samples taken underneath of the tank locations and dispensers. The soil analytical data indicated no detection at reporting limits for diesel and gasoline range organics, Ethyl tertiary-butyl ether (ETBE), Methyl tertiary-butyl ether (MTBE), Tertiary butyl alcohol (TBA), Isopropyl Ether (DIPE), and Tertiary Amyl methyl ether (TAME).
- Records of inspection indicating steam cleaning associated with equipment maintenance operations, which drains residues to a 3-stage clarifier that is then discharged to a leach field. This record indicates that these features are tested monthly for total dissolved solids (TDS), chloride, and boron.

Based on a review of these records, the former on-site USTs do not appear to represent a REC to the site. The identified clarifier associated with the steam cleaning operations performed in the mechanic pit does not represent a REC to the site based upon the soil and soil vapor analytical data obtained in a prior 2020 LSI report. These results are further discussed in Section 3.7. The abovementioned records are included in Appendix C.

### **4.3 Local Area Knowledge**

Based on a review of the California Department of Conservation, Geologic Energy Management Division well finder website ([CalGEM GIS](#)), the site is not identified within the an oil field and oil and gas wells were not identified on site or in the vicinity.

Terracon researched on-line at the State Resources Water Control Board (SRWCB) GeoTracker database – Land Disposal Sites and landfills were not identified on-site. However, American Metal Recycling (11150 Redwood Avenue), located on the northeastern adjoining parcel is identified as a scrap metal recycling facility and is further discussed in Section 4.1.

## **5.0 SITE RECONNAISSANCE**

### **5.1 General Site Information**

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

### General Site Information

Site Reconnaissance				
Field Personnel	Sarah M. Workman			
Reconnaissance Date	September 29, 2022			
Weather Conditions	Sunny, Clear, 75°			
Site Contact/Title	Justin Phelps / Site Contact Title			
Building Description				
Building Identification	Building Use	Approx. Construction Date	Number of Stories	Approx. Size (ft <sup>2</sup> )
North Warehouse	Storage	1990	1	25,000
South Warehouse	Maintenance (90%) Offices (10%)	1980	1	35,000
Site Utilities				
Drinking Water	The City of Fontana			
Wastewater	The City of Fontana			
Electric	Southern California Edison			
Natural Gas	Southern California Gas			

### 5.2 Overview of Current Site Occupants

The site is currently occupied by Tutor Perini Corporation, a building contractor.

### 5.3 Overview of Current Site Operations

The majority of the site is used for equipment storage and maintenance of construction-related equipment. Other site improvements include limited landscaping and utilities.

### 5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an “X”) are discussed in more detail following the table.

#### Site Characteristics

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	X
	Elevators	
	Air compressors	X

Category	Item or Feature	Observed or Identified
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	
	Paint booths	
	Sub-grade mechanic pits	X
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas or mineral production	
	Other processes or equipment	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	X
	Drums, barrels and/or containers ≥ 5 gallons	X
	MSDS or SDS	
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins and/or dry wells	
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	X
	Pipeline markers	
	Interior floor drains	
Electrical Transformers/PCBs	Transformers and/or capacitors	
	Other equipment	

Category	Item or Feature	Observed or Identified
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	X
	Leachate and/or waste seeps	
	Trash, debris and/or other waste materials	X
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	X
	Surface water discoloration, odor, sheen, and/or free-floating product	
	Strong, pungent or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	

### Site Operations, Processes, and Equipment

#### Emergency generators

Thirteen generators were observed at the time of the site reconnaissance. The generators are in storage or repair on the site and are not used for emergency power at the site. The generators run on diesel or gasoline power and are trailer mounted/portable to support construction equipment associated with site operations. Stains or releases were not observed in the vicinity of the on-site emergency generators. Based on visual observations, the emergency generators do not represent a REC to the site.

#### Sub-grade mechanic pits

One sub-grade mechanic pit was observed in the maintenance warehouse on the central-northern portion of the site. According to the site contact, the mechanic pit was used for steam cleaning and drains to a clarifier. The mechanic pits were chained off to prevent accidents and hazardous substances and/or petroleum products were not stored in or near the pits. Staining was not observed in the pit or the surrounding area.

#### Other processes or equipment

The site's operations include storage, maintenance, and operation of industrial construction equipment and materials and at the time of the site reconnaissance, lumber, shipping containers, steel piping and beams, tractors, cranes and crane rigging, and miscellaneous metal and wood materials were observed on the site, stored on pallets as well as directly on the unpaved surface of the site. These materials are not hazardous in nature and therefore do not represent a REC to

the site, but it should be noted that the maintenance and movement of these materials necessitates the use of hazardous chemicals and on-site operations. In addition, the extensive storage of related equipment, materials, and maintenance supplies obscured visual observation of a significant portion of the site and represents a significant data gap.

## **Aboveground Chemical or Waste Storage**

### Aboveground storage tanks

19 ASTs were observed on the site during the site reconnaissance. The following describes the ASTs observed:

- Tank 1: 1,000-gallon Diesel fuel AST, located on northern side of maintenance warehouse
- Tank 2: 1,000-gallon Diesel fuel AST, located on northern side of maintenance warehouse
- Tank 3: approximately 65-gallon gasoline fuel AST, located in northeastern storage warehouse.
- Tank 4: approximately 500-gallon fuel AST stored in central portion of site
- Tanks 5-10: Water tanks stored in central portion of site.
- Tanks 11-14: Empty 500-gallon fuel tanks, located on the southeastern part of the site.
- Tanks 15-19: 500-gallon tanks containing engine, hydraulic, and transmission oil, located in maintenance warehouse.

The tanks observed on site appeared to be in good condition. Staining or releases were not observed in the vicinity of the aboveground storage tanks. Based on site observations, the 19 on-site ASTs do not represent a REC to the site.

### Drums, barrels, and/or containers ≥ 5 gallons

Drums, barrels and containers were observed on the site and are summarized in the table below:

Count	Size	Material	Contents	Location
20	55-gallon	Metal	Waste Oil and Filters	North side of maintenance warehouse
3	55-gallon	Metal	Antifreeze	North side of maintenance warehouse
4	55-gallon	Metal	Hydraulic Fluid	Inside of maintenance warehouse
24	5-gallon	Plastic	Paint	Storage warehouse
6	5-gallon	Metal	Paint Thinner	Storage warehouse
12	5-gallon	Metal	BR-10 (Bromide)	Storage warehouse
23	5-gallon	Plastic	Waste Oil	Storage warehouse / maintenance warehouse

The 55-gallon and 5-gallon waste oil containers are maintained and regularly removed from the site by Swift Oil company to be properly disposed of. Based on visual observations at the time of the site reconnaissance, staining was observed in the waste oil storage area on the north side of

the maintenance warehouse. Based on visual observations, the above discussed drums and barrels do not represent a REC to the site.

## **Underground Chemical or Waste Storage, Drainage or Collection Systems**

### Oil/water separators, clarifiers, sand traps, triple traps, interceptors

During the site reconnaissance, a drain was observed in the mechanic pit located on the southwestern side of the maintenance building. According to the site contact, this drain leads to a clarifier to separate discharge from steam cleaning operations. Based on soil sample analytical data provided in a 2020 LSI from the area surrounding the former oil/water clarifier, this feature does not represent a REC to the site.

## **Electrical Transformers/PCBs**

### Transformers and/or capacitors

During Terracon's site visit, one of pad-mounted transformer owned and serviced by Southern California Edison, was observed on the north side of the northern-central maintenance warehouse. It should be noted that approximately 7 metal lockers for pad-mounted transformers were also observed in the southern-central portion of the site. The lockers did not contain active transformers and were stored on either wooden blocks or additional metal. Staining or releases were not observed in the vicinity of the transformer containers, however, no information with regard to PCB content of the transformer fluids was observed. Some transformers contain mineral oil which may contain PCBs.

