Partner Project No. 20-297761.2
Client Reference No. 297761

Dear Mr. Matesi:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (646) 863-8537 or sfonseca@partneresi.com.

Sincerely,

Sarah M. Fonseca
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Core Campus Manager, LLC for the property located at 2128 Oxford Street in the City of Berkeley, Alameda County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Core Campus Manager, LLC with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located along the western side of Oxford Street between Center Street on the north and Oxford Lane on the south within a downtown urban area comprised of mixed-use residential and commercial, hospitality, mixed commercial, and University of California in Alameda County. Please refer to the table below for further description of the subject property:

Subject Property Data

Address:	2128 Oxford Street, Berkeley, California 94704
Additional Addresses:	2132, 2134, 2136, 2138 (Units 1-17; 16 units), 2140, 2142, 2144, 2146, 2148, 2150, 2152, 2154, 2160, 2164, 2168 Center Street, and 2130, 2130, 2134, and 2136 Oxford Street
Historical Address:	26-30 Center Street and 2-4 Oxford Street (1890); 8-19 Center Street (1894); 27 Center Street; 2144, 2146, 2148, 2150, 2152, 2154 Center Street; and 2164 Oxford Street (1903); 2132-2174 Center Street and 2130, 2132, 2164 Oxford Street (1911); 2132 and 2134 Oxford Street (1929)
Property Use:	Mixed Use (restaurant and retail commercial, and multifamily residential)
Land Acreage (Ac):	Approximately 0.81 Acres Total (Per Assessor)
Number of Buildings:	Two (Identified as 2128 Oxford Building and 2042 Center Building)
Number of Floors:	Two each
Gross Building Area (SF):	29,133 (per Assessor) including: 21,729 (2142 Center building) and; 7,413 (2128 Oxford building)

Net Rentable Area (SF): 25,935 (per Rent Rolls) including:
17,412 (2142 Center building) and;
8,523 (2128 Oxford building)

Date of Construction: Circa 1911-1920 for 2142 Center building (1911 Per Sanborn Maps, 1920 Per Assessor);
1996 for 2128 Oxford building (per Assessor)

Assessor's Parcel Number (APN): 057 -2031-001-01 (2128 Oxford Street);
057 -2031-013-00, 057 -2031-014-00, and 057 -2031-015-00
(2142 Center Street)

Type of Construction: Concrete and wood framing on concrete slab foundation systems. Partial basement at 2142 Center building

Current Tenants: Total of 33 tenants
2142 Center Building with 25 tenants total including 16 residential units and eight commercial restaurants and one commercial retail unit. The commercial tenants consist of the following: ZAC Enterprises (Restaurant at 2132-2134 Center Street), Crave Subs (Restaurant at 2136 Center Street), Easterly (Restaurant at 2140-2142 Center Street), Daryoush (Restaurant at 2144 Center Street), Café Rio (Restaurant at 2146 Center Street), Bagel Street Café (Restaurant at 2148 Center Street), Cal Flower (Retail Florist at 2150 Center Street), MOE Sushi (Restaurant at 2152 MOE Sushi), and Bongo Burger (Restaurant at 2154 Center Street).
2128 Oxford Building with 8 tenants total including seven commercial restaurants and one commercial retail unit. The commercial tenants consist of the following: Starbucks (Restaurant at 2128 Oxford Street), Flavia (Restaurant at 2130 Oxford Street), Cinnaholic (Restaurant at 2132 Oxford Street), East Bay Spice Company (Restaurant at 2134 Oxford Street), Sunny Side Café (Restaurant at 2136 Oxford Street), Top Dog (Restaurant at 2160 Center Street), Purple Kow (Restaurant at 2164 Center Street), and Tibet Souvenirs (Retail at 2168 Center Street).

Site Assessment Performed By: Brian Smith of Partner

Site Assessment Conducted On: April 6, 2021

The subject property is a mixed-use residential and commercial property consisting of two abutting two-story buildings identified as buildings 2142 (2142 Center Street Building) and 2128 (2128 Oxford Street Building). The 2128 building tenant spaces extend to the second floor loft areas in each tenant space and there are no residential units. The second floor of the 2142 building is developed with ground floor retail and residential units on the second floor. The second floor of the 2142 building has an interior corridor with 16 studio apartment units. The 16 studio apartment units are identified as units 1 through 17

excluding 13. Rear of building parking areas exists at each address and are accessed from Oxford Lane on the south. The subject property is further developed with several storage sheds, a dumpster and grease collection bin enclosure, limited concrete walkways and limited landscaping.

According to available historical sources, the subject property was formerly residential and public school as early as 1890. Beginning sometime prior to 1903 the northeastern corner was developed with mixed-use building with multiple commercial spaces on the first level and dwelling building in the overall southeastern site corner. Beginning in at least 1911 the school facilities in the western two-thirds of the subject property were replaced with what appears to be the existing 2142 Oxford Street building although according to the County Assessor (section 4.1.10) the 2142 building was constructed in 1920. These buildings and similar uses appear to have continued through at least 1946. Sometime prior to 1950 the eastern one-third of the subject property buildings had been removed and the portion of the property was depicted as a parking lot. Similar uses appear to have continued through at least 1968. Beginning in at least 1974 a two-story building appears in the overall northeastern corner with southern length of the two parcels identified for parking lot portion of the property. These uses continued through at least 1993. According to municipal information the northeastern building was demolished in 1995 and the existing building was constructed in 1995-1996. Since at least 1996 the building have been used for mixed commercial and residential uses (2142 building) and mixed commercial uses (2128 building).

The subject property is bordered on the north by Center Street with a hotel facility under construction (2129 Center Street) to the northwest and the UC Berkeley Film Archive Museum (2150 Addison Street) to the northeast; to the south consist of a multi-tenant commercial building (2121 Allston Way), a mixed use building (2161 Allston Way), and a multi-tenant commercial building (2171 Allston Way); to the east is Oxford Street with University of California Berkeley campus directly beyond; to the west by a mixed-use building (2130 Center Street).

Information specific to the subject property regarding the depth to groundwater and direction of groundwater flow was not available for the subject area. However, according to information obtained online the inferred depth to shallow groundwater is approximately 15 feet below ground surface (bgs) and the presumed groundwater flow direction is towards the west.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- A “cleaning” facility was identified at 2152 Center Street in the 1911 Sanborn Map and was not identified as a cleaning facility in subsequent maps for 1929, 1950, or 1980. In addition, Carl & Carl (G H And Mrs E B) Hat Clnrs was identified on the city directories at 2156 Center Street in 1933 and the same address and similar entity was noted as an EDR Historical Cleaner for 1933 and 1943. Berkeley Hat Works and Carl Geo H Ester B Hatter were identified at 2156 Center Street in the 1938 and 1943 city directories. This alternative address for the subject property 2156 Center Street was not identified with another city directory listing until 1991, which was identified as Café Center and as such, it is unknown how long the hat cleaning and/or dry cleaning tenant occupied 2156 Center Street. The adjacent property to the south at 2138 Oxford Street was identified as Gebbie W J & Co Dyers & Cleaners in the city directories for 1920 and 1925; this entity and address are also noted as an EDR Historical Cleaner for 1925. Steel Marshall Cleaners (and similar entities) was identified as an EDR Historical Cleaner for 1925 at 2177 Allston Way and for 1933 at 2124 Center Drive. Steel Marshall Cleaners (and similar entities) was also identified at 2115 Allston Way in the 1950, 1955, and 1970 city directories; at 2124 Center Street for 1920, 1928, and 1933, and at 2124 ½ Center Street for 1938. Several other dry cleaning facilities were noted in the close vicinity of the subject; specifically, 2140 Shattuck Ave with the listing Cleaning Co in 1955, 1970 and 1975; and 2142 Shattuck Sq. with the listing of Bertin S Cleaning and Dyeing Works for 1920. All of these former dry cleaning and hat cleaning facilities would have operated prior to the promulgation of RCRA in 1980, the legislation that regulates the handling and disposal of hazardous materials and wastes. As such, these facilities would have operated virtually unregulated while at the Subject property and vicinity. Since these facilities would have operated prior to the establishment of modern environmental regulations, it is not expected that a release, if any, would have been reported to state, local, or federal environmental regulatory authorities. Traditional hat cleaners would have utilized hazardous chemicals, including mercuric nitrate, to treat the felt and fur products during cleaning or used mercuric nitrate as a smoothing agent during the processes of carroting, finishing, forming and sizing hats. Dry cleaning facilities prior to 1930 typically used petroleum based cleaning solvents and began to use tetrachloroethylene (PCE) in 1930. These chemicals, if handled incorrectly, have the potential to negatively impact the subsurface. Based on the type of chemicals utilized and lack of regulatory oversight at the time, the potential exists for adverse impact to the subject property. As such, the former subject property usage as a dry cleaning facility and hat cleaning facility along with the usage with multiple dry cleaning facilities adjacent and within the close vicinity of the subject property represent a REC.
- The subject property address was identified as a Leaking underground Storage Tank (LUST), CORTESE, HIST CORTESE, and Certified Environmental Reporting System (CERS) site. A copy of the

January 27, 1994 Case Closure Letter was obtained from the Regional Water Quality Control Board (RWQCB). According to the letter, the City of Berkeley Toxic Program (COBTP) submitted a January 18, 1994 document to the RWQCB which reportedly recommended the subject property be closed. Based on the RWQCB's review of the letter and a mentioned associated report closure was granted. According to the letter the RWQCB indicated that further investigation and/or cleanup of soil and groundwater pertaining to the former 1,500-gallon heating oil UST would not be necessary. Additional documentation was not readily available. Notwithstanding, the disposition of the UST as closed in place, or removed is unknown. Furthermore, it is unknown if sampling was conducted during site closure and/or if contamination was allowed to remain in place; therefore, potential impacts, if any, along with concentrations of heating oil related petroleum compounds in the subsurface are unknown. Although the incident is closed, due to the lack of information, the environmental database listing and UST constitute a REC.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion.

