FINDS:

Registry ID: 110008261102

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)

Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.

Violation Notes: Returned to compliance on 06/04/2014. The paint booth over spray hazardous debris waste, which was observed on 6-19-13, was removed. However, the waste was not removed as a hazardous waste and could not be located this date for inspection. The operator suspected that the employees had discarded the waste via the trash. The paint over spray debris waste must be handled as a hazardous waste unless demonstrated to be non hazardous. In order to make a hazardous waste determination, have a representative sample of the waste analyzed by a state certified lab for California regulated heavy metals (Title 22, CCR). Perform a Total Threshold Limit Concentration (TTLC) analysis and if necessary, a Soluble Threshold Limit Concentration (STLC) analysis. Submit a copy of the lab analysis report to this Agency for evaluation and comment. If the waste is not analyzed, or if the lab analysis results are above Title 22, CCR hazardous waste criteria, then the paint over spray waste must be handled as hazardous waste. [Truncated]

Eval Notes: Please be advised that this Agency has received and reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2014 Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to the salvage value as well as the total closure costs. You cannot apply the inflation factor to the salvage value. The inflation factor must be applied to total cost closure and then the salvage value can be deducted. Therefore, the adjusted closure cost for this facility is \$6,960.68 (\$12,073.78 - \$5,113.10). Revised Certification Of Financial Assurance Form and Estimated Closure Cost form (enclosed) must be submitted to this Agency before 3/31/14.

Eval General Type: Other/Unknown
Eval Date: 05-04-2015
Violations Found: No

Eval Type: Other, not routine, done by local agency
Eval Notes: Inspector Comments: Please be advised that this Agency has reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2015 Adjusted Closure Cost Estimate (CCE) of \$7,072.05 is not correct. Since a copy of the Closure Cost Estimate (CCE) breakdown of costs was not included, it is not known if the listed amount is the CCE - salvage value. The 2014 CCE was approved at \$12,073.80. Therefore your minimum 2015 CCE is \$12,073.80 x 1.016 (inflation factor) = \$12,266.98 - salvage value. A copy of breakdown of costs for the CCE must be submitted to this Agency by 5/18/15.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a routine compliance inspection of the above facility on May 18, 2004. The SWPPP was last updated in 1999, did not contain training logs, nor a signed certification page. Staff had previously requested that this information be added to the SWPPP during the 9/10/02 inspection, however, no action was taken.

Eval Notes: On site for a routine hazardous waste RCRA LQG inspection. Jeff Bailey, owner, was present for the inspection and provided consent to conduct the required inspection and obtain photos. The facilityG s operations and the waste generated were discussed. The inspection included a walk outside of the building and of the facility's trash storage areas. Hazardous waste was not observed in the trash or as run off on the ground. The owner reported that they handle their paint booth over spray debris waste as hazardous waste. The hazardous waste storage container at the spray paint booth was reportedly used for the over spray debris. The violation (W001) cited on the 10-24-13 inspection report was corrected. The facility had begun the operation of an electro-less nickel tank. We discussed the handling of its used filters as hazardous waste. We discussed the identification of this waste on manifests. The storage of the facility's hazardous waste was inspected. We [Truncated]

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Michelle Beckwith and I met with Jeff Bailey (owner). The SWPPP was dated 6/23/2009 and said that there are non-storm water discharges of atmospheric condensate. Mr. Bailey said that this was not accurate, and that they plumb the condensate to the treatment area. I told Mr. Bailey to update this section of the SWPPP and reminded him of the July 1st deadline for the new permit. Mr. Bailey gave consent to tour the facility and to take pictures. A small alley was present in the west of the building. Paint was observed around an open window. Mr. Bailey said they were painting inside and most likely some of the paint splashed outside. He said he would prevent this from happening in the future. I told Mr. Bailey to either remove exposure in the western part of the facility or take an additional storm water runoff sample from the southwestern edge of the exposed yard. See attached photos.

Eval Notes: On site for a hazardous waste re-inspection. Michelle Bailey, Jeff Bailey, Garret Bailey, and Carlos Alonso were present for the re inspection. All violations cited in the 6-15-16 inspection report were corrected. We discussed the facility's wastewater treatment daily inspection log's inclusion of the required hazardous waste storage container inspection records. I recommended changing the title of the log if it serves more purpose than just wastewater treatment inspections. I provided an example hazardous waste storage area inspection checklist for their review. report PDF to Jeff Bailey

Eval Notes: On site to conduct a routine Tiered Permitting inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility is operating one Permit By Rule treatment unit. Wastewater being treated is from anodizing process baths and is hazardous for pH and Title 22 regulated metals. Wastewater is pumped from process line tanks to two holding tanks, one for low pH and one for high pH. Wastewater from the holding tanks is pumped to a tank where pH adjust is done with sulfuric acid and caustic, and flocculation is done to precipitate out regulated metals. Sludge which settles to the bottom of the tank is then put through a filter press. Treatment tanks were properly labeled with business ownership, facility ID, and individual serial numbers, violation I. Process floors appeared to be clean. Per the facility, residual liquids on the floors are vacuum pumped to the treatment system daily. The facility has submitted Tiered Permitting Unit [Truncated]

Eval Notes: On site for a routine hazardous waste treatment tiered permitting permit by rule (PBR) inspection. Met with facility operator Carlos Alonso of Dunham Metal Processing. Consent to enter and collect photos was granted by Mr. Alonso. The PBR unit consists of 1 unit (FTU 2 G pH adjust). FTU-2 includes (5) hazardous waste tanks. Spent process water is pH adjusted to precipitate the heavy metals. Solids go to a filter press to remove excess water. Water is directly placed into a POTW. The exterior of each unit was marked with the proper Unit #s, except the filter press (see violation I229 below). The secondary containment beneath each unit is maintained on a daily basis per Mr. Alonso. The following was observed: G Copper crystals were observed on the outside of a few tanks. Tanks should be maintained relatively free of crystals. G Caustic rinse line was leaking from the coupler. Crystals were observed forming on the line itself as well as (2) pvc lines below it. Eval Date: 11-04-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: I met with Jeff on site to provide him a copy of the inspection report and discuss. He wasn't aware of the PE certification's statements to provide seismic stoppers and anchors for the tanks. I pointed out the statements and drawings. He will follow up and install. He anticipates the work could be completed within several weeks. He will notify me when completed.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 08/04/2016. A drum storing hazardous waste debris was open and unmarked located adjacent to the PBR unit's hazardous rinse water holding tanks. Also, a tote of hazardous corrosive liquid waste was unmarked with the required information and stored in the front parking lot. Mark all containers storing hazardous waste with the required information immediately. Once corrected, notify this Agency.

Citation: 22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes: Returned to compliance on 11/20/2018. The professional engineer assessment must be conducted every 5 years. Please have the assessment done and send a copy of the engineer's certification to this Agency within 30 days.

Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 06/04/2014. The paint booth over spray hazardous debris waste, which was observed on 6-19-13, was removed. However, the waste was not removed as a hazardous waste and could not be located this date for inspection. The operator suspected that the employees had discarded the waste via the trash. The paint over spray debris waste must be handled as a hazardous waste unless demonstrated to be non hazardous. In order to make a hazardous waste determination, have a representative sample of the waste analyzed by a state certified lab for California regulated heavy metals (Title 22, CCR). Perform a Total Threshold Limit Concentration (TTLC) analysis and if necessary, a Soluble Threshold Limit Concentration (STLC) analysis. Submit a copy of the lab analysis report to this Agency for evaluation and comment. If the waste is not analyzed, or if the lab analysis results are above Title 22, CCR hazardous waste criteria, then the paint over spray waste must be handled as hazardous waste. [Truncated]

On site to conduct a Hazardous Waste inspection. The facility has acquired 950 and 960 N Parker St, which are part of the same building. A walk through of these locations was conducted, 960 N Parker St is used as storage space for chemicals used by Dunham Metal Processing. No hazardous waste was observed at 960 N Parker St. The facility is doing business as Tech Plate at 950 N Parker St. Per Mr. Bailey, plating is not conducted at this location. Sandblasting units for preparation of parts were observed. The sandblasting media is reported to have not been changed out of the machines or otherwise disposed of. Discussed hazardous waste management practices with Mr. Bailey and the facility is choosing to manage the blasting media as hazardous waste. Please note, you may have a Total Threshold Limit Concentration (TTL) test for Title 22 CCR regulated heavy metals done by a State Certified Laboratory to determine if the waste is hazardous. Containers of copper sulfate [Truncated]

Eval Notes:

Please be advised that this Agency has received and reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2014 Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to the salvage value as well as the total closure costs. You cannot apply the inflation factor to the salvage value. The inflation factor must be applied to total cost closure and then the salvage value can be deducted. Therefore, the adjusted closure cost for this facility is \$6,960.68 (\$12,073.78 - \$5,113.10). Revised Certification Of Financial Assurance Form and Estimated Closure Cost form (enclosed) must be submitted to this Agency before 3/31/14.

Eval Notes:

Inspector Comments: Your 2016 Financial Assurance documents have been reviewed and accepted. The salvage value of the assets has not been changed from the value listed in 2013. The salvage value of your assets must be reviewed on an annual basis to be sure that depreciation and changes made to your inventory of equipment are reflected in the salvage value estimate. If you believe that your salvage value has remained the same since 2013, be sure to maintain documentation reflecting your estimated salvage value.

Eval General Type: Other/Unknown
Eval Date: 05-04-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Inspector Comments: Please be advised that this Agency has reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2015 Adjusted Closure Cost Estimate (CCE) of \$7,072.05 is not correct. Since a copy of the Closure Cost Estimate (CCE) breakdown of costs was not included, it is not known if the listed amount is the CCE - salvage value. The 2014 CCE was approved at \$12,073.80. Therefore your minimum 2015 CCE is \$12,073.80 x 1.016 (inflation factor) = \$12,266.98 - salvage value. A copy of breakdown of costs for the CCE must be submitted to this Agency by 5/18/15.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Michelle Beckwith and I met with Jeff Bailey (owner). The SWPPP was dated 6/23/2009 and said that there are non-storm water discharges of atmospheric condensate. Mr. Bailey said that this was not accurate, and that they plumb the condensate to the treatment area. I told Mr. Bailey to update this section of the SWPPP and reminded him of the July 1st deadline for the new permit. Mr. Bailey gave consent to tour the facility and to take pictures. A small alley was present in the west of the building. Paint was observed around an open window. Mr. Bailey said they were painting inside and most likely some of the paint splashed outside. He said he would prevent this from happening in the future. I told Mr. Bailey to either remove exposure in the western part of the facility or take an additional storm water runoff sample from the southwestern edge of the exposed yard. See attached photos.

Eval Notes: Reviewed Bart's emails responding to violation I206. Proof of electronic submission of 2016 biennial report was provided. Violation corrected. On site inspection to determine correction of the other cited violations. He also sent over a copy of the wastewater treatment log - which implies wastewater tanks and containers are being inspected - but how about the tote of hazardous waste sitting in the front parking lot???

Eval General Type: Other/Unknown
Eval Date: 08-03-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site for a hazardous waste re-inspection. Michelle Bailey, Jeff Bailey, Garret Bailey, and Carlos Alonso were present for the re inspection. All violations cited in the 6-15-16 inspection report were corrected. We discussed the facility's wastewater treatment daily inspection log's inclusion of the required hazardous waste storage container inspection records. I recommended changing the title of the log if it serves more purpose than just wastewater treatment inspections. I provided an example hazardous waste storage area inspection checklist for their review. report PDF to Jeff Bailey

Eval Notes: On site to conduct a routine RCRA Hazardous Waste Large Quantity Generator inspection. Met with Garrett Bailey, General Manager. The facility conducts hazardous waste treatment, anodizing, electroless nickel plating and sand blasting operations. The facility also occupies 960 N Parker St and the property is contiguous. Walked throughout the facility and observed the following. Caustic cleaner, dye bath and rinse tanks, anodize line and electroless nickel plating line were observed. The cleaner bath and all process rinse baths are plumbed to one of two low pH and high pH hazardous waste holding tanks for treatment. There are an additional two backup holding tanks for overflow. Counter current rinsing is being utilized for the anodize and electroless nickel plating lines. Wet process floor trench waste is pumped to the low pH holding tank daily. The low and high pH wastes

Eval Notes: On site to conduct a routine Tiered Permitting Permit By Rule (PBR) inspection. Met with Garrett Bailey, General Manager. The facility conducts continuous treatment of the following process baths: cleaner, dye rinses, waste process floors, anodize rinses, electroless nickel plating rinses. Process baths undergoing treatment are plumbed to one of two low pH and high pH hazardous waste holding tanks, or backup tanks. Waste from the tanks is plumbed to the treatment unit and feeds to the treatment continuously until a desired pH is reached. The waste undergoes treatment by pH adjustment, followed by flocculation and settling, and dewatering by filter press. Clean water at the top of the treatment unit clarifier goes to the sewer for disposal. Water separated through the filter press returns to the low pH waste tank. The exterior of the treatment unit FTU#2 was marked with required information. Secondary containment was observed dry. CERS ID 10539883 Tiered [Truncated]

Eval Notes: On site to conduct a routine Hazardous Waste inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility is a Large Quantity Generator of RCRA hazardous waste. Walked throughout the facility and observed hazardous waste generation points and storage areas. The facility routinely generates filter cake and process bath waste. The facility has a paint booth, which is no longer being operated as of 2017. After walking the perimeter and observing the municipal trash, there appears to be no signs of illegal disposal. The following documents were available for review: - Hazardous waste disposal manifests - Business contingency plan - Employee training, conducted annually - Inspection logs for waste containers and tanks, conducted daily - Biennial report - SB14 documentation The facility

Eval Date: 09-11-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Tiered Permitting inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility is operating one Permit By Rule treatment unit. Wastewater being treated is from anodizing process baths and is hazardous for pH and Title 22 regulated metals. Wastewater is pumped from process line tanks to two holding tanks, one for low pH and one for high pH. Wastewater from the holding tanks is pumped to a tank where pH adjust is done with sulfuric acid and caustic, and flocculation is done to precipitate out regulated metals. Sludge which settles to the bottom of the tank is then put through a filter press. Treatment tanks were properly labeled with business ownership, facility ID, and individual serial numbers, violation I. Process floors appeared to be clean. Per the facility, residual liquids on the floors are vacuum pumped to the treatment system daily. The facility has submitted Tiered Permitting Unit [Truncated]

Eval Notes: On site for a routine hazardous waste treatment tiered permitting permit by rule (PBR) inspection. Met with facility operator Carlos Alonso of Dunham Metal Processing. Consent to enter and collect photos was granted by Mr. Alonso. The PBR unit consists of 1 unit (FTU 2 G pH adjust). FTU-2 includes (5) hazardous waste tanks. Spent process water is pH adjusted to precipitate the heavy metals. Solids go to a filter press to remove excess water. Water is directly placed into a POTW. The exterior of each unit was marked with the proper Unit #s, except the filter press (see violation I229 below). The secondary containment beneath each unit is maintained on a daily basis per Mr. Alonso. The following was observed: G Copper crystals were observed on the outside of a few tanks. Tanks should be maintained relatively free of crystals. G Caustic rinse line was leaking from the coupler. Crystals were observed forming on the line itself as well as (2) pvc lines below it. [Truncated]