## **Releases or Potential Releases**

### Stained soil

Terracon observed stained soil on the southeastern and northeastern portions of the site. The stained soil was approximately 10 square feet in total. Based on site observations, the staining was a *de minimis* condition and alone does not represent a REC to the site.

### Stained pavement or similar surfaces

Terracon observed stained pavement located inside the maintenance warehouse on the central-northern portion of the site as well as outside of the maintenance warehouse. The areas of stained pavement were approximately 25 square feet in total. The pavement in the stained area was in fair condition, and the indoor staining appeared to be associated with vehicle maintenance operations. Based on visual observations, the stained pavement does not represent a REC to the site.

### Trash, debris and/or other waste materials

Trash and debris were observed along the northern site boundary and in the southern portion of the site during the site reconnaissance. Based on visual observation (only of surface materials) approximately 4 cubic feet of debris, which consisted of paper and plastic materials was observed.

Leakage, spills or other releases from these materials were not observed during the visual reconnaissance. The debris materials did not appear to be hazardous in nature.

6 solid waste disposal dumpsters, serviced by Pinnacle Disposal and Environmental and American Metal Recycling, were observed to the south of the central-northern maintenance warehouse on the site. No evidence of staining, noxious odors or hazardous waste disposal was observed within or in the vicinity of the on-site dumpsters. Based on visual observations, the trash and debris and solid waste disposal dumpsters do not represent a REC to the site.

Construction/demolition debris and/or dumped fill dirt

Terracon observed approximately 10 cubic yards of demolition debris on the central-eastern portion of the site. The debris consisted of primarily broken concrete, gravel, and soil. No evidence of staining, noxious odors or hazardous waste was observed within or in the vicinity of the demolition debris. Based on visual observations, the demolition debris does not represent a REC to the site.

## 6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

### Adjoining Properties

Direction	Description
North	The northern adjoining property consists of Truck Driver Academy (11081 Cherry Avenue) and Lopez Pallets, Inc. (11080 Redwood Avenue).
East	The eastern adjoining property consists of American Metal Recycling (11150 Redwood Avenue) and TMT Industries (14774 Jurupa Avenue).
South	The southern adjoining property consists of single-family residences (14698-14606 Argentine Court and 14606-14560 Woodland Drive).
West	The western adjoining property consists of Henry J. Kaiser High School (11155 Almond Avenue).

RECs were not observed with the adjoining properties.