- Due to the age of the subject property building (2142 Center Street), there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Readily visible suspect ACMs and painted surfaces were observed in good condition.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2128 Oxford Street in the City of Berkeley, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends no further assessment at this time. Partner does however recommend the following:

- A subsurface investigation inclusive of a geophysical survey should be conducted to determine the disposition of the 1,500-gallon heating oil UST; along with soil, soil vapor, and groundwater sampling to determine if the UST, historical on site hat cleaner and dry cleaner, and immediate vicinity dry cleaners have had a significant environmental impact to the subject property.
- An Operations and Maintenance (O&M) Program should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2128 Oxford Street in Berkeley, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in

order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Core Campus Manager, LLC engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Core Campus Manager, LLC. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such

unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User. This information was not provided at the time of the assessment.
- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources this data gap is not expected to alter the findings of this investigation.
- Partner was not able to document the historical use of the subject property prior to 1890. The following sources were reviewed during the course of this assessment and found to be limited: aerial photographs were not available prior to 1939; city directories for the subject property address were not available prior to 1920; topographic maps prior to 1895 were not reasonably ascertainable from local agencies; and other historical sources such as fire insurance maps did not provide coverage prior to 1890. This data failure is considered critical however does not change the conclusions of this report.
- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Information concerning historical use of the subject property was unavailable prior to 1890. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Due to the COVID-19 pandemic no municipal office visits were conducted in order to obtain historical documents or written information. Findings discussed in various report sections were obtained from telephone conversations or other online sources only.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property is located along the western side of Oxford Street between Center Street on the north and Oxford Lane on the south. According to the Alameda County Assessor the subject property is comprised of four parcels identified as Assessor Parcel Numbers 057 -2031-001-01 (2128 Oxford Street), and 057 -2031-013-00, 057 -2031-014-00, and 057 -2031-015-00 (2142 Center Street) that together contain approximately 0.81 acres. Ownership for the 2128 Oxford parcel has been vested in the OXFORD DEVELOPMENT GROUP LP since February 18, 1994. The 2142 Center parcel 13 is also owned by the OXFORD DEVELOPMENT GROUP LP however a transfer date was not readily available. The 2142 Center parcel 14 has been owned by the CENTER GALLERY LP since January 9, 2008 and the 2142 Center parcel 15 has been owned by COMMON AREA OF TRACT 7166 since December 24, 2007. No detailed legal description information was provided.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is a mixed-use residential and commercial property consisting of two abutting two-story buildings identified as buildings 2142 (2142 Center Street Building) and 2128 (2128 Oxford Street Building). The 2128 building tenant spaces extend to the second floor loft areas in each tenant space and there are no residential units. The second floor of the 2142 building is developed with ground floor retail and residential units on the second floor. The second floor of the 2142 building has an interior corridor with 16 studio apartment units. The 16 studio apartment units are identified as units 1 through 17 excluding 13. Rear of building parking areas exist at each address and are accessed from Oxford Lane on the south. The subject property is further developed with several storage sheds, a dumpster and grease collection bin enclosure, limited concrete walkways and limited landscaping.

The subject property is zoned "C-DMU Core (Commercial Downtown Mixed Use)" by the City of Berkeley.

The subject property were identified as an EDR HIST CLEANER site (2156 Center Street address) and identified as a Leaking underground Storage Tank (LUST), CORTESE, HIST CORTESE, and Certified Environmental Reporting System (CERS) site (2148 Center Street address). The listings are discussed in the regulatory database report of Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a downtown urban renewal area comprised of mixed-use residential and commercial properties along with the University of California Berkeley campus in Alameda County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

- North:** Center Street with a hotel facility under construction (2129 Center Street beyond to the northwest and the UC Berkeley Film Archive Museum (2150 Addison Street) beyond to the northeast.
- South:** A multi-tenant commercial building (2121 Allston Way) to the southwest, a mixed use building (2161 Allston Way) to the south, and a multi-tenant commercial building (2171 Allston Way) to the southeast.
- East:** Oxford Street with University of California Berkeley and uses directly beyond.
- West:** A mixed-use building (2130 Center Street).

The adjacent property to the southeast as historically developed was a mixed-use property with first floor commercial spaces and one of these located immediately beyond Oxford Lane (2138 Oxford Street) was identified as an EDR HIST CLEANER site. The adjacent northeasterly UC Berkeley building 2120 Oxford Street) was identified as a RCRA-LQG, FINDS, and ECHO site. The listings are discussed in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS), *Oakland West, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 201 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the west-southwest. No structures are depicted on the 2012 topographic map, as is typical of recent USGS topographic maps.

A copy of the 2012 topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

The nearest surface water in the vicinity of the subject property is Strawberry Creek located approximately 150 ft to the north east of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

The subject property is located in the East Bay Plain Sub-Basin of the San Francisco Bay Hydrogeologic Groundwater Basin. According to available information, a public water system operated by the East Bay Municipal Utilities District (EBMUD) serves the subject property vicinity. According to a the most recent water quality report, shallow groundwater beneath the subject property is not utilized for domestic purposes.

Information specific to the subject property regarding the depth to groundwater and direction of groundwater flow was not available for the subject area. However, according to information obtained online the inferred depth to shallow groundwater is approximately 15 feet below ground surface (bgs) and the presumed groundwater flow direction is towards the west.

2.4.3 Geology/Soils

The subject property is located in the San Francisco Bay Region of the Coast Range Geophysical Province of California. Specifically, the subject property is located in the East Bay Plain between the Santa Cruz Mountains to the west and the San Francisco bay to the east and soils in the basin are considered Quaternary age alluvial deposits composed of gravel, sand, silt, and clay with various grain size distributions dependent on the depositional environment. Maximum thickness attained by the Quaternary alluvium is approximately 1250 feet (CRWQCB 2001).

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as 146- Urban land. Urban land complex soils are those soils in which the soil's original structure and content have been so altered by human activities it has lost its original characteristics and is therefore unidentifiable. Urban soils consist of nearly level to moderately steep areas where the soils have been altered or obscured by urban development and structures. Included in the mapping unit are many small areas where the original soil material has been disturbed by construction and areas where fill materials have been added. As such the soil properties and characteristics vary.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06001C0057G, dated August 3, 2009, the subject property appears to be located in Zone X (un-shaded); defined as minimal risk areas outside the 1-percent and .2-percent-annual-chance floodplains.

A copy of the reviewed flood map is included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	Source	Description/Use
1890-1904	Sanborn Maps, Topographic maps	School, commercial and residential uses
1911-1993	Sanborn Maps, Topographic maps, Aerial photographs, City Directories	Mixed-commercial and residential, and parking lot uses
1995-1996	Municipal records	Construction of the present-day 2128 building
1996-present	Municipal records, City Directories, Topographic maps, Aerial photographs, Sanborn Maps, Interviews	Mixed-commercial and residential, and parking lot uses

According to available historical sources, the subject property was formerly residential and public school as early as 1890. Beginning sometime prior to 1903 the northeastern corner was developed with mixed-use building with multiple commercial spaces on the first level and dwelling building in the overall southeastern site corner. Beginning in at least 1911 the school facilities in the western two-thirds of the subject property were replaced with what appears to be the existing 2142 Oxford Street building although according to the County Assessor (section 4.1.10) the 2142 building was constructed in 1920. These buildings and similar uses appear to have continued through at least 1946. Sometime prior to 1950 the eastern one-third of the subject property buildings had been removed and the portion of the property was depicted as a parking lot. Similar uses appear to have continued through at least 1968. Beginning in at least 1974 a two-story building appears in the overall northeastern corner with southern length of the two parcels identified for parking lot portion of the property. These uses continued through at least 1993. According to municipal information the northeastern building was demolished in 1995 and the existing building was constructed in 1995-1996. Since at least 1996 the building have been used for mixed commercial and residential uses (2142 building) and mixed commercial uses (2128 building).

A "cleaning" facility was identified at 2152 Center Street in the 1911 Sanborn Map and was not identified as a cleaning facility in subsequent maps for 1929, 1950, or 1980. In addition, Carl & Carl (G H And Mrs E B) Hat Clnrs was identified on the city directories at 2156 Center Street in 1933 and the same address and similar entity was noted as an EDR Historical Cleaner for 1933 and 1943. Berkeley Hat Works and Carl Geo H Ester B Hatter were identified at 2156 Center Street in the 1938 and 1943 city directories. This alternative address for the subject property 2156 Center Street was not identified with another city directory listing until 1991, which was identified as Café Center and as such, it is unknown how long the hat cleaning and/or dry cleaning tenant occupied 2156 Center Street. The adjacent property to the south at 2138 Oxford Street was identified as Gebbie W J & Co Dyers & Cleaners in the city directories for 1920 and 1925; this entity and address are also noted as an EDR Historical Cleaner for 1925. Steel Marshall Cleaners (and similar entities) was identified as an EDR Historical Cleaner for 1925 at 2177 Allston Way and for 1933 at 2124 Center Drive. Steel Marshall Cleaners (and similar entities) was also identified at 2115 Allston Way in the 1950, 1955, and 1970 city directories; at 2124 Center Street for 1920, 1928, and 1933, and at 2124 ½ Center Street for 1938. Several other dry cleaning facilities were noted in the close vicinity

of the subject; specifically, 2140 Shattuck Ave with the listing Cleaning Co in 1955, 1970 and 1975; and 2142 Shattuck Sq. with the listing of Bertin S Cleaning and Dyeing Works for 1920. All of these former dry cleaning and hat cleaning facilities would have operated prior to the promulgation of RCRA in 1980, the legislation that regulates the handling and disposal of hazardous materials and wastes. As such, these facilities would have operated virtually unregulated while at the Subject property and vicinity. Since these facilities would have operated prior to the establishment of modern environmental regulations, it is not expected that a release, if any, would have been reported to state, local, or federal environmental regulatory authorities. Traditional hat cleaners would have utilized hazardous chemicals, including mercuric nitrate, to treat the felt and fur products during cleaning or used mercuric nitrate as a smoothing agent during the processes of carroting, finishing, forming and sizing hats. Dry cleaning facilities prior to 1930 typically used petroleum based cleaning solvents and began to use tetrachloroethylene (PCE) in 1930. These chemicals, if handled incorrectly, have the potential to negatively impact the subsurface. Based on the type of chemicals utilized and lack of regulatory oversight at the time, the potential exists for adverse impact to the subject property. As such, the former subject property usage as a dry cleaning facility and hat cleaning facility along with the usage with multiple dry cleaning facilities adjacent and within the close vicinity of the subject property represent a REC.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) for the adjoining southerly property report on April 2, 2021. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date:	1939, 1946	Scale:	1"=500'
Subject Property:	Apparent existing 2142 building and parking occupying the western two-thirds of the subject property. Two structures are depicted in the eastern one-third of the subject property.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) on April 7, 2021 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 2132-2174 Center (even-numbered) and 2128-2136 Oxford Street (even-numbered) (Subject Property)

Year(s)	Occupant Listed
1920-1921	Multiple commercial tenants (2138-2174 Center Street) including CARL & CARL (G H AND MRS E B) HAT CLNRS (2156 Center Street) in 1933; Berkeley Hat Works (2156 Center Street) in 1938
	Multiple commercial tenants and some residential tenants for 2128-2136 Oxford Street

Based on the city directory review, a potentially environmentally sensitive listing was identified for the subject property address (2156 Center Street).

City Directory Search for Adjacent Properties

Year(s)	Occupant Listed
1920-	E-Not identified;
2017	S-Various commercial tenants (multiple Oxford Street and Allston Way addresses). 2138 Oxford Street is identified as GEBBIE W J & CO DYERS & CLEANERS in 1920 and 1925; W-commercial and residential tenants; N-Commercial and listings associated with the University of California Berkeley

Based on the city directory review, a potentially environmentally sensitive listing was identified for the historical adjoining address (2138 Oxford Street).

