EXECUTIVE SUMMARY

Ninyo & Moore was retained by the City of El Monte to perform a Phase I Environmental Site Assessment (ESA) on the Area Y property located at 10819 Valley Boulevard in El Monte, California (site). The site is also identified as Los Angeles County Assessor's Parcel Numbers 8575-017-909, 8575-019-907, 8575-019-908, 8575-019-910, 8575-019-911, 8575-019-912, 8575-019-913, 8575-019-914, 8575-021-936, 8575-021-932, 8575-021-934, 8575-022-922, and 8575-022-925.

The objective of this ESA is to identify, to the extent feasible pursuant to the process described in ASTM E1527-13, recognized environmental conditions (RECs), which are defined by ASTM as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The results of this ESA are summarized below:

- Historical research revealed that the site was developed in the early 1900s with a residential house and two storage sheds. In 1910, six residential houses, two storage sheds, along with Lodge's Oil Depot were built on the site. In the 1920s, seven additional residential houses, three storage sheds, and three auto storage sheds were added to the site. A residential house and an auto storage building were removed from the site around the same time. Additionally, Lodge's Oil Depot was renamed Shell Oil Co's Depot. In the early 1930's Shell Oil Co's Depot was removed from the site and was replaced with an auto storage building. In the late 1930s, a large warehouse and a small round building were constructed on the site, and by the late 1940s, both buildings had been replaced with an even larger warehouse building belonging to O.H. Kruse Grain & Milling. A commercial building was also constructed on the southern portion of the site in the 1940s. Between the 1940s and 2012, the residential houses along with the storage sheds and auto storage buildings were demolished until by 2012, no residential buildings remained on the site. The two remaining buildings, the large warehouse as well as the commercial building belonging to Bailey Tire Company, were removed from the site in 2017. The site remained vacant from 2017 to the present.
- On September 25, 2019, Ms. Linda Ton of Ninyo & Moore, conducted a site reconnaissance of the property. The reconnaissance involved a visual inspection of the site, and observations of adjoining properties. Mr. David F Gondek with Olivarez Mardruga Lemieux O'Neil (representing the city of El Monte) escorted Ms. Ton around the property during the site reconnaissance. At the time of the reconnaissance, the approximate 4.8-acre site was vacant.
- The areas surrounding the site consist primarily of retail/commercial buildings to north, east, south, and west.
- Based on our site visit, there are currently no wells on the site.

- Ninyo & Moore did not observe quantities of hazardous substances or petroleum products used or stored on site during our site reconnaissance.
- Indications of aboveground storage tanks (ASTs), underground storage tanks (USTs), or hazardous material spills or leaks, were not observed during the site reconnaissance.
- Four pole-mounted transformers were observed on the site. Signs of leaks or staining were not observed.
- Review of an environmental database report obtained for this project indicated that the site is listed on several of the regulatory databases researched by Environmental Data Resources Inc. (EDR), including the HAZNET, RCRA-SQG, ECHO, FINDS, WIP, RCRA NonGen, LUST, SWEEPS UST, HIST CORTESE, CIWQS, CERS, and CA FID UST databases. The site is listed on the Leaking Underground Storage Tank (LUST) database for gasoline potentially contaminating the soil. The case was opened in November 1989, and after remediation and clean up activities were completed to the satisfaction of the regulatory agency, which included the excavation and disposal of the contaminated soil, the case was closed in July 1991. Due to the closed status of the case, and the absence of current contamination controls, the closed LUST case is considered an HREC.
- The site has had five previous investigations completed: Santa Fe Trail Plaza Project Area B Phase 1 ESA, two former O.H. Kruse Grain & Milling LUST Sites, and the Phase II ESA and Asbestos Abatement, Lead Abatement, and Demolition Survey for the former Bailey Tire Company.
- **O.H. Kruse Grain & Milling LUST Site:** According to the LADPW documents, in January 1996 a 10,000-gallon UST was removed from the site by O.H. Kruse Grain & Milling. The tank removal report was completed by Atlas Environmental Engineering Inc (ATLAS). ATLAS concluded that, since the tank pit samples indicated no contamination and the piping samples revealed only very low levels of contamination, along with the over-excavation of the contaminated soil, and the less than detectable results from the verification samples, no further environmental work was warranted on the site. Due to the closed nature of the case, no remaining contamination, and the lack of current environmental controls due to the past contamination, this closed LUST case is considered to be a HREC. A copy of the ATLAS tank removal report can be found in Appendix D.
- **Bailey Tire Company Phase II ESA:** In August 2008, The Source Group Inc (SGI) prepared a Phase II ESA for the former Bailey Tire Company property after an initial Phase I ESA in June 2006, deemed it necessary. SGI concluded that regulated compounds had been released on the property and that although only low levels of the analytes were found in the soil and soil-gas, the releases of the analytes signify that there will likely be "hot spots" that were not identified during the investigation. SGI also warned that the investigation was limited in scope and that care should be taken during any future construction activities because there is a great likelihood that adverse

conditions exist beneath the property. Due to the presence of residual contamination on the site, and no apparent case closure letter, the former Bailey Tire Company facility is considered a REC. A copy of SGI's Phase II ESA is included in Appendix D.

- **Bailey Tire Company Asbestos Abatement, Lead Abatement, and Demolition:** In October 2017, Ellis Environmental Management Inc (Ellis) completed an Asbestos and Lead Abatement survey on the former Bailey Tire Company along with several other properties. The survey found asbestos containing 9" by 9" floor tile and mastic, approximately 600 sq ft, and asbestos containing roofing mastic, approximately 40 sq ft. Samples taken of the asbestos containing material (ACM) were below OSHA and EPA clearance levels. A copy of Ellis's Asbestos and Lead Abatement report is included in Appendix D.
- Several off-site facilities were located within the EDR search radius from the site. None of the listed facilities are considered to be a REC to the site at this time based on several factors, including distance from the site, location relative to the regional groundwater flow direction (e.g. hydraulically downgradient or crossgradient to the site), database listing type, and affected media (soil only). Refer to Section 5.1.2 for additional information regarding potential off site facilities of concern.
- Based on the completion of the Vapor Encroachment Condition (VEC) screening matrix, it is presumed unlikely that a VEC currently exists beneath the site.
- An environmental lien or activity and use limitations (AULs) search was not requested for this ESA.
- An asbestos and lead survey was beyond the scope of this investigation.

CONCLUSIONS

Ninyo & Moore has performed this ESA in conformance with the scope and limitations of ASTM E1527-13 of the Area Y property located at 10819 Valley Boulevard in El Monte, California. Based on the information compiled during the preparation of this report, this assessment has revealed no evidence of RECs in connection with the site with the exception of the following:

- In August 2008 The Source Group Inc (SGI) prepared a Phase II ESA for the former Bailey Tire Company property based on the results of a June 2006 Phase I ESA. Five soil borings were advanced on the property to a depth of 20 feet, with four located at the main areas of concern within the building, and one located outside the building. Soil cores were collected in two foot segments at five foot depth intervals, and sent to the lab for analysis. In three of the borings, soil-vapor probes were installed at depths of 5 and 15 feet. Low levels of Tetrachloroethylene (PCE) and toluene were detected in all of the soil-gas samples. None of the soil samples had detectable Total Petroleum Hydrocarbons (TPH), and only two soil samples contained Volatile Organic Compounds (VOCs). Arsenic was detected in all of the soil samples analyzed for total metals. Benzene, Acetone, other metals, and Ethylene Glycol were all found in certain soil

samples, however all of the concentrations were below the California-modified Preliminary Remediation Goals. SGI concluded that regulated compounds had been released on the property and that although only low levels of the analytes were found in the soil and soil-gas, the releases of the analytes signify that there will likely be "hot spots" that were not identified during the investigation. SGI also warned that the investigation was limited in scope and that care should be taken during any future construction activities because there is a great likelihood that adverse conditions exist beneath the property. Due to the presence of residual contamination on the site, and no apparent case closure letter, the former Bailey Tire Company facility is considered a REC. A copy of SGI's Phase II ESA is included in Appendix D.

RECOMMENDATIONS

Based on the findings of this ESA, further investigation is recommended at this time due to the residual contamination on the site from the former Bailey Tire Company property, reported in the Phase II ESA completed by SGI. Further investigation and remediation is recommended to reveal the scope, type, and quantity of the remaining contamination on the site.

1. INTRODUCTION

Ninyo & Moore has performed this ESA in conformance with the scope and limitations of ASTM E1527-13 of the Area Y property located at 10819 Valley Boulevard in El Monte, California (site). This ESA was conducted for City of El Monte. The following sections identify the purpose, the involved parties, the scope of services, and the limitations and exceptions associated with this ESA.

1.1. Purpose

In accordance with ASTM E1527-13, the objective of the ESA is to identify recognized environmental conditions. The term recognized environmental conditions (RECs) means "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions."

Identification of RECs will fall into three categories: existing REC (as defined above), Historical REC (HREC), or Controlled REC (CREC).

- HREC - An HREC is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been

addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations (AULs), institutional controls, or engineering controls)."

- CREC - A CREC is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, AULs, institutional controls, or engineering controls)."

1.2. Involved Parties

Mr. Luke Swickard, a Staff Environmental Scientist with Ninyo & Moore, performed the project reporting and research. Ms. Linda Ton, a Senior Staff Engineer with Ninyo & Moore, conducted the site visit. Mr. Randy Wheeler, Senior Geologist with Ninyo & Moore, was the Environmental Professional assigned to the project, and performed project oversight and quality review. Resumes of these individuals are included in Appendix A.

1.3. Scope of Services

Ninyo & Moore's scope of services for this ESA included the following:

- Performance of a site reconnaissance to visually and/or physically observe the interior and exterior of structures and other features on the site as well as visible exterior features of adjoining properties to identify areas of possibly contaminated surface soil or surface water, improperly stored hazardous materials, and possible risks of contamination from activities at the site and adjoining properties. Photograph relevant site features (Appendix B).
- Review of reasonably ascertainable standard environmental record sources including federal, state, and tribal regulatory agency databases for the site and for properties located within a specified radius of the site (Appendix C). The purpose of this review was to evaluate possible environmental impacts to the site and site vicinity activities. These databases list locations of known hazardous waste sites, leaking underground storage tanks (LUSTs), permitted facilities that utilize USTs, and facilities that use, store, or dispose of hazardous materials, hazardous wastes, and/or petroleum products.
- Review of reasonably ascertainable additional environmental record sources including local records and/or additional state or tribal records for the site and for properties located within a specified radius of the site. The purpose of this review was to evaluate possible environmental impacts to the site and site vicinity activities. These databases list locations of known hazardous waste sites, solid waste landfills, registered storage

tanks, emergency releases, contaminated public wells, and facilities that use, store, or dispose of hazardous materials and/or petroleum products.

- Provide supporting documentation, when available (Appendix D).
- Review of reasonably ascertainable standard physical setting sources including a current United States Geological Survey (USGS) 7.5-minute topographic map, and possibly including USGS and/or state groundwater and geologic maps, and soil maps. The purpose of this review was to note information about the geologic, hydrologic, and/or topographic characteristics of the site and site vicinity.
- Review of reasonably ascertainable historical documents may include aerial photographs, historical fire insurance maps, and/or city directories. The purpose of this review was to review obvious uses of the site from the present, back to the site's first developed use, or back to 1940, whichever is earlier (Appendix E).
- Performance of interviews with present owners, operators, and occupants of the site as well as other knowledgeable parties as appropriate/available. The purpose of these interviews is to obtain information regarding potential RECs in connection with the site.
- Perform a preliminary vapor encroachment screening assessment on the site and adjoining properties (Appendix F).
- Preparation of this ESA report documenting methodology, reporting findings, significant data gaps, and conclusions, and providing opinions of the impact on the site of conditions noted in the findings section regarding RECs at the site.

1.4. Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

The findings, opinions, and conclusions are based on an analysis of the observed site conditions and the referenced literature. It should be understood that the conditions of a site could change with time as a result of natural processes or the activities of man at the subject site or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control. Ninyo & Moore cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the site.

Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can eliminate the uncertainty altogether.

1.5. Special Terms and Conditions

Ninyo & Moore was not made aware of any special terms and conditions associated with the site.

1.6. User Reliance

This report may be relied upon by, and is intended exclusively for, the City of El Monte. Any use or reuse of the findings, opinions, and/or conclusions of this report by parties other than the client is undertaken at said parties' sole risk.

1.7. Physical Limitations

Physical limitations were not encountered during the site reconnaissance.

1.8. Data Gaps

A data gap is a "lack of or inability to obtain data required by this practice despite good faith efforts to gather such data." In completing this ESA, Ninyo & Moore encountered no significant data gaps that affect the ability of the EP to identify RECs on the site.

2. SUBJECT SITE

The following sections provide a general description of the site and adjacent properties. Photographs taken during the site reconnaissance are provided in Appendix B.

2.1. Site Description

At the time of the site reconnaissance, the site was vacant and unoccupied. The site is located at 10819 Valley Boulevard in El Monte, California. The site is situated on thirteen parcels totaling approximately 4.8 acres of land designated by Los Angeles County Assessor's Parcel Number 8575-017-909, 8575-019-907, 8575-019-908, 8575-019-910, 8575-019-911, 8575-019-912, 8575-019-913, 8575-019-914, 8575-021-936, 8575-021-932, 8575-021-934, 8575-022-922, and 8575-022-925. The site location is presented on Figure 1 and the site vicinity with additional information concerning the site and surrounding properties is presented on Figure 2.

2.2. Site Reconnaissance

On September 25, 2019, Ms. Linda Ton, Senior Staff Environmental Engineer with Ninyo & Moore, conducted a site reconnaissance of the property. The reconnaissance involved a visual inspection of the site, and observations of adjoining properties. Mr. David F. Gondek, of Olivarez Madruga Lemieux O'neill (representing the City of El Monte), escorted Ms. Linda Ton around the property during the site reconnaissance.

2.2.1. Site Improvements

At the time of the site reconnaissance, the site consisted of three fenced off vacant lots, bisected by Monterey Avenue and a residential home. The two western lots had vegetation throughout. The east vacant lot had a layer of gravel on the northern portion and vegetation on the southern portion. According to Mr. Gondek, the east vacant lot was a former tire shop and gas station with underground storage tanks (USTs) on the southern portion, Mr. Gondek indicated that prior remediation had been conducted on the gasoline station. Evidence of the former gas station or USTs were not observed. The northern portion of the east vacant lot was a former warehouse building for O.H. Kruse Grain & Milling, the warehouse building burnt down in 2017. The northwestern vacant lot was owned by O.H. Kruse Grain & Milling, where milling activities were located. The southwestern vacant lot was a former residential home. The following summarizes key on-site observations for indications of the following potential environmental concerns:

On-Site Observations			
Conditions	Observed Yes	Observed No	Comments
Hazardous Substances/Petroleum Products		X	
Waste Generation/Storage/Disposal		X	
Unidentified Substance Containers		X	
Storage Tanks (ASTs and/or USTs)		X	Evidence of the former of gas station was not observed.
Potential PCB-Containing Equipment	X		Four pole-mounted transformer were observed, three on the western vacant lot and one on the eastern vacant lot. Evidence of leaks or staining were not observed. The pole-mounted transformers are not considered a REC.
Chemical/Petroleum Odors		X	
Concrete Patches/Pads		X	
Pools of Liquid		X	
Sewage Discharge Pipes		X	
Floor Drains/Sumps		X	
Elevator		X	
Wells		X	
Drums		X	
Indications of Staining		X	
Stressed Vegetation		X	
Pits, Ponds, or Lagoons		X	
Waste Water Discharges/Disposal Systems		X	
Storm Water Systems		X	
Septic Systems/Cesspools		X	
Municipal Solid Waste Disposal Areas		X	
Other Environmental Concerns or Conditions		X	

2.2.2. Roads

As shown on Figure 2, the site is accessible from Valley Boulevard to the south, El Monte Avenue to the east, and Railroad Street to the north, as well as Monterey Avenue which bisects the western portion of the site on a north-south axis.

2.2.3. Site Occupants

At the time of our site reconnaissance, the site was vacant, no building structures were present.

2.2.4. Source of Potable Water

Potable water is provided to the site by the City of El Monte Water Department.

2.2.5. Sewage Disposal System

Sewer disposal is provided to the site by the City of El Monte.

2.2.6. Source of Fuel for Heating and Cooling

Source of fuel for heating and cooling is provided to the site by Southern California Gas.

2.3. Adjoining Properties

The following table lists the properties adjoining the site and associated land use. Based on the nature of the adjoining properties, information available in agency databases, and observations made during our site reconnaissance, it is not likely that these properties have impacted the environmental integrity of the site at this time.

Adjoining Properties	
Location	Description
North	A parking lot used for new car storage, along with a vacant lot. Beyond these are railroad tracks and several commercial buildings,
South	Across Valley Boulevard are several commercial buildings and accompanying parking lots.
East	A commercial building and accompanying parking lot.
West	A residential house is located adjacent to the site to the west, and is surrounded by the site on the north, east, and south. A large shopping complex and several commercial buildings along with several parking lots are also located to the west of the site.

3. USER PROVIDED INFORMATION

The following sections summarize information provided by the user to assist the environmental professional in identifying the possibility of RECs in connection with the site and to fulfill the user's responsibilities in accordance with Section 6 of ASTM E1527-13. The User Questionnaire was completed by Betty Donovanik, Director of Community & Economic Development for the City of El Monte. A copy of the User Questionnaire is included in Appendix D.

3.1. Title Records

A Preliminary Title Report was not provided to Ninyo & Moore.