Hazardous Waste Summary:

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 02-20-2014
Citation: HSC 6.5 25244.21 - California Health and Safety Code, Chapter 6.5, Section(s) 25244.21
Violation Description: Failure of the generator to adequately complete, and maintain for review, the following requirements of the source reduction report (SB-14): 1) The name and location of the site; 2) Telephone number; 3) Identification Number; 4) The SIC Code; 5) Length of time the company has been in business at the present site; 6) Major products manufactured or services provided and, if necessary to convey an understanding of the business, their general applications or examples of their applications or end use; 7) Number of employees; 8) A general description of site Operations/Maintenance with corresponding block diagrams focusing on quantity and type of hazardous wastes, raw materials, and final products produced at the site; 9) Identification of all routinely generated hazardous waste streams that annually weigh 600 kg or more and that result from ongoing processes or Operations/Maintenance and exceed 5 percent of the total yearly weight of hazardous waste generated, for extremely hazardous waste, that annually weigh 0.6 kg or more and exceed 5 percent of the total yearly weight of extremely hazardous waste generated at the site; 10) For each hazardous waste stream identified the report shall include all of the following information: A) An estimate of the quantity of hazardous waste generated, B) An evaluation of source reduction approaches available and are potentially viable. The evaluation shall consider at least all of the following source reduction approaches: i) Input change. ii) Operational improvement. iii) Production process change. iv) Product reformulation. v) Administration/ Documentation steps taken to reduce hazardous waste generation including but not limited to: (A) Inventory control; (B) Employee award programs; (C) Employee training; (D) In-house policies; (E) Corporate or management commitment; and (F) Other programs or measures, 11) Consideration of the following factors for each measure evaluated in accordance with subsection (10) of this section (where a specific factor does not apply identify as N/A)

hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Date: 03-26-2018
Citation: 22 CCR 15 66265.196 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.196

Violation Description: Failure to immediately remove from service a tank system or secondary containment system from which there has been a leak, spill, is unfit for use and comply with applicable requirements.

Violation Notes: Returned to compliance on 03/26/2018. OBSERVATION: Hazardous liquid (pH1) was observed within secondary containment of the Nickel plating line area. The nickel plating line is currently not in use and per Richard Amezaga, the secondary containment is being used to rinse 5-gallon containers. Therefore, any liquid in this secondary containment must be addressed immediately. This violation was abated as the liquid was removed during this inspection.

Violation Date: 03-20-2017
Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194
Violation Description: Failure to place wastes or treatment reagents in a tank system that could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail; and for not using appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. (Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure).
Violation Notes: Returned to compliance on 12/04/2018. The batch treatment tank needs to contain overflow spill prevention equipment. Please install the necessary equipment to satisfy 22 CCR 66265.194 immediately and prior to continued use.

Violation Source: CERS

Site ID: 388600

Site Name: CADILLAC PLATING INC

Violation Date: 03-21-2014

Citation: 22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(c)(10)

Violation Description: Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.

Violation Notes: The drum rinsing operation is its own tiered permitting hazardous waste treatment unit. Depending on the volume treated, the unit may be conditionally exempt or permit by rule. Also, several different types of batch treatments should not be on the same unit page. Each treatment process requires its own unit. Revise and submit the on site hazardous waste treatment notification forms to this Agency for our review.

Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 07/03/2017. The PBR FTU2 tank marked "batch 1" was in use. This tank system must be certified by a professional engineer as required. Provide the tank system PE certification report to this Agency for our review.

Violation Date: 02-20-2014
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52

Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) The plan shall describe arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) The plan shall list names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) The plan shall include a list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) The plan shall include an evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan shall describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires). 6) The plan shall include the current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the re

Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194

Violation Description: Failure to comply with general tank operating requirements: (a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. (b) The owner or operator shall useing appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: (1) spill prevention controls (e.g., check valves, dry discount couplings); (2) overflow prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and (3) maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank.

22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description:

Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes:

Returned to compliance on 03/26/2018. Multiple containers storing hazardous waste liquids were observed open. Open containers were observed in the treatment area, process area, and containment area. Any container used to store hazardous waste must be stored closed when not in active use. Please ensure that proper containers are used in that they can be properly sealed closed to prevent an unauthorized release of hazardous waste.

Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 08/25/2020. Employee training for employees conducting waste handling activities is not being conducted annually. Employee training records that were available for review are not current. Within 60 days please conduct training for these employees and have records available for review by this Agency.

Eval General Type: Other/Unknown
Eval Date: 01-18-2001
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: An inspection was conducted on a neighboring business when staff observed a discharge to the storm drain from the facility. The company is a plater. Staff asked that the discharge of non-stormwater, originated from a yard washdown, be stopped. Mr. Ibarra agreed to do that. Based on info from Mr. Ibarra and their consultant, Mr. Anil Desai, they are working on the NOI and the SWPPP. Told Mr. Ibarra and Mr. Desai of a concern that the production area is being slopped to discharge to the storm swale and the adjacent storm drain and flood control channel. The production area shows evidence of spill of chemicals and tracks from forklifts being carried outside. The company contact stated that they would do something such as building a berm to contain the spill and would sweep the area on a regular basis. Mr. Desai showed a report of the lab analysis of a storm water taken the previous weeks. All the results looked within the benchmark ranges.

Eval Notes:

Please be advised that this Agency has reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2014 Adjusted Closure Cost Estimate (CCE) was not properly calculated since it appears that the 2012 CCE was used. There is a comment "same as last year 2013 & inflation factor" on the attached Estimated Closure Cost (ECC). However, the copy of ECC submitted is from 2012. This Agency received a new closure cost and salvage value in 2013 (enclosed). The 2014 CCE is your 2013 CCE (\$7,784.19) multiplied by a factor of 1.014 which is \$7,893.17 - salvage value (\$6,698.09). Revised Certification Of Financial Assurance Form and Estimate Closure Cost (enclosed) must be submitted to this Agency by 3/27/14.

Eval Notes:

This Agency received the facility's annual certification of financial assurance documentation, signed and dated 3-1-14. 2 permit by rule (PBR) units are claimed. FTU#1 Continuous WW treatment unit: low concentrations of acidic, alkaline, hexavalent chrome, heavy metals reported treated by chrome reduction, metal precipitation, flocculation and clarification. 2 tanks and 3 treatment areas claimed. FTU#2 Batch treatment unit: acidic, alkaline, hexavalent chrome, heavy metals reported treated by pH neutralization, metal precipitation, chrome reduction. 1 tank claimed. Noted container rinsing was claimed as a process in both units. Container rinsing is its own tier permitting unit. An on site inspection will be conducted to evaluate information provided.

