Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Andy Yang, owner, was present for the inspection and provided consent to inspect. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. However, the labels were fading. New labels were provided. The receipts for the removal of the facility's hazardous waste for this year were on site and available for inspection. We discussed maintaining records for hazardous waste removal for 3 years from the date of removal. A hazardous waste emergency response card was posted in the office.

Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Met with Andy Yang, Owner. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Manifests were available for review. The facility's EPA ID number is active. Emergency plan is posted in the office, spill response notification was discussed. No hazardous waste violations were observed this date. This inspection report was sent to socialmotorworks@gmail.com.

Eval Type: Routine done by local agency
Eval Notes: no violations noted
Eval Division: Orange City Fire Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 08-29-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Frank called with question on billing. He wanted to be in a smaller category since "he didn't generate much". I checked his waste streams and advised him that he is in the smallest category. He asked about partial payments and late fees. I recommended him to pay as much as possible. The late fee of 25% would only be for the unpaid portion. Also noted corrected violations for last year for still open. I closed them.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-23-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Luis Lopez, mechanic, was present for the inspection and provided consent to inspect. I did not observe hazardous waste in the shop's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the required information. Spill response directions and emergency contact numbers must be provided for the employees. report PDF to premier_trans@sbcglobal.net

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-06-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Frank Islas, Owner. The facility is a Small Quantity Generator of automotive repair wastes. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked. The municipal trash dumpster is shared with several other businesses. The dumpster was observed and there were no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to premier_trans@sbcglobal.net.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: LATINOS AUTO REPAIR
Address: 748 W ANGUS AVE STE D
City,State,Zip: ORANGE, CA 92868
Site ID: 277615
CERS ID: 10558876
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 277615
Site Name: LATINOS AUTO REPAIR
Violation Date: 06-16-2015
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: Returned to compliance on 06/15/2015.
Violation Division: Orange City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 277615
Site Name: LATINOS AUTO REPAIR
Violation Date: 01-02-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/02/2019. Hazardous waste containers were not properly labeled with the information as specified above. Labels were provided and placed onto the containers. Please ensure the containers remain labeled. Violation corrected on site.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-02-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Walked throughout the facility and observed the facility's Hazardous Waste storage area. All hazardous waste containers were observed stored closed but none were properly labeled. Labels were provided, filled out, and placed onto containers, violation 1400 is corrected on site. Consolidated waste manifests were available for review. The facility's EPA ID number is inactive. Discussed how to reactivate EPA ID number using the permanent state ID application with Juan. Employees are reported to be trained. Emergency plan is posted in the office. Municipal trash was observed and there are no signs of illegal disposal. This inspection report was sent to Juan Jimenez at latinosautorep@sbcglobal.net.

Violations:
 Site ID: 410605
 Site Name: ADVANCED CERAMIC TECHNOLOGY
 Violation Date: 06-25-2019
 Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
 Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
 Violation Notes: Returned to compliance on 07/30/2019. Two five gallon buckets of ceramic cutting coolant waste were observed open. Hazardous waste containers must be kept closed while containing hazardous waste. Liquid waste containers should be kept closed with a tight fitting lid

to prevent a release if the container were to be knocked over. A reinspection will be conducted to verify containers are being kept closed.

Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 410605
Site Name: ADVANCED CERAMIC TECHNOLOGY
Violation Date: 06-25-2019
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 07/30/2019. Two five gallon buckets of ceramic cutting coolant were being stored in a manner to allow the waste to dry before being managed as hazardous waste. Once the cutting coolant waste is removed from the process and stored for proper disposal, it then becomes a hazardous waste and must be managed properly as such by being stored in a closed labeled container. Please discontinue allowing the waste to dry before being stored for disposal.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-02-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by William Roberts, Vice President. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted in the work area. No hazardous waste or universal waste observed in the dumpster/enclosure area. The facility is currently not an active recycler and do not have any excluded recyclable materials on site. No hazardous waste violations were observed this date.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-25-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Bill Roberts, Vice President. The facility is a Very Small Quantity Generator of ceramic cutting waste. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled. Two five gallon buckets of waste ceramic cutting coolant were observed open. The containers were being stored open to allow water content to evaporate for the waste to dry. I explained to Mr. Roberts this is considered treatment of hazardous waste and shouldn't be conducted unless permitted. Please discontinue allowing the liquid hazardous waste to dry before storage. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Business emergency plan is maintained on site, spill [Truncated]

ceramic cutting coolant were observed open. I014 - Two five gallon buckets of waste ceramic cutting coolant were being stored in a manner to allow the waste to air dry before being consolidated in a solid hazardous waste drum. The facility has ceased allowing the buckets of ceramic cutting coolant waste to air dry and is now consolidating the waste in a 30 gallon drum. Hazardous waste containers were observed properly labeled and stored closed at this time. Violations I114 and I014 are corrected. The facility has no outstanding violations at this time. This inspection report was sent to bill@advancedceramicttech.com.

Address: 1230 W ALVAREZ AVE
City,State,Zip: ORANGE, CA 92868
Site ID: 411879
CERS ID: 10516906
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 411879
Site Name: NEW IMAGE PAINT AUTO BODY CENTER
Violation Date: 05-16-2019
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: The facility has been disposing of waste sanding dust and paint booth exhaust filters to the municipal trash. Waste sanding dust will now be managed as hazardous waste per Mr. Bellone. The paint booth exhaust filters must either be managed as hazardous waste or tested to determine if hazardous or not. Mr. Bellone stated the filters were deemed non-hazardous by testing, but results were not available for review. Within 30 days, provide this Agency the test results for the filters. If results cannot be obtained, the filters must be managed as hazardous waste or tested again.
Violation Division: Orange County Environmental Health

Site ID: 411879
Site Name: NEW IMAGE PAINT AUTO BODY CENTER
Violation Date: 05-18-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/19/2016. The drum storing water borne paint waste was unmarked. Containers storing hazardous waste must be marked with the required information. Label was provided. Violation corrected.

Eval Date: 05-16-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Tom Bellone, Production Manager. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The facility is currently not managing waste sanding dust or waste paint booth exhaust filters as hazardous waste and has been disposing of them to the municipal trash. Mr. Bellone agreed to begin managing waste sanding as hazardous waste. Mr. Bellone stated the paint booth exhaust filters were tested and deemed non-hazardous, however test results were not available for review. Please provide test results to this Agency within 30 days to show the filters are not hazardous. If results cannot be obtained the filters must be managed as hazardous waste until tested to determine if hazardous or not. Please discontinue disposing of the filters to the municipal trash. The perimeter of the facility was and [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-18-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Tom Bellone, manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the area behind the shop and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The records for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. A hazardous

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site ID: 411434
Site Name: HANDPIECE PARTS & PRODUCTS INC
Violation Date: 03-31-2014
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: A 55 gallon unmarked drum of an unknown was located in the outside lot. A 5 gallon unmarked container of an unknown was located in the outside lot next to the dumpster. I was informed that these substances were thought to be used oil (est. 15 gallons) and paint waste (est. 4 gallons). Containers storing hazardous waste must be marked with the required information and handled properly. Confirm the stored contents. Provide the required identifying information to containers storing hazardous waste. Once completed, please submit the attached certificate of return to compliance, signed and dated to this Agency within 30 days.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-31-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Emily Galvan, general manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. We discussed required information to be marked on containers storing hazardous waste. We discussed the marking of the daily use used oil storage containers as G emptied daily for the accumulation start date. The receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility had a business emergency plan, which contained spill response directions and emergency contact numbers. report PDF to emily@handpieceparts.com [Truncated]

