STATE CLEARINGHOUSE

The California Highway Patrol, Temecula Area's response to the Notice of Preparation (NOP) for the City of Wildomar's proposed general plan, State Clearinghouse (SCH) #2023090064, Temecula Area is expressing concerns that the proposed development. The addition of 8,992 dwellings and an estimated population increase of 27,999, would significantly increase traffic volume, and it would therefore present an adverse impact on the Temecula Area's ability to provide adequate service in the area.

The general plan does not address the impact on roadways outside of the city, other than a generic statement under *Transportation*. The general plan does not address the significant increase of traffic on Interstate 15 or the county roads leading in and out of the city.

Sincerely,

Sergeant N. W. Baer