## **7.0 DECLARATION**

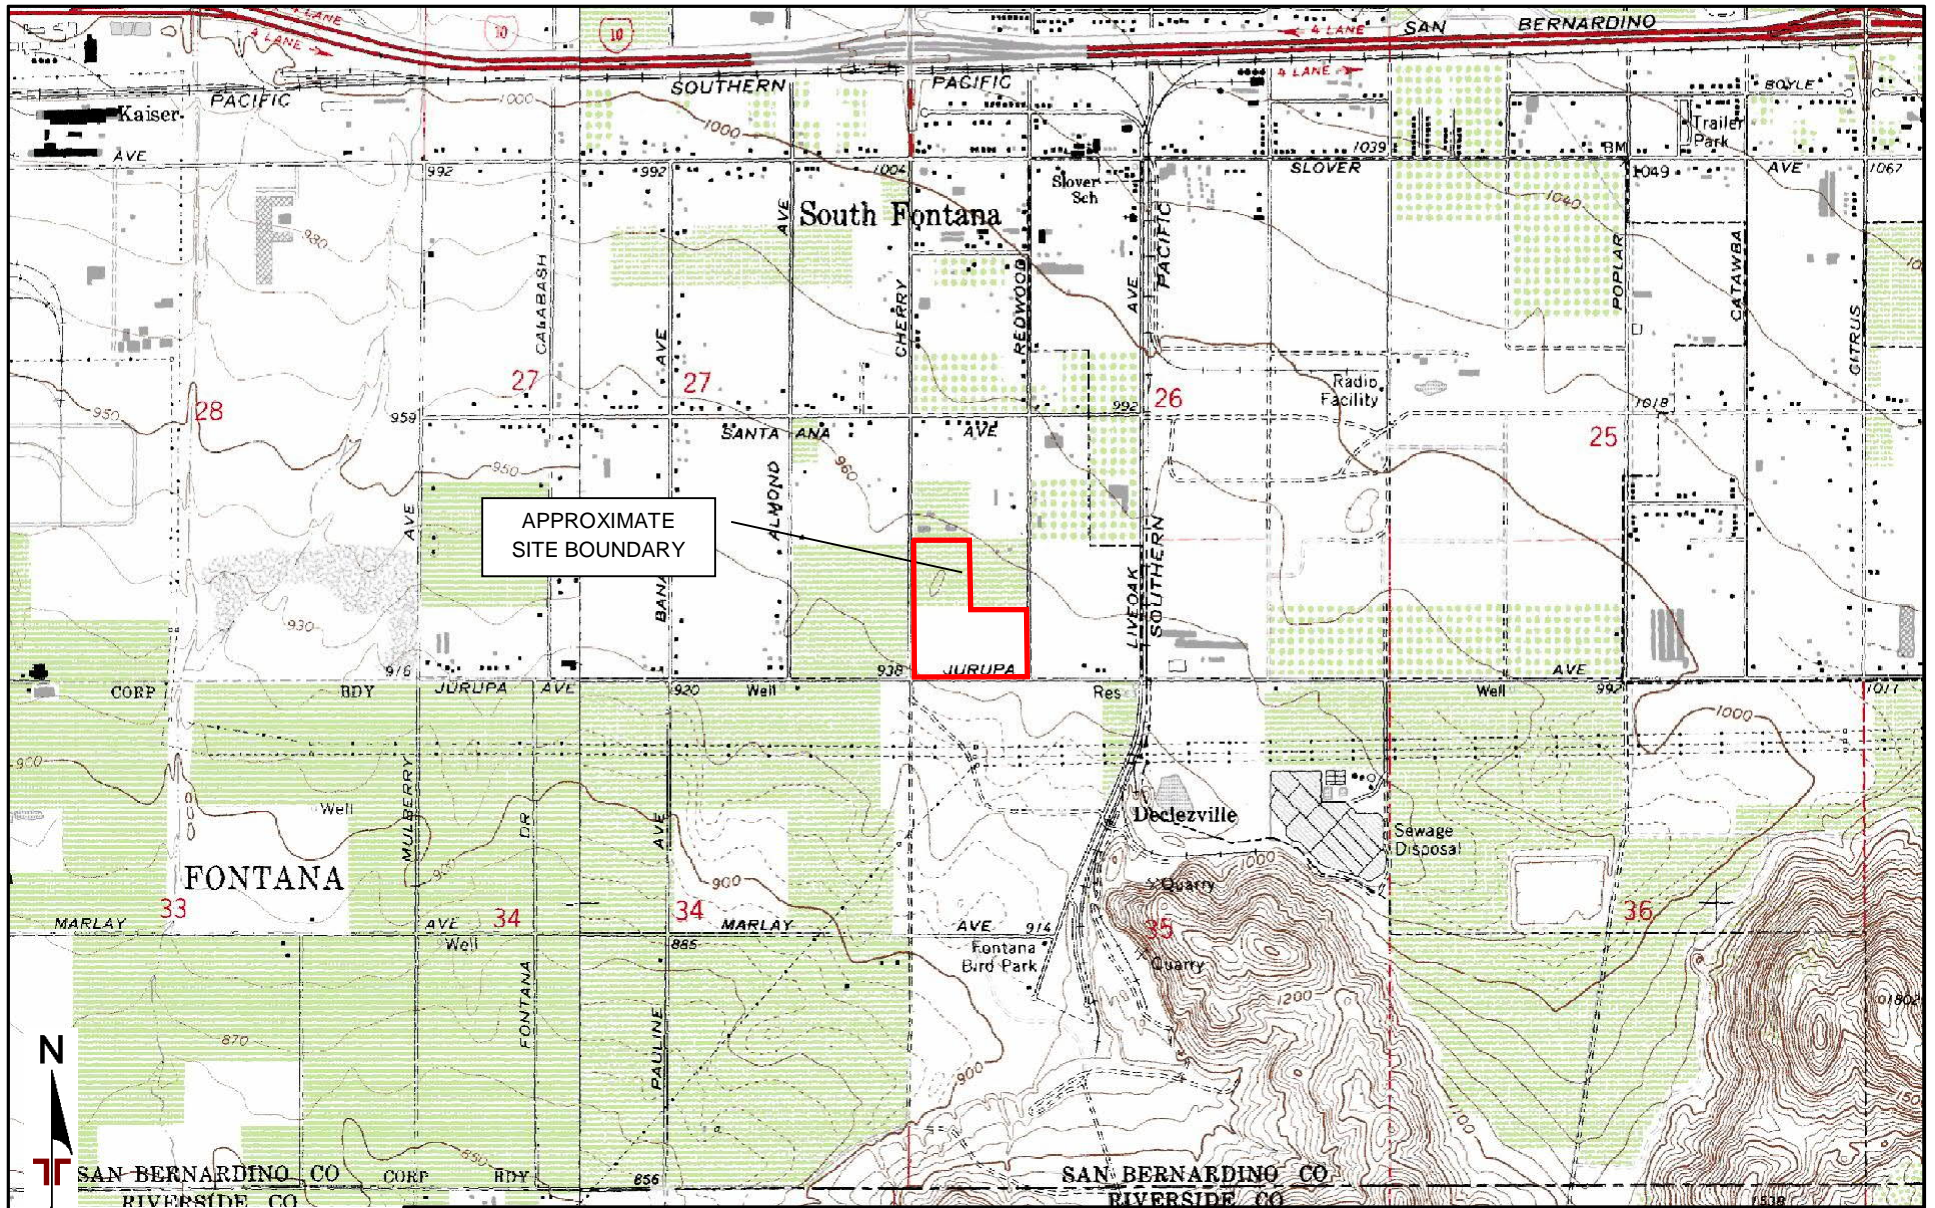

I, Carl A. Parten, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

---

Carl A. Parten  
Senior Principal / Office Manager III

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Dear Ms. Congdon,

Enclosed is a copy of the Closure Report for your review of the subject location. Upon your document review and approval please send a copy of the Closure Letter to the attention of James Foster, Tutor-Saliba Corporation, 15901 Olden St, Sylmar, CA 91342.

Should you need anything else please contact me with your request. On behalf of the PSE staff, it was a real pleasure working with you and we look forward to the next project.

Sincerely,

Dennis Minnock

DISPOSITION:

steam cleaning area drains to  
two septic systems (clarifiers) water is  
tested by Smith-Emery Co once a month  
for TDS, chloride, or baron  
reports sent to SWRCB. Review of records  
indicates all waste are sent to a disposal site  
- case closed -

Waste batteries are picked up every Tues and new ones are brought.

Empty drums are stored in the far East part of the property, behind storage building. (Approx 60 drums)  
The storage building houses spare parts and batteries.

Painting is done at two places on the property -

The main painting is done in the steam cleaning area and the touch up or minor work is done directly south of that on the property line. There is 2-55 gal drums of paint and 1-55 gal drum of paint thinner in the touch up area. Mr Collette stated that a AQMD permit was obtained for a spray paint booth but was never built.

Inside the maintenance shop are 3-15 gal Safety Klean solvent parts washers. Compressed gases are stored outside the East end of the shop. Full cylinders of O<sub>2</sub> and Acetylene are stored separately from the employees.

Steam cleaning is done on a cement pad that goes to a 3-stage clarifier and is discharged to a leach field. The clarifier and 2 septic tank systems on the property are tested once per month under Water Board orders and are checked for Total Dissolved Solids and Boron.

SYLMAR, CA 91342-1093

ATTN: UST COMPLIANCE

SUBJECT: INSPECTION COMPLIANCE REQUIREMENTS

FACILITY: FA0006826-TUTOR SALIBA CORP  
11171 CHERRY AVE  
FONTANA, CA 92337

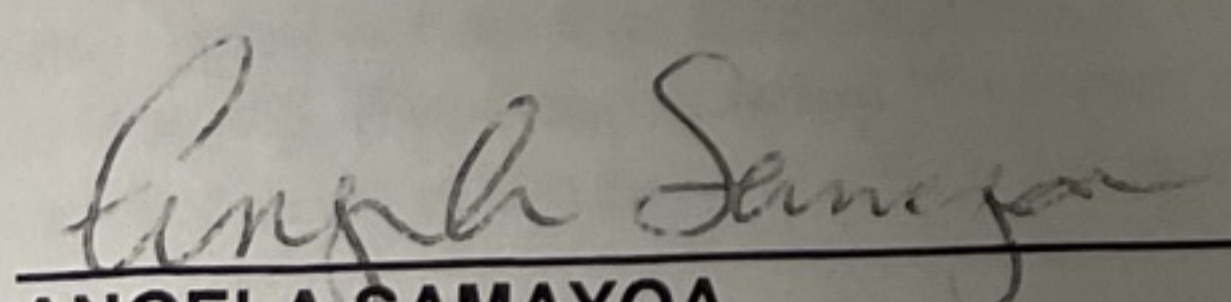

TO WHOM IT MAY CONCERN,

A recent review of our records indicates that the following violation(s) remain outstanding from the inspections conducted on: January 8, 2007, January 29, 2008, January 14, 2009, and February 26, 2009 :

- No Certification of Financial Responsibility
- Prior UST violations not corrected within 30 days
- Failure to properly monitor UST
- Leak detection equipment tampered with or disabled – Unleaded LLD **not** tested in 2007, 2008 and 2009
- Failed Secondary containment components not corrected: Failures in 2006 and in 2009. **No test by 01/27/09**
- UST not operated to prevent unauthorized releases: SB 989 failures not corrected >36 months.
- Unlawful abandonment of USTs: Unleaded UST has been "out of service" and not certified for >36 months.
- Failure to submit/update the Business Plan: No Business Emergency/Contingency Plan on file.
- Prior UST violations not corrected within 30 days: Violations outstanding > 30 days..
- 
- Failure to temporarily close USTs properly
- Failure to upgrade or repair UST – 2006 SB 989 and 2009 Spill Bucket failures.
- UST system does not meet design, construction, and monitoring reqts: Unleaded UST
- UST not operated to prevent unauthorized releases: 2006 SB 989 and 2009 Spill Bucket failures.

**Failure to submit the signed and completed certificate of compliance with the previously requested documentation immediately may result in legal action.**

If you have any questions, please call me at (909) 386-8401 or email me at [AFRANCO@SBCFIRE.ORG](mailto:AFRANCO@SBCFIRE.ORG).

Re: Limited Subsurface Investigation Report, 11171 Cherry Avenue, Fontana, California 92337

Dear Mr. Tutor:

Roux Associates, Inc. (Roux) is pleased to submit this Limited Subsurface Investigation Report (Report) to Mr. Ronald N. Tutor (Client) for the property located at 11171 Cherry Avenue in the City of Fontana, San Bernardino County, California (Site; Figure 1), pursuant to Roux's proposal dated April 2, 2020 (Roux's proposal). The Site is a 29.72-acre industrial property and the San Bernardino County Assessor's Office identifies Assessor Parcel Numbers (APNs) 0236-191-14-0000 and 0236-191-25-0000 with the Site.