Eval Date: 02-27-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Steve Bowen, President. The facility is a Small Quantity Generator of waste oil and oily water generated from CNC machining processes. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to steve@handpieceparts.com.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Name: H WEST EQUIPMENT INC
Address: 645 N MAIN ST
City,State,Zip: ORANGE, CA 92868
Site ID: 411432
CERS ID: 10548718
CERS Description: Chemical Storage Facilities

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-17-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Kirsten Street, office administration, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. The receipts for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last 3 years were reviewed. This facility is currently a small quantity hazardous waste generator (SQG). We discussed the allowable hazardous waste storage time for an SQG, which is 180 days. The facility had a hazardous waste emergency response card posted in the office hallway. Report PDF to hwestequipment@aol.com
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 03-22-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: From: Krall, Joyce Sent: Tuesday, March 22, 2016 10:50 AM To: 'hwestequipment@aol.com' Subject: HAZARDOUS WASTE INSPECTION Hello Kirsten, Thank you for your work on H westG's inspection. Attached is the report for H WestG's information and records. Please contact me if you should have any questions. Regards, Joyce Krall, REHS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-15-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Walked the facility with Jon Jaker, general manager. Verified ownership as H WEST EQUIPMENT INC and the number of employees as 15. Inspected the hazardous waste storage area, the back storage yard, the perimeter, and the municipal trash. No hazardous materials were observed in the municipal trash. Hazardous waste manifests were reviewed from the previous three years. The emergency response sticker was observed on the wall by the front office. A copy of the report was sent to randhwest@aol.com.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 410652
Site Name: ALL DIAMETER GRINDING INC
Violation Date: 05-09-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Hazardous metal grinding waste has been accumulating on site for over 180 days. The waste was last hauled off site on a uniform hazardous waste manifest on 11/2/17. Please have the waste hauled off site within 30 days. You may still manage the waste as Excluded Recyclable Material and have it picked up for recycling, otherwise it must be hauled off site as hazardous waste.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 410652
Site Name: ALL DIAMETER GRINDING INC
Violation Date: 05-09-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Several containers of hazardous metal grinding waste were observed without proper labeling. If the waste is to be managed as Excluded Recyclable Material (ERM) then it must have an ERM label. If the waste is to be managed as hazardous waste then it must have a hazardous waste label. Within 30 days please label all containers.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 410652
Site Name: ALL DIAMETER GRINDING INC
Violation Date: 05-03-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 07/03/2017. The used coolant had accumulated in on site storage past allowable times for a small quantity hazardous waste generator. Approximately 300 gallons of used coolant was on site this date. Records show the last removal of this waste streams almost 2 years prior. Have the used coolant removed by a registered hauler for recycling / disposal and submit a copy of the receipt to this Agency within 30 days.
Violation Division: Orange County Environmental Health

Violation Date: 05-03-2016
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description: Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.
Violation Notes: Swarf ERM (overflow) was stored in several outside unmarked open bins partially covered with plywood. Swarf was also accumulating in open unmarked bins within the work area. Containers storing ERM must be marked with the required information. Also, the containers must be

and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The facility handles their waste metal swarf as excluded recyclable material (ERM). A separate hazardous waste recycler inspection report was completed. The signed off manifests for the removal of the facility's hazardous waste were provided for inspection. The records for the last year were reviewed. The records for ERM receipt from OC Recycling.com (1601 E. Edinger Ave. Santa Ana) were also provided for inspection. The facility must provide written spill response directions and emergency contact numbers for their [Truncated]

On site for a routine hazardous waste recycler inspection. Jeff Goodwin, general manager, was present for the inspection and provided consent to inspect. The facility's handling of their metal swarf as excluded recyclable material was discussed. The storage of the shop's excluded recyclable material (ERM) metal swarf was inspected. The records for ERM receipt from OC Recycling.com (1601 E. Edinger Ave. Santa Ana) were also provided for inspection. The facility must provide written spill response directions and emergency contact numbers for their employees. The facility had a business emergency plan. A hazardous waste emergency response card was provided for use. report to jeff@alldiametergrinding.com

Eval Division: Orange County Environmental Health
Eval Program: HWRrecycler
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-06-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes:

On site to conduct a Recycler inspection. Met with Jeff Goodwin, Owner. The facility generates hazardous metal grinding waste. The waste was previously being managed as Excluded Recyclable Material (ERM). Per Mr. Goodwin the waste has been accumulating due to low salvage value. The waste was last hauled off site on a uniform hazardous waste manifest 11/2/17. A hazardous waste violation has been cited due to waste accumulating past allowable accumulation times. Recycling bills of lading for 2016 were available for review. CERS ID 10548094 was reviewed. The facility has not had hazardous waste recycled since before July 1, 2016. Please note the Recyclable Materials Report must be completed in California Environmental Reporting System (CERS) by July 1 of every even numbered year for waste recycled in the previous two years. If hazardous waste is recycled between now and July 1, 2020 please submit the Recyclable Materials Report to CERS by the deadline. No action [Truncated]

Eval Date: 05-06-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Jeff Goodwin, Owner. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Several containers of hazardous metal grinding waste were observed stored open and unlabeled. Containers were not properly labeled as hazardous waste. The facility was previously managing the metal grinding waste as Excluded Recyclable Material (ERM). Per Mr. Goodwin the waste has been accumulating due to low salvage value. The waste was last hauled off site on a uniform hazardous waste manifest 11/2/17. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. Emergency plan is posted on site, spill response notification was discussed. This inspection report was emailed to jeff@alldiametergrinding.com.

Name: MAACO # 2589
Address: 788 N BATAVIA ST
City,State,Zip: ORANGE, CA 92868
Site ID: 132095
CERS ID: 10343566
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 132095
Site Name: MAACO # 2589
Violation Date: 03-04-2014
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: The facility's used paint spray booth exhaust filters were being handled as non hazardous waste and disposed of via the trash. Handle this waste as hazardous and cease disposal via the trash until the used filters are determined to be non hazardous. In order to make a hazardous waste determination, have a representative sample of the waste analyzed by a state certified lab for California regulated heavy metals (Title 22, CCR). Perform a Total Threshold Limit Concentration (TTLC) analysis and if necessary, a Soluble Threshold Limit Concentration (STLC) analysis. Submit a copy of the lab analysis report to this Agency for evaluation and comment. If waste is not analyzed or if the lab analysis results are above Title 22, CCR hazardous waste criteria, then the used paint booth exhaust filters must be handled as hazardous waste. Please contact this Agency for assistance in conducting hazardous waste determinations.

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Walked throughout the facility and observed processes and hazardous waste storage. The facility conducts auto body repair work. Sanding dust and debris is swept daily and managed in a cubic yard box as hazardous waste. Paint spray booth filters are also stored in this container. The facility also has two 55 gallon drums of waste acetone mixed with paint waste and two 30 gallon drums of used oil, which were properly labeled and stored closed. The municipal trash dumpster was observed free of hazardous waste. One manifest dated 1/31/17 was available for review. Frank stated since he was new to the shop and has only been

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with manager Stephanie Sanchez of Maaco. Consent was provided to enter and conduct inspection activities. Hazardous waste observed onsite included a 55 gallon drum of spent solvent and a container used to contain sanding dust and used paint filters. The containers were properly labeled and stored closed. The 3-year history of waste manifests were not available for review (See violation I474 above). Your EPA ID # was observed as inactive (See violation I352 above). Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping in the trash dumpster.