On site for a routine RCRA large quantity generator (LQG) hazardous waste inspection. Met with Owner Adan Ibarra and Wastewater Treatment Operator Richard Amezaga of Cadillac Plating. Also present was Timothy Grogan of OCHCA. Consent to enter and collect photos was granted by Mr. Ibarra. Bri Dewey of OCHCA collected photos. The facility's operations and the waste generated were discussed during this inspection. The facility is composed of 4 different Units in a building complex. Each Unit serves a different purpose in the operation of Cadillac Plating. Mr. Amezaga stated that the batch treatment line had been shut down on January 23, 2017 by the Sanitation District due to faulty/missing equipment. The storage and management of the facility's hazardous waste was inspected. The majority of the facilities hazardous waste is stored in the northernmost building (Nickel and Tin Plating also conducted in this building periodically). Hazardous waste however, was also [Truncated]

On site to conduct a routine Hazardous Waste inspection, accompanied by Dean Freed. The facility's consultant, Bart Hamlett, was present for the inspection. The facility is a Large Quantity Generator of RCRA hazardous waste. Walked throughout the facility and observed hazardous waste generation points and storage areas. Waste generation and operations were discussed. There are two areas where plating is conducted. Nickel and Tin plating is conducted in one suite of the building and zinc plating and anodizing are conducted in another suite. Both process floors are said to be cleaned everyday using vacuum pumps and waste is batch treated. Several process tanks along the zinc plating, anodize, and alkaline zinc plating lines are plumbed to three respective lift stations, which are plumbed to the continuous treatment system. Hazardous waste containers and tanks were observed. One tank labeled ZC-7 in the process line is being used to store waste floor wastewater. [Truncated]

Eval Notes: Evaluation concludes 4 tanks and no containers to be the correct count for the continuous treatment unit. However, clarification is necessary as to the operation and use of the batch treatment tank. Also, the tour along with the review of the 6-29-12 PE tank assessment report confirmed that the batch treatment tank, which was also in use as a pre-treatment tank for the continuous flow, was not included in the 6-29-12 PE assessment report. The drum rinsing is itself a separate unit. If batch treatment tank is a pretreatment tank for the continuous flow unit, then that adds one tank for the continuous flow unit The waste to be treated within the batch treatment unit must be confirmed. If the batches are different in content, then each treatment process would be unique and require its own unit identification.

Eval Date: 05-18-2004
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a routine compliance inspection of the above facility on May 18, 2004. The SWPPP could not be located for staff to review. Filter cake was observed stored in a tote without BMP implementation.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Other/Unknown
Eval Date: 05-24-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Onsite for a reinspection of the facility. Met with Adam Ibarra of Imperial Plating. Adam was assisting this facility to bring the facility back into operation. Consent was provided to enter and observe the facilities status. The electricity has been restored in the process building where the plating operations occur. The electricity remains shut down in the treatment building and hazardous waste storage building. The electrical contractor is continuing to make the necessary upgrades required by OSHA. Hazardous waste filter cake was transported on this date. Currently, several liquid containers awaiting treatment were in the storage area. The following accumulation dates were observed: - Floor water - 4/6/17 - Colored liquid waste - 3/21/17 - Blue Liquid waste - 4/17/17 and 4/20/17 - black liquid waste - 4/6/17 Hazardous waste must be removed by 6/21/2017.

Eval Division: Orange County Environmental Health
Eval Program: HWLQG
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 05-26-2017
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Please be advised that 2017 Tiered Permit financial assurance documents submitted to CERS on 2/27/17 were reviewed and request for submittal of closure cost breakdown (since document could not be opened/viewed) was made on 3/27/17. To date, closure cost breakdown has not been submitted to CERS. Closure cost breakdown must be submitted to CERS by 6/23/17 to avoid enforcement action.

Eval General Type: Other/Unknown
Eval Date: 07-10-2017
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: On site for a reinspection at Cadillac Plating. Met with Adan Ibarra and consent was provided to enter and conduct inspection activities. The facility is partially operating as the two southern most buildings (hazardous waste storage building and treatment building) are still without electricity. According to Mr. Ibarra, the electrical contractor will be at the facility sometime this week to resume electrical repairs. Mr. Richard Amezaga (facilities treatment and waste consultant) has been away due to a medical condition. Since the initial routine inspection that was conducted on 3/20/2017, only filter cake waste has been removed from the facility. All liquid hazardous waste observed on 3/20/2017 have been consolidated into larger totes and labeled. Documentation requested on the initial inspection has not been provided. Currently, the following violations are still open: - 1126 - Training documentation unavailable - 1183 - EPA ID # is currently Inactive - [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: On site to conduct a RCRA Hazardous Waste Large Quantity Generator reinspection. Met with Adan Ibarra, President. The following violations were cited during a routine inspection on 3/20/19: I070 - Weekly inspection logs of hazardous waste containers were not available for review. At this time records of weekly inspections for hazardous waste containers were still not available for review. Mr. Ibarra stated the inspections are being done, but he was unsure where the records were being kept. Within 30 days please maintain the records for review by this Agency. I145 - Hazardous waste containers, which were unable to be stored closed as required by Title 22 regulations, were observed storing waste. A walkthrough of the facility was conducted this date. All hazardous waste containers were observed stored closed at this time, violation I145 is corrected. This inspection report was sent to brandycorona13@yahoo.com and richardamezaga@hotmail.com.

Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52

Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 03/26/2018. OBSERVATION: Hazardous liquid (pH1) was observed within secondary containment of the Nickel plating line area. The nickel plating line is currently not in use and per Richard Amezaga, the secondary containment is being used to rinse 5-gallon containers. Therefore, any liquid in this secondary containment must be addressed immediately. This violation was abated as the liquid was removed during this inspection.

Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 03/26/2018. Hazardous crystallized waste residues were observed caked on and in between tanks of the process lineups in both rooms. Remove the hazardous waste debris from on and in between the equipment. Provide proper storage for the hazardous waste. Store the hazardous waste in closed, compatible containers marked with the required information. Initiate practices that will prevent the accumulation of hazardous waste debris on the outside of the process line tanks.

Violation Description: Failure to comply with general tank operating requirements: (a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. (b) The owner or operator shall useing appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: (1) spill prevention controls (e.g., check valves, dry discount couplings); (2) overflow prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and (3) maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank.

Eval Notes: On site for a follow-up inspection. Met with Brandy Corona of Cadillac Plating. Consent was provided to conduct inspection activities and to take photos. The following was observed: - Electricity for the entire facility has been restored. - Treatment operations have been ongoing sporadically. The treatment system was not operating. - (1) 275-gallon tote containing floor waste was dated 6/15/2017 is past the 90-day accumulation time (see violation I125 below). - (1) open-topped tank was full of liquid floor waste. Hazardous must be stored closed (see violation I145 below). - hazardous waste manifests were not available as they are under the control of Richard Amezaga.

Eval Notes: Please be advised that this Agency has reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2014 Adjusted Closure Cost Estimate (CCE) was not properly calculated since it appears that the 2012 CCE was used. There is a comment "same as last year 2013 & inflation factor" on the attached Estimated Closure Cost (ECC). However, the copy of ECC submitted is from 2012. This Agency received a new closure cost and salvage value in 2013 (enclosed). The 2014 CCE is your 2013 CCE (\$7,784.19) multiplied by a factor of 1.014 which is \$7,893.17 - salvage value (\$6,698.09). Revised Certification Of Financial Assurance Form and Estimate Closure Cost (enclosed) must be submitted to this Agency by 3/27/14.

Eval Type: Other, not routine, done by local agency
Eval Notes: Evaluation concludes 4 tanks and no containers to be the correct count for the continuous treatment unit. However, clarification is necessary as to the operation and use of the batch treatment tank. Also, the tour along with the review of the 6-29-12 PE tank assessment report confirmed that the batch treatment tank, which was also in use as a pre-treatment tank for the continuous flow, was not included in the 6-29-12 PE assessment report. The drum rinsing is itself a separate unit. If batch treatment tank is a pretreatment tank for the continuous flow unit, then that adds one tank for the continuous flow unit. The waste to be treated within the batch treatment unit must be confirmed. If the batches are different in content, then each treatment process would be unique and require its own unit identification.

