

23 August 2021

Mr. Eric Staley
Staley Point Acquisition Holdings LLC
11150 Santa Monica Blvd., Suite 700
Los Angeles, CA 90025

Subject: Phase I Environmental Site Assessment
Subject Property: 630 North Batavia Street, Orange, CA
Orange, California

Dear Mr. Staley:

In accordance with your authorization of Geosyntec Consultant's (Geosyntec's) 9 July 2021 proposal, Geosyntec prepared the enclosed Phase I Environmental Site Assessment (ESA) report for the approximately 3.06-acre property located at 630 North Batavia Street, Orange, California (referred to herein as "Site" or "Subject Property"). Enclosed is an electronic copy of the report.

Should you have questions regarding this submittal or need additional information, please do not hesitate to contact us. We appreciate the opportunity to be of service to you.

Sincerely,

Brian Rockwell
Professional

Michael Lambert
Senior Principal

EXECUTIVE SUMMARY

Geosyntec Consultants was retained by Staley Point Acquisition Holdings LLC (referred to as the “Client” or “User”), to perform a Phase I Environmental Site Assessment (ESA) for the approximately 3.06-acre property located at 630 North Batavia Street in Orange, CA (referred to herein as “Site” or “Subject Property”). This Phase I ESA was conducted in general accordance with the scope and limitations of certain guidance contained within the American Society for Testing Materials (ASTM) Practice E1527-13 to identify, to the extent feasible, “Recognized Environmental Conditions¹” (RECs) at the Site, as the “REC” terminology is defined by ASTM E1527-13.

The Site is currently developed with two commercial/industrial buildings occupied by Roseburrough Tool Inc. for the fabrication and sale of concrete, plaster, and masonry tools. The building on the eastern portion of the Site has a footprint of approximately 22,128 square feet and contains retail and office space, and the building on the western portion of the Site has a footprint of approximately 34,593 square feet and contains tool manufacturing operations including the cutting, grinding, and welding of sheet metal, and a spray paint booth. Based on a review of historical resources, by the late 1800s, a road traversed east to west through the Site, and the Site was bounded to the north by a railroad. By 1938, the Site was agricultural (orchard) and remained agricultural through at least 1952. By 1963, the southeastern portion of the Site was developed with a commercial/industrial building and other small structures, and a rail spur extended through the Site west of the building. Through the years, the Site building expanded, and equipment was staged in the exterior portions of the Site. By 1985, the western portion of the Site was developed with a commercial/industrial building and much of the exterior equipment previously observed was no longer present. By 1990, exterior portions of the Site were asphalt-paved, and the rail spur was no longer present; the Site has remained relatively unchanged since 1990. Based on prior investigation reports, the Site was first occupied by Kerns for blending of lubricating oils. Pennwalt Corporation purchased the Site in approximately 1969 and added grease production, which was produced until 1986. Pennwalt also manufactured over 150 different products in batch processes, including cutting oils, drawing compounds, acid cleaners, caustic cleaners, detergents, and soaps. The manufacturing process utilized approximately 38 mixing tanks and aboveground storage tanks located both in the building on the western portion of the Site and between the two buildings. Pennwalt’s operations were discontinued in April 1994. Roseburrough Tool Inc. has occupied the Site since at least 1995.

¹ As defined by ASTM E1527-13, a Recognized Environmental Condition (REC) is: “*the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*” ASTM E1527-13 also defines a “Historical Recognized Environmental Condition” and a “Controlled Recognized Environmental Condition.”

The Site is bounded to the north by a railroad, to the east by North Batavia Street, and to the south and west by commercial/industrial properties. Surrounding property uses include or have included a commercial drinking water bottler, construction coordinators, auto crafts and waterproofing business, automotive repair shop, gas station, and commercial tool manufacturer.

We have performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM Practice E1527-13. Geosyntec has identified the following findings:

Recognized Environmental Conditions

- **Polychlorinated Biphenyls in Soils:** Based on a review of historical resources, the Site has been occupied by Roseburrough Tool since approximately 1995 for the fabrication and sale of concrete, plaster, and masonry tools. The Site was developed for commercial purposes in the 1960s and was previously occupied by Kerns Pacific, Keystone Precision, and Pennwalt Corporation. Kerns Pacific and Keystone Precision may have been divisions of Pennwalt, and additional divisions of Pennwalt identified in the 1970s and 1980s include chemical specialties, inorganic chemicals, lubricants, and metal preparation. Pennwalt's operations at the Site, which reportedly ceased in 1989, included manufacture of over 150 products and utilized approximately 38 aboveground storage tanks and mixing tanks. These tanks were primarily located in a concrete dike located east of the west building, but a previous tank farm had reportedly been located on a gravel bed centrally located between the two on-Site structures. Process wastewater was discharged to a three-stage clarifier (decommissioned in 1989) and then to the Orange County sewer system. Site assessment and remediation activities completed in 1988-1989 identified an oil/water mixture in the gravel bed and low levels of polychlorinated biphenyls (PCBs). Remediation activities including the excavation of approximately 2,000 cubic yards of soils in the area of the tank farm and beneath the former rail spur. Excavated areas were backfilled with clean import soil and compacted to local and state specifications. Backfilled areas were paved with a 4-inch asphalt surface overlaying a slurry coat.

PCB concentrations exceeded the Site-specific cleanup goal of 25 milligrams per kilogram (mg/kg) in one post-excavation sample, but was considered anomalous based on follow-up sampling. In a letter dated 21 September 1990, the Orange County Health Care Agency (OCHCA) confirmed completion of site investigation and remedial actions at the Site and stated that no further action was required at that time. While the remedial action was issued formal regulatory closure by a local agency, the remediation activities did not conform to the United States Environmental Protection Agency (EPA) requirements for PCB remediation, as set forth in the Toxic Substances Control Act ("TSCA", 40 CFR 761), which requires the characterization and remediation of soils containing PCBs above 1

mg/kg. Therefore, the left-in-place concentrations of PCBs above the 1 mg/kg TSCA threshold is considered a REC.

Historical Recognized Environmental Conditions

- **Residual Total Petroleum Hydrocarbons in Soils:** The final post-excavation soil samples collected following historical excavation and remediation activities contained total petroleum hydrocarbons (TPH) up to 3,200 mg/kg. A review of the post-excavation analytical results indicate that while samples were below the current non-cancer commercial/industrial endpoint recommended by the California Department of Toxic Substances Control (DTSC) for longer-chain aromatic TPH (C17-C32; 18,000 mg/kg), some samples were marginally above current applicable non-cancer commercial/industrial endpoint for shorter-chain aromatic TPH (C9-C16; 500 mg/kg). However, these limited potential exceedances to default non-cancer screening levels are not considered to represent a risk to commercial occupants, and in a letter dated 21 September 1990, the Orange County Health Care Agency (OCHCA) confirmed completion of site investigation and remedial actions at the Site and stated that no further action was required at that time. As such, this is considered a historical recognized environmental condition (HREC). In the event of a redevelopment scenario in which earthwork activities are conducted in areas with residual TPH-impacted soils, soil management will need to be conducted in accordance with South Coast Air Quality Management District (SCAQMD) Rule 1166.

De Minimis Conditions

- **Septic Tank:** A septic tank is currently operational at the Site, which was indicated to connect to the sanitary facilities and an exterior wash basin located at the western onsite structure. No evidence was observed or otherwise indicated for the current/historical disposal of substances of concern beyond diluted paint solutions discharged to the wash basin. A review of the chemical formula for the relatively small quantities of water-based paint that is diluted with water and discharged to the septic system via the wash basin indicates that this discharge is not capable of creating a significant environmental condition at the Site. Therefore, the presence and use of the septic tank is considered a *de minimis* condition.

1. INTRODUCTION

Geosyntec Consultants (Geosyntec) was retained by Staley Point Acquisition Holdings LLC (referred to as the “Client” or “User”) to perform an Environmental Site Assessment (ESA) of an approximately 3.06-acre property located at 630 North Batavia Street, Orange CA (referred to herein as “Site” or “Subject Property”). The Site location is shown on **Figure 1**, a current Site layout is shown on **Figure 2**, and the vicinity is shown on **Figure 3**.

1.1 Purpose

This Phase I ESA was conducted in general accordance with the scope and limitations of certain guidance contained within the ASTM International (ASTM) Standard Practice E1527-13. The intent of Geosyntec’s effort was to provide the Client with a Phase I ESA to identify, to the extent feasible, “Recognized Environmental Conditions”² (RECs) for the Site, as the “REC” terminology is defined by ASTM E1527-13.

1.1 Scope of Services

Geosyntec was authorized by the Client to complete a Phase I ESA of the Site. This work was conducted in accordance with authorization of Geosyntec’s 9 July 2021 proposal. For the purposes of the Phase I ESA report, the Client represents the “User”, defined as “the party seeking to use ASTM Practice E 1527 to complete an *environmental site assessment* of the *property*....” The Phase I ESA scope of work included: (i) review of pertinent information/documents provided to Geosyntec; (ii) review of local, state, and federal environmental databases for the Site and in the vicinity of the Site pursuant to the ASTM E1527-13 Practice; (iii) evaluation of historical land usage through obtaining/reviewing historical aerial photographs, Sanborn® fire insurance rate maps, city directories, property tax files, and/or topographic maps; (iv) a site visit to perform a visual reconnaissance of the site features and use of adjoining properties; (v) attempts to conduct interviews with one or more individuals familiar with the Site; and (vi) preparation of a Phase I ESA report. No work associated with “non-scope considerations”³ was considered as part of completion of this Phase I ESA.

² As defined by ASTM E1527-13, a Recognized Environmental Condition (REC) is: “*the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*” ASTM E1527-13 also defines a “Historical Recognized Environmental Condition” and a “Controlled Recognized Environmental Condition.”

³ “Non-Scope Considerations” are described in ASTM E1527-13 and include, but are not limited to: asbestos-containing building materials, biological agents, cultural and historic resources, ecological resources, endangered or otherwise protected species/habitats, health and safety, indoor air quality, industrial hygiene, lead based paint, lead in drinking water, mold, radon, regulatory compliance, wetlands, wildlife, etc. Notably, Phase II ESA work (such as may be done through a sampling effort) is a Non-Scope Consideration.

The Site reconnaissance was conducted by Josh Nandi of Geosyntec on 28 June 2021. The report was prepared by Ariella Goldstein and reviewed by Jon Ditzler and Veryl Wittig. Mr. Ditzler and Mr. Wittig are both identified as “Environmental Professionals” (as defined under the ASTM Practice E1527-13). Professional qualifications are presented in **Section 10**.

1.2 Significant Assumptions

Except as may be noted in Geosyntec’s 9 July 2021 proposal, no significant assumptions were taken into account by Geosyntec as part of this project.

1.3 Limitations, Deviations, and Exceptions

This Phase I ESA contains a property description and history, an environmental database review, a summary of visual observations made during the Site reconnaissance, and descriptions of information obtained during interview(s) of person(s) knowledgeable with the Site. The findings and conclusions presented in this Phase I ESA are the result of professional interpretation of the information collected at the time of this study. The Phase I ESA does not necessarily include an exhaustive search of all available records nor does it include detailed assessment of all Phase I ESA findings. Therefore, Geosyntec cannot “certify” or guarantee that any property is free of environmental impairment; no warranties regarding the environmental quality of the property are expressed or implied.

Geosyntec identified the following limitation during the ESA, which Geosyntec does not believe is material to its assessment:

- Geosyntec was unable to interview former owners or operators of the Site.

1.4 Special Terms and Conditions

Except as may be noted in Geosyntec’s proposal dated 9 July 2021, no special contractual terms and conditions were taken into account as part of this project.

1.5 User Reliance

This Phase I ESA report has been prepared solely for the benefit of the Client. Geosyntec has issued the Phase I ESA Report to the Client and grants this entity the right to rely on the report contents. Except as specifically set forth in Geosyntec’s proposal to perform this work, no third party shall have the right to rely on Geosyntec’s opinions rendered in connection with the Services without Geosyntec’s written consent, which may be conditioned on the third-party’s agreement to be bound to acceptable conditions and limitations similar to those agreed to by the Client. Please note that Geosyntec’s consent to provide a right-to-rely on this Phase I ESA report is subject to

Client's approval and to agreement to Geosyntec's terms and conditions associated with Geosyntec's performance of this specific Phase I ESA.

2. SITE DESCRIPTION

This section provides a description of the key characteristics of the Site. This description is derived from information gathered during the Site visit unless referenced otherwise.

2.1 Site Location and General Characteristics

The Site is an approximately 3.06-acre property with an Orange County Assessor Parcel number of 386-542-01. Current and historical addresses include 630 North Batavia Street, 630 Batavia Street North, and 630 North Batavia Avenue. The Site is currently owned by Roseburrough Tool Inc.

The Site is located in a mixed commercial and industrial area.

The Site location is shown on **Figure 1**, a current Site layout is provided on **Figure 2**, and the Site vicinity is shown on **Figure 3**.

2.2 Current and Former Use of the Site

The Site is currently developed with two commercial/buildings occupied by Roseburrough Tool Inc.: the eastern Site building contains retail and office space and the western Site building contains tool manufacturing operations including the cutting, grinding, and welding of sheet metal. Roseburrough Tool utilizes machining equipment and operates a paint spray booth. Exterior storage on racks to the south of the eastern Site building includes hoses, PVC pipes, large (approximately 10 foot by 10 foot) metal bins and wooden pallets with unspecified materials. The Site is bounded to the north by a railroad, to the east by North Batavia Street, and to the south and west by commercial/industrial properties. Industries in the vicinity include or have included a commercial drinking water bottler, construction coordinators, auto businesses, gas station, and commercial tool manufacturer. The current Site buildings were constructed by 1985, and the Site has been developed similar to its current configuration since 1990.

Based on a review of historical resources, the Site was agricultural (orchard) from at least 1938 to 1952. By 1963, the southeastern portion of the Site was developed with a commercial/industrial building and other small structures, and a rail spur extended through the Site west of the building. Through the years, the Site building expanded, and equipment was staged in exterior portions of the Site. By 1985, the western portion of the Site was developed with a commercial/industrial building and much of the exterior equipment previously observed was no longer present. By 1990, exterior portions of the Site were asphalt-paved, and the rail spur was no longer present; the Site has remained relatively unchanged since.

Based on a review of city directories, previous Site occupants have included Kerns Pacific Corp. Lubricant (1965-1980), Keystone Precision Lubricants Division (1970-1986), and Pennwalt Corp.

(1970-1994). The Site address has been identified as Roseburrough Tool Inc. since 1995. It appears Kerns and Keystone may be divisions of Pennwalt, and additional divisions of Pennwalt identified in the 1970s and 1980s included chemical specialties, inorganic chemicals, lubricants and metal preparation. Based on prior investigation reports, Pennwalt Corporation purchased the Site in approximately 1969 and manufactured over 150 different products in batch processes, including cutting oils, drawing compounds, acid cleaners, caustic cleaners, detergents, and soaps. The manufacturing process utilized approximately 38 mixing tanks and aboveground storage tanks (ASTs) located both in building on the western portion of the Site and between the two buildings. Pennwalt's operations were discontinued in April 1989.

2.3 Description of Structures, Roads, Other Improvements on the Site

The Site is currently developed with two commercial/industrial buildings consisting of retail and office space and manufacturing operations. The majority of the remainder of the Site consists of paved parking, and equipment storage area on the northwest and southern sides of the Site. A septic tank is present just east of the building on the western portion of the Site.

2.4 Current and Prior Use of Adjoining Properties

At the time of completion of this Phase I ESA, the vicinity surrounding the Site was commercial/industrial. The area land use immediately surrounding the Site was noted to be as follows:

	Current Observed Use	Identified Prior Use¹
Northwest	Mad Systems Inc. (Audio visual consultant) at 733 North Main Street	Agricultural through 1960s then commercial/industrial 1970s and beyond
North	L&S Construction/Coordinators at 674 North Batavia Street	Agricultural through 1960s then commercial/industrial early 1970s and beyond
	Carstar Orange Center and Western Specialty Contractors, former Western Waterproofing/Katsis Auto Crafts at 650 North Batavia Street	Agricultural through 1960s then commercial/industrial early 1970s and beyond
	Independent Forge Co. at 692 North Batavia Street	Agricultural through early 1970s then commercial industrial late 1970s and beyond
Northeast	Beacon Building Products, former Delta Lines, at 695 North Batavia Street	Agricultural through 1960s then commercial/industrial early 1970s and beyond
East	Show Fleet at 601 North Batavia Street	Agricultural through 1950s then commercial/industrial early 1960s and beyond
Southeast	Custom Comfort Mattress Factory at 579 North Batavia Street	Agricultural through 1950s then commercial/industrial early 1960s and beyond
South	SiteOne Landscape Supply and Bridge Associates, former Orange Transmissions Inc./Remanufactured Converter Mobile Inc., t 582 North Batavia Street	Agricultural through 1950s then commercial/industrial late 1960s and beyond
Southwest	Public Storage at 601 North Main Street	Agriculture through 1960s then commercial/industrial late 1980s and beyond
West	Ready Refresh, former/Nestle Water North America, at 619 [North] Main Street	Agricultural through early 1960s then commercial/industrial by 1966 and beyond.

1. Identified prior use from review of historical aerial photographs, topographic maps, database listings, and city directory listings. The review of these resources is presented in **Section 4** of this report.

The Site vicinity is shown on **Figure 3**.

2.5 Physical Setting

2.5.1 Topography and Geology

Figure 1 shows the location of the Site, as indicated on the United States Geological Survey topographic map. According to topographic maps, Google Earth, and the Radius Map Report from

Environmental Data Resources, Inc. (EDR; **Appendix B**), the Site is at an elevation of approximately 169 feet AMSL, and the regional topography slopes slightly to the west.

The USDA Web Soil Survey⁴ and Radius Map Report indicated Site soil is well-drained Modjeska gravelly loam. The Radius Map Report indicated geology underlying the Site is Cenozoic-era Quaternary stratified sequence.

2.5.2 Hydrology

According to the EDR Historical Topo Map Report topographic maps (**Appendix E**) and current aerial imagery, the nearest surface water bodies are the Bitterbush Channel, a canal approximately 0.3 miles west of the Site; Collins Channel, approximately 0.6 miles north of the Site; the Santa Ana River, located approximately one mile west of the Site, which runs northeast/southwest and flows west; and the Anaheim Coves, located approximately 1.5 miles northwest of the Site. No water bodies were mapped on the Site

Local groundwater flow direction may vary depending on area groundwater pumping, surface water bodies, land use development, localized topography, and other macro and micro features. According to a 2019 county map⁵, groundwater in the vicinity of the Site is first encountered at approximately 50-60 feet above mean sea level (AMSL; over 100 feet below ground surface [ft bgs]) and flows to the south, consistent with previous years. According to a Site Assessment Report for the Site prepared by ENSR and dated July 1989, -a boring completed to a depth of 65 feet did not encounter groundwater.

⁴ [Web Soil Survey \(usda.gov\)](https://websoilsurvey.sc.egov.usda.gov/)

⁵ https://www.ocwd.com/media/8348/june_wl_principal_2019.pdf

3. USER-PROVIDED INFORMATION

This section describes certain information provided to Geosyntec by the Client (the Client is the “User” of this Phase I ESA).

3.1 Title Records

Geosyntec was not provided with and did not review title records for the Site. A title search was not included in Geosyntec’s scope of services.

3.2 Environmental Liens or Activity and Use Limitations

The User did not provide information regarding environmental liens or activity and land use limitations associated with the Site.

3.3 Specialized Knowledge

The User did not provide documents pertaining to the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

The User did not provide information regarding commonly known or reasonably ascertainable information (as defined in AAI) regarding the Site.

3.5 Valuation Reduction for Environmental Issues

The User did not provide information regarding a valuation reduction.

3.6 Actual Knowledge

In accordance with the requirements of ASTM E1527-13 Section 6.4, the User has not conveyed to Geosyntec any actual knowledge or specific information pertaining to the existence of environmental liens or activity and/or use restrictions (AULs) at or regarding the Site.

3.7 Degree of Obviousness

The User did not provide information regarding the degree of obviousness of the presence or likely presence of contamination at the Site.

3.8 Owner, Property Manager, and Occupant Information

Contact information for the current owner/occupant was not provided.

3.9 Reason for Performing This Phase I ESA

The Client retained Geosyntec to perform this Phase I ESA for the Site to identify potential environmental concerns associated with the Site.

3.10 Additional Information

The Client did not provide additional records or information.

4. RECORDS REVIEW

Geosyntec’s records review consisted of the following, to the extent Geosyntec found these to be available and reasonably ascertainable: i) review of identified federal, state, and local environmental databases; ii) review of identified historical aerial photographs; iii) review of identified historical topographic maps; iv) review of identified Sanborn fire insurance maps; v) review of local authority permits/records; vi) review of property tax information; and vii) documentation provided by regulatory agencies. Geosyntec contracted with EDR to provide the records reviewed as described in Section 4.1.

4.1 Standard Environmental Records Sources

4.1.1 Environmental Database Search Approach

Geosyntec reviewed applicable and reasonably ascertainable federal, state, and local environmental-related databases as part of this Phase I ESA. The environmental database search was performed by EDR in an attempt to ascertain whether the Site or neighboring properties were suspected of having environmental conditions that could have impacted the surface or subsurface conditions in a way which could be considered a REC for the Site. Specific records and search distances (measured from the approximate property boundary of the Site) for the environmental databases were reported by EDR to be consistent with ASTM Practice E1527-13 and were discussed in the EDR report (25 June 2021). Database descriptions are included in the EDR report. The EDR Database Report is presented as **Appendix B**.

4.1.2 Environmental Database Search Results

This section summarizes the findings from the environmental-related database review and evaluates the potential for these listed sites to have impacted the surface or subsurface conditions in a way which could be considered a REC for the Site. The locations of these listed sites are shown on the Overview Map and Detail Map in the EDR Report.

4.1.2.1 *Subject Property*

The Site was identified by EDR (**Appendix B**) in the databases searched under Site address 630 North Batavia Street. Site entities have included Pennwalt Corporation and Roseburrough Tool Inc. Database listings are discussed by entity below.

- Pennwalt Corporation, a chemical producer, was identified on the CA Orange Co. Industrial Site, Toxic Substances Control Act (TSCA), CA Emissions Inventory (EMI), CA Hazardous Waste Tracking System (HWTS), Facility Index System (FINDS), and Enforcement & Compliance History Online (ECHO) databases. According to the databases, dioxins and/or PCBs were “released” on the property, and the case was closed

on 21 September 1990; however, no other details were provided. Further information regarding this case is provided in Section 4.3.3.1. This entity had compliance requirements with Toxic Releases Inventory Search (TRIS) for specialty cleaning, polishing, and sanitation preparations and a permit with the South Coast Air Quality Management District (SCAQMD) (described below).

- Roseburrough Tool Inc., a tool manufacturer, was identified on the CA HAZNET, CA HWTS, and CA California Environmental Reporting System (CERS) databases. According to the listings, this entity handled asbestos-containing waste in 1993 and unspecified oil-containing waste, acidic liquids, laboratory waste chemicals (detergent and soap), off-specification, aged, or surplus organics, latex waste, waste oil and mixed oil, alkaline solution, and organic solids in 2011. Minor administrative violations were issued in 2015 and 2018. Additional information regarding issued violations and resolutions can be found in section 4.3.3.

According to AQMD FIND⁶, which is a database for facilities with air permitting requirements, Roseburrough Tool Inc. coated metal parts and products, handled solvents, and operated a spray paint booth from at least 1996 to 2013 (and still present, based on the Site reconnaissance). A notice to comply was issued in 2002 regarding replacing filters, repairing a manometer, ensuring the correct fluid level, and maintaining records. A violation was issued in 2006 for selling a “glaze n seal clear wetlook concrete and masonry lacquer,” which has a high volatile organic compound (VOC) content. A notice to comply was issued in 2013 regarding using a compliant gun-cleaning solvent and maintaining records.

4.1.2.2 *Vicinity Properties*

EDR identified multiple adjoining and vicinity properties located within 1/4-mile or projected to be hydraulically upgradient of the Site in pertinent databases potentially indicative of a release (e.g., Leaking Underground Storage Tanks [LUST], Cleanup Sites), or in a database indicative of solid waste disposal (SWF/LF) or land use concerns (e.g., historical military sites). Based on our review of the available information, the following notable properties were identified adjoining, nearby, or hydraulically upgradient of the Site:

- Arrowhead Drinking Water/Nestle Waters North America, currently ReadyRefresh, at 619 [North] Main Street (west-adjoining and hydraulically cross gradient of the Site) had a LUST case for release of waste/motor/hydraulic/lubricating oil to soil opened in 1996. Excavation had occurred prior in 1965, but no other information regarding investigations or remediation was provided online. The case was closed on 7 December 2001; however,

⁶ <https://www.aqmd.gov/nav/FIND/facility-information-detail>

closure documents are not provided online. Further, the coordinates provided indicate that the tank was likely over 600 feet west-southwest and hydraulically downgradient of the Site. Due to regulatory closure, this property is not anticipated to have adversely impacted the Site. Further information is provided in Section 4.3.3.1.

- Delta Lines at 695 North Batavia Street (northeast-adjointing, across North Batavia Street, and hydraulically cross gradient of the Site) was identified by EDR on the CA Historical Underground Storage Tank (HIST UST) database for operating two 10,000-gallon motor vehicle fuel/diesel fuel underground storage tanks (USTs) at a truck terminal. There were no reported releases from these tanks; therefore, this property is not anticipated to have adversely impacted the Site.
- L&S Construction/Coordinators at 674 North Batavia Street (north-adjointing, across the railroad, and hydraulically upgradient of the Site) was identified by EDR on California Environmental Reporting System Hazardous Waste (CA CERS HAZ WASTE), California Environmental reporting System Tanks (CA CERS TANKS), California Hazardous Waste Tracking System (CA HAZNET), California Environmental Reporting System (CA CERS), California Hazardous Waste Tracking System (CA HWTS), California Underground Storage Tank (CA UST), Resource Conservation and Recovery Act – Small Quantity Generators (RCRA-SQG), Facility Index System/Facility Registry System (FINDS), Enforcement & Compliance History Information (ECHO), RCRA – Non Generators / No Longer Regulated (NonGen/NLR), California Statewide Environmental Evaluation and Planning System Underground Storage Tank (CA SWEEPS UST), and California Facility Inventory Database Underground Storage Tank (CA FID UST) databases indicative of hazardous waste generation and the presence of tanks. In the CA CERS HAZ WASTE, CA CERS TANKS, CA HAZNET, CA CERS, and CA HWTS databases, an aboveground petroleum storage tank (APST) was identified. Between the years 2011 and 2018, the facility was storing, bulking, transferring and/or reusing up to 0.5 tons of organic solids, unspecified aqueous solution, hydrocarbon solvents, inorganic solid wastes, tank bottom waste with halogenated organics, or waste oil and mixed oil. In the CA CERS database, a routine APST inspection stated the facility had the following petroleum storage capacity: 5,000 gallon double-walled diesel tank (installed 2012/2013 and assumed to be an above-ground tank based on the associated inspection type), 360 gallon double-walled waste oil lube cube, 250 gallon double-walled motor oil lube cube, 250 gallon double-walled hydraulic oil lube cube, two (2) 55 gallon drums of motor oil, and one (1) 55 gallon drum of ATF Secondary containment for APSTs. There were no reported releases from these tanks. Based on the nature of the database listings, this property is not anticipated to have adversely impacted the Site.

- Western Waterproofing/Katsis Auto Crafts, currently Carstar Orange Center/Western Specialty Contractors, at 650 North Batavia Street (north-adjointing, across the railroad, and hydraulically upgradient of the Site) was identified by EDR on CA CERS HAZ WASTE, California Emissions Inventory (CA EMI), CA HAZNET, CA CERS, CA HWTS, RCRA-SQG, FINDS, ECHO, and RCRA NonGen/NLR databases indicative of hazardous waste generation and the presence of tanks. The CA EMI database indicated that in 1987, the facility released 2 tons of total organic hydrocarbon gases and 2 tons of reactive organic gases that year. The HAZNET database reported in 2017, the facility reused approximately 0.1 tons of liquids with pH ≤ 2 , recovered approximately 2 tons of unspecified solvent mixture, and reused waste oil and mixed oil. In 2016, the facility stored, bulked and/or transferred unspecified aqueous solution, organic solids, and/or organic liquid mixture. There was no record of spills or releases to the environment from the handling of these substances. The CERS database indicates multiple violations were given to the facility. In 2015, a violation was issued for failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of hazardous material and a business emergency plan, in 2018 a violation was issued for failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities. Based on the nature of the database listings, this property is not anticipated to have adversely impacted the Site.
- Mike A. Saucedo at 610 North Batavia Street (south-adjointing and hydraulically downgradient of the Site) was identified on the CA Hist UST database for operating a 10,000-gallon diesel fuel UST and a 2,000-gallon diesel fuel UST; no releases were reported. This entity was also identified on the California Pesticide Regulation Licenses Listing (CA PEST LIC) database in 2020 and 2021; no information was provided. This database includes entities with pesticide licensing. Based on the lack of reported releases from the USTs and other information within the database listings, this property is not anticipated to have adversely impacted the Site.
- Independent Forge Co. at 692 North Batavia Street (approximately 200 feet north and hydraulically upgradient of the Site) had a tiered permit with the California Department of Toxic Substances Control (DTSC). In 2018, a Phase I ESA checklist was completed for this property. According to the document, an environmental assessment had been completed for this property due to liquid/sludge containment areas, surface impoundments, collection ponds, and/or lagoons. Several hazardous materials areas were visually inspected by DTSC, who did not document an actual or suspected release, and none required further investigation. The status of the case is currently listed as inactive. This property was identified by EDR on the CA EnviroStor database (among others not

indicative of releases or impacts). Due to the lack of evidence for a historical release to have occurred, this property is not anticipated to have adversely impacted the Site.

- Big E Station at 890 North Batavia Street (approximately 0.25 miles north and hydraulically upgradient of the Site) had a LUST case for a gasoline and fuel oxygenates release to groundwater. According to the most recent groundwater monitoring report (fourth quarter 2012), methyl tert-butyl ether (MTBE) was not detected above its laboratory reporting limit in groundwater samples collected from the Site. The case was closed in 2014. Due to the lack of significant groundwater impacts, this property is not anticipated to have adversely impacted the Site. This property was identified by EDR on the CA LUST database (among others not indicative of releases or impacts). Further information is provided in Section 4.3.3.1.

Other vicinity LUST cases had impacts to soil and reportedly received closure, so they were not further evaluated and are not anticipated to have adversely impacted the Site.

4.1.2.3 *Orphan Sites*

EDR did not identify orphan sites within the radius searched.

4.2 Historical Use Information

4.2.1 Historical Aerial Photographs

Geosyntec conducted an aerial photograph review to help evaluate past uses of the Site as well as adjoining properties. Geosyntec requested historical aerial photographs from EDR and was provided with aerial photographs from 1938, 1946, 1952, 1963, 1966, 1972, 1977, 1985, 1989, 1990, 1995, 2002, 2005, 2009, 2012 and 2016. A copy of the aerial photographs package is included as **Appendix C** to this report. In addition, Geosyntec reviewed Google Earth aerial photographs from 2017, 2018, and 2019. In review of these aerial photographs, Geosyntec made the following land use-related observations:

Location	Description
Site	In 1938, the Site was agricultural (orchard) and a road traversed east to west through the Site. The Site remained an orchard through at least 1952. By 1963, the southeastern portion of the Site was developed with a commercial/industrial building with vehicle or equipment storage around the building, and a rail spur extended onto the Site west of the building. This building appeared to be expanded in 1966 and by 1985 appeared to be similar in size to the present-day east Site building. By 1977, more extensive vehicle parking and equipment storage was observed on the Site, including potential small ASTs to the west of the building. In 1985, the western portion of the Site was improved with a

Location	Description
	rectangular-shaped building that appeared to be a portion of the present-day building on the western portion of the Site, which was expanded to its present-day size by 1995. No potential ASTs were observed on the 1985 aerial photograph. By 1990, exterior portions of the Site were asphalt-paved, and the rail spur was no longer present. The Site has remained relatively unchanged since.
Vicinity	From 1938 through the 1950s, the Site vicinity was primarily agricultural (orchard) based on row patterns of vegetation. By 1963, the northeast, east, southeast and south adjoining properties were developed with commercial/industrial buildings, but the west and north adjoining properties were still agricultural, specifically orchards. By 1966, the west adjoining property had a commercial/industrial building constructed in the south while the north was still vegetated. By 1972, the west adjoining property was improved with a paved parking lot, and another small commercial/industrial building was added to the northern part of the east adjoining property. By 1985, the area to the southwest was improved with several rectangular-shaped buildings similar to the present-day storage facility. By 1989, all adjoining properties were developed with the existing commercial/industrial buildings, and has remained relatively unchanged since.

The review of aerial photographs revealed historical agricultural, residential, and commercial/industrial land use which could be indicative of hazardous materials/chemical storage, management/usage, or disposal practices at and/or in the vicinity of the Site that could pose a threat to the soil, soil vapor, and/or groundwater quality at the Site. However, in this aerial photograph review, Geosyntec noted no definitive features indicative of chemical management (such as tank storage) or chemical spills (such as stained areas) on or into the ground at the Site or adjoining properties.

4.2.2 Fire Insurance Maps

EDR conducted a search for Sanborn[®] fire insurance maps for the Site and the adjacent area; however, the Site is not a mapped property and no Sanborn[®] fire insurance maps were found for the Site. The EDR Fire Insurance Map Research Results are presented in **Appendix D**.

Location	Description
Site	Property not mapped.
Vicinity	Properties not mapped.