Of note, several other commercial and residential listings were identified in the search. Other nearby properties were also identified with dry cleaning related listings. Specifically the following was noted: 2115 Allston Way with listing of Marshall Steel Cleaners and Launderers for 1950, 1955, and 1970; 2124 Center Street with listing of Marshall Steel Co Dry Cleaners for 1920, 1928, and 1933; 2124 ½ Center Street with listing of Marshall Steel Co Cleaners Dryers Launderers for 1938; 2140 Shattuck Ave with the listing Cleaning Co in 1955, 1970 and 1975; and 2142 Shattuck Sq. with the listing of Bertin S Cleaning and Dyeing Works for 1920.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR for the adjoining southerly property report on April 2, 2021. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1895, 1897, 1899, 1915

Subject Property: Two small structures
North: Street with scattered small structures beyond
South: Scattered small structures
East: Beyond the street is an area identified as University of California.
West: A small structure

Date: 1948, 1949, 1959, 1968, 1973, 1980, 1996

Subject Property: Shaded depicting urban developed land
North: Street and shaded urban developed land
South: Shaded depicting urban developed land
East: Beyond the street is an area identified as University of California.
West: Shaded depicting urban developed land

No structures are depicted on the 2013 topographic map, as is typical of recent USGS topographic maps. Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data

Name of Agency:	California Environmental Protection Agency's (CAL/EPA)
Point of Contact:	Staff
Agency Address:	1001 I Street, Sacramento, CA 95812
Agency Phone Number:	(916) 622-3181
Date of Contact:	April 5, 2021
Method of Communication:	Database review
Summary of Communication:	Due to the COVID-19 pandemic public access to municipal office or regulatory agencies and personnel in order to obtain historical documents or written information was restricted. Findings were obtained from telephone conversations or online records only.

No records regarding releases, hazardous materials storage, or the presence of USTs and AULs on the subject property were on file with the CAL/EPA. No evidence of contamination to the subject property.

4.1.2 Health Department

Regulatory Agency Data

Name of Agency:	Alameda County Water District Local Oversight Program (LOP)
Point of Contact:	Mr. Mikel Halliwell
Agency Address:	43885 South Grimmer Boulevard, Fremont, CA 94538
Agency Phone Number:	(510) 668-4412

Summary of Communication:	According to the Alameda County Assessor, the subject property is identified as discussed in Section 2.1. No deed restrictions or use limitations were reported.

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

4.2.1 Regulatory Database Summary

4.2.2 Subject Property Listings

The subject property subject property was identified in the regulatory database report for the following addresses:

- 2156 Center Drive – The subject property address of 2156 Center Drive were identified as an EDR Historical Cleaner site in 1933 for a tenant known as Carl & Carl (G H And Mrs E B) Hat Clnrs. This former dry cleaner and hat cleaner are discussed further in section 3.0.
- **2148 Center Street** – The subject property address was identified as a Leaking underground Storage Tank (LUST), CORTESE, HIST CORTESE, and Certified Environmental Reporting System (CERS) site. A copy of the January 27, 1994 Case Closure Letter was obtained from the Regional Water Quality Control Board (RWQCB). According to the letter, the City of Berkley Toxic Program (COBTP) submitted a January 18, 1994 document to the RWQCB which reportedly recommended the subject property be closed. Based on the RQWCB’s review of the letter and a mentioned associated report closure was granted. According to the letter the RWQCB indicated that further investigation and/or cleanup of soil and groundwater pertaining to the former 1,500-gallon heating oil UST would not be necessary. Additional documentation was not readily available. Notwithstanding, the disposition of the UST as closed in place, or removed is unknown. Furthermore, it is unknown if sampling was conducted during site closure and/or if contamination was allowed to remain in place; therefore, potential impacts, if any, along with concentrations of heating oil related petroleum compounds in the subsurface are unknown. Although the incident is closed, due to the lack of information, the environmental database listing and UST constitute a REC.

4.2.3 Adjacent Property Listings

The following adjacent properties were identified:

2117 Allston Way –This adjacent property to the south west was identified as Steel Marshall Co as an EDR Historical Cleaner site in 1925. This former dry cleaner is discussed further in section 3.0.

2138 Oxford Street –This adjacent property to the south east was identified as Gebbie W J & Co Dyers & Cleaners as an EDR Historical Cleaner site in 1920 and 1925. This former dry cleaner is discussed further in section 3.0.

2120 Oxford Street – This adjacent property to the north east identified as UC Berkeley was listed as a RCRA-LQG, FINDS, and ECHO site. Partner accessed the USEPA Envirofacts database for additional information. The database confirmed the LQG designation. Based on the ECHO report, the current compliance status is listed as “No Violations.” Per the ECHO Report, no enforcement actions have been taken against the facility in the last five years. No spills, releases or violations were reported; furthermore, this facility was not identified on any databases indicative of contamination. Based on the absence of

violations and the nature of the listings, the address does not appear to be a significant environmental concern to the subject property.

1 Frank Schlessinger Way – This adjacent property to the east, identified as PE-Berkeley, Inc was identified with AST and UST listings. No spills, releases or violations were reported; furthermore, this facility was not identified on any databases indicative of contamination. Based on the absence of violations and the nature of the listings, the address does not appear to be a significant environmental concern to the subject property.

1 Cyclotron Road – The University of Berkeley Campus encompasses one tax lot, as such the listing for Lawrence Berkeley Laboratory could be considered an adjacent facility. The Lawrence Berkeley Laboratory is listed on numerous databases including HWTS, SEMS-Archive, EnviroStor, AST, Sweeps UST, HIST UST, CA FID UST, CHMIRS, FCTS, HIST FCTS, US AIRS, Docket HWC, Haznet, Hist Cortese, HWT, NPDES, CIWQS, CERS databases. According to the maps included within the *Annual Progress Report, Fiscal Year 2020 (October 1, 2019 to September 30, 2020) for Lawrence Berkeley National Laboratory* dated February 26, 2021 prepared by Environment, Health & Safety Berkeley Lab, the Berkeley Lab Boundary and groundwater plumes of contaminants of concern do not extend beyond Gayley Road. As such, the contamination appears to be localized to the eastern portion of the campus over half mile away from the subject property boundary and it does not appear that impacts identified have extended to the subject property boundary or immediate vicinity; therefore, the Lawrence Berkeley Laboratory impacts are expected to represent an environmental concern with respect to the subject property.

4.2.4 Sites of Concern Listings

Additional dry cleaning facilities were identified in the vicinity of the subject. The ones noted of potential concern are discussed in section 3.0.

The regulatory database report identified additional non-adjacent properties in various environmental databases located within their respective ASTM search distances. Due to regulatory status, relative distance, and/or inferred groundwater flow, these listings are not expected to represent an environmental concern with respect to the subject property.

4.2.5 Orphan Listings

No orphan listings of concern were identified within the prescribed radii in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Core Campus Manager, LLC (User of this report).

5.1 Interviews

5.1.1 Interview with Owner

According to available County information the owners of the subject property were identified as the OXFORD DEVELOPMENT GROUP LP since February 18, 1994, the OXFORD DEVELOPMENT GROUP LP however a transfer date was not readily available, the CENTER GALLERY LP since January 9, 2008 and the

COMMON AREA OF TRACT 7166 since December 24, 2007. The identified Owners were not available to be interviewed at the time of the assessment and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this investigation.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. It is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Ms. Morgan Pilcher was identified to Partner as the key site manager, indicated that she had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Ms. Pilcher, the subject property was developed in the early 1900's (2142 building) and 1996 (2128 building) and has been used for commercial and residential purposes. Ms. Pilcher further stated that there are no USTs, ASTs, clarifiers, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of her knowledge.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Brian Smith
Site Assessment Conducted On: April 9, 2021

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 2128 Oxford Street (Subject Property)

Name	Title/Role	Contact	Site Walk* Yes/No
Ms. Morgan Pilcher	Property Manager	(510) 932-1850	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property.

No potential environmental concerns were identified during the onsite reconnaissance. Partner observed portions of all commercial tenant spaces as well as residential units 9 and 15.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located in enclosures along the southern perimeters of the two parcels. An independent solid waste disposal contractor, Republic Waste Services, removes solid waste from the subject property. According to property personnel, only municipal solid waste is collected in the on-site dumpsters. A grease bin for the collection of cooking oils is located in the enclosures and the contents of which are reportedly removed on a regular basis. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The East Bay Municipal Utility District services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface

impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by the Pacific Gas and Electric Company. The mechanical system is comprised of rooftop-mounted heat pump units with electric condensers and gas furnaces. Hot water is provided by central natural gas water heater assembly.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

Partner did not observe any evidence of current or former ASTs or USTs during the site reconnaissance. Notwithstanding, a 1,500-gallon heating oil UST was noted at the subject property per the LUST case closure documentation. This is further discussed in section 4.2.2.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less

than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Vaulted transformers were observed immediately adjacent the subject property within the Street sidewalk right-of-way. The transformer is not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Based on the good condition, the transformers are not expected to represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (interior transformers, hydraulic elevators, oil-filled switches, hoists, lifts, dock levelers, balers, etc.) was observed on the subject property during Partner’s reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

Partner observed the following drains and sumps are located on the subject property:

Drains, Sumps, and Clarifiers Observed Onsite			
	Floor Drain(s)	Sump(s)	Clarifier(s)
Number Observed:	30	1	NA
Location:	Tenant kitchen areas	2138 basement	NA
Point of Discharge:	Sanitary sewer	Sanitary sewer	NA
Sealed/Bermed:	NA	Concrete vault	NA

No other drains or sumps, and no clarifiers were observed on the subject property during the site reconnaissance. Due to the current retail and restaurant use, the presence of the drains and the sump are not considered a significant concern.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property building 2142 Center Building was constructed originally between circa 1911 and 1920. A limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property was conducted. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACMs:

Suspect ACMs			
Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall Systems	Throughout Building Interior	No	Good
Floor Tiles	Throughout Building Interior	No	Good
Floor Tile Mastic	Throughout Building Interior	No	Good
Ceiling systems	Throughout Building Interior	Yes	Good
Caulking and sealants	Throughout	No	Good
Roofing felts	Throughout	No	Good

Based on this building's date of construction, prior to disturbance, Partner recommends a comprehensive asbestos survey of the property be completed to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the 2142 Center Building (pre-1978), there is a potential that LBP is present. Interior and exterior painted surfaces were observed in good condition and therefore not expected to represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the East Bay Municipal Utilities District serves the subject property vicinity. According to published information, shallow groundwater directly beneath the subject property is not utilized for domestic purposes. The sources of public water for the District are treated surface waters from upper Sierra Nevada Mountain lakes and reservoirs. According to the 2020 Drinking Water Quality Report the drinking water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is

intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. The following items of environmental concern were identified on the immediately adjacent properties during the site assessment:

6.4.1 PCBs

Pole- and pad-mounted transformers were observed on the adjacent properties. No staining or leakage was observed in the vicinity of the transformers. Based on these observations, the presence of adjacent transformers is not expected to represent a significant environmental concern.