Eval Date: 04-14-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine RCRA LQG hazardous waste generator inspection. Richard Amezaga, manager, was present for the inspection and provided consent to inspect and take regulatory related photos if needed. The inspection included a walk behind the facility. Hazardous waste was not observed in the trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. We discussed the required information to be marked on containers storing hazardous waste. We discussed maintaining the bins of hazardous filter cake waste closed when not actively adding waste. We discussed the hazardous waste management training provided to employees. We discussed the maintenance of the plating line area's floor. The floor during line operation was wet and accumulating liquids. The manager reported that the floor is drained every morning to be dry. He stated that the collected waste water was then transferred to the PBR unit for treatment and [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID: 416845
Site Name: THERMAL-VAC TECHNOLOGY
Violation Date: 12-06-2018
Citation: 22 CCR 45 67450.13(a)(1) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.13(a)(1)
Violation Description: Failure to prepare a written estimate of the cost of closing each unit which includes the cost that would be incurred for closing a treatment unit when using the owner or operator or generator's own staff and/or personal equipment taking into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. This estimate shall be submitted as an attachment to the Certification of Financial Assurance for Permit by Rule and Conditionally Authorized Operations/ Maintenance page(s) of the Unified Program Consolidated Form (x/99)).
Violation Notes: PBR treatment is not exempt from Financial Assurance, please submit closure cost estimate to CERS within 30 days.

Violation Date: 11-27-2019
Citation: 22 CCR 31 67100.9 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.9
Violation Description: Failure of a large quantity generator to prepare a summary progress report every four years, using DTSCG s Form # 1262 (3/99) titled "Summary Progress Report".
Violation Notes: Returned to compliance on 01/03/2020. The summary progress report for 2019 based on waste generated in 2018 was not available for review at this time. Please note this report is one of three components of required SB14 documentation. SB14 was last required to be done by 9/1/19 for wastes generated in 2018. Within 60 days complete the report and have it available for review.

Violation Source: CERS

Site ID: 416845
Site Name: THERMAL-VAC TECHNOLOGY
Violation Date: 07-02-2011
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Late Report
Violation Notes: Failure to submit the 2010-2011 Annual Report by July 1, 2011 deadline.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 416845
Site Name: THERMAL-VAC TECHNOLOGY
Violation Date: 11-27-2019
Citation: 22 CCR 15 66265.177 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.177
Violation Description: Failure to separate incompatible wastes from the same container, nearby containers, or unwashed containers which previously contained incompatible waste or materials.
Violation Notes: Returned to compliance on 01/03/2020. Cyanide contaminated waste is reported to be stored in a container with other solid waste. Please note this waste may not be compatible with other wastes being stored in the container. Within 30 days obtain a container specific for storage of cyanide contaminated waste.
Violation Division: Orange County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 416845
Site Name: THERMAL-VAC TECHNOLOGY
Violation Date: 03-17-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 07/03/2017. Over 7 drums storing used acetone were on site, unmarked with each drumG s accumulation start date. One tote storing nickel strike solution was on site, marked with

an accumulation start date of 7-7-14. A drum storing used oil was unmarked. Review of manifests show that these waste streams were last remove by a registered hauler for proper recycling / disposal over 180 days ago. The allowable storage time for a small quantity generator (SQG) is 180 days. However, if the waste must be transported over a distance of 200 miles or more to its TSD facility, the generator may store the waste on site for up to 270 days. Have the hazardous waste that has been on site beyond allowable storage time removed for proper recycling/disposal. Submit a copy of the removal records to this Agency within 30 days.

Site ID: 416845
Site Name: THERMAL-VAC TECHNOLOGY
Violation Date: 11-27-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 01/03/2020. Six hazardous waste containers were observed stored open. Please note liquid hazardous waste must be stored in a container with a tight fitting lid. Solid hazardous waste must be stored in a container and kept covered. Immediately ensure all hazardous waste containers are properly stored closed. A followup inspection will be conducted within 30 days.

Violation Date: 11-27-2019
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description: Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.
Violation Notes: Returned to compliance on 01/03/2020. Five, 250 gallon totes of hazardous waste were observed in accumulation longer than 90 days. Please note Large Quantity Generators of hazardous waste must dispose of hazardous waste within 90 days of beginning accumulation. Immediately dispose of the waste and send proof of disposal to this Agency. A followup inspection will be conducted within 30 days.

Violation Date: 11-27-2019
Citation: 22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8
Violation Description: Failure of a generator to conduct, when required, a source reduction evaluation review and plan every four years, and/or failure of the review and plan to contain all required information.
Violation Notes: Returned to compliance on 01/03/2020. The hazardous waste management performance report for 2019 based on waste generated in 2018 was not available for review at this time. Please note this report is one of three components of required SB14 documentation. SB14 was last required to be done by 9/1/19 for wastes generated in 2018. Within 60 days complete the report and have it available for review.
Violation Division: Orange County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 416845
Site Name: THERMAL-VAC TECHNOLOGY
Violation Date: 03-17-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 07/03/2017. Drums storing hazardous waste (used acetone, used oil) were unmarked with the required information. In addition, several drums storing hazardous waste were not marked with the waste's hazardous property. Mark all containers storing hazardous waste with the required information. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/03/2020. Thirteen hazardous waste containers were not properly labeled as Hazardous Waste with all required subsequent information. Six hazardous waste containers were labeled as Hazardous Waste, but the labels were missing required information or were not legible. Please note once hazardous waste is placed into a container, it must be labeled as Hazardous Waste, with name and address of the generator, physical and chemical characteristics of the waste, and start date of accumulation. Immediately ensure all hazardous waste containers are properly labeled. A followup inspection will be conducted within 30 days.

Eval Notes: On site to conduct a RCRA Hazardous Waste Large Quantity Generator reinspection. Met with Heather Falcone, CEO. Walked throughout the facility and inspected hazardous waste storage areas. At this time hazardous waste containers were observed properly labeled and stored closed and within accumulation time limits. The following observations made during the routine inspection on 11/26/19 have been corrected: - Five, 250 gallon totes of hazardous in accumulation longer than 90 days - Containers are no longer on site. Hazardous waste manifests showing disposal of these containers were available for review. - Hazardous waste containers with hazardous waste labels missing required information or no hazardous waste labels - Containers observed at this time were properly labeled as hazardous waste. - Hazardous waste containers stored open - Containers with liquids were observed with tight-fitting lids and containers with solids were kept covered. - Cyanide contaminated [Truncated]

Eval Notes:	Received an email correspondence from CW Berry of Thermal Vac regarding the quantity of Potassium Cyanide that will be utilized at the facility. Per Mr. Berry, the facility will be well below the 100 TQ threshold. Sorry for delay, I had 47 CERS filings to do!! We have reduced to amount we store below the 100 pound limit. I have confirmed the amount in the tanks is 81 pounds based on lab analysis from Western Analytical Labs. I can send lab reports if you would like. I will be at Thermal-Vac tomorrow and confirm the details of storage and send that confirmation to you. We have arranged with Miles Chemical to purchase Potassium Cyanide in smaller packaging. Thanks CW

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a compliance inspection of the above facility on July 3, 2018. The facility is currently in Level 1 for Zinc, Iron, Nitrite plus Nitrate, Aluminum, and pH. The Annual Report and Ad Hoc Reports have not yet been submitted for the 2017-2018 reporting period. Staff met with Sean Driscol, Director of Operations. Mr. Driscol did not have knowledge of where the SWPPP or training records were kept. A site walk was then conducted. Industrial materials and equipment were observed without BMP implementation in the maintenance area at the northeastern portion of the facility. Mr. Driscol noted that tarps are deployed during rain events. 55-gallon drums containing waste oil were observed without cover or secondary containment. Scrap metal and industrial equipment were observed stored without BMP implementation at the northeastern corner of the facility. A Notice of Violation, dated September 19, 2017, was issued regarding the observations. 55-gallon drums containing unknown liquids were observed next to the property fence line without BMP implementation. Totes and 55-gallon drums of unknown liquids without BMP implementation were observed in the waste water treatment area at the northern portion of the facility. The facility's Level 1 ERA Report BMP implementation schedule notes that old equipment and materials will be removed or covered by 10/2/2017. Mr. Driscol noted that they are planning on constructing permanent overhead cover for the maintenance and waste water treatment areas.