## INTRODUCTION

This investigation was performed on behalf of the Client to address outstanding recognized environmental conditions (RECs) identified by Partner Engineering and Science, Inc. (Partner) in an October 14, 2019 Phase I Environmental Site Assessment (Phase I ESA) Report (Partner, 2019). As part of the investigation, Roux conducted soil and soil vapor sampling to screen for potential subsurface impacts in areas of the Site associated with historical use and storage of hazardous materials, wash rack and clarifier features, and a septic system feature. This Report summarizes the scope of work implemented at the Site by Roux, describes the data generated, and provides conclusions and a recommendation for no further investigation.

The Site is currently used for storage of heavy construction equipment in yards, with two buildings, a portable office trailer, an outdoor fabrication area, and parking areas. The two buildings include a warehouse where construction materials are stored, and a shop building used for light maintenance of construction equipment with some offices. The Site is located in an area of mixed industrial, residential, and commercial use, bordered by Jurupa Avenue to the south, Cherry Avenue and Henry J. Kaiser High School to the west, American Metal Recycling and Redwood Avenue to the east, and Truck Driver Academy to the north. A Site Location Map and Site Plan are provided in Figures 1 and 2, respectively.

## BACKGROUND

The property was developed for agricultural use around 1938, agricultural use continued until approximately 1975, and the property has been used for various industrial uses since approximately 1975 (Partner, 2019). Tenants on the subject property have included Owl Crane & Rigging Co. (1990); Ronald Tutor (circa 2003); and Tutor Perini (circa 1986-Present).

In the Phase I ESA, Partner identified the following abbreviated RECs and environmental concerns (ENV):

- Historical presence of hazardous waste on the subject property (REC-1);
- Former Underground Storage Tanks (USTs; REC-2);
- Septic System (REC-3);

3513.0001L.1061/R

- Presence of wash rack and clarifier features (REC-4);
- 2009 Spill Prevention, Control, and Countermeasure (SPCC) Plan Outdated (ENV-1); and,
- Potential for presence of asbestos-containing material (ACM) or lead-based paint (LBP) (ENV-2).

Former USTs (REC-2) and the potential presence of ACM or LBP (ENV-2) are not addressed as part of this Report. We understand that Partner retrieved San Bernardino County Fire Protection District records to sufficiently document prior removal of Former USTs with acceptable confirmation sampling. Building materials were observed to be in good condition (as was noted in the Phase I ESA), and there is no planned renovation or demolition. With the exception of the Phase I ESA and former UST removal described therein, no other prior investigation reports were provided to Roux for review.

Roux's scope of work for this investigation to assess outstanding RECs included:

- Advancement of four borings to a depth of 15-feet below ground surface (bgs) to facilitate the collection of soil samples in the vicinity of hazardous materials storage (REC-1), including borings located north of the shop area, a diesel aboveground storage tank (AST), and fabrication area;
- Advancement of five borings to a depth of 15-feet bgs to facilitate the collection of soil and soil vapor samples in the vicinity of hazardous materials storage at the shop building (REC-1), the septic system (REC-3), and wash rack/clarifier (REC-4); and,
- Review SPCC Plan requirements for the Site.

## **SOIL AND SOIL VAPOR INVESTIGATION**

Investigation activities described below were conducted under supervision by a California Professional Engineer (Civil). The soil and soil vapor sampling locations assessed as part of this investigation are shown on Figure 2.

### Pre-Field Activities

Prior to the start of field activities, Roux prepared a Site-specific Health and Safety Plan (HASP) to ensure worker safety. In addition to containing information regarding Roux's standard safety practices, the HASP described potential hazards relating to Site activities and provided the locations and contact information of nearby emergency services.

At least 48 hours prior to fieldwork, the areas of the Site targeted for the investigation were also marked in white paint and Underground Service Alert (USA) was notified of the intended intrusive work. Boring permits were not required for this scope of work.

### Geophysical Survey

To assess the locations of potentially buried utilities (i.e. natural gas, electric, water, sewer, telephone, fiber optic, etc.) or subsurface obstructions prior to drilling, a private geophysical services and utility locating firm, Spectrum Geophysics (Spectrum) of Chatsworth, California, was contracted to perform a geophysical survey on April 14, 2020. The geophysical survey technician surveyed the area north and northeast of the shop building and was not able to confirm the location of a leach field.

#### Soil Boring Advancement and Soil Sampling

Under Roux's direction, JHA Environmental, Inc. (JHA) of Irvine, California, a State of California licensed driller, advanced nine (9) soil borings using direct-push drilling equipment and/or hand-auger tools on April 14, 2020, consistent with the sampling approach outlined below:

- Three (3) soil borings (SB-1, SB-2, and SV-1) were advanced near the hazardous materials storage area;
- Two (2) soil borings (SV-2 and SV-3) were advanced near the approximate location of the septic system;
- Two (2) soil borings (SV-4 and SV-5) were advanced near the wash rack and clarifier associated with construction equipment maintenance; and,
- Two (2) soil borings (SB-3 and SB-4) were advanced near the fabrication area at the southeastern corner of the Site.

Each boring was advanced to a depth of 5-feet bgs using a hand auger and then to a terminal depth of 15.5-feet bgs using a direct push drilling rig. Soils were continuously logged by Roux by collecting soil cores within acetate sleeves during advancement. Soil samples were screened with a photoionization detector (PID) approximately every 2.5-feet. One discrete soil sample was collected from each boring at the depth from which the highest PID measurement was recorded. Soil samples were collected using United States Environmental Protection Agency (USEPA) Method 5035 TerraCore® samplers, and soil samples were analyzed for volatile organic compounds (VOCs) using USEPA Method 8260B/5035 and semi-volatile organic compounds (SVOCs) using USEPA Method 8270C.

A replicate soil sample was collected during the sampling activities to maintain an approximate ratio of 1 replicate soil sample for every 10 primary soil samples. The replicate soil sample was analyzed for the same parameters as the primary soil samples collected from the same boring and similar interval.

After soil sample collection, soil samples were labeled, placed on ice, and transported under standard chain-of-custody documentation to Enthalpy Analytical (Enthalpy) of Orange, California, a California-certified laboratory. After soil sampling, borings were backfilled to the surface with hydrated granular bentonite and patched at the surface to match existing conditions, except for select borings where soil vapor probes were installed for soil vapor sampling, as described below.

#### Soil Vapor Probe Installation and Soil Vapor Sampling

Under Roux's direction, JHA installed soil vapor probes at five (5) boring locations (SV-1 through SV-5) on April 14, 2020. At each location, dual-nested temporary soil vapor probes were installed at depths of 5- and 15-feet bgs in general compliance with the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC), Los Angeles Regional Water Quality Control Board (LARWQCB), and San Francisco Regional Water Quality Control Board, Advisory, Active Soil Gas Investigations (*Soil Gas Advisory*) dated July 2015. Each soil vapor probe consisted of a vapor probe tip and screen affixed to ¼-inch Nylaflow® tubing and secured at the surface with gas-tight fittings. The probes were constructed by first placing a minimum of 6-inches of coarse sand into the bottom of the borehole. The tip and tubing were then lowered into the borehole through a tremie pipe for support. Additional sand was then placed in the borehole via tremie to create an approximately 1-foot sand pack interval around the probe tip. Approximately 1-foot of dry granular bentonite was placed on top of the sand pack followed by hydrated bentonite to the bottom depth of the upper-sand pack hosting the shallow soil vapor probe. After the installation of each soil vapor probe, a minimum 48-hour equilibrium period was observed prior to purging and sampling, as stipulated by the *Soil Gas Advisory*.

