Present Land Use/Zoning/General Plan Designation:

General Plan Designation: include Agricultural Grazing, Mineral Resource, Mixed Use, Habitat Resource 40 and 80-acre density, Recreation Resource, Public Land, Rural Residential A, Rural Residential B, and Timber

Project Description: (please use a separate page if necessary)

The objective of the project is to reduce hazardous fuel along critical transportation routes within high-priority Wildland Urban Interface (WUI) areas in Shasta County. The project includes nine Project Activity Areas (PAAs) throughout Shasta County adjacent to public roadways. The maximum potential acreage to be treated would be 8,451 acres. The proposed action consists of removing ground and ladder fuels up to 400 feet from each side of the PAA roadway centerlines, thinning trees to reduce crown closure, removing dead and dying trees within 100 to 200 feet of serviceable roadways or within landscape areas, and after removal activities, applying herbicide at regular intervals to control the future regrowth of unwanted vegetation and maintain an understory canopy without fire-prone fuels. Treatment will focus on reducing vertical and horizontal continuity of fuels; removing competition from small, closely spaced, fire-vulnerable species; and promoting a smaller number of resilient larger trees. Generally, living trees will be spaced to a distance of greater than 30 feet. Both mechanized and manual techniques will be deployed for removal of fuels. The treatment contractor will conduct the hazardous fuel reduction techniques appropriate for each individual parcel.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X". If you have already sent your document to the agency please denote that with an "S".