3.2. Environmental Liens or AULs

Ninyo & Moore was not informed of the existence of environmental liens or AULs associated with the site.

3.3. Specialized Knowledge

Ms. Donovanik provided specialized knowledge regarding the site. The City is the owner of the adjacent Metrolink Commuter Rail Station property on Railroad Street.

3.4. Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information pertaining to the site that is material to RECs in connection with the site was identified by Ms. Donovanik. According to Ms. Donovanik, the City assembled the site between 1999 and 2010.

3.5. Valuation Reduction for Environmental Issues

Information pertaining to valuation reduction was not communicated to Ninyo & Moore for the purpose of this assessment.

3.6. Owner, Property Manager, and Occupant Information

The site is currently owned by the City of El Monte.

3.7. Reason for Performing Phase I

This ESA has been completed for the exclusive use of the City of El Monte as part of their due diligence of the property.

4. PHYSICAL SETTING

The following sections include discussions of topographic, geologic, and hydrologic conditions.

4.1. Topographic Conditions

Based on a review of the United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle Map Series of the El Monte 2012 Quadrangle, the site is situated at an elevation of approximately 290 feet above mean sea level. The topography of the site generally slopes towards the west.

4.2. Geology and Soil Conditions

The site is located in the Los Angeles basin, with the San Gabriel Mountains to the north, the San Bernardino Mountains to the east, the Santa Ana Mountains to the south, and the Pacific Ocean to the west. The 1977 California Division of Mines and Geology, *Geologic Map of California*: (Jennings C.W.) shows the site to be underlain by Quaternary Alluvium Deposits (Q). Based on our review of the Environmental Data Resources Inc. (EDR) Radius Map Reports, the primary soil type beneath the site is mapped as Urban Land (EDR, 2019).

4.3. Site Hydrology

The following sections discuss the site hydrology in terms of surface water and groundwater.

4.3.1. Surface Waters

Surface waters, including ponds, streams, creeks, lagoons and other naturally-occurring bodies of water, were not observed on the site at the time of our reconnaissance.

4.3.2. Groundwater

Groundwater information for the site was not available. Ninyo & Moore reviewed the State Water Resources Control Board's GeoTracker website (GeoTracker) for groundwater information in the site vicinity. According to GeoTracker, groundwater information reported in a Semi Annual 2009 groundwater monitoring report for the 76 Station #5485 located at 3266 Santa Anita Avenue (approximately 3,240 feet southwest of the site), reported the groundwater flow direction in the site vicinity to be towards the south and the depth to groundwater was reported to be approximately 55 to 60 feet below ground surface. Groundwater depths and flow directions can vary due to seasonal variations, groundwater withdrawal or injection, and other factors.

5. RECORDS REVIEW

The following sections summarize records reviewed for the site.

5.1. Environmental Record Sources

Environmental Data Resources, Inc. (EDR) performed a computerized environmental information database search for the site and site vicinity. The EDR report included federal, state, and local databases. The review was conducted to evaluate whether or not the site or properties within the vicinity of the site have been listed as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects for the site. A summary of the environmental databases searched, their corresponding search distance, and the number of listed off-site properties of potential environmental concern to the site are presented in the following table. A copy of the EDR Radius Map Report is presented in Appendix C.

Map Findings Summary								
Database	Target Property	Search Distance (Miles)	< 1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	> 1	Total Plotted

5.1.1. Regulatory Database Listings for the Site

The following table summarizes the database listings related to the site:

On-Site Database Listings	
Site Name	DANNYS MOBIL SERVICE
Site Address	10819 E VALLEY BLVD
Database	HAZNET

Comments	The site was on the HAZNET database in 2000 for transferring 0.08 tons of an aqueous solution with total organic residues less than 10 percent. Due to the date and nature of the database listing, this is not considered a REC to the site.
-----------------	---

Site Name	BAILEY TIRE CO
Site Address	10819 E VALLEY BLVD
Database	HAZNET, RCRA-SQG, ECHO, FINDS, WIP
Comments	The site was listed on the HAZNET database in 1985 for recycling 0.4 tons of waste oil and mixed oil, and in 2008 for fuel blending 0.12 tons of an unspecified solvent mixture, and treating 1.8 tons of organic solids. Due to the date and nature of the database listing, this is not considered a REC to the site. The site was listed on the RCRA-SQG database in 1996 for being a small quantity generator of hazardous materials. Due to the date and nature of the database listing, this is not considered a REC to the site.

Site Name	SAK CONSTRUCTION, LLC
Site Address	3649 EL MONTE AVENUE
Database	RCRA NonGen / NLR
Comments	The site was listed on the RCRA NonGen/ NLR database in 2018 for handling but not generating hazardous materials. Due to the date and nature of the database listing, this is not considered a REC to the site.

Site Name	O H KRUSE GRAIN & MILLING
Site Address	3730 MONTEREY AVE
Database	LUST, WIP, SWEEPS UST, HIST CORTESE
Comments	The site is listed on the Leaking Underground Storage Tank (LUST) database for gasoline potentially contaminating the soil. The case was opened in November 1989 and after remediation and clean up activities were completed to the satisfaction of the regulatory agency which included the excavation and disposal of the contaminated soil, the case was closed in July 1991. Due to the closed status of the case, and the absence of current contamination controls this is considered an HREC.

Site Name	O H KRUSE GRAIN & MILLING
Site Address	3730 MONTEREY AVE
Database	CIWQS, CERS, CA FID UST
Comments	The site was listed on the CIWQS database for having an industrial stormwater plan from April 1992 to August 1998. The site was listed on the CERS database for a leaking underground storage tank cleanup site. This contamination is addressed in the database listing above.

5.1.2. Regulatory Database Listings for Off-Site Properties

Off-site properties/facilities listed in the **Map Findings Summary** table above were evaluated as to their potential to impact soil, soil vapor, and/or groundwater at the site. The following table presents the properties/facilities that were interpreted to represent a potential environmental concern to the site, based on their proximity to the site, the nature of the database on which they are listed, and/or the assumed direction of groundwater flow in the site vicinity (south).

Facilities of Potential Concern	
Site Name	O H KRUSE
Site Address	10821 RAILROAD ST
Distance from Site	75 feet
Direction from Site	North and upgradient
Database	LUST, CERS, HIST CORTESE, EMI
Comments	This property is listed on the Leaking Underground Storage Tank (LUST) database for aviation fuel potentially contaminating the soil. The case was opened in April 1996 and after sufficient remediation and clean up activities, including the excavation and disposal of the contaminated

Comments	<p>soil, the case was closed in April 1996. Due to the closed status of the case, the distance from the site, and the media affected (soil), this is not considered a REC to the site.</p> <p>The site was listed on the EMI database in 1990 for emitting one ton of Oxides of Nitrogen (NOX), four tons of particulate matter, and one ton of particulate matter 10 micrometers and smaller, and in 1995 for emitting nine tons of total organic hydrocarbon gases, seven tons of reactive organic gases, one ton of NOX, four tons of particulate matter, and three tons of particulate matter 10 micrometers and smaller. Due to the date and nature of the database listing, this is not considered a REC to the site.</p>
-----------------	---

Site Name	AT & T COMMUNICATION
Site Address	3640 EL MONTE AVE
Distance from Site	80 feet
Direction from Site	SSE and crossgradient
Database	LUST, CERS, HIST CORTESE, UST, AST, HIST UST, RCRA NonGen / NLR, SWEEPS UST, CA FID UST, CERS HAZ WASTE, CERS, CERS TANKS
Comments	<p>This property is listed on the Leaking Underground Storage Tank (LUST) database for diesel potentially contaminating the soil. The case was opened in March 1990 and after remediation and clean up activities were completed to the satisfaction of the regulatory agency, which included the excavation and disposal of the contaminated soil, the case was closed in December 1992. Due to the closed status of the case, the distance from the site, the crossgradient relationship with the site, and the media affected (soil), this not considered a REC to the site.</p> <p>This property is listed on the HIST UST database for a 10,000 gallon diesel underground storage tank (UST) that was installed in 1970. This not considered a REC to the site.</p> <p>This property is listed on the RCRA NonGen / NLR database for handling but not generating hazardous waste. This not considered a REC to the site.</p> <p>This property is listed on the CERS database in 2016 for the piping of the UST failing to meet regulations, in 2017 for failing to comply with the UST permit regulations, failing to have a UST monitoring plan on site, and failing to implement or maintain a written agreement between the UST permit holder and the operator. This not considered a REC to the site.</p>

5.2. Additional Environmental Record Sources

To enhance and supplement the standard environmental record sources identified in Section 5.1, additional local and/or federal, state, or tribal records shall be checked when, in the judgement of the EP, such additional records (1) are reasonably ascertainable, (2) and sufficiently useful, accurate, and complete in light of the objective of the records review. Examples of additional record sources include department of health/environmental division, fire department, planning/building department, or local/regional water quality agencies. Ninyo & Moore contacted the following additional record sources:

- Los Angeles County Department of Public Works (LADPW)
- South Coast Air Quality Management District (SCAQMD)
- California Regional Water Quality Control Board (RWQCB)
- California Department of Toxic Substances Control (DTSC)
- State of California, Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR)

Descriptions of these agencies are provided in Sections 5.2.1 through 5.2.3 below.

5.2.1. State/County Environmental Record Sources

The RWQCB was contacted regarding hazardous materials or hazardous wastes records associated with the site, through the RWQCB GeoTracker database. The RWQCB had records on file for the site address. According to RWQCB files, the site is listed on the Leaking Underground Storage Tank (LUST) database for gasoline potentially contaminating the soil. The case was opened in November 1989 and after remediation and clean up activities were completed to the satisfaction of the regulatory agency, which included the excavation and disposal of the contaminated soil, the case was closed in July 1991. Due to the closed status of the case, and the absence of current contamination controls, this closed LUST case is considered an HREC.

The DTSC was contacted regarding hazardous materials or hazardous wastes records associated with the site, through the DTSC EnviroStor database. The DTSC had no records on file for the site.

5.2.2. Local Record Sources

Los Angeles County Department of Public Works (LADPW):

Ninyo & Moore reviewed the LADPW documents pertaining to the site. The historical research focused on review of permits that documented conditions that constitute evidence of RECs associated with the site (such as underground storage tanks [USTs], boiler tanks, wells, ASTs, etc.) According to the LADPW documents, in January 1996 a 10,000-gallon UST was removed from the site by O.H. Kruse Grain & Milling. The tank removal report was completed by Atlas Environmental Engineering Inc (ATLAS). After the removal of the tank was complete seven soil samples were taken from the vicinity of the tank; two from the soil in the tank pit (T1 and T2), two from the soil under the piping (PL1 and PL2), two from the soil under the dispenser (D1-4 and D1-6.5), and one from the soil stockpile (SP1). Due to the high concentrations of Total Petroleum Hydrocarbons - diesel (TPHd) found in D1-4, O.H. Kruse over-excavated the area in an effort to remove all potentially contaminated soil. After the excavation, ATLAS collected five verification samples (SN, SS, SW, SE, and CB). Since three of the samples exhibited significant TPHd, the excavation was widened and three additional samples were taken (SW-B, SS-B, and SE-B). These samples indicated no detectable contamination. ATLAS concluded that, since the tank pit samples indicated no contamination and the piping samples revealed only very low levels of contamination, along with the over-excavation of the contaminated soil, and the less than detectable results from the verification samples, no further environmental work was warranted on the site. Due to the closed nature of the case, no remaining contamination, and the lack of current environmental controls due to the past contamination, the removed UST is considered to be a HREC.

South Coast Air Quality Management District (SCAQMD):

Ninyo & Moore reviewed SCAQMD's Facility Information Detail (FIND) website (<http://www.aqmd.gov/>) for information regarding the site. According to the FIND website, records were not found for the site.

5.2.3. Gas & Oil Maps

According to the DOGGR Online Mapping System, the site does not lie within the administrative boundaries of an oil field and no oil or gas wells are located on the site.

5.3. Historical Use Information

Ninyo & Moore conducted a historical record search for the site. This included a review of one or more of the following resources that were found to be both reasonably ascertainable and useful for the purposes of this ESA: historical aerial photographs, historical fire insurance maps, historical topographic maps, land use records, and interviews with property representatives. Although one or more of the sources listed above provided limited information regarding the historical use of the site, the information gathered from the sources reviewed as a whole is adequate to develop a history of the previous uses of the site and the surrounding area in accordance with Section 8.3 of ASTM E1527-13. The following sections summarize information obtained from the historical sources utilized for this assessment. The following table provides a list of historical sources reviewed for this ESA. Copies of historical research documentation, such as fire insurance maps, historical aerial photographs, and topographic maps, are provided in Appendix E.

Historical Use Information		
Data Type	Year(s)	Data Limitations
EDR Aerial Photo Decade Package (Inquiry Number 5760994.8S) Ship Date: August 23rd, 2019	1928, 1938, 1948, 1952, 1954, 1964, 1977, 1979, 1989, 1994, 2002, 2005, 2009, 2012, 2016	
EDR City Directory Abstract (Inquiry Number 5760994.5S) Ship Date: August 22nd, 2019	1920, 1921, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1942, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1954, 1955, 1956, 1957, 1958, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1969, 1970, 1971, 1972, 1975, 1976, 1980, 1981, 1985, 1986, 1990, 1991, 1992, 1995, 1996, 1999, 2000, 2001, 2003, 2004, 2006, 2010, 2014

EDR Sanborn Map Search/Print (Inquiry Number 5760994.3S) Ship Date: August 21st, 2019	1908, 1920, 1925, 1932	

5.3.1. Sanborn Fire Insurance Maps

Ninyo & Moore requested historic fire insurance rate maps (Sanborn Maps) of the site through EDR. Sanborn Fire Insurance Rate Maps for the site and surrounding areas were

available for review. A summary of the Sanborn Maps reviewed is presented in the following table. A copy of the Sanborn Map Report is included in Appendix E.

Summary of Sanborn Map Listings		
Year(s)	Site Comments	Adjoining Area Comments
1908	The northern portion of the site is unmapped. The eastern portion of the site is mapped with two storage sheds, and the southern portion of the site is mapped with a residential house. Depot Street is mapped bisecting the site in the western portion of the site, on a north-south axis.	The area to the west of the site is unmapped. Several residential houses are mapped to the south of the site, and a church and residential house are mapped to the southeast. A vegetable packing warehouse and a walnut packing warehouse are mapped to the north of the site. Several railroad tracks are mapped to the north of the site.
1920	Three residential houses are mapped on the western portion of the site, two in the southern portion, and one in the eastern portion of the site. Two storage sheds are mapped in the southern portion of the site. Lodge's Oil Depot is mapped in the northern portion of the site including four above ground tanks, an auto storage building, and an office building.	Three residential houses and three storage sheds are mapped to the west of the site. CC Stafford's Warehouse used for flour, grain and canned goods, is mapped to the north of the site. Standard Oil Co's Depot including two above ground tanks, an oil warehouse, an auto storage building, and a storage building, are mapped to the east of the site. Several additional residential houses and storage sheds and garages are mapped to the south of the site.
1925	One of the residential houses in the western portion of the site is replaced with three additional residential houses and storage sheds. Four additional residential houses as well as three additional auto storage buildings are mapped in the southern portion of the site. Lodge's Oil Depot is labelled as Shell Oil Co's Depot. The auto storage building that was part of Lodge's Oil Depot is no longer mapped. Kings Court road is mapped in the northwestern portion of the site intersecting with Depot Street.	Several additional residential houses and accompanying storage sheds and garages, are mapped to the west, southwest, and south of the site.
1932	One of the residential houses in the eastern portion of the site is no longer mapped. The Shell Oil Co's Depot is no longer mapped and is replaced with an auto storage building. Depot Street is renamed to Monterey Avenue. Court Adair road is mapped on the western portion of the site, intersecting with Monterey Avenue.	The vegetable packing warehouse is no longer mapped to the north of the site.

5.3.2. Historical Aerial Photographs

Ninyo & Moore reviewed historical aerial photographs of the site provided by EDR. A listing of the photographs reviewed is presented in the following table. Copies of the historical aerial photographs are provided in Appendix E.

Summary of Aerial Photographs			
Year(s)	Source	Site Comments	Adjoining Area Comments
1928	EDR	Several residential houses are noted in the southern and western portions of the site. A road is bisecting the site in the western portion in a north-south axis, with two roads branching off to the west.	Several residential houses are noted to the west, south, and east of the site. Several smaller buildings and storage tanks are noted to the east of the site. Several train tracks are noted to the northeast of the site, along with four industrial buildings. A road is mapped to the east and north of the site.