Eval Notes: MAACO #2589 788 N BATAVIA ST ORANGE CA 92868 On site for a routine hazardous waste inspection. Juan Jimenez, manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The facility had submitted its business owner / operator identification forms via CERS on 2-10-14. The business owner was identified as Peachy Developments California South, LLC. The facility's EPA ID number was identified as CAL000390378. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. We discussed the hazardous waste characterization of the used paint booth exhaust filters. We discussed the maintenance of the facility's records of hazardous waste removal for recycling and/or [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best

Violation Notes: business plan is complete, accurate, and up-to-date.
Violation Division: Returned to compliance on 04/15/2015.
Violation Program: Orange City Fire Department
Violation Source: HMRRP
CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-10-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Jim Brotheras, president, was present for the inspection and provided consent to inspect. The facility's outside lot was walked. Hazardous waste was not visible in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. Hazardous waste in storage included approximately 25 gallons of used antifreeze. The receipts for the removal of the facility's hazardous waste were provided for inspection. The records were reviewed. A hazardous waste emergency response card was posted in the office.

 Eval Type: Routine done by local agency
 Eval Notes: Cobb Property Services 1145 W Shelly Ct, Orange, 92868 On site to conduct a routine Hazardous Waste inspection. Met with William Roche, Supervisor. The facility has undergone a change of ownership and is now owned by HDLM LLC dba Cobb Property Services. The facility is a Small Quantity Generator of automotive repair wastes. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility must obtain a new EPA ID number under current ownership. Please complete DTSC Form 1358, attached with this report, and send it to DTSC as provided in the instructions. Once the facility has received a new EPA ID number violation I352 will be corrected.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-09-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Chemical inventory is incomplete and/or requires update.
Eval Division: Orange City Fire Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-08-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Bob Day, president, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside lot and trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were marked with the required identifying information. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The shop had a written business emergency response plan on site. report PDF to nkelly@richemical.com

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violation Notes: possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Returned to compliance on 05/21/2018. While on site at a neighboring business, I noticed waste hydraulic oil that had been released from this business into the parking lot, out into the public parking lot and into the public street (Barkley Ave.). Investigation showed that the facility's waste oil container (~270 gallon plastic tote) had a break in the valve. The valve leaked about 10-20 gallons of waste hydraulic oil (managers estimate) into the parking lot. All Hazardous Waste (HW) facilities are required to maintain the facility to minimize the possibility of release of a HW. Immediately begin managing the waste oil tote to prevent any future releases.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-16-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Anthony Alves, service manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were stored closed. The signed off manifests and receipts for the removal of the facility's hazardous waste were on site and requested for inspection. The records for the previous year were reviewed. The facility reported to have a business emergency plan, which contained spill response directions and emergency contact numbers. A hazardous waste emergency response card was also provided for posting. report PDF to anthony.alves@bfpna.com

Eval General Type: Other/Unknown
Eval Date: 12-21-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: This Agency received copies of the facility's removal records for 2015. The violation cited on the 12-16-15 inspection report was corrected. We reviewed the requirement of obtaining "signed off" manifest copies for each shipment of hazardous waste removed. The signed off copy shows receipt of the shipment at its destination by the receiving treatment, storage, disposal facility. The records show that this facility to be a small quantity hazardous waste generator (SQG). Allowable accumulation storage time is 180 days. Satellite accumulation rule of one year may be applied for properly stored hazardous waste, 55 gallons or less, at the work station.

storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked. The facility shares municipal trash dumpsters with other businesses. Dumpsters were observed and there are no signs of illegal disposal. Consolidated hazardous waste manifests were available for review. The facility's EPA ID number is active. Employees are reported to be trained. Emergency plan is posted in the office, spill response notification was discussed. No hazardous waste violations were observed this date. This inspection report was sent to autohause@sbcglobal.net.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-07-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Joe Jacques, master technician, was present for the inspection and provided consent to inspect. The area behind the shop and the shop's trash storage were viewed. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the required information. The receipts for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. A hazardous waste emergency response card was posted in the work area close to the front office. report PDF to autohause@sbcglobal.net

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-13-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Denise Learmouth, controller, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside lot and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the required information. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility had a business emergency plan, which contained spill response directions and emergency contact numbers. A hazardous waste card was also provided for use. report PDF to rdavis@decotechgroup.com

Davis, Manager. The facility is a Very Small Quantity Generator of solvent wastes generated from printing operations. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. Two, five gallon jugs containing unknown liquids were observed without labeling. Discussed proper management of the containers with Mr. Davis and provided hazardous waste labels. Please determine if the containers contain hazardous waste, and if they do please label them as hazardous waste. Containers containing hazardous waste must be labeled as hazardous waste along with generator information, chemical and physical characteristics of the waste, and accumulation start date. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 07/03/2017. The labels on the drums storing hazardous waste (used oil, used anti freeze) were faded and missing required information. New labels were provided. Violation corrected.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 01-30-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: CERS review & validation
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-04-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked. The facility shares a municipal trash dumpster with other businesses. The dumpster was observed and there are no signs of illegal disposal. Manifests were available for review. The facility's EPA ID number is NOT active. Please fill out DTSC Form 1358 for a Permanent State ID Number Application. While filling out the form, please note to check the box to reactivate your number, rather than applying for a new number. Employees are reported to be trained. Emergency plan is posted in the office, spill response notification was discussed. No hazardous waste violations were observed this date. This inspection report was sent to Virgil Moscoso at virgil@penningtons-inc.com.

Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Virgil Moscoso, accounts payable, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the shop's outside perimeter and its trash storage areas. I did not observe hazardous waste in the shop's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. We reviewed the requirement to maintain containers of hazardous waste closed except during the addition or removal of waste. The receipts for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. A hazardous waste emergency response card was posted in the office. report PDF to virgil@penningtons-inc.com

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Hongling Cao, technical director, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The business owner was identified as Depar Inc., an affiliate of Montrose Environmental Group, Inc. The inspection included a walk behind the building. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. The facility had a designated hazardous waste storage room with satellite storage containers located in the laboratory areas. We discussed the required information to be marked on containers storing hazardous waste. The signed off manifests for the removal of the facility's hazardous waste were provided for inspection. The records were reviewed. Written emergency contact numbers and spill response directions were provided for the PDF to Hongling Cao [Truncated]

Eval Notes:	On site for a follow up to fire with Scott churbock (senior Advisor), Bob both from Enthalpy. Orange Fire Tang on site to meet contacts. OCHCA Trainees along for observation. Spoke to Bob on this date. He indicated Veolia is contracting for the profiling and disposal of chemicals / HW. We are not able to enter building due to safety hazardous. Enthalpy plans to hire structural engineer within 2 weeks to reinforce building and so profiling of chemical can be done. Explained to Bob and Scott on this day that OES report needs to be reported today. Facility did not make immediate notification. Reviewed the HMBP and site map. This agency requested profiles and Hazardous Waste Manifests.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: ENTHALPY ANALYTICAL
Address: 931 W BARKLEY AVE
City,State,Zip: ORANGE, CA 92868
Site ID: 417245
CERS ID: 10722835
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 417245
Site Name: Enthalpy Analytical
Violation Date: 07-21-2020
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 08/27/2020.
Violation Division: Orange City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-24-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Process manager Robert Clark of Enthalpy Analytical. Consent was provided to enter and conduct inspection activities. Hazardous waste observed included: - Waste/Spent solvents in a 1-gallon glass jar; - Waste Acid stored in a 1-gallon glass jar; - Please note that these containers should have an empty daily label on them as well as the contents in the container. - 55-gallon drum containing used soils from test samples; - 55-gallon drums containing Caustic liquids, solvents, and acidic waste. All containers were stored properly and labeled. Hazardous waste manifests for the hazardous waste streams were available for review. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Other Type: RUBBER MFG.
Contact Name: S. R. HEMSTREET
Telephone: 7145323355
Owner Name: TECHNICAL EQUITIES
Owner Address: 1922 THE ALAMEDA
Owner City,St,Zip: SAN JOSE, CA 95126
Total Tanks: 0006