4.2.3 Historical Topographic Maps

EDR supplied portions of USGS topographical maps of the Site and vicinity for additional historical information regarding the Site and surrounding areas. EDR supplied topographic maps of the Site from 1896, 1898, 1901, 1902, 1932, 1935, 1942, 1949, 1950, 1964, 1965, 1972, 1981, and 2012. A copy of the topographic photographs package is included as **Appendix E** to this report. In review of these historical topographic maps, Geosyntec made the following observations:

Location	Description
Site	From 1896 to 1935, a road was depicted running east to west through the Site. By 1942, the Site was depicted as an orchard. No significant changes were identified in 1950. By 1964, the Site was no longer an orchard and instead was improved with a rail spur and a building on the eastern side of the Site generally similar in size to the present-day east Site building. No significant changes were identified in 1972 and 1981. Individual structures were not depicted on the 2012 topographic map.
Vicinity	By 1896, a railroad was present immediately north of the site, and a secondary highway running north to south was present immediately to the east of the Site. From 1942 to 1950, adjoining properties were orchards with small residential-type structures to the north and east. By 1964, the northeast, east and south adjoining properties were improved with commercial/industrial buildings. The northwest property was cleared of vegetation, but no buildings were present. By 1972, the west adjoining property was cleared of vegetation and commercial/industrial buildings were present. By 2012, multiple surface water bodies were present: the Bitterbush Channel, a canal approximately 0.3 miles west of the Site, Collins Channel, approximately 0.6 miles north of the Site, the Santa Ana river, located approximately one mile west of the Site, which runs northeast/southwest and flows west, and the Anaheim Coves, located approximately 1.5 miles northwest of the Site. Individual structures were not depicted on the 2012 topographic.

The review of USGS topographical maps showed the presence of a railroad, agricultural land use (orchards), oil tanks, and commercial/industrial buildings in the vicinity of the Site which could be indicative of hazardous materials/chemical storage, management/usage, or disposal practices that could pose a threat to the soil, soil vapor, and/or groundwater quality at the Site. However, in this topographic map review, Geosyntec noted no labeled features showing chemical management or evidence of waste disposal on or into the ground at the Site.

4.2.4 City Directories

A search of historical city directories for the area of the Site was conducted by EDR. Business directories including city, cross reference, and telephone directories were reviewed, if available, at approximately five-year intervals (or less) for the years spanning 1920 through 2015. A copy of the city directory package is included as **Appendix F** to this report. In review of these listings, Geosyntec made the following observations:

Location	Description
Site	<p><u>630 North Batavia Street:</u> 1965: Kerns Pacific Corp Lubricant 1966: Kerns Pacific Division of Kerns United Corps. 1970-1975: Kerns United Division, Keystone Precision Lubricants Division, Pennwalt Corp., Metal Prep, Pennchem Admin. 1980: Kerns United Division Pennwalt Corp., Keystone Division, Metal Prep., Pennchem Admin., Pirkle Refrigerated Freight Lines 1986: Chemical Specialties Div., Inorganic Chemicals, Keystone Div., Metal Prep, Pennchem Admin., Smith Peter E. 1991-1994: Pennwalt Corporation 1995-2015: Roseburrough Tool</p>
Vicinity	<p><u>North Batavia Street:</u> 1965-1970: 572 N Batavia St. (south adjoining) listed as Mackel’s Truck Maintenance, Shaw Trucking Co. 1980-2015: 650 N Batavia St. (north adjoining) listed as Katsis Auto Crafts Inc., Dismantlers Locating Service, Orange Automotive Repair, Ezell Glassworks, Auto Glass Technology, Better Way Marine, Southwest Products, Marine Audiss, Perkins and Western Construction 1930-2009: 695 N Batavia St. (northeast adjoining) listed as J F Lamp, Crofoot Cosie Mrs., Clark Inland Cartage Division of Consolidated Freightways, Cal Hawaiian Freight Inc, CF Cartage & Container Division, Calif. Motor Express, CME Freight Inc., Sales & Service, Calif. Motorcycle, Mclean Trucking, Delta Lines, and Charles Wentworth 1975-2015: 610 N Batavia St (southeast adjoining) listed as Cal Wal Gypsum Supply, United States Gypsum Co Gypsum Div., US Home Security Systems, Kruse Norman, and Hydroscape Products Inc. 1991-1999: 593 N Batavia St. (east adjoining) listed as Knox Brothers Construction 1975-2015: 674 N Batavia St. (north-northwest adjoining) listed as Muesco Inc., Import Certification Lab, Coordinators Superstar Tours, L&S Construction, and Larkin Leasing Inc. 1991-2015: 675 N Batavia St. (northeast adjoining) listed as Pacific Supply Company</p>

Location	Description
	1970-2015: 586 N Batavia St. (south adjoining) list as Real Estate Development System, Orange Filter Co., Kluge Construction Co., Ogden Water Purifier, Bayside Concrete Construction, Kruse Norman, and Elite Ambulance. 1991-2009: 577 N Batavia St. (southeast adjoining) listed as Lynns Warehouse, Alfre Door & Cabinets, Memos Finished & Cabinets, D & D Recycling, and Peterson Detention Inc. 1975-2015: 670 N Batavia St. (north adjoining) listed as marketing associates, Maaco Auto Painting and Bodyworks, and Harnix Collision Center

The review of city directory listings revealed historical industrial land uses of tool/machine manufacturing, lubricant and metal manufacturing, construction and automotive services, consulting services, cabinetry and recycling at the Site and in the vicinity.

4.3 **Other Documents**

4.3.1 **Previous Environmental Assessment Reports**

There were no previous environmental assessment reports provided to Geosyntec preceding this Phase I ESA.

4.3.2 **Property Tax Files**

Geosyntec queried the Orange County land records⁷ website. The approximately 3.06-acre Site is identified as parcel 386-542-01; the retrieved parcel map and assessor information are included in **Appendix A**. A complete legal description was not provided to Geosyntec.

4.3.3 **Agency Regulatory Records**

Geosyntec queried online databases for information and contracted Environmental Support Services (ESS) to submit public records requests to local, state, and federal agencies. Requests and responses from each agency and applicable documents identified online are provided in **Appendix A**.

4.3.3.1 ***Local and State Agency Regulatory Records***

Geosyntec contracted ESS to submit records requests to the following local and state agencies:

- OCHCA
- DTSC – Cypress Office
- DTSC - Chatsworth Office

⁷ [OCPW Maps \(ocgis.com\)](http://ocgis.com)

- Cal Fire – Office of the State Fire Marshal
- Orange County Sanitation Districts – Industrial Waste
- City of Orange Building Department
- City of Orange Fire Department
- SCAQMD
- Regional Water Quality Control Board (RWQCB) – Santa Ana Region

Responses from the agencies with records are summarized below.

City of Orange Fire Department

The City's response indicated that the current business is Roseburrough Tool Inc., and is associated with 15 chemicals on-Site; no violations and no UST records were noted. The list of chemicals is as follows: 1-pheny-2-propanol, acetylene, argon compressed, oxygen, propane, acc micro finish gel, color release agent, diamond sealer, dura color hardener, gas oil blend, hydrochloric acid 10-33%, liquid Stabilizer, miscellaneous aerosols, SlabArmor™ Closer, and stripper.

City of Orange Building Department

The City's response included various building and plumbing permits. The Site applied for building permits in 1956 that included a 19,800 square foot/ two-story building that would be used as a factory. The Site also applied for two building permits in 1963: one for a 1,920 square foot/two story building used for industrial services and one for a 21 foot by 32 foot/one story building. In 1965, 1966, and 1983 the Site applied for plumbing, sewer and/or electric permits. In 1966, the Engineering Department Release for Issuance of Building Permits approved the Site's applications for building permits. In 1994, the Site was issued several permits for fire sprinklers, an electric water heater, a free standing metal canopy, front entrance weather canopy and side canopy. None of the documents were indicative of actions that could have adversely impacted the Site.

South Coast Air Quality Management District

SCAQMD's response included a facility equipment list which included, but was not limited to, lube oil additive/lubricant manufacturing blending, grease, detergents and cleaning compounds, and a spray booth paint and solvent, which the Site was issued a permit to operate on 28 October 1996 (Permit Number: F3519). A violation was filed in 1997 for the spray booth. The facility had failed to apply for a P/O for the spray booth and maintain usage records (daily) of VOC containing materials. Violations were also issued in 2002 and 2012 because the Site failed to meet compliance requirements for maintain VOC records, posting their permit, keeping a paint usage log of bulk usage and aerosols, and the use of a compliant gun cleaning solvent. This violation was resolved in January of 2012. Another violation was filed in 2006 for the "sales of glaze n seal clear 'wetlook' concrete and masonry lacquer" because the product has a VOC content of 595 g/L which exceeds

the 250 g/L limit for waterproof sealers. No further information was provided regarding violation resolution. Also included in the response were multiple operation permits for: three (3) 1,250 gallon mixing kettles W/3 HP blower, two (2) 24 inch x 24 inch filter pads for blending fats and oils, and two (2) 600 gal. blending kettles for grease and oil lubricant issued on 16 June 1975; a blender, steam jacketed, with one 3 H. P. Agitator and a mixer, issued on 21 April 1978; a grinder, steam heated dryer, and an air pollution control system, issued on 22 April 1981; a bulk solid material mixing and packing system and a bag packing station, issued on 12 June 1984; a 8,000-gallon storage tank of methylene chloride and another air pollution control system on 21 June 1984. None of the documents were indicative of actions likely to have adversely impacted the Site.

Orange County Health Care Agency

OCHCA's response included the below site investigation reports related to the former operations of Pennwalt Corporation.

A Site Assessment Report prepared by ENSR Constructors (ENSR) dated July 1989 indicated that the Site was first occupied by Kerns for blending of lubricating oils. Pennwalt Corporation purchased the Site in approximately 1969 and added grease production, which was produced until 1986. Pennwalt also manufactured over 150 different products in batch processes, including cutting oils, drawing compounds, acid cleaners, caustic cleaners, detergents, and soaps. The manufacturing process utilized approximately 38 mixing tanks and aboveground storage tanks located within the building on the western portion of the Site and between the two on-Site buildings. These tanks reported ranged in size from 330 to 14,000 gallons and contained "wet blends", water-based lubricants, potassium hydroxide (50%), triethanolamine (85%), Triton N-101, silicate, hydrofluosilicic acid (23%), sodium hydroxide (50%), mineral seal oil, butyl carbitol, naphtha oil, and kerosene. Dry materials were stored in silos, drums, and bags. The majority of the tanks were located within a concrete dike. Viscous raw materials were fluidized in an oven prior to mixing, and the manufacturing process reportedly did not generate by-products with the exception of wastewater and oil tank wash out and kettle wash out. These by-products were handled as follows:

- Wastewater was collected in sumps, drains, and trenches located in the bulk storage area, truck wells, a washdown shed, and various process areas in the "back building" (present-day west Site building). This wastewater discharged to a three-stage clarifier (including neutralizer) located outside the northeast corner of the west Site building and then to the Orange County sewer system. The clarifier was cleaned out every three to four months, when approximately 3,500 gallons of sludge that had settled in the clarifier was pumped out for off-Site disposal. The clarifier was reportedly decommissioned in 1989.
- Oil tank and kettle wash out was either recycled back into the manufacturing process or placed into 55-gallon drums and then recycled off-Site.

- Wastewater, which was reported primarily domestic water, in the “main building” (present-day east Site building) discharged to the Orange County sanitary sewer system. This included a trench in the building equipped with a grease trap.

When grease production ceased in 1986, a process oil heater which had used a non-PCB oil, was dismantled and removed. Ten years prior the heater reportedly used a PCB-containing oil. Pennwalt’s operations were discontinued in April 1989.

In February 1988, ENSR conducted a soil vapor screening survey for petroleum hydrocarbon vapors, consisting of a total of 24 temporary soil vapor probes advanced throughout the Site and analyzed onsite using a portable gas chromatograph, which did not speciate detected VOCs or report the results in meaningful units. The report concluded that “a low level of vapors exists in the soil at this site”. Five soil borings were also advanced as part of the investigation. One of the soil borings (SB-1, south of tank farm) was planned to be completed to groundwater; however, due to encountering refusal the boring was terminated at 65 feet. One boring (SB-2) was also terminated at five feet due to encountering a gravel layer saturated with an oil/water mixture overlying a clay interval, which was interpreted to be creating localized perched conditions. The gravel was reportedly associated with the underlayment of a former above-ground tank farm. Two other borings were advanced along the railroad spur, and the final boring was advanced on the northwest corner of the Site. TPH was detected in one soil boring at concentrations up to 617 mg/kg, but was not detected in the other borings. A sample of the oil/water mixture was also collected and contained diesel range hydrocarbons, light oil range hydrocarbons, low levels of PCBs (Aroclor-1242) and low levels of methyl ethyl ketone. ENSR concluded that the main area of soil impacts appeared to be limited to the former tank farm around SB-2.

A Site Remediation Final Report prepared by ENSR and dated 15 December 1989 summarized excavation and sampling activities that had commenced in June 1989. This included soils excavated to depths between two and seventeen feet in the tank farm area between the two buildings, and soils excavated to a depth of two feet beneath the former railroad spur. A total of 20 “intermediate” post-excavation soil samples were collected at depths ranging between 3 and 17.5 feet bgs and analyzed for TPH, total recoverable TPH, VOCs, PCBs, and/or BTEX. Based on the initial results, minor additional excavation was conducted and an additional 16 “final” post-excavation soil samples were collected. The final post-excavation soil samples indicated that residual concentrations of TPH and PCBs remained at concentrations up to 3,200 mg/kg and 38 mg/kg, respectively. The confirmation sample in which the most elevated concentrations of TPH and PCBs was collected from the sidewall of the 2-foot-deep excavation around the railroad spur.

Approximately 2,000 cubic yards of soil was excavated, characterized, manifested and transported off-site by a registered hazardous waste hauler and was disposed of at an authorized waste management facility under a SCAQMD Rule 1166 Contaminated Soil Mitigation Permit issued on 10 July 1989. ENSR stated that the OCHCA Waste Management Section provided oral approval

of completed soil excavation on 15 September 1989. Excavated areas were backfilled with clean import soil and compacted to local and state specifications. All backfilled areas were paved with a 4-inch asphalt surface above over a slurry coat.

Additional OCHCA Waste Management Section *Activities Report* notes for the Site case through 21 September 1990 indicate that an additional study was requested to investigate an area with elevated residual post-excavation PCB and TPH concentrations in soils. Specifically, the investigation appears to have been requested in the vicinity of final confirmation sample SWH-4, where the highest residual post-excavation TPH and PCB concentrations were detected at 3,200 mg/kg and 38 mg/kg, respectively. This was the only location in which the concentration of PCBs in a confirmation sample exceeded the site-specific cleanup goal of 25 mg/kg. Three verification soil samples were collected in September in the area (vicinity of SWH-4) at depths of two feet, four feet, and six feet, and PCB results were 3.2 ppm, 3.0 ppm, and non-detect, respectively. The notes indicate that the confirmation sampling results satisfied OCHCA's concerns. On 21 September 1990, a letter was issued by OCHCA confirming completion of site investigation and remedial action for the Site, and no further action was required.

State Agency Databases:

Geosyntec queried the online State Water Resources Control Board (SWRCB) GeoTracker⁸ and DTSC EnviroStor⁹ databases for cases pertaining to the Site or vicinity properties. Geosyntec did not identify listings for the Site, but identified the following vicinity listings:

Arrowhead Drinking Water (west adjoining and hydraulically cross gradient of the Site): This property was listed as a LUST Cleanup Site on SWRCB GeoTracker database. Soil in the vicinity was potentially contaminated with waste, motor, hydraulic and lubricating oil. The spill was discovered and reported on August 20, 1996. No documents pertaining to the cleanup were available online, but the reported cleanup action type was an excavation. As of 7 December 2001, the case was completed and closed. Therefore, this facility is not expected to have adversely impacted the Site.

Other Vicinity Cases: Several environmental cases were identified within 1 mile of the Site; however, based on their current status, distance, the nature of the releases and associated constituents, and/or groundwater flow directions in the Site vicinity (and the associated likelihood for the historical releases to have impacted groundwater underlying the Site), these cases are considered unlikely to have adversely impacted the Site and are not discussed in detail.

⁸ <https://geotracker.waterboards.ca.gov/>

⁹ <https://www.envirostor.dtsc.ca.gov/public/>

Geosyntec queried the DTSC HWTS¹⁰ database for Site listings; no records were identified under the Site address.

Geosyntec queried the SCAQMD FIND¹¹ database for Site listings. The Site was not identified on the database.

Geosyntec queried the California Water Resources Control Board Stormwater Multiple Application and Report Tracking System (SMARTS)¹² database for Site listings; none were identified.

4.3.3.2 Federal Agency Regulatory Records

Geosyntec queried the online USEPA ECHO¹³ and Envirofacts¹⁴ databases. The Site, under address 630 North Batavia Street, was not identified in either database. However, a listing under the address 630 North Batavia Avenue (Pennwalt Corporation) was identified. In 1987, a chemical releases report was filed stating that 250 lbs of sodium hydroxide (solution) was transferred to another facility for treatment. No reported releases to the air, land, underground or surface water were reported; therefore, this transfer is not anticipated to have adversely impacted the Site.

Orange County Towing at 593 N Batavia Street (approximately 500 feet east of the Site) was identified as having a small quantity generator (hazardous waste generator) on the premises. No violations were or have been reported. Other vicinity listings do not have reported violations that are anticipated to have adversely impacted the Site.

Geosyntec queried the National Priorities List (NPL) Superfund¹⁵ database for cases in the vicinity of the Site; none were identified.

5. SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

A reconnaissance of the Site was conducted by Geosyntec's representative Joshua Nandi on 28 June 2021 to assess the current conditions on and around the Site. The Site visit escort was provided by Mr. David Maloney, President and General Manager of Roseburrough Tool Company, Inc. Mr. Maloney indicated that he has been associated with the Site since 2011.

As part of the Site reconnaissance, Geosyntec requested the reconnaissance include a visual assessment for evidence of the presence of hazardous substances used, stored, or discarded and reviewed the Site for areas of disturbed or discolored soil, suspect equipment and/or building materials which may contain hazardous substances, areas of distressed vegetation, wastewater discharge areas, evidence of storage tanks/septic systems, waste management/disposal areas, lagoons, pits, sumps, surface water management areas, stained surfaces, etc.

Selected photographs taken during the Site reconnaissance are presented in **Appendix G**. Adjoining properties were observed from the perimeter of the Site or from access roads and entrances into these properties.

The following information is based on Geosyntec's visit to the Site.

5.2 Utility Service & Materials Management Provider Information

At the time of Site reconnaissance, the City of Orange provided potable water and sewer services, Southern California Gas Company provided natural gas service, Southern California Edison provided electricity, and CR&R Environmental Services provided waste removal services.

5.3 Interior and Exterior Observations

5.3.1 General Usage of Hazardous Substances

The Site is currently developed with two commercial industrial buildings occupied by Roseburrough Tool Inc.: the building on the eastern portion of the Site contains retail and office space and the building on the western portion of the Site contains tool manufacturing operations including the cutting, grinding, and welding of sheet metal and operation of a spray paint booth. Roseburrough Tool utilizes machining equipment and generates small quantities of metal shavings in the western Site building. Small quantities of solvents are utilized associated with activities in this area.

Hazardous substances used and/or stored at the Site included: paint thinner, spray paints and diesel fuel (stored in flammable materials storage cabinets) propane cylinders for forklifts, welding gases,

small containers of gasoline (not in secondary containment); and 5-gallon containers of concrete curing and coloring hardening compounds (stored outside for retail sale).

Note: a spray paint booth with roof exhaust was observed in the northwest portion of the western Site building.

5.3.2 Aboveground Storage Tanks

Geosyntec did not observe evidence of ASTs at the Site.

5.3.3 Underground Storage Tanks

Geosyntec did not observe USTs or evidence of fill ports or vent pipes that may be indicative of USTs at the Site.

5.3.4 Odors

Odors indicative of chemical release were not observed during Site reconnaissance.

5.3.5 Pools of Liquid

Pools of liquid were not observed during Site reconnaissance.

5.3.6 Drums

Numerous 55-gallon drums of liquid stabilizer for interlocking pavers were observed staged on pallets in the central exterior portion of the Site for retail sale. Additionally, approximately 12 empty 55-gallon steel drums were observed staged in the western exterior of the Site. Drums were observed to be in good condition during Site reconnaissance.

5.3.7 Hazardous Substances and Petroleum Products Containers (Not Tanks and Not Drums)

Two five-gallon containers of gasoline were stacked on top of a spill kit in the southern portion of the Eastern Site building. Secondary containment was not provided. No evidence of leaks was observed.

5.3.8 Unidentified Substance Containers

Geosyntec did not observe unlabeled containers during reconnaissance at the Site.

5.3.9 Indications of Polychlorinated Biphenyls (PCBs)

A utility-owned pad-mounted transformer was observed in the southwestern exterior of the Site. Labels indicating PCBs (if any) on the transformers were not observed, though historical documents provided by OCHCA associated with historical site investigation and remediation activities indicate that by 1989 the utility-owned on-Site transformers did not contain PCBs. No evidence of leaks or staining was observed in the vicinity of the transformer.

5.3.10 Heating/Cooling (Methods Used On-Site)

Geosyntec observed roof-mounted electric powered heating and cooling units in the eastern building. HVAC was not observed in the western building.

5.3.11 Stains and Corrosion

Cardboard and metal waste are stored in multiple rolloffs located on the northwest side of the Site, but no staining was observed in the vicinity of the rolloffs.

5.3.12 Drains and Sumps

A stormwater sump was observed to be located in the northwestern portion of the Site, and is reported to discharge onto the ground surface to the northwest of the Site. Floor drains were observed in the restrooms of the eastern building, which reportedly discharge into utility-owned sanitary sewers. Restrooms and wash sinks located in the western building reportedly discharge into the on-Site septic system. The on-Site septic system is reportedly pumped out by a third-party vendor on an as-needed basis.

5.3.13 Pits, Ponds, Pools, and Lagoons

Geosyntec did not observe pits, ponds, pools, or lagoons at the Site.

5.3.14 Stressed Vegetation

Geosyntec did not observe evidence of stressed vegetation at the Site.

5.3.15 Solid Waste

Empty cans of spray paint and paint thinner, scrap metal, and cardboard were observed to be collected in bins staged in the western exterior of the Site for off-Site recycling.

5.3.16 Wastewater (Excluding Septic Systems)

Industrial wastewater was reportedly not produced at the Site during reconnaissance. Evidence of wastewater treatment systems were not observed.

A feature similar to an oil/water separator was present just south of the eastern Site building. The Site contact said this feature was not an oil/water separator and was not currently used. On 6 July 2021, the Site contact removed the two covers to this feature and provided photographs. Piping was observed connecting the two concrete-lined pits; however, no liquid was observed and the pits appeared to be filled with dirt and debris and were approximately 30 inches deep. The Site contact reiterated this feature has not been used by Roseburrough. Based on a review of prior investigation reports, it does not appear a wastewater discharge feature was identified in this area of the Site. Further, this feature is located adjoining south of the eastern onsite structure, which does not have a documented history of manufacturing operations. As such, this feature is not considered to represent a significant environmental concern.

5.3.17 Wells

Geosyntec did not observe any type of well during the reconnaissance.

5.3.18 Septic Systems

A septic tank is present just east of the western Site building; reportedly, the tank is operational. A wash sink, with paint staining and soiled rags in containers and on the adjoining pavement, was observed outside the eastern side of the building on the western portion of the Site. The sink is used to clean paint guns used at the Site, and the Seller provided chemical formulation for the water-based based blue paint (Aqua Blue Enamel) that is used in the paint guns. Aqua Blue Enamel contains a proprietary styrene acrylic emulsion polymer, titanium dioxide, dipropylene glycol butyl ether, pigments, and ethylene glycol monobutyl ether (2-butoxyethanol). Included is only one chemical on EPA's hazardous substances list (2-butoxyethanol), which is classified as non-carcinogenic in California. The applicable commercial/industrial soil screening level recommended by DTSC is 53,000 mg/kg, which cannot be exceeded based on the 5% composition of the chemical in the paint formulation that is diluted with water and sent to the septic system.

While the presence of the septic system at such a facility is of environmental interest due to the potential for discharges to occur through it, no features (drains, trenches, etc.) were observed or indicated to discharge to the septic system from the process/manufacturing areas that would serve as a conduit. The only connections to the septic system were indicated to be the sanitary facilities and the wash basin, for which no evidence was observed or otherwise indicated for situations where the sanitary facilities or the wash basin were used to dispose of substances of concern beyond the relatively minor quantities of paint in the wash basin described above. Based on this information, the use of this septic tank, including the cleaning of paint equipment in the wash basin to discharge into the septic tank, is not anticipated to represent a significant environmental condition.

5.3.19 Filled Areas

Filled areas were not observed at the Site.

5.4 Observations of Adjoining Properties

Geosyntec did not visit the adjoining properties but did observe them from vantage points on the Site and on public roads near the Site. Our limited inspection of adjoining and vicinity properties did not reveal conditions suggesting obvious environmental impairments with the ability to impact the Site at the adjoining properties during the time of our Site reconnaissance.

6. INTERVIEWS

6.1 Interview with Current Owner Representatives

An in-person interview was conducted by Geosyntec's representative Mr. Joshua Nandi on 28 June 2021, during the reconnaissance, with Mr. David Maloney of President and General Manager of Roseburrough Tool Company, Inc. Mr. Maloney has been associated with the Site since 2011 and was considered the knowledgeable representative. Mr. Maloney supplied information regarding Site features and operations. The information gathered during the interview is included in this document.

6.2 Interviews with Local Agency Officials

At the time of the Phase I ESA, Geosyntec did not conduct interviews with local agency officials. Files were requested from various agencies through ESS, as stated in Section 4.3.3.

6.3 Interviews with Others

No other interviews were conducted.

7. EVALUATION AND CONCLUSIONS

As required by ASTM's Phase I ESA Standard E1527-13, this section presents Geosyntec-identified known or suspect RECs, historical recognized environmental conditions ("historical RECs" or "HRECs"), controlled recognized environmental conditions ("controlled RECs" or "CRECs"), and/or *de minimis* conditions at the Site. These findings (discussed below) are based on Geosyntec's evaluation of the information gathered for this Phase I ESA, through the following means: environmental database review; Site visit; aerial photographs; topographic maps; environmental file review; and a review of other obtained information regarding the Site and historical land use in the vicinity of the Site.

The following sections present Geosyntec's findings, our opinions, data gaps, and conclusions regarding our identified known or suspected recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions, and/or *de minimis* conditions associated with the Site. Exceptions and deviations to the ASTM E-1527-13 Standard are also provided in this section.

7.1 Findings and Opinions

The findings from this Phase I ESA area listed below along with Geosyntec's assessment of whether they represent known or suspect RECs, historical RECs, controlled RECs, and/or *de minimis* conditions at the Site:

Recognized Environmental Conditions (RECs)

As defined by ASTM E1527-13, a recognized environmental condition is: "*the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*"

- **Polychlorinated Biphenyls in Soils:** Based on a review of historical resources, the Site has been occupied by Roseburrough Tool since approximately 1995 for the fabrication and sale of concrete, plaster, and masonry tools. The Site was developed for commercial purposes in the 1960s and was previously occupied by Kerns Pacific, Keystone Precision, and Pennwalt Corporation. Kerns Pacific and Keystone Precision may have been divisions of Pennwalt, and additional divisions of Pennwalt identified in the 1970s and 1980s include chemical specialties, inorganic chemicals, lubricants, and metal preparation. Pennwalt's operations at the Site, which reportedly ceased in 1989, included manufacture of over 150 products and utilized approximately 38 aboveground storage tanks and mixing tanks. These tanks were primarily located in a concrete dike located east of the west building, but a

previous tank farm had reportedly been located on a gravel bed centrally located between the two on-Site structures. Process wastewater was discharged to a three-stage clarifier (decommissioned in 1989) and then to the Orange County sewer system. Site assessment and remediation activities completed in 1988-1989 identified an oil/water mixture in the gravel bed and low levels of polychlorinated biphenyls (PCBs). Remediation activities including the excavation of approximately 2,000 cubic yards of soils in the area of the tank farm and beneath the former rail spur. Excavated areas were backfilled with clean import soil and compacted to local and state specifications. Backfilled areas were paved with a 4-inch asphalt surface overlaying a slurry coat.

PCB concentrations exceeded the Site-specific cleanup goal of 25 milligrams per kilogram (mg/kg) in one post-excavation sample, but was considered anomalous based on follow-up sampling. In a letter dated 21 September 1990, the Orange County Health Care Agency (OCHCA) confirmed completion of site investigation and remedial actions at the Site and stated that no further action was required at that time. While the remedial action was issued formal regulatory closure by a local agency, the remediation activities did not conform to the United States Environmental Protection Agency (EPA) requirements for PCB remediation, as set forth in the Toxic Substances Control Act (“TSCA”, 40 CFR 761), which requires the characterization and remediation of soils containing PCBs above 1 mg/kg. Therefore, the left-in-place concentrations of PCBs above the 1 mg/kg TSCA threshold is considered a REC.

Historical Recognized Environmental Conditions (HRECs)

An HREC is “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

- **Residual Total Petroleum Hydrocarbons in Soils:** The final post-excavation soil samples collected following historical excavation and remediation activities contained total petroleum hydrocarbons (TPH) up to 3,200 mg/kg. A review of the post-excavation analytical results indicate that while samples were below the current non-cancer commercial/industrial endpoint recommended by the California Department of Toxic Substances Control (DTSC) for longer-chain aromatic TPH (C17-C32; 18,000 mg/kg), some samples were marginally above current applicable non-cancer commercial/industrial endpoint for shorter-chain aromatic TPH (C9-C16; 500 mg/kg). However, these limited potential exceedances to default non-cancer screening levels are not considered to

represent a risk to commercial occupants, and in a letter dated 21 September 1990, the Orange County Health Care Agency (OCHCA) confirmed completion of site investigation and remedial actions at the Site and stated that no further action was required at that time. As such, this is considered a historical recognized environmental condition (HREC). In the event of a redevelopment scenario in which earthwork activities are conducted in areas with residual TPH-impacted soils, soil management will need to be conducted in accordance with South Coast Air Quality Management District (SCAQMD) Rule 1166.

Controlled Recognized Environmental Conditions (CRECs)

A CREC is “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

No CRECs were identified for the Site as part of this Phase 1 ESA.

De Minimis Conditions

A *de minimis* condition is a condition that “generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

The following *de minimis* conditions were identified for the Site as part of this Phase I ESA.

- **Septic Tank:** A septic tank is currently operational at the Site, which was indicated to connect to the sanitary facilities and an exterior wash basin located at the western onsite structure. No evidence was observed or otherwise indicated for the current/historical disposal of substances of concern beyond diluted paint solutions discharged to the wash basin. A review of the chemical formula for the relatively small quantities of water-based paint that is diluted with water and discharged to the septic system via the wash basin indicates that this discharge is not capable of creating a significant environmental condition at the Site. Therefore, the presence and use of the septic tank is considered a *de minimis* condition.

7.2 Data Gaps

In accordance with ASTM E1527-13, this section documents data gaps in the information obtained and reviewed as part of this Phase I ESA and discusses the associated significance to reaching conclusions in this Phase I ESA. A data gap is defined in ASTM E1527-13 as being “*a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information*”.

Identified data gaps are presented below.

- Geosyntec was unable to interview former owners or operators of the Site, which Geosyntec does not believe is material to its assessment.

These data gaps are not considered to be significant to additional REC identifications.

7.3 Conclusions

Geosyntec performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of the property located at 630 North Batavia Street, Orange California. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed evidence of one REC.

9. SIGNATURE BY ENVIRONMENTAL PROFESSIONAL

“I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR §312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site.

Signed by Jon Ditzler - Geosyntec Consultants

Signed by Veryl Wittig - Geosyntec Consultants

Qualifications of the above-signed professionals are included in Section 10.

10. QUALIFICATIONS OF STAFF

Veryl Wittig

Mr. Wittig is a Senior Principal Hydrogeologist in the Geosyntec San Diego office, and is a registered Professional Geologist and Certified Hydrogeologist in California. Mr. Wittig has more than 28 years of diverse experience and has conducted and/or managed more than 250 Phase I ESAs throughout the USA and Mexico between 1992 and the present in accordance with ASTM standards to evaluate the presence of Recognized Environmental Conditions (RECs) associated with the subject properties. The Phase I ESAs have involved a variety of complexities and property usages ranging from rural native land to highly impacted industrial properties with more than a century of historical activity. Several of these projects involved linear features such as pipeline or rail corridors, multiple-site portfolios and/or very large acreages. Mr. Wittig holds a Bachelor's degree in Geological Sciences (Hydrogeology Emphasis) from San Diego State University.

Jonathan Ditzler

Mr. Ditzler is a Project Scientist with Geosyntec and has more than fifteen years of experience in environmental due diligence site assessments and limited environmental compliance reviews at various commercial, industrial, and residential properties located throughout the United States. Mr. Ditzler has coordinated and performed over 200 Phase I Environmental Site Assessments per ASTM E1527-05 and 1527-13 and per financial and owner-specific guidelines. Assessed sites include manufacturing facilities, cogeneration plants, dry cleaners, gasoline filling stations, auto repair facilities, multi-tenant retail shopping centers, warehouse and distribution centers, office buildings, hotels, and residential properties. Mr. Ditzler has also conducted Phase II Environmental Site Assessments at dry cleaners, auto repair facilities, and agricultural research and light manufacturing facilities. Mr. Ditzler holds a Bachelor of Science degree in Environmental Studies from Bucknell University.

