

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Heritage Ranch Water Resource Recovery Facility Project

Lead Agency: Heritage Ranch Community Services District

Contact Name: Scott B. Duffield, P.E., General Manager

Email: scott@heritageranchcsd.ca.gov Phone Number: (805) 227-6230

Project Location: unincorporated San Luis Obispo County
City *County*

Project Description (Proposed actions, location, and/or consequences).

The project site is located in the census-designated place of Lake Nacimiento in unincorporated San Luis Obispo County, and is comprised of the existing Heritage Ranch Community Services District (HRCSD) wastewater treatment plant (WWTP), replacement effluent pipeline alignment, and an existing spray field. The WWTP is located on APN 012-181-085, and the spray field is located on APN 012-361-018. The pipeline alignment is approximately 2,800-linear-feet along Heritage Road and Gateway Drive. The project includes upgrades to the existing HRCSD WWTP and spray field to comply with Waste Discharge Order No. R3-2017-0026. The project would include modification and demolition of the existing HRCSD WWTP elements and construction of new water resource recovery facility elements and supporting facilities with an average annual daily flow capacity of approximately 0.29 million gallons per day. In addition, a new, eight-inch-diameter effluent pipeline would be installed along Heritage Road and Gateway Drive. Modifications at the spray field location would consist of demolition and abandonment of the sand filters and replacement of the de-chlorination facilities with a more robust de-chlorination process. No modifications to the storage pond located adjacent to the existing spray field would occur, and discharges to the storage pond would remain the same as under existing conditions. The total wastewater treatment capacity of HRCSD under the proposed project would not be increased as compared to the existing capacity of HRCSD's wastewater treatment facility.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project would result in potentially significant effects to biological resources, cultural resources, paleontological resources, hazards and hazardous materials, transportation, and wildfire. However, implementation of the following mitigation measures was determined in the IS-MND to reduce these project effects to less-than-significant levels:

- BIO-1 (Worker Environmental Awareness Program Training)
- BIO-2 (Pre-construction Surveys and Biological Monitoring)
- BIO-3 (Construction Site Best Management Practices)
- BIO-4 (Avoidance and Minimization Measures for Nesting Birds)
- CR-1 (Unanticipated Discovery of Cultural Resources)
- GEO-1 (Paleontological Resources Monitoring and Mitigation)
- HAZ-1 (Traffic Control Plan)
- NOI-1 (Operational Noise Reductions)

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.

- County of San Luis Obispo
- State Water Resources Control Board
- San Luis Obispo County Air Pollution Control District
