Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.

Violation Notes: Plan does not address the redundant, but relevant tank overflow processes and procedures. Plan states "tanks have a fast response system for determining liquid level of each bulk storage with direct reading gauges and visual gauges..." and then references 112.7(a)(3)(iii). The plan does not provide the specifics of the "stick" procedure nor does it describe the high and highhigh overflow alarm system and actions.

 Eval Notes: Site was determined to no longer be eligible for the California Aboveground Petroleum Act. All eligible petroleum materials are stored in tanks managed within a DTSC permitted hazardous waste unit. In accordance with HSC 25270.2(a)(2), these tanks are exempt from the definition of "storage tank". This exclusion is ONLY applicable to the California APSA program, and has no bearing on the federal status of the site, which appears to require a SPCC be prepared and implemented in accordance with 40 CFR 112. Permit will be closed based on findings.

Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 03-12-2020  
 Violations Found: Yes  
 Eval Type: Routine done by local agency  
 Eval Notes: Facility accepts off site waste form various customers under a permit issued by DTSC. Permit effective date 2/10/2003. EPA ID CAD059494310. Facility generates waste from the incidental operation of the above noted facility including contaminated debris and PPE, analytical "fingerprint" samples from laboratory procedures, crushed drums that have been emptied of received contents, activated carbon from organic air emission controls, and potentially contaminated water from

**CLEAN HARBORS SAN JOSE (Continued)** 1000430269

"deadman" sumps in spill containment areas. Site is operated with each segregated hazard type managed in its own containment area. Within each area is also segregated PPE and water collection devices. Most PPE is bulked onsite in 40 yard containers used for bulking of contaminated items such as PPE, drums and packing materials. Site additionally operates a small "exempt transfer facility" area where wastes are offloaded for transfer but not opened, managed, bulked or otherwise managed. Onsite [Truncated]

Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 03-22-2017  
 Violations Found: Yes  
 Eval Type: Routine done by local agency  
 Eval Notes: Conducted a SPCC inspection. Facility is a permitted hazardous waste Treatment, Storage and Disposal Facility. Site does not have any "permanent" petroleum storage, but does manage, handle and process oils, petroleum fractions, and waters contaminated with petroleum fractions. Management of regulated materials/wastes takes place in containers from 55 to 275 gallons in size, tanker trucks (loading and offloading), and routinely in 6 tanks (Tank IDs 61-66, located in organic treatment and storage area - Area 11) Plan was originally developed in March 2004 (for CH) and has been recently revised in 9/2010, 8/2012 and 2/2017. Logs note routine evaluation and revision of plan at least every 5 years. Plan is located onsite, and is signed by both a PE and management. Plan references the Hazardous Waste Contingency Plan as the source of reporting information. Inspection forms for daily container and tank inspections are included in plan, and are being utilized. Training [Truncated]

 Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
 Violation Description: Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.  
 Violation Notes: Plan does not address the redundant, but relevant tank overflow processes and procedures. Plan states "tanks have a fast response system for determining liquid level of each bulk storage with direct reading gauges and visual gauges..." and then references 112.(a)(3)(iii). The plan does not provide the specifics of the "stick" procedure nor does it describe the high and high/low overflow alarm system and actions.

 Eval Notes: Site was determined to no longer be eligible for the California Aboveground Petroleum Act. All eligible petroleum materials are stored in tanks managed within a DTSC permitted hazardous waste unit. In accordance with HSC 25270.2(a)(2), these tank are exempt from the definition of "storage tank". This exclusion is ONLY applicable to the California APSA program, and has no bearing on the federal status of the site, which appears to require a SPCC be prepared and implemented in accordance with 40 CFR 112. Permit will be closed based on findings.