Ariella Goldstein

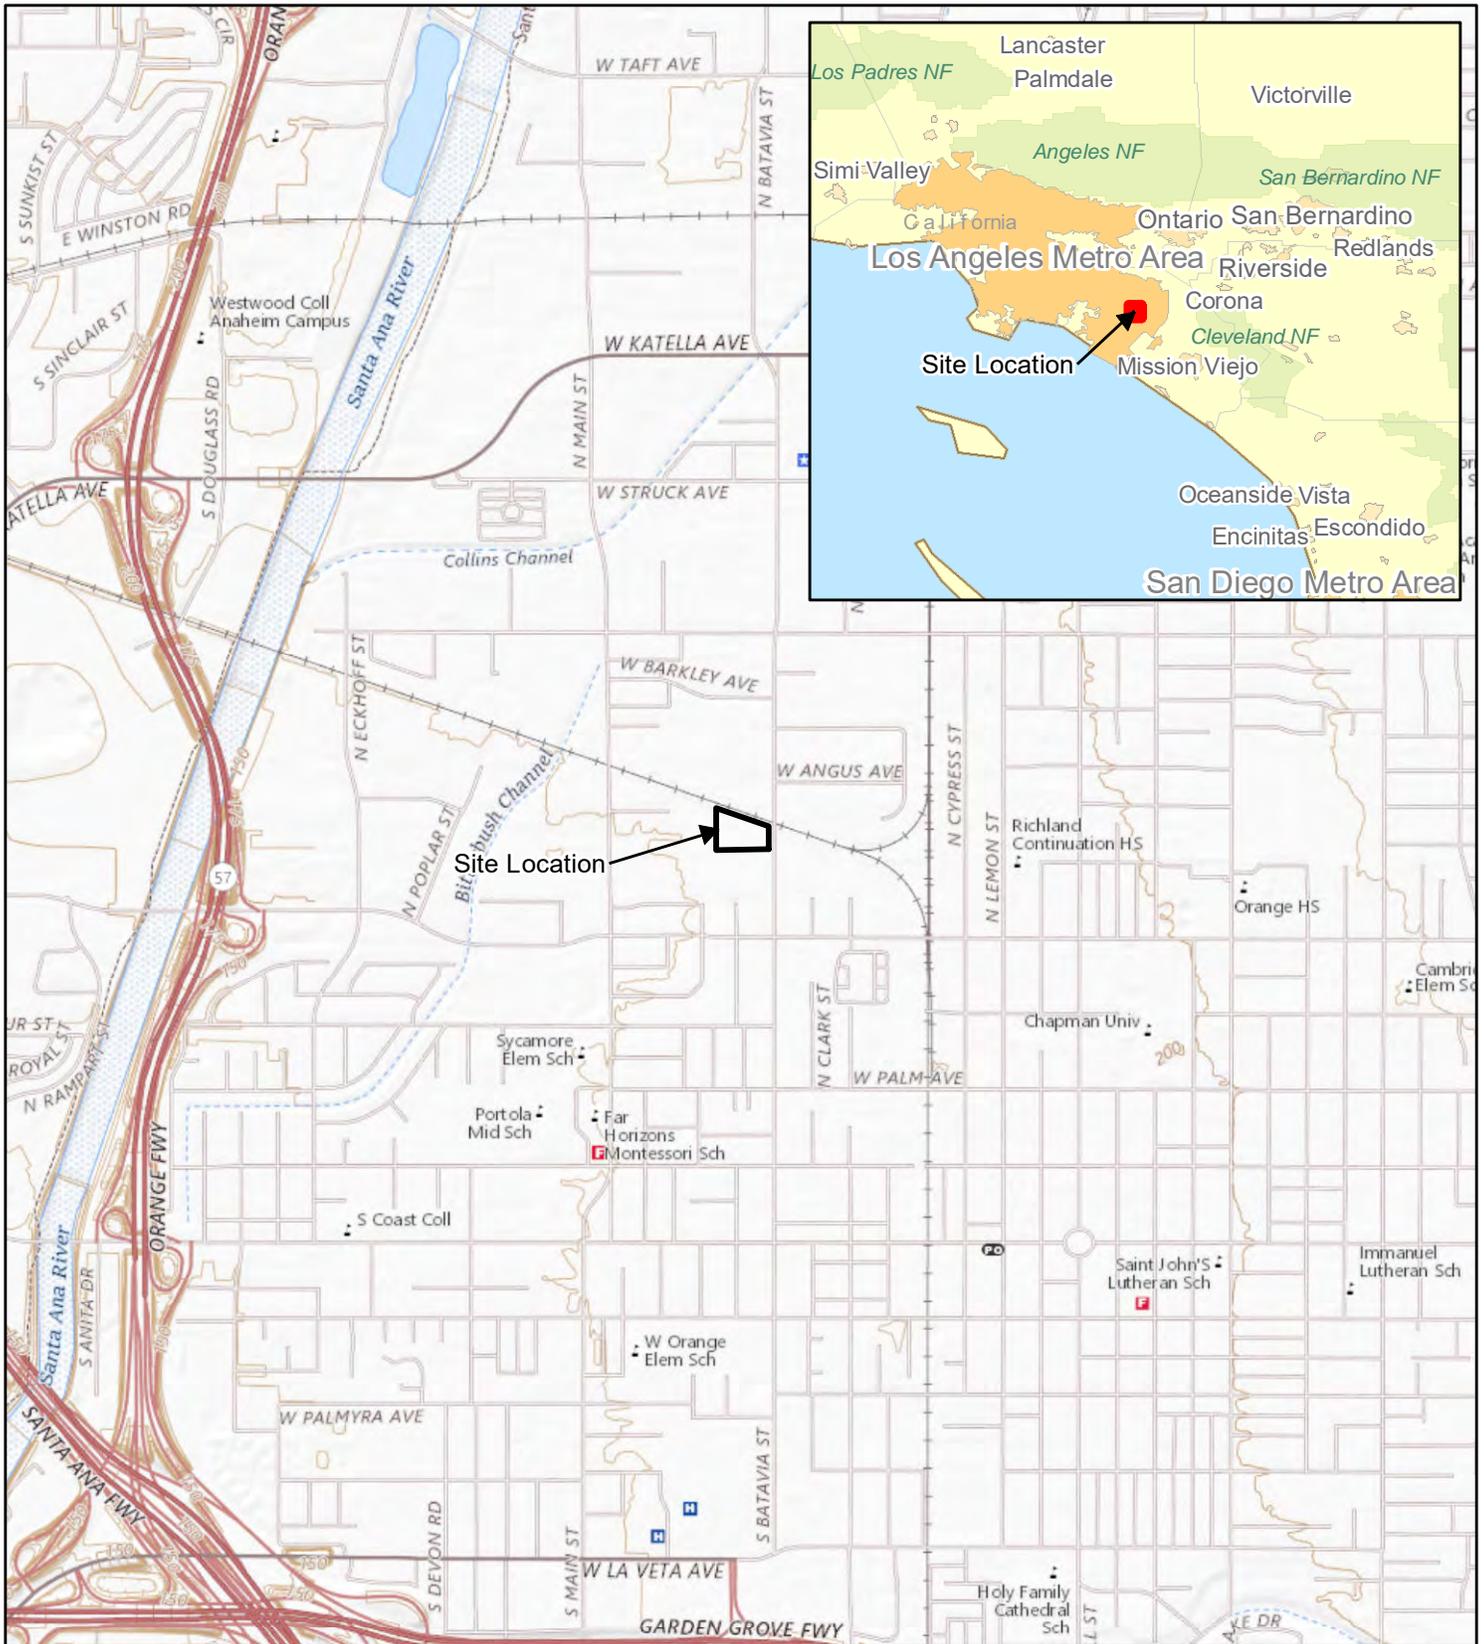

Ms. Goldstein is a staff professional with 7 months of experience at Geosyntec. She has a variety of experience in the field including but not limited to sampling of soil, soil vapor, indoor air, and groundwater, as well as, operations and maintenance of soil vapor extraction systems and oversight of drilling and sampling of cores. Alongside her responsibilities in the field, she has also tabulated analytical results and edited figures and maps for client geotechnical reports. Ms. Goldstein graduated with her master's degree in geology from San Diego State University.

Joshua Nandi

Mr. Nandi is an environmental engineer with over seven years of experience in site assessment and remediation consulting. He has performed Phase I ESAs, Phase II environmental investigations, and remediation on properties throughout the United States. Mr. Nandi has designed, implemented and managed various phases of site characterizations, feasibility studies,

cost estimations, remediation engineering design and implementation and health risk assessments at numerous contaminated sites under various federal, state and local environmental regulatory agencies. He has performed remediation engineering for sites contaminated with petroleum hydrocarbons, chlorinated hydrocarbons, 1,4-dioxane, light non-aqueous phase liquid (LNAPL), dense non-aqueous phase liquids (DNAPL), NDMA, perchlorate and nitrate, and has tailored a wide variety of ex-situ and in-situ techniques applicable to each specific project. Mr. Nandi holds a Bachelor's degree in Civil Engineering from the University of California, Irvine and a Master's degree in Environmental Engineering from the University of California, Los Angeles.

Subject: Remedial Action At Former Pennwalt Facility, 630 N. Batavia, Orange,
CA 92668 - O.C.H.C.A. Case #89IC23

Dear Mr. Balamoun:

This letter confirms the completion of site investigation and remedial action at the above site. With the provision that the information provided to this Agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this Agency of any changes in report content, future contamination findings, or site usage.

If you have any questions regarding this matter, please contact Gary Zimmerman (714) 667-3761.

Very truly yours,

William J. Diekmann, REHS, M.S.

1.0 INTRODUCTION

This report summarizes the field activities and analytical results for the site remediation activities which were conducted at Pennwalt's facility located at 630 North Batavia, Orange, California. Pennwalt engaged ENSR Constructors to execute this site remediation program of which field activities were initiated on June 13, 1989. The implementation of this remediation program, including the post excavation soil sampling and analysis program was closely coordinated with the County of Orange, Environmental Health; Waste Management Section (COEHWMS).

2.0 EXECUTIVE SUMMARY

A Soils Remediation Program was conducted at Pennwalt Corporation by ENSR Constructors, a Division of ENSR Corporation, in accordance with an appropriate Remediation Workplan. The purpose of this section is to briefly summarize the major issues which are presented in the report.

- o Work zones, site security, and safety equipment required were based on the site managers specific requests.
- o The volume of soil excavated from the areas of interest at the site amounted to approximately 2,000 cubic yards. This material was manifested and transported off-site by a registered hazardous waste hauler and was disposed of at an authorized waste management facility, USPCI, Inc. Grassy Mountain Facility, Clive, Utah.
- o Excavated materials were characterized properly prior to transportation for off-site disposal to an authorized waste management facility.

- o Soil excavation activities were conducted in accordance with the provisions of the excavation permit issued under Rule 1166 of the South Coast Air Quality Management District.
- o A post excavation sampling/analysis program was utilized to determine the extent of soil excavation required to achieve the appropriate criteria. This program was coordinated with the COEHWMS.
- o Excavated areas were backfilled with clean import soil and compacted to local and state specifications. Upon completion, all backfilled areas were paved with a 4" asphaltic material and slurry coated.

3.0 SITE PREPARATION

Permission was obtained by ENSR from Orange County Environmental Health Waste Management Section and SCAQMD to proceed with the site Remediation Work Plan. No onsite work was initiated until all applicable permits were in evidence at the job site. ENSR Constructors and subcontractors mobilized at Pennwalt's request on June 13, 1989, to initiate the soil excavation program.

3.1 Work Zones

The boundaries of the exclusion zone, contamination reduction zone and support zone were marked as specified by ENSR's onsite project manager.

3.2 Security - Barricades

ENSR erected caution tape and blinking barricades as needed at the outside perimeter of the excavated area. The outside fence of the Pennwalt facility was closed and locked at all times.

3.3 Safety Equipment

ENSR Constructors was required to ensure all safety equipment was provided as specified in the ENSR Field Manual.

4.0 **SCOPE-OF-WORK**

4.1 Plans and Permits

ENSR Constructors submitted a Remedial Action Plan and Health and Safety Plan to Pennwalt for review and approval. The Remedial Action Plan was approved by Pennwalt and submitted to OCEHWMS for review prior to the execution of this voluntary site remediation program.

4.2 Excavation

Soils which exhibited elevated concentration of the constituents of interest including total petroleum hydrocarbons were excavated. The volume of excavated soils was approximately 2000 cubic yards.

4.3 Stockpiling of Material

The excavated material identified as hazardous was placed in a preassigned designated stock pile area. The stockpiled material was covered with plastic sheeting to minimize any potential volatilization as required by SCAQMD Rule 1166. This material was properly characterized prior to transportation to an authorized off-site waste management facility.

4.4 Transportation

All excavated materials were manifested and transported by licensed waste haulers (Refer to Attached Manifests in Appendix A).

4.5 Disposal

All excavated materials were transported and disposed off-site at an authorized waste management facility; USPCI, located in Grassy Mountain, Utah (Refer to Attached Manifests in Appendix A).

Pennwalt utilized the required EPA identification number and State of California Board of Equalization Tax identification number prior to commencement of transportation and disposal of the excavated materials.

5.0 AIR QUALITY AND MONITORING CONTROL

During the excavation and material handling of the excavated soils, ENSR encountered fugitive Volatile Organic Compound (VOC) emissions. To minimize these fugitive VOC emissions, ENSR utilized onsite vapor control technology. The vapor control technology has been authorized by the South Coast Air Quality Management District (SCAQMD).

ENSR project manager adhered to Rule 1166 - "Volatile Organic Compound Emissions From Decontamination of Soil" as presented by SCAQMD (Refer to Appendix B).

The ENSR Project Manager utilized, as needed, at least one or a combination of the following approved onsite vapor control technologies:

- o Visqueen covering (Black polyethylene plastic)
- o Water spray covering
- o Temporary foam covering
- o Permanent foam covering

6.0 SAMPLING/ANALYSIS PROGRAM

Intermediate post-excavation samples were collected and analyzed to determine the appropriate extent of soil excavation. The final post-excavation sampling/analysis program was closely coordinated with Mr. Gary Zimmerman of the Waste Management Section of Orange County during his visits on August 31, 1989 and September 11, 1989. All post-excavation samples were submitted to a State Certified laboratory for analysis (Associated Laboratories and Del Mar Analytical). All samples were accompanied by a written chain-of-custody form. The requested turn around time was 24 to 48 hours, depending upon the analysis being conducted.

6.1 Soil Sampling/Analysis

The soil samples were analyzed as appropriate for one, or a combination of, the following compounds utilizing the appropriate analytical methodologies.

<u>Constituent(s)</u>	<u>EPA Method</u>
Total Recoverable Petroleum Hydrocarbons (TPH)	418.1
Total Petroleum Hydrocarbons (TPH)	8015.(Modified)
Polychlorinated Biphenyls (PCB's)	8080.
Volatile Organic Compounds (VOC)	8240.
Total Benzene, Toluene, Ethyl Benzene, Xylenes (BTEX)	8020/5030.

6.1.1 Sampling Protocols

Soil samples were collected utilizing either a backhoe for deep intermediate post-excavation samples, or a small clean spade, or a hand shovel for final post-excavation samples. Soil samples were collected in clean 9 oz. glass jars with teflon-lined lids. Samples jars were numbered using a sequential numbering system.

6.2 Quality Assurance/Quality Control (QA/QC) Procedures

All samples were labeled and duly noted on chain-of-custody form (Refer to Appendix C). The sealed samples were immediately labeled and chilled in a pre-cooled ice chest containing ice. The interior of the ice chest was maintained at a temperature not exceeding four (4) degrees (centigrade). The samples were kept chilled within the ice chest for delivery within 24 hours to a California certified laboratory for chemical analyses (Refer to Appendix C).

6.2.1 Sample Containers

Sample containers consisted of clean glass jars varying in volume with zero headspace. Screw-on teflon-lined lids were used to reduce the potential reaction between potential constituents and the lids. After a sample was collected, the lid was secured, and sealed with tape. All samples were labeled with permanent markers on labels.

Label information was as follows:

1. Company name and address
2. Field identification number
3. Lab identification number
4. Date
5. Time sampled
6. Location
7. Collectors signature

6.2.2 Chain-of-Custody

Chain-of-custody forms were filled out each day for the samples collected and given to the designated Project Manager with the samples. These forms included the following (Refer to Appendix C).

1. Contact person and phone number
2. Client name and address
3. Site name and address
4. Lab number
5. Field number
6. Date sampled
7. Time sampled

6.2.2 Chain-of-Custody Continued

8. Type of sample
9. Priority ranking
10. Sample description and location
11. Number of containers
12. Analyses required
13. Field observations

6.3 Analytical Laboratories

ENSR utilized the following State Certified Laboratories:

- Associated Laboratories
806 North Batavia Street
Orange, California 92668

- Del Mar Analytical
18102 Sky Park South, Suite F
Irvine, California 92714

6.3.1 Analytical Methods

Analytical parameters for soil samples were as follows:

- o **Total Recoverable Petroleum Hydrocarbons - EPA Method 418.1**
This analysis was performed by extracting the sample with Freon 113 and using IR absorption for hydrocarbon detection.
- o **Volatile Organic Compounds (VOC) - EPA Method 8240**
This analysis was performed by Mass Spectrometry.
- o **Polychlorinated Biphenyls (PCB's) - EPA Method 8080**
This analysis was performed by Gas Chromatography with Electron Capture Detection.

- o **Total Petroleum Hydrocarbons (TPH) - EPA Method 8015 Modified**
This analysis was performed by Gas Chromatography and Flame - Ionization Detection.
- o **Total Benzene, Toluene, Ethylbenzene, Xylenes (BTEX) - EPA Method 8020 and 5030**
This analysis was performed by Gas Chromatography and Photo Ionization Detection.

6.3.2 Quality Assurance/Quality Control

The laboratory was responsible for providing internal QA/QC throughout the project.

Matrix spikes for selected organic compounds were performed by the state certified laboratory, in duplicate, on randomly selected samples. The percent recoveries were within recovery limits established by the EPA. The specific sample results of the matrix spikes and duplicates are provided in Appendix C).

6.4 Intermediate Post Excavation Soil Sampling

Upon completion of the initial soil excavation phase, intermediate post-excavation soil samples were collected. Soil sampling depths ranged from approximately 3 feet to 17.5 feet (below grade). A total of twenty (20) samples were collected, entered into proper chain-of-custody, and submitted to the analytical laboratory.

6.4.1 Sample Locations

Locations of the intermediate post-excavation sampling points are shown in Figures 1-1 and 1-2.

6.4.2 Analytical Results

Results of the Intermediate Post Excavation Soil Sampling program are presented in Table 1. The results indicated the presence of total petroleum hydrocarbons (EPA 418.1) and PCB's at levels which required additional excavation.

6.5 Final Post-Excavation Soil Sampling

Upon completion of the required additional soil excavation, final post-excavation soil samples were collected on July 18, August 23, 31, September 5, 11, 12, 1989. Soil sampling depths ranged from approximately 3 feet to 17.5 feet (below grade). A total of sixteen (16) additional soil samples were collected, entered into proper chain-of-custody, and submitted to the analytical laboratory. The final post-excavation soil sampling program was closely coordinated with Mr. Gary Zimmerman of the Waste Management Section of Orange County during his site visits(s) on August 31, 1989, September 11, 1989.

6.5.1 Sample Locations - Site Plan

Locations of the final post-excavation sampling points are shown on the attached Figures 1-3 and 1-4.

6.5.2 Analytical Results

The analytical results of the final post-excavation soil sampling program are presented in Table II. These results were reviewed with Mr. Gary Zimmerman and was deemed as acceptable for successful conclusion of the soil removal/clean-up program at the site. This information was confirmed by Pennwalt's letters of October 30 and 31, 1989, to the Waste Management Section of Orange County.

7.0 HEALTH AND SAFETY

7.1 Health and Safety Site Work

All site work was carried out in accordance with the Health and Safety plans as provided in the ENSR Field Manual and ENSR Standard Operating Procedures.

ENSR provided the necessary equipment checks, site monitoring, and record keeping functions. The ENSR site safety officer was periodically onsite to monitor site conditions in coordination with ENSR's project manager.

7.2 Health and Safety Personnel

ENSR Constructors maintained a high standard of operational protocol relating to the health and safety precautions needed during the site remediation activities. All ENSR personnel onsite completed the 40 hour training requirements in accordance with the appropriate OSHA Standards specified in EPA 29 CFR 1910.120. Safety meetings were held at the beginning of every work day, during phases when new personnel were introduced to the site, and when site conditions warrant.

8.0 BACKFILL AND COMPACTION

8.1 Compaction Report

Upon Pennwalt's receipt of an oral approval on September 15, 1989, from Mr. Gary Zimmerman of the Waste Management Section of Orange County as to the successful completion of the soil excavation program, the excavated area was backfilled with certified clean soil. The soil was compacted to between 90-95 relative percent based upon ASTM D 1557 test procedures. (Compaction certificates

are provided in Appendix D).

8.2 Site Restoration

Upon completing the soil compaction, the backfilled area was properly graded and covered with 4" asphalt cover along with a new slurry coat.

9.0 **SUMPS AND CLARIFIERS**

9.1 Decommissioning Procedures

At the request of Pennwalt, ENSR completed the decommissioning of the onsite, 3 stage waste water clarifier (Refer to Appendix E).

The clarifier was triple rinsed with a high pressure water unit utilizing hot water at 1200 psi.

9.2 Transportation and Disposal

The rinsate and solids generated during the decommissioning process were collected, manifested, and transported for off-site disposal at an authorized waste management facility (Refer to Manifest No. 88179385 in Appendix E).

10.0 **LAB PACKING OF WASTE MATERIALS**

Due to the nature of Pennwalt's manufacturing of several petroleum based products, a number of partially consumed laboratory and manufacturing specialty chemicals required appropriate packaging prior to off-site disposal at an authorized waste management facility. ENSR utilized the following procedures for Lab Packing of residual chemicals.

10.1 General Requirements

Prior to transportation and disposal, an authorized off-site waste management facility received the general Lab Pack information from Pennwalt. The information included:

- (a) Chemical compound name (no trade name)
- (b) Material of inner containers, i.e. glass, plastic, metal, etc.
- (c) Amount of size of each waste package.
- (d) DOT hazardous class, if applicable.
- (e) DOT identification number, if applicable
- (f) EPA hazardous waste code, if applicable

10.2 Materials

ROMIC CHEMICAL CORPORATION 2081 BAY ROAD, E. PALO ALTO, CA

This facility received the following drums:

DRUM # 7, 9, 10, 11, 12, 21, 22, 24, 30, 31, 32, 33, 34 (2), 35, 36, 38, 40, 41 (2), 42 (2), and 44.

ROLLINS ENVIRONMENTAL SERVICES (LA) INC. 13351 SCENIC HIGHWAY,
BATON ROUGE LA 70807

This facility received the following drums:

DRUM # 1-6, 8, 9, 13-20, 23, 25-29, 37, 39, 43, 45

10.3 Packaging

All residual chemicals were packaged to meet DOT specifications for shipping. Waste streams were segregated into specific compatible categories:

- o Flammable liquid
- o Flammable solid
- o Combustible liquid
- o Corrosive material (acid/base)
- o Poison B
- o Oxidizer
- o Organic Peroxide
- o ORM-A
- o ORM-B
- o ORM-C
- o ORM-E

All Lab Packs were packed with an absorbent acceptable to the disposal facility. Lab Packs were packaged so that inside containers were transported without risk of breakage and with sufficient absorbent to absorb all liquid waste should breakage occur.

Lab Packs were packaged according to the following procedures:

1. A plastic liner was placed inside the lab pack.
2. A four to six inch (4-6") layer of absorbent material was placed on the Lab Pack bottom.
3. A single layer of containerized waste was placed on the absorbent packing with at least two inches (2") of absorbent between the containers and the Lab Pack sides.

Lab Packs were packaged according to the following Procedures (Continued):

4. The container layer was then covered with two to three inches (2-3") of absorbent.
5. The Lab Pack, was filled by alternating layers of containers and absorbent.
6. The Lab Pack was topped off with four to six inches (4-6") of absorbent material to complete the packaging.
7. The cover, gasket, ring, and closure was then affixed. The appropriate labels and packing slip were attached.

The maximum allowable volume per Lab Pack container size and type was restricted to meet safety requirements for the handling, transportation, and ultimate disposal/recycling.

<u>Container Type</u>	<u>Maximum Volume (Liquids)</u>	<u>Maximum Weight Solids</u>
30 gallon	10 gallons	75 lbs.
20 gallon	5 gallons	45 lbs.
16 gallon	4 gallons	36 lbs.
5 gallon	1 gallon	8 lbs.

The maximum size container accepted is a DOT approved 30 gallon plastic or fiber Lab Pack (not to exceed 19" in diameter). The maximum numbers of containers inside the Lab Pack are as follows:

- o 4 one-gallon glass containers per 30 gallon Lab Pack.
- o 4 one-gallon metal containers per 30 gallon Lab Pack.
- o 10 one-gallon metal containers per 30 gallon Lab Pack.
- o 15 one-pint metal containers per 30 gallon Lab Pack

The top of the Lab Pack was labeled with the following.

- o Generator's EPA I.D. Number and designated TSD Facility Number
- o Manifest Number
- o Lab Pack Number According to Packing List

10.4 Manifest Documentation

Pennwalt was required to complete the appropriate Waste Manifests and all other required shipping papers prior to shipment to the designated TSD facility (Refer to Appendix F).

10.5 Certification Letter

Materials Characterization Data Sheets were accompanied by a letter signed by the Generator, certifying that the manifested shipment complied with the designated TSD Pack Guidelines (Refer to Appendix F).

10.6 Lab Pack Acceptance

Pennwalt received approval for final shipment and receipt of Lab Packed material for appropriate disposal by the designated TSD facility (Refer to Appendix F). All Lab pack shipments were transported offsite to the authorized waste management facility on or before November 2, 1989.

INTRODUCTION and PURPOSE

The purpose of this site assessment investigation was to evaluate the environmental conditions onsite, particularly with regards to potential impacts on soil or groundwater, if any. A site inspection was conducted and subsequent field investigations involved a soil vapor survey and a soil boring program including the collection of subsurface soil samples.

The site is located at 630 North Batavia Street, Orange, California, approximately three-quarters of a mile east of the Santa Ana River (see Figure 1). Santiago Creek, which flows west into the Santa Ana River, lies approximately one and one quarter mile south. The area around the site is a mixture of light industrial/commercial (predominantly north and west of the site), and residential (predominantly south of the site).

The subject site constituted a specialty chemical plant which produced a variety of cleaning products. Reportedly, manufacturing operations were discontinued in April, 1989. While the plant was in operation, raw materials were stored on site, predominantly in an above-ground tank farm located near the center of the site. Table 1 lists the materials stored by tank number and Figure 2 shows tank locations.

SITE PLAN
 PENNWALT CORP.
 CHEMICAL SPECIALTIES
 ORANGE, CALIFORNIA

DRAWN BY: <i>AM</i>	DATE: <i>2/26/88</i>	PROJECT NO.: G812-292
CHK'D BY:	REVISED:	DWG. NO.: FIGURE 2

SITE DESCRIPTION

The following information was obtained during our site inspection in February, 1988. The facility is owned by Pennwalt Corporation, 3 Parkway, Philadelphia, Pennsylvania. The site address is 630 North Batavia Street, Orange, California, in the County of Orange. The site, which occupies approximately 3.37 acres, is covered nearly entirely with either buildings or pavement. The site constitutes a chemical specialties plant capable of manufacturing a large variety of metal preparation compounds and cleaners, and also includes warehousing and shipping facilities for products made both onsite and at other Pennwalt facilities, and office space for facility personnel. Reportedly, manufacturing operations were discontinued in April, 1989.

The property is bounded by Batavia Street on the east, a Santa Fe Railroad right-of-way on the north, and light industrial/commercial properties to the west and south. There are two buildings on the property; the main building which fronts Batavia Street contains approximately 24,000 square feet, about 4800 square feet of which is office space; and the back building contains approximately 26,000 square feet. Between the two buildings, there are a tank farm and a railroad siding.

The site has full access to public utilities. Electricity transmission lines are above ground. There are two electricity poles on the north side of the main building. Both have transformers attached. Southern California Edison has assured Pennwalt that no PCBs are used in the transformers.

A Santa Fe Railroad siding extends from the main track north of the property to the area between the main and back buildings. Where the buildings do not abut the property line

ENSR

on the north and portions of the west and south sides, there is chainlink fencing. The lot is essentially flat, with the rear slightly sloping to the northwest corner. Other depressions are designed to control surface water runoff.

Wastewater (primarily domestic) from the main building is discharged into the County sanitary sewer. A trench equipped with a grease trap in the main building discharges to the sanitary sewer.

Wastewater from the manufacturing processes and sumps around the back building is routed through a three-stage clarifier located outside of the northeast corner of the back building and is discharged into the County industrial sewer. There is a network of lines that direct wastewater collected in various drains, sumps, and trenches to the clarifier and eventually to the sewer system. Sumps are located in the bulk storage area, the truck wells, washdown shed, and certain process areas. Piping in the bulk storage area and wet processing area is complemented by trenches which are connected to the clarifier.

A 10-inch culvert at the very northwest corner of the property provides a conduit to drain surface water runoff offsite. Most of the storm water runoff drains by gravity, although storm water collected in the truck well sump is pumped to the culvert. The culvert extends west 100 to 120 feet and discharges to the surface at the bottom of the railroad grading. A storm drain is located nearby.

Approximately 38 above-ground storage and mixing tanks are located between and in both of the buildings (see Table 1 for volumes and types of materials contained). There is a liquified petroleum gas (propane) tank containing approximately 300-gallons, on the north side of the main building, west of the loading dock.

According to Donald Kossler, Plant Manager, asbestos is found in certain areas of the main building but that the back building, which was built in 1983, contains no asbestos. An asbestos survey was not requested to be conducted for this investigation.

The plant was capable of manufacturing over 150 different products in batch processes. Typical manufactured products included cutting oils, drawing compounds, acid and caustic cleaners, detergents, soaps, and related products. A number of mixers were used in the processing. Viscous raw materials were fluidized in an oven prior to mixing. A gas-fired boiler provided process steam. Many liquid raw materials were stored in tanks (see Table 1) and drums, while dry materials were stored in silos, drums and bags.

The raw materials were essentially consumed in the manufacturing process with no by-products. The only wastes generated were wastewater and oil tank and kettle wash out. As noted above, during operations the wastewater passed through a clarifier before it is discharged to the Orange County sewer system. Every three to four months, about 3,500 gallons of sludge which settled at the bottom of the clarifier was pumped out and transported by a registered hauler under manifest to an authorized waste management facility in Los Angeles.

The oil tank and kettle wash out were usually recycled back into the manufacturing process. Some residual oil was stored in 55-gallon drums and was transported by a registered hauler under manifest to an oil recycling facility.

According to Donald Kossler, Plant Manager, the site was vacant land prior to the construction of an oil blending facility by Kerns, Inc. in 1957. Kerns blended lubricating oils for industrial use at the facility.

Pennwalt purchased the facility around 1969 and added grease production capabilities. Pennwalt's Keystone Division continued to manufacture greases at the site until 1986. At this time, a process hot oil heater was dismantled and removed from the site. At the time of the inspection the heater used Mobiltherm (a non-PCB oil). Ten years ago the heater used an oil containing PCBs. It was reported by Pennwalt personnel that the PCB oil was removed and incinerated offsite, and the system was cleaned prior to replacement with a non-PCB oil.

A second building (the back building) was constructed in 1983. Detergents, cleaners, and soaps were made here along with metal preparation compounds. Waste generation did not significantly varied over the years; most raw materials were consumed in the manufacturing process with no by-products.

Current uses of adjacent properties include:

Katsis Autobody Crafts, 650 N. Batavia Street - autobody repair and painting.

Pacific Supply Corp., 675 N. Batavia Street - roofing supplies.

Hydroscape, 601 N. Batavia Street - landscaping and irrigation supplies.

Vacant (formerly Seatec Inflatable Systems), 600 N. Batavia Street - manufactured diving supplies.

Public Storage, 601 N. Main Street - retail storage spaces.

Arrowhead Drinking Water Co., 619 N. Main Street - distribution center for bottled drinking water.

There are a number of automotive repair shops in the vicinity. Additionally, two printing shops and a concrete construction company are located nearby.

According to the Orange County Water District, no drinking water production wells exist within 1,000 Feet of the site. A residential area consisting of single family houses and apartment buildings begins approximately 500 feet south of the site.

At the time of the inspection the facility held the following permits or registrations:

EPA Generator number : CAD 990667826
Orange County Hazardous Waste Program: Registration Number
465

Orange County Sanitation Districts: Class I Permit for
Industrial Wastewater Discharge Number 2-561

GEOLOGY/HYDROGEOLOGY

The following discussion of site geology/hydrogeology is compiled from the following documents:

"Ground-water Geology of the Coastal Zone, Long Beach-Santa Ana Area, California", J.F. Poland, A.M. Piper, et al, 1956, U.S. Geological Survey Water Supply Paper 1109.

"Progress Report On Ground Water Geology of the Coastal Plain of Orange County", California Department of Water Resources, 1967.

The site lies near the western boundary of the Tustin Plain, where it merges with the Downey Plain. The near-surface deposits in this central lowland area are thought to be of Recent or Pleistocene age and are composed of alluvial sediments (mixtures of gravel/sand/silt/clay) derived predominantly from the Santa Ana Mountains. The area near the site is likely a combination of sediments deposited from

Santiago Creek and the Santa Ana River. Site specific geology is discussed below in Findings.

According to Steve Overman of the California Regional Water Quality Control Board, groundwater exists approximately 90 to 100 feet below surface elevation and generally flows to the southwest. Groundwater production in the area near the site includes the City of Orange wells #18 and #19 (see Figure 1, for approximate location). These wells are reported by the City of Orange Water Department, to be sealed to approximately 400 feet depth with perforated sections placed intermittently between that depth and their total depths of approximately 1000 feet.

FIELD INVESTIGATIONS

Our field investigations included two tasks. The first involved a soil vapor survey to screen the site for the presence of petroleum hydrocarbon vapors in the soils. The second task involved the collection and analysis of soil samples from selected borings.

Soil Vapor Survey

On February 23, 1988, a soil vapor survey was conducted at the subject site. The survey consisted of the placement of twenty-four (24) temporary soil vapor probes from which vapor samples were collected and analyzed onsite using a portable gas chromatograph. The locations of the vapor sampling are shown on Figure 3. Other details concerning the soil vapor survey are discussed in Attachment I, which also contains copies of the actual chromatograms.

Soil Sampling

On February 25, 1988, five soil borings were excavated and soil samples collected. The locations of the borings are shown on Figure 3. Analytical results of soil samples analyzed are presented in Table 2. Attachment II contains a discussion of the details of the borings and copies of the boring logs. Boring SB-1 was excavated to a depth of approximately 65 feet. It had been planned that this boring would be drilled to ground water and that a monitoring well would be installed to sample ground water. The boring was terminated at the 65 foot depth because of drilling difficulty. It was subsequently felt by Pennwalt Corporation that installation of the monitoring wells would be unwarranted due to the depth to the uppermost aquifer (approximately 90 feet).

Boring SB-2 was terminated at 5 feet depth because the bottom of a gravel layer was encountered, saturated with an oil/water mixture. This perched liquid was believed to be limited to a depth of 5 feet, because a layer of clayey material was encountered below it.