On April 20, 2020, 11 soil vapor samples (10 primary and 1 duplicate) were collected from the soil vapor probes under the direction of Roux by H&P Mobile Geochemistry, Inc. (H&P) of Carlsbad, California. The sampling approach is outlined below.

- Two probes were installed in each boring at locations SV-1 through SV-5, one at a depth of 5-foot bgs and one at 15-foot bgs. Prior to sample collection, a shut-in test was performed at each soil vapor probe and each probe was purged of three (3) system volumes (tubing, sand pack, dry bentonite) in accordance with the *Soil Gas Advisory*. After purging, soil vapor samples were collected by H&P using a glass syringe and analyzed on-Site in H&P's mobile laboratory for VOCs using H&P Method 8260SV (USEPA Method 8260B) and H&P's ultra-low reporting limits for VOCs.
- One field duplicate soil vapor sample was collected from soil vapor probe SV-2-5 during the soil vapor sampling activities, achieving an approximate ratio of 1 duplicate soil vapor sample for every 10 primary samples. The duplicate and primary soil vapor samples were collected using a T-fitting. The duplicate soil vapor sample was analyzed for the same parameters as the primary sample collected from the same probe. A standard leak check compound (1,1-difluoroethane [DFA]) was used and also analyzed for in each sample.
- After soil vapor sampling activities were completed, the soil vapor probes were abandoned by pulling the tubing from the ground and filling any void space at the surface of the borehole with hydrated bentonite and patching the surface to match existing conditions.

#### Investigation Derived Waste

Investigation derived waste (IDW) generated from drilling and decontamination activities was placed in one (1) Department of Transportation-rated 55-gallon drum. The drum was labeled and is temporarily stored on-Site pending characterization and profiling. American Integrated Services, Inc. of Wilmington, California will transport the IDW drum under standard manifest for off-Site disposal in accordance with state and federal laws and regulations.

#### **SOIL AND SOIL VAPOR SAMPLING RESULTS**

Boring logs are provided in Attachment 1. Based on the soil type observed in the borings advanced during this investigation, the shallow subsurface beneath the Site generally consists of dark grayish brown silty sand to well-graded sand with occasional lenses of finer grained silty soils. No groundwater was encountered in any of the borings.

Analytical results for soil and soil vapor samples are summarized in Tables 1 and 2, respectively. Complete analytical laboratory reports are included in Attachment 2. The sections that follow provide a summary of the soil and soil vapor sample analytical results.

#### Soil Results

As part of this investigation, a total of ten (10) shallow soil samples (including nine (9) primary and one (1) replicate soil sample) were analyzed for VOCs by USEPA Method 8260B and SVOCs by USEPA Method 8270C, as summarized in Table 1. Concentrations of VOCs and SVOCs reported for the primary and replicate soil sample collected at boring SV-2 at an approximate depth of 5-foot bgs were similar (Table 1). Due to the heterogeneity of the soil matrix, results for replicate soil samples may vary from results of a primary soil sample.

Soil analytical results were compared to USEPA regional screening levels (USEPA RSL), and DTSC Human and Ecological Risk Office (HERO) Human Health Risk Assessment Note 3 screening levels (DTSC-SL) for commercial/industrial soils. As shown in Table 1, the following compounds were detected

in soil samples at concentrations above laboratory reporting limits, but below regulatory screening levels for commercial/industrial soil: 1,2,4-trimethylbenzene, acetone, benzene, para-isopropyl toluene, tert-butyl alcohol (TBA), and bis(2-ethylhexyl) phthalate. A summary of the detected compounds is presented below:

- **1,2,4-Trimethylbenzene:** 1,2,4-trimethylbenzene was detected in one primary sample (SV-2-5) and its duplicate (SV-2-5-D), at a concentration of 0.0065 milligrams per kilogram (mg/kg) in each sample;
- **Acetone:** Acetone was detected in the duplicate sample (SV-2-5-D) at a concentration of 0.11 mg/kg, but was not detected in the primary sample;
- **Benzene:** Benzene was detected in soil sample SV-5-10 at a concentration of 0.0044 mg/kg;
- **para-Isopropyl Toluene:** para-Isopropyl toluene was detected in duplicate sample SV-2-5-D at a concentration of 0.0045 mg/kg, but was not detected in the primary sample;
- **TBA:** TBA was detected in four soil samples (SB-2-5, SV-1-7.5, SV-2-5, and SV-2-5-D) at concentrations ranging from 0.0084 mg/kg (SV-1-7.5) to 0.011 mg/kg (SV-2-5); and,
- **bis(2-Ethylhexyl) Phthalate:** bis(2-Ethylhexyl) phthalate was detected in soil sample SV-2-5 at a concentration of 0.54 mg/kg.

The above reported concentrations were below all regulatory screening levels for commercial/industrial soil during this investigation.

#### Soil Vapor Results

On April 20, 2020, a total of eleven (11) soil vapor samples (ten (10) primary and one (1) duplicate sample) were collected from temporary dual-nested soil vapor probes at locations SV-1 through SV-5 and analyzed for VOCs by H&P Method SV8260 (USEPA Method 8260B), as summarized in Table 2. Soil vapor results were compared to USEPA RSLs and/or DTSC-SLs by applying future industrial scenario attenuation factors of 0.001<sup>1</sup> and 0.03<sup>2</sup> to the most recent published industrial indoor air screening levels. As shown in Table 2, no VOC analytes were reported above laboratory reporting limits in the primary or duplicate soil vapor samples.

The leak check compound, 1,1-difluoroethane (DFA), was analyzed in all soil vapor samples and was not detected (Attachment 2), indicating that any potential pathway to atmospheric air or leak that may have existed during sampling is likely insignificant.

Roux notes that the laboratory's ultra-low reporting limits for certain compounds were higher than some of the regulatory screening levels using the conservative attenuation factors as described above, which is an inherent limitation in H&P's ultra-low reporting limits using USEPA Method 8260SV (8260B). Remaining results were relied upon for screening for the potential presence of impacts to soil vapor at low concentrations.

## REVIEW OF SPCC PLAN

Roux's scope of services included review of the Site's existing SPCC Plan (ENV-2). The Site is classified as a Tier I Qualified Facility (less than 5,000 gallons oil storage capacity with no known reportable spills in the last 3 years). For a Tier I Qualified Facility, an SPCC Plan certified by a Professional Engineer is not required. Roux recommends that a Site representative prepare an SPCC Plan, using the Tier I Qualified Facility SPCC Plan Template made available by the USEPA, and self-certify the resulting plan (<https://www.epa.gov/oil-spills-prevention-and-preparedness-regulations/myfacility-qualified-facility-under-spcc-rule>). Successfully completing the template will meet the USEPA's requirement to have a written SPCC plan under the Federal SPCC Rule (40 CFR Part 112), as well as the State's requirement to have a written SPCC Plan under the Aboveground Petroleum Storage Act (APSA).

## CONCLUSIONS AND RECOMMENDATIONS

Based on the soil analytical results from the areas investigated, all reported concentrations in soil were below regulatory screening levels (Table 1).

Based on the soil vapor analytical results from the areas investigated, all concentrations in soil vapor were below laboratory reporting limits (Table 2).

The Site is classified as a Tier I Qualified Facility (less than 5,000 gallons oil storage capacity with no known reportable spills in the last 3 years) for SPCC purposes.