Tank Num: 001
Container Num: ONE
Year Installed: 1973
Tank Capacity: 00010000
Tank Used for: WASTE
Type of Fuel: 1
Container Construction Thickness: X
Leak Detection: Visual, Stock Inventor

Tank Num: 002
Container Num: TWO
Year Installed: 1974
Tank Capacity: 00010000
Tank Used for: PRODUCT
Type of Fuel: Not reported
Container Construction Thickness: Not reported
Leak Detection: Visual, Stock Inventor

Tank Num: 003
Container Num: THREE
Year Installed: 1974
Tank Capacity: 00010000
Tank Used for: PRODUCT
Type of Fuel: Not reported
Container Construction Thickness: Not reported
Leak Detection: Visual, Stock Inventor

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 01-11-2002
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: Arrived at site vicinity approximately 1300 hours. Clear skies, approximately 72 degrees F. Walked along railroad tracks (north side of business) to the Bitterbush flood control channel. Observed moist soil along fence behind site (back perimeter), with some moss growing on the soil (area is above the flood control channel). A. Buck and P. Copeland climbed down into flood control channel and found three storm drains leading into the flood control channel from the West American Rubber Co. (WARCO) site. The northern-most and southern-most drains appeared to be concrete enclosed corrugated pipe, approximately 18-inches in diameter, draining into the bottom of the flood control channel. The central drain was located closer to the top of the channel (see photographs). Observed some black material deposited on the sides of the northern-most concrete drain leading into the flood control channel from WARCO. Observed a blackish-grey material covering the rocks and soil between the northern-most and southern-most drains. Observed deposit of unidentified pinkish, fibrous substance at the outfall from the southern-most drain into the flood control channel. Water was flowing from the central drain into the flood control channel. A. Buck tested the pH of the water and it appeared to be neutral. Collected samples of the black material (S-1, 1320 hrs, northern-most drain) and the other unidentified material (S-2, 1340 hrs, southern-most drain). Turned the samples and photographs over to the investigations and enforcement unit (SARWQCB).
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-17-2002
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Dry and sunny at time of inspection. Review of SWPPP showed a poor sampling location on the site map. Discussed preferable location. SWPPP showed 2 prior WDIDs of 011510 and 004451. Prior inspection and NOV in April/May 2001. Some of same missing and inadequate BMPs as well as poor housekeeping were evident. See 14 pages of photos. White material mixed with water was released onto pavement, but had not left the facility. This appeared to be from a paint clean up operation. The housekeeping was poor in this maintenance area on the south side of the building. Rock filter beds are used on the SW corner of the facility to trap carbon black before it leaves to the flood control channel. These are changed once a year in April according to site personnel. They were very black in color. In the nearby storage area

some large old pipes had leaked oil onto the pavement. Grease and oil coated an exposed axle/pipe and rubber drippings coated some iron racks. One open drum was half full of oil with no secondary containmnet. On the other side of the building, one SD inlet was plugged and black water had ponded there. A sample was taken and a split given to WARCO. The water also had an oily sheen. Between 2 large buildings there was a series of at least 3 SD inlets and a mop bucket and other leaks were draining in this area. Art thought they drained to the sewer, and said he would try to verify this. It appeared to inspectors they were obviously SDs. A look in the chanel showed a discharge at the middle outlet form the facility.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-16-2002
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: General housekeeping has improved since last inspection. No unauthorized discharges were seen. There was a small spill of ZEP cleaner to be cleaned up. Another improvement is that there was less old equipment stored outdoors. A final determination is still to be made by Environ as to the connection of 3 storm drains in the center alley of the facility to the sanitary sewer of to the flood control channel. Art was very helpful and glad to see that the improvements were noted. He said new ownership is working hard to improve environmental compliance. A letter will be written to Art Ruben thanking him for improvements, encouraging them to continue, and requesting info on center drain's final destination.

Violation Date: 10-13-2018
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 11/26/2018. Failed to test overfill by Oct 2018. Corrected 11/26/18.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Shae Howell, HSE Specialist. The facility manufactures a variety of rubber products. The facility is a Small Quantity Generator of non-RCRA hazardous wastes generated from maintenance of machinery and equipment. Observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and municipal trash was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to showell@warco.com.

Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Shae Howell, safety, security, and environmental affairs manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included shop machine reservoirs and storage drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 1-29-13. The plan was on site and available for review. SPILL CONTROL: Secondary containment and spill response equipment was provided as

Eval Notes: On site for a routine hazardous waste inspection. Shae Howell, safety, security, and environmental affairs manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The facility's outside lot and dumpster area were walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were requested and provided for inspection. The records for the last year were reviewed. The storage of the facility's hazardous waste was inspected. We discussed the required information to be marked on containers storing hazardous waste. We discussed marking the designated area or bin holding various small closed containers of hazardous waste paint and such with the required identifying information. We discussed the marking of satellite hazardous waste storage containers with the required information. [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Type: Routine done by local agency
Eval Notes: On site to conduct the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Met with Vice President of Operations and engineering Brett Rabe of Mr. Crane. Consent was granted to enter and inspect the facility. The facility is regulated under the Aboveground Storage Tank Act (APSA). The facility contains over 10,000 gallons of regulated petroleum products. The SPCC was written and certified by a Professional Engineer on 2/11/2014. The next SPCC review is due before 2/11/19. Estimated total capacity of regulated petroleum oils is 17,819 gallons. All mobile containers, refuelers, and tanks less than 5,000 gallons are exempt from Tank Integrity Testing. The 6,014 gallon and 7,200 gallon diesel Aboveground Storage Tanks (ASTs) require an integrity test every 20 years. Both ASTs were installed in 2005. The 1st tank integrity test is due in July 2025. The entire facility, the mobile refuelers and the loading/unloading areas have general secondary [Truncated]

Eval Program: APSA
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 11-19-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Called Jaspers for SPCC update. SPCC is out to the PE. Set inspection for 12-10-13/0900.
Eval Division: Orange County Environmental Health
Eval Program: APSA
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 12-10-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site for the follow up SPCC inspection. Permission to inspect granted by Mr. Crane/Erik Jaspers. Most of the SPCC has been completed by Jaspers. It still needs the site maps, the PE review and management sign off. Jaspers is still awaiting the PE review. Gave Jaspers a final extension to 1-13-14/1000. Violations # AT48 and AT 18 are still outstanding and will be elevated to an administrative order (possible fines) if the SPCC is not ready for review by 1-13-14.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Address: 777 N MAIN ST
City,State,Zip: ORANGE, CA 92868
Site ID: 412571
CERS ID: 10712395
CERS Description: Chemical Storage Facilities

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-11-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Brent Loughran, president, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. The receipts for the removal of the facility's hazardous waste were on site and available for review. The records for the last year were reviewed. Proper accumulation time for waste storage was observed. A hazardous waste emergency response card was posted at the front counter.

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Description: 6.95, Section(s) 25508(a)(1)
Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 10/18/2016.

Violation Division: Orange City Fire Department

Violation Program: HMRRP

Violation Source: CERS

Site ID: 412323

Site Name: SO CAL ELITE TRAFFIC

Violation Date: 05-14-2018

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 05/14/2018. OBSERVATION: 55-gallon drum of Used Oil was found open when not adding or removing waste. CORRECTIVE ACTION: Close the hazardous waste drum when not actively adding or removing waste. This was corrected on site. No further action required.

