

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Canyon Lake Water Treatment Plant Phase 1 Improvements Project

Lead Agency: Elsinore Valley Municipal Water District

Contact Name: Parag Kalaria, PE, PMP

Email: pkalaria@evmwd.net Phone Number: 619-674-3146

Project Location: Canyon Lake, Riverside County

*City*

*County*

Project Description (Proposed actions, location, and/or consequences).

EVMWD is proposing to implement new treatment facilities at the Canyon Lake Water Treatment Plant (CLWTP) to address current capacity and water quality issues. The project would demolish the existing intake pump station, static mixers, clarifier, and chemical feed area. The project would construct a new intake pump station at the lake; new static mixers and sedimentation/flocculation basins; new equipment for per- and polyfluoroalkyl substances, taste, and odor treatment; new booster and backwash pump stations; and chemical and maintenance buildings. The proposed improvements, as well as construction staging areas, would be located within the boundary of the existing CLWTP.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The proposed project would result in potential impacts in the following issue areas: biological resources (adverse impact to special status species, sensitive habitat, and wetlands); cultural resources (adverse change in the significance of historic and archaeological resources); land use and planning (conflicts with policies adopted for the purpose of avoiding an environmental effect); noise (generation of temporary and permanent increases in noise levels in excess of local standards); and tribal cultural resources (change in significance of a tribal cultural resource).

Based on the IS/MND prepared for the project, it has been determined that the project will not have a significant effect on the environment that cannot be mitigated to a level of insignificance with the incorporation of mitigation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no known areas of controversy for the proposed project.

Provide a list of the responsible or trustee agencies for the project.