Year(s)	Source	Site Comments	Adjoining Area Comments
1938	EDR	A round building is noted in the center of the site, and a large warehouse building is noted in the northeastern portion of the site.	The small buildings and storage tanks are no longer mapped and are replaced with a vacant lot. One of the industrial buildings to the northeast of the site is no longer mapped.
1948	EDR	The round building and large warehouse building are no longer noted and have been replaced by a large building in the northeast corner of the site. Several residential houses in the southern portion of the site are replaced with a commercial building.	Several additional residential houses are noted to the west and east of the site. Three of the industrial buildings to the northeast of the site are no longer noted. The vacant lot is noted to be replaced by several residential houses and small buildings.
1952	EDR	No significant changes noted.	Four residential houses to the south of the site are no longer noted and are replaced with a parking lot.
1954	EDR	No significant changes noted.	No significant changes noted.
1964	EDR	A residential house in the western portion of the site is no longer present and the area is noted to be a vacant lot.	Several residential houses to the west, southwest, south, southeast, and east are replaced with commercial buildings and accompanying parking lots. The residential buildings to the west of the site are no longer noted and are replaced with a vacant lot.
1977	EDR	The vacant lot in the western portion of the site is used as a parking lot.	The vacant lot to the east of the site is replaced with a large commercial building and an accompanying parking lot. The remaining houses to the south of the site are replaced with a commercial building and an accompanying parking lot.
1979	EDR	No significant changes noted.	No significant changes noted.
1989	EDR	The northwest corner of the site is noted to be used as storage and a laydown yard for an on-site building.	Several residential houses to the north west of the site are no longer noted and are replaced with an industrial building and storage yard.
1994	EDR	No significant changes noted.	A large parking lot is noted to the northeast of the site.
2002	EDR	No significant changes noted.	The remaining industrial building to the north of the site is noted to be replaced with a parking lot and an additional industrial building.
2005	EDR	No significant changes noted.	No significant changes noted.
2009	EDR	A residential house in the western portion of the site is no longer noted and is replaced with a vacant lot.	No significant changes noted.
2012	EDR	No residential houses remain on the site. Only the large industrial building in the northern portion and a small building in the southern portion of the site remain.	Only a single residential house remains to the west of the site, the rest of the area is a vacant lot.
2016	EDR	No significant changes noted.	The vacant lot to the west of the site is noted to be replaced with a large shopping complex, as well as several smaller commercial buildings, and an accompanying parking lot.

5.3.3. City Directories

Ninyo & Moore reviewed historical city directory listings for the site addresses to evaluate facilities of potential concern, which may have been historically located on the site. A summary of notable city directory listings is presented in the following table, and the EDR City Directory abstract is provided in Appendix E.

Summary of City Directory Listings	
Year(s)	Notable Listings in Address Range of Site
1920-1965	221 El Monte Avenue: Address not listed 3637 El Monte Avenue: Address not listed 3645 El Monte Avenue: Address not listed 3704 Monterey Avenue: Address not listed 3713 Monterey Avenue: Address not listed 3716 Monterey Avenue: Address not listed 3730 Monterey Avenue: Address not listed 10819 Valley Boulevard: Address not listed

5.3.4. Historical Topographic Maps

Ninyo & Moore reviewed historical topographic maps of the site provided by EDR. A listing of the maps reviewed is presented in the following table. Copies of the historical topographic maps are provided in Appendix E.

Summary of Topographic Maps		
Year(s)	Quadrangle	Site Comments
1894	Los Angeles	The site is mapped as vacant.
1896	Pasadena	No significant changes noted.
1900	Pasadena, Los Angeles	No significant changes noted.
1923	El Monte	Twelve buildings are mapped on the southern portion of the site.
1926	El Monte	No significant changes noted.
1948	El Monte	A building is mapped on the central portion of the site, along with a large industrial building. One of the buildings on the southern portion of the site is no longer mapped.
1953	El Monte	No buildings are mapped on the site. The site is mapped as urban land.
1966	El Monte	No significant changes noted.
1972	El Monte	No significant changes noted.
1981	El Monte	No significant changes noted.
1991	El Monte	No significant changes noted.
1994	El Monte	No significant changes noted.
2012	El Monte	No buildings are mapped on the 2012 topographic map.

5.3.5. Title Records

A historical chain-of-title report was not requested by the Client for review by Ninyo & Moore during the completion of this report.

5.3.6. Recorded Environmental Liens and AULs

An environmental lien search report was not requested by the Client for review by Ninyo & Moore during the completion of this report.

5.3.7. Previous Investigations

Santa Fe Trail Plaza Project Area B Phase I ESA: In June 2006, The Source Group Inc. (SGI) completed a Phase I ESA of a portion (Project Area B) of the proposed Santa Fe Trail Plaza redevelopment. Project Area B consisted of the site and the shopping complex to the west. SGI concluded that the former Bailey Tire Company property could potentially have contamination from hydraulic fluid and waste oil/solvents from the former uses of the property and that the former O.H. Kruse Grain & Milling property could potentially have contamination from petroleum hydrocarbons from the former underground storage tank (UST). Based on this information, SGI stated that the potential impacts to the Site from these threats had been adequately assessed and reasonably eliminated.

O.H. Kruse Grain & Milling LUST Site: The site, specifically the O.H. Kruse Grain & Milling property, is listed on the Leaking Underground Storage Tank (LUST) database for a gasoline leak potentially contaminating the soil. The case was opened in November 1989 and after remediation and clean up activities were completed to the satisfaction of the regulatory agency, which included the excavation and disposal of the contaminated soil,

the case was closed in July 1991. Due to the closed status of the case on the site, and the absence of residual contamination or current contamination controls, the closed UST case is considered an HREC.

O.H. Kruse Grain & Milling LUST Site: According to the LADPW documents, in January 1996 a 10,000-gallon UST was removed from the site by O.H. Kruse Grain & Milling. The tank removal report was completed by Atlas Environmental Engineering Inc (ATLAS). After the removal of the tank was complete seven soil samples were taken from the vicinity of the tank; two from the soil in the tank pit (T1 and T2), two from the soil under the piping (PL1 and PL2), two from the soil under the dispenser (D1-4 and D1-6.5), and one from the soil stockpile (SP1). Due to the high concentrations of Total Petroleum Hydrocarbons - diesel (TPHd) found in D1-4, O.H. Kruse over-excavated the area in an effort to remove all potentially contaminated soil. After the excavation, ATLAS collected five verification samples (SN, SS, SW, SE, and CB). Since three of the samples exhibited significant TPHd, the excavation was widened and three additional samples were taken (SW-B, SS-B, and SE-B). These samples indicated no detectable contamination. ATLAS concluded that, since the tank pit samples indicated no contamination and the piping samples revealed only very low levels of contamination, along with the over-excavation of the contaminated soil, and the less than detectable results from the verification samples, no further environmental work was warranted on the site. Due to the closed nature of the case, no remaining contamination, and the lack of current environmental controls due to the past contamination, this facility is considered to be an HREC. A copy of the ATLAS tank removal report is included in Appendix D.

Bailey Tire Company Phase II ESA: In August 2008 The Source Group Inc (SGI) prepared a Phase II ESA for the former Bailey Tire Company property based on the results of a June 2006 Phase I ESA. Five soil borings were advanced on the property to a depth of 20 feet, with four located at the main areas of concern within the building, and one located outside the building. Soil cores were collected in two foot segments at five foot depth intervals, and sent to the lab for analysis. In three of the borings, soil-vapor probes were installed at depths of 5 and 15 feet. Low levels of Tetrachloroethylene (PCE) and toluene were detected in all of the soil-gas samples. None of the soil samples had detectable Total Petroleum Hydrocarbons (TPH), and only two soil samples contained Volatile Organic Compounds (VOCs). Arsenic was detected in all of the soil samples analyzed for total metals. Benzene, Acetone, other metals, and Ethylene Glycol were all found in certain soil samples, however all of the concentrations were below the California-modified Preliminary Remediation Goals. SGI concluded that regulated compounds had been released on the property and that although only low levels of the analytes were found in the soil and soil-gas, the releases of the analytes signify that there will likely be "hot spots" that were not identified during the investigation. SGI also warned that the investigation was limited in

scope and that care should be taken during any future construction activities because there is a great likelihood that adverse conditions exist beneath the property. Due to the presence of residual contamination on the site, this is considered a REC. A copy of SGI's Phase II ESA is included in Appendix D.

Bailey Tire Company Asbestos Abatement, Lead Abatement, and Demolition: In October 2017 Ellis Environmental Management Inc. (Ellis) completed an Asbestos and Lead Abatement survey on the former Bailey Tire Company along with several other properties. The survey found asbestos containing 9" by 9" floor tile and mastic, approximately 600 sq ft, and asbestos containing roofing mastic, approximately 40 sq ft. Samples taken of the asbestos containing material (ACM) were reportedly below OSHA and EPA clearance levels. A copy of Ellis's Asbestos and Lead Abatement report is included in Appendix D.

5.4. Adjoining Property Use Information

Adjoining properties were described in Section 2.3. Based on our site visit and review of agency files, none of the adjoining properties are considered to have impacted the site at this time.

6. PRELIMINARY VAPOR ENCROACHMENT SCREENING

Ninyo & Moore conducted a preliminary vapor encroachment screen (pVES) for potential chemicals of concern (COC). The pVES was based on the guidelines presented in the ASTM E2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The purpose of the pVES was to identify a vapor encroachment condition (VEC), which is the presence or likely presence of COC vapors in sub-surface soils at the site as a result of a release of vapors from contaminated soil or groundwater either on or near the site. The potential for VECs beneath the site was evaluated using a Vapor Encroachment Screening Matrix (VESM). The VESM included performing a Search Distance Test to identify if there are any known or suspected contaminated sites surrounding or upgradient of the site within specific search radii, a COC Test (for those known or suspect contaminated sites identified within the Search Distance Test) to evaluate whether or not COC are likely to be present, and a Critical Distance Test to evaluate whether or not COC in a contaminated plume may be within the critical distance of the site (100 feet for non-petroleum hydrocarbon contaminants, and 30 feet for petroleum hydrocarbon contaminants).

Based on the completion of the VESM, it is presumed unlikely that a VEC currently exists beneath the site. A copy of the VESM is included in Appendix F.

7. INTERVIEWS

Interviews were conducted by Ninyo & Moore with the objective of obtaining information regarding potential environmental concerns in connection with the site.

7.1. Owner or Key Site Manager

The City of El Monte owns the site.

7.2. Past Owners

Past ownership entities were not made available to Ninyo & Moore during the preparation of this ESA. Therefore, interviews with past site owners were not conducted.

7.3. Environmental Regulatory Agency Inquiries

Ninyo & Moore submitted Public Records Requests for the site address to County, State and Local environmental regulatory agencies. The following sections describe the agencies contacted and whether or not representatives from the agencies were interviewed.

7.3.1. State/County Environmental Agencies

Ninyo & Moore reviewed the DTSC's online EnviroStor database for records pertaining to the site address. The DTSC indicated that they had no records for the site address. Based on this information, interviews were not conducted with DTSC representatives.

Ninyo & Moore reviewed the RWQCB's online GeoTracker database for records pertaining to the site address. The RWQCB indicated that they had records for the site address. All relevant site information was found on the online GeoTracker database. Based on this information, interviews with RWQCB representatives were deemed unnecessary.

7.3.2. Local Environmental Agencies

Local regulatory agencies were contacted during the preparation of this report.

The LADPW was contacted through their online database and reviewed all documents pertaining to the site address. Based on this information, interviews with LADPW representatives was deemed unnecessary.

The SCAQMD was contacted through their online database. No documents pertaining to the site address were found. Bases on this information, interviews were not conducted with SCAQMD representatives.

8. ASTM NON-SCOPE CONSIDERATIONS

Non-Scope considerations such as mold, radon, wetlands, asbestos, or flood zones were not addressed as part of this report.

9. FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

The following findings, opinions, conclusions and recommendations are provided.

9.1. Findings

- Historical research revealed that the site was developed in the early 1900s with a residential house and two storage sheds. In 1910, six residential houses, two storage sheds, along with Lodge's Oil Depot were built on the site. In the 1920s, seven additional residential houses, three storage sheds, and three auto storage sheds were added to the site. A residential house and an auto storage building were removed from the site around the same time. Additionally, Lodge's Oil Depot was renamed Shell Oil Co's Depot. In the early 1930's Shell Oil Co's Depot was removed from the site and was replaced with an auto storage building. In the late 1930s, a large warehouse and a small round building were constructed on the site, and by the late 1940s, both buildings had been replaced with an even larger warehouse building belonging to O.H. Kruse Grain & Milling. A commercial building was also constructed on the southern portion of the site in the 1940s. Between the 1940s and 2012, the residential houses along with the storage sheds and auto storage buildings were demolished until by 2012, no residential buildings remained on the site. The two remaining buildings, the large warehouse as well as the commercial building belonging to Bailey Tire Company, were removed from the site in 2017. The site remained vacant from 2017 to the present.
- On September 25, 2019, Ms. Linda Ton of Ninyo & Moore, conducted a site reconnaissance of the property. The reconnaissance involved a visual inspection of the site, and observations of adjoining properties. Mr. David F Gondek with Olivarez Mardruga Lemieux O'Neil (representing the city of El Monte) escorted Ms. Ton around the property during the site reconnaissance. At the time of the reconnaissance, the approximate 4.8-acre site was vacant.
- The areas surrounding the site consist primarily of retail/commercial buildings to north, east, south, and west.
- Based on our site visit, there are currently no wells on the site.
- Ninyo & Moore did not observe quantities of hazardous substances or petroleum products used or stored on site during our site reconnaissance.
- Indications of aboveground storage tanks (ASTs), underground storage tanks (USTs), or hazardous material spills or leaks, were not observed during the site reconnaissance.
- Four pole-mounted transformers were observed on the site. Signs of leaks or staining were not observed.
- Review of an environmental database report obtained for this project indicated that the site is listed on several of the regulatory databases researched by Environmental Data Resources Inc. (EDR), including the HAZNET, RCRA-SQG, ECHO, FINDS, WIP, RCRA NonGen, LUST, SWEEPS UST, HIST CORTESE, CIWQS, CERS, and CA FID UST databases. The site is listed on the Leaking Underground Storage Tank (LUST)

database for gasoline potentially contaminating the soil. The case was opened in November 1989, and after remediation and clean up activities were completed to the satisfaction of the regulatory agency, which included the excavation and disposal of the contaminated soil, the case was closed in July 1991. Due to the closed status of the case, and the absence of current contamination controls, the closed LUST case is considered an HREC.

- The site has had five previous investigations completed: Santa Fe Trail Plaza Project Area B Phase 1 ESA, two former O.H. Kruse Grain & Milling LUST Sites, and the Phase II ESA and Asbestos Abatement, Lead Abatement, and Demolition Survey for the former Bailey Tire Company.
- **O.H. Kruse Grain & Milling LUST Site:** According to the LADPW documents, in January 1996 a 10,000-gallon UST was removed from the site by O.H. Kruse Grain & Milling. The tank removal report was completed by Atlas Environmental Engineering Inc (ATLAS). ATLAS concluded that, since the tank pit samples indicated no contamination and the piping samples revealed only very low levels of contamination, along with the over-excavation of the contaminated soil, and the less than detectable results from the verification samples, no further environmental work was warranted on the site. Due to the closed nature of the case, no remaining contamination, and the lack of current environmental controls due to the past contamination, this closed LUST case is considered to be a HREC. A copy of the ATLAS tank removal report can be found in Appendix D.
- **Bailey Tire Company Phase II ESA:** In August 2008, The Source Group Inc (SGI) prepared a Phase II ESA for the former Bailey Tire Company property after an initial Phase I ESA in June 2006, deemed it necessary. SGI concluded that regulated compounds had been released on the property and that although only low levels of the analytes were found in the soil and soil-gas, the releases of the analytes signify that there will likely be "hot spots" that were not identified during the investigation. SGI also warned that the investigation was limited in scope and that care should be taken during any future construction activities because there is a great likelihood that adverse conditions exist beneath the property. Due to the presence of residual contamination on the site, and no apparent case closure letter, the former Bailey Tire Company facility is considered a REC. A copy of SGI's Phase II ESA is included in Appendix D.
- **Bailey Tire Company Asbestos Abatement, Lead Abatement, and Demolition:** In October 2017, Ellis Environmental Management Inc (Ellis) completed an Asbestos and Lead Abatement survey on the former Bailey Tire Company along with several other properties. The survey found asbestos containing 9" by 9" floor tile and mastic, approximately 600 sq ft, and asbestos containing roofing mastic, approximately 40 sq ft. Samples taken of the asbestos containing material (ACM) were below OSHA and EPA clearance levels. A copy of Ellis's Asbestos and Lead Abatement report is included in Appendix D.

- Several off-site facilities were located within the EDR search radius from the site. None of the listed facilities are considered to be a REC to the site at this time based on several factors, including distance from the site, location relative to the regional groundwater flow direction (e.g. hydraulically downgradient or crossgradient to the site), database listing type, and affected media (soil only). Refer to Section 5.1.2 for additional information regarding potential off site facilities of concern.
- Based on the completion of the Vapor Encroachment Condition (VEC) screening matrix, it is presumed unlikely that a VEC currently exists beneath the site.
- An environmental lien or activity and use limitations (AULs) search was not requested for this ESA.
- An asbestos and lead survey was beyond the scope of this investigation.

9.2. Conclusions

Ninyo & Moore has performed this ESA in conformance with the scope and limitations of ASTM E1527-13 of the Area Y property located at 10819 Valley Boulevard in El Monte, California. Based on the information compiled during the preparation of this report, this assessment has revealed no evidence of RECs in connection with the site with the exception of the following:

- In August 2008 The Source Group Inc (SGI) prepared a Phase II ESA for the former Bailey Tire Company property based on the results of a June 2006 Phase I ESA. Five soil borings were advanced on the property to a depth of 20 feet, with four located at the main areas of concern within the building, and one located outside the building. Soil cores were collected in two foot segments at five foot depth intervals, and sent to the lab for analysis. In three of the borings, soil-vapor probes were installed at depths of 5 and 15 feet. Low levels of Tetrachloroethylene (PCE) and toluene were detected in all of the soil-gas samples. None of the soil samples had detectable Total Petroleum Hydrocarbons (TPH), and only two soil samples contained Volatile Organic Compounds (VOCs). Arsenic was detected in all of the soil samples analyzed for total metals. Benzene, Acetone, other metals, and Ethylene Glycol were all found in certain soil samples, however all of the concentrations were below the California-modified Preliminary Remediation Goals. SGI concluded that regulated compounds had been released on the property and that although only low levels of the analytes were found in the soil and soil-gas, the releases of the analytes signify that there will likely be "hot spots" that were not identified during the investigation. SGI also warned that the investigation was limited in scope and that care should be taken during any future construction activities because there is a great likelihood that adverse conditions exist beneath the property. Due to the presence of residual contamination on the site, and no apparent case closure letter, the former Bailey Tire Company facility is considered a REC. A copy of SGI's Phase II ESA is included in Appendix D.