Violation Division: Orange County Environmental Health

Violation Program: HW

Violation Source: CERS

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 05/16/2018. OBSERVATION: Used oil filters were missing the accumulation start date and have not been shipped in the last year. Facilities who generate used oil filters have a maximum accumulation time of one year. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA within 30 days.

Violation Description: Chapter 12, Section(s) 66262.34(f)
Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 05/14/2018. OBSERVATION: One 55-gallon metal drum of used oil filters was missing the accumulation start date. ONE 55-gallon metal drum of used oil did not have a hazardous waste label. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information. This was corrected onsite. No further corrective action required.

Eval Notes: On site to conduct a routine hazardous waste inspection. Met with owner Caesar Alvarez of Century Collision Center. Mr. Alvarez provided consent to enter and conduct this inspection. Hazardous waste observed included: - (1) 55-gallon drums of waste paint liquid; - (1) 55-gallon drum of waste paint thinner; - (3) 55-gallon drums of waste paint material; - (1) 30-gallon drum with used motor oil. The following violations were observed: - The container storing used oil was observed open and without a hazardous waste label (see violations 1400 below and 1617 below). - (3) drums located outside were observed without a start date on the hazardous waste label. These containers must be removed under manifest immediately. - A search in the Department of Toxic Substance and Controls (DTSC) Hazardous Waste Tracking System (HWTS) has indicated that this facility does not have an active EPA ID Number. Because you are generating hazardous waste, you must maintain a [Truncated]

Eval Notes: On site for a routine hazardous waste inspection. Gabriel Barreto, head mechanic, was present for the inspection. The inspection included a walk of the facility's outside parking and trash storage area. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the required information. The receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A hazardous waste emergency response card was posted. report PDF to gbarreto@ars.com

inspect. Gabriel Barreto, fleet mechanic, participated in the inspection. The facility's operations and the waste generated were discussed. I did not observe hazardous waste in the shop's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. The receipts for the removal of the facility's hazardous waste were available for inspection. Records were reviewed. A hazardous waste card was posted. Its facility emergency coordinator information was not current. A new card was provided for updating. report PDF to gbarreto@ars.com

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-30-2019

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Gabriel Barreto, Fleet Mechanic. The facility is a Small Quantity Generator of automotive repair wastes. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number, CAL000337220, is currently NOT active. Please complete DTSC form 1358 (attached with report) Permanent State ID Application to reactivate your number. Send the application to DTSC as provided in the form instructions. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to gbarreto@ars.com.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	0.15000
Year:	2019
Gepaid:	CAD051980365
TSD EPA ID:	NVT330010000
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	0.00250
Year:	2019
Gepaid:	CAD051980365
TSD EPA ID:	CAD097030993
CA Waste Code:	791 - Liquids with pH <= 2
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.83400
Year:	2019
Gepaid:	CAD051980365
TSD EPA ID:	CAD008364432
CA Waste Code:	792 - Liquids with pH <= 2 with metals
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	2.58540
Year:	2019
Gepaid:	CAD051980365
TSD EPA ID:	CAD008252405
CA Waste Code:	214 - Unspecified solvent mixture
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	1.40400
Year:	2019
Gepaid:	CAD051980365
TSD EPA ID:	AZT050010685
CA Waste Code:	726 - Liquids with nickel >= 134 Mg./L
Disposal Method:	H010 - Metals Recovery Including Retoring,Smelting,Chemicals,Ect
Tons:	2.08500
Year:	2019
Gepaid:	CAD051980365
TSD EPA ID:	TXD982560294

Site ID: 156968
Site Name: STATEK CORP
Violation Date: 07-17-2013
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 07/15/2015. This Agency has reviewed the facility's treatment tank and secondary containment system report dated July 2012. The report must contain the certification statement of 66270.11(d). However, the submitted report only provides the required statement for the "seismic analysis of this tank only". The report, not just one section, must be reviewed and certified in accordance with section 66270.11 (d). Please revise and submit a report copy to this office for our review.

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 08/10/2018. OBSERVATION: The facility does not have their RCRA training records. Personnel who handle hazardous waste shall be trained within six months of assignment and take part in an annual review of the initial training received. At a minimum, the training program shall be designed to ensure that facility personnel are able to respond effectively to emergencies by familiarizing them with emergency procedures, emergency equipment, and emergency systems, including where applicable: 1) procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment; 2) key parameters for automatic waste feed cut-off systems; 3) communications or alarm systems; 4) response to fires or explosions; 5) response to ground-water contamination incidents; and 6) shutdown of operations. The owner or operator shall maintain the following documents and records at the facility: 1) the job title for each position at the facility related to hazardous waste management, and [Truncated]

Eval Notes: On site for a routine conditionally authorized (CA) hazardous waste treatment tiered permitting inspection. Selwyn Lee, facilities manager, was present for the inspection and provided consent to inspect and take regulatory related photos if needed. The inspection included a tour of the treatment unit and the individual tank. The CA unit is a continuous flow system that treats acid rinse waters from the production clean rooms. The unit is a 3 tier cascade neutralizer. The rinse water enters the 1st tier and the pH is adjusted with anhydrous ammonia. The flow continues to the 2nd and 3rd tiers, where particles settle to bottom before the treated water flows to underground clarifier and discharged to the sewer. The sediments collected at the bottom of the cascading unit are pumped out once or twice a year, when the clarifier clean out occurs, and removed as non hazardous waste. The exterior of the unit was marked with the required information. The secondary containment [Truncated]

Eval Notes: This Agency received the facility's annual certification of financial assurance documents. The facility reported the operation of one conditionally authorized CA on site hazardous waste treatment unit. The CA unit was identified as AN-1. The unit's name was acid neutralizer. The unit was identified as having 3 tanks and 2 containers/treatment areas. The waste treated was identified as hydrofluoric acid, ammonium bifluoride etching solution. The treatment process was described as a 3-stage ammonia neutralizer. Treated waste water is discharged non hazardous to the sewer.

Eval Type: Routine done by local agency
Eval Notes: On-site for the annual CalARP inspection. Met with Selwyn Lee this date. This facility manufactures quartz crystal and oscillators. The anhydrous ammonia (regulated substance) is used in two processes: 1) Anhydrous ammonia goes through a disassociation process which spits the gas (NH3) into nitrogen and hydrogen. The hydrogen is used in the furnace and the nitrogen is released to the atmosphere. 2) Anhydrous ammonia is used to neutralize acid waste from the manufacturing process. The total amount of ammonia in the three chambered neutralization system cannot not be determined since the level is always fluctuating based on the amount of acid waste water being treated before discharge. The 400-gallon aqueous ammonia tank does not, according to Mr. Lee, contain more than 500 pounds of ammonia. The PHA was performed on 01/23/12. An updated action tracking log was obtained this date. The last of the six recommendations has been completed. The ammonia sensors (2) [Truncated]

Eval Notes: On site to conduct a routine Tiered Permitting Conditionally Authorized (CA) inspection. Met with Selwyn Lee, Facilities Manager. The facility conducts continuous treatment of acidic rinse waste waters generated from production clean rooms. The acid neutralizer unit, AN-1, is a three stage cascading neutralizer. Rinse waters entering the first stage are treated with anhydrous ammonia for pH adjustment. As the waters flows to the second and third stages, particles are allowed to settle to the bottom. Treated waters flows through the unit to an underground clarifier. Sediments at the bottom of the unit are pumped out throughout the year and managed as non-hazardous waste. Secondary containment was observed dry, and the treatment unit was labeled. Another acid neutralizing unit was observed inside of building two. Rinse bath waters from the production clean room are plumbed to a hold tank which is plumbed to a smaller batch tank and is treated solely pH adjustment. [Truncated]