Based on these results, Roux recommends:

- No further investigation related to the RECs; and,
- Preparation of an SPCC Plan by a Site representative using the USEPA's Tier I Qualified Facility Template.

## CLOSING

Roux is available to answer any questions regarding this Limited Subsurface Investigation Report. Please do not hesitate to contact Julie Harriman by telephone at 714-887-4374 or by e-mail at [jharriman@rouxinc.com](mailto:jharriman@rouxinc.com) or Tony Ward by telephone at 310-879-4927 or by e-mail at [tward@rouxinc.com](mailto:tward@rouxinc.com).

Sincerely,

TES, INC.

**Notes:**

AF = Attenuation Factor.

bgs = below ground surface.

DTSC SLs = Department of Toxic Substances Control (DTSC) Human and Ecological Risk Office (HERO) Human Health Risk Assessment (HHRA) Note Number 3, updated April 2019 and Note Number 5, released August 2014.

*Italicized* = duplicate sample.

MDL = Method Detection Limit.

NA = Not available.

USEPA = United States Environmental Protection Agency.

USEPA RSLs = USEPA Regional Screening Level (RSL), updated November 2019.

VOCs = Volatile organic compounds.

<X = Analyte not detected above MDL shown.

µg/L = micrograms per liter

\* = Some laboratory reporting limits were elevated above one or more screening levels at the laboratory's ultra low reporting limits for the selected USEPA Method at the time of analysis.

\*\* = For trichloroethene, DTSC HERO HHRA Note 5 Accelerated Response Action Levels are shown.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evacs: No  
Injuries: Unknown  
Fatals: No  
Description: A passenger car struck and damaged a power pole and its three transformers. The incident resulted in 60 gallons of mineral oil to be released onto asphalt. An unknown amount of the oil entered a nearby storm drain. The destination of the drain was not known. In addition, a fire was involved. The local police and fire departments were dispatched. It was not known if any personal injuries occurred. A road closure was imposed and the fire has since been extinguished. An environmental specialist is en route to assist with the cleanup. The investigation is ongoing.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include;

Violation Date: 07-21-2021  
Citation: R8-2012-0012 - Scrap Metal Recyclers Permit  
Violation Description: SWPPP

Violation Notes: Dustin Daughtery provided staff with the facility Stormwater Pollution Prevention Plan (SWPPP), last updated in June 2017. Staff noted that the SWPPP appeared to contain several incorrect sections including the description of the industrial operations which states in part All hospital beds related manufacturing, assembling and specific unit processes and operations, including other operations (raw material storage, fabric and foam cutting, sewing, laminating and assembly operations) are conducted in the warehouse areas . Several other sections including Best Management Practices (BMP) descriptions require updating, for example, the SWPPP references trenches that no longer exist on the property (according to Dustin Daughtery, they were paved over).

Eval Notes: Facility is paved in processing areas, some of which include overhead permanent covers (see figure 1 in report as an example). Facility drains to the southeast corner, area where the Advanced Treatment System is installed. Concrete basin collects runoff and allows sediment to settle. Storm water in basin then is transferred to media filled containers prior to its release or may be used for dust control. Samples are collected at spigot (see figure 5 in report ) prior to discharge. In regards to their SWPPP, it was quite complete. SWPPP contained: Site map with flow directions Rain Event Action Plan Monthly inspections (in e-form) Monthly safety training which includes mention of storm water compliance. Spill prevention control and counter measures plan. Missing from the SWPPP was; A sweeping log Lab certification for those collecting sample Corrective Actions requested; Begin log of sweeping activities and dates If in house sampling is going to continue, obtain sampling certification by January 30, 2016 or prior to any sampling.

Eval Type: Industrial Storm Water Compliance Evaluation  
Eval Notes: Facility is paved in processing areas, some of which include overhead permanent covers (see figure 7 in report). Facility drains to the southeast corner, area where the Advanced Treatment System is installed. Concrete basin collects runoff and allows sediment to settle but, not before sediment is removed by rip rap stone structure (see figures 1 & 2). Storm water in basin then is transferred to media filled containers (see figure 4) prior to its release or may be used for dust control. Rip rap area was being washed and refreshed after having received a storm event (see figures 1 & 2). In regards to their SWPPP Present were; a) SWPPP b) Storm water inspections (last 11/4/2016) c) Sampling certification(s) d) Sampled twice in December, yet to receive results. e) A Rain Event Action Plan (REAP) f) Sampling kit Missing or not verified were; a) Daily sweeping Log Corrective Actions requested; Submit a sweeping log via upload onto SMARTS.

Violation Description: SWPPP  
Violation Notes: Dustin Daughtery provided staff with the facility Stormwater Pollution Prevention Plan (SWPPP), last updated in June 2017. Staff noted that the SWPPP appeared to contain several incorrect sections including the description of the industrial operations which states in part All hospital beds related manufacturing, assembling and specific unit processes and operations, including other operations (raw material storage, fabric and foam cutting, sewing, laminating and assembly operations) are conducted in the warehouse areas . Several other sections including Best Management Practices (BMP) descriptions require updating, for example, the SWPPP references trenches that no longer exist on the property (according to Dustin Daughtery, they were paved over).

[Click Here for FRS Facility Detail Report:](#)

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

WDS:

Name: MACHINERYLAND INC  
Address: 11099 Almond Ave  
City: FONTANA  
Facility ID: Santa Ana River 361019000  
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
Subregion: 8  
Facility Telephone: 9098290660  
Facility Contact: Jim Stewart  
Agency Name: MACHINERYLAND INC  
Agency Address: 11099 Almond Ave  
Agency City,St,Zip: Fontana 92337  
Agency Contact: Jim Stewart  
Agency Telephone: 9098290660  
Agency Type: Private  
SIC Code: 5084  
SIC Code 2: 5093  
Design Flow: 0  
Baseline Flow: 0  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**Violations:**

Site ID: 74390  
Site Name: TERESI TRUCKING LLC.  
Violation Date: 10-30-2020  
Citation: 23 CCR 16 2636(f)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(4)  
Violation Description: Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC).  
Violation Notes: CORRECTIVE ACTION: Repair the system to be fail/safe when a leak is detected within thirty (30) days and send test results to this Agency for verification. OBSERVATION: The UST system fail/safe was not functional.  
Violation Division: San Bernardino County Fire Department  
Violation Program: UST  
Violation Source: CERS,

Site ID: 74390  
Site Name: TERESI TRUCKING LLC.  
Violation Date: 12-08-2020  
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2  
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months."  
Violation Notes: CORRECTIVE ACTION: Repair/replace the spill container and send re-test/certification results to this Agency within thirty (30) days. OBSERVATION: The spill container for the UST did not pass testing on 10.30.2020 and will need to be replaced. Plans for permit not required. Spill Container is not direct bury.

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: FACILITY HAS FAILED TO CONDUCT UST DESIGNATED OPERATOR MONTHLY INSPECTION BETWEEN MAY OF 2021 AND OCTOBER OF 2021. IMMEDIATELY PROVIDE A WORK PLAN TO THIS DEPARTMENT ADDRESSING THE PREVENTION OF THIS VIOLATION FROM RECURRING AND SUBMIT A COPY TO THIS DEPARTMENT WITHIN 30 DAYS.

accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 10/05/2018. OBSERVATION: DO monthly report for Oct did not indicate alarm notification and correction for 10/16/17. CORRECTIVE ACTION: Gary Giles, manager on-site noted alarm history dated 10/16/17 on DO report. In the past manager would perform work with ICC technician on the phone. Advised manager that all work performed on-site relating to UST shall be conducted by an ICC certified technician. As advised, manager has a signed letter on file that all future work will be conducted by an ICC certified technician. Corrected on-site, no further actions required.

