Project Description (cont.): The Riverside County Flood Control and Water Conservation District (District), is proposing to construct, operate, and maintain approximately 8,000 lineal feet (LF) of a reinforced concrete pipe storm drain system, including catch basins and an outlet structure. The storm drains will be located along portions of Granite Avenue, Obsidian Drive, Boulder Avenue, Mariposa Avenue, Dallas Avenue, and Wood Road and will convey flows to the proposed outlet. The proposed outlet structure will discharge flows into an existing blueline stream at the southeast intersection of Wood Road and Dallas Avenue. Additionally, the Project includes approximately 10,000 LF of street improvements necessary to collect and deliver runoff to the proposed storm drains. The purpose of the Project is to provide flood protection to the Woodcrest and adjacent communities. The project will address complaints and allow for proper drainage within the encompassed community.