 Eval Notes: Conducted a SPCC inspection. Facility is a permitted hazardous waste Treatment, Storage and Disposal Facility. Site does not have any "permanent" petroleum storage, but does manage, handle and process oils, petroleum fractions, and waters contaminated with petroleum fractions. Management of regulated materials/wastes takes place in containers from 55 to 275 gallons in size, tanker trucks (loading and offloading), and routinely in 6 tanks (Tank IDs 61-66, located in organic treatment and storage area - Area 11) Plan was originally developed in March 2004 (for CH) and has been recently revised in 9/2010, 8/2012 and 2/2017. Logs note routine evaluation and revision of plan at least every 5 years. Plan is located onsite, and is signed by both a PE and management. Plan references the Hazardous Waste Contingency Plan as the source of reporting information. Inspection forms for daily container and tank inspections are included in plan, and are being utilized.  Eval Notes: Facility accepts off site waste form various customers under a permit issued by DTSC. Permit effective date 2/10/2003. Facility generates waste from teh incidental operation of the above noted facility including contaminated debris and PPE, analytical "Fingerprint" samples" from laboratory procedures, crushed drums that have been emptied of received contents, activated carbon from organic air emission controls, and paint related materials from the organization and acceptance of PaintCare materials. Noted that lab areas use 5 gallon just right can in a 55 gallon container to collect contaminated liquids. Facility generally packages onsite generated wastes with off site received wastes in permitted areas for off site disposal/processing. Permitted area 16, truck wash utilizes a dead sump to collect rinseate, which is then collected by a vacuum truck and processed onsite. Facility is acting as a PaintCare partner pursuant

 Eval Notes: Site was determined to no longer be eligible for the California Aboveground Petroleum Act. All eligible petroleum materials are stored in tanks managed within a DTSC permitted hazardous waste unit. In accordance with HSC 25270.2(a)(2), these tank are exempt from the definition of "storage tank". This exclusion is ONLY applicable to the California APSA program, and has no bearing on the federal status of the site, which appears to require a SPCC be prepared and implemented in accordance with 40 CFR 112. Permit will be closed based on findings.

Eval Notes: Conducted a SPCC inspection. Facility is a permitted hazardous waste Treatment, Storage and Disposal Facility. Site does not have any "permanent" petroleum storage, but does manage, handle and process oils, petroleum fractions, and waters contaminated with petroleum fractions. Management of regulated materials/wastes takes place in containers from 55 to 275 gallons in size, tanker trucks (loading and offloading), and routinely in 6 tanks (Tank IDs 61-66, located in organic treatment and storage area - Area 11) Plan was originally developed in March 2004 (for CH) and has been recently revised in 9/2010, 9/2012 and 2/2017. Logs note routine evaluation and revision of plan at least every 5 years. Plan is located onsite, and is signed by both a PE and management. Plan references the Hazardous Waste Contingency Plan as the source of reporting information. Inspection forms for daily container and tank inspections are included in plan, and are being utilized.  CERS ID: CAD059494310  
 CERS Description: Hazardous Waste

Violations:  
 Site ID: 20342  
 Site Name: CLEAN HARBORS SAN JOSE LLC  
 Violation Date: 02-24-2014  
 Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
 Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
 Violation Notes: Returned to compliance on 03/14/2014. During the 2/19 walk through the following containers were noted as being improperly or illegible marked/labeled: 5 gallon metal step can for debris without start date in the drum offload area; 20 gallon drum debris with illegible label in drum crushing area; step can of debris adjacent to Area 16 missing the start date and physical state; small bucket in corner of lab hood holding debris which was unlabeled.

**CLEAN HARBORS SAN JOSE (Continued)** 1000430269

Violation Description: 6.67, Section(s) 25270.4.5(a)  
 Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.  
 Violation Notes: Plan does not address the redundant, but relevant tank overflow processes and procedures. Plan states "tanks have a fast response system for determining liquid level of each bulk storage with direct reading gauges and visual gauges..." and then references 112.7(a)(3)(ii). The plan does not provide the specifics of the "stick" procedure nor does it describe the high and highhigh overflow alarm system and actions.

 Violation Date: 03-12-2020  
 Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple  
 Violation Description: RCRA Large Quantity Generator - Abandonment/Illegal Disposal/Unauthorized Treatment - General  
 Violation Notes: Returned to compliance on 04/13/2020. Site is rinsing 55 gallon poly containers in area 5 after they have been emptied of the wastes they originally contained. Observed drums onsite which had been rinsed, and which were to be used for the bulk of other wastes. Once rinsed, the rinsate is collected and managed onsite. Could not locate a description of this action as allowable within the 2003 DTSC-issued permit.