Violation Date: 03-05-2020  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 04/24/2020. OBSERVATION: Observed the following inventory on site that is not correctly disclosed on the hazardous materials inventory via CERS: (1) 500-gallon tank of motor oil, (1) 500-gallon tank of used oil, (1) 55-gallon drum of waste oily solids, (1) 55-gallon drum of transmission oil, (2) 55-gallon drums of gear oil, (2) 55-gallon drums of drained used oil filters, and (1) 251-cubic ft. cylinder of oxygen. CORRECTIVE ACTION: Update the hazardous materials inventory via CERS to reflect the inventory that was observed on site. The following fields must be completed for each hazardous material listed: chemical name, common name, CAS number, physical state, Hazardous material type, Trade secret, EHS, Radioactive, state waste code, Federal hazard categories, Chemical location, maximum daily amount, largest container, annual waste amount, inventory storage information, and mixture components. Your CERS ID number is 10045447.

Violation Description: Failure to install line leak detector.

Violation Notes: Returned to compliance on 10/07/2015. THE EXISTING MECHANICAL LINE LEAK DETECTOR (RED JACKET FX1DV) FAILED TO RECOGNIZE THE SIMULATED LEAK WHEN TESTED. REQUIREMENT: THE TECHNICIAN REPLACED THE LEAK DETECTOR WITH A VMI LD2000 AND RETESTED THE LINE. AFTER SEVERAL ATTEMPTS WERE MADE TO PURGE THE LINE OF AIR, THE NEWLY INSTALLED LEAK DETECTOR WAS VERIFIED TO HOLD "SLOW FLOW". VIOLATION CORRECTED DURING INSPECTION. NOTE: THE CURRENT UST MONITORING PLAN MUST BE AMENDED TO REFLECT THE CHANGE OF LEAK DETECTOR MANUFACTURER/MODEL. UPDATE THE PLAN AND SUBMIT TO THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) WITHIN 30 DAYS. PROVIDE E-MAIL NOTIFICATION TO JKOOYMAN@SBCFIRE.ORG UPON COMPLETION (SEE VIOLATION# 330).

Site ID: 74390  
Site Name: TERESI TRUCKING LLC.  
Violation Date: 10-29-2021  
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)  
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.  
Violation Notes: OVERFILL PREVENTION FILL TUBE SHUT OFF VALVE WAS SET TO ACTIVATE ABOVE 95% CAPACITY. IMMEDIATELY OBTAIN PERMIT TO REPLACE FILL TUBE SHUT OFF VALVE AND SCHEDULE WITNESSED RE-INSPECTION WITH THIS DEPARTMENT WITHIN 30 DAYS.

Potential Contaminants of Concern: Other inorganic / salt  
Site History: 1957-1977 - RCM Technologies, Inc. operated an aluminum recovery facility from 1957 to 1977 in the City of Fontana. The 18-acre facility was located on the northeast corner of Beech Boulevard and Santa Ana Boulevard. 1976 - The Regional Board adopted Waste Discharge Requirements, Order No. 76-238, for aluminum recycling operations conducted at the site by RCM Technologies, Inc. and Mr. Robert Sackett. Mr. Sackett, the Board Chairman and Chief Executive Officer of RCM Technologies, Inc., owned the property and the aluminum recovery facility until July 1977 when Hilly'ard Aluminum

Recovery Corporation (HARC), a wholly-owned subsidiary of Alumax Inc., purchased certain assets, excluding the Fontana property. 1977-1982 - HARC operated the aluminum recovery facility in Fontana. October 1977- The Regional Board adopted Board Order No. 77-200, which replaced Order No. 76-238, for the storage and handling of aluminum oxide wastes at the Alumax Fontana facility. Aluminum oxide was generated as a manufacturing by-product of the aluminum recovery process. These wastes were stockpiled at the site, partly on a concrete-paved storage pad located at the southwest corner of the site, and partly on native soil. The aluminum oxide waste contained high levels of soluble salts consisting almost entirely of sodium and potassium chloride. August 1985 - HARC purchased the Alumax Fontana property from RCM. January 1986 - The Regional Board adopted Cleanup and Abatement Order (CAO) No. 86-17. This Order required Alumax Inc., Robert Sackett, and RCM Technologies, Inc. to perform a subsurface investigation, and to propose remedial measures for mitigating any water quality degradation that may have resulted from the migration of soluble salts contained in the aluminum oxide wastes. In order to facilitate investigation at the site and to eliminate a likely source of groundwater contaminants, all aluminum oxide wastes were removed from the site by March of 1992. 1986-1989 - Alumax Inc. conducted two site investigations. April 1993 Alumax Inc. instituted a groundwater monitoring program. Initial groundwater monitoring indicated the presence of soluble salts in the groundwater downgradient of the site. July 1993 - Alumax Inc. prepared to initiate a site closure to prevent further groundwater degradation by soluble salts known to remain in the soils beneath the former waste pile storage areas. September 1994 - CAO No. 86-17 was replaced by CAO No. 94-44 to include time schedules for conducting additional groundwater investigations and for mitigating the impact of soluble salts on groundwater. July 1998 - Aluminum Company of America (Alcoa) acquired all assets and facilities, including the Fontana property, from Alumax Inc. May 1999 - The Regional Board adopted CAO No. 99-38, which replaced CAO No. 94-44, to require Alcoa to implement appropriate corrective measures and monitoring requirements. August 1999- Alcoa submitted a site closure and post-closure maintenance plan (SCPCMP). 1999-2000 - Alcoa installed four offsite monitoring wells, AOS #1 through #4, and began monitoring these wells in addition to the existing two on-site groundwater monitoring wells, MW-1 and MW-2. March 2000 - The Executive Officer of the Regional Board approved the SCPCMP. May 2000 - Alcoa formally requested a site closure deferral from the December 31, 1999 closure date because the property was for sale, and the cap configuration would be dependent on the buyer's development of the property. March 2001 - The Executive Officer of the Regional Board conditionally approved a time extension for site closure until March 1, 2006. January 2004 - USF Reddaway Inc. (USFR) acquired the Alumax Fontana property from Alcoa and began plans for site development. Prior to USFR's final acquisition of the property, Board staff approved their tentative site development plans in September 2003. May 2005 - Yellow Roadway Corp. (YRC) acquired USFR and became directly involved in the property management, including development, of the Alumax Fontana site. November 2005 - YRC formally requested a time extension for site closure from March 1, 2006 to December 31, 2007 to allow time for a reassessment of the facility design, which may influence the design of the final closure cap. February 2006- The EO of the Regional Board granted YRC the requested time extension for site

closure. June 2006 The Regional Board adopted CAO No. R8-2006-0035, which replaced CAO No. 99-38, to reflect the change in ownership of the Alumax Fontana property, and to require YRC to implement site closure. February 2008 - YRC completed the installation of the closure cap (~3" asphalt cap) in accordance with Cleanup & Abatement Order (CAO) No. R8-2006-0035, to minimize water infiltration and mobilization of salt-affected soils beneath the site. April 2008- Alcoa submitted a letter of intent to continue post-closure groundwater monitoring at the former Alumax site. June 2008 - The Executive Officer of the Regional Board approved Alcoa's commitment to continue postclosure groundwater monitoring at the site. December 2009 - Regional Board staff approved the final construction report for the installation of the asphalt concrete cap. June 2010 - CAO No. R8-2006-0035 was rescinded by Board Order No, R8-2010-0021. Alcoa, the previous property owner and the RP for groundwater monitoring, is continuing with post-closure groundwater monitoring at the site. October 2011 - Overton Moore Properties (OMP) acquired the former Alumax Fontana property from YRC. June 2012 An environmental restriction covenant was recorded by OMP for the salt-affected area with the San Bernardino County Recorder. The declaration of restrictions previously recorded for the salt-affected area was terminated by the EO of the Regional Board. April 2013 - OMP completed the redevelopment of the 17-acre undeveloped site into a warehouse for storage and for use as a distribution center for dry goods. May 2013 - Coaster acquired the warehouse building and property, and is the current land owner of the former Alumax Fontana site. August 2013 A new environmental restriction covenant was recorded for the salt-affected area by Coaster with the San Bernardino County Recorder. June 2014 - The Executive Officer of the Regional Board approved site coverage under Board General Order No. R8-2014-0001 for post-closure maintenance of the capped, brine-affected area.