FINDINGS

Soil Vapor Survey

Results from the soil vapor survey suggest that a low level of vapors exists in the soil at this site. However, an area between the old building (east side of site) and the existing tank farm was encountered during the survey with perched fluids (oil/water mixture). It was reported by site personnel that a former above-ground tank farm was located in this area (east of the present tank farm), and that a gravel bed had existed there as a base for the tanks. Boring SB-2 confirmed the presence of this gravel bed and the perched fluids in it.

Soil Borings and Sample Analyses

Boring logs for the five (5) borings are presented in Attachment II. To summarize, the site which has an asphalt concrete/cement concrete surface, is underlain by alluvial sediments composed predominantly of gravel, except for the upper ten to fifteen feet, which consisted of finer grained sediments, including sands, silts, and clays.

As mentioned above, a gravel bed was encountered in Boring SB-2, which was saturated with an oil/water mixture. This fluid was analyzed to evaluate the type of hydrocarbons it contained. Comparison of Methods 418.1 and 8015-M, suggest that the hydrocarbons in the lighter than water phase are composed of diesel fuel range hydrocarbons (approximately 30 %) and light oil range hydrocarbons (approximately 70 %). Additionally, low levels of PCB's (Aroclor 1242) and 2-Butanone (methyl-ethyl ketone) were detected in one sample of this fluid.

Soil samples collected from the other four borings were analyzed for Purgeable Organics by EPA Method 8240. None of these compounds were detected in any of the four (4) samples analyzed (see Table 2).

CONCLUSIONS

Based on the results from the soil sample analyses, presented in Table 2, soil conditions do not appear in general to have been impacted except for the area around Boring SB-2. The extent of this impacted area is believed to be limited to the area of the former above-ground tank farm.

STUDY LIMITATIONS

This report, including the exhibits attached, describes the results of ENSR's initial investigation to evaluate the environmental conditions at the site particularly with regard to impacts to soil or groundwater, if any. The conclusions and recommendations stated herein represent the application of a variety of engineering and technical disciplines to material facts and conditions associated with the subject site, as a result of Phase I and Phase II investigations which were conducted during the period of February 17 through March 18, 1988. Many of these facts and conditions are subject to change over time; accordingly, the conclusions and recommendations must be viewed within this context. We also note that groundwater was not sampled.

ENSR has performed this site assessment in a professional manner using that degree of skill and care exercised for similar projects under similar conditions by reputable and competent environmental consultants. Finally we note that this assessment was prepared for the use of Pennwalt Corporation. ENSR shall not be responsible for conditions or consequences arising from any matters related to the investigation and this report.

ATTACHMENT I

Soil Vapor Survey

Soil vapor mapping is conducted along discrete specified grid coordinates. For this site, grid points were set at approximately 50-foot centers across the center of the site. Sampling was also conducted on a less regimented pattern along the southern and northern sides of the site.

A total of 24 soil vapor probes were sampled during this survey. A specially-constructed 1/4-inch O.D. by 36-inch long stainless steel probe was manually inserted to a depth of 34 to 36 inches into the subsurface. The probe channel was partially predrilled using a portable 15-pound plunger bar or drop-hammer. The drop-hammer, consisting of a 4-1/2-foot-long, 1/2-inch-diameter steel rod, topped with a 15-pound steel weight, was used to drill to a soil depth of approximately 30 inches, the probe being hand-driven the remaining 4 to 6 inches into fresh, undisturbed soil. No cuttings or waste soil/water was generated by this procedure. Following installation, the probes were attached to the gas chromatograph utilizing a 1/8-inch O.D. by 5-foot length of Teflon gas tubing. Air blanks were taken through the probes and analyzed before the probes were inserted into the soil for each soil vapor analysis.

A Photovac Model 10S50 autocomputer portable gas chromatograph was used to analyze the vapor samples. The GC included a CSP-20M, 80/100 mesh analytical column (1/8-inch O.D. by 4-foot O.A.L.) and 6-inch CSP-20M precolumn. A special ultra-pure grade of compressed air was used as carrier gas.

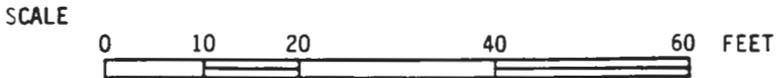

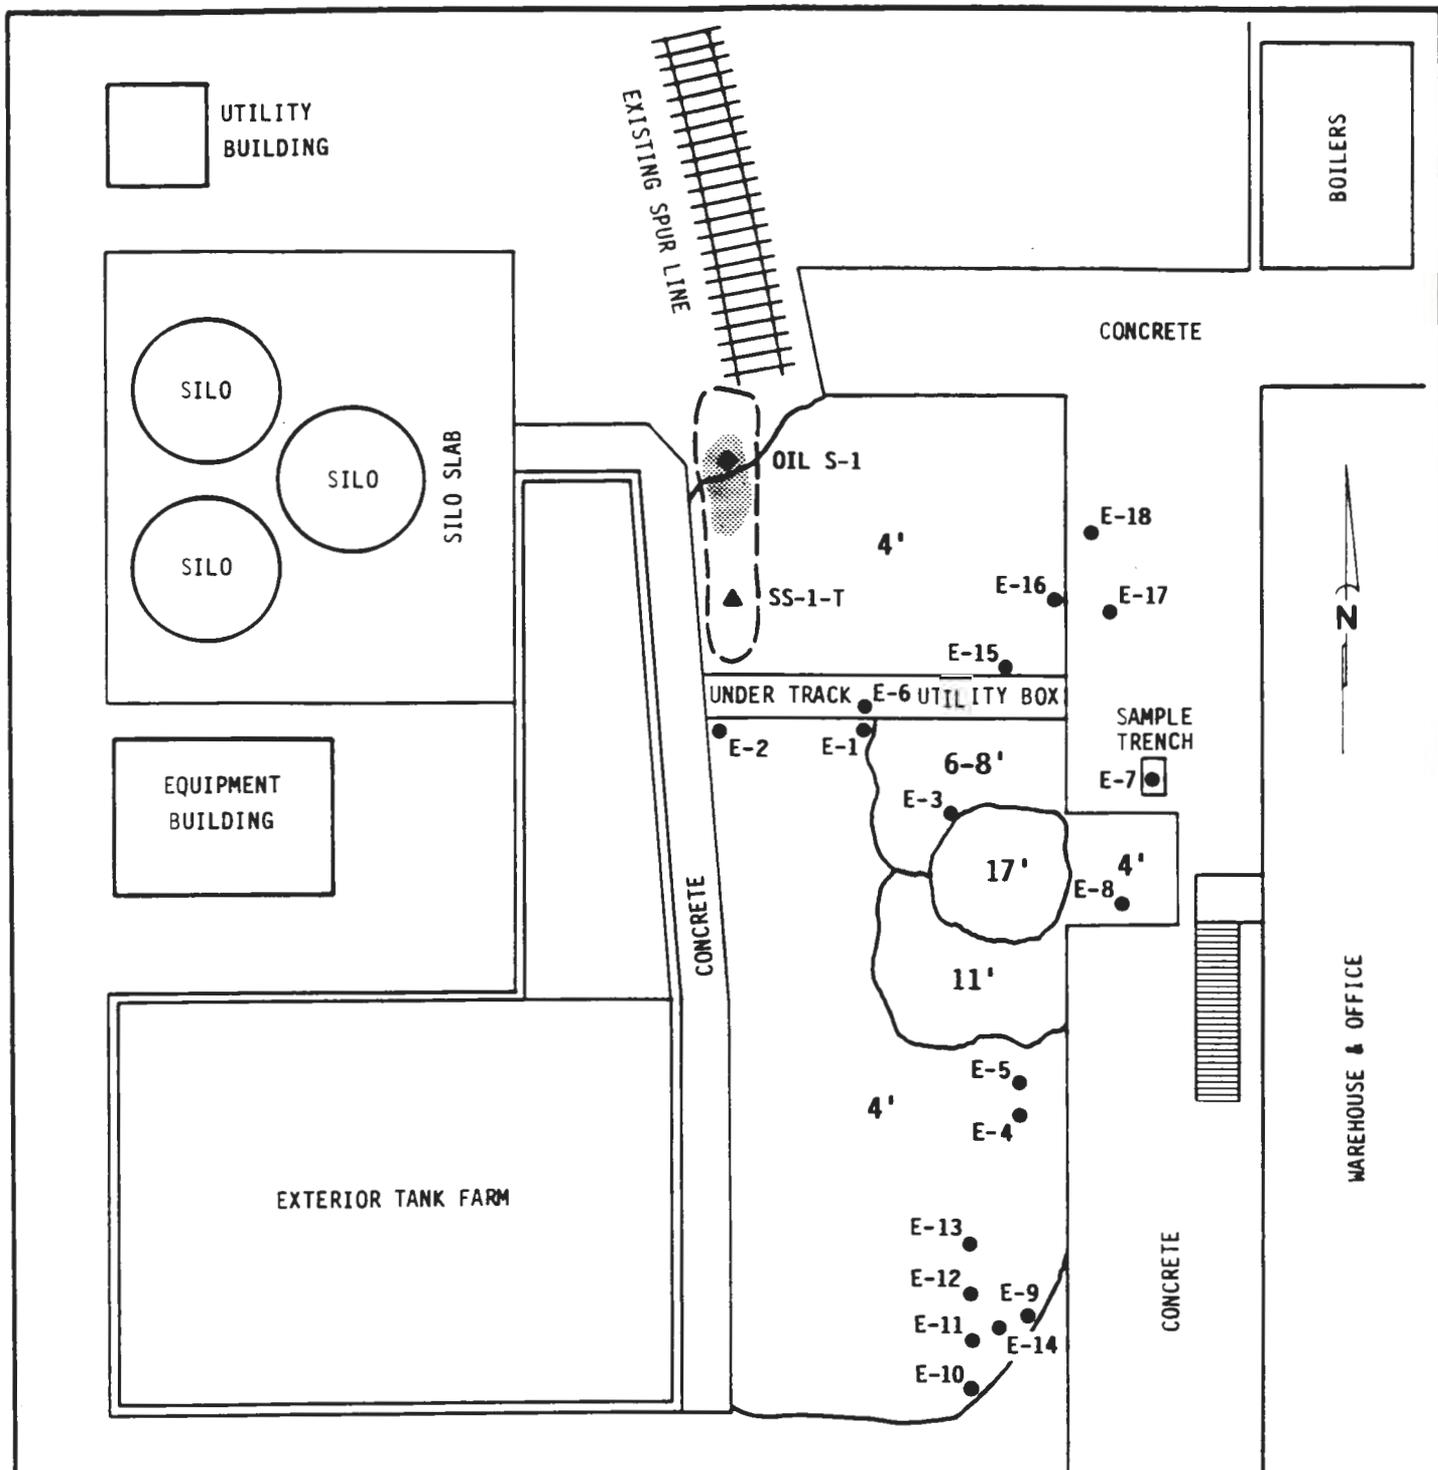

Sampling Protocol

Soil vapor analysis was conducted per the following protocol:

- 1) Inserted stainless steel soil vapor probe to a depth of 34 to 36 inches. The probes were sampled no later than 30 to 60 minutes after installation.
- 2) The GC was standardized using a benzene gas standard (254 ppb) prior to conducting the survey.
- 3) "Air-blanks" were analyzed by sampling the background air through the sample probe before each vapor analysis.

		RECEIVED FINAL REPORT. REVIEW

7-8-89 week

meet w/ mr. schinski, the pennwalt corp. offer overseeing the site cleanup. We again exchanged the same information and I explained that we still had not received a copy of the plan.

7-14-89 week

The Pennwalt Plan arrives.

7-19-89 week

The PLAN IS REVIEWED AND found to be in ~~add~~ adequate.

7-25-89 week

Spoke w/ mr. schinski and explained why we still have further questions regarding the site assessment plan. He said that he would like to meet on 8-1- or 8-2 of NEXT week to discuss the cleanup + site plan.

8/25/89

Grass

Sam Bauerman of PENNVALT called. He said fieldwork has been completed and 2 reports can be expected; The 1ST will be short + concise, The 2nd will be comprehensive.

6-30-89

wells

HE suggested I CALL MR. SCHINISKI THE Project Manager back in Philadelphia. When I returned to the office a Mr. Sam Balanu of Pennwalt Corp. called. ~~He~~ He wanted to explain the ACTIVITY AT THIS SITE. HE IS THE ENV. compliance mgr. for Pennwalt Corp. HE VERY carefully explained that THEY WERE NOT AWARE THAT THEY WERE REQUIRED TO NOTIFY THE LOCAL AGENCY OF ANY VOLUNTARY CLEANUP ACTIVITY. HE FURTHER EXPLAINED that they ~~was~~ would cooperate in any further action taken at this site. I explained that we would require a copy of the original site assessment plan and any ~~the~~ Lab. sample results. He explain that they would comply but would like to know what cleanup level ~~was~~ ~~that~~ would we require. I explained that that would depend on the background levels and the particular conditions of the public + private use ~~at~~ SURROUNDING the property. I again said that we ~~used~~ would need to see a copy of the site plan + any Lab. results. He said that they have found contaminated soil ~~and~~ from oil products and some traces of P.C.B. I said that we would talk again after we review the plan + lab. samples results.

Subject: Remedial Action At Former Pennwalt Facility, 630 N. Batavia, Orange,
CA 92668 - O.C.H.C.A. Case #89IC23

Dear Mr. Balamoun:

This letter confirms the completion of site investigation and remedial action at the above site. With the provision that the information provided to this Agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this Agency of any changes in report content, future contamination findings, or site usage.

If you have any questions regarding this matter, please contact Gary Zimmerman (714) 667-3761.

Very truly yours,

William J. Diekmann, REHS, M.S.

Site Remediation - Final Report

Dear Mr. Zimmerman:

Enclosed is the final report including field activities which were completed in October 1989, at the referenced site. Pennwalt elected to implement this **voluntary** site remediation program following its successful decommissioning of the plant facilities in an environmentally sound manner. Decommissioning of these facilities was initiated upon discontinuing manufacturing operations in April, 1989. The attached final report describes the major tasks included in this site remediation project. These tasks included site preparation, soil excavation, air quality and monitoring control, intermediate and final post-excavation soil sampling and analysis programs, quality assurance/quality control protocols, backfilling of the excavated area, compaction and site restoration.

Pennwalt engaged ENSR Constructors of Irvine, California to execute this site remediation program of which field activities were initiated on June 13, 1989. The implementation of this remediation program, including the post-excavation soil sampling and analysis program was closely coordinated with the County of Orange, Environmental Health, Waste Management Section. This included our meeting at the referenced site on August 16, 1989 and your site visits on August 31 and September 11, 1989 during the final post-excavation sampling program.

In reference to the attached final report, we believe that this voluntary site remediation program has been successfully completed by Pennwalt. Upon your review of this final report, we trust and look forward to receiving a favorable written response from the Orange County, Waste Management Section confirming the Agency's approval/concurrence as to Pennwalt's successful conclusion of this project.

Mr. Gary Zimmerman
December 26, 1989
Page 2

We take this opportunity to acknowledge the fine cooperation and guidance which you have provided during the execution of field activities particularly during the final post-excavation sampling program and your prompt evaluation of the final results. This cooperative effort, we believe was very helpful in completing this remediation project in an effective, well coordinated and expeditious manner.

Very truly yours,

Samuel B. Balamoun

Soil Removal/Clean-up Project

Dear Mr. Zimmerman:

This will confirm our telephone conversation on September 15 during which we discussed the results of the post-excavation soil samples at the referenced site. The last post-excavation sampling event occurred during your visit to the site on September 11 where one sample was collected at the existing tank farm area and the other sample was collected south of the excavated area of the pipe trench near the warehouse and office building.

We appreciated your prompt review of the results of the final post-excavation samples at the referenced site, and advising us that the soil removal/clean-up program has been successfully completed by Pennwalt to the satisfaction of your Department. We trust that written confirmation of this understanding will be issued to Pennwalt by Orange County upon submittal of these final post-excavation sampling results.

As agreed, enclosed for your information are two (2) figures which depict the locations and the analytical results of the final post-excavation samples which were collected at the site in conjunction with this soil removal/clean-up program. In this regard, it should be emphasized that the overall post-excavation soil sampling program was closely coordinated with the Orange County Health Department during your several site visits and telephone conversations. During our meeting at the referenced site on August 16, 1989, it was established that the parameters of interest relevant to the post-excavation samples are Total Petroleum Hydrocarbons (TPH) and Polychlorinated Biphenyls (PCBs) which were detected in a localized area at the site. This conclusion was based upon review of the site Assessment Report of July 1989 and discussion regarding the site history, including

the type of manufacturing activities conducted at the site.

Upon receiving your oral approval during our telephone conversation on September 15, we have completed backfilling the excavated area with clean soil along with compacting, grading and providing an asphalt cover of this area. This work was completed during the week of October 2. The excavated material has been characterized as appropriate, manifested and was disposed off-site at an authorized waste management facility.

Currently, we are in the process of preparing a final report on this project in coordination with our Contractor, ENSR, Inc. We plan to submit, by November 15, 1989, to your office a copy of the final report which will provide additional information regarding the soil removal/clean-up activities under this project including copies of the manifest documents and the analytical reports.

As discussed during our telephone conversation on September 15, upon your review of the attached post-excavation sampling results, we look forward to receiving a favorable written response from the Orange County Health Department confirming the Agency's approval/concurrence as to the successful conclusion of this remediation project.

We take this opportunity to acknowledge the fine cooperation and guidance which you have provided during field activities particularly regarding the post-excavation sampling program. Such effort, we believe enabled Pennwalt to complete the field activities in an effective and expeditious manner.

Site Assessment/Soil Removal Project

Dear Mr. Zimmerman:

This will confirm our telephone conversations on August 9 and today regarding our meeting which is scheduled to be held on August 16, 1989 at 9:00 A.M. at the referenced site. As discussed, the primary objectives of this meeting are to:

1. Respond to any questions you may have on the site assessment report which was submitted, on July 13, 1989 to Orange County, Waste Management Section,
2. Conduct a field inspection and review the current status of the soil removal activities at the site,
3. Review typical manifest documents regarding the disposal of excavated soil, off-site, at an authorized waste management facility,
4. Identify the locations of post excavation samples which will confirm soil condition at the conclusion of the soil excavation work to complete this project, and
5. Establish appropriate, site-specific, final action levels for the parameters of interest which will be utilized to evaluate and finalize the results of the post excavation samples at the conclusion of this project.

We look forward to a productive meeting and maintaining a cooperative effort with Orange County toward a successful and expeditious conclusion of this project. Your cooperation in achieving this objective will be appreciated.

Very truly yours,

Samuel B. Balamoun

MULTIPLE PACKAGE SERVICE

**IF YOU ARE
MAKING A MPS
SHIPMENT, APPLY
THE SELF ADHESIVE
MPS COPY HERE**

DEFINITIONS

On this Airbill, we, our and us refer to Federal Express Corporation, its employees and agents. You and your refer to the sender, its employees and agents.

AGREEMENT TO TERMS

By giving us your package to deliver, you agree to all the terms on this Airbill and in our current Service Guide, which is available on request. If there is a conflict between the current Service Guide and this Airbill, the Service Guide will control. No one is authorized to alter or modify the terms of our Agreement.

RESPONSIBILITY FOR PACKAGING AND COMPLETING AIRBILL

You are responsible for adequately packaging your goods and for properly filling out this Airbill. Omission of the number of packages and weight per package from this Airbill will result in a billing based on our best estimate of the number of packages received from you and an estimated "default" weight per package, as determined and periodically adjusted by us.

AIR TRANSPORTATION TAX INCLUDED

Our basic rate includes a federal tax required by Internal Revenue Code Section 4274 on the air transportation portion of this service.

LIMITATIONS ON OUR LIABILITY AND LIABILITIES NOT ASSUMED

Our liability for loss or damage to your package is limited to your actual damages or \$100, whichever is less, unless you pay for and declare a higher authorized value. We do not provide cargo liability insurance, but you may pay for costs for each additional \$100 of declared value. If you declare a higher value and pay the additional charge, our liability will be the lesser of your declared value or the actual value of your package.

In any event we will not be liable for any damages, whether direct, incidental, special or consequential in excess of the declared value of a shipment, whether or not Federal Express had knowledge that such damages might be incurred including, but not limited to, loss of income or profits.

We won't be liable for your acts or omissions, including but not limited to improper or insufficient packing, securing, marking or addressing, or for the acts or omissions of the recipient or anyone else with an interest in the package. Also, we won't be liable if you or the recipient violates any of the terms of our agreement. We won't be liable for loss of or damage to shipments of cash, currency or other prohibited items.

We won't be liable for loss, damage or delay caused by events we cannot control, including but not limited to acts of God, perils of the air, weather conditions, mechanical delays, acts of public enemies, war, strikes, civil commotions, or acts or omissions of public authorities (including customs and quarantine officials) with actual or apparent authority.

DECLARED VALUE LIMITS

The highest declared value we allow for Overnight Letter and Courier-Pak Overnight Envelope shipments is \$100. For other Priority-1 and Standard Air shipments, the highest declared value we allow is \$25,000 unless your package contains items of "extraordinary value," in which case the highest declared value we allow is \$500. Items of "extraordinary value," include artwork, jewelry, furs, money, precious metals, negotiable

TERMS AND CONDITIONS

instruments, and other items listed in our current Service Guide.

If you send more than one package on this Airbill, you may fill in the total declared value for all packages, not to exceed the \$100, \$500 or \$25,000 per package limit described above. (Example: 5 packages can have a total declared value of up to \$125,000.) If more than one package is shipped on this Airbill, our liability for loss or damage will be limited to the actual value of the package(s) lost or damaged (not to exceed the lesser of the total declared value or the per package limits described above). You have the responsibility of proving the actual loss or damage.

FILING A CLAIM

ALL CLAIMS MUST BE MADE BY YOU IN WRITING: You must notify us of your claim within strict time limits. See current Service Guide.

We'll consider your claim filed if you call and notify our Customer Service Department at 800-238-5355 and notify us in writing as soon as possible.

Within 90 days after you notify us of your claim, you must send us all relevant information about it. We are not obligated to act on any claim until you have paid all transportation charges, and you may not deduct the amount of your claim from those charges.

If the recipient accepts your package without noting any damage on the delivery record, we will assume that the package was delivered in good condition. In order for us to process your claim, you must, to the extent possible, make the original shipping cartons and packing available for inspection.

RIGHT TO INSPECT

We may, at our option, open and inspect your packages prior to or after you give them to us to deliver.

NO C.O.D. SERVICES

We don't provide C.O.D. services.

RESPONSIBILITY FOR PAYMENT

Even if you give us different payment instructions, you will always be primarily responsible for all delivery costs, as well as any costs we may incur in either returning your package to you or warehousing it pending disposition.

QUALIFIED ACCEPTANCE

We reserve the right to reject a shipment at any time, when such shipment would be likely to cause damage or delay to other shipments, equipment or personnel, or if the transportation of which is prohibited by law or is in violation of any rules contained in this Airbill or our Service Guide.

MONEY-BACK GUARANTEE

In the event of untimely delivery, Federal Express will at your request and with some limitations, refund or credit all transportation charges. See current Service Guide for further information.

Site Assessment Report

**HEALTH CARE AGENCY
Environmental Health**

Dear Mr. Wells:

In accordance with our telephone conversation on July 12, enclosed is one copy of the site assessment report for the referenced site which was conducted by ENSR Consulting and Engineering (formerly ERT). This report reflects conditions at the site as of termination of manufacturing operations in April, 1989.

As advised, Pennwalt is currently undertaken a voluntary remediation of soil conditions at a confined area on the site which was identified as a result of the site assessment. We plan to continue to keep you advised of significant progress regarding this project and look forward to working cooperatively with the County of Orange and your Department toward a successful conclusion of this project.

If you have any questions or comments regarding the enclosed report, please contact me at (215) 337-6810.

Very truly yours,

Samuel B. Balamoun

By Marie

November 30, 1990

George Ray
546 East Culver
Orange, CA 92666

Dear Mr. Ray:

In response to your October 21, 1990 letter, I refer you to my August 14, 1990 letter to you (see enclosed). Policy requires that non-principals who wish to obtain available facility documents work through the Custodian of Records. If the information you say you received did not answer your questions, I again suggest that you contact me at (714) 667-3761. You seem to be persistent in your letter writing. I suggest you persist at trying to contact me. Because I am involved in emergency response activities as well as being involved in numerous compliance investigations, facility cleanups and enforcement activities, I am not always by my phone. You can always have clerical page me and leave a callback telephone number.

In reference to your July 23, 1990 letter regarding the former Pennwalt plant, it is apparent to me it would take the flexibility of a telephone conversation to explain to you our policies and procedures regarding site assessments, site remediation, risk assessment/risk appraisal and the boundaries of our authority. I can tell you that more assessment work was conducted after the December 15, 1989 date that you cited in your July 23, 1990 letter. The site assessment and site remediation work conducted by the responsible party was evaluated by this Agency to be satisfactory.

Very truly yours,

Gary Zimmerman

Dear Mr. Ray:

I have received your original letter of July 23, 1990 and your follow-up letter as well. I tried to contact you by telephone but could not locate your number. You may call me at (714) 667-3761 if you want to discuss the Pennwalt file or you may contact Jean Marie Legacy our Custodian of Records at (714) 834-3536 to obtain copies of the file or to review the file at our office.

Very truly yours,

Gary Zimmerman

Rec'd 8-7-90

Dear Mr. Zimmerman:

As part of a proposed real estate transaction, I recently reviewed your office's public files on a former Pennwalt Corporation plant located at 630 N. Batavia Street in the City of Orange. I am writing you to ask several questions regarding the closing and cleanup of this site.

- 1) According to the file, you appear to have accepted cleanup standards of 25 ppm of PCB's and 1,000 ppm of total petroleum hydrocarbons in the soil. Given this site's proximity to residential housing and groundwater, why did you allow such high levels of contaminants to remain?
- 2) Although you apparently agreed to these standards, according to the Final Report (by ENSR Constructors, dated December 15, 1989) it appears that at several points the soil exceed these standards, even after remediation. I refer especially to SWH-2B, SWH-3B, HCA-5A, and perhaps SWH-4. Do you expect that you will require further remedial action at these points?
- 3) Although the preliminary Site Assessment (by ENSR Constructors, dated July 1989) shows some potential hot spots at the property perimeter (locations 10, 19, and 20), no further perimeter testing seems to have been done. Are you satisfied that pollution from this site is not migrating off-site to neighbors' property?
- 4) The original site investigation plan presumed that a boring would be drilled to groundwater and that a monitoring well would be installed. However, while the rig was in the field, and more than two-thirds of the way down, the boring was terminated and Pennwalt decided not to install a monitoring well. The reason for this decision was not clearly explained in the report. What are your views on the reason for the drilling termination, and the risk of groundwater contamination stemming from this site?

Letter to Mr. Zimmerman, OCHCA

July 23, 1990

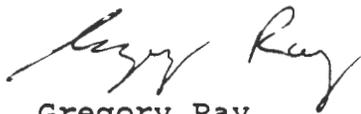

Page 2

5) Do you consider the file closed on this site, or is there anything more to be done?

6) Are any other governmental agencies involved in this site cleanup? Which other agencies were notified?

I look forward to hearing from you soon. If at all possible, I would appreciate your reply by August 3, 1990. Thank you for your assistance.

Sincerely,

Gregory Ray

Dear Mr. Zimmerman:

Last month I wrote to you regarding the former Pennwalt Corporation plant located at 630 N. Batavia Street in the City of Orange. I asked you a series of questions regarding the closure of this site, and I requested an answer by August 3rd.

Since I have not heard from you, I wanted to send you a copy of my letter to be sure that you received it. I would appreciate an answer at your first opportunity. If you cannot respond soon, could you please just drop me a note to tell me when I may expect your answers?

Thank you very much for your help.

Sincerely,

Gregory Ray

Dear Mr. Zimmerman:

As part of a proposed real estate transaction, I recently reviewed your office's public files on a former Pennwalt Corporation plant located at 630 N. Batavia Street in the City of Orange. I am writing you to ask several questions regarding the closing and cleanup of this site.

1) According to the file, you appear to have accepted cleanup standards of 25 ppm of PCB's and 1,000 ppm of total petroleum hydrocarbons in the soil. Given this site's proximity to residential housing and groundwater, why did you allow such high levels of contaminants to remain?

2) Although you apparently agreed to these standards, according to the Final Report (by ENSR Constructors, dated December 15, 1989) it appears that at several points the soil exceed these standards, even after remediation. I refer especially to SWH-2B, SWH-3B, HCA-5A, and perhaps SWH-4. Do you expect that you will require further remedial action at these points?

3) Although the preliminary Site Assessment (by ENSR Constructors, dated July 1989) shows some potential hot spots at the property perimeter (locations 10, 19, and 20), no further perimeter testing seems to have been done. Are you satisfied that pollution from this site is not migrating off-site to neighbors' property?

4) The original site investigation plan presumed that a boring would be drilled to groundwater and that a monitoring well would be installed. However, while the rig was in the field, and more than two-thirds of the way down, the boring was terminated and Pennwalt decided not to install a monitoring well. The reason for this decision was not clearly explained in the report. What are your views on the reason for the drilling termination, and the risk of groundwater contamination stemming from this site?

		PCB	TPH
	SWH-2B	—	1600
8-89	SWH-3B	—	1700
7-89	SWH-4	35	3200
	HCA 5A	—	1900

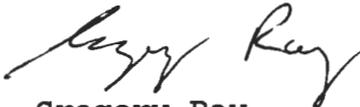

Letter to Mr. Zimmerman, OCHCA
July 23, 1990
Page 2

5) Do you consider the file closed on this site, or is there anything more to be done?

6) Are any other governmental agencies involved in this site cleanup? Which other agencies were notified?

I look forward to hearing from you soon. If at all possible, I would appreciate your reply by August 3, 1990. Thank you for your assistance.

Sincerely,

Gregory Ray

INTRODUCTION and PURPOSE

The purpose of this site assessment investigation was to evaluate the environmental conditions onsite, particularly with regards to potential impacts on soil or groundwater, if any. A site inspection was conducted and subsequent field investigations involved a soil vapor survey and a soil boring program including the collection of subsurface soil samples.

The site is located at 630 North Batavia Street, Orange, California, approximately three-quarters of a mile east of the Santa Ana River (see Figure 1). Santiago Creek, which flows west into the Santa Ana River, lies approximately one and one quarter mile south. The area around the site is a mixture of light industrial/commercial (predominantly north and west of the site), and residential (predominantly south of the site).

The subject site constituted a specialty chemical plant which produced a variety of cleaning products. Reportedly, manufacturing operations were discontinued in April, 1989. While the plant was in operation, raw materials were stored on site, predominantly in an above-ground tank farm located near the center of the site. Table 1 lists the materials stored by tank number and Figure 2 shows tank locations.

DRAWN BY: <i>AM</i>	DATE: <i>2/26/88</i>	PROJECT NO.: G812-292
CHK'D BY:	REVISED:	DWG. NO.: FIGURE 2

SITE DESCRIPTION

The following information was obtained during our site inspection in February, 1988. The facility is owned by Pennwalt Corporation, 3 Parkway, Philadelphia, Pennsylvania. The site address is 630 North Batavia Street, Orange, California, in the County of Orange. The site, which occupies approximately 3.37 acres, is covered nearly entirely with either buildings or pavement. The site constitutes a chemical specialties plant capable of manufacturing a large variety of metal preparation compounds and cleaners, and also includes warehousing and shipping facilities for products made both onsite and at other Pennwalt facilities, and office space for facility personnel. Reportedly, manufacturing operations were discontinued in April, 1989.

The property is bounded by Batavia Street on the east, a Santa Fe Railroad right-of-way on the north, and light industrial/commercial properties to the west and south. There are two buildings on the property; the main building which fronts Batavia Street contains approximately 24,000 square feet, about 4800 square feet of which is office space; and the back building contains approximately 26,000 square feet. Between the two buildings, there are a tank farm and a railroad siding.

The site has full access to public utilities. Electricity transmission lines are above ground. There are two electricity poles on the north side of the main building. Both have transformers attached. Southern California Edison has assured Pennwalt that no PCBs are used in the transformers.

A Santa Fe Railroad siding extends from the main track north of the property to the area between the main and back buildings. Where the buildings do not abut the property line

ENSR

on the north and portions of the west and south sides, there is chainlink fencing. The lot is essentially flat, with the rear slightly sloping to the northwest corner. Other depressions are designed to control surface water runoff.

Wastewater (primarily domestic) from the main building is discharged into the County sanitary sewer. A trench equipped with a grease trap in the main building discharges to the sanitary sewer.

Wastewater from the manufacturing processes and sumps around the back building is routed through a three-stage clarifier located outside of the northeast corner of the back building and is discharged into the County industrial sewer. There is a network of lines that direct wastewater collected in various drains, sumps, and trenches to the clarifier and eventually to the sewer system. Sumps are located in the bulk storage area, the truck wells, washdown shed, and certain process areas. Piping in the bulk storage area and wet processing area is complemented by trenches which are connected to the clarifier.

A 10-inch culvert at the very northwest corner of the property provides a conduit to drain surface water runoff offsite. Most of the storm water runoff drains by gravity, although storm water collected in the truck well sump is pumped to the culvert. The culvert extends west 100 to 120 feet and discharges to the surface at the bottom of the railroad grading. A storm drain is located nearby.

Approximately 38 above-ground storage and mixing tanks are located between and in both of the buildings (see Table 1 for volumes and types of materials contained). There is a liquified petroleum gas (propane) tank containing approximately 300-gallons, on the north side of the main building, west of the loading dock.

According to Donald Kossler, Plant Manager, asbestos is found in certain areas of the main building but that the back building, which was built in 1983, contains no asbestos. An asbestos survey was not requested to be conducted for this investigation.

The plant was capable of manufacturing over 150 different products in batch processes. Typical manufactured products included cutting oils, drawing compounds, acid and caustic cleaners, detergents, soaps, and related products. A number of mixers were used in the processing. Viscous raw materials were fluidized in an oven prior to mixing. A gas-fired boiler provided process steam. Many liquid raw materials were stored in tanks (see Table 1) and drums, while dry materials were stored in silos, drums and bags.