9.2.1. RECs

RECs were identified during the preparation of this report. In August 2008 The Source Group Inc (SGI) prepared a Phase II ESA for the former Bailey Tire Company property based on the results of a June 2006 Phase I ESA. SGI concluded that regulated compounds had been released on the property and that although only low levels of the analytes were found in the soil and soil-gas, the releases of the analytes signify that there will likely be "hot spots" that were not identified during the investigation. SGI also warned that the investigation was limited in scope and that care should be taken during any future construction activities because there is a great likelihood that adverse conditions exist beneath the property. Due to the presence of residual contamination on the site and no apparent case closure letter, the former Bailey Tire Company facility is considered a REC. A copy of SGI's Phase II ESA is included in Appendix D.

9.2.2. CRECs

CRECs were not identified during the preparation of this report.

9.2.3. HRECs

The following HRECs were identified during the preparation of this report.

- The site was listed on the LUST database for a gasoline leak that affected the soil. The case was closed in July 1991. Due to the closed status of the O.H. Kruse Grain and Milling Property, and the absence of residual contamination or current contamination controls, this facility is considered an HREC.
- Due to the closed nature of the 10,000-gallon UST from the former O.H. Kruse Grain and Milling property, no remaining contamination, and the lack of current environmental controls due to the past contamination, the closed UST is considered to be a HREC.

9.2.4. De Minimis Conditions

De minimis conditions were not identified during the preparation of this report.

9.3. Recommendations

Based on the findings of this ESA, further investigation is recommended at this time due to the residual contamination on the site from the former Bailey Tire Company property, reported in the Phase II ESA completed by SGI. Further investigation and remediation is recommended to reveal the scope and quantity of the remaining contamination on the site.

9.4. Limiting Conditions/Deviations

This report was prepared in accordance with ASTM E1527-13. No deviations from the standard occurred in this ESA. Based on the information gathered by Ninyo & Moore for the purposes of this ESA, it is Ninyo & Moore's opinion the data obtained from the site reconnaissance, records reviewed, and interviews conducted, is adequate to make a

conclusion on the environmental condition of the site with respect to the existence or lack of RECs associated with the site.

10. ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

As Senior Geologist, Mr. Wheeler conducts Phase I Environmental Site Assessments and assists with the planning and implementation of Phase II soil, soil gas, and groundwater investigations. Past project types have included single-family residential developments, large-scale commercial and industrial facilities, city redevelopment areas, and large scale agricultural lands.

REPRESENTATIVE PROJECT EXPERIENCE

Santa Clara Valley Water District (SCVWD), Linear Phase I Environmental Site Assessments, Santa Clara County, California: Ninyo & Moore provided environmental services as a subconsultant to Overland, Pacific & Cutler, Inc. on behalf of the SCVWD. As Senior Project Manager, provided project coordination and implementation, field reconnaissance oversight, report preparation and oversight, project invoicing and client interactions. The project consists of conducting Phase I ESAs of approximately 140 properties along Upper Llagas Creek, which the SCVWD is proposed to purchase portions of for implementing flood protection measures.

Moffett Towers, Sunnyvale, California: Project Manager for a Phase I ESA of a 23-acre commercially-developed office property. The site was previously part of the “Plant One” facility operated by Lockheed Martin Space Systems Company (LMSSC) property. The LMSSC operated as an aerospace research, fabrication, and manufacturing facility. The intent of the investigation was to identify RECs associated with previous site uses related to the LMSSC facility and the potential impacts to the property. Ninyo & Moore did not identify any RECs associated with the site or the previous LMSSC facility that impacted the on-going or future uses of the site.

Bay Road Commercial Property, Redwood City, California: Managed and conducted a Phase I Site Assessment of an 8,900 square-foot commercial property which was previously occupied by Federal Circuits, which manufactured printed circuit boards. Federal used and stored hazardous materials and chemicals, including, but not limited to, ammonium hydroxide, sodium hydroxide, sulfuric acid, copper sulfate, sodium persulfate, solder strip with hydrogen peroxide, and solvent-based screening wash and cleaners. The chemicals were reportedly stored in above-ground tanks and drums inside the building. Wastewater generated during the circuit board manufacturing processes reportedly contained heavy metals and was directed through various subsurface pipes and trenches into a concrete sump for pH adjustment and removal of metals prior to discharge to the sanitary sewer system. The facility was closed and all equipment and chemicals were removed. Chemical-impacted concrete was excavated and removed from the site and a closure letter was issued. The site was redeveloped into a commercial heating and air conditioning business.

Former Media Dimensions Facility, Fremont, California: Project Manager for the completion of a Phase I Environmental Site Assessment of a former compact disc manufacturing facility. Media Dimensions used and stored hazardous materials and chemicals such as sulfuric acid, caustic soda, hydrogen peroxide, nitric acid, sodium hydroxide, and nickel compounds. Wastewater generated during the compact disc manufacturing processes was directed through surface piping into three concrete-lined sumps and into the holding tanks for pH adjustment and removal of metals prior to discharge to the sanitary sewer system. The facility underwent closure activities, which included decontamination of interior surfaces, machines, and tools, removal of residual sludge and wastewater from the treatment system, and collection of subsurface soil samples. The site received a “No Further Action” letter and was subsequently redeveloped into a high-performance, aftermarket automotive components sales and installation facility.

Mr. Blamer is a Principal Geologist for Ninyo & Moore. His environmental consulting experience includes managing, coordinating and directing a wide variety of environmental projects comprising numerous property types. Mr. Blamer's experience includes soil and groundwater investigation of a wide range of contaminant types, remediation of soil and groundwater, site history research and data compilation, litigation support and expert witness. He has applied his expertise to properties ranging from residential development to complex, large facilities including operations such as chemical plants and refineries. He has participated in preparation of all document types associated with environmental issues, and regularly participates in strategic development of large proposal efforts.

REPRESENTATIVE PROJECT EXPERIENCE

Alameda County Public Works Agency On-Call Environmental Services Contract, Alameda County, California: Principal-in-Charge for the ACPWA On-Call Environmental Services contract. The contract extends for four years, and includes a wide range of Environmental and Geotechnical Services, including preparation of Phase I and Phase II Environmental Site Assessments (ESAs), Remedial Action Plans (RAPs), oversight of remediation activities, Hazardous Building Material Surveys (HBMS) and oversight of hazardous material abatement activities.

City of Oakland Public Works Agency On-Call Environmental Services Contract, Oakland, California: Principal-in-Charge for the City of Oakland PWA On-Call Environmental Services contract. The scope of services for the contract includes preparation of Phase I and Phase II Environmental Site Assessments (ESAs), Remedial Action Plans (RAPs), and Soil Management Plans (SMPs).

City of Sacramento Environmental Services: Principal-in-Charge for a contract with the City of Sacramento and the Redevelopment Agency of the City of Sacramento for Environmental Site Assessment and Remediation Services. The City has been awarded three EPA Brownfields Assessment Grants and will use these funds to conduct Phase I and Phase II ESAs and remediation services for locations targeted by the City.

Oakland Unified School District, Downtown Campus, Oakland, California: Provided Principal-level oversight for this project, which involved working closely with the Department of Toxic Substances Control (DTSC) in preparing a Preliminary Site Investigation, Supplemental Site Investigation, and Remedial Action Plan for investigation and remediation of metal and petroleum impacted soil on the site property. The plan development for this site is the construction of two intermediate schools and an administrative building for the Oakland Unified School District.

Revere Copper and Brass, Commerce, California: Initially assigned as the principal field geologist for this project responsible for preparation and implementation of a Remedial Investigation (RI) work plan pursuant to a Consent Order from the DTSC. Assigned overall management of the project and client subsequent to completing the RI, including agency representation and negotiation. The project continued through the Feasibility Study (FS) and Remedial Action

REPRESENTATIVE PROJECT EXPERIENCE (CONTINUED)

Plan (RAP) stages, including an extensive Health Risk Assessment. The site was impacted by a variety of substances including metals, volatile organic compounds (VOCs), polychlorinated byphenols (PCBs) and various types of hydrocarbons. Both soil and groundwater were impacted as well portions of the facility structure. Upon acceptance of the RAP site remediation was implemented, which consisted of significant site excavation, removal of waste storage units, partial demolition of site structures, and decontamination of the facility interior. Subsequently coordinated and obtained site closure from the DTSC. A “No Action” ruling was obtained for groundwater. Provided litigation support to the site owner subsequent to site closure in support of cost recovery from their insurers. Provided several depositions pursuant to this matter which ultimately led to settlement of the claim.

Solvent Release Assessment, Murrieta, California: Lead Consultant for a soil and groundwater investigation of Perchloroethylene (PCE) release from a dry cleaning facility in a shopping center. Work was conducted on behalf of the property owner. The soil investigation consisted of soil gas survey and subsurface soil sampling to help define the vertical and lateral extent of impact. Groundwater investigation involved the placement of temporary well screens to help define the lateral extent of impact to groundwater. Based on the findings of the investigations a Corrective Action Plan (CAP) was prepared to address remediation of soil and groundwater and subsequently submitted to the Riverside County Department of Environmental Health for approval. The CAP proposed the use of dual-phase extraction, and provided a recommendation for conducting further investigation to confirm that PCE had not migrated vertically into deeper aquifers. The CAP was initiated subsequent to agency approval.

Chevron Oil Storage Facility, Manhattan Beach, California: Initially assigned as field geologist to carry out investigation of soil and groundwater, and air quality of site structures in support of redeveloping a 190-acre former crude oil storage facility into a high-end housing development. Remained with the project through its entire 15-year history through progressively more responsible roles including Senior Geologist, Project Manager and ultimately Lead Consultant. The site was identified on the California State Superfund List. Initial investigations focused on obtaining agency approval to allow development to proceed. The goal of subsequent investigations was to obtain delisting of the site from the Superfund List. Because of plans to develop the property for residential use over several years it had high-profile visibility within the community, and had the involvement of several state and local agencies including the California Department of Health Services (now the DTSC), the City Office of Manhattan Beach, the Manhattan Beach Fire Department, the Department of Real Estate, and the Regional Water Quality Control Board. Coordination with these multiple agencies posed a significant challenge to the project. Ultimately, both goals were achieved through extensive investigations and some remediation, which involved soil removal. A “No Action” ruling was obtained for groundwater. As a preventative measure against the accumulation of methane within site structures six vapor extraction systems were installed throughout the site. Subsequently went on to be the key technical person in litigation support. Provided several depositions and provided expert witness in a court hearing.

Trammel Crow Commercial Property Transfer, Various U.S.: Lead Consultant for a large property transaction involving 90+ commercial and industrial properties. Properties were leased to tenants that conducted a wide range of business operations. Initial services included providing Phase I Assessments on all properties. Findings of the Phase I program led to Phase II Assessments on many of the properties including subsurface soil and groundwater, lead, asbestos, and regulatory compliance issues. The project included assessment of whether tenants were in compliance with lease agreements relative to environmental items. Several of the properties had open environmental issues with regulatory agencies. Monitoring and remediation were conducted to satisfy regulatory agency requirements for closure of outstanding issues. The project required coordination and mobilization of resources throughout several states in the south and west for a period of approximately one year.

Toyota Motor, Long Beach, California: Project Manager for subsurface investigation of an automobile assembly facility. The investigation was conducted as part of a due diligence study on behalf of the property owner. The intent of the investigation was to identify the extent of environmental liabilities prior to putting the property on the market. The property was bordered by other industrial properties, and chemical product pipelines traversed the site subsurface. An important aspect of the project was to differentiate between impacts caused by the subject property and those resulting from surrounding properties and site easements. The investigations identified several issues that were related to offsite releases, thereby limiting the environmental liability associated with site property owner.

LUKE I. SWICKARD

EXPERIENCE HIGHLIGHTS

Phase I and II Environmental Site Assessments

Storm Water Pollution Prevention Plans (SWPPP)

Underground Telecommunication Vault Sampling

Hazardous waste handling, storage and facility auditing

PROFESSIONAL AFFILIATIONS

As a Staff Environmental Scientist, Mr. Swickard conducts Phase I Environmental Site Assessments and assists with the planning and implementation of Phase II soil, soil gas, and groundwater investigations. Past project types have included single-family residential developments, commercial facilities, city redevelopment areas, and large scale agricultural lands.

REPRESENTATIVE PROJECT EXPERIENCE

Former Richmond Hospital, Richmond, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) of the former Richmond Hospital for potential redevelopment. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) on or adjacent to the site. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Floating Photovoltaic (PV) Solar Array, Windsor, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) of a proposed floating PV solar array on an existing water treatment facility. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) adjacent to the site so that electrical infrastructure could be installed from the floating PV solar array to a collection system. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Multi-family Housing Project, Mountain View, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) on a multi-family housing complex to evaluate the potential for Recognized Environmental Conditions (RECs) on and adjacent to the site for planned redevelopment of the property. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Agricultural land, Capay Valley, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) on an approximate 310-acre agricultural property that is utilized for cattle grazing and olive orchards. The Phase I ESA was conducted to evaluate the potential for Recognized Environmental Conditions (RECs) on and adjacent to the site for on-going use of the property. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

First Aid and CPR Training

As a Staff Engineer for Ninyo & Moore, Ms. Ton assists in data acquisition, documentation, and dissemination of data related to all phases of environmental investigations and industrial hygiene services. She coordinates and performs smoke damage assessments; investigates subsurface contamination including mapping and logging of exploratory borings; performs data evaluation and statistical evaluations; conducts groundwater monitoring using a variety of methods; conducts lead-in-soil investigations; prepares correspondence, permit requests, reports, and other documents; interfaces with regulatory agencies; and provides as-needed support services for construction, site investigation, and remediation projects.

EXPERIENCE

State Farm, Smoke Damage Assessments, Los Angeles, Ventura, and Santa Barbara Counties, California:

Ms. Ton is one of a team of industrial hygienists responding to over 300 independent wildfire smoke impact assessments related to insured properties that claimed damage from the Sand Fire, La Tuna Fire, Creek Fire, and Thomas Fire. The fires burned many acres in Southern California on 2016 and 2017 and resulted in large numbers of insured homeowners filing claims for smoke, soot, and ash damage. A Ninyo & Moore Certified Industrial Hygienist (CIH) and Certified Indoor Environmental Consultant (CIEC), Mr. Stephen Waide, leads the team of industrial hygienists who perform field inspections and testing of surfaces at each insured residence for the combustion constituents soot, char and ash. Based on the results of the investigations, recommendations are provided for each residence which range from no further action needed to complete cleaning of interiors and exteriors by teams of specially trained personnel familiar with this specialized restoration work. A report for each residence is produced which includes photographs, laboratory data, methodology, observations, results, conclusions, and recommendations. Ms. Ton performs these investigations and prepares reports under the direct-supervision of Mr. Waide, CIH, CIEC.

CHUBB Insurance, Montecito Mudslide Claims, Santa Barbara County, California:

Serves as staff investigator for the assessment of several properties related to the 2018 mudslides in Santa Barbara, California. Ms. Ton performs data evaluation and prepares reports for the individual damage claims.

Los Angeles Department of Recreation and Parks, Multiple Park Locations, Lead in Soil Investigation:

Served as field staff engineer performing near surface soil sampling to evaluate over 30 parks for the presence of aerially deposited lead (ADL). Historical automobile exhaust contained lead from the combustion of leaded gasoline. ADL is commonly present in near surface soil in close proximity to old roadways as a result of historical leaded fuel use. Ms. Ton performed soil sampling at over 30 parks to help the City of Los Angeles evaluate whether ADL is a concern at their parks. Ms. Ton also supported the data evaluation, statistical evaluation, human health risk evaluation, and reporting of the sampling.

Los Angeles Unified School District, Woodlake Elementary School, Landscape Improvement Soil Investigation:

Served as field staff engineer collecting samples from soil to be used in raised planters at this elementary school in Los Angeles, California. Samples were analyzed for total petroleum hydrocarbons, volatile organic compounds, and Title 22 Metals. Results were evaluated to confirm the soil would not present a risk to students who would be in contact with the soil. Ms. Ton also supported the data evaluation and reporting of the sampling.