Eval Date: 07-11-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine RCRA large quantity generator (LQG) hazardous waste generator inspection. Met with environmental manager Selwyn Lee of Statek Corp. Consent to enter and collect photos was granted by Selwyn Lee. The facility's operations and the waste generated were discussed. The storage of the facility's hazardous waste was inspected. Hazardous waste is stored in a designated hazardous waste storage area along with satellite accumulation storage locations throughout the work areas. All waste in the designated storage area had been removed on the previous day. The following were observed on this date: 1. Proper accumulation time for waste storage was observed. 2. Emptied drums were marked empty and dated. Many drums however, were marked empty and had a hazardous waste label (See violation I562 below). 3. Satellite drums and poly containers were located throughout the facility and in the control of the operator. All hazardous waste containers were [Truncated]

Eval Date: 07-11-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Tiered Permitting Conditionally Authorized (CA) inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. Met with Selwyn Lee, Facilities Manager. The facility conducts continuous treatment of acidic rinse waste waters generated from production clean rooms. The acid neutralizer unit, AN-1, is a three stage cascading neutralizer. Rinse waters entering the first stage are treated with anhydrous ammonia for pH adjustment. As the waters flows to the second and third stages, particles are allowed to settle to the bottom. Treated waters flows through the unit to an underground clarifier. Sediments at the bottom of the unit are pumped out throughout the year and managed as non-hazardous waste. Secondary containment was observed dry, and the treatment unit was labeled. Another acid neutralizing unit was observed inside of building two. Rinse bath waters from the production clean room are plumbed to a hold tank which is [Truncated]

Eval Notes: On site to conduct a routine RCRA Hazardous Waste Large Quantity Generator inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. Met with Selwyn Lee, Facilities Manager. The facility, comprised of two buildings, manufactures quartz-based oscillators and sensors. The process involves plating various metals including chrome and gold and chemically etching with acid to produce circuitry. A walkthrough of the facility was conducted and the following was observed. Building 1: Four clean rooms were observed where metal plating and etching occurs. Process bath waste waters are aspirated to 55 gallon poly drums where they are managed as hazardous waste and hauled offsite by a registered hazardous waste hauler. Rinse bath waste waters are plumbed via double-walled aboveground piping to an acid neutralizer unit outside of the building for pH adjustment. Two 3 gallon pales of waste oil were observed stored open and not properly labeled as hazardous [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-13-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine conditionally authorized (CA) hazardous waste treatment tiered permitting inspection. Selwyn Lee, facilities manager, was present for the inspection and provided consent to inspect. The inspection included a tour of the treatment unit. The CA unit is a continuous flow system that treats acid rinse waters from the production clean rooms. The unit is a 3 tier cascade neutralizer. The rinse water enters the 1st tier and the pH is adjusted with anhydrous ammonia. The flow continues to the 2nd and 3rd tiers, where particles settle to bottom before the treated water flows to underground clarifier and discharged to the sewer. The sediments collected at the bottom of the cascading unit are pumped out once or twice a year, when the clarifier clean out occurs, and removed as non hazardous waste. The exterior of the unit was marked with the required information. The secondary containment beneath the unit was dry.

Eval Notes: On site for a routine RCRA hazardous waste large quantity generator (LQG) inspection. Selwyn Lee, facilities manager, was present for the inspection and provided consent to inspect. The facility consists of two buildings (separate addresses) on one continuous property. The inspection included a walk of the buildings' outside and trash storage areas. I did not observe hazardous waste in the trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. Hazardous waste was stored in a designated hazardous waste storage area along with work area satellite locations. The storage containers were closed and labeled with the required information. We discussed the storage time allowed for satellite accumulation hazardous waste when transferred to the facility's designated hazardous waste storage area. Adequate aisle space was observed. The signed off manifests for the removal of the facility's hazardous waste were on site and available [Truncated]

Eval Notes: Wastestreams undergoing treatment operations consist of waste rinse waters from process baths. Waste analytical lab results dated 9/11/09 were obtained and reviewed. Results indicate sample ID H8 from the nickel etch was hazardous for pH. One sample was tested for regulated metals and appears to be non-hazardous. However the sample ID indicates this sample was taken from the acid neutralizer unit, AN1, rather than the point at which the hazardous waste was generated. Please note that analysis of wastes must be done at the point of generation rather than at a point where wastes are allowed to mix together. Analysis has not been conducted for waste rinse waters being consolidated in a holding tank prior to pH adjustment in building 2. Please have a representative sample taken from the point of generation, of each wastestream that is being treated for pH adjustment. Have the samples analyzed by a state certified laboratory for TTLC (Total Threshold Limit [Truncated])

Eval Notes: INSPECTOR COMMENTS: On-site for a CalARP Audit. Reviewed the RMP with Selwyn Lee this date. The next PHA is due in March 2017. Witnessed the "bump" testing of the two (2) Ammonia sensors. Both alarmed at 25 ppm, 35 ppm, and 75 ppm. Advised the facility to label the alarm box to identify which alarm is for the tank area and which is for the neutralizer area. The sensors are replaced every quarter with factory calibrated units. The facility performs the bump testing every six months. Witness the testing of the remote Emergency Shut Down. The remote shut down triggers two (2) "Snappy Joe's" on top of the ammonia tank. The system appeared functional this date. Discussed adding the testing of the ESO to the bi-ennial PM schedule.

Eval Notes: On site for a routine conditionally authorized (CA) hazardous waste treatment tiered permitting inspection. Selwyn Lee, facilities manager, was present for the inspection and provided consent to inspect and take regulatory related photos if needed. The inspection included a tour of the treatment unit and the individual tank. The CA unit is a continuous flow system that treats acid rinse waters from the production clean rooms. The unit is a 3 tier cascade neutralizer. The rinse water enters the 1st tier and the pH is adjusted with anhydrous ammonia. The flow continues to the 2nd and 3rd tiers, where particles settle to bottom before the treated water flows to underground clarifier and discharged to the sewer. The sediments collected at the bottom of the cascading unit are pumped out once or twice a year, when the clarifier clean out occurs, and removed as non hazardous waste. The exterior of the unit was marked with the required information. The secondary containment [Truncated]

Eval Date: 07-11-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Received the revised RMP via email on 06/16/2013. Reviewed the document this date. Abate violation C01 from the previous inspection report. The Executive Summary appears to be complete. Violation C06 is still outstanding. Please submit a signed certification page to this agency.