No other items of environmental concern were identified on the immediately adjacent properties during the site assessment, including evidence of releases, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- A "cleaning" facility was identified at 2152 Center Street in the 1911 Sanborn Map and was not identified as a cleaning facility in subsequent maps for 1929, 1950, or 1980. In addition, Carl & Carl (G H And Mrs E B) Hat Clnrs was identified on the city directories at 2156 Center Street in 1933 and the same address and similar entity was noted as an EDR Historical Cleaner for 1933 and 1943. Berkeley Hat Works and Carl Geo H Ester B Hatter were identified at 2156 Center Street in the 1938 and 1943 city directories. This alternative address for the subject property 2156 Center Street was not identified with another city directory listing until 1991, which was identified as Café Center and as such, it is unknown how long the hat cleaning and/or dry cleaning tenant occupied 2156 Center Street. The adjacent property to the south at 2138 Oxford Street was identified as Gebbie W J & Co Dyers & Cleaners in the city directories for 1920 and 1925; this entity and address are also noted as an EDR Historical Cleaner for 1925. Steel Marshall Cleaners (and similar entities) was identified as an EDR Historical Cleaner for 1925 at 2177 Allston Way and for 1933 at 2124 Center Drive. Steel Marshall Cleaners (and similar entities) was also identified at 2115 Allston Way in the 1950, 1955, and 1970 city directories; at 2124 Center Street for 1920, 1928, and 1933, and at 2124 ½ Center Street for 1938. Several other dry cleaning facilities were noted in the close vicinity of the subject; specifically, 2140 Shattuck Ave with the listing Cleaning Co in 1955, 1970 and 1975; and 2142 Shattuck Sq. with the listing of Bertin S Cleaning and Dyeing Works for 1920. All of these former dry cleaning and hat cleaning facilities would have operated prior to the promulgation of RCRA in 1980, the legislation that regulates the handling and disposal of hazardous materials and wastes. As such, these facilities would have operated virtually unregulated while at the Subject property and vicinity. Since these facilities would have operated prior to the establishment of modern environmental regulations, it is not expected that a release, if any, would have been reported to state, local, or federal environmental regulatory authorities. Traditional hat cleaners would have utilized hazardous chemicals, including mercuric nitrate, to treat the felt and fur products during cleaning or used mercuric nitrate as a smoothing agent during the processes of carroting, finishing, forming and sizing hats. Dry cleaning facilities prior to 1930 typically used petroleum based cleaning solvents and began to use tetrachloroethylene (PCE) in 1930. These chemicals, if handled incorrectly, have the potential to negatively impact the subsurface. Based on the type of chemicals utilized and lack of regulatory oversight at the time, the potential exists for adverse impact to the subject property. As such, the former subject property usage as a dry cleaning facility and hat cleaning facility along with the usage with multiple dry cleaning facilities adjacent and within the close vicinity of the subject property represent a REC.

- The subject property address was identified as a Leaking underground Storage Tank (LUST), CORTESE, HIST CORTESE, and Certified Environmental Reporting System (CERS) site. A copy of the January 27, 1994 Case Closure Letter was obtained from the Regional Water Quality Control Board (RWQCB). According to the letter, the City of Berkeley Toxic Program (COBTP) submitted a January 18, 1994 document to the RWQCB which reportedly recommended the subject property be closed. Based on the RWQCB's review of the letter and a mentioned associated report closure was granted. According to the letter the RWQCB indicated that further investigation and/or cleanup of soil and groundwater pertaining to the former 1,500-gallon heating oil UST would not be necessary. Additional documentation was not readily available. Notwithstanding, the disposition of the UST as closed in place, or removed is unknown. Furthermore, it is unknown if sampling was conducted during site closure and/or if contamination was allowed to remain in place; therefore, potential impacts, if any, along with concentrations of heating oil related petroleum compounds in the subsurface are unknown. Although the incident is closed, due to the lack of information, the environmental database listing and UST constitute a REC.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion.

- Due to the age of the subject property building (2142 Center Street), there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Readily visible suspect ACMs and painted surfaces were observed in good condition.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2128 Oxford Street in the City of Berkeley, Alameda County,

California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends no further assessment at this time. Partner does however recommend the following:

- A subsurface investigation inclusive of a geophysical survey should be conducted to determine the disposition of the 1,500-gallon heating oil UST; along with soil, soil vapor, and groundwater sampling to determine if the UST, historical on site hat cleaner and dry cleaner, and immediate vicinity dry cleaners have had a significant environmental impact to the subject property.
- An Operations and Maintenance (O&M) Program should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 2128 Oxford Street in the City of Berkeley, Alameda County, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Dear Ms. Heinbaugh:

SUBJECT: Case Closure for Toltec Properties, 2148 Center
Street, Berkeley, Alameda County

The City of Berkeley's Toxics Program (COBTP) has submitted a letter dated January 18, 1994 which recommends that the subject site be closed. Regional Board staff have reviewed this letter and a Weiss Associates report on this site (dated January 7, 1994) and concurs with the COBTP's recommendation. Therefore, based on the available information for the above site, it appears that further investigation and/or cleanup of the soil and groundwater pertaining to the former 1,500 gallon underground heating oil storage tank is not necessary. Further work could be required if conditions change or if a water quality threat is discovered at the site.

If you have any questions, please call John Jang of my staff at (510) 286-0554.

Sincerely,

A handwritten signature in cursive script, appearing to read "Steven R. Ritchie".

Executive Officer

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Alameda County, California, Western Part

Survey Area Data: Version 17, May 29, 2020

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 1, 2019—May 31, 2019

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on **4/18/2021 at 6:15 PM** and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Toltec Development Corporation
P. O. Box 7370
Incline Village, NV 89452

Dear Ms. Heinbaugh:

SUBJECT: Case Closure for Toltec Properties, 2148 Center
Street, Berkeley, Alameda County

The City of Berkeley's Toxics Program (COBTP) has submitted a letter dated January 18, 1994 which recommends that the subject site be closed. Regional Board staff have reviewed this letter and a Weiss Associates report on this site (dated January 7, 1994) and concurs with the COBTP's recommendation. Therefore, based on the available information for the above site, it appears that further investigation and/or cleanup of the soil and groundwater pertaining to the former 1,500 gallon underground heating oil storage tank is not necessary. Further work could be required if conditions change or if a water quality threat is discovered at the site.

If you have any questions, please call John Jang of my staff at (510) 286-0554.

Sincerely,

A handwritten signature in cursive script, appearing to read "Steven R. Ritchie".

Executive Officer

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 7 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/26/2020 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 27 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-23-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Onsite to review the information submitted in the 2/22/2017 submittal of the Hazardous Materials Business Plan. The annual certification is due by March 1, 2018 and must include the hazard categories for hazardous materials inventory. Reviewed the Consolidated Emergency Response/Contingency Plan and the facility RCRA Contingency Plan. Please note that the phone number listed for the Regional Water Quality Control Board is the Los Angeles number. The number for the San Francisco Bay Regional Water Quality Control Board is (510) 622-2460. Please update the number. The HMBP includes Miscellaneous Pharmaceutical Waste. This hazardous waste does not need to be disclosed by Target as the CVS Pharmacy is registered separately with Toxics Management Division.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

tested and retrofitted and piping was removed and replaced in 1995. Historically, one of the gasoline USTs and one of the diesel USTs were formerly utilized for waste oil storage. Approximately 350 cubic yards of impacted soil and overburden were removed and disposed offsite in 1995. No groundwater monitoring wells have been installed at the Site. According to grab groundwater data collected from soil borings, water quality objectives for benzene and MTBE have not been achieved and the contaminant plume is undefined. The petroleum release is limited to the soil and shallow groundwater. According to data available in GeoTracker, there are no supply wells regulated by the California Department of Public Health within 1,000 feet of the Site. No other water supply wells have been identified within 1,000 feet of the Site in files reviewed. There is no identified surface water within 250 feet of the Site. The nearest surface water body, Strawberry Creek, is located approximately 700 feet north-northeast of the Site. Water is provided to water users near the Site by the East Bay Municipal Utilities District. The affected groundwater is not currently being used as a source of drinking water, and it is highly unlikely that the affected groundwater will be used as a source of drinking water in the foreseeable future.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Notes: operate a UST, or for renewal of the permit.
Returned to compliance on 01/17/2017. The tank information for tank Q2002U001 indicates overfill protection includes audible/visual alarms and fill tube shut-off. Observed the flapper valve, but the site does not have an external audible visual alarm. Corrective action: Install an external audible visual alarm or remove this method from the tank information and resubmit in CERS.

Site ID: 434129
Site Name: AT&T California - Q2002
Violation Date: 12-06-2018
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 12/27/2018. The flapper valve was not tested by October 13, 2018. The inspection was completed October 15, 2018. The overfill prevention equipment inspection report from October 15, 2018 that was submitted in CERS did not include the inspection method used and documentation like the measurements used to determine the results, which is required to be attached to the report form.
Corrective action: Within 30 days, please provide the additional information to TMD.

Violation Description: Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.
Violation Notes: Returned to compliance on 12/06/2018. According to the contractor, the annular sensor did not activate an audible and visual alarm upon testing in liquid. Corrected at the time of the monitoring system certification as the service technician replaced the sensor with same and tested to confirm operational.

Eval Notes: Gary Chimienti left message regarding the monitoring system certification on 12/22/2017. Toxics Management Division (TMD) received written notification from contractor of the monitoring system certification on 1/2/2018. The contractor had sent the original notification to an incorrect email address on 12/6/2017. TMD requires written notification of required testing 48 hours in advance and the owner/operator and/or contractor must receive a written response from TMD. Met with Gary Chimienti, AT&T, and John Cascio with Tait Environmental. Received copy of system setup and alarm history. Reviewed DO reports, maintenance records and CERS submittal. Confirmed operation of sensors and spill bucket.

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)
provides California with information on hazardous waste shipments for
generators, transporters, and treatment, storage, and disposal
facilities.

RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History: Berkeley Repertory Theater (BRT) plans to expand its current facility at 2025 Addison Street in Berkeley, California, by purchasing and developing the adjacent property to the west. The property is currently owned by Williamson Properties, and consists of three contiguous parcels that have been vacated by their previous tenants. The businesses that most recently occupied the parcels included a car repair shop, a glass company, and an auto body shop.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History: The 0.82-acre Site is currently operating as a City of Berkeley owned public parking lot located at 2012 Berkeley Way in Berkeley, Alameda County, California. The Site is located in the North Berkeley neighborhood, in a mixed commercial and residential area, and east of the intersection between Berkeley Way and Milvia Street. Properties in the Site vicinity include single-family homes, multi-family apartments, commercial buildings, and the University of California, Berkeley campus. Historically the Site was used for residential dwellings prior to 1958. Historical uses of adjacent or adjoining properties included dry cleaners, automotive repair, tire shop, and fire station with underground storage tanks (USTs). Redevelopment of the Site is scheduled to commence in April 2020 and includes a six-floor, slab-on-grade, multi-residence building with two elevators, a sump pump, and an outdoor courtyard comprised of landscaping and hardscaping. Multiple site investigations have been conducted in October 2018, and June, August, and October 2019 which included the assessment of soil and soil gas in the subsurface beneath the Site. Results of these subsurface investigations have identified residual impact from lead in soil at several select locations at the Site exceeding applicable San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Tier 1 Environmental Screening Levels (ESLs). The presence of lead in soil is likely associated with the demolition of the former on-Site structures (that based on their age may likely have a history of lead-based paints), and/or from aerially-deposited lead (ADL) associated with the former use of leaded gasoline in vehicles and nearby roadways. A Fact Sheet and invitation for public comment regarding environmental assessments conducted at the Site was distributed by ACDEH to the surrounding community on February 11, 2020. A public meeting was also conducted at the Berkeley public library on February 20, 2020. No participants from the general public attended the meeting. Additionally subsurface data gap assessment (DGA) investigations were conducted in late February 2020 to evaluate potential soil impacts from previously unassessed constituents, including polynuclear aromatic hydrocarbons

(PAHs), polychlorinated biphenyls (PCBs), and asbestos which may have been associated with the historical structures identified onsite. Additional soil vapor samples were also advanced to further assess the potential for elevated soil vapor beneath the site. Shallow soil results indicated lead was detected in all analyzed samples at concentrations ranging from 2.5 micrograms per kilogram (mg/kg) to 94 mg/kg; however, the Residential ESL was only exceeded in one sample (RB]14 at 1 foot below ground surface [bgs]). PCBs and asbestos was not detected in soil. Based on the results of the DGA investigation a corrective action plan (CAP) was submitted to ACDEH for review on March 26, 2020. Remedial and corrective actions presented in the CAP include remedial excavation of lead impacted soil via targeted remedial excavations prior to planned grading activities and encapsulation of contaminated soil beneath impermeable hardscapes or demarcated beneath clean fill with the use of a fabric barrier in areas of exposed soil, such as landscaped areas. Additional corrective actions presented in the CAP include institutional controls such as a land use covenant (LUC), a monitoring plan, or a residual risk management plan (RRMP).