Linda Ton

Staff Engineer

Imperial Prison, Imperial County, California: Project Engineer during construction management support services for a prison facility located west of El Centro and north of Seeley. The purpose of our services was to assist the Construction Manager with coordination of on-site construction operations and inspection. Duties included construction management, review of bid packets, attendance at weekly construction meetings with the contractor, quality control during construction, and resolution of construction management-related questions and problems on a daily basis. These services were performed to maintain a timely and cost-effective construction schedule.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/11/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/11/2019 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAD008323693

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 12 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 18 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 04/30/2012 has revealed that there is 1 LOS ANGELES CO LF METHANE site within approximately 0.5 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

County, California. The plume also parallels the San Gabriel River to the east. It is approximately 4 miles long and 1.5 miles wide. Ground water is contaminated with trichloroethylene (TCE), perchloroethylene (PCE), and carbon tetrachloride (CTC) according to analyses by State agencies and local water companies. Many public wells in this area exceed the EPA Suggested No Adverse Response Levels (SNARL) for TCE and PCE. Approximately 200,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts per billion (ppb) of TCE and 4 ppb PCE, levels considered safe for human consumption. When alternative methods of reducing the TCE and PCE levels below such levels are not effective, wells are removed from service. Currently, three small mutual water companies have no alternate water supply and have advised their customers to use bottled water. Status June 1984): As a result of EPA's analysis of initial remedial measures, completed in December 1983, EPA will install water treatment systems to provide clean water to two of the three companies that have no alternate supply. The third company has already purchased a treatment system and will begin operation of the system soon. A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of contamination. This site, along with the three other San Gabriel Valley sites, was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Environmental Interest/Information System
SUPERFUND NPL

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate

that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Site ID: 136977
Site Name: MVA DISCOUNT TIRE CENTER INC
Violation Date: 04-11-2016
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: OBSERVATION: A hazardous materials business plan has not been received by the CUPA. The owner/operator failed to electronically submit its business plan to the statewide information management system, CERS (California Environmental Reporting System). HSC 25508(a)(1) CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately. Go to CERS internet website (<http://cers.calepa.ca.gov/>) and establish an account. After an account is created, complete CERS Online Business Plan and submit. Include: 1) Business Activities 2) Business Owner/Operator Identification 3) Hazardous Materials Inventory 4) Site Map 5) Emergency Response/Contingency Plan 6) Employee Training Plan. If you need assistance contact the Los Angeles County Fire Department Data Operations section at 323-890-4000.

FINDS:

Registry ID: 110002817943

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 03/16/2017. OBSERVATION: The annotated site map has not been completed and submitted to the CUPA. CORRECTIVE ACTION: Complete an annotated site map and submit electronically in the California Environmental Reporting System (CERS).

Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 162689
Site Name: TONY'S AUTO REPAIR
Violation Date: 01-09-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 03/16/2017. OBSERVATION: Observed 5 x 55-gallon drums of waste oil with labels but no markings. All hazardous waste containers shall be marked with the following information: 1) the words "Hazardous Waste"; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 162689
Site Name: TONY'S AUTO REPAIR
Violation Date: 01-09-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.

Violation Notes: Returned to compliance on 03/16/2017. OBSERVATION: An Emergency Response Plan and procedures has not been completed and submitted electronically to the CUPA. CORRECTIVE ACTION: Complete the emergency response plan and procedures to include all required content and submit electronically in the California Environmental Reporting System (CERS).

Site Name: TONY'S AUTO REPAIR
Violation Date: 01-09-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 03/16/2017. OBSERVATION: Copies of hazardous waste disposal records for waste oil, used filter and waste coolant] were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit the most recent copies for each waste stream to the CUPA.

Case Worker: SM
Local Agency: Not reported
RB Case Number: 106.0022
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Not reported
Site History: The site was given a "Conditional Soils Closure Only and Groundwater Monitoring Requirements" letter on December 18, 2003. Groundwater Monitoring was conducted quarterly from the 3rd quarter of 2005 to the 3rd quarter of 2006. In the most recent groundwater monitoring event (09/29/06), tetrachloroethene (PCE) concentration was measured at a maximum of 58 micrograms per liter (a%g/L). The site lies within a USEPA superfund area, where USEPA has the authority over groundwater.

Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 4
Facility Telephone: 8185754685
Facility Contact: Adrian Ondatje/John Matthews
Agency Name: SAFETY-KLEEN CORP.
Agency Address: Not reported
Agency City,St,Zip: 0
Agency Contact: Not reported
Agency Telephone: Not reported
Agency Type: Private
SIC Code: 4225
SIC Code 2: Not reported
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste: STORMS
Waste Type2: Not reported
Waste2: Stormwater Runoff
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

- . Waste code: 121
- . Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

- . Waste code: 122
- . Waste name: Alkaline solution without metals (pH > 12.5)

- . Waste code: 123
- . Waste name: Unspecified alkaline solution

- . Waste code: 131
- . Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

- . Waste code: 133
- . Waste name: Aqueous solution with 10% or more total organic residues

- . Waste code: 134
- . Waste name: Aqueous solution with <10% total organic residues

- . Waste code: 135
- . Waste name: Unspecified aqueous solution

- . Waste code: 141
- . Waste name: Off-specification, aged, or surplus inorganics

- . Waste code: 172
- . Waste name: Metal dust (see 121) and machining waste

- . Waste code: 181
- . Waste name: Other inorganic solid waste

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Contact email: NAHID.TOOSI@SAFETY-KLEEN.COM
EPA Region: 09
Land type: Private
Classification: TSDF
Description: Handler is engaged in the treatment, storage or disposal of hazardous waste
Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

- . Waste code: 121
- . Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

- . Waste code: 122
- . Waste name: Alkaline solution without metals (pH > 12.5)

- . Waste code: 123
- . Waste name: Unspecified alkaline solution

- . Waste code: 131
- . Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

- . Waste code: 133
- . Waste name: Aqueous solution with 10% or more total organic residues

- . Waste code: 134
- . Waste name: Aqueous solution with <10% total organic residues

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

- . Waste code: D001
- . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- . Amount (Lbs): 12495

Alternate City,St,Zip: EL MONTE, CA 91732
Background Info: The San Gabriel Valley Groundwater Basin is located approximately ten to twenty miles east of downtown Los Angeles in Los Angeles County. The Basin covers an area of approximately 167 square miles and represents 90% of the source of drinking water supply for over one million residents. The San Gabriel Basin also includes industrial and commercial sources as well as undeveloped areas.
Not reported
Forty-five different water purveyors extract groundwater in the Basin for use as municipal water supply. A number of additional commercial/industrial users also extract and use groundwater from the basin.
Not reported
In 1979, volatile organic compounds (VOCs) were discovered in the Baldwin Park area. Subsequent testing found that VOC contamination was widely distributed throughout the Basin, and were determined to pose a significant threat to the groundwater resources in the area.
Not reported
Contaminants of concern (COCs) originally included perchloroethylene (PCE), trichloroethylene (TCE), 1,2 dichlorethane (1,2 DCA), carbon tetrachloride (CTC). In 1997, perchlorate was discovered in the Baldwin Park area of the Basin. Since that time, 1,4-dioxane and N-nitrosodimethylamine (NDMA) have also been discovered in the groundwater of the basin. Perchlorate, NDMA and 1,4-dioxane have subsequently been added to the list of contaminants of concern.
Not reported
U.S. EPA believes that the source of this contamination initially stems from an increase in industrial activity during World War II, followed by rapid industrial and residential growth during the post-war period. Perchlorate is used in the

manufacturing of solid rocket fuels. NDMA is associated with the production of liquid rocket fuel. 1,4-dioxane has been used as a stabilizer in chlorinated solvents.

Not reported

In 1984, U.S. EPA listed the San Gabriel Groundwater Basin on the National Priority List (NPL) under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

Not reported

U.S. EPA subsequently broke the site down into "operable units" (OUs) to better focus investigative and cleanup efforts in the San Gabriel Groundwater Basin, as follows:

- o Richwood
- o Whittier Narrows
- o Suburban Water System/Bartolo Well Field
- o Baldwin Park
- o Puente Valley
- o El Monte
- o South El Monte
- o Alhambra

Not reported

For NPL sites, DTSC serves in a support role to U.S. EPA. In this capacity, DTSC provides in-depth review of data and other technical submissions, and must provide formal concurrence at each stage of the remedy selection process.

Not reported

DTSC is also responsible for assuring that state regulatory standards are met. In the case of a "fund lead" remedy, DTSC also has an obligation to pay 10% of the construction costs for the selected remedy. DTSC is also required to take over financial responsibility for operation and maintenance (O&M) of the remedy after a specified period of time (either one year or 10 years), depending on the type of remedy selected.

Not reported

CURRENT & PLANNED SITE ACTIVITIES:

Not reported

As of January 2003, U.S. EPA is conducting investigation and cleanup activities of the operable units (Baldwin Park, Whittier Narrows, Puente Valley, El Monte and South El Monte). U.S. EPA has also begun preliminary assessment of contamination in the Alhambra OU. A detailed discussion of current and planned activities at the five operable units is presented below:

Not reported

1. Whittier Narrows Operable Unit:

Not reported

The Whittier Narrows is an underground geological formation that consists primarily of stream deposited sediments which serve a channel to groundwater leaving the Basin. Most surface and groundwater leaving the San Gabriel Groundwater Basin flows naturally through the Whittier Narrows and discharges into the Central Groundwater Basin, located directly down gradient from Whittier Narrows.

Not reported

U.S. EPA's primary objective for creating the Whittier Narrows operable unit was to provide early warning should contaminants from the San Gabriel Basin pose a threat to the groundwater resources of the Central Groundwater Basin.

Not reported

Map ID

Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

SAN GABRIEL GROUNDWATER BASIN (1-4)* (Continued)

S101272771

In 1993, U.S. EPA issued a "no action" Record of Decision (ROD) for the Whittier Narrows OU which set up a groundwater monitoring program as the preferred alternative. In 1997, U.S. EPA found that VOCs in the Whittier Narrows monitoring wells had increased to concentrations approaching and/or in some cases, exceeding the maximum contaminant levels (MCLs) for VOCs. U.S. EPA subsequently made the decision to move forward with a fund-lead remedy for the Whittier Narrows operable unit.

Not reported

In November 1999, U.S. EPA amended the ROD and selected construction and operation of an 11,000 gallon per minute groundwater extraction and treatment as the preferred remedy. Groundwater was to be treated to drinking water standards and to be used to augment drinking water supplies.

Not reported

Design of the remedy was completed in March 2001. During the design process, DTSC made technical recommendations to U.S. EPA that will provide additional flexibility to the system and significantly lower the annual operations and maintenance costs.

Not reported

U.S. EPA initiated construction on the treatment plant in June 2001 and was essentially completed in May 2002. As of January 2003, U.S. EPA is in the process of finalizing a Memorandum of Agreement (MOA) with the City of Whittier to serve as operator of the plant for the first 10 years of operation. The California Department of Health Services is in the process of finalizing the drinking water permit necessary to re-use the treated water for drinking water supply.

Not reported

DTSC is contributing ten percent of the construction costs for was issued in September 1998. The selected remedy for the PVOU includes extraction, containment and treatment of contaminated groundwater in the shallow and intermediate zones at the mouth of Puente Valley.

Not reported

The ROD estimated that the remedy would cost something on the order of \$27.5 million dollars.

Not reported

U.S. EPA issued Special Notice letters to 56 potentially responsible parties (PRPs) in September 2000. RD/RA negotiations began in December 2000. A group of PRPs, lead by Northrup Grummon, will be performing the cleanup work in the intermediate zone. A second group of PRPs will be designing and implementing the remedy for the shallow zone.

Not reported

Since the ROD was issued in September 1988, both the shallow and intermediate plumes have spread. As of January 2003, U.S. EPA and the PRP groups are conducting additional site investigation activities aimed at defining the new plume boundaries in both the shallow and intermediate zones. As a result, the projected date for initiation of design phase for the intermediate zone remedy has been extended to April 2003.

Not reported

4. El Monte Operable Unit

Not reported

The El Monte OU includes portions of the cities of El Monte, Rosemead and Temple City. The El Monte OU was established to

Map ID
Direction
Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number

SAN GABRIEL GROUNDWATER BASIN (1-4)* (Continued)

S101272771

address the relatively high concentrations of volatile organic compounds (VOCs) which underlay the El Monte and South El Monte area.

Not reported

U.S. EPA issued its Record of Decision (ROD) for the El Monte OU in June 1999. The cleanup plan required that groundwater contamination in the shallow and deeper portion of the aquifer be contained so that further migration of contaminants is prevented.

Not reported

However, the discovery of perchlorate and other emergent contaminants in the El Monte OU led U.S. EPA to issue an "Explanation of Significant Difference" (ESD) in August 2002. The ESD amends the original ROD by addressing cleanup of perchlorate, NDMA and 1,4-dioxane.

Not reported

5. South El Monte Operable Unit

Not reported

The South El Monte Operable Unit includes portions of the cities of South El Monte, El Monte and Rosemead. The South El Monte Operable Unit was established in order to further protect the Whittier Narrows portion of the aquifer from migration of contaminants from the upgradient of the basin. Sampling performed by U.S. EPA has indicated that some of the shallow zone contamination and much of the intermediate zone contamination migrate in a southerly direction towards the Whittier Narrows. However, a portion of the intermediate zone contamination flows in a westerly direction.

Not reported

U.S. EPA issued the Record of Decision (ROD) for the South El Monte Operable Unit in September 2000. The preferred alternative outlined in the ROD calls for containment of groundwater contaminated with VOCs in the intermediate zone in the western portion of the South El Monte OU. The ROD assumes the southerly component of the containment will migrate into the Whittier Narrows OU, where it will be captured and treated by the Whittier Narrows extraction and treatment plant.

Not reported

However, since issuance of the ROD, perchlorate, 1,4-Dioxane, NDMA and hexavalent chromium have also been detected in the South El Monte OU, leading to a need to update the cleanup plan for the South El Monte OU as well.

Not reported

In July 1999, a group of PRPs and the San Gabriel Basin Water Quality Authority (WQA) completed construction of an "early action" remedial project known as the South El Monte Shallow Barrier Project. The Shallow Barrier Project consists of a 1000 gallon per minute (gpm) extraction and treatment system which includes treatment modules for both peroxide and 1,4-dioxane.

Not reported

In February 2001, U.S. EPA sent special notice letters to a group of 67 PRPs, initiating the beginning of RD/RA Consent Decree Negotiations. However, perchlorate, 1,4-dioxane, NDMA, and hexavalent chromium have also been detected in the South El Monte OU.

S101272771

In July 2002, a group of PRPs and three local water purveyors entered into an agreement to fund portions of the remedy. The PRPs who are signatory for this agreement will provide funding to the water suppliers to construct additional extraction wells, wellhead treatment units and other system upgrades aimed at removal and treatment of perchlorate and 1,4-dioxane.
Not reported

6. Richwood Mutual Operable Unit
Not reported

The Richwood OU was established to address contamination in two supply wells operated by the Richwood Mutual Water Company. The Richwood Mutual Water Company was a small privately owned water company, which supplied drinking water to the 250 residents in the Richwood community in South El Monte.
Not reported

In May 1984, U.S. EPA issued a Record of Decision for the Richwood OU which mandated construction of a wellhead treatment plant to service the wells operated by the Richwood Mutual Water Company.
Not reported

In 1987, U.S. EPA designed and constructed a wellhead treatment plant for the two Richwood supply wells. DTSC contributed \$150,000 to pay its 10% cost share for construction of the facility required under the Comprehensive Environmental Response Liability and Compensation Act (CERCLA).
Not reported

Construction of the Richwood wellhead treatment system was completed in 1992, and authority for operation and maintenance (O&M) was formally transferred to DTSC in 1993. In 1994 DTSC made the decision to provide the Richwood community with an alternative source of drinking water after experiencing numerous difficulties in keeping the plant operational. DTSC purchased drinking water for the community until 1999, when the San Gabriel Valley Water Company was able to provide a permanent source of drinking water for the community.
Not reported

During the period between March 1994 and December 1999, DTSC provided approximately \$379,000 in state funds for the Richwood community. In 1998, DTSC was able to provide an additional \$185,000 in state funding to perform a variety of system upgrades so that transfer of responsibility for providing drinking water to the Richwood Community could be permanently taken over by the San Gabriel Valley Water Company. This transfer took place in December 1999. This action also effectively ended the Department's financial obligation under CERCLA for O&M of the remedy.
Not reported

PRP's were ever identified for the Richwood OU. Costs for remedial efforts at Richwood came out of funding set aside for orphan share sites.
Not reported

7. Suburban Operable Unit
Not reported

In October 1986, Suburban Water Systems (SWS) contacted EPA concerning contamination in their Bartolo well field in the Whittier Narrows area. The Bartolo wells serve a population of approximately 70,000 residents in the City of Whittier.

SAN GABRIEL GROUNDWATER BASIN (1-4)* (Continued)

S101272771

Not reported

EPA subsequently identified the Suburban Water Systems/Bartolo well field as an operable unit. U.S. EPA issued the Record of Decision in 1988, and began design of a wellhead treatment plant as the selected remedy. The Design was completed in July 1991. However, in October 1991, U.S. EPA conducted additional sampling of the Suburban wells and found that VOC concentrations decreased to below the Maximum Contaminant Levels (MCLs). U.S. EPA subsequently made the decision not to move forward with construction of the remedy. In 1993 EPA amended the Whittier Narrows ROD in order to construct a monitoring well network to monitor VOC concentrations coming from the Bartolo wellfield and other upgradient sources. The 1993 amended ROD also included provisions for construction of a contingency remedy should concentrations of VOCs increase beyond the MCL level.

Not reported

DTSC and U.S. EPA have been in cost recovery negotiations since 1996 and in late 2002 received partial payment for its past cleanup costs under a settlement agreement with the two of the identified PRPs. A second settlement agreement with the remaining PRP is pending and is expected during Fiscal Year 2002/2003.

Not reported

8. WELLHEAD TREATMENT PROJECTS FUNDED BY DTSC

Not reported

DTSC has also contributed state funds for the construction of three well head treatment plants in the San Gabriel Basin:

Not reported

- o Arrowhead Wellhead Treatment Project - \$1,161,433
 - o Big Dalton Wellhead Treatment Plant - \$2,758,305
 - o City of Monrovia Wellhead Treatment Project - \$838,564
- the Whittier Narrows extraction and treatment plant and has currently set aside \$920,000 to cover these costs.