Eval Notes: Regional Board Staff conducted a compliance inspection of the above facility on September 13, 2017. Ad Hoc Reports from 2016-2017 showed very high levels of Nitrite + Nitrate of 204.04 mg/L (0.68 mg/L). The SWPPP was reviewed and needs to be re-written to be in compliance with the General Permit. A Monitoring Implementation Plan, Site Map, and all appendices were missing from the SWPPP. The Pollution Prevention Team needs to be updated and properly trained on sampling and monitoring requirements. The last training records that were provided were from 11/24/2015. A site walk was conducted and an uncovered boneyard with used industrial equipment was observed at the northeast corner of the site. Ms. Falcone noted the used industrial equipment will be cut up to scrap metal in the next couple of weeks. Evidence of unauthorized non-storm water discharges from the chiller in the eastern portion of the facility was observed during the inspection. Photos were taken.

Eval Date: 10-30-2002
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a routine compliance inspection of the above facility on October 30, 2002. The SWPPP was last updated 2/28/01 with training records dating 3/14/02. Most of the items noted in previous inspections have either been moved indoors or removed from the facility. Mr. Oaks expressed the facility's interest in becoming exempt once Phase II of the General Industrial Permit is adopted. No major violations were observed at this time.

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine RCRA Hazardous Waste Large Quantity Generator inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. Met with Heather Falcone, CEO. The facility generates Large Quantities of RCRA Hazardous Waste from metal finishing operations. A walkthrough of the facility was conducted and the following was observed: - Five, 55 gallon drums of waste acetone were not properly labeled as hazardous waste - One, 250 gallon tote of waste nitric acid had an incomplete hazardous waste label, missing the chemical and physical property - One, 250 gallon tote of waste copper cyanide solution had an incomplete illegible hazardous waste label and was dated June 2019 - One, 250 gallon tote of waste copper solution had an incomplete illegible hazardous waste label and was dated June 2019 - One, 250 gallon tote of waste copper stripper with high pH had an incomplete illegible hazardous waste label and was dated June 2019 - One, 250 [Truncated]

Eval Date: 11-30-2011
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: Sunny and cool. SWPPP site plan has been updated to show previously-missing exposed equipment but needs labels. Trench drain from central yard has been cleaned, rusted barrel emptied of water, dirt removed, and some of the rusted metal is now gone. Storm water samples show excursions for various metals at both monitoring locations. Contacts reported that metal items are covered where they are important to operations. Recommended covering rusted metal items in particular to bring down their sample results and explained that results show that BMPs are inadequate. Contacts report that chiller leaking potable water is planned to be replaced.

Eval Notes: On site to conduct a routine Hazardous Waste inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. Present for the inspection was Nithesh Paramesh, Operations Manager, Jose Sanchez, Plating Manager, and Charles Berry, Consultant. The facility has begun generating Large Quantity Generator volumes of RCRA hazardous waste as of 2017 and has an active Federal EPA ID number. Walked throughout the facility and observed hazardous waste generation points and storage areas. The following was observed: - 55 gallon drum of waste acetone was observed open with a funnel and not properly labeled as Excluded Recyclable Material - One super sack containing waste gloves and rags was observed open and not properly labeled as Hazardous Waste The facility operates a ultrasonic cleaner to clean parts contaminated

Eval Notes: On site to conduct a routine Hazardous Waste inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. Present for the inspection was Nithesh Paramesh, Operations Manager, Jose Sanchez, Plating Manager, and Charles Berry, Consultant. The facility is conducting on site recycling of used acetone. The facility operates a ultrasonic cleaner to clean parts contaminated with oil/grease using acetone. Once the acetone is spent, it is transferred to a 55 gallon drum. Once the drum is full it is pumped into an acetone recycling unit. Filters capture the contaminants from the acetone and are reported to be managed as hazardous waste, no waste filters were observed at this time. The facility recycles approximately 55 gallons of acetone per month. Please do the following: - Begin labeling the 55 gallon drum of acetone as excluded recyclable material - On CERS, Facility Information Business Activities page, mark Yes for G Does your facility recycle more [Truncated]

Eval Notes: On site to conduct a routine Tiered Permitting Permit by Rule (PBR) inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. Present for the inspection was Nithesh Paramesh, Operations Manager, Jose Sanchez, Plating Manager, and Charles Berry, Consultant. The facility has submitted to be conducting PBR treatment of hazardous waste through CERS ID 10517683. The facility is operating one PBR fixed treatment unit comprised of 6 tanks, for pH adjust and metal precipitation. Wastewater being treated is generated from the electrolytic nickel plating line, copper plating line and dip brazing line. For the nickel plating line, nickel dragout and rinse/cleaning tanks get sent to holding tanks for treatment. Plating baths are not treated. The plating line also has nitric acid tanks which get hauled off on a manifest when they are spent. For the copper plating line, only dragout tanks are sent to the treatment unit. Cleaning and rinse baths get sent [Truncated]

Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Late Report
Violation Notes: Failure to submit the 2010-2011 Annual Report by July 1, 2011 deadline.

Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 416845
Site Name: THERMAL-VAC TECHNOLOGY
Violation Date: 11-27-2019
Citation: 22 CCR 15 66265.177 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.177
Violation Description: Failure to separate incompatible wastes from the same container, nearby containers, or unwashed containers which previously contained incompatible waste or materials.
Violation Notes: Returned to compliance on 01/03/2020. Cyanide contaminated waste is reported to be stored in a container with other solid waste. Please note this waste may not be compatible with other wastes being stored in the container. Within 30 days obtain a container specific for storage of cyanide contaminated waste.

Site ID: 416845
Site Name: THERMAL-VAC TECHNOLOGY
Violation Date: 03-17-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 07/03/2017. Over 7 drums storing used acetone were on site, unmarked with each drum's accumulation start date. One tote storing nickel strike solution was on site, marked with an accumulation start date of 7-7-14. A drum storing used oil was unmarked. Review of manifests show that these waste streams were last removed by a registered hauler for proper recycling / disposal over 180 days ago. The allowable storage time for a small quantity generator (SQG) is 180 days. However, if the waste must be transported over a distance of 200 miles or more to its TSD facility, the generator may store the waste on site for up to 270 days. Have the hazardous waste that has been on site beyond allowable storage time removed for proper recycling/disposal. Submit a copy of the removal records to this Agency within 30 days.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 01/03/2020. Six hazardous waste containers were observed stored open. Please note liquid hazardous waste must be stored in a container with a tight fitting lid. Solid hazardous waste must be stored in a container and kept covered. Immediately ensure all hazardous waste containers are properly stored closed. A followup inspection will be conducted within 30 days.

Violation Description: Failure to provide initial and annual training to employees, who handle cyanide process solutions, cyanide-containing rinse waters, or manage cyanide-containing aqueous waste, on how to reduce wastes in the production area, including, but not limited to, procedures to: 1. reduce drag-out of plating baths, 2. minimize contaminants in process baths, 3. extend process bath life, 4. minimize chemical spills and splashes from process and rinse solutions handling practices, and 5. respond to chemical spills to reduce waste and minimize releases from process and rinse solutions handling practices.