 Violation Date: 03-12-2020  
 Citation: HSC 6.5.25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)  
 Violation Description: Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.  
 Violation Notes: Returned to compliance on 04/13/2020. Step can holding contaminated debris and PPE in maintenance shop marked with start date of 12/9/2019.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: HWLQG  
 Violation Source: CERS

Site ID: 20342  
 Site Name: CLEAN HARBORS SAN JOSE LLC  
 Violation Date: 03-22-2017  
 Citation: HSC 6.67.25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
 Violation Description: Failure to adequately discuss in the SPCC Plan facility drainage or drainage controls such as secondary containment around containers and other structures, equipment, and procedures for the control of a discharge.  
 Violation Notes: Plan description for draining age controls does not match the procedures described by the facility for the control of rainwater or other potential discharges in that it does not address the management of rainwaters or drainage from interior portions of the plant nor does it discuss the procedures for review and release of water using valve systems. Plans says only "water is visually inspected for no sign of sheen prior to discharge to storm drains".  
 Violation Division: Santa Clara County Environmental Health

 Citation: 22 CCR 15.66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173  
 Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.  
 Violation Notes: Returned to compliance on 04/13/2020. Area 5: 2x55 gallon drums used to capture rinsate from drum cleaning in this area were open without waste being added or removed during the inspection. Receiving area: 55 gallon container holding used sampling rods not closed at the time of inspection.

Eval Notes:	Plan dated June 2009 (last review) with revisions Oct 2010 and June 2012. October 2010 revisions substantive, PE has re-certified as that date. NOTE: PLAN REVIEW IS DUE EVERY 5 YEARS, AND WITH LAST REVIEW COMPLETED IN JUNE 2009, PLAN MUST BE GIVEN FULL REVIEW BY JUNE 2014 -At time of next review, please update County's phone number to 918-3400 instead of 913-3400 currently listed in plan. -At time of next review, please include signage and wheel chocking procedures for loading and unloading areas as an attachment to plan -Strongly recommend that there is a written procedure and or recorded record for the review and release of "non-process area" rainwater to stormdrain.

Eval Notes:	Facility accepts off site waste form various customers under a permit issued by DTSC. Permit effective date 2/10/2003. Facility generates waste from teh incidental operation of the above noted facility including contaminated debris and PPE, analytical "Fingerprint" samples" from laboratory procedures, crushed drums that have been emptied of received contents, activated carbon from organic air emission controls, and paint related materials from the organization and acceptance of PaintCare materials. Noted that lab areas use 5 gallon just right can in a 55 gallon container to collect contaminated liquids. Facility generally packages onsite generated wastes with off site received wastes in permitted areas for off site disposal/processing. Permitted area 16, truck wash utilizes a dead sump to collect rinseate, which is then collected by a vacuum truck and processed onsite. Facility is acting as a PaintCare partner pursuant to HSC 25217.2(a)(5) and (a)(6). Labels on [Truncated] Santa Clara County Environmental Health

Eval Notes:	Site was determined to no longer be eligible for the California Aboveground Petroleum Act. All eligible petroleum materials are stored in tanks managed within a DTSC permitted hazardous waste unit. In accordance with HSC 25270.2(a)(2), these tank are exempt from the definition of "storage tank". This exclusion is ONLY applicable to the California APSA program, and has no bearing on the federal status of the site, which appears to require a SPCC be prepared and implemented in accordance with 40 CFR 112. Permit will be closed based on findings.

 Eval Notes: Facility accepts off site waste form various customers under a permit  
 issued by DTSC. Permit effective date 2/10/2003. EPA ID CAD059494310.  
 Facility generates waste from the incidental operation of the above  
 noted facility including contaminated debris and PPE, analytical  
 "fingerprint" samples from laboratory procedures, crushed drums that  
 have been emptied of received contents, activated carbon from organic  
 air emission controls, and potentially contaminated water from  
 "deadman" sumps in spill containment areas. Site is operated with each  
 segregated hazard type managed in its own containment area. Within  
 each area is also segregated PPE and water collection devices. Most  
 PPE is bulked onsite in 40 yard containers used for bulking of  
 contaminated items such as PPE, drums and packing materials. Site  
 additionally operates a small "exempt transfer facility" area where  
 wastes are offloaded for transfer but not opened, managed, bulked or  
 otherwise managed. Onsite [truncated]

 Eval Notes: Conducted a SPCC inspection. Facility is a permitted hazardous waste  
 Treatment, Storage and Disposal Facility. Site does not have any  
 "permanent" petroleum storage, but does manage, handle and process  
 oils, petroleum fractions, and waters contaminated with petroleum  
 fractions. Management of regulated materials/wastes takes place in  
 containers from 55 to 275 gallons in size, tanker trucks (loading and  
 offloading), and routinely in 6 tanks (Tank IDs 61-66, located in  
 organic treatment and storage area - Area 11) Plan was originally  
 developed in March 2004 (for CH) and has been recently revised in  
 9/2010, 8/2012 and 2/2017. Logs note routine evaluation and revision  
 of plan at least every 5 years. Plan is located onsite, and is signed  
 by both a PE and management. Plan references the Hazardous Waste  
 Contingency Plan as the source of reporting information. Inspection  
 forms for daily container and tank inspections are included in plan,  
 and are being utilized. Training [truncated]

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.

