Subject: Filing of Notice of Determination in compliance with Section 21108 or 21152 of the Public Resources Code.

Highway 49 Wastewater Capacity Improvement Project
Project Title

<u>2023090151</u>	<u>Janeane Martin</u>	<u>(530) 886-4984</u>
State Clearinghouse Number	Contact Person	Area Code/Telephone/Extension

Project Location

The proposed pipeline alignment would extend northwest under Highway 49 and local roads from the Highway 49/Edgewood Road intersection to the Mid-Western Placer Regional Pump Station, as described in further detail below. The entire pipeline alignment would be located within unincorporated western Placer County, California.

Project Description:

The proposed project includes installing a new wastewater force main between the existing force main outfall at the Highway 49/Edgewood Road intersection and the Mid-Western Placer Regional Pump Station on Joeger Road. The alignment would include a 16-inch diameter pipe extension northwest under Highway 49 from the Highway 49/Edgewood Road intersection to Quartz Drive. From this point, the alignment would include a 24-inch diameter pipe extension that would turn west along Quartz Drive to the intersection with Park Drive, at which point it would head north and then west along Park Drive to the intersection with Richardson Drive. The alignment would extend north along Richardson Drive to its intersection with Joeger Road. The remaining segment of the pipeline extending west on Joeger Road to the Mid-Western Placer Regional Pump Station would be 30 inches in diameter. The entire length of the proposed force main extension, which is approximately 22,400 lineal feet, would be located within paved roadway and shoulder right-of-way. Construction activities are anticipated to occur entirely within disturbed lands. The pipe is proposed to be installed using open trench construction. Horizontal directional drilling would be used to cross under drainages and water supply canals that traverse the alignment.

This is to advise that Placer County, acting as the lead agency, approved the above-described project on November 14, 2023 and has made the following determinations:

1. The project will not have a significant effect on the environment.
2. A Mitigated Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were made a condition of the approval of this project.
4. A Mitigation Monitoring and Reporting Plan was adopted for this project.
5. A Statement of Overriding Considerations was not adopted for this project.
6. Findings were made pursuant to the provisions of CEQA.