The raw materials were essentially consumed in the manufacturing process with no by-products. The only wastes generated were wastewater and oil tank and kettle wash out. As noted above, during operations the wastewater passed through a clarifier before it is discharged to the Orange County sewer system. Every three to four months, about 3,500 gallons of sludge which settled at the bottom of the clarifier was pumped out and transported by a registered hauler under manifest to an authorized waste management facility in Los Angeles.

The oil tank and kettle wash out were usually recycled back into the manufacturing process. Some residual oil was stored in 55-gallon drums and was transported by a registered hauler under manifest to an oil recycling facility.

According to Donald Kossler, Plant Manager, the site was vacant land prior to the construction of an oil blending facility by Kerns, Inc. in 1957. Kerns blended lubricating oils for industrial use at the facility.

Pennwalt purchased the facility around 1969 and added grease production capabilities. Pennwalt's Keystone Division continued to manufacture greases at the site until 1986. At this time, a process hot oil heater was dismantled and removed from the site. At the time of the inspection the heater used Mobiltherm (a non-PCB oil). Ten years ago the heater used an oil containing PCBs. It was reported by Pennwalt personnel that the PCB oil was removed and incinerated offsite, and the system was cleaned prior to replacement with a non-PCB oil.

A second building (the back building) was constructed in 1983. Detergents, cleaners, and soaps were made here along with metal preparation compounds. Waste generation did not significantly varied over the years; most raw materials were consumed in the manufacturing process with no by-products.

Current uses of adjacent properties include:

Katsis Autobody Crafts, 650 N. Batavia Street - autobody repair and painting.

Pacific Supply Corp., 675 N. Batavia Street - roofing supplies.

Hydroscape, 601 N. Batavia Street - landscaping and irrigation supplies.

Vacant (formerly Seatec Inflatable Systems), 600 N. Batavia Street - manufactured diving supplies.

Public Storage, 601 N. Main Street - retail storage spaces.

Arrowhead Drinking Water Co., 619 N. Main Street - distribution center for bottled drinking water.

There are a number of automotive repair shops in the vicinity. Additionally, two printing shops and a concrete construction company are located nearby.

According to the Orange County Water District, no drinking water production wells exist within 1,000 Feet of the site. A residential area consisting of single family houses and apartment buildings begins approximately 500 feet south of the site.

At the time of the inspection the facility held the following permits or registrations:

EPA Generator number : CAD 990667826
Orange County Hazardous Waste Program: Registration Number
465

Orange County Sanitation Districts: Class I Permit for
Industrial Wastewater Discharge Number 2-561

GEOLOGY/HYDROGEOLOGY

The following discussion of site geology/hydrogeology is compiled from the following documents:

"Ground-water Geology of the Coastal Zone, Long Beach-Santa Ana Area, California", ,J.F. Poland, A.M. Piper, et al, 1956, U.S. Geological Survey Water Supply Paper 1109.

"Progress Report On Ground Water Geology of the Coastal Plain of Orange County", California Department of Water Resources, 1967.

The site lies near the western boundary of the Tustin Plain, where it merges with the Downey Plain. The near-surface deposits in this central lowland area are thought to be of Recent or Pleistocene age and are composed of alluvial sediments (mixtures of gravel/sand/silt/clay) derived predominantly from the Santa Ana Mountains. The area near the site is likely a combination of sediments deposited from

Santiago Creek and the Santa Ana River. Site specific geology is discussed below in Findings.

According to Steve Overman of the California Regional Water Quality Control Board, groundwater exists approximately 90 to 100 feet below surface elevation and generally flows to the southwest. Groundwater production in the area near the site includes the City of Orange wells #18 and #19 (see Figure 1, for approximate location). These wells are reported by the City of Orange Water Department, to be sealed to approximately 400 feet depth with perforated sections placed intermittently between that depth and their total depths of approximately 1000 feet.

FIELD INVESTIGATIONS

Our field investigations included two tasks. The first involved a soil vapor survey to screen the site for the presence of petroleum hydrocarbon vapors in the soils. The second task involved the collection and analysis of soil samples from selected borings.

Soil Vapor Survey

On February 23, 1988, a soil vapor survey was conducted at the subject site. The survey consisted of the placement of twenty-four (24) temporary soil vapor probes from which vapor samples were collected and analyzed onsite using a portable gas chromatograph. The locations of the vapor sampling are shown on Figure 3. Other details concerning the soil vapor survey are discussed in Attachment I, which also contains copies of the actual chromatograms.

Soil Sampling

On February 25, 1988, five soil borings were excavated and soil samples collected. The locations of the borings are shown on Figure 3. Analytical results of soil samples analyzed are presented in Table 2. Attachment II contains a discussion of the details of the borings and copies of the boring logs. Boring SB-1 was excavated to a depth of approximately 65 feet. It had been planned that this boring would be drilled to ground water and that a monitoring well would be installed to sample ground water. The boring was terminated at the 65 foot depth because of drilling difficulty. It was subsequently felt by Pennwalt Corporation that installation of the monitoring wells would be unwarranted due to the depth to the uppermost aquifer (approximately 90 feet).

Boring SB-2 was terminated at 5 feet depth because the bottom of a gravel layer was encountered, saturated with an oil/water mixture. This perched liquid was believed to be limited to a depth of 5 feet, because a layer of clayey material was encountered below it.

FINDINGS

Soil Vapor Survey

Results from the soil vapor survey suggest that a low level of vapors exists in the soil at this site. However, an area between the old building (east side of site) and the existing tank farm was encountered during the survey with perched fluids (oil/water mixture). It was reported by site personnel that a former above-ground tank farm was located in this area (east of the present tank farm), and that a gravel bed had existed there as a base for the tanks. Boring SB-2 confirmed the presence of this gravel bed and the perched fluids in it.

Soil Borings and Sample Analyses

Boring logs for the five (5) borings are presented in Attachment II. To summarize, the site which has an asphalt concrete/cement concrete surface, is underlain by alluvial sediments composed predominantly of gravel, except for the upper ten to fifteen feet, which consisted of finer grained sediments, including sands, silts, and clays.

As mentioned above, a gravel bed was encountered in Boring SB-2, which was saturated with an oil/water mixture. This fluid was analyzed to evaluate the type of hydrocarbons it contained. Comparison of Methods 418.1 and 8015-M, suggest that the hydrocarbons in the lighter than water phase are composed of diesel fuel range hydrocarbons (approximately 30 %) and light oil range hydrocarbons (approximately 70 %). Additionally, low levels of PCB's (Aroclor 1242) and 2-Butanone (methyl-ethyl ketone) were detected in one sample of this fluid.

Soil samples collected from the other four borings were analyzed for Purgeable Organics by EPA Method 8240. None of these compounds were detected in any of the four (4) samples analyzed (see Table 2).

CONCLUSIONS

Based on the results from the soil sample analyses, presented in Table 2, soil conditions do not appear in general to have been impacted except for the area around Boring SB-2. The extent of this impacted area is believed to be limited to the area of the former above-ground tank farm.

STUDY LIMITATIONS

This report, including the exhibits attached, describes the results of ENSR's initial investigation to evaluate the environmental conditions at the site particularly with regard to impacts to soil or groundwater, if any. The conclusions and recommendations stated herein represent the application of a variety of engineering and technical disciplines to material facts and conditions associated with the subject site, as a result of Phase I and Phase II investigations which were conducted during the period of February 17 through March 18, 1988. Many of these facts and conditions are subject to change over time; accordingly, the conclusions and recommendations must be viewed within this context. We also note that groundwater was not sampled.

ENSR has performed this site assessment in a professional manner using that degree of skill and care exercised for similar projects under similar conditions by reputable and competent environmental consultants. Finally we note that this assessment was prepared for the use of Pennwalt Corporation. ENSR shall not be responsible for conditions or consequences arising from any matters related to the investigation and this report.

ATTACHMENT I

Soil Vapor Survey

Soil vapor mapping is conducted along discrete specified grid coordinates. For this site, grid points were set at approximately 50-foot centers across the center of the site. Sampling was also conducted on a less regimented pattern along the southern and northern sides of the site.

A total of 24 soil vapor probes were sampled during this survey. A specially-constructed 1/4-inch O.D. by 36-inch long stainless steel probe was manually inserted to a depth of 34 to 36 inches into the subsurface. The probe channel was partially predrilled using a portable 15-pound plunger bar or drop-hammer. The drop-hammer, consisting of a 4-1/2-foot-long, 1/2-inch-diameter steel rod, topped with a 15-pound steel weight, was used to drill to a soil depth of approximately 30 inches, the probe being hand-driven the remaining 4 to 6 inches into fresh, undisturbed soil. No cuttings or waste soil/water was generated by this procedure. Following installation, the probes were attached to the gas chromatograph utilizing a 1/8-inch O.D. by 5-foot length of Teflon gas tubing. Air blanks were taken through the probes and analyzed before the probes were inserted into the soil for each soil vapor analysis.

A Photovac Model 10S50 autocomputer portable gas chromatograph was used to analyze the vapor samples. The GC included a CSP-20M, 80/100 mesh analytical column (1/8-inch O.D. by 4-foot O.A.L.) and 6-inch CSP-20M precolumn. A special ultra-pure grade of compressed air was used as carrier gas.

Sampling Protocol

Soil vapor analysis was conducted per the following protocol:

- 1) Inserted stainless steel soil vapor probe to a depth of 34 to 36 inches. The probes were sampled no later than 30 to 60 minutes after installation.
- 2) The GC was standardized using a benzene gas standard (254 ppb) prior to conducting the survey.
- 3) "Air-blanks" were analyzed by sampling the background air through the sample probe before each vapor analysis.

ATTACHMENT II

Drilling and Soil Sampling

Borings for the collection of soil samples were excavated using a hollow-stem auger. Soil samples were collected at five-foot intervals, using a modified California split spoon sampler fitted with brass tubes for soil retention. Lithologic logs of the boreholes were compiled from these samples by a geologist, in accordance with the Unified Soils Classification System.

At least two samples were retrieved per sampling interval. Screening organic vapor using an ambient temperature headspace (ATH) method was conducted on one of these samples, by placing a portion of the soil into a clean glass jar, and sealing the jar with aluminum foil and a modified lid. After the sample was allowed to reach ambient temperature, the foil seal was punctured with the sampling probe of an HNu, photoionization detector, and the headspace was analyzed. Selected soil samples were delivered to a California-certified hazardous waste laboratory, and analyzed for volatile organics pollutants using U.S. EPA Method 8240.

The soil samples were for shipment to the laboratory as follows: Upon retrieval from the sampler, the middle of three brass tubes was covered on both ends with Teflon liners and capped with plastic end caps. The end caps were secured with plastic tape. A sample label was attached, identifying the sample by boring number and depth interval. The samples were then sealed in plastic bags and placed on ice. The samples were transported with documented chain-of-custody forms to the laboratory.

Prior to each use, the modified California split tube sampler was cleaned by first washing with a non-phosphate detergent, followed by a tap water rinse, methanol rinse and thorough distilled water rinse.

Soil borings were backfilled with cuttings and capped with concrete.

Re: Inspection and Testing of Grading Operations - Tank Backfill located at 630 N.
Batavia Street in the City of Orange, California

Dear Sirs:

Pursuant to your request, compaction tests were obtained at the above-referenced location. Results of the compaction tests are attached and locations of these tests are shown on the accompanying plot plan.

All work was performed in accordance with requirements of the City of Orange, and with all present day standards of the Soils Engineering Industry.

All vegetation and demolition debris was stripped and removed from the fill area prior to the placement of any fill soils.

The existing low density soils were removed to competent natural ground, the exposed surface scarified, moisture conditioned and then recompacted to a minimum of 90% relative compaction.

Fill soils placed were compacted to a minimum of 90% of the laboratory standard in lifts not in excess of eight inches in thickness. The maximum depth of fill placed was \pm 7.0 feet.

The relative compaction was determined by Sand Cone Method (ASTM: D-1556-82) and by the Drive Tube Method (ASTM: D-2937). The maximum density of the fill soils was obtained by the laboratory standard (ASTM: D-1557-78) and results are shown on Table I. Tests were performed a minimum of every 500 cubic yards placed and every 2.0 feet in depth of fill placed.

A rubber tire loader and track loader were utilized for compaction control. A water hose provided moisture control.

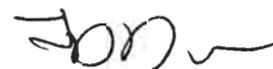

Chemical analysis of the backfill and underlying soils was not performed by NorCal Engineering.

We appreciate this opportunity to be of service to you. If you have any further questions, please do not hesitate to contact the undersigned.

Respectfully submitted,
NORCAL ENGINEERING

Keith D. Tucker
Project Engineer

5 to 75 Ton HYDRAULIC CRANES

16' to 175' BOOM

(213) 515-7368
(714) 761-9696
 Effective January 1, 1989

**24-HOUR
SERVICE**

HYDRAULIC CRANES FULLY MAINTAINED AND OPERATED

5 Ton 40' Boom w/ Jib 60'	per hr. 110.00
14½ Ton up to 100'	per hr. 130.00
14½ Ton over 100'	per hr. 140.00
27½ Ton or 30 Ton	per hr. 196.00
35 Ton	per hr. 205.00
45 Ton	per hr. 215.00

50 Ton	per hr. 225.00
65 Ton	per hr. 240.00
75 Ton	per hr. 255.00
80 Ton	per hr. 279.00
115 Ton	per hr. 330.00
Man Basket	35.00/day

- 5 Ton thru 50 Ton legal to travel 24 hours, including Sundays and Holidays.
- All equipment will be computed on the ½ hr. — man baskets available.
- Rough Terrain Cranes for bare rental — Conventional Cranes Available.

NO INSURANCE SURCHARGE

PORTAL TO PORTAL FOR CREW TIME WILL BE CHARGED ON FIRST AND LAST DAY OF THE JOB - 1 MAN \$58.00 PER HR. S.T. \$87.00 PER HR. T½; 2 MAN CREW \$116.00 PER HR. S.T. -\$174.00 PER HR. T½. OVERTIME CHARGED WHEN APPLICABLE.

CHARGES WILL BE ASSESSED FOR TRAVEL, WORKING OR STANDBY TIME INCLUDING TIME SPENT INSTALLING OR REMOVING ACCESSORY EQUIPMENT.

OVERTIME CHARGES:

FOR WORK PERFORMED IN EXCESS OF EIGHT (8) HOURS OR BEFORE 7 A.M. OR AFTER 5 P.M. OR ON SATURDAYS, ADD TO THE APPLICABLE RATE.

OVERTIME:	1 MAN CRANE	PER HR. 29.00
	2 MAN CRANE	PER HR. 58.00
DOUBLE TIME:	1 MAN CRANE	PER HR. 58.00
	2 MAN CRANE	PER HR. 116.00

DOUBLE TIME MUST BE PAID WHEN WORKING WITH LABOR CRAFTS RECEIVING DOUBLE OVERTIME, OR ON SUNDAYS.

HOLIDAY: WORK DONE ON HOLIDAYS 3 TIMES THE REGULAR RATE OF PAY WITH 8-HOUR MINIMUM PER MAN AS PER UNION AGREEMENT. ADD TO THE APPLICABLE RATE:

1 MAN CRANE	PER HR. 116.00
2 MAN CRANE	PER HR. 232.00

SUBSISTENCE:

WHERE APPLICABLE, WILL BE INVOICED AS PAID UNDER THE REQUIREMENTS OF THE LABOR CONTRACTS. CURRENTLY \$40.00 PER MAN PER DAY BEYOND 40 MILES FROM OUR YARD.

LONG BOOM CHARGE:

WHERE CRANE IS REQUIRED TO HAVE THE FOLLOWING LENGTHS OF BOOM (INCLUDING JIB) THE HOURLY RATES SHALL BE INCREASED IN THE AMOUNT OF:

	STANDARD TIME	OVER TIME	DOUBLE TIME
80' TO 99'	\$2.00	\$3.00	4.00 PER HR.
OVER 100' TO 119'	\$3.00	4.50	6.00 PER HR.
OVER 120' TO 159'	\$4.50	6.75	9.00 PER HR.
OVER 160' TO 175'	\$7.50	11.25	15.00 PER HR.

MINIMUM CHARGE:

SUBJECT TO FOUR (4) HOUR MINIMUM FOR EQUIPMENT INCLUDING FOUR (4) HOUR MINIMUM FOR CREW.

WHEN THE CRANE WORKS LESS THAN EIGHT (8) HOURS IN ONE DAY AND IS REQUIRED TO REMAIN AT THE WORK SITE FOR WORK THE FOLLOWING DAY, IN COMPLIANCE WITH UNION REGULATIONS THE MINIMUM CREW TIME WILL BE EIGHT (8) HOURS.

1 MAN CRANE	PER HR. 58.00
2 MAN CRANE	PER HR. 116.00

BOOM AND ACCESSORY SERVICE CHARGES:

EXTRA BOOM AND ACCESSORY EQUIPMENT —

1. RIGGING PICK-UP: \$45.00 PER DAY
2. BOOM TRUCK: \$70.00/hr., 2 hour minimum, coinciding with travel time.

Certificate of Insurance Issued Upon request.

Our liability and responsibility shall be limited strictly and solely to acts or omissions of our direct employees, anything in any purchase order or contract notwithstanding. We are not responsible for delays due to equipment malfunctions, weather, or other causes beyond our control, as well as conditions and terms shown on our daily crane rental tickets. Rates and conditions quoted herein are subject to change without notice. Terms are net 10 days following the end of month invoiced.

GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

GENERATOR'S CERTIFICATION: I hereby certify that the materials listed above are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled in accordance with applicable international and national government regulations.

If I am a large quantity generator, I certify that the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that the waste is managed, stored, or disposed currently available to me which minimizes the present and future threat to human health and the environment. I have made a good faith effort to minimize my waste generation and select the best waste management option that I can afford.

ment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled in accordance with applicable international and national government regulations.

If I am a large quantity generator, I certify that the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that the waste is managed, stored, or disposed currently available to me which minimizes the present and future threat to human health and the environment. I have made a good faith effort to minimize my waste generation and select the best waste management option that I can afford.

Attention: Erik A. Nelson

Gentlemen:

RULE 1166 CONTAMINATED SOIL MITIGATION PERMIT

Reference is made to your Application (A/N 195633) received on June 9, 89 for a Rule 1166 Excavation Permit for the excavation and handling of VOC contaminated soil at various locations within the South Coast Air Quality Management District.

Please be advised that your Rule 1166 Plan has been granted approval under Rule 1166 of the Rules and Regulations of the SCAQMD and is subject to the following conditions.

PERMIT CONDITIONS:

1. THIS EXCAVATION SHALL BE CONDUCTED IN COMPLIANCE WITH ALL PLANS AND SPECIFICATIONS SUBMITTED WITH THIS APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
2. THIS EXCAVATION PERMIT IS VALID UNTIL **January 10, 90**. THIS PERMIT MAY BE RENEWED BY SUBMITTING AN ADDITIONAL RULE 1166 APPLICATION WITH THE CORRESPONDING FILING FEE, AND THE RECORDS REQUIRED TO BE KEPT UNDER CONDITION NO. 21 OF THIS PERMIT.
3. THE SCAQMD SHALL BE NOTIFIED AT LEAST 24 HOURS PRIOR TO EACH EXCAVATION COMMENCING AND WHEN IT IS COMPLETED. SUCH NOTIFICATIONS SHALL OCCUR PRIOR TO THE COMMENCEMENT AND WITHIN FIVE DAYS AFTER THE COMPLETION OF THE EXCAVATION BY CALLING (818) 572-6195.
4. THIS PERMIT IS VALID ONLY FOR THE REMOVAL, HANDLING, STOCKPILING, AND OR BACKFILLING OF A MAXIMUM OF 2000 CUBIC

5. VOC CONTAMINATED SOIL IS A SOIL WHICH REGISTERS 50 PPM OR MORE WHEN MEASURED WITH AN ORGANIC VAPOR ANALYZER (CALIBRATED AS HEXANE) AT A DISTANCE OF UP TO THREE INCHES ABOVE EXCAVATED AND EXPOSED SOIL.
6. EXCAVATION, SOIL HANDLING, STOCKPILING, AND BACKFILLING SHALL NOT BE CONDUCTED BETWEEN THE HOURS OF 6:00 PM AND 7:00 AM OR ON SATURDAYS, SUNDAYS AND LEGAL HOLIDAYS.
7. EXCAVATION, SOIL HANDLING, STOCKPILING, AND BACKFILLING SHALL NOT BE CONDUCTED WHENEVER THE AVERAGE WIND SPEED IS GREATER THAN 15 M.P.H. AVERAGE (OVER 15 MINUTES) OR THE WIND SPEED INSTANTANEOUSLY EXCEEDS 25 M.P.H.
8. DURING EXCAVATION, SOIL HANDLING, STOCKPILING, AND BACKFILLING, ALL WORKING AREAS, EXCAVATED MATERIAL AND UNPAVED ROADWAYS SHALL BE WATERED DOWN UNTIL THE SURFACE IS MOIST AND THEN MAINTAINED IN A MOIST CONDITION TO MINIMIZE DUST.
9. PRIOR TO LOADING, TRUCK TRAILERS USED FOR THE TRANSPORT OF THE VOC CONTAMINATED SOIL SHALL BE LINED WITH AN IMPERMEABLE LINER. PRIOR TO LEAVING THE SITE, THE LOADED TRUCKS SHALL BE COMPLETELY COVERED WITH AN IMPERMEABLE COVER. THE IMPERMEABLE COVER/LINER SHALL BE HEAVY DUTY PLASTIC SHEETING OR OTHER EQUIVALENT MATERIAL APPROVED BY THE EXECUTIVE OFFICER.
10. THE EXTERIOR OF TRUCKS (INCLUDING THE TIRES) HAULING EXCAVATED MATERIAL SHALL BE CLEANED OFF PRIOR TO LEAVING THE EXCAVATION SITE.
11. ALL VOC CONTAMINATED SOIL THAT IS EXCAVATED, AND MATERIALS THAT ARE STOCKPILED SHALL BE IMMEDIATELY COVERED WITH HEAVY DUTY PLASTIC SHEETING AND ANCHORED DOWN SO AS TO PREVENT ANY VOCs FROM ESCAPING INTO THE ATMOSPHERE.
12. ALL PLASTIC SHEETING COVERING THE STOCKPILED SOIL SHALL BE INSPECTED, AND REPAIRED IF NEEDED, ON A DAILY BASIS TO MAINTAIN ITS INTEGRITY.
13. STOCKPILED SOIL SHALL BE REMOVED FROM THE SITE WITHIN 30 DAYS AFTER ALL VOC CONTAMINATED SOIL IS REMOVED FROM THE AFFECTED AREAS.
14. IF VOC CONTAMINATED SOIL IS TRANSPORTED OFF-SITE, WHEN LOADING IS COMPLETED AND DURING TRANSPORT, NO MATERIAL SHALL EXTEND ABOVE THE SIDES OR REAR OF THE TRUCK OR TRAILER WHICH WILL HAUL THE EXCAVATED MATERIAL.

15. EXCAVATION PIT(S) SHALL BE IMMEDIATELY AND COMPLETELY COVERED WITH HEAVY DUTY IMPERMEABLE PLASTIC SHEETING DURING PERIODS OF INACTIVITY INCLUDING BUT NOT LIMITED TO WEEKENDS, OVERNIGHT, AND HOLIDAYS.
16. THE EXCAVATION SHALL BE CONDUCTED IN 40 FT. X 40 FT. OR SMALLER SECTIONS TO MINIMIZE EXPOSURE OF SOIL POTENTIALLY CONTAMINATED WITH VOC.
17. DURING EXCAVATION, SOIL HANDLING, STOCKPILING, AND BACKFILLING, MONITORING FOR ORGANICS AS HEXANE USING AN ORGANIC VAPOR ANALYZER (OVA) OR OTHER MONITOR APPROVED BY THE SCAQMD SHALL BE CONDUCTED CONTINUOUSLY AT THE WORKING FACE MEASURED AT A DISTANCE OF UP TO 3 INCHES ABOVE EXCAVATED AND EXPOSED SOIL.
18. ALL MONITORS SHALL BE CALIBRATED DAILY USING A METHOD APPROVED BY THE DISTRICT.
19. A FINAL COVER SHALL BE PLACED OVER THE ENTIRE EXCAVATION SITE ONCE OPERATIONS HAVE CEASED SO AS TO PREVENT ANY VOCs FROM ESCAPING INTO THE ATMOSPHERE. THE COVER SHALL CONSIST OF AT LEAST SIX INCHES OF CLEAN SOIL OR ANY OTHER DISTRICT APPROVED COVER.
20. IF VOC CONTAMINATED SOIL IS ENCOUNTERED, THE DISTRICT ENFORCEMENT DIVISION SHALL BE NOTIFIED BY CALLING (818) 572-6195 WITHIN 24 HOURS OF DETECTION.
21. RECORDS SHALL BE KEPT OF THE FOLLOWING:
 - A. CONCENTRATIONS OF VOC GREATER THAN 50 PPM AS DETERMINED IN CONDITION NUMBER 17 AT EACH SITE, INCLUDING THE DATE AND TIME OF MEASUREMENT, SHALL BE RECORDED EVERY 15 MINUTES.
 - B. THE DAILY VOLUMES OF VOC CONTAMINATED SOIL THAT ARE EXCAVATED AND HANDLED AT EACH SITE.
 - C. DATES AND DAILY HOURS OF OPERATION, INCLUDING STARTING DATES AND DATES THAT ALL VOC CONTAMINATED SOIL HANDLING HAS BEEN COMPLETED FOR EACH SITE.

WITHIN THIRTY DAYS AFTER EXPIRATION OF THIS RULE 1166 CONTAMINATED SOIL MITIGATION PERMIT, A COPY OF ALL RECORDS LISTED ABOVE SHALL BE SUBMITTED TO THE SCAQMD. ONE COPY SHALL BE SUBMITTED TO THE ENFORCEMENT DIVISION, WITH THE SECOND COPY SUBMITTED TO THE ENGINEERING DIVISION.

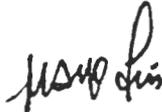

22. DURING EXCAVATION, SOIL HANDLING, STOCKPILING, AND BACKFILLING, IF A CONSIDERABLE NUMBER OF COMPLAINTS ARE RECEIVED, ALL WORK SHALL CEASE AND THE APPROVED MITIGATION MEASURES SHALL BE IMPLEMENTED IMMEDIATELY. OTHER MITIGATION MEASURES WHICH ARE DEEMED APPROPRIATE BY SCAQMD PERSONNEL TO ABATE A NUISANCE CONDITION SHALL BE IMPLEMENTED UPON REQUEST.
23. IF A DISTINCT ODOR (LEVEL III OR GREATER) RESULTING FROM THE EXCAVATION IS DETECTED AT OR BEYOND THE PROPERTY LINE, THE EXCAVATION MUST CEASE AND APPROVED MITIGATION MEASURES IMPLEMENTED IMMEDIATELY. ODOR LEVELS WILL BE DETERMINED BY SCAQMD PERSONNEL OR ON-SITE SAFETY COORDINATOR IN THE ABSENCE OF SCAQMD PERSONNEL.
24. IF VOC CONTAMINATED SOIL IS TREATED ON-SITE AT THE SURFACE OR IN-SITU, ALL NECESSARY PERMITS SHALL BE OBTAINED FROM THE SCAQMD PRIOR TO CONSTRUCTION AND START-UP OF THE TREATMENT SYSTEM.
25. MITIGATION MEASURES, OTHER THAN THOSE INDICATED IN THESE CONDITIONS, WHICH ARE DEEMED APPROPRIATE BY SCAQMD PERSONNEL AS NECESSARY TO PROTECT THE COMFORT, REPOSE, HEALTH OR SAFETY OF THE PUBLIC, SHALL BE IMPLEMENTED UPON REQUEST.
26. THIS EXCAVATION PERMIT IS NOT VALID FOR EXCAVATION AND HANDLING OF CONTAMINATED SOILS AT LANDFILLS OR SITES USED FOR DISPOSAL OF REFUSE OR OTHER TYPES OF WASTE.
27. THIS PERMIT OR A COPY OF THIS PERMIT MUST BE PRESENT AT EACH OF THE EXCAVATION SITES.

Other governmental agencies may require approval before any excavation begins. It shall be the responsibility of the applicant to obtain that approval. The South Coast Air Quality Management District shall not be responsible or liable for any losses because of measures required or taken pursuant to the requirements of this approved 1166 Contaminated Soil Mitigation Plan.

If you have any questions concerning this permit, please call Saeed Ahdout at (818)572-6143.

Very truly yours,

William J. Dennison

1.0 INTRODUCTION

This report summarizes the field activities and analytical results for the site remediation activities which were conducted at Pennwalt's facility located at 630 North Batavia, Orange, California. Pennwalt engaged ENSR Constructors to execute this site remediation program of which field activities were initiated on June 13, 1989. The implementation of this remediation program, including the post excavation soil sampling and analysis program was closely coordinated with the County of Orange, Environmental Health; Waste Management Section (COEHWMS).

2.0 EXECUTIVE SUMMARY

A Soils Remediation Program was conducted at Pennwalt Corporation by ENSR Constructors, a Division of ENSR Corporation, in accordance with an appropriate Remediation Workplan. The purpose of this section is to briefly summarize the major issues which are presented in the report.

- o Work zones, site security, and safety equipment required were based on the site managers specific requests.
- o The volume of soil excavated from the areas of interest at the site amounted to approximately 2,000 cubic yards. This material was manifested and transported off-site by a registered hazardous waste hauler and was disposed of at an authorized waste management facility, USPCI, Inc. Grassy Mountain Facility, Clive, Utah.
- o Excavated materials were characterized properly prior to transportation for off-site disposal to an authorized waste management facility.

- o Soil excavation activities were conducted in accordance with the provisions of the excavation permit issued under Rule 1166 of the South Coast Air Quality Management District.
- o A post excavation sampling/analysis program was utilized to determine the extent of soil excavation required to achieve the appropriate criteria. This program was coordinated with the COEHWMS.
- o Excavated areas were backfilled with clean import soil and compacted to local and state specifications. Upon completion, all backfilled areas were paved with a 4" asphaltic material and slurry coated.

3.0 SITE PREPARATION

Permission was obtained by ENSR from Orange County Environmental Health Waste Management Section and SCAQMD to proceed with the site Remediation Work Plan. No onsite work was initiated until all applicable permits were in evidence at the job site. ENSR Constructors and subcontractors mobilized at Pennwalt's request on June 13, 1989, to initiate the soil excavation program.

3.1 Work Zones

The boundaries of the exclusion zone, contamination reduction zone and support zone were marked as specified by ENSR's onsite project manager.

3.2 Security - Barricades

ENSR erected caution tape and blinking barricades as needed at the outside perimeter of the excavated area. The outside fence of the Pennwalt facility was closed and locked at all times.

3.3 Safety Equipment

ENSR Constructors was required to ensure all safety equipment was provided as specified in the ENSR Field Manual.

4.0 **SCOPE-OF-WORK**

4.1 Plans and Permits

ENSR Constructors submitted a Remedial Action Plan and Health and Safety Plan to Pennwalt for review and approval. The Remedial Action Plan was approved by Pennwalt and submitted to OCEHWMS for review prior to the execution of this voluntary site remediation program.

4.2 Excavation

Soils which exhibited elevated concentration of the constituents of interest including total petroleum hydrocarbons were excavated. The volume of excavated soils was approximately 2000 cubic yards.

4.3 Stockpiling of Material

The excavated material identified as hazardous was placed in a preassigned designated stock pile area. The stockpiled material was covered with plastic sheeting to minimize any potential volatilization as required by SCAQMD Rule 1166. This material was properly characterized prior to transportation to an authorized off-site waste management facility.

4.4 Transportation

All excavated materials were manifested and transported by licensed waste haulers (Refer to Attached Manifests in Appendix A).

4.5 Disposal

All excavated materials were transported and disposed off-site at an authorized waste management facility; USPCI, located in Grassy Mountain, Utah (Refer to Attached Manifests in Appendix A).

Pennwalt utilized the required EPA identification number and State of California Board of Equalization Tax identification number prior to commencement of transportation and disposal of the excavated materials.

5.0 AIR QUALITY AND MONITORING CONTROL

During the excavation and material handling of the excavated soils, ENSR encountered fugitive Volatile Organic Compound (VOC) emissions. To minimize these fugitive VOC emissions, ENSR utilized onsite vapor control technology. The vapor control technology has been authorized by the South Coast Air Quality Management District (SCAQMD).

ENSR project manager adhered to Rule 1166 - "Volatile Organic Compound Emissions From Decontamination of Soil" as presented by SCAQMD (Refer to Appendix B).

The ENSR Project Manager utilized, as needed, at least one or a combination of the following approved onsite vapor control technologies:

- o Visqueen covering (Black polyethylene plastic)
- o Water spray covering
- o Temporary foam covering
- o Permanent foam covering

6.0 SAMPLING/ANALYSIS PROGRAM

Intermediate post-excavation samples were collected and analyzed to determine the appropriate extent of soil excavation. The final post-excavation sampling/analysis program was closely coordinated with Mr. Gary Zimmerman of the Waste Management Section of Orange County during his visits on August 31, 1989 and September 11, 1989. All post-excavation samples were submitted to a State Certified laboratory for analysis (Associated Laboratories and Del Mar Analytical). All samples were accompanied by a written chain-of-custody form. The requested turn around time was 24 to 48 hours, depending upon the analysis being conducted.

6.1 Soil Sampling/Analysis

The soil samples were analyzed as appropriate for one, or a combination of, the following compounds utilizing the appropriate analytical methodologies.

<u>Constituent(s)</u>	<u>EPA Method</u>
Total Recoverable Petroleum Hydrocarbons (TPH)	418.1
Total Petroleum Hydrocarbons (TPH)	8015.(Modified)
Polychlorinated Biphenyls (PCB's)	8080.
Volatile Organic Compounds (VOC)	8240.
Total Benzene, Toluene, Ethyl Benzene, Xylenes (BTEX)	8020/5030.

6.1.1 Sampling Protocols

Soil samples were collected utilizing either a backhoe for deep intermediate post-excavation samples, or a small clean spade, or a hand shovel for final post-excavation samples. Soil samples were collected in clean 9 oz. glass jars with teflon-lined lids. Samples jars were numbered using a sequential numbering system.