Not reported

2. Baldwin Park Operable Unit

Not reported

The Baldwin Park Operable Unit was established in order to address the most highly contaminated groundwater in the San Gabriel Basin. It includes portions of the cities of Azusa, Irwindale, Baldwin Park and West Covina.

Not reported

The March 1994 ROD identified the construction and operation of a groundwater extraction and treatment system (s) and distribution facilities capable of processing approximately 27 million gallons per day (gpm) as the preferred remedial alternative. This preferred alternative allowed for use of existing extraction wells and/or treatment systems where possible, as well as construction of new extraction wells, wellhead treatment units and/or regional extraction and treatment systems necessary to provide the desired hydrological containment.

Not reported

The 1997 discovery of perchlorate required EPA to revise its cleanup strategy. EPA issued an amended cleanup plan in May 1999, which included provisions for construction and operation of additional treatment systems to the original remedy for the

Map ID
Direction
Distance
Elevation

SAN GABRIEL GROUNDWATER BASIN (1-4)* (Continued)

S101272771

treatment of perchlorate, NDMA, and 1,4-dioxane. U.S. EPA estimated that addition of these treatment units would increase the estimated costs of the proposed remedy from \$47 million in capital costs and \$4 million per year in annual O&M costs to \$85 million in capital costs and \$10 million per year in annual O&M costs.

Not reported

In May 1997, EPA sent "Special Notice" letters to the 19 named PRPs to begin formal negotiations expected to result in a binding commitment by the PRPs, in the form of a Consent Decree, to design, construct, and operate the groundwater cleanup facilities. The negotiations were originally expected to conclude in late 1997, but were delayed following the discovery of perchlorate, NDMA, and 1,4-dioxane.

Not reported

In 1998, local support shifted to an alternative plan proposed by the Main San Gabriel Basin Watermaster (a court-appointed entity responsible for administering the water rights agreement in the San Gabriel Basin). The Watermaster Plan proposed that the treated groundwater be used locally, and that local agencies play a major role in designing, building, and operating the cleanup facilities.

Not reported

By June 2000, however, negotiation had not produced agreements between EPA and the PRPs, or between the Offering Parties and the Watermaster. EPA concluded that negotiations alone were unlikely to produce an agreement and on June 30, 2000, issued a Unilateral Administrative Order (UAO) directing the 10 PRPs to complete the remedial design and make arrangements for the construction and operation of the BPOU groundwater extraction wells, treatment systems, and related cleanup facilities.

Not reported

However, negotiations between several of the local water purveyors and a group of potentially responsible parties (PRPs) known as the "offering parties" continued after issuance of the UAO. In Fall 2000, negotiations between the PRPs and water agencies resumed, and in January 2001 a 25-page preliminary agreement was reached between six water agencies and eight of the PRPs. The agreement, known as the Memorandum of Understanding (MOU), calls for the PRPs to fund most of the cost of designing, building, and operating the groundwater extraction and treatment facilities called for in EPA's cleanup plan and for the water agencies to construct, own, and operate the facilities.

Not reported

PRP-water agency negotiations to translate the MOU into a detailed binding agreement continued throughout 2001 and early 2002. In March 2002, eight PRPs and seven water agencies signed a final comprehensive agreement. This 300-page agreement commits the PRPs to fund the design, construction, and operation of the groundwater extraction, treatment, and conveyance facilities needed to satisfy EPA's cleanup goals and meet local water supply needs. The cleanup plan requires pumping of approximately 22,000 gallons per minute of contaminated groundwater and treating it to remove contaminants at an estimated cost of \$150 to \$200 million, making the groundwater cleanup one of the largest and most expensive in

Map ID

S101272771

the United States.

Not reported

The water agencies and their contractors are completing most of the design and construction work, with EPA and PRP oversight. The remedy is being built as four subprojects, each ranging in capacity from 2,500 gallons per minute to 7,800 gallons per minute. Each subproject has or will have one or more groundwater extraction wells and a series of treatment processes expected to include air stripping, ion exchange, and advanced oxidation (ultraviolet light and hydrogen peroxide).

Not reported

The first of the four subprojects, the La Puente Valley County Water District project, has been completed and is now supplying the treated groundwater for potable use. As of May 2002, the second subproject, the San Gabriel Valley Water Company B6 project, is beginning construction. The third subproject, the Valley County Water District-Arrow/Lante subproject, is about to begin construction. The fourth and last subproject, the San Gabriel Valley Water Company B6 subproject is in the initial design phase. The San Gabriel Valley Water Company B6 subproject and the Valley County Water District subproject are expected to be completed in late 2002 or early 2003, and construction on the final subproject should be completed by mid-2003.

Not reported

3. Puente Valley Operable Unit

Not reported

The Puente Valley Operable Unit includes most of the City of Industry and portions of the City of La Puente.

Not reported

U.S. EPA presented a cleanup plan for the Puente Valley Operable Unit in January 1998. The record of Decision (ROD) for the OU 01031994

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: THE FACILITY IS IDENTIFIED AS A REFERRAL FROM USEPA. THIS FACILITY
WENT OUT OF BUSINESS IN APRIL 1990 AND WAS CONSID- ERED ABANDONED.
THE COMPANY WAS CITED FOR NUMEROUS VIOLATIONS IN THE PAST. THE SITE
ASSESSMENT AND INVESTIGA- TIONS WERE CONDUCTED IN CONJUNCTION WITH EL
MONTE FIRE DEPT, EL MONTE POLICE DEPT, LA COUNTY HEALTH DEPT AND
CALIFORNIA RWQCB. THE PRIMARY CONTAMINANTS FOUND AT THE SITE WERE
CYANIDE, CORROSIVES AND METALS. THE SITE IS CURRENTLY IN THE POST
MITIGATION STAGE. THE PREVIOUS ACTIVITIES WERE CONDUCTED UNDER THE
LEAD OF USEPA. EPA TRANSFERRED THE LEAD STATUS TO CAL-EPA. ON MARCH
4, 1992 DTSC OF CAL-EPA TRANS- FERRED THE LEAD AGENCY STATUS TO THE
COUNTY OF LOS ANGELES FIRE DEPT, HAZARDOUS MATERIALS CONTROL PROGRAM.
NO FURTHER ACTION FOR DTSC AT THIS TIME.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: N/A
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 07/02/2019
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/14/2019
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/22/2019	Source: Department of the Navy
Date Data Arrived at EDR: 03/07/2019	Telephone: 843-820-7326
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 05/10/2019
Number of Days to Update: 41	Next Scheduled EDR Contact: 08/26/2019
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/04/2019	Telephone: 703-603-0695
Date Made Active in Reports: 03/08/2019	Last EDR Contact: 05/29/2019
Number of Days to Update: 32	Next Scheduled EDR Contact: 09/09/2019
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

	Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

AREA Y
10819 VALLEY BOULEVARD
EL MONTE, CA 91731

TARGET PROPERTY COORDINATES

Latitude (North):	34.076791 - 34° 4' 36.45"
Longitude (West):	118.03716 - 118° 2' 13.78"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	404302.7
UTM Y (Meters):	3770961.0
Elevation:	290 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630799 EL MONTE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1675F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1670F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
EL MONTE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types: fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types: stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

SITE DOCUMENTATION AND REGULATORY RECORDS

PHASE I ESA QUESTIONNAIRE

Purpose: The property described below is referred hereafter as the "Site". The purpose of this questionnaire is to facilitate the Environmental Professional in conducting an Environmental Assessment of the Site on behalf of its Client. Please answer this questionnaire to the best of your ability by providing your personal as well as the institutional knowledge of your organization regarding the Site.

Site description: El Monte Successor Agency owned property generally referred to as "Area Y." Area Y is approximately 4.8 acres in size and all prior structures have been demolished. A vicinity map showing the location of Area Y in relation to surrounding lands is attached as Exhibit "A." A preliminary title report for Area Y will be separately transmitted to Ninyo & Moore during the week of September 9, 2019

Form Completed By:

Name: Betty Donovanik/David F. Gondek
Organization: City of El Monte/El Monte Successor Agency
Address: 11333 Valley Blvd, El Monte, CA 91731
Telephone Number: (626) 580-2056
Email: bdonavanik@elmonteca.gov

You are:
 The current owner
 The current occupant
 Past owner
 Past occupant

Signature: _____ **Date Completed:** _____

Are any chemicals, such as (but not limited to) hazardous materials, pesticides, herbicides, petroleum products, or hazardous waste **Currently** or **Formerly** Brought/Used/Stored on Site?
 Former use possible on lands in Site owned by Kruse Mills.

Has the site been graded or fill material ever brought onto the Site?
 UNKNOWN-Site improvements have been demolished.

Are or were Underground or Aboveground Storage Tanks **Currently** or **Formerly** Present On Site?
 Yes (Formerly)

Are you aware of any releases of hazardous materials or petroleum products onto the ground, groundwater or surface waters of the Site?
 City records are incomplete as to prior environmental assessment

Are or were there any wells, septic systems, or clarifier on the Site?: **Unknown**

Documents of Interest	Available	
	YES	NO
Do You Have Any of the Following Documents of Interest With Respect to the Site:	YES	NO
Phase I Environmental Site Assessment Reports	✓	
Phase II Environmental Site Assessment with Subsurface Investigation Reports	✓	
Environmental Audit Reports		✓
Property Information Sheet (Non-Residential properties)		✓
Environmental Permits (NPDES, industrial wastewater, solid waste, hazardous waste, etc.)		✓
Underground or Aboveground Tank Registration		✓
Hazardous Waste Generator Notices or Reports		✓
Material Safety Data Sheets (for chemicals in quantities greater than 5 gallons)		✓
Community Right-to-Know Plans		✓
Spill Prevention and Control Plans		✓
Past or Current Violation Notices at the Site		✓
Environmental Liens on the Site		✓
Geotechnical Investigations or Studies		✓
Other Reports Available reports described in Exhibit "B"		✓

Knowledge With Respect to the Subject Property	Knowledge	
	YES	NO
Do You Possess Knowledge Regarding Any of the Following with Respect to the Subject Site:	YES	NO
Pending, Threatened, Past Litigation Involving Hazardous Materials/Petroleum Products		✓
Pending, Threatened, Past Admin. Proceedings Involving Hazardous Materials/Petroleum Products		✓
Government Notice of Violation of Environmental Laws		✓
Government Notice of Possible Liability Involving Hazardous Materials/Petroleum Products		✓

Please return this completed form via email or mail to Patrick Cullip, pcullip@ninyoandmoore.com

PHASE I ESA/AAI REQUIREMENTS

According to the All Appropriate Inquiry (AAI, 40 CFR 312) requirements and ASTM (E 1527-13) guidance on conducting Phase I Environmental Site Assessments, the "user" of the assessment must provide the following information, if available, to the environmental professional in order to qualify for Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001. Please check yes or no and provide any additional information you may have regarding the site. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 132.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

Yes No

If yes, please explain:

(2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any activity use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes No

If yes, please explain:

(3) Specialized knowledge or experience of the person/department requesting the Phase I ESA and seeking to qualify for the landowner liability protections (40 CFR 312.28).

As the user of this ESA, do you have any specialized knowledge or experience related to the property or adjoining properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes No

If yes, please explain: City is the owner of adjacent Metrolink Commuter Rail Station property on Railroad Street.

(4) Relationship of the purchase price to the fair market value of the property, if it were not contaminated (40 CFR 312.29).

Does the purchase price offered for this property reasonably reflect the fair market value of the property? If there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be at the property?

Please discuss: Not applicable as no purchase price established.

(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- (a) Do you know the past uses of the property? Mixed residential, commercial and industrial uses.
- (b) Do you know of specific chemicals that are present or once were present at the property? No
- (c) Do you know of spills or other chemical releases that have taken place at the property? No
- (d) Do you know of any environmental cleanups that have taken place or are ongoing at the property? No

Yes No

If yes, please explain: City assembled site between 1999 and 2010 Environment Assessment Records are incomplete.

(6) The degree of obviousness of the presence or likely presence of contamination at the property and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Yes No

If yes, please explain: Former "Kruse Mill" Site and "Bailey Tire" reportedly used/had underground storage tanks

1.0 INTRODUCTION

On behalf of The Festival Capri Santa Fe Trail Associates, LLC (Festival), The Source Group, Inc. (SGI) is pleased to present this *Phase II Environmental Site Assessment* report for soil investigation at the former Bailey Tire Company (Site), located at 10819 Valley Boulevard in the City of El Monte, California.

This report is intended to provide Festival with the results of the August 2008 Phase II Environmental Site Assessments (Phase II) conducted at the Site. The site assessment was performed to address recognized environmental concerns (RECs) that were identified in the 2006 Phase I Environmental Site Assessment (ESA) report. The RECs are as follows:

- The Site contains a shop area with three hoists, a floor drain, and a mechanics pit;
- Storage and/or use of oil hydrocarbon-based solvents, fuels, waste oil and mixed oil; and
- Widespread surface staining throughout the Site.

The Phase I ESA report was issued to Festival by SGI on June 12, 2006. The Phase I and the Phase II assessments were performed as part of a due diligence effort pending a potential property transfer. This property is intended to be an element of the proposed El Monte Santa Fe Trail Plaza Redevelopment Project.

1.1 SCOPE OF WORK

This Phase II site assessment was conducted for the purposed of completing the due diligence to the degree feasible at the subject property. Many of the desired sampling locations were inaccessible due to physical obstructions and space limitations. This assessment focused on the constituents of potential concern (COPCs) including petroleum products, cleaning chemicals, coolants/antifreeze, and metals that were associated with the former operations. In addition, the presence of volatile organic compounds (VOCs) in the form of soil gas was assessed. The scope of work included the following elements:

- Collection of soil samples adjacent to the hoists, mechanics pit, the floor drain in the shop area, and the trash compound where significant amounts of oil were present on the ground surface (asphalt). The samples were analyzed for the presence petroleum hydrocarbons coolants/anti-freeze, and metals.
- Installation of three soil vapor probes sets for the evaluation of soil gas containing VOCs.

The soil sampling and soil vapor testing was compliant with the LARWQCB/DTSC Advisory for Active Soil Gas Investigations, January 28, 2003 and SGI's Standard Operating Procedures.

2.0 SITE BACKGROUND

2.1 SITE DESCRIPTION

The Site is located in a mixed commercial/residential area within the City of El Monte, Los Angeles County, California. The Site is located at 10819 Valley Boulevard (Parcel# 8575 019 027) on the north corner of the intersection of Valley Boulevard and Monterey Avenue. The Site occupies approximately 10510 square feet. At the time of the assessment, the Site was occupied by one former business; Bailey Tire Company, a tire and repair shop.

The structures at the Site consist of a cinder-block or plaster, slab-on-grade building including an office, storage areas, and a shop area. The Site is paved with a mixture of asphalt and concrete. Based on historic records review, the current layout of these structures first appear prior to 1966.

2.2 SITE HISTORY

As described in the SGI Phase I report, the Site was used as a tire and automotive repair shop. The Site contains a commercial building with an office, storage areas, and a shop area with three hoists, a floor drain, and a mechanics pit. At the time of the assessment, several drums were stored along the back wall of the shop appeared to contain waste oil and waste coolant. The remaining portion of the lot is paved with asphalt and includes a small storage/trash enclosure on the east side of the building.

3.0 GEOLOGIC AND HYDROGEOLOGIC SETTINGS

The Site is located in the San Gabriel Valley, situated between the base of the San Gabriel Mountains and the Whittier fault zone. The San Gabriel Valley is a deep synclinal basin that predominantly consists of marine Cenozoic sedimentary rocks (SECOR, 2003). The Site is underlain by Quaternary alluvium and older alluvium consisting of gravel, sand, silt and clay to a depth of greater than 1,600 feet. Underlying units consist of Pliocene and Miocene age sedimentary rocks of the Repetto, Puente, and Topanga Formations to depths greater than 2,000 feet (ESE, 2000). The surface elevation of the Site is approximately 290 feet above mean sea level (ft-msl).

The Site is located near the southern boundary of the San Gabriel Valley Groundwater Basin, adjacent to the eastern edge of Rio Hondo and approximately 2 miles west of the San Gabriel River. According to the Los Angeles County Department of Public Works (LACDPW), Water Resources Division Hydrologic Records, the closest water well (Well #2951F), had a depth to water of 86 feet below ground surface (measured on March 31, 2005), and a ground surface elevation of 285 ft-msl. Regional groundwater flow direction at the Site is to the southwest.

The Site is located in an area (San Gabriel Basin) that has been the subject to numerous environmental investigations related to groundwater contaminated with volatile organic compounds (VOCs). In the mid-1980s, the Environmental Protection Agency (EPA) divided the impacted portions of the San Gabriel Basin into eight operable units (OUs) in order to more efficiently manage the remedial efforts. The Site is located within the El Monte OU, which is part

of the San Gabriel Valley Area 1 Superfund site. The OU covers approximately 10 square miles in the south-central portion of the San Gabriel Basin. The groundwater contamination in the San Gabriel Basin has been attributed to the historical use and improper handling and disposal of tetrachloroethene (PCE), trichloroethene (TCE), and other chemical solvents.

4.0 PROJECT APPROACH

4.1 INVESTIGATION

The investigative approach was based on the need for information relative to future redevelopment of the site and the potential exposure to contaminants by commercial workers during the future construction activities. The site assessment focused on areas of the Site with known and suspected RECs. The site assessment was performed in such a manner as to evaluate the potential contaminants, location(s), and magnitude (if present). The RECs in this study include VOCs, coolant/anti-freeze, petroleum hydrocarbons, and metals.