Site History: The subject property (Site) is located on the northwest corner of Shattuck and Hearst Avenues in Berkeley, Alameda County, California, consists of an approximately 6,700 square foot parcel (APN 57-2050-005), currently developed with a 1,200 square foot, wood framed restaurant in the southeast corner of the site with an asphalt paved parking lot on the north and west sides. The subject property building is currently occupied by a restaurant called Oscars. The subject property is listed in the database summary as a Historic Auto Station under the name of W.R. Morely Shell in the years 1933 and 1943. No other information regarding the service station is provided. Limited Phase II subsurface soil and soil gas sampling was conducted at the subject property in conjunction with the Phase I assessment. The objective of the subsurface investigation was to evaluate whether any residual concentrations of fuel hydrocarbons exist in soil from the former service station land use at the property from the 1930s through the 1950s. With the exception of soil sample S-7-B3 that contained 350 mg/kg TVHg (total volatile hydrocarbons as gasoline), no soil ESL established for metals or petroleum hydrocarbons were exceeded. The sample S-10-B3 from 10 feet bgs was collected three feet deeper than sample S-7-B3, only contained 16 mg/kg TVHg, which suggests a rapid attenuation of hydrocarbons with depth. The lack of BTEX (benzene toluene ethylene and xylenes) in soil samples (except for trace amounts) can be attributed to the age of the spill. Maximum concentrations of on Site soil gas samples reached up to 13,000,000 μg/m3 TVHg, and soil gas sample SV-2 contained 390,000 μg/m3 TVHg. Both of these results exceed the ESL of 29,000 μg/m3 established for gasoline range hydrocarbons in shallow soil in a commercial setting (Water Board, 2008).

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

University and Martin Luther King, Jr. Avenues in Berkeley, California. Currently, the parcel is an operating Valero-branded automotive fueling and convenience store (mini mart). Mixed-use commercial/industrial and residential surround the Site. Texaco operated a service station on Site from 1970 until 1988. Exxon Mobil (Exxon) operated from 1988 to 2000. In June 200, Exxon transferred the Site ownership to Valero (Valero Refining Company). Remediation activities included installation of groundwater monitoring wells, groundwater extraction and treatment, and soil vapor extraction (SVE).

Case Worker: MEJ
Local Agency: BERKELEY, CITY OF
RB Case Number: 01S0755
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Site History: Dry cleaning operations took place at the site as early as the 1930s and through approximately 1971 under the names Shattuck Laundry and Dry Cleaners (1930s - 1940s) and Rainbow Cleaners (1950s - 1971). The primary location of the former operations is associated with the address 2473 Shattuck Avenue. Rainbow Cleaners also utilized the address 2111 Dwight Way, in the 1950s and early 1960s. Except for the original residential use of the southeastern portion of the site (which ceased sometime prior to 1968), typical use of the site since the early 1900s has included a number of small commercial and/or retail tenants, including a bakery, creamery, various medical and commercial offices, auto repair (circa 1920-1930), sign making, drug store, a theater, hardware store, and restaurants. As noted above, former dry cleaning operations were identified on site. An apartment complex is being built on the site.

Completed Date: 03/21/2018
Comments: The report documents the decommissioning of 17 wells (MWP-10, MW37-92-18A, MW51-92-2, MW51-00-9, MW75-97-7, MW75-98-15, MW75-99-7, MW75-99-8, MW77-92-10, MW77-94-5, MW77-97-9, MW78-97-20, SB16-98-1, SB31-02-2, SB31-03-2, SB31-03-3, and SB77-10-1A/B/C). DTSC approved LBNL's request to decommission 11 of the wells on May 2, 2017 and one well on June 22, 2015. Decommissioning of four of the wells had been approved by the Regional Water Quality Control Board on August 1, 2005. Decommissioned well SB77-10-1A/B/C had been installed by LBNL to investigate groundwater conditions in a proposed construction area and was not a groundwater monitoring well.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/11/2018
Comments: LBNL requested DTSC approval to decommission 15 wells (SB16-97-11, MW90-2, MW7-95-22, MW7-00-4, MW53-96-1, MW53-92-21, MW58-95-11, SB58-02-1R, SB58-02-2, SB58-96-2, SB58-97-1, SB58-97-2, SB58-98-1, MW46-92-9, and MW51-94-15) and to revise the monitoring schedule for wells located in the Building 7 Lobe of the Old Town Groundwater Plume. The wells have provided over 20 years of data and are no longer essential for monitoring the plume. DTSC approved the decommissioning of the wells and the revised monitoring schedule.

Comments: LBNL requested DTSC approval to decommission 2 extraction wells located in the downgradient portion of the Building 51/64 groundwater plume because the utilities for the wells will be affected by redevelopment activities in the area. LBNL installed the extraction wells in 2007 as a voluntary measure and the wells are not part of the required corrective measures for the Building 51/64 groundwater plume. The portion of the plume where the wells are located was stable/attenuating before they were installed, and operation of the wells has not demonstrated expedited cleanup. DTSC approved the decommissioning of extraction wells EW51B-07-1 and EW51B-07-2.

Comments: This quarterly progress report describes the RCRA Corrective Action Program activities conducted by LBNL during the third quarter of fiscal year 2011. The GW monitoring data indicate that the corrective measures continue to be effective in reducing concentrations of GW contaminants, stabilizing or attenuating groundwater plumes, and preventing migration of contaminants offsite through the groundwater.

Comments: This quarterly progress report and annual status summary describes the Resource Conservation and Recovery Act (RCRA) Corrective Action Program (CAP) activities conducted by the Ernest Orlando Lawrence Berkeley National Laboratory (LBNL) during the fourth quarter of fiscal year 2011 (FY11) (July 1 through September 30, 2011), the current reporting period. These activities consist primarily of continued operation of the corrective measures approved by the California Environmental Protection Agency Department of Toxic Substances Control (DTSC) to clean up contaminated groundwater and monitoring groundwater quality to assess progress towards achieving the required groundwater cleanup levels. This annual report also provides a summary of groundwater monitoring activities conducted over the entire fiscal year and discusses long-term concentration trends for groundwater contaminant plumes. The groundwater monitoring data indicate that the corrective measures continue to be effective in reducing concentrations of contaminants in the groundwater, groundwater plumes are stable or attenuating, and contaminants are not migrating offsite. DTSC reviewed the report and has no comments.

Comments: This semiannual progress report describes the Resource Conservation and Recovery Act Corrective Action Program activities conducted by Lawrence Berkeley National Laboratory (LBNL) during the first and second quarters of fiscal year 2016 (October 1, 2015 to March 31, 2016), the current reporting period. These activities consist primarily of: 1) continued operation of the corrective measures approved by the Department of Toxic Substances Control (DTSC) to clean up contaminated groundwater and 2) monitoring groundwater quality to assess the progress of the corrective measures towards achieving the required clean up levels. During the current reporting period, more than 5 million gallons of water were extracted and treated, with more than 176 million gallons treated to date. Most of the treated water is recirculated by injection into the subsurface for soil flushing purposes. The remainder is discharged to the sanitary sewer in accordance with the provisions of LBNL's Wastewater Discharge Permit issued by EBMUD.

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006

Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F019

Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Waste Code: F027

Waste Description: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

AQUIFLOW^R Information System

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Highlights

- 30+ years in the architecture, environmental, construction and real estate industries
- 20+ years performing field observation and report writing work nationally for Phase I Environmental Site Assessments; Transaction Screen Assessments; Environmental Desktop Reports; Property Condition Assessment; Construction; Construction Progress Monitoring; field observation for seismic evaluations)
- 20+ years with experience in performing over 6,000 property inspections and reports using ASTM and client specific protocols on diverse properties to include major industrial facilities, shopping centers, office complexes, hotels, and other hospitality resorts, residential developments, mobile home parks, and nursing facilities throughout the continental United States, Hawaii, and Alaska. Consulting services provided included research of specific state and local regulatory requirements and advising clients as to the potential impact on proposed real estate developments, acquisitions, and industrial operations.
- Significant Agency experience including Fannie Mae, Freddie Mac, and various HUD programs.
- Developed and implemented asbestos, lead-based paint, PCB and radon Operations and Maintenance (O&M) Programs.

Summary

Mr. Smith has been providing real estate due-diligence services to lenders and owners that have included Property Condition Assessments (PCAs), Phase I Environmental Assessments (ESAs), Probable Maximum Loss (PML) evaluations, Transaction Screening, Construction Monitoring, and Peer Review evaluations throughout the United States since the early-1990s. Mr. Smith is a registered Architect in California, has previously been affiliated with BOMA, AIA, and had NCARB certification. He has also had training as a Registered Environmental Assessor (REA), asbestos inspector, and is a trained pest inspector.

In addition, Mr. Smith has performed non-ASTM PCA tasks as part of the PCA/Construction Monitoring or Seller evaluation assessments included documentation reviews, estimating, municipality reviews and ADA analysis. Mr. Smith has also performed non-ASTM Phase I tasks as part of the overall Phase I assessments including limited and comprehensive surveys for asbestos, lead-in water, and lead-based paint, as well as radon gas emissions and has provided regulatory compliance with OSHA, Cal-OSHA, RCRA and California Department of Toxic Control regulations. Agency specific environmental experience and understanding

includes identifying soil and groundwater contamination, analyzing groundwater sampling reports, asbestos identification and abatement recommendations; potential PCB identification; UST identification, UST abandonment and removal observations; radon measurement and mitigation recommendations; LBP identification and abatement recommendations; and development of O&M programs.

Mr. Smith has provided consulting services that have included research of specific state and local regulatory requirements and advising clients as to the potential impact on proposed real estate developments, acquisitions, and industrial operations. His diversity across public and private environments and experience in many "wall street" and "main street" protocols including Fannie Mae, Freddie Mac, and various HUD programs is a major contribution to Partner Engineering and Science's Contractor team in the United States.

Project Experience

During the last 10 years alone Mr. Smith has performed over 3,000 inspections covering a wide range of property types in more than 30 states including a wide range of commercial property types including multi-family, retail, industrial, office, hotel and resort, nursing home, hospital, self-storage, and mobile home communities relating to Property Condition and Phase I Environmental Site Assessment scopes, Construction Loan Monitoring, ADA analysis, Asbestos, lead-based paint and Radon testing and reporting.