Violation Notes: Returned to compliance on 05/13/2020. Annual employee training records for employees handling cyanide were not available for review. The most recent training records were dated 4/17/18. Within 60 days have the employees trained and maintain training records for a minimum of three years. Training documentation should consist of: topic and date of training, employee name, signature and title/responsibilities.

Violation Description: 15, Section(s) 66265.52
Failure to include all of the following in the Contingency Plan:
description of actions personnel will take in response to a release or
emergency, arrangements with local authorities, list of emergency
coordinators including name, addresses & phone numbers, list of
emergency equipment and their physical description, location and
capabilities,- evacuation plan, and OES phone number. (If the owner or
operator has already prepared a Spill Prevention, Control, and
Countermeasures (SPCC) Plan or some other emergency or contingency
plan, the owner or operator need only amend that plan to incorporate
hazardous waste management provisions.)

Violation Notes: The contingency plan available for review is the CERS Consolidated
Business Emergency Response and Contingency Plan, which does not have
all the required content for a Large Quantity Generator of hazardous
waste. Complete a plan with all required content as specified in the
violation text.

Violation Division: Orange County Environmental Health

Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Heather Falcone, director of quality, and Sean Driscoll, director of operations, were present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the required information, except as cited above. The facility is considering the on site reclamation of their used acetone for on site reuse. They are evaluating effective stills that will meet their standards. The continuous presence of floor drainage liquids in the ADB lineup (tank 7 nitric acid and tank 3 alkaline etch locations) two catch sumps and its possible classification as a wet process floor was discussed. facility on July 3, 2018. The facility is currently in Level 1 for Zinc, Iron, Nitrite plus Nitrate, Aluminum, and pH. The Annual Report and Ad Hoc Reports have not yet been submitted for the 2017-2018 reporting period. Staff met with Sean Driscol, Director of Operations. Mr. Driscol did not have knowledge of where the SWPPP or training records were kept. A site walk was then conducted. Industrial materials and equipment were observed without BMP implementation in the maintenance area at the northeastern portion of the facility. Mr. Driscol noted that tarps are deployed during rain events. 55-gallon drums containing waste oil were observed without cover or secondary containment. Scrap metal and industrial equipment were observed stored without BMP implementation at the northeastern corner of the facility. A Notice of Violation, dated September 19, 2017, was issued regarding the observations. 55-gallon drums containing unknown liquids were observed next to the property fence line without BMP implementation. Totes and 55-gallon drums of unknown liquids without BMP implementation were observed in the waste water treatment area at the northern portion of the facility. The facility's Level 1 ERA Report BMP implementation schedule notes that old equipment and materials will be removed or covered by 10/2/2017. Mr. Driscol noted that they are planning on constructing permanent overhead cover for the maintenance and waste water treatment areas.

The following violations remain outstanding: I162 G The facility has obtained a Professional Engineer certified hazardous waste tank assessment, however the engineer stated the secondary containment is inadequate due to opening in the concrete berm. The facility stated the opening leads to a grate with a sump to capture any liquids which would escape the containment area, which would be pumped back to the tanks for treatment. Please obtain a certification for the secondary containment. I175 G The contingency plan was received by this Agency but is missing components required per Title 22, 66265.52 (d-f). Immediately submit corrections to the contingency plan. This report was sent to nparamesh@thermalvac.com.

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Called and spoke with Nithesh Paramesh, Director of Operations, about the outstanding violation and return to compliance. The following violation remains outstanding: I570 G During a routine inspection conducted on 12/11/18, a 110 pound (50 kg) container of potassium cyanide was observed in storage and 122 pounds (55 kg) of potassium cyanide was observed in plating bath solutions. The facility is required to comply with Title 19 Division 2 Chapter 4.5 of the California Code of Regulations and have a Risk Management Plan (RMP) completed, which was unavailable for review. This Agency has received notification that arrangements have been made with the chemical supplier to obtain the cyanide in smaller containers, and cyanide concentrations in the plating baths have been decreased such that the facility is not subject to RMP requirements. The facility has not provided any method to demonstrate that they are under the threshold quantity for cyanide. Please submit the [Truncated]

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: hot and sunny. SWPPP is dated 2001. Last sample 10/13/2009: E-side: TSS 616; SC 628; W-side: TSS 368; SC 626. Site plan needs to be updated to show all exposed industrial equipment and sources of discharge. Obs'd evidence of spill from Bldg 2 Canopy area; Contact unable to provide information. Corroded roof vents appear to contribute to rust stains at some downspouts. Found heavily-rusted drum filled with water; per Contact, drum has been there as long as he can remember. Found dirt stored in open pallet crates and many rusting parts and containers in maintenance storage area. Contact agreed to dispose of dirt and dispose/cover rusted items. Organic debris has filled lower end of trench drain through production area; debris is wetted by condensate or potable chiller water; Contact agreed to clean.

Eval Notes: CERS ID 10517683 Tiered Permitting submittal dated 7/23/20 was declined on 7/28/20 and remains declined. Violation I011 for not providing an acceptable submittal remains outstanding. Please make the following corrections and resubmit within 30 days - Financial Assurance documents were reviewed and not accepted since closure costs are 2018 closure costs. This facility did not submit correct closure costs for 2019 since same costs as 2018 costs were submitted. California regulations require that you adjust estimated costs for closing the treatment system by an inflation factor annually. Also, please be advised that the salvage value of your assets must be reviewed on an annual basis to be sure that depreciation and changes made to your inventory of equipment are reflected in the salvage value estimate. The following calculations must be made in order to obtain correct closure costs for 2020: 2018 closure cost estimate = \$18,450.00 - \$66,262.50 (salvage value) =- [Truncated]

Eval Notes: On site to conduct a California Accidental Release Program Level 1 reinspection. Met with Nithesh Paramesh, Director of Operations. Violation 1570 was cited during a routine inspection on 12/11/18 due to the storing over 100 lbs of potassium cyanide in storage and plating baths without a Risk Management Plan in place. The facility has provided calculations of cyanide concentrations in copper cyanide plating baths in tanks 13, 14, and 15, showing 73 lbs of cyanide. A walkthrough of the facility was conducted and observed chemical storage areas. At this time the facility is below process thresholds for potassium cyanide. The facility has arranged with their chemical supplier to receive cyanide in 90 lb containers. Mr. Paramesh will ensure there is not at any point over 100 lbs of cyanide in storage at any one time. Please note the facility will be subject to the requirements of a Risk Management Plan per Title 19 Division 2 Chapter 4.5 of the California Code of [Truncated]

Eval Notes: Regional Board Staff conducted a compliance inspection of the above facility on September 13, 2017. Ad Hoc Reports from 2016-2017 showed very high levels of Nitrite + Nitrate of 204.04 mg/L (0.68 mg/L). The SWPPP was reviewed and needs to be re-written to be in compliance with the General Permit. A Monitoring Implementation Plan, Site Map, and all appendices were missing from the SWPPP. The Pollution Prevention Team needs to be updated and properly trained on sampling and monitoring requirements. The last training records that were provided were from 11/24/2015. A site walk was conducted and an uncovered boneyard with used industrial equipment was observed at the northeast corner of the site. Ms. Falcone noted the used industrial equipment will be cut up to scrap metal in the next couple of weeks. Evidence of

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/23/1991
Comments: SSI Report was reviewed by Region 4 staff and recommends NFA by Site Mitigation. HRS I score preliminarily 2.22. The reasons for low scoring are: Remediation of soil was completed by Orange County, Santan Ana River is not used for drinking or recreation, and present use of the property is by Nursery Supplies Inc.

