

NOTICE OF INTENT TO ADOPT MITIGATED NEGATIVE DECLARATION

As required by the California Environmental Quality Act, the California Department of Fish and Wildlife's Fisheries Restoration Grant Program is providing notice to inform the public and interested agencies of the Mitigated Negative Declaration for its proposed project to enhance the capability of streams to produce anadromous salmonids by maintaining, restoring, and improving stream habitat essential to salmonid production.

Implementation Project Locations: Various streams in Humboldt, Mendocino, Del Norte, and Siskiyou.

Description of Project: This project will use grant funds approved by the California Legislature to initiate activities that are designed to restore salmon and steelhead habitat in coastal streams and watersheds that historically produced large populations of salmon and steelhead. The replacement of barrier culverts with bridges or natural stream bottom culverts will allow adult and juvenile salmonids access to additional spawning and rearing habitat. The installation of instream structures will recruit and sort spawning gravel for adult salmon and steelhead and create summer rearing pools and over-wintering habitat for juveniles.