Violation Notes: Plan does not address the redundant, but relevant tank overflow processes and procedures. Plan states "tanks have a fast response system for determining liquid level of each bulk storage with direct reading gauges and visual gauges..." and then references 112.7(a)(3)(ii). The plan does not provide the specifics of the "stick" procedure nor does it describe the high and highhigh overfill alarm system and actions.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to adequately discuss in the SPCC Plan facility drainage or drainage controls such as secondary containment around containers and other structures, equipment, and procedures for the control of a discharge.

Violation Notes: Plan description for draining age controls does not match the procedures described by the facility for the control of rainwater or other potential discharges in that it does not address the management of rainwaters or drainage from interior portions of the plant nor does it discuss the procedures for review and release of water using valve systems. Plans says only "water is visually inspected for no sign of sheen prior to discharge to storm drains".

 Eval Notes: Site was determined to no longer be eligible for the California Aboveground Petroleum Act. All eligible petroleum materials are stored in tanks managed within a DTSC permitted hazardous waste unit. In accordance with HSC 25270.2(a)(2), these tank are exempt from the definition of "storage tank". This exclusion is ONLY applicable to the California APSA program, and has no bearing on the federal status of the site, which appears to require a SPCC be prepared and implemented in accordance with 40 CFR 112. Permit will be closed based on findings.

Eval Notes: Facility accepts off site waste from various customers under a permit issued by DTSC. Permit effective date 2/10/2003. EPA ID CAD059494310. Facility generates waste from the incidental operation of the above noted facility including contaminated debris and PPE, analytical "Fingerprint" samples" from laboratory procedures, crushed drums that have been emptied of received contents, activated carbon from organic air emission controls, and potentially contaminated water from "deadman" sumps in spill containment areas. Site is operated with each segregated hazard type managed in its own containment area. Within each area is also segregated PPE and water collection devices. Most PPE is bulked onsite in 40 yard containers used for bulking of contaminated items such as PPE, drums and packing materials. Site additionally operates a small "except transfer" facility area where wastes are offloaded for transfer but not opened, managed, bulked or otherwise managed. Onsite [Truncated]

 Eval Notes: Conducted a SPCC inspection. Facility is a permitted hazardous waste Treatment, Storage and Disposal Facility. Site does not have any "permanent" petroleum storage, but does manage, handle and process oils, petroleum fractions, and waters contaminated with petroleum fractions. Management of regulated materials/wastes takes place in containers from 55 to 275 gallons in size, tanker trucks (loading and offloading), and routinely in 6 tanks (Tank IDs 61-66, located in organic treatment and storage area - Area 11) Plan was originally developed in March 2004 (for CH) and has been recently revised in 9/2010, 8/2012 and 2/2017. Logs note routine evaluation and revision of plan at least every 5 years. Plan is located onsite, and is signed by both a PE and management. Plan references the Hazardous Waste Contingency Plan as the source of reporting information. Inspection forms for daily container and tank inspections are included in plan, and are being utilized.  Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWO will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Project Revenue Source Addr: Not reported  
 Project Revenue Source City,St,Zip: Not reported  
 Project Revenue Source Desc: DHS will be issuing a RAO or entering into an enforceable agreement with the RPs. DHS has budgeted \$50,000 for oversight/monitoring of cleanup activities. DHS will recover 100 percent of its direct costs plus staff costs and overhead related to the project. The RPs will pay all costs associated with remedial investigations and cleanup activities.

**Site Description:**

A solvent recycler has operated at this site since about 1972. Extensive contamination of soil, shallow ground water and potential deep aquifer contamination exist due to releases of spend solvents and other chemicals. This site was formerly known as Berryessa Road, San Jose.