6.2 Quality Assurance/Quality Control (QA/QC) Procedures

All samples were labeled and duly noted on chain-of-custody form (Refer to Appendix C). The sealed samples were immediately labeled and chilled in a pre-cooled ice chest containing ice. The interior of the ice chest was maintained at a temperature not exceeding four (4) degrees (centigrade). The samples were kept chilled within the ice chest for delivery within 24 hours to a California certified laboratory for chemical analyses (Refer to Appendix C).

6.2.1 Sample Containers

Sample containers consisted of clean glass jars varying in volume with zero headspace. Screw-on teflon-lined lids were used to reduce the potential reaction between potential constituents and the lids. After a sample was collected, the lid was secured, and sealed with tape. All samples were labeled with permanent markers on labels.

Label information was as follows:

1. Company name and address
2. Field identification number
3. Lab identification number
4. Date
5. Time sampled
6. Location
7. Collectors signature

6.2.2 Chain-of-Custody

Chain-of-custody forms were filled out each day for the samples collected and given to the designated Project Manager with the samples. These forms included the following (Refer to Appendix C).

1. Contact person and phone number
2. Client name and address
3. Site name and address
4. Lab number
5. Field number
6. Date sampled
7. Time sampled

6.2.2 Chain-of-Custody Continued

8. Type of sample
9. Priority ranking
10. Sample description and location
11. Number of containers
12. Analyses required
13. Field observations

6.3 Analytical Laboratories

ENSR utilized the following State Certified Laboratories:

- Associated Laboratories
806 North Batavia Street
Orange, California 92668

- Del Mar Analytical
18102 Sky Park South, Suite F
Irvine, California 92714

6.3.1 Analytical Methods

Analytical parameters for soil samples were as follows:

- o **Total Recoverable Petroleum Hydrocarbons - EPA Method 418.1**
This analysis was performed by extracting the sample with Freon 113 and using IR absorption for hydrocarbon detection.
- o **Volatile Organic Compounds (VOC) - EPA Method 8240**
This analysis was performed by Mass Spectrometry.
- o **Polychlorinated Biphenyls (PCB's) - EPA Method 8080**
This analysis was performed by Gas Chromatography with Electron Capture Detection.

- o **Total Petroleum Hydrocarbons (TPH) - EPA Method 8015 Modified**
This analysis was performed by Gas Chromatography and Flame - Ionization Detection.
- o **Total Benzene, Toluene, Ethylbenzene, Xylenes (BTEX) - EPA Method 8020 and 5030**
This analysis was performed by Gas Chromatography and Photo Ionization Detection.

6.3.2 Quality Assurance/Quality Control

The laboratory was responsible for providing internal QA/QC throughout the project.

Matrix spikes for selected organic compounds were performed by the state certified laboratory, in duplicate, on randomly selected samples. The percent recoveries were within recovery limits established by the EPA. The specific sample results of the matrix spikes and duplicates are provided in Appendix C).

6.4 Intermediate Post Excavation Soil Sampling

Upon completion of the initial soil excavation phase, intermediate post-excavation soil samples were collected. Soil sampling depths ranged from approximately 3 feet to 17.5 feet (below grade). A total of twenty (20) samples were collected, entered into proper chain-of-custody, and submitted to the analytical laboratory.

6.4.1 Sample Locations

Locations of the intermediate post-excavation sampling points are shown in Figures 1-1 and 1-2.

6.4.2 Analytical Results

Results of the Intermediate Post Excavation Soil Sampling program are presented in Table 1. The results indicated the presence of total petroleum hydrocarbons (EPA 418.1) and PCB's at levels which required additional excavation.

6.5 Final Post-Excavation Soil Sampling

Upon completion of the required additional soil excavation, final post-excavation soil samples were collected on July 18, August 23, 31, September 5, 11, 12, 1989. Soil sampling depths ranged from approximately 3 feet to 17.5 feet (below grade). A total of sixteen (16) additional soil samples were collected, entered into proper chain-of-custody, and submitted to the analytical laboratory. The final post-excavation soil sampling program was closely coordinated with Mr. Gary Zimmerman of the Waste Management Section of Orange County during his site visits(s) on August 31, 1989, September 11, 1989.

6.5.1 Sample Locations - Site Plan

Locations of the final post-excavation sampling points are shown on the attached Figures 1-3 and 1-4.

6.5.2 Analytical Results

The analytical results of the final post-excavation soil sampling program are presented in Table II. These results were reviewed with Mr. Gary Zimmerman and was deemed as acceptable for successful conclusion of the soil removal/clean-up program at the site. This information was confirmed by Pennwalt's letters of October 30 and 31, 1989, to the Waste Management Section of Orange County.

7.0 HEALTH AND SAFETY

7.1 Health and Safety Site Work

All site work was carried out in accordance with the Health and Safety plans as provided in the ENSR Field Manual and ENSR Standard Operating Procedures.

ENSR provided the necessary equipment checks, site monitoring, and record keeping functions. The ENSR site safety officer was periodically onsite to monitor site conditions in coordination with ENSR's project manager.

7.2 Health and Safety Personnel

ENSR Constructors maintained a high standard of operational protocol relating to the health and safety precautions needed during the site remediation activities. All ENSR personnel onsite completed the 40 hour training requirements in accordance with the appropriate OSHA Standards specified in EPA 29 CFR 1910.120. Safety meetings were held at the beginning of every work day, during phases when new personnel were introduced to the site, and when site conditions warrant.

8.0 BACKFILL AND COMPACTION

8.1 Compaction Report

Upon Pennwalt's receipt of an oral approval on September 15, 1989, from Mr. Gary Zimmerman of the Waste Management Section of Orange County as to the successful completion of the soil excavation program, the excavated area was backfilled with certified clean soil. The soil was compacted to between 90-95 relative percent based upon ASTM D 1557 test procedures. (Compaction certificates

are provided in Appendix D).

8.2 Site Restoration

Upon completing the soil compaction, the backfilled area was properly graded and covered with 4" asphalt cover along with a new slurry coat.

9.0 **SUMPS AND CLARIFIERS**

9.1 Decommissioning Procedures

At the request of Pennwalt, ENSR completed the decommissioning of the onsite, 3 stage waste water clarifier (Refer to Appendix E).

The clarifier was triple rinsed with a high pressure water unit utilizing hot water at 1200 psi.

9.2 Transportation and Disposal

The rinsate and solids generated during the decommissioning process were collected, manifested, and transported for off-site disposal at an authorized waste management facility (Refer to Manifest No. 88179385 in Appendix E).

10.0 **LAB PACKING OF WASTE MATERIALS**

Due to the nature of Pennwalt's manufacturing of several petroleum based products, a number of partially consumed laboratory and manufacturing specialty chemicals required appropriate packaging prior to off-site disposal at an authorized waste management facility. ENSR utilized the following procedures for Lab Packing of residual chemicals.

10.1 General Requirements

Prior to transportation and disposal, an authorized off-site waste management facility received the general Lab Pack information from Pennwalt. The information included:

- (a) Chemical compound name (no trade name)
- (b) Material of inner containers, i.e. glass, plastic, metal, etc.
- (c) Amount of size of each waste package.
- (d) DOT hazardous class, if applicable.
- (e) DOT identification number, if applicable
- (f) EPA hazardous waste code, if applicable

10.2 Materials

<u>DRUM #</u>	<u># OF DRUMS</u>	<u>SIZE/TYPE OF DRUMS</u>
1-6/LP	6	30 gal Fiber

ROMIC CHEMICAL CORPORATION 2081 BAY ROAD, E. PALO ALTO, CA

This facility received the following drums:

DRUM # 7, 9, 10, 11, 12, 21, 22, 24, 30, 31, 32, 33, 34 (2), 35, 36, 38, 40, 41 (2), 42 (2), and 44.

ROLLINS ENVIRONMENTAL SERVICES (LA) INC. 13351 SCENIC HIGHWAY,
BATON ROUGE LA 70807

This facility received the following drums:

DRUM # 1-6, 8, 9, 13-20, 23, 25-29, 37, 39, 43, 45

10.3 Packaging

All residual chemicals were packaged to meet DOT specifications for shipping. Waste streams were segregated into specific compatible categories:

- o Flammable liquid
- o Flammable solid
- o Combustible liquid
- o Corrosive material (acid/base)
- o Poison B
- o Oxidizer
- o Organic Peroxide
- o ORM-A
- o ORM-B
- o ORM-C
- o ORM-E

All Lab Packs were packed with an absorbent acceptable to the disposal facility. Lab Packs were packaged so that inside containers were transported without risk of breakage and with sufficient absorbent to absorb all liquid waste should breakage occur.

Lab Packs were packaged according to the following procedures:

1. A plastic liner was placed inside the lab pack.
2. A four to six inch (4-6") layer of absorbent material was placed on the Lab Pack bottom.
3. A single layer of containerized waste was placed on the absorbent packing with at least two inches (2") of absorbent between the containers and the Lab Pack sides.

Lab Packs were packaged according to the following Procedures (Continued):

4. The container layer was then covered with two to three inches (2-3") of absorbent.
5. The Lab Pack, was filled by alternating layers of containers and absorbent.
6. The Lab Pack was topped off with four to six inches (4-6") of absorbent material to complete the packaging.
7. The cover, gasket, ring, and closure was then affixed. The appropriate labels and packing slip were attached.

The maximum allowable volume per Lab Pack container size and type was restricted to meet safety requirements for the handling, transportation, and ultimate disposal/recycling.

<u>Container Type</u>	<u>Maximum Volume (Liquids)</u>	<u>Maximum Weight Solids</u>
30 gallon	10 gallons	75 lbs.
20 gallon	5 gallons	45 lbs.
16 gallon	4 gallons	36 lbs.
5 gallon	1 gallon	8 lbs.

The maximum size container accepted is a DOT approved 30 gallon plastic or fiber Lab Pack (not to exceed 19" in diameter). The maximum numbers of containers inside the Lab Pack are as follows:

- o 4 one-gallon glass containers per 30 gallon Lab Pack.
- o 4 one-gallon metal containers per 30 gallon Lab Pack.
- o 10 one-gallon metal containers per 30 gallon Lab Pack.
- o 15 one-pint metal containers per 30 gallon Lab Pack

The top of the Lab Pack was labeled with the following.

- o Generator's EPA I.D. Number and designated TSD Facility Number
- o Manifest Number
- o Lab Pack Number According to Packing List

10.4 Manifest Documentation

Pennwalt was required to complete the appropriate Waste Manifests and all other required shipping papers prior to shipment to the designated TSD facility (Refer to Appendix F).

10.5 Certification Letter

Materials Characterization Data Sheets were accompanied by a letter signed by the Generator, certifying that the manifested shipment complied with the designated TSD Pack Guidelines (Refer to Appendix F).

10.6 Lab Pack Acceptance

Pennwalt received approval for final shipment and receipt of Lab Packed material for appropriate disposal by the designated TSD facility (Refer to Appendix F). All Lab pack shipments were transported offsite to the authorized waste management facility on or before November 2, 1989.

INTRODUCTION and PURPOSE

The purpose of this site assessment investigation was to evaluate the environmental conditions onsite, particularly with regards to potential impacts on soil or groundwater, if any. A site inspection was conducted and subsequent field investigations involved a soil vapor survey and a soil boring program including the collection of subsurface soil samples.

The site is located at 630 North Batavia Street, Orange, California, approximately three-quarters of a mile east of the Santa Ana River (see Figure 1). Santiago Creek, which flows west into the Santa Ana River, lies approximately one and one quarter mile south. The area around the site is a mixture of light industrial/commercial (predominantly north and west of the site), and residential (predominantly south of the site).

The subject site constituted a specialty chemical plant which produced a variety of cleaning products. Reportedly, manufacturing operations were discontinued in April, 1989. While the plant was in operation, raw materials were stored on site, predominantly in an above-ground tank farm located near the center of the site. Table 1 lists the materials stored by tank number and Figure 2 shows tank locations.

CHK'D BY:	REVISED:	DWG. NO.: FIGURE 2

SITE DESCRIPTION

The following information was obtained during our site inspection in February, 1988. The facility is owned by Pennwalt Corporation, 3 Parkway, Philadelphia, Pennsylvania. The site address is 630 North Batavia Street, Orange, California, in the County of Orange. The site, which occupies approximately 3.37 acres, is covered nearly entirely with either buildings or pavement. The site constitutes a chemical specialties plant capable of manufacturing a large variety of metal preparation compounds and cleaners, and also includes warehousing and shipping facilities for products made both onsite and at other Pennwalt facilities, and office space for facility personnel. Reportedly, manufacturing operations were discontinued in April, 1989.

The property is bounded by Batavia Street on the east, a Santa Fe Railroad right-of-way on the north, and light industrial/commercial properties to the west and south. There are two buildings on the property; the main building which fronts Batavia Street contains approximately 24,000 square feet, about 4800 square feet of which is office space; and the back building contains approximately 26,000 square feet. Between the two buildings, there are a tank farm and a railroad siding.

The site has full access to public utilities. Electricity transmission lines are above ground. There are two electricity poles on the north side of the main building. Both have transformers attached. Southern California Edison has assured Pennwalt that no PCBs are used in the transformers.

A Santa Fe Railroad siding extends from the main track north of the property to the area between the main and back buildings. Where the buildings do not abut the property line

ENSR

on the north and portions of the west and south sides, there is chainlink fencing. The lot is essentially flat, with the rear slightly sloping to the northwest corner. Other depressions are designed to control surface water runoff.

Wastewater (primarily domestic) from the main building is discharged into the County sanitary sewer. A trench equipped with a grease trap in the main building discharges to the sanitary sewer.

Wastewater from the manufacturing processes and sumps around the back building is routed through a three-stage clarifier located outside of the northeast corner of the back building and is discharged into the County industrial sewer. There is a network of lines that direct wastewater collected in various drains, sumps, and trenches to the clarifier and eventually to the sewer system. Sumps are located in the bulk storage area, the truck wells, washdown shed, and certain process areas. Piping in the bulk storage area and wet processing area is complemented by trenches which are connected to the clarifier.

*DRAINS
SUMPS
TRENCHES
clarifier*

A 10-inch culvert at the very northwest corner of the property provides a conduit to drain surface water runoff offsite. Most of the storm water runoff drains by gravity, although storm water collected in the truck well sump is pumped to the culvert. The culvert extends west 100 to 120 feet and discharges to the surface at the bottom of the railroad grading. A storm drain is located nearby.

LINED

Approximately 38 above-ground storage and mixing tanks are located between and in both of the buildings (see Table 1 for volumes and types of materials contained). There is a liquified petroleum gas (propane) tank containing approximately 300-gallons, on the north side of the main building, west of the loading dock.

ENSR

According to Donald Kossler, Plant Manager, asbestos is found in certain areas of the main building but that the back building, which was built in 1983, contains no asbestos. An asbestos survey was not requested to be conducted for this investigation.

The plant was capable of manufacturing over 150 different products in batch processes. Typical manufactured products included cutting oils, drawing compounds, acid and caustic cleaners, detergents, soaps, and related products. A number of mixers were used in the processing. Viscous raw materials were fluidized in an oven prior to mixing. A gas-fired boiler provided process steam. Many liquid raw materials were stored in tanks (see Table 1) and drums, while dry materials were stored in silos, drums and bags.

The raw materials were essentially consumed in the manufacturing process with no by-products. The only wastes generated were wastewater and oil tank and kettle wash out. As noted above, during operations the wastewater passed through a clarifier before it is discharged to the Orange County sewer system. Every three to four months, about 3,500 gallons of sludge which settled at the bottom of the clarifier was pumped out and transported by a registered hauler under manifest to an authorized waste management facility in Los Angeles.

The oil tank and kettle wash out were usually recycled back into the manufacturing process. Some residual oil was stored in 55-gallon drums and was transported by a registered hauler under manifest to an oil recycling facility.

what else was done?

ENSR

According to Donald Kossler, Plant Manager, the site was vacant land prior to the construction of an oil blending facility by Kerns, Inc. in 1957. Kerns blended lubricating oils for industrial use at the facility. ¹⁹⁵⁷

Pennwalt purchased the facility around 1969 and added grease production capabilities. Pennwalt's Keystone Division continued to manufacture greases at the site until 1986. At this time, a process hot oil heater was dismantled and removed from the site. At the time of the inspection the heater used Mobiltherm (a non-PCB oil). ¹⁹⁷⁹ Ten years ago the heater used an oil containing PCBs. It was reported by Pennwalt personnel that the PCB oil was removed and incinerated offsite, and the system was cleaned prior to replacement with a non-PCB oil. *Pennwalt Sweet '69*

A second building (the back building) was constructed in 1983. Detergents, cleaners, and soaps were made here along with metal preparation compounds. Waste generation did not significantly varied over the years; most raw materials were consumed in the manufacturing process with no by-products.

Current uses of adjacent properties include:

Katsis Autobody Crafts, 650 N. Batavia Street - autobody repair and painting.

Pacific Supply Corp., 675 N. Batavia Street - roofing supplies.

Hydroscape, 601 N. Batavia Street - landscaping and irrigation supplies.

Vacant (formerly Seatec Inflatable Systems), 600 N. Batavia Street - manufactured diving supplies.

Public Storage, 601 N. Main Street - retail storage spaces.

Arrowhead Drinking Water Co., 619 N. Main Street - distribution center for bottled drinking water.

There are a number of automotive repair shops in the vicinity. Additionally, two printing shops and a concrete construction company are located nearby.

According to the Orange County Water District, no drinking water production wells exist within 1,000 Feet of the site. A residential area consisting of single family houses and apartment buildings begins approximately 500 feet south of the site.

At the time of the inspection the facility held the following permits or registrations:

EPA Generator number : CAD 990667826
Orange County Hazardous Waste Program: Registration Number 465

Orange County Sanitation Districts: Class I Permit for Industrial Wastewater Discharge Number 2-561

GEOLOGY/HYDROGEOLOGY

The following discussion of site geology/hydrogeology is compiled from the following documents:

"Ground-water Geology of the Coastal Zone, Long Beach-Santa Ana Area, California", J.F. Poland, A.M. Piper, et al, 1956, U.S. Geological Survey Water Supply Paper 1109.

"Progress Report On Ground Water Geology of the Coastal Plain of Orange County", California Department of Water Resources, 1967.

The site lies near the western boundary of the Tustin Plain, where it merges with the Downey Plain. The near-surface deposits in this central lowland area are thought to be of Recent or Pleistocene age and are composed of alluvial sediments (mixtures of gravel/sand/silt/clay) derived predominantly from the Santa Ana Mountains. The area near the site is likely a combination of sediments deposited from

Santiago Creek and the Santa Ana River. Site specific geology is discussed below in Findings.

According to Steve Overman of the California Regional Water Quality Control Board, groundwater exists approximately 90 to 100 feet below surface elevation and generally flows to the southwest. Groundwater production in the area near the site includes the City of Orange wells #18 and #19 (see Figure 1, for approximate location). These wells are reported by the City of Orange Water Department, to be sealed to approximately 400 feet depth with perforated sections placed intermittently between that depth and their total depths of approximately 1000 feet.

FIELD INVESTIGATIONS

Our field investigations included two tasks. The first involved a soil vapor survey to screen the site for the presence of petroleum hydrocarbon vapors in the soils. The second task involved the collection and analysis of soil samples from selected borings.

Soil Vapor Survey

On February 23, 1988, a soil vapor survey was conducted at the subject site. The survey consisted of the placement of twenty-four (24) temporary soil vapor probes from which vapor samples were collected and analyzed onsite using a portable gas chromatograph. The locations of the vapor sampling are shown on Figure 3. Other details concerning the soil vapor survey are discussed in Attachment I, which also contains copies of the actual chromatograms.

ENSR

Soil Sampling

On February 25, 1988, five soil borings were excavated and soil samples collected. The locations of the borings are shown on Figure 3. Analytical results of soil samples analyzed are presented in Table 2. Attachment II contains a discussion of the details of the borings and copies of the boring logs. Boring SB-1 was excavated to a depth of approximately 65 feet. It had been planned that this boring would be drilled to ground water and that a monitoring well would be installed to sample ground water. The boring was terminated at the 65 foot depth because of drilling difficulty. It was subsequently felt by Pennwalt Corporation that installation of the monitoring wells would be unwarranted due to the depth to the uppermost aquifer (approximately 90 feet).

Boring SB-2 was terminated at 5 feet depth because the bottom of a gravel layer was encountered, saturated with an oil/water mixture. This perched liquid was believed to be limited to a depth of 5 feet, because a layer of clayey material was encountered below it.

FINDINGS

Soil Vapor Survey

Results from the soil vapor survey suggest that a low level of vapors exists in the soil at this site. However, an area between the old building (east side of site) and the existing tank farm was encountered during the survey with perched fluids (oil/water mixture). It was reported by site personnel that a former above-ground tank farm was located in this area (east of the present tank farm), and that a gravel bed had existed there as a base for the tanks. Boring SB-2 confirmed the presence of this gravel bed and the perched fluids in it.

ENSR

Soil Borings and Sample Analyses

Boring logs for the five (5) borings are presented in Attachment II. To summarize, the site which has an asphalt concrete/cement concrete surface, is underlain by alluvial sediments composed predominantly of gravel, except for the upper ten to fifteen feet, which consisted of finer grained sediments, including sands, silts, and clays.

As mentioned above, a gravel bed was encountered in Boring SB-2, which was saturated with an oil/water mixture. This fluid was analyzed to evaluate the type of hydrocarbons it contained. Comparison of Methods 418.1 and 8015-M, suggest that the hydrocarbons in the lighter than water phase are composed of diesel fuel range hydrocarbons (approximately 30 %) and light oil range hydrocarbons (approximately 70 %). Additionally, low levels of PCB's (Aroclor 1242) and 2-Butanone (methyl-ethyl ketone) were detected in one sample of this fluid.

Soil samples collected from the other four borings were analyzed for Purgeable Organics by EPA Method 8240. None of these compounds were detected in any of the four (4) samples analyzed (see Table 2).

CONCLUSIONS

Based on the results from the soil sample analyses, presented in Table 2, soil conditions do not appear in general to have been impacted except for the area around Boring SB-2. The extent of this impacted area is believed to be limited to the area of the former above-ground tank farm.

STUDY LIMITATIONS

This report, including the exhibits attached, describes the results of ENSR's initial investigation to evaluate the environmental conditions at the site particularly with regard to impacts to soil or groundwater, if any. The conclusions and recommendations stated herein represent the application of a variety of engineering and technical disciplines to material facts and conditions associated with the subject site, as a result of Phase I and Phase II investigations which were conducted during the period of February 17 through March 18, 1988. Many of these facts and conditions are subject to change over time; accordingly, the conclusions and recommendations must be viewed within this context. We also note that groundwater was not sampled.

ENSR has performed this site assessment in a professional manner using that degree of skill and care exercised for similar projects under similar conditions by reputable and competent environmental consultants. Finally we note that this assessment was prepared for the use of Pennwalt Corporation. ENSR shall not be responsible for conditions or consequences arising from any matters related to the investigation and this report.

ATTACHMENT I

Soil Vapor Survey

Soil vapor mapping is conducted along discrete specified grid coordinates. For this site, grid points were set at approximately 50-foot centers across the center of the site. Sampling was also conducted on a less regimented pattern along the southern and northern sides of the site.

A total of 24 soil vapor probes were sampled during this survey. A specially-constructed 1/4-inch O.D. by 36-inch long stainless steel probe was manually inserted to a depth of 34 to 36 inches into the subsurface. The probe channel was partially predrilled using a portable 15-pound plunger bar or drop-hammer. The drop-hammer, consisting of a 4-1/2-foot-long, 1/2-inch-diameter steel rod, topped with a 15-pound steel weight, was used to drill to a soil depth of approximately 30 inches, the probe being hand-driven the remaining 4 to 6 inches into fresh, undisturbed soil. No cuttings or waste soil/water was generated by this procedure. Following installation, the probes were attached to the gas chromatograph utilizing a 1/8-inch O.D. by 5-foot length of Teflon gas tubing. Air blanks were taken through the probes and analyzed before the probes were inserted into the soil for each soil vapor analysis.

A Photovac Model 10S50 autocomputer portable gas chromatograph was used to analyze the vapor samples. The GC included a CSP-20M, 80/100 mesh analytical column (1/8-inch O.D. by 4-foot O.A.L.) and 6-inch CSP-20M precolumn. A special ultra-pure grade of compressed air was used as carrier gas.

Sampling Protocol

Soil vapor analysis was conducted per the following protocol:

- 1) Inserted stainless steel soil vapor probe to a depth of 34 to 36 inches. The probes were sampled no later than 30 to 60 minutes after installation.
- 2) The GC was standardized using a benzene gas standard (254 ppb) prior to conducting the survey.
- 3) "Air-blanks" were analyzed by sampling the background air through the sample probe before each vapor analysis.

ATTACHMENT II

Drilling and Soil Sampling

Borings for the collection of soil samples were excavated using a hollow-stem auger. Soil samples were collected at five-foot intervals, using a modified California split spoon sampler fitted with brass tubes for soil retention. Lithologic logs of the boreholes were compiled from these samples by a geologist, in accordance with the Unified Soils Classification System.

At least two samples were retrieved per sampling interval. Screening organic vapor using an ambient temperature headspace (ATH) method was conducted on one of these samples, by placing a portion of the soil into a clean glass jar, and sealing the jar with aluminum foil and a modified lid. After the sample was allowed to reach ambient temperature, the foil seal was punctured with the sampling probe of an HNu, photoionization detector, and the headspace was analyzed. Selected soil samples were delivered to a California-certified hazardous waste laboratory, and analyzed for volatile organics pollutants using U.S. EPA Method 8240.

The soil samples were for shipment to the laboratory as follows: Upon retrieval from the sampler, the middle of three brass tubes was covered on both ends with Teflon liners and capped with plastic end caps. The end caps were secured with plastic tape. A sample label was attached, identifying the sample by boring number and depth interval. The samples were then sealed in plastic bags and placed on ice. The samples were transported with documented chain-of-custody forms to the laboratory.

Prior to each use, the modified California split tube sampler was cleaned by first washing with a non-phosphate detergent, followed by a tap water rinse, methanol rinse and thorough distilled water rinse.

Soil borings were backfilled with cuttings and capped with concrete.

Records Search Summary

Company: Geosyntec Consultants
Project Name: Orange
Attention: Ariella Goldstein
Street Address of Property: 630 North Batavia Street
Orange, CA

County of Orange – Health Care Agency

Online request: 7-13-21, Contact: Liza Rodriguez

ESS submitted a request for a records search concerning the Orange site to Ms. Rodriguez, the Custodian of Records for the Health Care Agency. ESS requested information concerning the utilization, manufacture, storage and/or discharge of hazardous materials/waste, and any information concerning previous or on-going site investigations/remediations pertaining to hazardous materials/waste. As of April 1, 1991, all public information requests for Hazardous Materials Business Plans/Inventory, Hazardous Waste Generator License, California Accidental Release Prevention (Cal/ARP) Program information as well as, spills, site remediation and underground storage tank information can be requested through the Orange Fire Department (See Below). As of July 22, 2021, Ms. Rodriguez had not completed ESS' request. Should any information concerning the site surface, ESS will immediately forward it to Ms. Goldstein at the Geosyntec Consultants office.

Department of Toxic Substances Control (DTSC) – Cypress Office

E-mailed request: 7-13-21, Contact: Julie Johnson/Jone Barrio

Previous contacts with the DTSC have disclosed that this office only collects and stores information (such as treatment, storage and disposal of hazardous waste) concerning sites which have existing businesses, industries, etc. present. ESS requested that Ms. Johnson/Ms. Barrio, with the DTSC, check the file room records for any files/information concerning 630 North Batavia Street, Orange, CA (See Appendix B). Ms. Barrio informed ESS on July 19, 2021 that her department had no records for 630 North Batavia Street, Orange, CA (See Appendix B).

Department of Toxic Substances Control (DTSC) – Chatsworth Office

E-mailed request: 7-13-21, Contact: Glenn Castillo/Robert Hardison

Previous contacts with the DTSC have disclosed that this office only collects and stores information (such as treatment, storage and disposal of hazardous waste) concerning sites which have existing businesses, industries, etc. present. ESS requested that Mr. Castillo/Mr. Hardison, with the DTSC, check the file room records for any files/information concerning 630 North Batavia Street Orange, CA (See Appendix C). Mr. Castillo informed ESS on July 15, 2021 that his department had no records for 630 North Batavia Street, Orange, CA (See Appendix C).

City of Orange Fire Department

E-mailed request: 7-13-21, Contact: Barbara Reid/Public Records Section

ESS requested that Ms. Reid and the Public Records Section, with the City of Orange Fire Department, check their records concerning the storage of hazardous materials/waste and underground storage tanks with regards to the following: 630 North Batavia Street, Orange, CA (See Appendix D). She department informed ESS on July 22, 2021 that her department did have records for 630 North Batavia Street, Orange, CA (See Appendix D).

Cal Fire - Office of the State Fire Marshal

Online request: 7-13-21, Contact: Pubic Records Request

ESS requested that the Public Records Section, with Cal Fire - Office of the State Fire Marshal, check their records concerning the storage of hazardous materials/waste, pipelines and underground storage tanks with regards to the following: 630 North Batavia Street, Orange, CA (See Appendix E). Anne Henigan, with that department informed ESS on July 18, 2021 that her department had no records for 630 North Batavia Street, Orange, CA (See Appendix E).

Orange County Sanitation Districts – Industrial Waste

Online request: 7-13-21, Contact: Public Records Section

ESS requested that the Public Records Section, with the Orange County Sanitation Districts, check her records for any information concerning industrial waste discharge permits or violations for 630 North Batavia Street, Orange, CA (See Appendix F). Tina Knapp, with that department informed ESS July 19, 2021 that her department had no records for 630 North Batavia Street, Orange, CA (See Appendix F).

City of Orange Building Department

E-mailed request: 7-13-21, Contact: Public Records Section

ESS requested that the Public Records Section, with the City of Orange Building Department, provide the building records (all building permits and certificates of occupancy) for 630 North Batavia Street, Orange, CA (See Appendix G). Jennifer Connally, with that department provided ESS July 20, 2021 with all the available records for the address (See Appendix G for Photocopies Obtained). No further information concerning the site was obtained from the building department at the time of the investigation.

South Coast Air Quality Management District (SCAQMD)

On-line request: 7-13-21, Contact: Public Records Section

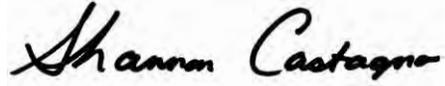

ESS submitted a search request concerning active, inactive and sold files concerning 630 North Batavia Street, Orange, CA to Ms. Koenig of Public Records at the SCAQMD (See Appendix H). Lisa Ramos, with that department informed ESS on July 20, 2021 that her department did have records for 630 North Batavia Street, Orange, CA (See Appendix H).

Regional Water Quality Control Board (RWQCB) – Santa Ana Region

E-mailed request: 7-13-21, Contact: Public Records Section

ESS requested that the Public Records Section, with the RWQCB, provide the files for 630 North Batavia Street, Orange, CA (See Appendix I). They informed ESS July 14, 2021 that their department had no records for 630 North Batavia Street, Orange, CA (See Appendix I). No further information concerning the site was obtained from the RWQCB at the time of the investigation.

Records Search completed by:

A handwritten signature in black ink that reads "Shannon Castagno". The signature is written in a cursive style with a clear, legible font.

Shannon Castagno
Project Manager
Environmental Support Services

The information provided in this report was obtained by a comprehensive examination of public records, public information and public servant communications. The degree of care performed by **ESS** is equivalent to that exercised by environmental companies performing similar records searches.

Dear Requestor:

On July 13th, 2021, the Department of Toxic Substances Control (DTSC) received your email of July 13th, 2021 requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

DTSC Generator information: DTSC Cypress Office does not house Generator/**HWTS** Records.

DTSC's Hazardous Waste Tracking System (**HWTS**) may have records that pertain to this request. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database at <http://hwts.dtsc.ca.gov>. If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS unit by email at hwtsreports@dtsc.ca.gov or by phone at (800) 618-6942 for further information. For copies of manifests, please send an email to mcr@dtsc.ca.gov.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions, would like further information regarding your request, please contact me at (714) 484-5336 or via email at Cypressfileroom@dtsc.ca.gov

Sincerely,

Jone Barrio

Public Records Request Number: PR3-071321-09
Location(s): 630 N. Batavia Street, Orange, CA

Dear Requestor:

On [July 13, 2021](#), the Department of Toxic Substances Control (DTSC) received your email of the same date requesting records under the Public Records Act. After thoroughly reviewing our files and researching our statewide databases, no site records were found pertaining to the site/facility referenced above. (If our research had turned up records for this Orange County site, we would have forwarded your request to DTSC's Cypress Records Office, which has purview over properties in San Bernardino and Riverside Counties, as well. Therefore, we ask that you send future requests for sites in these three counties directly to: CypressFileRoom@dtsc.ca.gov. That will help to reduce the duplication of effort for our two offices.)

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me via email at ChatsworthFileRoom@dtsc.ca.gov.

Sincerely,

Glenn Castillo

Attention: Barbara Reid

Subject: Records Search – Hazardous Materials/Waste/Underground Storage Tanks

Site: 630 North Batavia Street
Orange, CA

Dear Barbara,

Environmental Support Services (ESS) is in the process of conducting a records search for an environmental audit at a site in Orange, CA. This search includes researching the history of the site, especially as it pertains to hazardous materials/waste. With this in mind, **ESS** requests the following information concerning the subject addresses which your agency may have on file:

1. utilization, manufacture, storage, or discharge of hazardous materials/waste.
2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste.
3. hazardous materials disclosures concerning the site.
4. information regarding underground storage tank present or previously found at the site.

If you do have records, I would like to obtain a copy of the file.

Should you have any questions concerning this request for information, please call. Your expedient processing of this request is appreciated.

Sincerely,

Environmental Support Services

RE: PUBLIC RECORDS REQUEST of 7/13/2021, Reference # R001505-071321

Dear Shannon Castagno,

Thank you for your interest in public records of the CAL FIRE. Your request has been received and is being processed in accordance with the California Public Records Act, Government Code section 6250 et seq. Your request was received on July 13, 2021 and given the reference number R001505-071321 for tracking purposes.

