

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Grace Way Well Project

Lead Agency: Scotts Valley Water District

Contact Name: David McNair

Email: dmcnair@svwd.org Phone Number: (831) 600-1902

Project Location: Scotts Valley Santa Cruz  
*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The Scotts Valley Water District (SVWD) proposes to construct and operate one new groundwater extraction well on SVWD-owned property at 5297 Scotts Valley Drive, Scotts Valley, California. The well would be 1,000 feet deep into the Lompico and Butano aquifers of the Santa Margarita Groundwater Basin. The primary purpose of the Project is to provide redundancy and allow for increased extraction capacity to meet SVWD customer water demand as older wells reach the end of their useful life and are taken out of service, as well as strengthen the SVWD's ability to meet potential demand to deliver water to neighboring agencies under drought or emergency conditions in support of regional water supply planning efforts. Additionally, the Project would provide drought resiliency by enabling the SVWD to shift groundwater pumping away from areas where the greatest historical Lompico aquifer groundwater level declines have occurred in south Scotts Valley. The well would have a design capacity of 600 gallons per minute and could be operated continuously or for shorter intervals, depending on water demand.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biological Resources: MM BIO-1 (pre-activity surveys for nesting birds)

Cultural Resources and Tribal Cultural Resources: MM CUL-1 (discovery of unique archaeological resources, historical resources of an archaeological nature, and subsurface tribal cultural resources); MM CUL-2 (human remains)

Geology and Soils: MM GEO-1 (paleontological resources impact mitigation program and paleontological monitoring)

Hydrology and Water Quality: MM HYD-1 (implement stormwater control during construction)

Noise: MM NOI-1 (construction noise)

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None known.

Provide a list of the responsible or trustee agencies for the project.

None.