4.2 METHODOLOGY

The scope of the assessment consisted of the placement of five Geoprobe[®] sample locations to address possible subsurface contaminants. For example, Geoprobe[®] sample locations were placed adjacent to each of the hoists in the shop area to determine if they may have leaked into the subsurface soil. Because the source of VOC contamination would have originated at the ground surface, shallow soils were the primary focus of this investigation.

The Geoprobe[®] sample locations were advanced in areas exhibiting oil staining or at depressions in the pavement where accumulation (e.g. ponding) of surface water or contaminants may occur. In addition to the soil assessment, a soil vapor assessment was performed to determine whether VOCs were present beneath the site as soil vapor. Sample locations are depicted on Figure 1.

5.0 ASSESSMENT PROCEDURES

The site assessment activities were conducted on July 30th and 31st, 2008 by an experienced SGI field geologist working under the direct supervision of a California Professional Geologist. The assessment activities consisted of soil and soil vapor sampling using a Geoprobe[®] Systems direct-push rig operated by InterPhase Environmental. Field procedures are described below.

5.1 DIRECT-PUSH SOIL SAMPLING

Direct-push sampling was conducted at five locations throughout the Site including four locations inside the existing building. One boring was advanced outside of the existing building in the trash compound (SGI-GP-1). The four borings that were advanced inside the existing shop area were located around the main areas of concern; the hydraulic hoists, floor drain, and mechanics pit. All

of the borings were advanced to a total depth of 20 feet below ground surface using a truck-mounted, hydraulically operated Geoprobe® Systems sampler. Core samples were collected with a hammer driving a stainless steel sampling tube, lined with an acetate sleeve, to the desired depth. Acetate liners (1-inch diameter by 2-foot length) were used to retain the soil cores for logging and sampling. Soil cores were collected in 2-foot segments at 5-foot depth intervals.

Soil samples 6- to 8-inch-long were cut from the original 2-foot core and prepared for potential chemical analysis. Samples from each location and depth interval were selected for analysis. To prepare the samples for shipment to the laboratory, the field geologist ensured no void spaces existed in each selected segment (for non-volatile constituents), and then it was sealed with Teflon™ tape and plastic end caps. Along with the sleeve samples, twelve samples were prepared per EPA Method 5035. All samples were labeled, placed in a chilled cooler, and recorded on a chain-of-custody form for delivery to the analytical laboratory.

The soil cores were visually classified in accordance with the Unified Soil Classification System, and a California Registered Geologist reviewed the soil descriptions (Appendix A). All sampling equipment was cleaned in an aqueous solution of Alconox™ (non-phosphate) cleanser, rinsed with tap water, and rinsed a second time with deionized water to prevent cross-contamination between borehole locations and sample intervals. No soil cuttings from the drilling were generated. Decontamination water was managed by the drilling contractor.

5.2 SOIL GAS SAMPLING

In three of the sample locations (SGI-GP-1, SGI-GP-2, SGI-GP-4), soil vapor probes were set at 5 and 15 feet below ground surface (bgs). Installation and sampling procedures were conducted in accordance with the DTSC/LARWQCB document “*Advisory for Active Soil Gas Investigations*” protocol (LARWQCB/DTSC, 2003). Soil Gas probes were installed within the three sample locations on July 30th. On July 31st, nine soil gas samples were extracted and analyzed by Centrum Analytical Laboratories (Centrum), a California state-certified mobile laboratory, by EPA Method 8260B.

5.3 SOIL SAMPLING

The soil samples were delivered to California state-certified American Analytics of Chatsworth, California for analysis. Samples were analyzed for RECs, with varying numbers of soil samples analyzed for each potential contaminant, based on the samples location at the Site. Analyses included VOCs using Environmental Protection Agency (EPA) Method 8260B; TPH speciated into 16 different carbon ranges (carbon-chain analysis) using EPA Method 8015 Modified; Title 22 Metals (17 California Assessment Metals) using combinations of EPA Methods 6010B, 7000, and 7471A; polycyclic biphenyls (PCB) using EPA Method 8082; and glycols using EPA Method 8015M (GC/FID).

6.0 FINDINGS

The results of the fieldwork were used to determine to what extent, if any, the RECs have affected the soil at the Site. Low levels of tetrachloroethylene (PCE) and toluene were detected in all nine of the soil gas samples; however, the source of those constituents could not be located at the time of the assessment. Analytical results are discussed below and are presented in Tables 1 through 5. Laboratory reports are provided in Appendix B.

Of the twenty soil samples submitted for TPH analysis, none contained detectable TPH concentrations. The tabulated results of the TPH analysis are provided on Table 1. Two of the twelve soil samples (SGI-GP-1-10', SGI-GP-2-5') submitted for VOC analysis contained detectable VOC concentrations. Both samples contained a Benzene concentration of 2.1 µg/kg (2.1 µg/kg = 0.0021 mg/kg) which is below its listed California-modified Preliminary Remediation Goals (PRGs) industrial standard (1.4 mg/kg). SGI-GP-2-10' contained an Acetone concentration of 9.3 µg/kg (9.3 µg/kg = 0.0093 mg/kg) which is below its listed California-modified PRGs industrial standard (54,000 mg/kg). The tabulated results of the VOCs analysis are provided on Table 2. Ten of the seventeen California Assessment Metals (CAM 17), contained detectable concentrations, but only arsenic had concentrations over their listed California-modified PRGs industrial standards. Arsenic concentrations were found in the all of the soil samples selected for Total Metals analysis. Arsenic exhibited concentrations ranging from 7.6 to 15 mg/kg, and are above the listed California-modified PRGs using an industrial standard (1.6 mg/kg). The tabulated results of the metal analysis are provided on Table 3. Four of the ten samples selected for Glycol analysis contained detectable values of Ethylene Glycol ranging from 20 mg/kg to 29mg/kg. These values are below the California-modified PRGs using the an industrial standard (100,000 mg/kg).

7.0 CONCLUSIONS

The results of the investigation revealed that releases of regulated compounds occurred at the Site. The visual inspections of the former operations coupled with the widespread distribution of VOCs, arsenic, and anti-freeze indicate that the tenant's waste management practices were substandard. Although only low levels of VOCs, glycol (coolant/anti-freeze), and arsenic were detected in the soil matrix, the releases of these constituents signify that there will likely be "hot spots" that were not identified during this investigation.

It should be noted that the Phase II ESA was limited in scope, and can only provide information relative to the sample locations at a given time. It is SGI's opinion that care should be taken during any future construction activities because there is a great likelihood that adverse conditions exist beneath the Site in the unassessed areas.

8.0 STANDARD LIMITATIONS

The author of this Report, The Source Group, Inc. (SGI) of Thousand Oaks, Ventura County, State of California, hereby gives notice that any statement or opinion contained in this Report prepared by SGI shall not be construed to create any warranty or representation that the real property on which the investigation was conducted is free of pollution or complies with any or all applicable regulations for statutory requirements; or that the property is fit for any particular purpose. Unless otherwise indicated in this Report, no attempt was made to check on the compliance of present or past owners of the property with federal, state or local laws and regulations. The conclusions or procedures beyond the scope of described services or the time and budgetary constraints imposed by Client are done so by the person or entity doing so and on sole reliance of its own judgment and on its own personal investigation of such property, and not in reliance on any representation by SGI regarding such property, the character, quality or value thereof. Any person or entity considering the use, acquisition or other involvement or activity concerning the property shall be solely responsible for determining the adequacy of the property for any and all uses for which that person or entity shall use the property. Any person or entity considering the use acquisition or the like shall do so on sole reliance of its judgment and on its own personal investigation of such property, and not in reliance on any representation by SGI regarding such property, the character, quality or value thereof. SGI has performed this and similar projects under similar conditions using all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial and customary practice as defined in 42 USC § 9601(35)(B). SGI shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld or not fully disclosed at the time the evaluation was performed.

LABORATORY REPORTS

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LOS ANGELES REGION**

LABORATORY REPORT FORM (COVER PAGE 1)

Laboratory Name: Microbac Laboratories Inc., Southern California Division

Address: 1401 Research Park Drive, Suite 100, Riverside, CA 92507

Telephone/Fax: (951) 779-0310/(951) 779-0344

ELAP Certification No./
Expiration Date: 2562 / August 31, 2009

Authorized Signature
Name, Title: (print) Mark B. Horan, Acting Division Manager

Signature, Date: _____

Laboratory Job Number: M5-554

Client Name: Interphase Environmental

Project Name/No: Festival / Santa Fe Trail Plaza / 02-TFC

Date(s) Sampled: (from - to) 07/31/08 - 07/31/08

Date(s) Received: (from - to) 07/31/08 - 07/31/08

Date(s) Reported: (from - to) 07/31/08 - 08/05/08

Chain of Custody received: Yes X No _____

Comments: _____

Re : Festival Capri Santa Fe Trail, LLC
A324643 / 8G30003

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 07/30/08 14:54 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analyticals.

Sincerely,

Viorel Vasile
Operations Manager

Terms of Use

Ellis Environmental Management, Inc has prepared this report for the exclusive use of:

The City of El Monte

Ellis will distribute any information regarding this assessment and report only upon the request of the client. This report is based upon data and information obtained during the site visits performed by Ellis personnel for the property identified herein within the time frames allowed. It is based solely upon the condition of the property on the date of such inspection, supplemented by information and data obtained by Ellis and described herein. Information presented is based on professional interpretation of data available as of the month prior to the date of report. In evaluating the property, Ellis has relied in good faith upon representations and information furnished by individuals and agencies noted in the report with respect to operations and existing property conditions, and the historic uses of the property to the extent that they have not been contradicted by data obtained from other sources. Use of this report indicates acceptance and agreement that Ellis will incur no responsibility or liability for any loss, injury, claim or damage arising directly or indirectly from any use or reliance on this report, regardless of whether claimed loss, injury, claim or damage was caused by the deficiency, misstatements, omissions, misinterpretations, or fraudulent acts of persons interviewed. Ellis has performed this work, made findings, and proposed recommendations described in this report in accordance with generally accepted environmental science practices in effect at the time the work was performed and within the time frames requested by client. Additional information received following issuance of the report may alter initial findings and recommendations. This warranty stands in lieu of all other warranties, expressed or implied. While this report can be used as a guide, it must be understood that it is neither a rejection nor an endorsement of the property, or of the means or methods used in the treatment, storage or disposal of potentially hazardous materials. Changing circumstances in the environment and in the use of the property can alter the conclusions and information contained in the report.

**RE: *ACM and Lead Abatement prior to Demolition
City of El Monte***

Background

From October 16th to November 2nd, 2017 Ellis conducted air monitoring, visual inspections, and general demolition monitoring at the subject site. Monitoring and inspections were conducted during and after the removal and stabilization of the following asbestos and lead containing materials at the listed locations:

221 El Monte Avenue

Asbestos

1. Asbestos contaminated debris; approximately 11,000 sq. ft according to an SCAQMD Procedure 5 Work Plan
2. Asbestos containing roofing mastic; approximately 10 sq. ft.

Lead

1. Lead surface dust on concrete slab; approximately 11,000 sq. ft.

3448 Tyler Avenue

Lead

1. Stabilization and encapsulation of exterior lead-based paint; approximately 400 sq. ft.

3454 Tyler Avenue

Asbestos

1. Asbestos containing 9" x 9" floor tile and mastic; approximately 900 sq. ft
2. Asbestos containing roofing mastic; approximately 40 sq. ft.

10819 Valley Boulevard

Asbestos

1. Asbestos containing 9” x 9” floor tile and mastic; approximately 600 sq. ft Asbestos containing roofing mastic; approximately 10 sq. ft.
2. Asbestos containing roofing mastic; approximately 30 sq. ft.

11016 Ramona Boulevard

Asbestos

1. Asbestos containing acoustic ceiling; approximately 2,000 sq. ft
2. Asbestos containing roofing mastic; approximately 30 sq. ft.

Lead

1. Lead-containing ceramic wall tile; approximately 50 sq. ft.

Abatement and demolition was performed by Resource Environmental, a licensed abatement contractor located in Long Beach, California (License #864417).

Discussion

The scope of abatement and demolition was based on AHERA based inspection and sampling efforts performed by Ellis in 2016 and 2017.

During abatement, engineering controls used to limit the migration of airborne fibers included:

1. A 3-stage decontamination chamber for ingress and egress.
2. 6 mil poly sheeting installed at each opening into the work area.
3. 6 mil poly sheeting, installed on walls, ceilings, and two layers for all critical barriers.
4. A negative air pressure environment¹ with manometer.
5. Wet methods during removal.

At all locations, a regulated area was established around the perimeter of the work to prohibit access by non-authorized personnel.

Sampling Methodology

Sampling for airborne asbestos was conducted using general protocol practices of the EPA guidelines set forth in the Federal Register 40 CFR Part 763 (AHERA). Air sampling pumps were calibrated before and after each sampling period with a field rotameter. Each field rotameter is itself calibrated annually against a primary standard, as identified by the National Institute of Standards and Technology (NIST) and required by the Occupational Safety and Health Administration (OSHA). Collected area samples were analyzed using Phase Contrast Microscopy (PCM) per NIOSH Method 7400 which produces results in fibers per cubic centimeter of air (f/cc).

¹ One or more triple HEPA-filtered fans are installed inside the work area. A constant flow of air is drawn into the work area, filtered through the fans and exhausted to the outside. In this way, fiber release from a breach in the containment barriers is controlled by negative air pressure.

Sampling for lead in surface dust was conducted according to guidelines set forth in HUD Title X, Chapter 15: Clearance, Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing. Samples were analyzed at AmeriSci Laboratories, an AIHA and NVLAP accredited laboratory located in Carson, California utilizing EPA method 3050B/7000B.

Quality assurance and quality control (QA/QC) measures included standard chain-of-custody protocol and analysis of field blanks. Copies of laboratory quality assurance (QA/QC) are attached to laboratory reports.

Results

See Attachment A for summarized monitoring results.

Area samples taken adjacent to containment areas during abatement showed airborne fiber levels below OSHA's PEL of 0.1 fibers per cubic centimeter of air. Clearance samples were measured at less than 0.01 fibers per cubic centimeter air (f/cc), the EPA "Clearance Level" for an abatement work area.² This is consistent with normal outside air - less than one-tenth California OSHA's "permissible exposure limit" of 0.1 f/cc³.

Measured surface concentrations of lead following completion were below CDPH standards for public and residential buildings; currently set at 400 µg/ft² for exterior horizontal surfaces.

Statement of Independence

Ellis provides independent testing for indoor air contaminants and other potentially hazardous materials. The company and its employees are certified and licensed to practice in the State of California. Employees providing asbestos-related building inspections maintain current certification requirements as issued by California OSHA and the California Department of Health Services. Retained laboratories are accredited by the EPA (AREAL), National Institute of Occupational Safety and Health (NIOSH), California Department of Health Services (DOHS), the American Industrial Hygiene Association (AIHA), the National Voluntary Laboratory Accreditation (NVLAP) program and the California Air Resources Board (CARB).

² 40 CFR Part 763 – AHERA. Originally developed for schools, .01 f/cc has become the most widely used and accepted criterion for clearance following an asbestos removal action.

³ See California Title 8 Section 1529, Asbestos.

EMSL maintains liability limited to cost of analysis. This report relates only to the samples reported and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Samples received in good condition unless otherwise noted. Estimated accuracy, precision and uncertainty data available upon request. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample. Reporting limit is 1%

Subject: 17-359 El Monte abatement demolition - shift 1

All,

Resource began demolition work at 221 El Monte Ave today, knocking down portions of the roof for mastic abatement during tomorrow's shift. P5/debris pile cleanup will also commence on this site tomorrow. Resource employed wet methods during structure knock down; the debris pile was not touched during this work.

Additionally, roofing mastic and bull asbestos floor tile removal commence at 10819 Valley Blvd. The roof has received a passing visual inspection; floor tile will receive inspection and air clearance by tomorrow end of shift. 49 bags of non-HAZ asbestos waste generated and stored in onsite container. Resource revised the notification for this site as reported asbestos quantities were low (revised quantities to 600 SF of floor tile and 630 SF of mastic).

Thanks,

Ryan C Davidson

Albert,

Thanks for your call today. As noted, and with the SCAQMD not working on Monday's, the P5 did not receive approval to start until Tuesday (10/17/17). As such, Resource is going to focus on setting up for general demo work on Monday.

Ellis will be onsite to observe methods, regulated area set up, etc., but understands no abatement will take place until Tuesday.

Thanks,

Ryan C Davidson

Subject: 17-359 El Monte abatement demolition - shift 2

All,

Resource completed abatement of flooring, encapsulated, and passed air clearance sampling at the 10819 Valley Blvd site during today's shift. This building is ready for demolition.

Additionally, Resource began cleanup of asbestos contaminated debris at the 221 El Monte P5 site per the approved SCAQMD P5 work plan. Two bins have bin filled, wrapped, labeled, and are ready for pick up tomorrow morning at 6am. The remaining debris has been covered with new poly sheeting; removal of all debris should be complete by tomorrow at the site. **Ben**, thanks for helping out Resource with the manifest signature.

Ellis bounced between the 221 P5 site and 11016 Ramona site where Resource mobilized and completed full containment set up for acoustic ceiling abatement beginning tomorrow. Resource also rented a knuckle boom to grant Ellis access to sample the roofs at the two Tyler sites and the Romona site; these areas were inaccessible due to safety reasons during Ellis' original survey of the 3 sites. These samples have been delivered to the lab and results should be in within 48 hrs.