Records Requested: Site: 630 North Batavia Street, Orange, CA. ESS requests the following information concerning the subject site which your agency may have on file: 1. utilization, manufacture, storage, or discharge of hazardous materials/waste. 2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste. 3. hazardous materials disclosures concerning the site. 4. pipelines. 5. information regarding underground storage tank present or previously found at the site. 6. Reportable Spills, Releases, Notices of Violations (NOVs) and any Environmental Reportable Issues.

Your request will be forwarded to the relevant CAL FIRE department(s) to locate the information you seek and to determine the volume and any costs that may be associated with satisfying your request. You will be contacted about the availability and/or provided with copies of the records in question. PLEASE NOTE: The California Public Records Act does not require a governmental body to create new information, to do legal research, or to answer questions.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed.

RE: PUBLIC RECORDS REQUEST of July 13, 2021, Reference # R001505-071321

Dear Ms. Castagno,

The Department of Forestry and Fire Protection, CAL FIRE, received a public information request from you on July 13, 2021. Your request mentioned:

“Site: 630 North Batavia Street, Orange, CA. ESS requests the following information concerning the subject site which your agency may have on file: 1. utilization, manufacture, storage, or discharge of hazardous materials/waste. 2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste. 3. hazardous materials disclosures concerning the site. 4. pipelines. 5. information regarding underground storage tank present or previously found at the site. 6. Reportable Spills, Releases, Notices of Violations (NOVs) and any Environmental Reportable Issues.”

CAL FIRE has reviewed its files and has determined there are no responsive documents to your request.

If you have any questions or wish to discuss this further, you may contact my office at anne.henigan@fire.ca.gov.

Sincerely,
Anne Henigan

Good afternoon,

The City of Orange (the "City") has completed its review and evaluation of your request for public records, which was received by the City via the SeamlessDocs application on July 13, 2021, regarding permits & certificates for 630 N Batavia Street. This letter will serve as the City's notice of determination as to whether the request seeks copies of non-exempt, disclosable public record information in the possession of the City, pursuant to the California Public Records Act (Government Code §6250, et seq.).

Copies of any and all records in the possession of the City that are deemed responsive to your request are attached. Certificates of Occupancy are issued upon request. When not issued, the finalized building permit serves the same purpose.

If you have any further questions, please contact our office at (714) 744-5500.

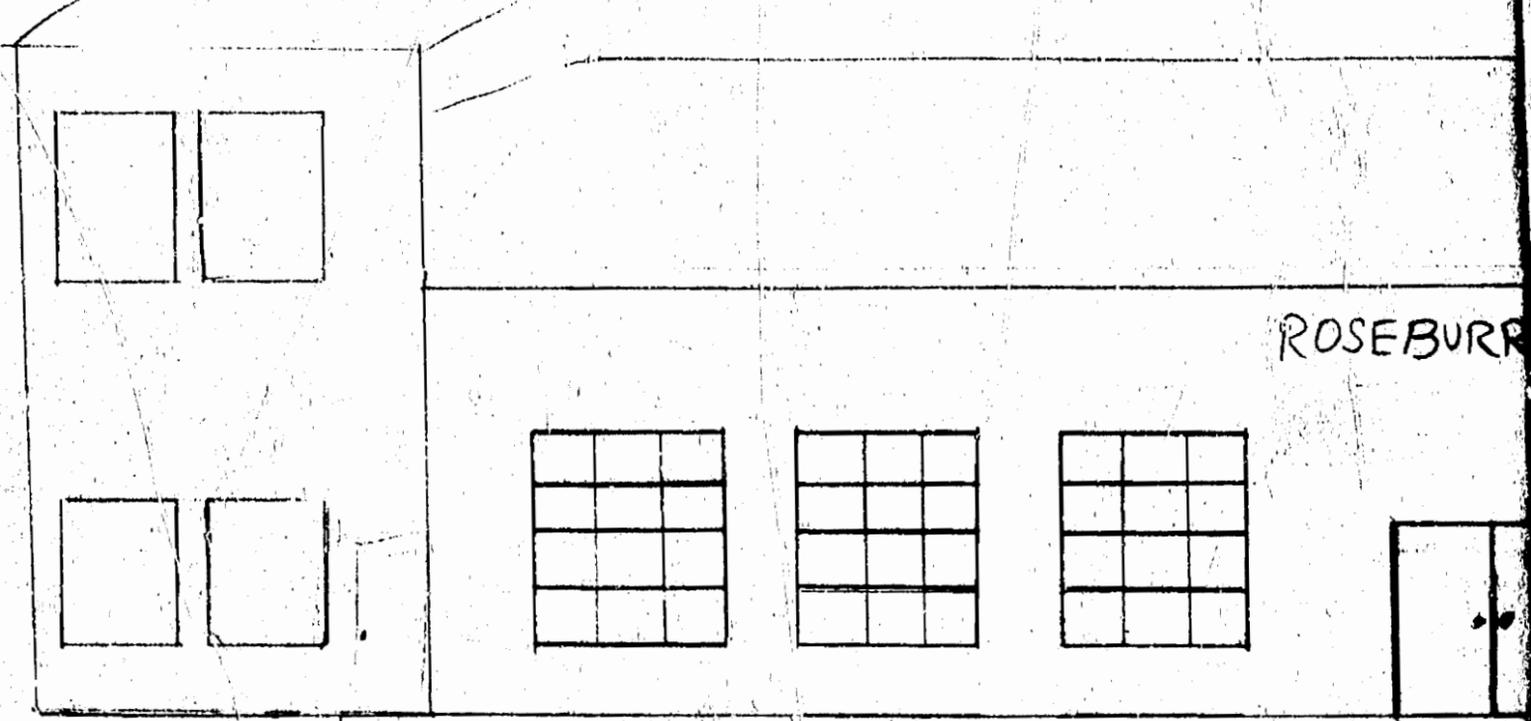

Sincerely,

CITY OF ORANGE

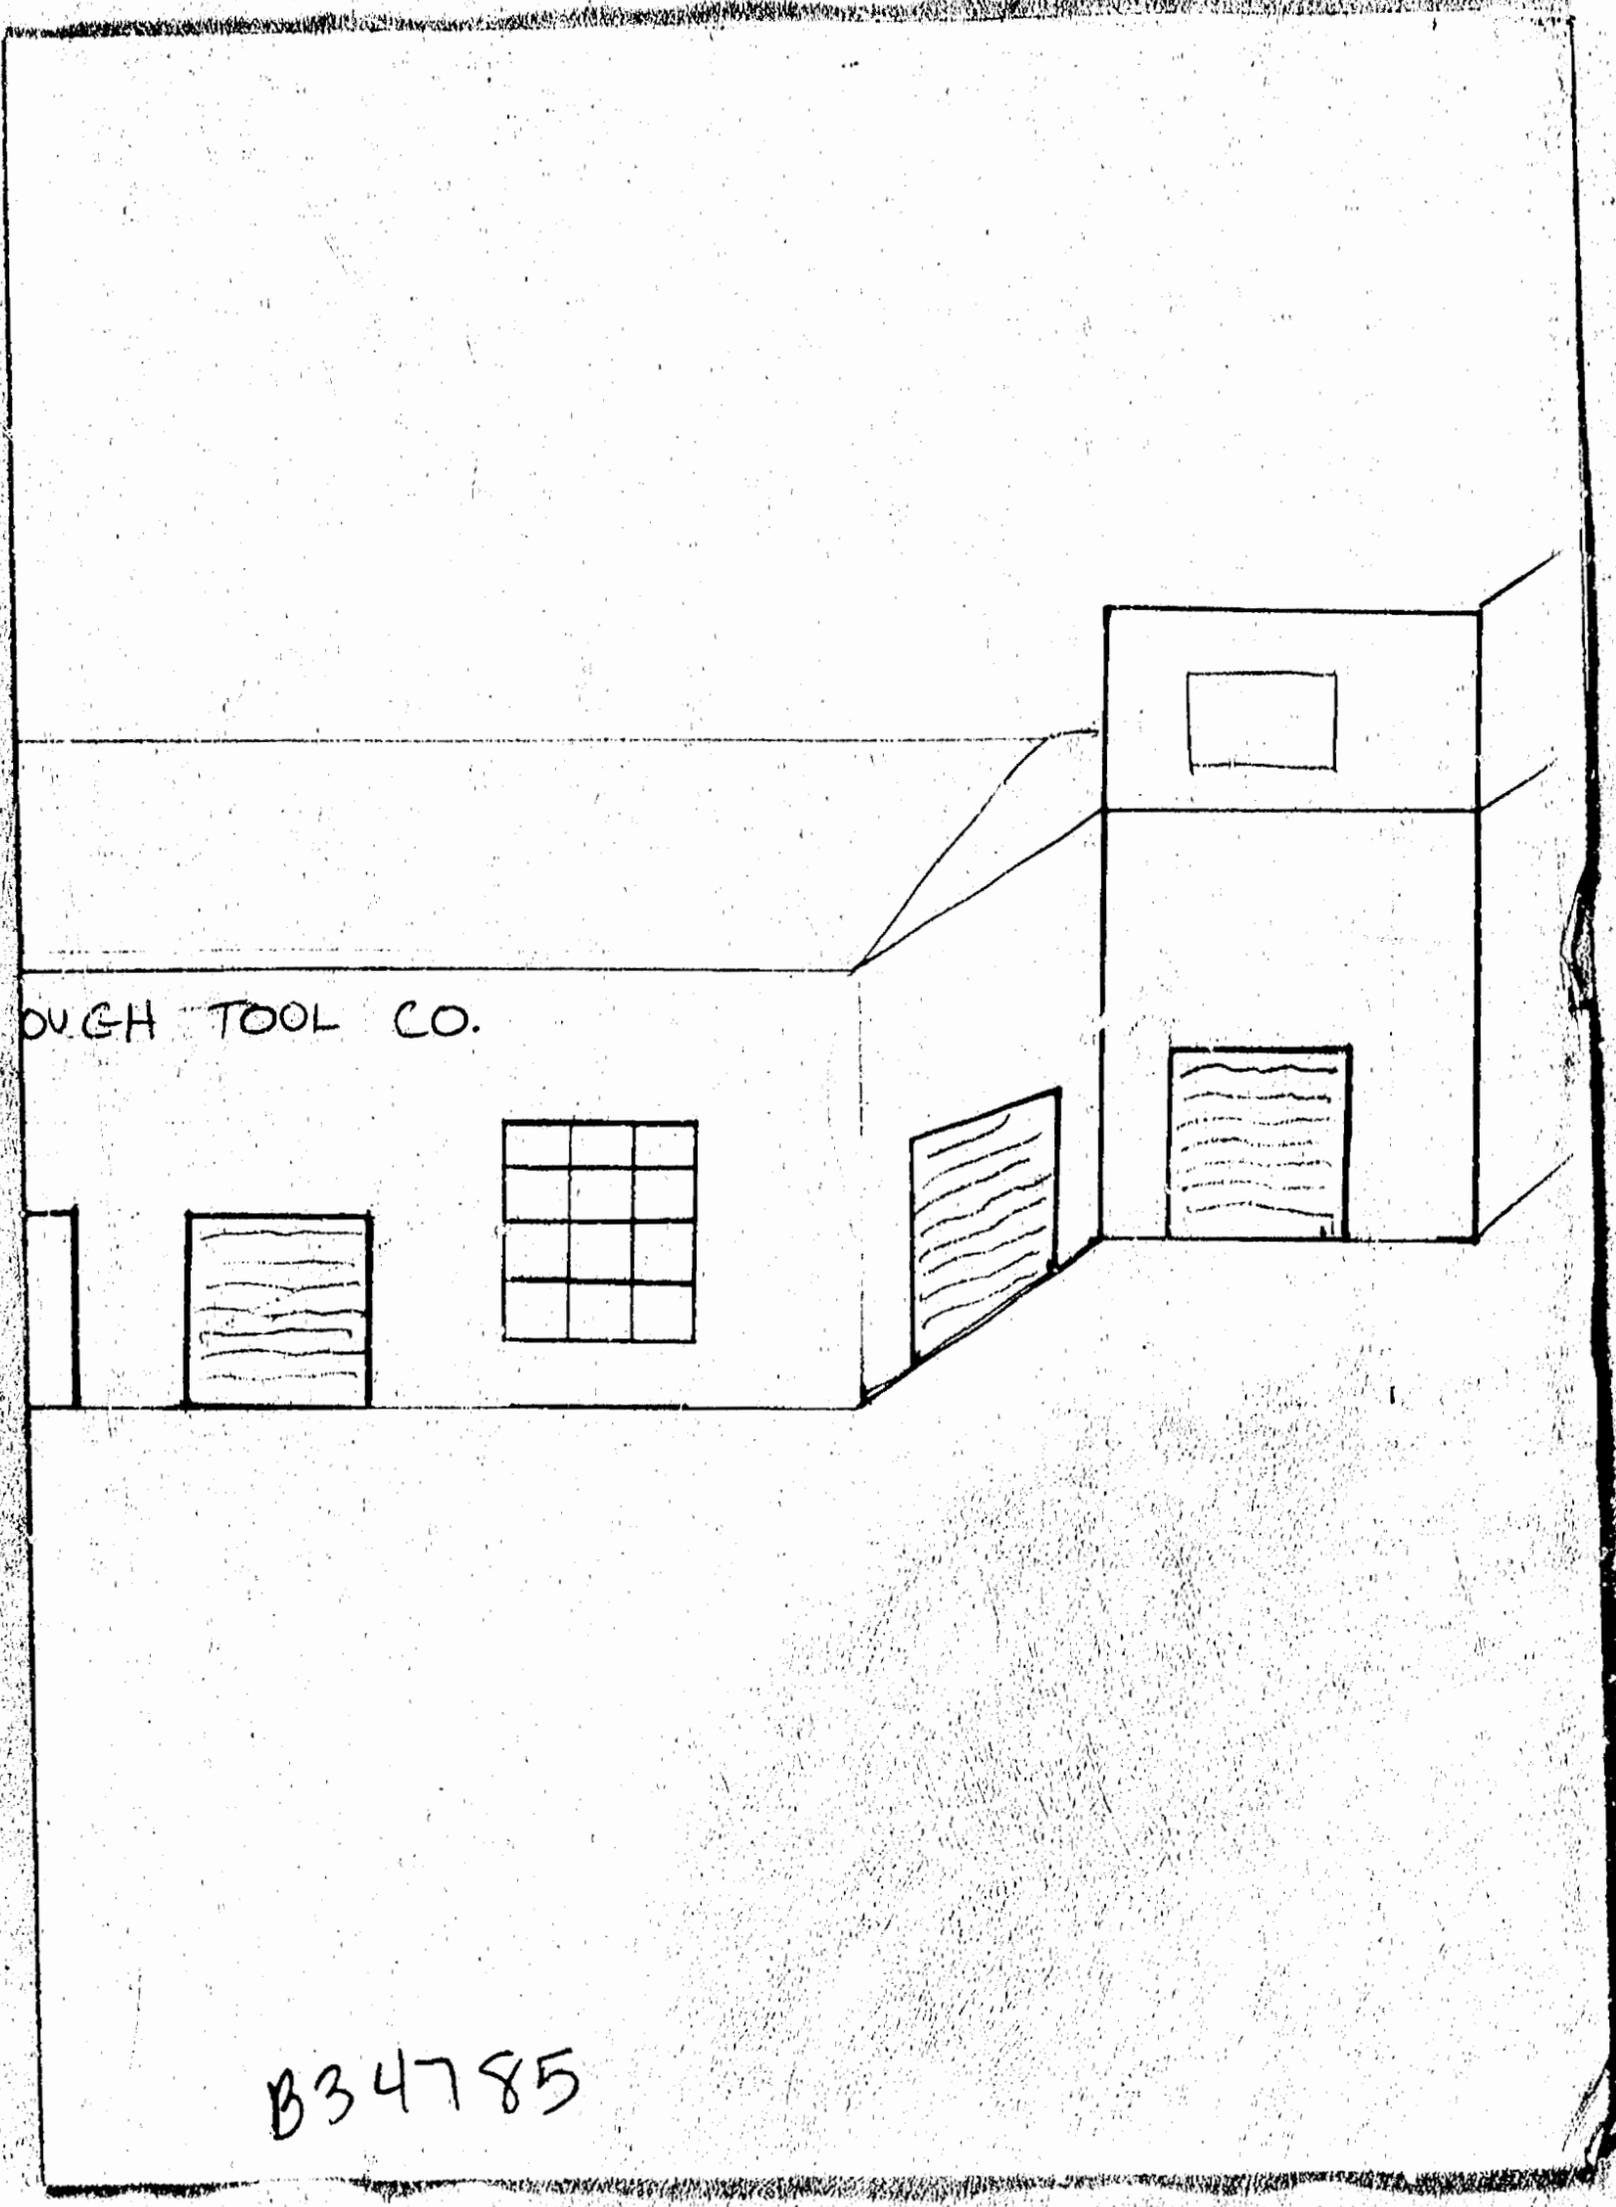

Jennifer Connally, CMC
Deputy City Clerk
714-744-5510

E-mail correspondence, along with any attachments, may be subject to the California Public Records Act; and as such may be subject to public disclosure unless otherwise exempt under the Act.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class C-1 License No. 240175
Date 8/13/81 Contractor Summit Builders

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, California Business and Professions Code. Any City which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is a licensed contractor pursuant to the provisions of the Contractor's License Law (Ch. 9 (Commencing with Sec. 7000) of Div. 3 of the B. & P.C.) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.00):

I, as sole owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply to an owner of contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

I am exempt under Sec. _____, B. & P.C. for this reason: _____

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Worker's Compensation Insurance or a certified copy thereof (Sec. 3870, Lab. C.)

Los Angeles, CA 90026

Dear Mr. Peterson:

I am returning your fire sprinkler plans for the job at Penwalt Corporation, 630 No. Batavia, Orange and two checks for the total amount of \$237.50.

Since our records indicated no new construction at this address, we checked with the plant manager at Penwalt Corporation and he verified the fact that no plans to build had been authorized.

In the future when submitting plans please include one set of calculations and three sets of plans.

Very truly yours,

Dennis Krejci

Orange, Ca. 92666

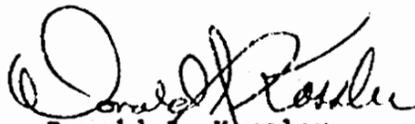

Dear Mr. Riley:

Regarding our Building Permit No. 63088 which was issued December 2, 1982 through Summit Builders we hereby request a refund for this permit.

We have selected a new contractor, Commercial Industrial Builders, who have revised plans in Plan Check and will be applying for a new permit for this project.

Thank you in advance for your help.

Very truly yours,

LICENSED CONTRACTOR'S DECLARATION
 I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect.
 License Class _____ License No. _____
 Date _____ Contractor _____

OWNER-BUILDER DECLARATION
 I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.8, California Business and Professions Code. Any City which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is a licensed contractor pursuant to the provisions of the Contractor's License Law (Ch. 9 Commencing with Sec 7000) of Div. 3 of the B. & P.C.) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.8 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.00):
 I, as sole owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.
 I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply to an owner of contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.
 I am exempt under Sec. _____, B. & P.C. for this reason: _____

LEASING CONTRACTOR'S DECLARATION: I hereby affirm that I am licensed under provisions of Chapter 9 commencing with Section 70000 of Division 3 of the Business and Professions Code, and my license is in full force and effect.

OWNER BUILDER DECLARATION: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (See 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 commencing with Section 70000 of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended to be offered for sale (See 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (See 7344, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts or subcontracts with a contractor licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B & P.C. (Attach Certificate)

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION: I hereby affirm that I have a certificate of coverage, to self insure, or a certificate of Workers' Compensation Insurance, or I certified copy thereof (See 2600 Lab. C.)

Certified copy is hereby furnished.

Certified copy is filed with the City Building Division.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE: This section need not be completed if the permit is for one hundred (\$100) or less. I certify that in the performance of the work to which this permit is issued, I shall not employ any person in any manner or so to become subject to the Worker's Compensation Laws of California.

X W. Saunders

NOTICE TO APPLICANT: If, after making the Contractor's Declaration of Exemption, you should become subject to the Workers' Compensation provision of the Labor Code, you must forthwith comply with such provision as the term it shall be deemed involved.

DIVISION OF INDUSTRIAL PERMIT CERTIFICATION:

I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, roof or floor, extension, or demolition or dismantling thereof, will be more than thirty six (36) feet high. (Chap. 3 of Div. 3, Art. 2, Section 241, Title 8, C.A.C.)

As an owner-builder, I will not employ anyone to work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the Division.

Division of Industrial Safety Form No. _____

- Certified copy is filed with the City Building Division.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE: This exemption need not be completed if the permit is for one hundred (\$100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions as this permit shall be deemed voided.

DIVISION OF INDUSTRIAL PERMITTING/CERTIFICATION:

I hereby certify that no excavation 6 ft (6) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, ladder, or structure or equipment thereon, will be more than 6 ft (6) feet high. (Chap. 3.2, Div. 2, Art. 2, Section 641, Title 8, C.A.C.)

As owner/builder, I will not employ anyone to work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the Division.

LEASER CONTRACTOR'S DECLARATION: I hereby affirm that I am aware of and understand the provisions of Chapter 8 concerning the Business and Professions Code, and by license to full force and effect.

OWNER BUILDER DECLARATION: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (See Section 7001.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law Chapter 8 (conforming with Section 7000.5 of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7001.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).)

I, as owner of the property, or my employees with whom I am contractually bound, will do the work and the structure is not intended or offered for sale (See Sec. 7001.5, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. However, the building or improvement is sold within one year of completion, the owner/builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to complete the project (See 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who is exclusively for such projects with a contractor's license pursuant to the Contractor's License Law.)

WORKERS' COMPENSATION DECLARATION: I hereby affirm that I have a certificate of coverage, to self insure, or a certificate of Workers' Compensation Insurance, or a certified copy of proof (See 3800, Lab. C.)

Certified copy is hereby attached

Certified copy is filed with the City Building Division

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE. This section need not be completed if the permit is for one hundred (\$100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date: _____ Applicant: _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provision of the Labor Code, you must forthwith comply with such provisions as the permit is all deemed revoked.

DIVISION OF INDUSTRIAL PERMIT CERTIFICATION:

I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, framework, or demolition or dismantling thereof, will be more than thirty (30) feet high (See Chap. 3.7, Div. 2, Art. 2, Section 341, Title 8, C.A.C.).

As owner/builder, I will not employ anyone to work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the Division.

CONTRACTOR'S DECLARATION: I hereby affirm that I am licensed under provisions of Chapter 8 Sections 19000-19005 of Division 3 of the Business and Professions Code, and my license is in full force and effect.

OWNER/BUILDER DECLARATION: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (See 7001.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 8) commencing with Section 7000 of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7001.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):

I, as owner of the property, or my employee who wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (See 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves structure, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner/builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am contracting with licensed contractors to construct the project (See 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves structure, and who contracts for such projects with a contractor's license pursuant to the Contractor's License Law.)

WORKER'S COMPENSATION DECLARATION: I hereby affirm that I have a certificate of coverage, or self-insurance, or a certificate of Workers Compensation Insurance, or a certificate as provided (See 2600, Lab. C.):

Certified copy is hereby furnished.

Certified copy is filed with the City Building Division.

CERTIFICATE OF EXEMPTION FROM WORKER'S COMPENSATION INSURANCE: This certificate need not be completed if the permit is for the kind of work listed in the permit table of the work for which this permit is issued. I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

OPTION OF INDIVIDUAL PERMIT CERTIFICATION:

I hereby certify that an excavation five (5) or more feet in depth has which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, formwork, or demolition or dismantling thereof, will be more than thirty six (36) feet high. (Chap. 2.7, Div. 2, Art. 2, Section 241, Title 8, C.A.C.)

As owner/builder, I will not employ anyone to work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the Division.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class **C-1** License No. **240175**
Date **8/13/81** Contractor **Summit Builders**

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, California Business and Professions Code. Any City which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is a licensed contractor pursuant to the provisions of the Contractor's License Law (Ch. 9 (Commencing with Sec. 7000) of Div. 3 of the B. & P.C.) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.00):

I, as sole owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply in an owner of property who builds or improves thereon, and who does such work in part or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply to an owner of contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

I am exempt under Sec. _____, B. & P.C. for this reason:

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Worker's Compensation Insurance or a certified copy thereof (Sec. 2690, Lab. C.)

Policy No. **WP81064415** Company **Fremont**
 Certified copy is hereby furnished.
 Certified copy is filed with the City of Orange Building Division.
Date **8/13/81** Applicant **Summit Builders**

CERTIFICATE OF EXEMPTION FROM WORKER'S COMPENSATION INSURANCE

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

Date _____ Applicant _____
NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3617, Civ. C.)

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all City and State laws relating to the building construction, and hereby authorize representatives of this City to enter upon the above mentioned property for inspection purposes.

Mr. J. H. Peterson
Master Protection Enterprises
Sprinkler Division
1311 Glendale Blvd.
Los Angeles, CA 90026

Dear Mr. Peterson:

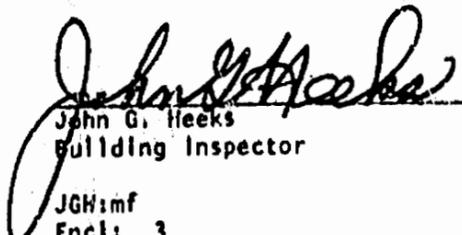

I am returning your fire sprinkler plans for the job at Penwalt Corporation, 630 No. Batavia, Orange and two checks for the total amount of \$237.50.

Since our records indicated no new construction at this address, we checked with the plant manager at Penwalt Corporation and he verified the fact that no plans to build had been authorized.

In the future when submitting plans please include one set of calculations and three sets of plans.

Very truly yours,

Dennis Krejci

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, California Business and Professions Code. Any City which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is a licensed contractor pursuant to the provisions of the Contractor's License Law (Ch. 9 (Commencing with Sec. 7000) of Div. 3 of the B. & P.C.) or that he is exempt therefrom and the basis for the alleged exemption. Any violations of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.00).)

I, as sole owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply to an owner of property who builds or improves the same, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply to an owner of contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

I am exempt under Sec. _____, B. & P.C. for this reason: _____

Mr. Jim Riley
City Of Orange
Engineering Department
300 E. Chapman Ave.
Orange, Ca. 92666

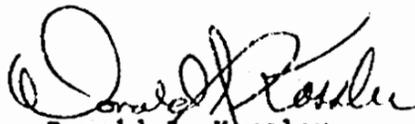

Dear Mr. Riley:

Regarding our Building Permit No. 63088 which was issued December 2, 1982 through Summit Builders we hereby request a refund for this permit.

We have selected a new contractor, Commercial Industrial Builders, who have revised plans in Plan Check and will be applying for a new permit for this project.

Thank you in advance for your help.

Very truly yours,
PENNWALT CORPORATION

License No.

CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 8 commencing with section 70001 of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class 36 License No. 287834

Date 12/2/87 Contractor Edward M. Kasper

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, California Business and Professions Code. Any City which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is a licensed contractor pursuant to the provisions of the Contractor's License Law (Ch. 8 commencing with Sec. 7000) of Div. 3 of the B & P.C.) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.00).

I am sole owner of the property, or my employees with wages as their sole compensation will do the work, and the structure is not intended or offered for sale (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P.C.). The Contractor's License Law does not apply to an owner of contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

I am exempt under Sec. _____, B. & P.C. for this reason:

OWNER-BUILDER DECLARATION
I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7011.5, Ca. Code of Regulations and Franchise Code). Any City which requires a permit for construction after improvement shall refer to the signed statement that he is an owner-builder pursuant to the provisions of the Contractor's License Law (Ch. 9) commencing with Sec. 7000 of Div. 3 of the B & P Code for that he is exempt therefrom and the basis for the exemption is as follows: Any person who, under the provisions of the permit subject to the applicant to a maximum of not more than two hundred dollars (\$5000):
 I am the owner of the property, I am an employee of the applicant or sole proprietor and I do the work and the work is not intended or offered for sale. Sec. 7011.5 B & P.C. The Contractor's License Law does not apply to an owner-builder who builds or improves thereon, and who does such work himself or through his own employees, provided that such building projects are not intended or offered for sale. If however, the building project is intended for sale within one year of completion, the owner-builder shall have the burden of proving that he did not intend to sell for the purpose of sale.
 I am the owner of the property, I am not an employee of the applicant and I contract to construct the project (Sec. 7011.5 B & P.C.). The Contractor's License Law does not apply to an owner-builder who contracts to construct a building project as defined in the Contractor's License Law.
 I am exempt under Sec. 7011.5 B & P.C. for this season.

Any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than two hundred dollars (\$200.00).
 I, as sole owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, B. & P. C.). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purposes of sale.
 I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P. C.). The Contractor's License Law does not apply to an owner of property for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.
 I am exempt under Sec. _____, B. & P. C. for this reason.
 Date _____ Owner _____

LEASING CONTRACTOR'S DECLARATION: I hereby affirm that I am licensed under provisions of Chapter 9 commencing with Section 70000 of Division 3 of the Business and Professions Code, and my license is in full force and effect.

OWNER BUILDER DECLARATION: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (See 7021.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 commencing with Section 70000 of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7021.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended to be offered for sale (See 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (See 7344, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts or subcontracts with a contractor licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B & P.C. (Attach Certificate)

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION: I hereby affirm that I have a certificate of coverage, to self insure, or a certificate of Workers Compensation Insurance, or I certified copy thereof (See 3800 Lab. C.)

Certified copy is hereby furnished.

Certified copy is filed with the City Building Division.

CERTIFICATE OF EXEMPTION FROM WORKER'S COMPENSATION INSURANCE: This section need not be completed if the permit is for one hundred (\$100) or less. I certify that in the performance of the work to which this permit is issued, I shall not employ any person in any manner or so to become subject to the Worker's Compensation Laws of California.

X W. Saunders

NOTICE TO APPLICANT: If, after making the Contractor's Declaration of Exemption, you should become subject to the Worker's Compensation provision of the Labor Code, you must forthwith comply with such provision as the term it shall be deemed involved.

DIVISION OF INDUSTRIAL PERMIT CERTIFICATION:

I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, roof or floor, extension, or demolition or dismantling thereof, will be more than thirty six (36) feet high. (Chap. 3 of Div. 3, Art. 2, Section 341, Title 8, C.A.C.)

As owner-builder, I will not employ anyone to work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the Division.

Division of Industrial Safety Form No. _____

CONSTRUCTION LENDERS AGENT: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (See 3067, Civ. C.).

LEASER'S CONTRACTOR'S DECLARATION: I hereby affirm that I am licensed under provisions of Chapter 8 commencing with Section 70001 of the Business and Professions Code, and by license to perform the work.

OWNER BUILDER DECLARATION: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (See Section 70015, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law Chapter 8 commencing with Section 70001 of Division 3 of the Business and Professions Code or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 70015 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).)

I, as owner of the property, or my employees with whom I am compensated, will do the work and the structure is not intended or offered for sale (See Sec. 70015, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. However, the building or improvement is sold within one year of completion, the owner/builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to complete the project (See 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who is exclusively for such projects with a contractor's license pursuant to the Contractor's License Law.)

WORKER'S COMPENSATION DECLARATION: I hereby affirm that I have a certificate of coverage, to self insure, or a certificate of Workers Compensation Insurance, or a certified copy of proof (See 3800, Lab. C.)

Certified copy is hereby attached

Certified copy is filed with the City Building Division

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE: This section need not be completed if the permit is for one hundred (\$100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provision of the Labor Code, you must forthwith comply with such provisions as the permit is all deemed revoked.

DIVISION OF INDUSTRIAL PERMIT CERTIFICATION:

I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, framework, or demolition or dismantling thereof, will be more than thirty (30) feet high (See Chap. 3.7, Div. 2, Art. 2, Section 341, Title 8, C.A.C.).

As owner/builder, I will not employ anyone to work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the division.

CONTRACTOR'S DECLARATION: I hereby affirm that I am licensed under provisions of Chapter 8 Sections 26000-26005 of Division 3 of the Business and Professions Code, and my license is in full force and effect.

OWNER/BUILDER DECLARATION: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (See 7001.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 8) commencing with Section 7000 of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7001.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):

I, as owner of the property, or my employee who wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (See 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves structure, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner/builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am contracting with licensed contractors to construct the project (See 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves structure, and who contracts for such projects with a contractor's licensed pursuant to the Contractor's License Law.)

WORKER'S COMPENSATION DECLARATION: I hereby affirm that I have a certificate of coverage, or self-insurance, or a certificate of Workers Compensation Insurance, or a certificate as provided (See 2600, Lab. C.):

Certified copy is hereby furnished.

Certified copy is filed with the City Building Division.

CERTIFICATE OF EXEMPTION FROM WORKER'S COMPENSATION INSURANCE: This certificate need not be completed if the permit is for the kind of work listed in the permit table of the work for which this permit is issued. I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

OPTION OF INDIVIDUAL PERMIT CERTIFICATION:

I hereby certify that an excavation five (5) or more feet in depth has which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, formwork, or demolition or dismantling thereof, will be more than thirty six (36) feet high. (Chap. 27, Div. 2, Art. 2, Section 241, Title 8, C.A.C.)

As owner/builder, I will not employ anyone to work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the Division.

Division of Industrial Safety Permit No. _____

CONSTRUCTION LENDING AGENCY: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (See 2607, Ch. C.).

Lender's Name: _____

Lender's Address: _____

CERTIFICATE OF COMPLIANCE AND AUTHORIZATION OF ENTRY: I hereby affirm that I have read this application and state that the information given is correct. I agree to comply with all state laws and city ordinances relating to building construction, and authorize a representative of the City of Orange, Division of Building and Safety to enter upon the property for which I have applied for this permit for the purpose of making inspections.

LICENSED CONTRACTOR DECLARATION: I hereby affirm that I am licensed under provisions of Chapter 9 governing the Business and Professions Code, and my license is in full force and effect.

OWNER-BUILDER DECLARATION: I hereby affirm that I am exempt from the Contractor's License Law for the following reason: (a) I am the owner of the property and I am the person who will be performing the work; or (b) I am the owner of the property and I am the person who will be performing the work through my own employees, provided that such improvements are not intended or claimed for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor's license pursuant to the Contractor's License Law.