Title: 13267 Letter to Alcoa for Postclosure Groundwater Monitoring  
Description: On June 10, 2008, Board staff issued a staff enforcement letter, acknowledging Alcoa's commitment to continue postclosure groundwater at the former Alumax Fontana site. YRC will not be responsible for groundwater monitoring at the former Alumax Fontana site under the conditions stipulated in the June 10, 2008 letter.

Status: Historical  
Title: SEL 6/8/06 for YRC Worldwide  
Description: CAO No. 99-38 was replaced by CAO No. R8-2006-0035 on June 8, 2006 to reflect the change in ownership of the Alumax Fontana property, and to require Yellow Roadway Corp. to implement site closure. Board staff issued a staff enforcement letter to require Alcoa, previous owner of the Alumax property, to continue groundwater beyond site closure, as agreed upon.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

PROPOSED INDUSTRIAL BUILDINGS  
11171 CHERRY AVENUE  
FONTANA, CA 92337

### TARGET PROPERTY COORDINATES

Latitude (North): 34.051093 - 34° 3' 3.93"  
Longitude (West): 117.487761 - 117° 29' 15.94"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 454982.1  
UTM Y (Meters): 3767733.8  
Elevation: 963 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map: 12015969 FONTANA, CA  
Version Date: 2018  
  
West Map: 12015973 GUASTI, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8665H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8653H	FEMA FIRM Flood data
06065C0017G	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
FONTANA	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles NNW
Site Name:	Western States Refining
Site EPA ID Number:	CAD076080563
Groundwater Flow Direction:	Southwest
Inferred Depth to Water:	approximately 280 feet.
Hydraulic Connection:	Permeable soils are present above the identified ground water.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q ( <i>decoded above as Era, System &amp; Series</i> )

#### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 2

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### Soil Map ID: 3

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6
2	11 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

CREDENTIALS**

# Sarah Workman

## Assistant Scientist

### PROFESSIONAL EXPERIENCE

Sarah is an assistant scientist in Terracon's Carson, CA office. In this office, Sarah has conducted site reconnaissance and assisted in preparing several Phase I Environmental Site Assessment (ESA) reports throughout Southern California. These efforts involve field surveys, interviews with property owners, Environmental Data Resource reports, file reviews at local county and city regulatory offices, surveying, drilling, electrical resistivity testing, and more. Each ESA is prepared and finalized in accordance with new ASTM Standards. Her experience includes vacant, undeveloped, industrial, retail, residential, and commercial properties.

### PROJECT EXPERIENCE

#### Vacant Land -California

Performed site reconnaissance and assisted Project Managers on Environmental Site Assessments for vacant land properties.

#### Undeveloped Land -California, Nevada

Performed site reconnaissance and assisted Project Managers on Environmental Site Assessments for undeveloped land properties.

#### Commercial Properties -California

Performed site reconnaissance and assisted Project Managers on Environmental Site Assessments for commercial properties.

#### Industrial Properties -California

Performed site reconnaissance and assisted Project Managers on Environmental Site Assessments for Industrial properties.

#### Retail Properties -California

Performed site reconnaissance and assisted Project Managers on Environmental Site Assessments for retail properties.

### EDUCATION

**Master of Science**, Environmental Studies  
California State University, Fullerton

**Bachelor of Arts**,  
Environmental Studies  
Eckerd College, St Petersburg FL

### CERTIFICATIONS

**Restoration Ecology** Certificate,  
University of Idaho

### WORK HISTORY

Terracon Consultants, Inc.  
Assistant Scientist,  
2022 - Present

Los Angeles Waterkeeper,  
Project Coordinator  
June 2015- Dec 2015

Land Use Ecological Services  
Intern  
2012

# Clifford Nale, L.G., P.G.

## SENIOR PROJECT MANAGER

### PROFESSIONAL EXPERIENCE

Mr. Nale is a Senior Project Manager with Terracon's Seattle (Mountlake Terrace) office. His duties include the management of all phases of environmental site assessments (ESAs), business environmental risk reviews, site characterizations, and National Environmental Policy Act (NEPA) compliance assessments for wireless telecommunications providers. He also performs technical review of all environmental service projects in the Seattle office.

Over the course of his 28 years of professional environmental experience, Mr. Nale has performed site characterizations of soil and groundwater for regulatory compliance, and for remediation design projects throughout Washington, Oregon, California, Nevada and Arizona.

### PROJECT EXPERIENCE

#### Environmental Site Assessments (ESAs)

Mr. Nale has managed and performed hundreds of ESAs throughout Washington, Oregon, California, Nevada, and Arizona for industrial, commercial, residential, and agricultural properties. He has managed projects for financial institutions, real estate investment trusts, developers, and other real property owners. Mr. Nale fully understands facility operating systems; state and federal regulations; and fate and transport of chemicals through air, soil, vapor, surface water, and groundwater. He has extensive experience and expertise in the performance of ESAs under the All Appropriate Inquiry rules (ASTM 1527-13) and meets the requirements of an Environmental Professional as defined by this rule.

#### Limited Subsurface Investigations (LSIs)

Mr. Nale has managed and performed hundreds of LSIs throughout Washington, Oregon, California, and Nevada. He has investigated environmental conditions in soils, soil vapor, and groundwater due to releases from a variety of sources, including gasoline service stations, dry cleaners, and a wide range of industrial and manufacturing facilities.

#### Remedial Investigation/Remedial Action

Mr. Nale has managed numerous Remedial Investigation (RI) and Remedial Action (RA) projects in Washington State, either through an Independent Remedial Action or in coordination with the Washington State Department of Ecology's Voluntary Cleanup Program (VCP). He has expertise in the collection and interpretation of data to pursue closure through Washington's VCP program. Mr. Nale has provided oversight on RA projects utilizing cleanup remedies, including in-situ chemical oxidation, the installation of granular-activated carbon, and large-scale dig-and-haul methods on a variety of industrial and commercial properties.

### EDUCATION

Bachelor of Science, Engineering Geology, University of California, Los Angeles, CA

### REGISTRATIONS

Licensed Professional Geologist:  
Washington No. 3053; California No. 7603

### Certifications:

OSHA 40-Hour Health & Safety  
OSHA Hazardous Waste Site Supervisor/Health and Safety Officer

### WORK HISTORY

Terracon Consultants, Inc.,  
Senior Project Manager,  
2018 – Present

**APPENDIX F  
LIST OF TERMS  
AND  
ACRONYMS**

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	<p>Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).</p> <p>Regulatory agencies have generally defined ACM as a material containing greater than one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable.</p> <p>Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.</p>
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally Exempt Small Quantity Generators
CFR	Code of Federal Regulations

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a “solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-13 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program
LQG	Large Quantity Generators
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.
pCi/L	picoCuries per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in picoCuries per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ('cradle to grave'). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/TS Ds	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/TS Ds	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. De minimis conditions are not recognized environmental conditions."
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small Quantity Generator
SWF/LF	State and/or Tribal database of Solid Waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.