Eval Division: Orange County Environmental Health
Eval Program: CalARP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-11-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine Conditionally Authorized Hazardous Waste Treatment Tiered Permitting Inspection. Met with environmental manager Selwyn Lee of Statek Corp. Consent to enter and collect photos was granted by Selwyn Lee. The treatment system is a continuous flow system that treats acids coming from the production floor. The tank is made up of (3) tiers where pH is adjusted and precipitate can settle to the bottom. The system uses Ammonia to neutralize the acidic rinse waters. Treated water is discharged into the sewer. The tank was marked with the required information. The secondary containment is maintained on a daily basis. Documentation maintained on site and available for review included: G Treatment log book of volumes being treated, G Wastewater discharge permit #2-1-664, G Written log of weekly hazardous waste storage container inspections, G Written log of daily hazardous waste aboveground storage tanks, associated piping, and containment system [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine RCRA large quantity generator (LQG) hazardous waste generator inspection. Met with environmental manager Selwyn Lee of Statek Corp. Consent to enter and collect photos was granted by Selwyn Lee. The facility's operations and the waste generated were discussed. The storage of the facility's hazardous waste was inspected. Hazardous waste is stored in a designated hazardous waste storage area along with satellite accumulation storage locations throughout the work areas. All waste in the designated storage area had been removed on the previous day. The following were observed on this date: 1. Proper accumulation time for waste storage was observed. 2. Emptied drums were marked empty and dated. Many drums however, were marked empty and had a hazardous waste label (See violation I562 below). 3. Satellite drums and poly containers were located throughout the facility and in the control of the operator. All hazardous waste containers were [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Tiered Permitting Conditionally Authorized (CA) inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. Met with Selwyn Lee, Facilities Manager. The facility conducts continuous treatment of acidic rinse waste waters generated from production clean rooms. The acid neutralizer unit, AN-1, is a three stage cascading neutralizer. Rinse waters entering the first stage are treated with anhydrous ammonia for pH adjustment. As the waters flows to the second and third stages, particles are allowed to settle to the bottom. Treated waters flows through the unit to an underground clarifier. Sediments at the bottom of the unit are pumped out throughout the year and managed as non-hazardous waste. Secondary containment was observed dry, and the treatment unit was labeled. Another acid neutralizing unit was observed inside of building two. Rinse bath waters from the production clean room are plumbed to a hold tank which is [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine RCRA Hazardous Waste Large Quantity Generator inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. Met with Selwyn Lee, Facilities Manager. The facility, comprised of two buildings, manufactures quartz-based oscillators and sensors. The process involves plating various metals including chrome and gold and chemically etching with acid to produce circuitry. A walkthrough of the facility was conducted and the following was observed. Building 1: Four clean rooms were observed where metal plating and etching occurs. Process bath waste waters are aspirated to 55 gallon poly drums where they are managed as hazardous waste and hauled offsite by a registered hazardous waste hauler. Rinse bath waste waters are plumbed via double-walled aboveground piping to an acid neutralizer unit outside of the building for pH adjustment. Two 3 gallon pales of waste oil were observed stored open and not properly labeled as hazardous [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine conditionally authorized (CA) hazardous waste treatment tiered permitting inspection. Selwyn Lee, facilities manager, was present for the inspection and provided consent to inspect. The inspection included a tour of the treatment unit. The CA unit is a continuous flow system that treats acid rinse waters from the production clean rooms. The unit is a 3 tier cascade neutralizer. The rinse water enters the 1st tier and the pH is adjusted with anhydrous ammonia. The flow continues to the 2nd and 3rd tiers, where particles settle to bottom before the treated water flows to underground clarifier and discharged to the sewer. The sediments collected at the bottom of the cascading unit are pumped out once or twice a year, when the clarifier clean out occurs, and removed as non hazardous waste. The exterior of the unit was marked with the required information. The secondary containment beneath the unit was dry. Documentation maintained on site and [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine RCRA hazardous waste large quantity generator (LQG) inspection. Selwyn Lee, facilities manager, was present for the inspection and provided consent to inspect. The facility consists of two buildings (separate addresses) on one continuous property. The inspection included a walk of the buildings' outside and trash storage areas. I did not observe hazardous waste in the trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. Hazardous waste was stored in a designated hazardous waste storage area along with work area satellite locations. The storage containers were closed and labeled with the required information. We discussed the storage time allowed for satellite accumulation hazardous waste when transferred to the facility's designated hazardous waste storage area. Adequate aisle space was observed. The signed off manifests for the removal of the facility's hazardous waste were on site and available [Truncated]

Eval Notes: This Agency has reviewed the facility's hazardous waste generator compliance status. Violation (W009) was cited for correction during the 4-11-13 inspection. Today, the violation remains uncorrected. The violation: "A storage drum of photo resist, dated 1-2-13, was in the main hazardous waste storage area. The waste had exceeded its 90 day accumulation time. Please have the waste removed by a registered hauler for proper recycling / disposal. Once completed, please submit a copy of the removal record to this Agency." Correction of the violation is overdue. A copy of the removal record must be provided to this Agency immediately. Please contact Joyce Krall at jkrall@ochca.com or 714 640-9685, should you have any questions. report PDF to slee@statek.com

Eval General Type: Other/Unknown
Eval Date: 07-17-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Wastestreams undergoing treatment operations consist of waste rinse waters from process baths. Waste analytical lab results dated 9/11/09 were obtained and reviewed. Results indicate sample ID H8 from the nickel etch was hazardous for pH. One sample was tested for regulated metals and appears to be non-hazardous. However the sample ID indicates this sample was taken from the acid neutralizer unit, AN1, rather than the point at which the hazardous waste was generated. Please note that analysis of wastes must be done at the point of generation rather than at a point where wastes are allowed to mix together. Analysis has not been conducted for waste rinse waters being consolidated in a holding tank prior to pH adjustment in building 2. Please have a representative sample taken from the point of generation, of each wastestream that is being treated for pH adjustment. Have the samples analyzed by a state certified laboratory for TTLC (Total Threshold Limit [Truncated])

Eval Notes: Audit performed this date. Met with Selwyn Lee, Facilities Manager. Process: This facility manufactures quartz crystals, oscillators and sensors. Anhydrous Ammonia (regulated substance) is used in two processes: 1) Anhydrous Ammonia is dissociated. This splits the NH3 into free nitrogen and hydrogen. The hydrogen is used to fuel furnaces. The nitrogen is also used in the processes or vented. 2) Anhydrous ammonia is used to neutralize acidic waster from the manufacturing process. The executive summary has been reviewed during a previous inspection and appears to be complete. The Hazard Review which includes the worst case and alternate off-site consequence scenarios has been reviewed during a previous inspection and appears to be complete. The last revalidation was 4-11-12. The 5-year accident history was included in the last RMP dated 04/11/2012.No accidents or releases of anhydrous ammonia have been reported. The document management system was in the [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: Returned to compliance on 07/03/2019. All spill buckets was not tested due to the drain valve. Corrected 7/3/2019.

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/15/2014. Two 55 G metal drums storing unknown hazardous waste were on site. One drum, approximately 3/4 full of a solid waste, was unmarked. A second drum, also approximately 3/4 full, was labeled hazardous waste with no additional information. All containers storing hazardous waste must be marked with the required identifying information. Labels were provided for use.

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 12/06/2014. Approximately 45 gallons of hazardous liquid waste was stored in an open drum. This drum was located within an open business shared dumpster positioned along side an abandoned couch. A loose lid sat on the top of the drum holding the liquid waste. The dark liquid emitted a strong odor of gasoline and oil. Containers holding hazardous waste must be stored closed. Facility must be maintained to minimize the possibility of human exposure and / or a release to the environment. Correct immediately.

