**Project Description:** (please use a separate page if necessary)

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

## **Highway 59 Phase 1 Widening and Widening Over Black Rascal Creek**

### **Project Description**

The City of Merced proposes to widen and improve State Route 59 from a two-lane roadway to four lanes from the 16th Street intersection to approximately 600 feet south of Buena Vista Drive. The project also proposes to replace the Black Rascal Creek Bridge and the South Fork Black Rascal Creek Bridge. Additional project features include standard shoulders, intersection improvements, Class 2 bicycle lanes, a striped two-way left-turn lane and median, and sidewalks. To accommodate the four-lane facility, the Black Rascal Creek Bridge and the South Fork Black Rascal Creek Bridge would be replaced. Both bridge structures are within the regulatory floodway of Black Rascal Creek and are overtopped in large storm events. To correct this overtopping and improve the hydraulics, the main creek channel would be realigned to flow beneath the Black Rascal Creek Bridge crossing. The existing South Fork Black Rascal Creek Bridge would be replaced with culverts, which would then serve to allow for continued water flow and function as an emergency bypass during heavy creek flows. Minimal right-of-way acquisition would be required to accommodate the widened roadway and may also be needed for potential utility relocations. Temporary construction easements and encroachment permits would also be required to accommodate project construction. The project would be built in stages to maintain traffic flow through the area.