Highlights

Qualified Environmental Professional (EP) under ASTM E1527 10+ years of experience of environmental consulting and environmental due diligence project management, fieldwork, preparation, and review of over 775 Phase I and Phase II ESAs (in accordance with (ASTM E1903) and associated reports. Experience including but not limited to: soil and groundwater testing and remediation; soil vapor and indoor air testing, modeling, and mitigation; underground storage tank removal; geophysical surveys; remedial cost estimation; and, subsurface site investigations.

Experience Summary

Melody Dufrane is a Project Manager for Partner Engineering and Science, Inc. (Partner) with over 10 years' experience focused on environmental consulting and commercial due diligence. In her Project Manager role, she has conducted, managed, and/or reviewed over 775 Phase I Environmental Site Assessments (ESAs), Phase II ESAs, and associated projects throughout the United States for a wide range of local and national clients, including real estate owners, investors, and lending institutions in accordance with the applicable American Society for Testing and Materials (ASTM) Standards and Guidelines, United States Environmental Protection Agency (EPA) All Appropriate Inquiry rules, Fannie Mae Delegated Underwriting Standards, Freddie Mac guidelines,

Mrs. Dufrane conducted, managed, and reviewed numerous remedial investigations, underground storage tank removals, opinions for probable costs, third party reviews and opinion letters. Her field experience includes soil, groundwater, and soil vapor sampling along with managing drilling subcontractors, geophysical survey subcontractors, and tank removal contractors. She has also prepared proposals and cost estimates for over 350 various projects. Mrs. Dufrane is a Qualified Environmental Professional in accordance with ASTM E1527 standard.

Mrs. Dufrane has a technical environmental background that provides her with thorough knowledge of State and Federal programs/regulations with a detailed understanding of the risks associated with, but not limited to, hazardous and regulated materials storage, underground storage tanks, asbestos-containing materials, mold, radon, environmental contaminants, polychlorinated biphenyls (PCBs), volatile organic compounds (VOCs), RCRA Metals, total petroleum hydrocarbons, polycyclic aromatic hydrocarbons (PAHs) and lead-based paint. She is skilled in the research requirements necessary for the preparation of Phase I

and Phase II ESAs including historical land use, regulatory, physical, and geological sources, governmental research, soil, soil vapor, and groundwater testing, environmental drilling and sampling, soil vapor modeling, assessing magnitude and extent of environmental contamination, horizontal and vertical delineation, site mitigation, and site remediation.

Experience Summary

Ms. Fonseca is a National Client Manager for Partner Engineering and Science, Inc. (Partner) and focuses on due diligence products for commercial real estate transactions. She services institutional investors; developers; brokers; local banks, CBMS, Bridge, and Mezzanine Lenders; and Agency Lenders with environmental site assessments, property condition assessments, seismic studies, construction monitoring, and remedial design/implementation. She works closely with property managers, legal counsel, regulatory agencies, and special asset groups to provide insight into the risks and liabilities associated with property acquisition, development, financing, and securitization. Ms. Fonseca delivers exceptional service and adds value to businesses by assessing risks and exposures while formulating appropriate solutions.

Ms. Fonseca has extensive experience with discerning conditions of recognized environmental concern and finding best-practice approaches for avoiding or mitigating the financial burden of Phase II scenarios. Ms. Fonseca has provided senior-level review and oversight on Phase II work and has dealt extensively with various regulatory agencies to expedite the process of receiving no further action letters on issues associated with leaking underground storage tanks, dry cleaners, and former industrial sites nationwide.

Ms. Fonseca's collective experience in the field of real estate due diligence has enabled her to support property owners, prospective purchasers, lenders, and clients' legal counsel through numerous successful transactions.

Ms. Fonseca works with Partner's Technical Directors nationwide to provide full-service consulting on commercial real estate transactions including ALTA Surveys, Geotechnical Surveys, Zoning, Feasibility Studies, and Energy Retro-commissioning.

Prior to joining Partner, Ms. Fonseca served as a Senior Project Manager for a national due diligence firm where she assisted with report preparation, quality assurance/quality control, and client management.

Terracon Project No. R1237041

Dear Mr. Bolatto:

Terracon Consultants, Inc. (Terracon) is pleased to submit the Limited Site Investigation (LSI) for the above-referenced site. The report presents data from recent field activities that included the advancement of soil borings for the collection of soil samples for laboratory analysis. The activities were completed in accordance with Terracon Proposal No. PR1237041, dated April 13, 2023.

Terracon appreciates this opportunity to provide environmental services to Core Spaces. Should you have any questions or require additional information, please do not hesitate to contact our office.

Sincerely,
Terracon Consultants, Inc.

1.0 Introduction

1.1 Site Description

The site is located at 2128 Oxford Street in Berkeley, Alameda County, California and consists of an approximately 0.81-acre tract of land identified as Assessor Parcel Numbers (APNs) 057-2031-001-01, 057-2032-013-00, 057-2031-014-00, and 057-2031-015-00. The site is improved with two, two-story mixed-use buildings and asphalt-paved parking lot. The buildings are identified as 2128 Oxford Street and 2142 Center Street, but maintain the addresses of 2128 to 2136 Oxford Street and 2132 to 2168 Center Street. The 2128 building tenant spaces extend to the second floor and contain no residential units. The 2142 Center Street Building is developed with retail space on the first floor and 16 vacant studio apartments on the second floor. A Site Diagram is included as Exhibit 1 in Appendix A.

1.2 Site Background and Scope of Work

Terracon conducted this LSI per your request in response to the Partner Engineering and Science, Inc.'s (Partner) Phase I Environmental Site Assessment (ESA), dated April 21, 2021 [Partner Project No. 20-297761.2)], which identified the following recognized environmental conditions (RECs) in connection with the site:

- **Historical Dry Cleaning Facilities** Two historical on-site (2152 and 2156 Center Street) and one adjoining off-site dry cleaning facilities (2138 Oxford Street) were identified as RECs.
- **Underground Storage Tank:** Based on the absence of records associated with the closure of a 1,500-gallon heating oil UST associated the site, the UST was identified as a REC.

Additional investigation was recommended to evaluate the presence or absence of chemicals commonly associated with the identified RECs and/or site concerns at

concentrations above laboratory reporting limits in the on-site soil, groundwater, and sub-slab vapor.

1.3 Standard of Care

Terracon's services were performed in a manner consistent with generally accepted practices of the profession undertaken in similar studies in the same geographical area during the same time. Terracon makes no warranties, either express or implied, regarding the findings, conclusions, or recommendations. Please note that Terracon does not warrant the work of laboratories, regulatory agencies, or other third parties supplying information used in the preparation of the report. These LSI services were performed in accordance with the scope of work agreed with you, our Client, as reflected in our proposal and were not restricted by ASTM E1903-19 *Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process*.

1.4 Additional Scope Limitations

Findings, conclusions, and recommendations resulting from these services are based upon information derived from the on-site activities and other services performed under this scope of work; such information is subject to change over time. Certain indicators of the presence of hazardous substances, petroleum products, or other constituents may have been latent, inaccessible, unobservable, non-detectable, or not present during these services. We cannot represent that the site contains no hazardous substances, toxic materials, petroleum products, or other latent conditions beyond those identified during this LSI. Subsurface conditions may vary from those encountered at specific borings or wells or during other surveys, tests, assessments, investigations, or exploratory services. The data, interpretations, findings, and our recommendations are based solely upon data obtained at the time and within the scope of these services.

1.5 Reliance

This report has been prepared for the exclusive use of Core Spaces and any authorization for use or reliance by any other party (except a governmental entity having jurisdiction over the site) is prohibited without the express written authorization of Core Spaces and Terracon. Any unauthorized distribution or reuse is at Core Spaces' sole risk. Notwithstanding the foregoing, reliance by authorized parties will be subject to the terms, conditions, and limitations stated in the proposal, LSI report, and reliance agreement. The limitation of liability defined in the terms and conditions is the aggregate limit of Terracon's liability to Core Spaces and all relying parties unless otherwise agreed in writing.

2.0 Field Investigation

Terracon's field activities were conducted on April 13, 2023, by an environmental professional under the oversight of a California-licensed Professional Geologist (P.G.) with Terracon. A site-specific health and safety plan was followed by Terracon during field activities for all phases of this investigation.

2.1 Pre-Mobilization Activities

Pre-mobilization activities included the submission of an USA North 811 utility ticket, boring permit approval from the Berkeley Toxics Management Division (BTMD), and creation of a site-specific health and safety plan. Prior to mobilizing to the site, and more than 72 hours prior to drilling activities, the soil borings were marked and USA North 811 was contacted by Terracon personnel for clearance of public utilities.

2.2 Geophysical Survey

Terracon performed a geophysical survey on March 23, 2023 to confirm the location of a 1,500-gallon UST, which was reportedly removed in 1994 and any other potential site features including the presence or absence of USTs, sumps, and subsurface product pipelines located on the site building perimeter. Additionally, the survey evaluated for buried utilities in the vicinity of the proposed sub-slab vapor probes and TSW boring locations.

The geophysical survey utilized ground-penetrating radar (GPR), terrain conductivity (TC), vertical magnetic gradient (VMG), and metal detector (MD) survey methods. The proposed sampling locations were adjusted in the field based on indications of utilities. Changes to the proposed sampling locations was not considered significant.

The results of the geophysical survey identified the former location of the UST at 2148 Center Street and was confirmed with site records obtained by the BTMD. Results of the geophysical survey and records reviewed through the BTMD indicate the UST was removed and backfilled. The approximate location of the former UST is depicted on Exhibit 2.

2.3 Soil Boring and Soil Sampling

Terracon mobilized to the site on April 13, 2023 to oversee the drilling of three temporary sampling well borings (TSWs) TSW01 through TSW03 and three temporary soil vapor probes (SVPs), SVP01 through SVP03. The TSW borings were advanced to

Limited Site Investigation

Core Oxford & Center ■ Berkeley, California
May 22, 2023 ■ Terracon Project No. R1237041

depths ranging from 20 to 30 feet below grade surface (bgs) and the SVP borings were advanced to 5 feet bgs.

Drilling was conducted by PeneCore Drilling, a California State-licensed driller. To further avoid potential utility strikes, the TSW borings were advanced using a 3¼-inch diameter hand auger to 5 feet below ground surface (bgs).

Throughout the drilling operation, soil samples from the TSW and SVP borings were obtained continuously. Non-disposable sampling equipment was cleaned using a non-phosphate soap wash and potable water rinse prior to the beginning of the project and before collecting each soil sample.

Terracon field-screened soil samples for organic vapors using a calibrated 5-gas meter with a photoionization detector (PID). This device provides a direct reading in parts per million by volume (ppmV) isobutylene equivalents. Upon removal of the sampler from the borehole, Terracon placed a portion of each sample in a sealable plastic bag. After a stabilization period, Terracon screened the headspace above the soil using the PID. PID readings were not recorded above 0.0 ppmV. The field screening results are summarized in the Soil Boring Logs in Appendix C.

Soil samples were collected from the depth of proposed groundwater depth and the termination depth of the TSW borings. Additionally, one soil sample was collected from each SVP boring at approximately 4 to 5 feet bgs, the same interval at which the vapor probe was set.