Eval Notes: Terry C informed me that an anonymous complaint was received on the hot line stating that he had called before and drums of hazardous waste remain stored in this site's dumpster enclosure. In follow up, I checked the state's HW tracking website, facility had not obtained an EPA ID number and corrected that violation to obtain an EPA ID #. Complainant's call indicates that the other violation (storage and waste accumulation) are also open. We have Asad Zaidi identified as the business owner at the big e. However, I looked into ownership ID while on site and posted information and the employees identified the business as Grand Gas, Inc. Asad Zaidi was identified as the president. EC Account information shows that the facility's fees have gone to collections. I checked on a Santa ana site also owned by this owner. The facility has violations in HW, HM and UST PE open. That facility is operating without a UST operating permit. Their PE fees are unpaid and have gone to [Truncated]

Eval Notes: On site to conduct a follow up hazardous waste inspection and respond to a complaint recieved regarding two abandoned drums on site. Complaint was logged in as a CO. I introduced myself to the on site representative for Big E, Judy the cashier. I stated the purpose of the re-inspection to confirm correction of the facility's hazardous waste violations. The violations remained uncorrected. I reviewed their on site UST docs and obtained copies of both the business owner / operator ID and the UST owner / UST operator agreement. I obtained photos of the two drums of hazardous waste which were located in the dumpster enclosure along with the one drum that Judy stated was the station's only hazardous waste, which was used absorbents and fuel. I asked the cashier how is water contaminated with fuel that may accumulate within the tank sumps and UDCs handled. She stated that when water is found within UDC and sumps, it is recovered by the UST DO and taken away (note: monthly DO [Truncated])

Thus, once again, I contacted Asad to discuss the abandoned drums and violations that remain open for this site. He answered his phone. He started the conversation out by informing me someone was pursuing the obtaining the EPA ID number for Big E so that the drums could be removed. Thus, I the discussion of drum ownership was not needed. I asked for a copy of his application. He was hazy about who was applying on his behalf and did not confirm for me that the application was submitted. I offered to send him the application for his use. He provided me his email address to use (manager@grand-gas.com). I asked him does Big-E handle the water contaminated with fuel when encountered within sumps and UDCs. He stated that his "gas company", which he identified as MCW, removes the fluids when they deliver his fuel. His answer did not make sense. However, I repeated the questions for confirmation. His answers were that his fuel service [Truncated]</p> <p>Orange County Environmental Health</p> <p>HW</p> <p>CERS</p> <p>Compliance Evaluation Inspection</p> <p>04-11-2019</p> <p>Yes</p> <p>Routine done by local agency</p> <p>field verification.</p> <p>Orange City Fire Department</p> <p>UST</p> <p>CERS</p> <p>Compliance Evaluation Inspection</p> <p>04-14-2020</p> <p>Yes</p> <p>Routine done by local agency</p> <p>field verification.</p>

Asad Zaidi, president, had informed me on 3-30-15 that he was in process of obtaining an EPA ID number for the removal of the hazardous waste. However, the 2 drums storing hazardous waste remained on site in the unlocked facility trash dumpster enclosure. One closed drum remained unmarked. The second closed drum remained only marked hazardous waste. Asad Zaidi was not present on site. Syed Rizzi, station attendant, and Adnan Khan, UST DO, were present on site. I asked the station attendant as to how are on site fuel spills responded to. I was advised that absorbents (kitty litter) was available for use on site. I asked how used fuel soaked absorbents were handled. I was advised that the used fuel soaked absorbents were added to the hazardous waste storage drums located within the dumpster enclosure. We discussed the EPA ID number [Truncated]

Met with Syad Rizvi, Cashier. Ownership of the business was verified as Grand Gas, Inc. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Three 55 gallon drums were observed closed but not properly labeled at this time. Within 30 days obtain hazardous waste labels and place them on the containers. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. The facility has not had hazardous waste hauled offsite in the past three years. Emergency plan is maintained on site. This inspection report was sent to manager@grand-gas.com and mailed to the facility. Orange County Environmental Health HW CERS

Eval Date: 10-15-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: received call from Thang, city of Orange fire. He identified two metal drums of liquid unknown with common trash stored on site. Photos provided. He stated that the facility on site rep told him that it was there waste but did not know what it was. Thang described a metal 55 gallon drum for solids storage which contained liquids, estimated at 3/4 full. I checked history. A21 was conducted 6-26-13. File could not be located in our office. History showed violations to be addressed. EC also consulted. EC showed a separate FA opened for the haz mat and the UST programs. RURs printed out for both FAs.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Eddie Abedi, cashier, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The business owner was identified as Grand Gas, Inc. Asad Zaidi was identified as the president. The storage of the shop's hazardous waste was inspected. The storage containers were stored closed.

Eval Notes:

On site to conduct a follow up hazardous waste inspection. I inspected the two drums storing hazardous waste which were located in the trash dumpster enclosure. The enclosure was open, easily accessed, and not secured. The drums remained unmarked with the required information for containers storing hazardous waste. I introduced myself to Gloria, Big E's cashier, and asked to talk to the owner. She informed me that he was not present but had received my inspection report. She was uncertain of the status of his response to correct the violations. I provided my card so that he may contact me if he should have any questions. I provided additional hazardous waste storage labels for their use on containers. I also stated that the unsecured drum of hazardous liquid waste needed to be secured immediately to prevent access by the public and / or a potential spill.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-24-2002
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: ON July 24, 2002 under clear and warm condition, Regional Board staff conducted a routine compliance inspection of the above referenced site. Staff met with Grounds Foreman, Ed Perales. Mr. Perales accompanied staff through the facility site walk. The site housed most of the maintenance, grounds, supplies and transportation activities for the City of Orange. Therefore all machine tooling, grounds keeping maintenance, bus washing and repair operations were conducted collectively at this site. All vehicle maintenance is conducted indoors. All machining and woodwork is also conducted indoors. Groundskeeping equipment was observed being rinsed off outside the maintenance repair area. Staff verbally ordering this activity to cease and desist. Perales prepared a memo and included it in the SWPPP to discontinue any washing activities that are not contained by a clarifier. A new wash and detailing area for the buses is being constructed. The memo also included that all groundskeeping equipment shall be rinsed on the respective sites at the end of the mowing activity in a grassy area.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-31-2011
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: hot and sunny. Contact was unable to produce the SWPPP. Site has two vehicle wash racks and a below grade ramp trench drain that Contact reports discharge to sewer. Rack near front entrance is built over a ribbon gutter; water in ribbon gutter looks like a discharge from the rack but is not per Contact. Water is from a leaking water truck. The below-grade ramp and trench drain is littered with wood debris; advised Contact to clean to prevent blockage of the drain. Contact asked nearby employee when the drain could be cleaned; response was end of school year. A sump-pump also drains a separate below-grade ramp where two roll-offs full of mixed recyclables are stored; ramp is littered with trash and leaf litter. Observed two partial 55-gal drums of soap stored outside uncovered/no secondary containment. Observed a hose that Contact reports is used to wash off lawn mowers; advised Contact to cease this use. Main yard is generally neat and orderly but smaller storage yard areas are generally cluttered and disorganized with leaf litter and trash accumulated among the items. Observed a newly-installed air compressor plumbed to discharge blow-down to the ground; advised Contact to plumb to containment.

Eval Notes: Contact was able to produce a SWPPP dated June 2011. SWPPP specifies "Keep containers under covers or tarps"; "Move containers inside covered areas without delay"; and describes "good housekeeping". When asked, Contact stated that yesterday's observed storage yards did not meet the District's standards of "good housekeeping". I explained additional violations based on the statements in the SWPPP: inadequate housekeeping and improper storage of soap drums. District's SWPPP preparer was in attendance and argued that vague qualifiers such as "as needed" and "as necessary" protected against the housekeeping violation. I explained that if such terms allowed such wide latitude in interpretation, the housekeeping BMP was meaningless and the SWPPP was inadequate as a means for them to evaluate their own performance.

Commercial Offsite Facility Types: Not reported
Quarterly Update: The facility is located at 1607 West Orange Grove in Orange. The facility obtained an Interim Status Document on January 4, 1982 for storage of plating shop hazardous waste, and operating a clarifier. Closure Plan was approved by DTSC on September 18, 1990, and the Closure Certification Report was approved on May 13, 1992. A RFA Questionnaire was submitted to DTSC on December 4, 1998. This facility has been transferred from Region 3 to Region 1 for conducting corrective action. It is on backlog for conducting an RFA.
