Amendments to General Plan (Land Use), Zoning Code & Specific Plan to Implement Housing Element

Project Description, continued

Council and submitted to HCD in February 2023. HCD does not require additional revisions to the Housing Element, however, HCD does require certain implementation actions prior to certifying the Housing Element which are the focus of this CEQA analysis. To support HCD's certification of the City's 6th Cycle Housing Element, the City must prepare an amended General Plan Land Use Element, amendments to the Zoning Code and Zoning Map and amendments to the Downtown Village Specific Plan to reflect changes to land uses and zones that are required to implement the 6th Cycle Housing Element Update (HEU). Therefore, it should be noted that the City is undertaking actions that are non-discretionary in nature as these actions are being required by HCD in order for that agency to approve and certify the mandatory 6th Cycle HEU.