Soil samples were extracted by hand using disposable gloves and placed directly into laboratory-supplied glassware and submitted to the laboratory for analysis. Each sample container was labeled with the project number, date, time, boring number, and sample number. Sample containers were placed in a chilled cooler immediately after sampling, and subsequently transported to Pace Analytical, a California Environmental Laboratory Accreditation Program (ELAP)-certified laboratory under strict chain-of-custody procedures.

At the completion of drilling, TSW borings were completed as temporary sampling wells; however, groundwater was not encountered at a maximum depth of 30 feet bgs. The borings were allowed to remain open for several hours; however, groundwater did not infiltrate into the borings.

At the completion of drilling, SVP borings were completed as temporary soil vapor probe wells. The construction of the SVP borings is discussed further below.

2.4 Soil Vapor Probe Installation and Sampling

2.4.1 Probe Installation

Borings SVP01, SVP02, and SVP03 were completed as temporary soil vapor probes. The soil vapor probes were emplaced immediately upon reaching target depth. Soil vapor probe installation and sampling was conducted in general accordance with the DTSC guidance document *Advisory Active Soil Vapor Investigations*, dated July 2015 (DTSC, July 2015)¹. Details of the installation of vapor probes and soil vapor sampling are provided below:

At each vapor probe location, soil vapor sampling implants, consisting of a screened 1-inch stainless-steel sampling tip and attached to new 0.25-inch outer-diameter Nylaflow® tubing, were placed in the borehole at the target depths of approximately 5 feet bgs. The probe tips were placed approximately in the mid-point of a 1-foot-thick sand pack extending from 0.5 foot above to 0.5 foot below the probe tip. Therefore, upon reaching the target depth of each soil boring, 0.5 feet of sand was added to the soil boring prior to installing the probe tip and then sand was added to each boring to create a sand pack surrounding the probe tip to 0.5 foot above the top of the probe. One foot of dry granular bentonite chips was used to fill the borehole annular space from above the sand, followed by hydrated granular bentonite chips. Sufficient water was added to hydrate the bentonite to ensure proper sealing, and care used in placement of the bentonite to prevent post-emplacment expansion which might compromise the probe seal. The remaining end of the Nylaflow® sample tubing protruded from the bentonite seal at the ground surface and was connected to a gas tight three-way in-line quick connect and shut-off valve to allow for purging and collection of the soil vapor samples.

2.4.2 Soil Vapor Sampling

Vapor sampling was conducted at least two hours following soil vapor probe installation to allow for subsurface conditions to equilibrate. The soil vapor samples were collected using the following procedures:

- A sampling train was assembled using an airtight Swagelok fitting to attach a dedicated ¼-inch inner diameter Teflon tube approximately one foot long to a dedicated sampling manifold.
- The completely assembled sampling train was leak tested by using a purge Summa® canister ~150 milliliters per minute with a negative pressure vacuum of 30 inches of mercury (in Hg). The sampling train pressure gauge was observed for

Limited Site Investigation

Core Oxford & Center ■ Berkeley, California

May 22, 2023 ■ Terracon Project No. R1237041

one minute to confirm the sampling train was not leaking and atmospheric air would not enter the sample canister.

- The soil vapor probe was uncapped, and one end of dedicated ¼-inch inner diameter Teflon tubing was tightly sealed to the top of the probe tubing, while the other end was attached to an activated MultiRAE 6228 5-Gas Meter with a 10.6 electron volt (eV) PID. The 5-Gas Meter was equipped with a pump with a maximum flow rate of 200 cubic centimeters (cc) per minute and sensors capable of monitoring concentrations of ionizable VOCs, oxygen (O₂), carbon monoxide (CO), and hydrogen sulfide (H₂S).
- Purging of the soil vapor probe was accomplished by allowing the 5-Gas meter to pump air for one minute.
- Following purging, the complete sampling train was subjected to a vacuum of at least 15 inches of mercury and the system was "shut-in". After approximately one minute the vacuum gauge was read. If the sampling train held a steady vacuum during the shut-in test, the system passed. If not, the connections were tightened, and the shut-in test was performed again. The soil vapor probes passed the shut-in tests.
- Once the sampling assembly was purged, shut-in test completed, and the leak detection test was conducted, a soil vapor sample was drawn from the sample line into a batch-certified 1-liter Summa[®] canister. The flow rate during sampling was regulated at 150 mL/min to minimize stripping of chemical compounds, prevent ambient air from diluting the soil vapor samples, and to reduce the variability of sampling rates. After the sampling train was enclosed with a plastic bag shroud, a cotton swab soaked with 1,1-Difluoroethane (1,1-DFA) was introduced into the shroud as a leak detection compound.
- Upon completion of sample collection as described above, the Summa[®] canisters were closed, secured, and appropriately labeled with pertinent sample information. Canister pressures were recorded upon initiating sample collection, after sample collection, and after receipt at the laboratory. The soil vapor samples were labeled accordingly and submitted to Pace Analytical (Pace), an ELAP certified laboratory, under standard chain-of-custody procedures for chemical analysis using a standard 7 to 10 business day turn-around time (TAT).

The samples and completed chain-of-custody forms were transported to Pace Analytical under standard chain-of-custody procedures for chemical analysis. At the completion of the field activities, the soil vapor probe tubing was removed, and the surface slab was backfilled with quick setting cement grout (5% bentonite) and color-match concrete.

3.0 Laboratory Analytical Methods

The chain of custody forms in Appendix D indicate the sample names, dates and times collected, containers, and the requested target analytes and analytical methods.

Selected soil samples were analyzed for the following:

- Total petroleum hydrocarbons (TPH) as gasoline range organics (GRO), TPH as diesel range organics (DRO), and TPH as motor-oil range organics (ORO) by Environmental Protection Agency (EPA) Method 8015; and,
- Volatile organic compounds (VOCs) by EPA Method 8260.

Additionally, soil vapor samples were analyzed for the following:

- VOCs by EPA Method TO-15; and,
- Fixed Gases by ASTM Method D1946.

Data packages were checked for completeness upon receipt from the laboratory to ensure that data and quality assurance/quality control (QA/QC) information requested were present. Data quality was assessed by considering holding times, surrogate recovery, method blanks, matrix spike and matrix spike duplicate recovery, and method reporting limits. Based upon our interpretation of quality control information provided by the laboratory, it is our opinion that the overall dataset is qualified as useable for the purposes of this LSI.

4.0 Data Evaluation

Analytical results are compared to San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Environmental Screening Levels (ESL), established January 2019, revision 2 (June 2019). The following exposure scenarios are anticipated for the site:

Residential Land Use: This ESL category is used for comparison for sites where unrestricted future land-use is sought. Unrestricted land uses may include residential, health care, day care centers and other sensitive purposes. The ESLs for the residential land use category incorporate assumptions of long-term, frequent exposure of children and adults in a residential setting. These ESLs are appropriate for unrestricted use of a property.

Commercial or Industrial Use: This ESL category assumes working-age adults are regularly present at the site. The direct-exposure assumptions in these ESLs assume shorter, less frequent exposure for receptors compared to residential land use receptors.

Limited Site Investigation

Core Oxford & Center ■ Berkeley, California
May 22, 2023 ■ Terracon Project No. R1237041

Any land Use/Any Soil Depth Construction Worker: Construction workers may have the potential for substantial exposures to surface and subsurface soil during excavation, maintenance and building construction projects. The exposure scenarios include contact with impacted soil via incidental ingestion, dermal contact, and inhalation due to volatilization and fugitive dust are the main routes of exposure. Soil direct contact ESLs are considered under this scenario.

Soil analytical results were compared to human health risk levels (HHRLs) for direct exposure in residential land use, commercial or industrial land use scenarios and for construction workers. Soil vapor results were compared to HHRLs for vapor intrusion in residential and commercial/industrial land use scenarios.

The following sections describe the results of the testing.

4.1 Soil Analytical Results

The soil sample analytical results are tabulated in Appendix B, Table 1 – Summary of Soil Analytical Results, and the laboratory analytical reports and chain-of-custody records are attached in Appendix D.

Total Petroleum Hydrocarbons

TPH as gasoline-range organics (TPH-GRO) was reported (as estimates) ranging from 1.58J to 3.52J milligrams per kilogram (mg/Kg) in the soil samples analyzed. TPH as diesel-range organics (TPH-DRO) was report above laboratory method detection limits (MDLs) in four of the seven soil samples analyzed at concentrations ranging 1.22 to 4.11 mg/Kg. TPH as motor oil-range organics (TPH-ORO) was reported above laboratory MDLs in three of the seven soil samples at concentrations ranging 5.99 to 10.3 mg/Kg. The reported concentration of TPH-GRO, TPH-DRO, and TPH-ORO are below the ESLs for residential land use, commercial/industrial land use, and construction worker safety.

Volatile Organic Compounds

The following VOCs were reported above laboratory MDLs: methylene chloride, 1,2,4-trimethylbenzene, isopropylbenzene, toluene, and total xylenes; however, the reported VOC concentrations were reported below respective ESLs for residential land use, commercial/industrial land use, and construction worker safety.

4.2 Sub-Slab Vapor Analytical Results

A range of VOCs were reported above laboratory MDLs. The following analytes were reported above respective ESLs:

Limited Site Investigation

Core Oxford & Center ■ Berkeley, California
May 22, 2023 ■ Terracon Project No. R1237041

- Benzene was reported at concentrations ranging 2.41 to 8.08 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) in the four soil vapor samples analyzed. Concentrations of benzene in samples SVP01 ($3.83 \mu\text{g}/\text{m}^3$), SVPDUP ($4.09 \mu\text{g}/\text{m}^3$), and SVP2 ($8.08 \mu\text{g}/\text{m}^3$) exceeded the residential ESL of $3.2 \mu\text{g}/\text{m}^3$ but are below the commercial/industrial ESL of $14 \mu\text{g}/\text{m}^3$.
- Ethylbenzene was reported at concentrations ranging 1.17 to $42.4 \mu\text{g}/\text{m}^3$ in the four soil vapor samples analyzed. The reported concentrations of ethylbenzene in SVP02 ($42.4 \mu\text{g}/\text{m}^3$) exceeded the residential ESL of $37 \mu\text{g}/\text{m}^3$ but is below the commercial/industrial ESL of $160 \mu\text{g}/\text{m}^3$.
- Concentrations of benzene and ethylbenzene were not detected above laboratory MDLs in the soil samples collected at the respective depth intervals of the soil vapor probe in each boring.

The soil vapor sample results are tabulated in Appendix B, Table 2 – Summary of Soil Vapor Analytical Results, and the laboratory analytical reports and chain-of-custody records are attached in Appendix D.

4.3 Quality Control/Quality Assurance and Data Validation

Quality control/quality assurance (QC/QA) of analytical data was maintained using the following methods and procedures:

- Established reported detection limits (RDLs) and MDLs with the laboratory that meet data quality objectives (DQOs);
- Laboratory QA/QC controls, such as laboratory control standard (LCS), matrix spike (MS), and matrix spike duplicate (MSD);
- Collection of samples in laboratory provided containers;
- Chain-of-custody protocols;
- Storage and transportation of soil samples in secured chilled containers;
- Decontamination of reusable sampling equipment;
- A 2-hour equilibration time period for soil vapor probes prior to sampling, 3-volume purge, calibrated flow ($<200 \text{ mL}/\text{min}$), and new expendable supplies (Nylaflow tubing, dedicated probes, and new connectors); and,
- Shut-in test and use of a tracer gas to validate the surface seal.