Completed Document Type: De-Certification
Completed Date: 08/05/2019
Comments: DTSC de-certified the Site due to contamination found on site after the Site was certified in 1994. SoCalGas, the responsible party, has entered into a new Voluntary Agreement with DTSC because contamination was left in place onsite. A Land Use Covenant will be placed on the Site before it is re-certified.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 05/17/2017
Comments: DTSC reviewed the documents regarding the construction project that SoCalGas is currently undertaking and which revealed PAHs contamination not previously removed, had a conference call with SoCalGas and their consultant (on 5/10/2017), and discussed the situation internally. DTSC then emailed Ben Ellis of SoCalGas that DTSC is not requiring a VCA at this time and to submit a Tech Memo with their plans to remove and dispose of the contaminated soils and after the fieldwork is done to submit a completion report for DTSC's review.

Completed Date: 07/25/2019
Comments: VCA signed by SoCalGas and DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: De-Certification
Completed Date: 08/05/2019
Comments: DTSC de-certified the Site due to contamination found on site after the Site was certified in 1994. SoCalGas, the responsible party, has entered into a new Voluntary Agreement with DTSC because contamination was left in place onsite. A Land Use Covenant will be placed on the Site before it is re-certified.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 05/17/2017
Comments: DTSC reviewed the documents regarding the construction project that SoCalGas is currently undertaking and which revealed PAHs contamination not previously removed, had a conference call with SoCalGas and their consultant (on 5/10/2017), and discussed the situation internally. DTSC then emailed Ben Ellis of SoCalGas that DTSC is not requiring a VCA at this time and to submit a Tech Memo with their plans to remove and dispose of the contaminated soils and after the fieldwork is done to submit a completion report for DTSC's review.

Site 2 of 2 in cluster AH

Relative:
Higher

Manufactured Gas Plants:

Actual:
180 ft.

The site is on a 0.25 acre lot located in the City of Orange. The MGP operated from 1905 to 1911. The site is currently used as an unmanned natural gas meter and regulator station. A PEA approved in April 1993 revealed that the site's soil is impacted with PAHs and TPH. Groundwater does not appear to be affected. A Removal Action is scheduled in September 1993 to remove 2 - 6 feet of the site's surface soil to health base levels.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/04/2021

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 07/26/2021
Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/21/2021

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895

Number of Days to Update: 57	Next Scheduled EDR Contact: 10/04/2021
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/09/2021	Source: Department of the Navy
Date Data Arrived at EDR: 02/11/2021	Telephone: 843-820-7326
Date Made Active in Reports: 03/22/2021	Last EDR Contact: 05/05/2021
Number of Days to Update: 39	Next Scheduled EDR Contact: 08/23/2021
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/23/2021	Telephone: 703-603-0695
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 05/21/2021
Number of Days to Update: 85	Next Scheduled EDR Contact: 09/06/2021
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/23/2021	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

630 NORTH BATAVIA ST
630 NORTH BATAVIA ST
ORANGE, CA 92868

TARGET PROPERTY COORDINATES

Latitude (North):	33.797636 - 33° 47' 51.49"
Longitude (West):	117.862778 - 117° 51' 46.00"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	420132.9
UTM Y (Meters):	3739859.2
Elevation:	169 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5641308 ORANGE, CA
Version Date:	2012

West Map:	5641294 ANAHEIM, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

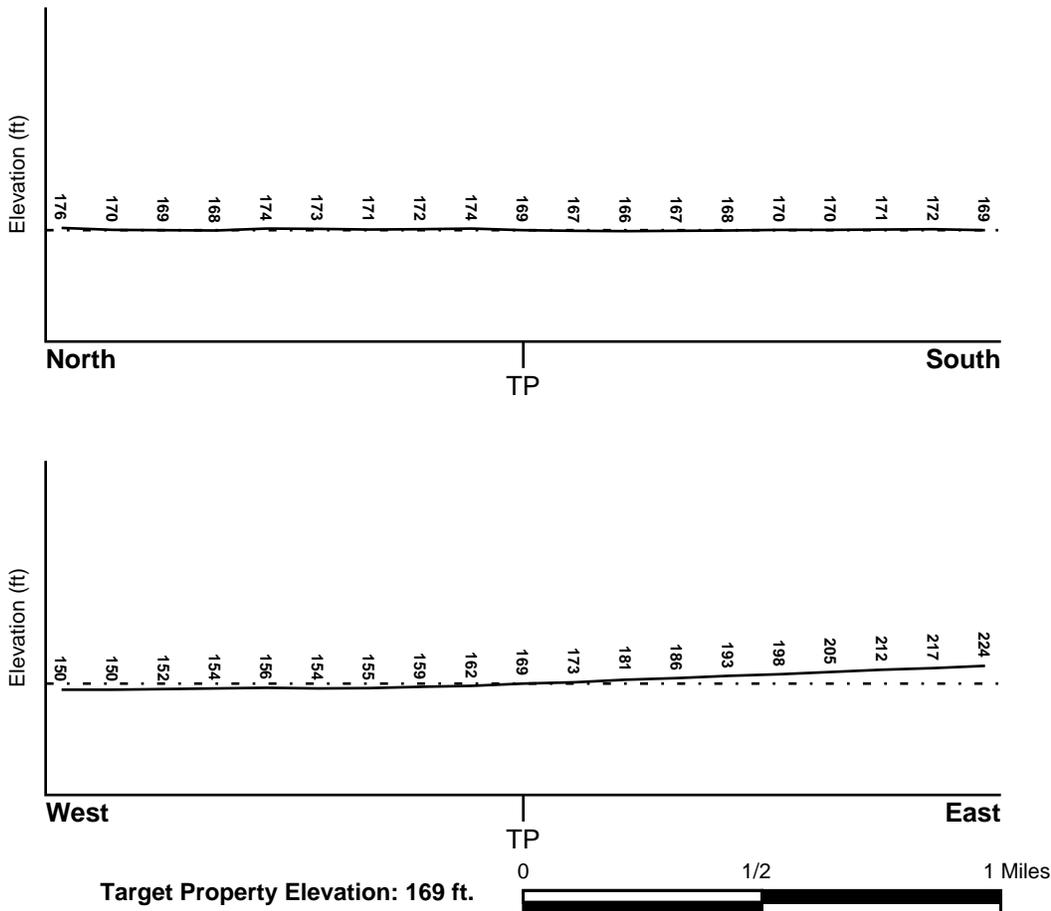

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06059C0161J	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06059C0142J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ORANGE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NNE
Site Name:	COSDEN OIL & CHEM CO
Site EPA ID Number:	CAD000097634
Groundwater Flow Direction:	Southwest
Inferred Depth to Water:	70 feet.
Hydraulic Connection:	The uppermost aquifer is the upper aquifer of the Coast Plain basin that averages 800 feet in thickness and is unconfined.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

4G	1/2 - 1 Mile SSW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MODJESKA

Soil Surface Texture: gravelly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	gravelly loam	Not reported	Not reported	Max: 141 Min: 141	Max: 6.5 Min: 6.1
2	14 inches	62 inches	very cobbly loam	Not reported	Not reported	Max: 141 Min: 141	Max: 6.5 Min: 6.1
3	62 inches	70 inches	very gravelly loamy sand	Not reported	Not reported	Max: 141 Min: 141	Max: 6.5 Min: 6.1

Soil Map ID: 2

Soil Component Name: HUENEME

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GeoSyntec Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