Thanks,

Ryan C Davidson

Subject: Re: 17-359 El Monte abatement demolition - shift 3

All,

See below notes for the following sites during today's shift:

221 El Monte

Resource completed demo of remaining burn structure. Four bins have been filled and is scheduled for pickup tomorrow morning. Two additional bins will be delivered for remaining debris cleanup (approx. 20%). The crew plans on completing the P5 including power washing by end of day tomorrow.

11016 Ramona

Acoustic ceiling abatement completed today followed by detailing. Resource still has minimal detailing along ceiling edges and final wipe down tomorrow before air clearance samples are collected. Roof sample results are still pending.

3454 Tyler

Containment set up (for floor tile abatement) began and will continue tomorrow along with actual abatement.

Subject: 17-359 El Monte abatement demolition - shift 4

All,

Notes from abatement activities today summarized below:

221 El Monte

Remaining debris piles were packaged during today's shift. A total of 4 dumpsters remain filled, sealed, and flagged with warning tape onsite. Slab cleaning, detailing, and power washing will now likely complete by end of day tomorrow. The AQMD stopped by the site today and said they were responding to a complaint (not uncommon). The two inspectors spent approximately an hour and a half onsite observing the work, checking Notifications, and certifications. No fines or notices to comply were issued.

11016 Ramona

Acoustic ceiling containment has been cleared. Additionally, asbestos sealant at the front door and lead-confining ceramic tile were also abated. Results of roof sampling performed Tuesday indicate that appx 25-30 sq ft of mastic will require abatement on the roof of the structure.

3448 Tyler

Stabilization and encapsulation of loose and flaming lead based paint completed during today's shift. Results of additional sampling performed on Tuesday show that appx 10 sq ft of mastic will require abatement at the roof.

3454 Tyler

Containment set up (for floor tile abatement) completed and hand method removal began (expected to complete tomorrow). Results of additional sampling performed on Tuesday show that appx 35-40 sq ft of mastic will require abatement at the roof.

Thanks,

Ryan C Davidson

All,

Notes from abatement activities today summarized below:

221 El Monte

Slab cleaning and cleaning commenced today. 3 HAZ asbestos waste bins left the site; 1 remains for pickup on Monday. Ellis will perform confirmational wipe sampling of this location on Monday.

11016 Ramona

Roof penetration mastic was abated during today's shift. This building is ready for demolition.

3448 Tyler

Roof penetration mastic was abated during today's shift. This building is ready for demolition.

3454 Tyler

Abatement of floor tile completed during today's shift; the containment has been cleared. Roof penetration mastic was also abated during today's shift. This building is ready for demolition.

All,

221 El Monte: 1 site today

During today's shift, Resource continued with cleaning demo debris. Concrete slab removal started and is about 70% complete. Resource will continue on the remaining North corner tomorrow. 2 Haz waste bins left the site today, 2 55gal drums remain onsite. Ellis collected confirmational wipes and delivered them to the lab with a 24hr TAT. Resource will be back onsite tomorrow at 7AM.

Hi Ben,

At your request, Ellis assisted Resource in field verifying with quantity/thickness of remaining concrete slab at 221 El Monte. Measured at 100' x 67' (~6,700 sq ft), approximately 30% of this corner slab is 12" in thickness and the remainder is about 10". See attached photos and location screen shot. The blue dot is the corner where concrete slab remains - the cutoff point between 10" and 12" layers won't be exact until Resource begins peeling this area.

~6,700 sq ft. of 10-12"
concrete slab

All,

Resource completed remaining structure demo at the Tyler/Ramona sites during today's shift. Slab demo scheduled for tomorrow.

Ellis is pulling away from the project for its remaining duration. We have appreciated the opportunity to assist Resource in a successful abatement and demolition project, and look forward to the opportunity to work with the city again in the future.

We will release a final closure report in the next week or so.

Thanks and best regards,

TANK REMOVAL REPORT
at
O.H. Kruse
3720 Monterey Avenue
El Monte, California

INTRODUCTION

This report presents the results of a site investigation conducted during tank removal operations at the O.H. Kruse site. The investigation was conducted in accordance with the tank removal permit issued by the Department of Public Works, Environmental Programs Division. The investigation was conducted on February 22, 1996.

SITE DESCRIPTION

February 22, 1996

The site is located at the intersection of Monterey Avenue and El Monte Avenue in El Monte, California. The site is a rectangular lot measuring approximately 100 feet by 150 feet. The site is currently occupied by a building and a parking lot. The building is a single-story structure with a flat roof. The parking lot is located to the east of the building. The site is bounded by Monterey Avenue to the north, El Monte Avenue to the east, and an alleyway to the south.

Prepared for:

Mr. Jay Jackson
M.T. Walker Co.
10541 Chestnut Avenue
Stanton, California 90680

GEOLOGY AND HYDROLOGY

The geology of the site is primarily composed of alluvial deposits. The alluvial deposits are composed of sand, silt, and clay. The alluvial deposits are overlain by a layer of topsoil. The hydrology of the site is primarily composed of surface water. The surface water is contained in the parking lot and the building. The surface water is not contained in any underground tanks or containers.

Prepared by:

TANK REMOVAL REPORT
at
O.H. Kruse Grain & Milling
3720 Monterey Avenue
El Monte, California

INTRODUCTION

This report presents the results of field observations made and verification soil samples collected during tank removal operations at 3720 Monterey Avenue, El Monte, California. In accordance with the tank closure permit (#148851, File #11485-11528) for the site, one 10,000 gallon single walled steel underground storage tank, appurtenant piping and dispenser were removed from the site.

SITE DESCRIPTION

The site is located north of Valley Boulevard at the end of Monterey Avenue in the City of El Monte. A vicinity map is presented as **Figure 1**. The former tank was situated southeast of the scale house and Warehouse #4. The former dispenser was located adjacent to the southeast corner of Warehouse #4. Site cover was generally noted as asphaltic concrete. A site plan showing the location of the former tank in relation to the major site structures is presented as **Figure 2**.

GEOLOGY AND HYDROGEOLOGY

Physiographically, the site is located in San Gabriel Valley just northeast of Whittier Narrows in Los Angeles County. The San Gabriel Mountains are located to the north, the Whittier narrows area to the south, the Puente Hills to southeast and the Repetto Hills to the southwest. Pleistocene age sediments of the Lakewood Formation and Recent Alluvium underlie the site. The sediments of the Lakewood Formation are described as marine and continental gravel, sand, sandy silt, silt and clay with shale pebbles. The recent Alluvium is described as gravel, sand, silt and clay.

Hydrologically, the site is located within the San Gabriel Groundwater Basin where the Gaspur and Gardena Aquifers are the shallowest aquifers utilized in the Lakewood Formation. Other deeper aquifers located in the deeper San Pedro Formation are the Jefferson, Lynwood and Silverado Aquifers. Based on verbal communication with a local driller, West Hazmat Corp., environmental wells drilled about 1.5 miles southwest of the site indicated a groundwater depth of about 25 feet and groundwater was encountered at about 75 feet at a site located 1.0 mile to the southeast. Based on this information along with the

Handwritten notes in the left margin, including a circled "2" and some illegible scribbles.

surface topography, the groundwater beneath the subject site is estimated at about 40 feet below grade.

TANK REMOVAL AND DISPOSAL OPERATIONS

Tank Removal and Sample Collection

Prior to removing the tank, it was triple rinsed and certified for safe transport by a Certified Marine Chemist. Tank removal operations were coordinated by the general contractor on-site, M.T. Walker Co. The tank was certified for safe transport by CTL Environmental Services. The rinsate was transported by Swift Oil & Vacuum to Industrial Services Oil Co., Los Angeles, California. The tank was transported by Earl Ballinger Degassing for disposal to Adams Steel. The tank removal operations were observed by both Ms. Jolene Brown with the City of El Monte Fire Department and Mr. Elden Goodenow with Los Angeles County Department of Public Works. Copies of all the available certifications, manifests, tank destruction certificate and permits are included in **Appendix A**.

After the tanks were removed, soil samples were collected for analyses from the resulting tank pit as established by the permit. Two soil samples were taken about 2 feet to 4 feet below the tank invert. These samples were labeled T1 and T2. Soil sample locations are shown on **Figure 2**.

Samples from the tank pit were collected from the material brought to the surface by a backhoe. A single brass tube was driven or pushed into the soil retained between the teeth of the backhoe bucket. After a complete core (no head space) was obtained, both ends of the sleeve were covered with Teflon sheets, plastic end caps and sealed with electrical tape. Each sample was immediately tagged with a unique label and then placed on ice pending delivery to the laboratory.

Dispenser/Pipeline Sample Collection

Following removal of product piping and dispensers, two(2) samples, PL1 and PL2 were collected at a depth of about 1.5 feet below piping grade. Also, two(2) samples, D1-4 and D1-6.5 were collected from beneath the former dispenser at depths of about 4 feet and 6.5 feet below grade. Soil samples were collected by directly pushing a single brass tube the soil to sampled. The sampling depth was obtained using a hand auger. All other sampling procedures as discussed above were followed for the collection of these samples.

Stockpile Sample Collection

One grab sample, SP1, was collected from the spoils pile remaining on-site. After removing a portion of the surface material, the samples were collected by directly pushing the brass sleeve into the soil to be sampled.

ANALYTICAL RESULTS - INITIAL

Tank Pit Samples

Samples collected from the tank pit were analyzed by Southland Technical Services, Inc. for total petroleum hydrocarbons as Diesel (TPHd) and volatile aromatic compounds (BTEX) using EPA methods 8015M and 8020. These two samples, T1 and T2, revealed no detectable levels of TPHd or BTEX. A summary of the tank pit sample results is presented in **Table 1**.

Dispenser/Pipeline Samples

Sample PL1 suggested no detectable levels of TPHd or BTEX. Sample PL2 revealed only 28 mg/kg TPHd and no detectable BTEX. Sample D1-4 collected beneath the dispenser revealed a TPHd concentration of 9,500 mg/kg. However, sample D1-6.5, collected beneath D1-4, suggested only 12 mg/kg TPHd and no BTEX. A summary of the dispenser/pipeline sample results is included in **Table 1**.

Stockpile Samples

A grab sample of the spoils remaining on-site, SP1, indicated no detectable TPHd or BTEX concentration. A summary of the stockpile sample results is included in **Table 1**. The complete analytical reports and chain-of-custody cards for the initial samples collected are included in **Appendix B**.

REMEDIAL ACTION - DISPENSER AREA

Due to the initially high TPHd concentration noted in the dispenser sample D1-4, O.H. Kruse elected to over-excavate the area in order to remove the affected soil. Mr. David Esfandi was contacted by ATLAS personnel on January 24, 1996 with regard to the excavation of contaminated soil. Mr. Esfandi verbally approved the proposed work and indicated that verification samples would be needed from the side walls and terminus of the excavation. Therefore, on January 25 and 26, 1996, M.T. Walker Co. removed the soil in the immediate area of the former dispenser. ATLAS personnel were on-site to observe the excavation and collected verification samples. Initially, M.T. Walker Co. excavated an area of 4 feet by 13 feet by about 7 feet deep. After the initial samples were collected, the

excavation was widened and lengthened. During the over-excavation of the this area, ATLAS observed the physical removal of a 4-inch diameter by 2.5 feet deep vapor monitoring well as shown on Figure 2. The other two vapor wells were not abandoned.

On January 25, 1996, ATLAS personnel collected five(5) initial verification samples from the resulting excavation. Four of the samples, SN, SS, SW and SE, were obtained from the sidewalls and one, CB, from the terminus of the excavation accomplished by M.T. Walker Co. The sample locations are depicted on Figure 3.

Two of the samples, CB and SN, suggested no detectable levels of TPHd or BTEX. The other samples indicated TPHd ranging from 8,600 mg/kg to 14,000 mg/kg. With the exception of 0.030 xylenes noted in sample SW, no BTEX constituent were detected.

Since three of the samples exhibited significant TPHd, the excavation was widened in the areas of concern and three(3) additional samples were collected. Therefore, on January 26, 1996, the final verification samples were collected and analyzed in the laboratory. These samples are depicted on Figure 3.

Laboratory analysis of these samples, SW-B, SS-B and SE-B, indicated no detectable TPHd or BTEX. A summary of the results are included in Table 2. Complete reports are included in Appendix B.

SOIL DISPOSAL

M.T. Walker excavated and loaded approximately 11 tons of material from the area of the former dispenser. This material was hauled by Rust & Son's to Pen-Rob, Inc., Joseph City, Arizona for recycling. A copy of the non-hazardous manifest is included in Appendix A.

TANK EXCAVATION BACKFILL

ATLAS understands that the former tank pit excavation and dispenser area was backfilled with import fill.

CONCLUSIONS

The soil samples collected and analyzed in the laboratory from the former tank pit suggest no detectable TPHd and the soil near the former pipelines revealed only very low levels of TPHd with no detectable BTEX. Further, considering the over-excavation of soil near the dispenser and the less than detectable results obtained from the verification samples collected and analyzed, it appears that no further environmental work is warranted with regarding the 10,000 gallon diesel tank closure.

CLOSING

The work conducted by ATLAS has been performed using generally accepted methods and procedures in the environmental field. ATLAS makes no other warranty, either expressed or implied, concerning the information which is contained within this report. The analysis of soil samples were conducted by a State of California Certified Laboratory, however no warranty as to the validity of the work conducted by the Laboratory is implied.

This report is valid as of this date. As a result of the passage of time and changing site conditions or integrity of the underground tanks, piping and dispensing equipment, deviations to the information contained in this report may occur. Accordingly, information presented in later reports may invalidate this report in partial or whole form. These conditions are beyond the control of ATLAS, and should be considered in basing continuing assessments on the information contained herein after the passage of time.

This report has been prepared by ATLAS for M.T. Walker Co. Submission of this report to the appropriate regulatory agencies/parties is recommended and considered the responsibility of M.T. Walker Co.

Respectfully,

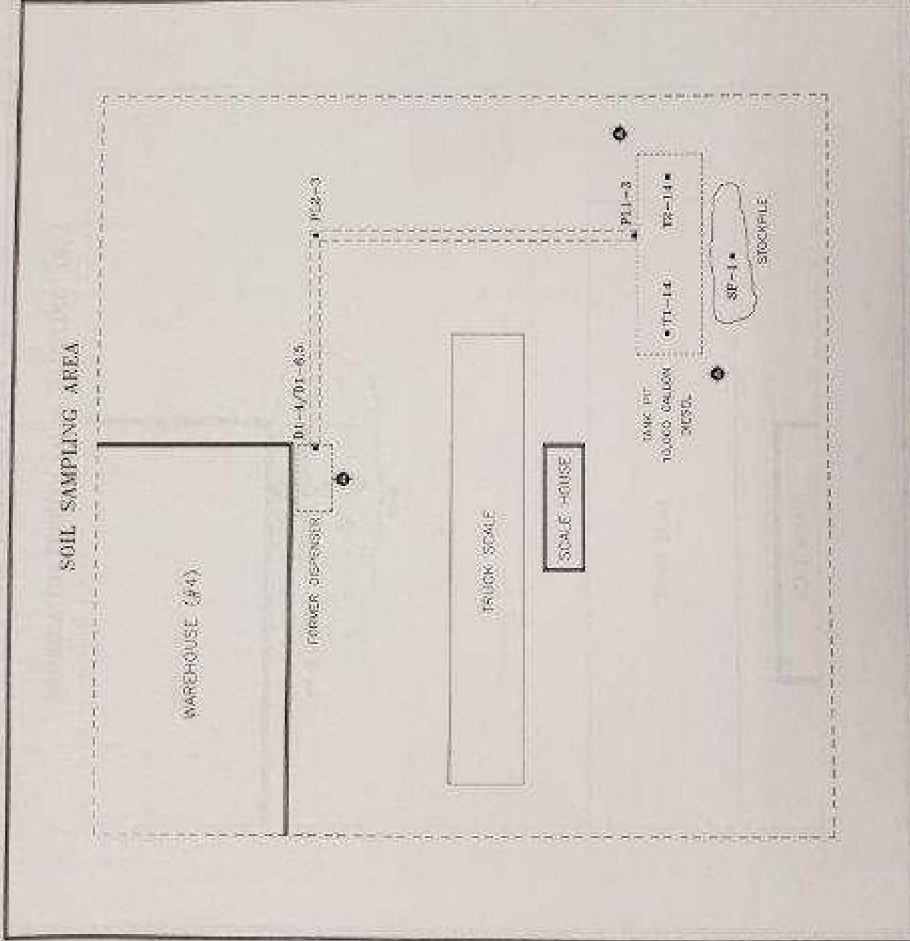

ATLAS ENVIRONMENTAL ENGINEERING, INC.

Dear Mr. Kerner:

Enclosed please find the analytical report for the sample(s) received by STS Environmental Laboratories on 01-18-1996 and analyzed by the following EPA methods:

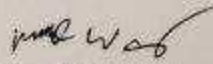

EPA 8020 (BTEX)
EPA 8015M (Diesel)

All analyses have met the QA/QC criteria of this laboratory.

The sample(s) arrived in good conditions (i.e., chilled, intact) and with a chain of custody record attached.

STS Environmental Laboratory is certified by CA DHS (Certificate Number 1986). Thank you for giving us the opportunity to serve you. Please feel free to call me at (213) 888-0728 if our Laboratory can be of further service to you.

Sincerely,

Roger Wang, Ph. D.
Laboratory Director

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Aerial Photo Decade Package

08/23/19

Site Name:

Area Y
10819 Valley Boulevard
El Monte, CA 91731
EDR Inquiry # 5760994.8

Client Name:

Ninyo & Moore
1401 Halyard Drive, Suite 110
West Sacramento, CA 95691
Contact: Luke Swickard

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.