I am exempt under Sec. _____, B. & P.C. (Attach Certificate)

WORKER COMPENSATION DECLARATION: I hereby affirm that I have a certificate of consent, in full force, or a certificate of Worker Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Certified copy is hereby furnished.

Certified copy is filed with the City Building Division.

CERTIFICATE OF EXEMPTION FROM WORKER COMPENSATION INSURANCE: The person need not be completed if the person is for one hundred (100%) or less. I certify that the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker Compensation Law of California.

Date: 9-2-93 Applicant: *[Signature]*

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

DIVISION OF INDUSTRIAL FIREMANT CERTIFICATION:

I hereby certify that no construction five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, framework, or construction or dismantling thereof, will be more than thirty (30) feet in height. (Lab. C. Sec. 6402, Art. 2, Section 341, Title 8, C.A.C.).

As owner-builder, I will not employ anyone to work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the Division.

Division of Industrial Safety Permit No. _____

CONSTRUCTION LENDING AGENCY: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3607, Civ. C.).

Lender's Name: _____

Lender's Address: _____

CERTIFICATE OF COMPLIANCE AND AUTHORIZATION OF ENTRY: I certify that I have read the application and plans and the information thereon, and I agree to comply with all state laws and city ordinances relating to building construction, and to act as a representative of the City of Orange, Division of Building and Safety to enter upon the property for which I have applied for this permit for the purpose of making inspections.

LICENSE CONTRACTORS DECLARATION: I hereby affirm that I am licensed under a contract of Chapter 8 commencing with Section 20000 of Division 2 of the Business and Professions Code, and my license is in full force and effect.

GENERAL-BUILDING DECLARATION: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (list Sec. 2001.8, Business and Professions Code. Any city or county which imposes a permit to construct shall also impose, or refer any applicant prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Section 8) commencing with Section 20000 of Division 2 of the Business and Professions Code or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 2001.8 by any applicant for a permit shall subject the applicant to a civil penalty of not more than five hundred dollars (\$500):

I, as owner of the property, or my employee with regard to such work, shall do the work, and the applicant is not intended or allowed for sale (Sec. 2004, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does both work himself or through his own employee, provided that such improvements are not intended or allowed for sale. If, however, the building or improvement is sold within one year of completion, the contractor shall have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am contractually committing with licensed contractors to construct the project (Sec. 2004, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor's license pursuant to the Contractor's License Law.)

I am exempt under Sec. _____, B. & P.C. (Attach Certificate)

WORKERS COMPENSATION DECLARATION: I hereby affirm that I have a certificate of insurance to self insure, or a certificate of Workers Compensation Insurance, or a certified copy thereof (Sec. 3000, Lab. C.)

I certify a copy is being furnished.
 Certified copy to file with the City Building Division

CERTIFICATE OF EXEMPTION FROM WORKERS COMPENSATION INSURANCE. This section need not be completed if the permit is for one hundred (\$100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to be deemed subject to the Workers Compensation Laws of California.

Date _____ Assessor _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers Compensation provision of the Labor Code, you must forthwith comply with such provisions as the permit shall be deemed revoked.

DIVISION OF INDUSTRIAL SAFETY CERTIFICATION:

I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, equipment, instrument, or demolition or dismantling thereof, will be done that thirty-six (36) feet high (Chap. 9.1 Op. 2, Art. 2, Section 241, Title 8, C.A.C.)

As owner-builder, I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as defined in Section 18000 of the Labor Code, or to do such work from the division.

INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.
 2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.
 3. A search for facility records can only be conducted by one or all of the following:
 - a) Facility Name, Address, or Identification Number
 - b) Facility Application Number, or Permit to Operate Number; or
 - c) Facility Notice of Violation/Notice to Comply Number.
 4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.
 5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.
 6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.
 7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.
 8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.
 9. The charge for the direct cost of duplication is as follows: Paper Copies, \$0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, \$5.00 each. After a preliminary estimate, advance payment may be required.
 10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs \$10.00 each. An invoice will accompany your records when completed.
- Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.
- Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

REPORT: Inspection Date: 3/17/16, 1020 hrs:
 Facility ID: 110291

I conducted an annual equipment list inspection at Roseburrough Tool Inc. This company manufactures and sells concrete cutting tools and finishing products.
 Company contact: Brad Tinsman, Operations Mgr, 714-453-1719; brad@rosetoolco.com

Applicable rules are 1107 and 1171.

I observed the following equipment:
 F3519 Bleeker Bros Floor spray booth with 55 20"filters, not operating. Matched permit description. Permit limit is 660 lbs VOC/month. The water-based coating used is Aqua Blue Enamel with VOC less than 75 g/l. Huskey HVLP guns are cleaned with water. Aerosol can of paint are also used.

Records were of aerosol can and bulk paint usage. Emissions are well under the VOC permit limit.

I found the facility in compliance at the time of inspection.

Facility ID: 110291

TS-11.

I conducted an annual equipment list inspection at Roseburrough Tool Inc. This company manufactures and sells concrete cutting tools and finishing products.

Company contact: Brad Tinsman, Operations Mgr, 714-453-1719; brad@rosetoolco.com

I observed the following equipment:

F3519 Bleeker Bros Floor spray booth with 55 20" filters, not operating. Matched permit description, but permit was not available at the facility. Permit limit is 660 lbs VOC/month. Records were available, but only listing the number of aerosol paint cans used in the booth, and not the bulk paint applied with the HVLP guns I saw.

The filters were coated with blue paint, and I observed a small blue rectangular part which appeared to be recently coated. An aerosol can of blue paint was nearby. I also observed several 5-gallon containers of Sherwin Williams Chemical Coatings Quick dry enamel F77L6 "Motor Blue," for industrial shop applications. Label indicated that the VOC content was 5.04 lbs/gal. Mr. Tinsman informed me that the coating is used to coat mild steel parts. He said the coating was single component with no special properties required. I also observed a couple of 5-gallon containers of lacquer thinner.

I issued NC E17084 to:

1. Obtain and use Rule 1107 compliant coatings for the metal components. (aerosol cans are exempt from VOC requirement.)
2. Post copy of AQMD permit.
3. Keep paint usage log of both bulk paints and aerosol cans.
4. Use compliant gun cleaning solvent with VOC content of 25 g/liters.

--C Perkins, 9/19/12----

1/25/2013 Facility complied with NC. The water-based coating used is Aqua Blue Enamel with VOC <75 g/l. Guns are cleaned with water.

REPORT: I conducted an annual inspection at the above location on 05/14/02 accompanied by Jaime Roblero, Production Manager, and Ron Herman, Sales Manager. Facility manufactures various tools with coating operations subject to Rules 1107, 1171, and 109.

Spray booth was not in operation at time of inspection. Many of the filters had gaps. Mr. Roblero stated they would be changing the filters before production on 05/15/02. The manometer was over filled and Mr. Roblero stated no one showed him how to fill it or told him what the purpose of it was. The permit was not posted, but was located by Mr. Herman and copied for posting.

Mr. Roblero had a chart of paint usage at the booth, but it only covered a few days in Jan '02. Mr. Herman could not find usage records in his files either.

I served Notice of Violation to Mr. Herman to 1) replace filters to ensure no gaps, 2) repair manometer and ensure correct fluid level, 3) provide VOC usage records 01/01 through 12/01. He said he would work with Mr. Roblero to make sure this is done.

22. SUPPLEMENTARY INFORMATION FOR EACH STACK OR EMISSION POINT:

STACK NO.	(a) HEIGHT	(b) DIAMETER	(c) TEMP.	(d) FLOW RATE	(e) VELOCITY
1					
2					

1980 NOV 25 AM 11:49

S.C.A.Q.M.D. ANAHEIM OFFICE

(IF MORE THAN 3, LIST ON A SEPARATE SHEET)

- a) HEIGHT - DISTANCE ABOVE GROUND LEVEL TO DISCHARGE POINT, FEET.
 b) DIAMETER OF DISCHARGE POINT TO NEAREST TENTH FOOT. NOTE: IF NOT CIRCULAR
 REPORT DIAMETER OF EQUIVALENT CIRCULAR AREA. USING A MEASURED OR ESTIMATED
 CROSS-SECTIONAL AREA (A, IN SQUARE FEET), THE EQUIVALENT DIAMETER (D_e, IN
 FEET) MAY BE CALCULATED:

$$D_e = 1.128 \sqrt{A}$$

- (c) TEMPERATURE AT DISCHARGE POINT IN °F, ACTUAL OR ESTIMATED TO NEAREST 50°F.
 (d) FLOW RATE AT DISCHARGE POINT IN ACTUAL CUBIC FEET PER MINUTE (ACFM).
 (e) VELOCITY OF DISCHARGE IN FT/SEC, DESIGN OR MEASURED RATE.

23. REMARKS

This grinder is to be relocated so it will be inside, out of the weather and closer to the dryer.

IF YOU WISH TO SPECIFY PROCESS INFORMATION AS PROPRIETARY OR CONFIDENTIAL, SPACE IS PROVIDED FOR THIS PURPOSE. HOWEVER, THE KINDS AND RATES OF EMISSIONS MAY NOT BE HELD CONFIDENTIAL. BY STATE LAW EMISSIONS ARE SUBJECT TO PUBLIC DISCLOSURE.

23. REMARKS This dryer is used to dehydrate and fuse our powdered products. These products are used for drawing wire. The capacity is 1000# and this is dumped into the dryer. The dryer is then closed off of any venting until it is finished, then it is vented out into the room as it will have steam come from it. When this is cooled down, it will be discharged into a bin to be transferred to the grinder.

IF YOU WISH TO SPECIFY PROCESS INFORMATION AS PROPRIETARY OR CONFIDENTIAL, SPACE IS PROVIDED FOR THIS PURPOSE. HOWEVER, THE KINDS AND RATES OF EMISSIONS MAY NOT BE HELD CONFIDENTIAL. BY STATE LAW EMISSIONS ARE SUBJECT TO PUBLIC DISCLOSURE.

APPLICATION FOR AUTHORITY TO CONSTRUCT AND PERMIT TO OPERATE

INSTRUCTIONS

- A. This application form must be filled out completely.
 B. One copy of all plans, specifications, and drawings must accompany this application.
 C. An application must be submitted for each article, machine, equipment, or other contrivance requiring a permit.
 D. A filing fee of \$10 paid by check or money order payable to the Orange County Treasurer must accompany each application.

1. Business License Name of Corporation, Company, Individual Owner, or Governmental Agency that is to operate the equipment: Pennwalt Corporation

2. Mailing Address: 630 N. Batavia Street Orange 92668 (714) 639-1211
NUMBER STREET CITY ZIP CODE TEL. NO.

3. Organization Type: Corporation Partnership Individual Owner Government

4. General Nature of Business: Manufacturing Lubricants

5. Pursuant to the provisions of the Health & Safety Code of the State of California and the Rules & Regulations of the Orange County Air Pollution Control District, application is hereby made for Authority to Construct and Permit to Operate the following: FOR BLENDING FATS ACIDS (150° TEMP - STEAM HEATED)
#1488 Exhaust System is dry with filters

Subject: Remedial Action At Former Pennwalt Facility, 630 N. Batavia, Orange,
CA 92668 - O.C.H.C.A. Case #89IC23

Dear Mr. Balamoun:

This letter confirms the completion of site investigation and remedial action at the above site. With the provision that the information provided to this Agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this Agency of any changes in report content, future contamination findings, or site usage.

If you have any questions regarding this matter, please contact Gary Zimmerman (714) 667-3761.

Very truly yours,

William J. Diekmann, REHS, M.S.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2021 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/22/2021 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 28 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 24 CA ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 3 CA UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 01/25/2021 has revealed that there is 1 CA

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 6 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 53 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the CA Cortese list, as provided by EDR, and dated 03/22/2021 has revealed that there are 9 CA Cortese sites within approximately 0.5 miles of the target property.

CA HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the CA HWT list, as provided by EDR, and dated 04/05/2021 has revealed that there is 1 CA HWT site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SO CAL GAS/ORANGE MG	E OF PIXSLEY BTW CHA	SSE 1/2 - 1 (0.712 mi.)	AH190	1890

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/02/2014. The storage containers holding used antifreeze, used oil, the pallet of 40 plus 1 gallon containers of paint / varnish waste residues, and the bin of spent fluorescent tubes, were not marked, or partially marked, with the required identifying information. The storage containers of hazardous waste and the storage container of universal waste must be marked with the required information. Labels were provided for use. A re inspection will be conducted to confirm correction.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Date: 07-24-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: WESTERN WATERPROOFING CO., INC 650 N BATAVIA ORANGE 92868 On site to conduct a new hazardous waste generator inspection. Steve Fuhrman, superintendent, was present for the inspection and provided consent to inspect. The business owner was identified as Western Construction Group. The business utilizes CERS for their electronic reporting. The facility was in the process of obtaining an EPA ID number for their business operations at this address. We discussed the submission of DTSCG s form 1358 to apply for a California ID number. The form may be accessed on line at: https://www.dtsc.ca.gov/HazardousWaste/upload/GISS_-FORM_1358.pdf The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside parking area. I did not observe hazardous waste in the facility's trash or as run off on the ground. Hazardous waste was not in storage on site this date.

Eval Date: 01-17-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Waste streams were reviewed with Mr. Fuhrman. The business does commercial building restoration. Waste paint-related material is brought back from job sites. Waste urethane resin is generated based on going past shelf-life. Waste IPA/toluene/acetone is generated from cleaning coating guns. Hazardous waste containers were observed stored closed but not properly labeled. Hazardous waste labels were provided to be placed on the containers, violation corrected on site. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Manifests were available for review. The facility's EPA ID number is active. Employees are reported to be trained. Emergency plan is posted in the office, spill response notification was discussed. This inspection report was [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: ARROWHEAD WATER
Address: 619 N MAIN ST
City,State,Zip: ORANGE, CA 92868
Site ID: 93442
CERS ID: 10445593
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 93442
Site Name: Arrowhead Water
Violation Date: 06-27-2014
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to have a professional engineer certify and review the SPCC Plan.
Violation Notes: Returned to compliance on 08/14/2014. The SPCC lists "appendix C" as the section dealing with various areas of the SPCC. In fact, section C was listed on the last SPCC but the current SPCC has no appendix C and the sections are dealt with in the current "Section D". Please make a "non technical amendment" to your SPCC in order to abate the violation.
Violation Division: Orange County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 93442
Site Name: Arrowhead Water
Violation Date: 10-31-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 11/22/2016.
Violation Division: Orange City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 93442
Site Name: Arrowhead Water
Violation Date: 06-27-2014
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to test or inspect aboveground tanks for integrity by a person qualified in accordance with industry standards.
Violation Notes: Returned to compliance on 08/14/2014. Per the SPCC, the 12,000 gallon diesel AST is required to be integrity tested every 10 years. On site

documentation showed that the AST was installed in 2001. The integrity test was required on/before 2011. To date this test has not been performed. Have this integrity test conducted in order to abate this violation.

Violation Division: Orange County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 93442
Site Name: Arrowhead Water
Violation Date: 07-13-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 03/28/2018. Approximately 10 gallons of used antifreeze was in storage on site. The waste had been in on site accumulation for over one year, since 4-1-15. The waste had exceeded its allowable accumulation storage time. Have the waste removed for proper recycling and submit a copy of the removal receipt to this Agency within 30 days.

Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 93442
Site Name: Arrowhead Water
Violation Date: 06-27-2014
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years.

Violation Notes: Returned to compliance on 08/14/2014. This facility had its long term mechanic (who also conducted the oil tank/container visual inspections) retire recently. The fuel/oil tanks must be visually inspected at least quarterly (per the SPCC) and the records maintained for the last 3 years. The logs are not being conducted now and could not be found for the last 3 years. Immediately begin conducting quarterly visual inspection logs for the future and find the last 3 years of logs in order to verify the past inspections.

Violation Date: 06-27-2014
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to adequately discuss facility drainage, or no discussion of facility drainage included within the SPCC plan.
Violation Notes: Returned to compliance on 08/14/2014. The area that contains the oil, ATF ASTs and the 55 gallon drums are contained within a concrete bermed, roofed but not side walled secondary containment. There is a drain valve in the concrete berm that was found open during this inspection. The berm is the secondary containment for the single walled tanks/containers in this area. By leaving the drain valve open, there is no secondary containment. The SPCC requires that all drain valves be maintained closed, except during draining. The open drain valve also resulted in oil being released out to the parking lot, as evidenced by the staining. Immediately maintain this valve in the closed position and add it to your visual inspection.

Site Name: Arrowhead Water
Violation Date: 06-27-2014
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to adequately discuss the facility transfer operations, pumping, and facility process within the SPCC plan.
Violation Notes: Returned to compliance on 08/14/2014. The SPCC had an emergency response page listing the Nestle Waters and Statewide contact names and #s to notify in case of a release. The list had old or outdated Nestle Waters contacts. Immediately correct this list and make a note in the "non-technical amendments" page in order to abate this violation.

Violation Division: Orange County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 93442
Site Name: Arrowhead Water
Violation Date: 06-27-2014
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide training regarding: 1. The operation and maintenance of equipment to prevent discharges. 2. Discharge procedure protocols. 3. Applicable pollution control laws, rules, and regulations. 4. General facility operations. AND 5. The contents of the SPCC Plan.

Violation Notes: Returned to compliance on 08/14/2014. The facility mechanic is the only staff who is trained on oil handling. The mechanic recently retired and the training logs could not be found. Immediately begin training a replacement staff and find the last 3 years of training logs in order to abate this violation. The training program was in the SPCC and OK.

Violation Division: Orange County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 93442
Site Name: Arrowhead Water
Violation Date: 06-27-2014
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to control valves used for drainage from diked storage areas to drainage system, watercourse, or effluent treatment system to prevent a discharge.

Violation Notes: Returned to compliance on 08/14/2014. The area that contains the oil, ATF ASTs and the 55 gallon drums are contained within a concrete bermed, roofed but not side walled secondary containment. There is a drain valve in the concrete berm that was found open during this inspection. The berm is the secondary containment for the single walled tanks/containers in this area. By leaving the drain valve open, there is no secondary containment. The SPCC requires that all drain valves be maintained closed, except during draining. The open drain valve also resulted in oil being released out to the parking lot, as evidenced by the staining. Immediately maintain this valve in the closed position and add it to your visual inspection.

Eval Notes: Os site to conduct the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Permission to inspect granted by Nestle/Suarez. Covered the following SPCC elements: The site has the following tanks/containers that hold regulated petroleum products: (1) 12,000 gallon diesel Aboveground Storage Tank (AST). Double walled, electronic leak detection, electronic overfill prevention (OFP) and a concrete berm for piping containment. (1) 240 gallon new oil AST, double walled tank, visual OFP. (1) 240 waste oil AST, double walled, visual OFP. (1) 120 gallon ATF AST, single walled, concrete berm for secondary containment and visual OFP. (~5) 55 gallon drums. The site had a current SPCC (12-2010). The SPCC will need to be revalidated on/before 12-2015. There were several errors listed in the SPCC. See violations. SPCC certified by a PE. Management approval OK. Substantial harm criteria OK. Emergency Response contacts: See kits were located [Truncated]

Eval Notes: On site for a routine hazardous waste inspection. Robert Galvan, zone training and safety manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk outside the buildings. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. We reviewed the required information to be marked on containers storing hazardous waste. The signed off manifests and receipts for the removal of the facility's hazardous waste, including

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Christopher Pinson, Lead Fleet Technician. The facility is a Small Quantity Generator of automotive repair wastes. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to Andrew.romero1@waters.nestle.com and Christopher.pinson@waters.nestle.com.

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Walked throughout the facility and observed the facility's Hazardous Waste storage areas. The facility repairs and rebuilds converters. The process includes cutting the converter open and draining out used oil. The oil is captured in several containers within secondary containment, then transferred to the storage container. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Manifests were available for review. The facility's EPA ID number is active. Employees are reported to be trained. Emergency plan is posted in the office, emergency response notification was discussed. No hazardous waste violations were observed this date. This inspection report was sent to Desmond Tan at dtanrcm@aol.com.

Eval Date: 12-16-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Routine inspection was attempted. Eric Bustillos, managing partner, requested that I return to work with the owner, who was on vacation till next week. I concurred. We discussed their operations and the hazardous waste generated. Eric stated that he is learning the business to take over management. He requested to be present when I return so that he could learn.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection, Desmond Tan, managing partner, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk behind the shop. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The waste was stored in an above ground tank located in the front of the shop. The receipts for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. The facility had a business emergency plan, which contained spill response directions and emergency contact numbers. copy PDF to dtanrcm@aol.com

Eval Date: 12-16-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Ed Wolff, owner, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk outside behind the shop and its trash storage areas. I did not observe hazardous waste in the shop's trash

or as run off on the ground. The shop's records for the removal of its hazardous waste were on site and available for inspection. The records for the last year were reviewed. The storage of the shop's hazardous waste was inspected. The storage containers were stored closed and labeled. We reviewed the required information to be marked on containers that store hazardous waste. The shop had a hazardous waste emergency response card posted in the work area close to the office.

Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Kyle Hancock, Inside Sales. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. One 55-gallon drum of waste oil, approximately half full, was present on site. Absorbent drum was empty. Discussed accumulation time with Mr. Hancock. Facility must properly dispose of hazardous waste within 6 months of reaching 27 gallons. No manifests available. Facility no longer perform maintenance of equipment on site. All maintenance are performed off-site per the Store Manager, Zach Paine. Oil-water separator is no longer in use. Employees are reported to be trained. Emergency plan is posted in the office. Facility coordinator was updated during the inspection. No hazardous waste or universal waste observed in the dumpster/enclosure area. No hazardous waste violations [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Jason Jones Argyle Precision. Mr. Jones provided consent to enter and conduct this inspection. No hazardous waste observed during this inspection. However, the facility generates hydraulic oil approximately every 4 to 5 years. Please ensure that waste oil containers are stored and labeled properly when oil is generated. The EPA ID number associated with the facility must be updated and reactivated. Please activate your EPA ID # immediately. Go to https://www.acgov.org/forms/aceh/EPA_ID_Application.pdf and complete Form 1358. Email form to idnumber@dtsc.ca.gov. Hazardous waste manifests were unavailable as a hazardous waste has not been generated in the past 4 years per Mr. Jones. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Violations:

Site ID: 395069
Site Name: Independent Forge Co.
Violation Date: 08-29-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to label stationary hazardous waste tanks as "hazardous waste" and mark with an accumulation start date.
Violation Notes: Returned to compliance on 08/29/2019. OBSERVATION: The acid waste holding tank was not labeled as hazardous waste. A hazardous waste label was placed on the tank, violation corrected on site. CORRECTIVE ACTION: Hazardous waste tanks must be labeled as such. Please ensure the acid waste holding tank is properly labeled as Hazardous Waste.

Violation Source: CERS

Site ID: 395069
Site Name: Independent Forge Co.
Violation Date: 09-09-2020
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description: Failure to manage a recyclable material pursuant to HSC 6.5 25143.2(b), (c), or (d).
Violation Notes: The facility is reportedly recycling over 100 kg of waste water per month. Within 30 days please completed and submit a Recyclable Materials Report to CERS for the acid and caustic solutions recycled from the etch cleaning line.
Violation Division: Orange County Environmental Health
Violation Program: HWRRecycler
Violation Source: CERS

Site ID: 395069
Site Name: Independent Forge Co.
Violation Date: 07-15-2015
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 08/10/2015. Containers storing hazardous waste such as used oil, dried caustic solids, and an unknown were not marked with the required identifying information. Mark all containers storing hazardous waste with the required information immediately. Once completed, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Violation Notes: present: 4) The construction materials of the tank at least weekly to detect corrosion or leaking of fixtures or seams. 5) The construction materials of, and the area immediately surrounding, discharge confinement structures (e.g., dikes) at least weekly to detect erosion or obvious signs of leakage (e.g., wet spots or dead vegetation). Returned to compliance on 12/11/2018. Inspection logs for the Nitric Acid holding tank within the waste treatment system were not available for review. Construction materials and fixtures must be inspected weekly. Please obtain inspection logs within 30 days or begin doing weekly inspections immediately.

Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 395069
Site Name: Independent Forge Co.
Violation Date: 09-13-2018
Citation: 22 CCR 15 66265.191(e) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.191(e)

Violation Description: Failure of the generator conducting CE, CA, or PBR treatment activity to annually obtain and maintain a current P.E. assessment of the existing Hazardous Waste tank systems which lacks secondary containment meeting the requirements of section 66265.193. The P.E. assessment shall determine that the tank system is adequately designed and has sufficient structural strength and compatibility with the waste(s) to be transferred, stored or treated to ensure that it will not collapse, rupture, or fail. At a minimum, this assessment shall include all elements of the tank integrity assessment.

Violation Notes: Returned to compliance on 12/03/2018. Professional engineer certification for secondary containment was last done 10/3/11 and was due by 10/3/16. Please start the certification process immediately and submit it to this Agency within 60 days.

Violation Division: Orange County Environmental Health
Violation Program: PBR
Violation Source: CERS

Site ID: 395069
Site Name: Independent Forge Co.
Violation Date: 09-13-2018
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 12/11/2018. Several containers of hazardous waste were observed open, please refer to the report comments. The filter cake containers must be covered. The caustic solution holding container must be replaced, or no longer used to store hazardous waste. Containers must be closed in a manner to prevent a release if they were to be knocked over. Two 5 gallon buckets of used oil for maintenance on the furnaces need to be properly contained with a tight fitting lid. Please ensure all containers and properly covered and stored closed within 30 days.

Violation Notes: Returned to compliance on 08/29/2019. OBSERVATIONS: One container of filter cake underneath the filter press was observed not labeled as hazardous waste. A hazardous waste label was completed and placed on the container, violation corrected on site. One cubic yard box of caustic tank cleanout waste was observed not labeled as hazardous waste. A hazardous waste label was completed and placed on the box, violation corrected on site. One cubic yard box was missing the accumulation start date on the hazardous waste label. A start date of accumulation was confirmed and written on the label, violation corrected on site. One 55 gallon drum of waste oil was observed not labeled as hazardous waste. A hazardous waste label was filled out and placed on the container, violation corrected on site. CORRECTIVE ACTION: Please ensure all containers containing hazardous waste are properly labeled as hazardous waste with the label completed.

Eval Notes: Please be advised that this Agency has reviewed Tiered Permitting Financial Assurance Self Certification for this facility. This Agency had assumed that new estimates were being submitted between 2010 and 2013, due to multiple changes in costs since 2010 for "outside services", "Labor/ Engineering" and errors in addition of components (copies enclosed). The cost for "Bin Rental/Transportation" has varied, between \$920.00 and \$1,961.50 (2010: \$920.00, 2011: 1,920.00, 2012: \$1,961.50 and 2013: \$920.00) The cost for "Labor/ Engineering" has varied, between \$1,434.66 and \$2,434.66 (2010 & 2011: \$2,434.66, 2012: \$1,434.66 and 2013: \$2,434.66). The 2014 closure costs are approved since the attached "Overall Closure Cost Estimate" table shows calculations using the 2011 CCE (correct addition) with inflation factors for 2011 through 2014 being applied.

Eval Notes: This Agency reviewed and approved the facility's tiered permitting forms submitted through CERS. Notification was for the operation of 1 tiered permitting permit by rule (PBR) unit. 3 tanks and 4 container/treatment areas were claimed. The specific waste treated was identified as spent nitric solution and rinse waters containing heavy metals, zinc, copper, and trace chromium. The treatment process was described as neutralization of spent nitric solution with sodium hydroxide. Metal precipitation with flocculation. Sludge de-watered by filter press. An on site inspection will be forthcoming.

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste generator inspection. Gloria Lopez, office manager, Boomer Ramirez, vice president, and Andy Flores, production control supervisor; were present for the inspection and provided consent to inspect. Hazardous waste was not observed in the shop's trash storage or as run off on the ground. The facility's hazardous waste generator status has fluctuated between that of a large quantity generator (LQG) and small quantity generator (SQG) in recent years. Regardless, the facility maintains records showing themselves to be current in annual hazardous waste handling / spill response training for facility employees; and that daily hazardous waste storage container inspections are conducted. The storage of the facility's hazardous waste was inspected. Storage containers were stored closed and labeled. We discussed the storage and container labeling for the waste filter cake. Proper accumulation time for waste storage was observed. [Truncated]

Eval Notes:

On site to conduct a Tiered Permitting Permit by Rule inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. Consent to inspect and take photos was given by Andrew Flores, CEO. The PBR unit treats nitric acid and caustic solutions, which are used in the cleaning/etching line for aluminum parts. The caustic rinse is pumped into a 275 gallon tote and the nitric acid rinse is pumped from the etch line to a stationary tank, T2. Both rinses are pumped into T1 for pH adjust and flocculent is added to precipitate metals. Sludge from T1 is then pumped to the filter press. The exterior of the filter press was not marked with required tank information. The facility has submitted Tiered Permitting Unit Notification forms to CERS. CERS ID 10414000 was last submitted on 2/27/16 and declined. Please update the facility map to show current property outline. Financial assurance forms were not submitted for 3/1/17. Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Map ID
Direction
Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

INDEPENDENT FORGE CO. (Continued)

1000209523

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 05-10-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/10/2018. OBSERVATION: Two Used Oil 55-gallon metal drums were not labeled and one used oil 55-gallon metal drum was illegible. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information. This was corrected on site. No further corrective action necessary/

Site ID: 410874
Site Name: CALIFORNIA COACH ORANGE INC
Violation Date: 05-10-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 12/17/2018. OBSERVATION: One 55-gallon drum containing waste absorbent had an accumulation start date of 3/28/14 . Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA within 30 days.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 410874
Site Name: CALIFORNIA COACH ORANGE INC
Violation Date: 05-10-2018
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 05/10/2018. OBSERVATION: Three Used Oil 55-gallon metal drums were open. All hazardous waste containers shall be closed at all times except when adding or removing waste. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste. This was corrected onsite. No further corrective action necessary.

Eval General Type: Other/Unknown
Eval Date: 12-17-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site to conduct a Hazardous Waste reinspection. The facility was cited violation I053 on 5/10/18 for having hazardous waste stored on site for more than 180 days. One 55 gallon drum containing waste absorbent was dated 3/28/14. Manifests were available for review this date showing the absorbent was hauled off site. A walkthrough of the facility was conducted. The drum for waste absorbent was observed empty at this time. The municipal trash was observed free of hazardous waste. Violation I053 is corrected, the facility has no outstanding violations. Spoke with Mr. Hernandez about hazardous waste storage accumulation time limits. This report was sent to Gary Hernandez at garycalcoach@gmail.com.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

that all containers used to store hazardous waste have a label.

Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 411555
Site Name: JB3D
Violation Date: 09-04-2013
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/25/2013. An unmarked small satellite container of drying paint and solvent waste was located at the paint booth. An outside 5 gallon storage container of used oil was unmarked. All containers storing hazardous waste must be marked with the required identifying information. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 01/15/2019.

Violation Division: Orange City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 411555
Site Name: JB3D
Violation Date: 09-04-2013
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 09/25/2013. The outside paint and solvent waste storage drum was stored open with a funnel stuck in its opening. The funnel was packed and full of dried paint and solvent waste. Also, an open satellite container of drying paint and solvent waste was located at the paint booth. All containers storing hazardous waste must be stored closed, except when adding or removing hazardous waste. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-04-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Dora Strathopoulos, studio coordinator, was present for the inspection and provided consent to inspect. The business owner was identified as Trumark Inc. John Bishop was identified as the president. The inspection included a walk of the facility's outside storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the required identifying information, except as noted above. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. We discussed the maintenance of the receipts for the removal of paint /solvent wastes as part of hazardous waste removal records. We discussed the self-transport of used oil to an oil recycling center or automotive repair shop for [Truncated]

Eval Notes: On site to conduct a routine hazardous waste inspection. Met with manager Max Hoff of JB3D. Consent was provided to enter and conduct inspection activities. Hazardous waste observed included Waste/Spent Acetone and spent paint and sanding dust filters. All waste and waste containers were properly managed. One container used to store paint booth filters was not labeled (See violation I400 above). Hazardous waste manifests for the hazardous waste streams were available for review. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Eval Date: 10-16-2019

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Juvenal Chavez, Lead Painter, and Max Hoff, Facilities Administrator. The facility is a Small Quantity Generator of paint waste. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to mhoff@jb3d.com.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 411596
Site Name: KARCO SPECIALTIES
Violation Date: 12-22-2014
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: Returned to compliance on 01/14/2015.
Violation Division: Orange City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 411596
Site Name: KARCO SPECIALTIES
Violation Date: 06-21-2016
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.
Violation Notes: Returned to compliance on 06/28/2016. Training records for prior years were not available for review. Employee training are required to be conducted and documented annually and must be made available for 3 years. Training was conducted and documented for 6/28/2016. Violation has been corrected as of 6/28/2016.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-18-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Jay Bruley, Manager. The facility is a Small Quantity Generator of automotive repair wastes. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to jay@karcospecialties.com.

waste or universal waste observed in the dumpster/enclosure area.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 07-08-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Attempted to call twice (7/7/16 and 7/8/16) to request training records. Emailed facility's contact, Richard Kartoziyan, for training records this date. Gave facility until 7/12/16. Received training records from facility on the same date but training was conducted post inspection. See email correspondences below: From: Le, Minh Sent: Friday, July 08, 2016 3:10 PM To: 'Karco' <rkarco@gmail.com> Subject: RE: Hazardous Waste Generator Inspection Follow-up Hello, Thank you for forwarding the training records. Training for hazardous waste management is required annually, please ensure you keep training records for three years. Since the training was conducted after the inspection and as a result of the inspection, it will be marked as a deficiency on the report and corrected all at the same time. There is no fines since it has been fixed, just please make sure you are conducting annual training and retain the documents. The Hazardous Materials Business Plan [Truncated]

Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-10-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Corey Knapp, manager, was present for the inspection and provided consent to inspect. The inspection included a walk of the facility's outside lot and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A hazardous waste emergency response card was posted in the office. report PDF to mary.31@yahoo.com

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Bruce Annand, Manager. The facility is a Small Quantity Generator of automotive repair wastes. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to citywideautocare@gmail.com.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
