Project Description

The California Department of Transportation (Caltrans) proposes an emergency slope repair on along southbound State Route 99 at postmile 29.8 to 30.2 in Merced County. A Merced Irrigation District canal was breached and led to flooded field adjacent to the State Right of Way. Water and sediment crossed under the right-of-fencing and inundated the southbound lanes. The project will back fill the exposed utilities, remove all damaged vegetation, and place permanent erosion control (See Continuation Sheet for more scope of work). The purpose of the project is to address the damages caused by a canal breach. The need of this project is to prevent and mitigate the loss or impairment of life, property, or essential public services.
