Project Description (Proposed actions, location, and/or consequences).

The Project consists of two proposed developments: 1) the Forster & El Camino Mixed-Use Project at the intersection of Forster Street and El Camino Real on the 3.17-acre vacant site; and 2) a performing arts center on a 1.68-acre site located at eastern portion of the City-owned Historic Town Center Park. No development will occur on the 0.56-acre Blas Aguilar Adobe Museum property. The proposed Specific Plan Amendment would expand the Specific Plan Area to a total of 7.3 acres for the development of mixed-use community and performing arts center.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Refer to Table S-1, Section S.0, Executive Summary, in the DEIR. Project-specific mitigation measures are required to reduce potentially significant impacts for the following topical issues: Biological Resources, Geology and Soils, Hazards and Hazardous Materials, and Noise. These potentially significant impacts would be reduced to a less than significant impact with mitigation incorporated.

Additionally, after the application of all feasible mitigation measures, significant and unavoidable impacts would occur with respect to cumulative cultural and tribal cultural resources.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no areas of known controversy known to the City of San Juan Capistrano.

Provide a list of the responsible or trustee agencies for the project.
