---

Attn: Megan Hamilton,

The California Geological Survey (CGS) has received a Notice of Preparation for a Draft Environmental Impact Report (DEIR) for the East Harbor Island Redevelopment/Topgolf Project. This email conveys the following recommendations from CGS concerning geologic issues related to the project area:

1. Surface Fault Rupture

The project area is intersected by a zone of required investigation for surface fault rupture associated with the Rose Canyon Fault Zone.

This potential hazard should be addressed in the DEIR. Additional information is available here:

<https://maps.conservation.ca.gov/cgs/EQZApp/app/>
