Present Land Use/Zoning/General Plan Designation:

Public/Quasi-Public

Project Description: (please use a separate page if necessary)

The Corporation Yard Project (proposed project) would include construction of a 6,000 square foot Corporation Yard building on top of the existing CAMU as well as site improvements to help manage the capture and conveyance of storm water collected at the project site. The Corporation Yard building would be used to house RD 537 equipment and office space for levee and drainage maintenance activities. Project site improvements include construction of an access ramp, concrete curb around the top deck of the project site, drop inlets and down chutes to help with stormwater conveyance, and excavation throughout the existing drainage channel to help with the conveyance of stormwater flows. Additionally, SAFCA would install a culvert along the new access ramp to facilitate conveyance of stormwater and would construct a land bridge at the southwest corner of the project site to connect the project site top deck to the existing RD 537 levee.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