Any discrepancy in the laboratory QC/QA is notated in the laboratory reports, which are included as **Appendix D**.

The analytical data for the soil gas samples indicated a concentration of the tracer gas 1,1-difluoroethane (1,1-DFA). The allowable concentration of 1,1-DFA is 10 times the

reporting limit of $2.7 \mu\text{g}/\text{m}^3$ ($27 \mu\text{g}/\text{m}^3$) according to the CAL-EPA/DTSC guidance, dated July 2015. Detection of a tracer gas in soil gas samples above the threshold indicates a leak may have occurred during sampling resulting in a potential dilution of concentrations. Concentrations of 1,1-DFA were not reported above the $27.0 \mu\text{g}/\text{m}^3$ threshold in the four soil vapor samples analyzed.

5.0 Findings and Conclusions

Based on the scope of services described in this report and subject to the limitations described herein, Terracon concludes the following:

- The results of the geophysical survey identified the former location of the UST at 2148 Center Street and was confirmed with site records obtained by the BTMD.
- The reported concentrations of TPH and VOCs in the soil samples analyzed did not exceed respective ESLs for residential land use, commercial/industrial land use, and construction worker safety.
- Concentrations of benzene and ethylbenzene were reported above respective residential ESLs in one or more soil vapor samples but were reported below respective commercial/industrial ESLs.

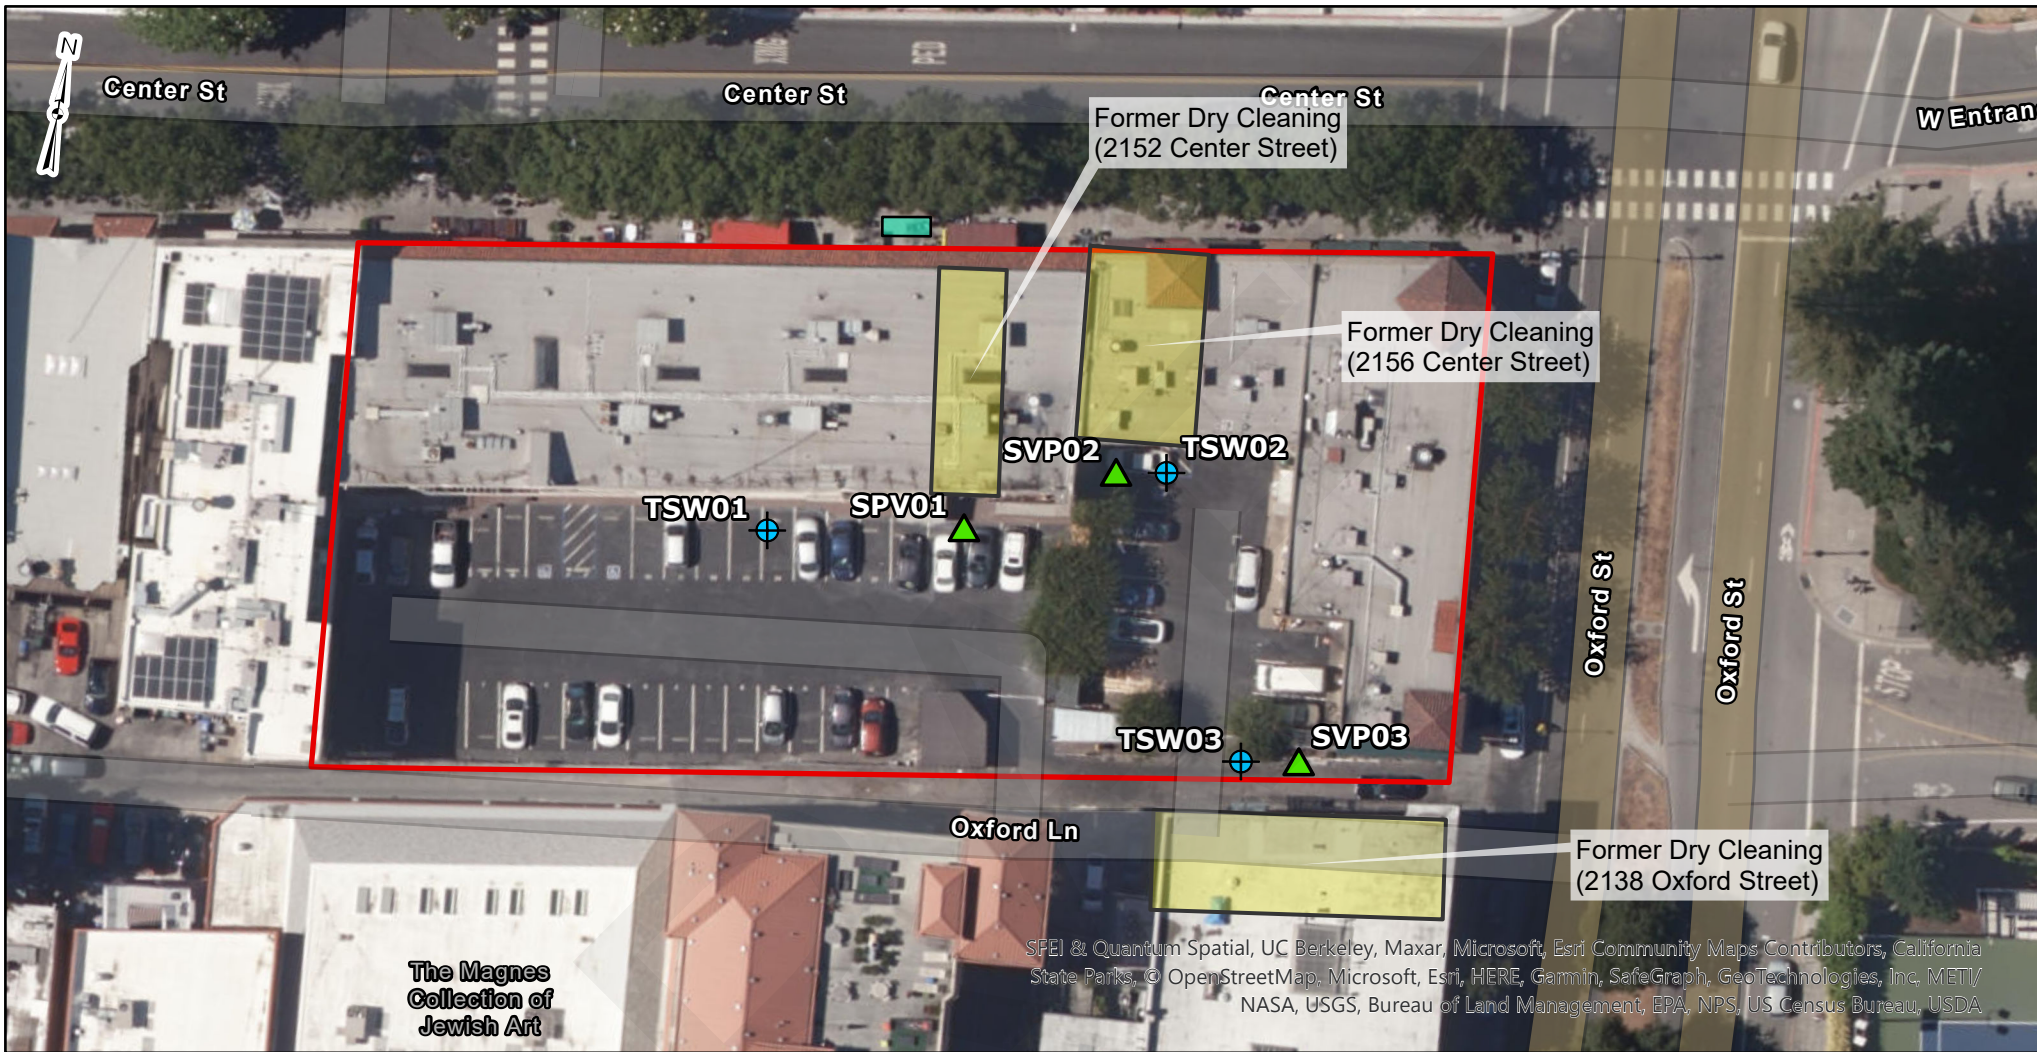

6.0 Recommendations

Based on the findings of this investigation, Terracon recommends the following:

- Based on the analytical results and use of the first floor for commercial/industrial purposes, no further investigation is recommended at this time.
- If future land use development is planned for residential land use on the first floor of the structure, additional soil vapor sampling is recommended to further evaluate if a vapor barrier may be recommended for the future structure.
- Though soil analytical results collected as part of this investigation did not identify concentrations of TPH or VOCs above respective construction worker exposure ESLs, residual impacts to soils may be present within the vicinity of the former UST located under the sidewalk along Center Street that could affect worker safety. Additionally, groundwater was not assessed as part of this investigation. Based on the potential for residual impacts near the former UST and unknown groundwater conditions, the preparation of a Media Management Plan (MMP) prior to future construction is recommended.

CASE NARRATIVE

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

(dry)	Results are reported based on the dry weight of the sample. [this will only be present on a dry report basis for soils].
MDL	Method Detection Limit.
MDL (dry)	Method Detection Limit.
RDL	Reported Detection Limit.
RDL (dry)	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state "ND" (Not Detected) or "BDL" (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.
J3	The associated batch QC was outside the established quality control range for precision.

DC#_Title: ENV-FRM-SACR-0030 CA Regulated Soil Notification

Effective Date: 11/18/2022

11605894

USDA / APHIS regulates material with organic matter, including soil, from specific counties that have invasive species, pests, or plant diseases present in the county. In order to process your project, we need to determine if special handling applies to your project.

Any soils received without this completed form cannot be received or processed until the site address is confirmed.

Receipt of Soils from California:

Are samples soil or other regulated material?

Yes No If no, matrix description: _____

County

- Alameda Contra Costa Del Norte Humboldt Lake Los Angeles ¹
- Marin Mendocino Monterey Napa Orange ^{1,2} Riverside ¹
- San Diego ² San Francisco San Mateo Santa Clara Santa Cruz
- Solano Sonoma Trinity

Other (specify): _____

(If soils are from one of the counties specified above, the site address is required.)

Site Address: 38.73568° N, 121.30685° W

Fire Ant ¹ and Fruit Fly ² quarantines may be partial county quarantines. The site address must be checked against APHIS interactive maps to determine if the site is within the quarantine area.

To be completed by Pace National:

Client: UPRR
Lab ID (if applicable): _____

Are Samples Regulated? No Yes

Regulated for? Phytophthora Ramorum Fire Ants Fruit Flies *

Amount of soil received: ~ 1600 grams. Received on: 11/14/23

Will any analysis be done at another lab? Yes No

If yes, complete the following for each lab that will receive the regulated samples:

Receiving Lab	Amount Shipped	Shipment sent with the receiving lab's Soil Permit / Compliance Agreement.

CASE NARRATIVE

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state "ND" (Not Detected) or "BDL" (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier Description

J4	The associated batch QC was outside the established quality control range for accuracy.