**Hazardous Waste Desc:**

Volatile organic compounds are the primary contaminants of concern. A "petroleum channel" has been discovered on one corner of the property where offsite contamination has been discovered.

**Threat To Public Health & Env:**

Ground water contamination and its potential effect on drinking water supplies is the primary threat to public health. Approximately 22 wells are registered with Santa Clara Valley Water District within a one-half mile radius of the site. Three domestic wells are perforated in zones likely to be affected by onsite contamination. However, that aquifer has recently been demonstrated to be uncontaminated.

**Site Activity Status:**

Remedial investigations and interim measures have been occurring at the site since 1983. The RP has prepared a "screening" FS and implemented a steam injection/vapor extraction pilot study for soil heavily contaminated with solvents. Low temperature thermal stripping pilot test apparatus and a ground water treatment system using air stripping, carbon filtration and biotreatment are being constructed. The plume of ground water contamination has been essentially contained and the extent of soil contamination delineated. After evaluation of pilot tests, a FS will be prepared and a RAP developed and implemented.

 Citation: HSC 6.67. Multiple Sections - California Health and Safety Code, Chapter 6.67, Section(s) Multiple Sections RCRA Large Quantity Generator Program - Operations/Maintenance - General

Violation Description: Returned to compliance on 03/14/2014. Two 55 gallon drums of AFFF which had been emptied into a new fire suppression tank in area 14 were not marked with the date emptied.

Violation Division: Santa Clara County Environmental Health  
 Violation Program: HWLQG  
 Violation Source: CERS

Site ID: 20342  
 Site Name: CLEAN HARBORS SAN JOSE LLC  
 Violation Date: 03-12-2020  
 Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 04/13/2020. Area 5: 2x55 gallon drums used to capture rinsate from drum cleaning in this area were open without waste being added or removed during the inspection. Receiving area: 55 gallon container holding used sampling rods not closed at the time of inspection.

 Violation Date: 02-24-2014  
 Citation: HSC 6.95. Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple

Violation Description: Business Plan Program - Administration/Documentation - General

Violation Notes: Returned to compliance on 03/14/2014. The CERS submitted inventory is deficient in that it does not address at least the following chemicals stored at the site: Pallets of calcium hydroxide (lime) and sodium sulfide in the maintenance area, the quantities of oxygen and nitrogen were reported as being stored in 10,594 cubic foot cylinders (noted 1800 f3 of oxygen in cylinders of up to 330 f3 and 1000 f3 of nitrogen in cylinders of up to 330 f3), acetylene reported as 40f3 noted as 4x125 f3; 400 gallons of AFFF in 4x200 gal tanks; rack of propane holding 16 x 8 gal cylinders; 4x55 gallon containers sodium hydroxide (plus 30 gal diluted) in the caustic bay; 325 gallon tote of sodium hydroxide in caustic bay; 3x55 gallon containers of flocculant

Eval Notes:	Facility accepts off site waste form various customers under a permit issued by DTSC. Permit effective date 2/10/2003. Facility generates waste from teh incidental operation of the above noted facility including contaminated debris and PPE, analytical "Fingerprint" samples" from laboratory procedures, crushed drums that have been emptied of received contents, activated carbon from organic air emission controls, and paint related materials from the organization and acceptance of PaintCare materials. Noted that lab areas use 5 gallon just right can in a 55 gallon container to collect contaminated liquids. Facility generally packages onsite generated wastes with off site received wastes in permitted areas for off site disposal/processing. Permitted area 16, truck wash utilizes a dead sump to collect rinseate, which is then collected by a vacuum truck and

Eval Notes:	Site was determined to no longer be eligible for the California Aboveground Petroleum Act. All eligible petroleum materials are stored in tanks managed within a DTSC permitted hazardous waste unit. In accordance with HSC 25270.2(a)(2), these tank are exempt from the definition of "storage tank". This exclusion is ONLY applicable to the California APSA program, and has no bearing on the federal status of the site, which appears to require a SPCC be prepared and implemented in accordance with 40 CFR 112. Permit will be closed based on findings.

 Eval Notes: Concluded a SPCC inspection. Facility is a permitted hazardous waste Treatment, Storage and Disposal Facility. Site does not have any "permanent" petroleum storage, but does manage, handle and process oils, petroleum fractions, and waters contaminated with petroleum fractions. Management of regulated materials/wastes takes place in containers from 55 to 275 gallons in size, tanker trucks (loading and offloading), and routinely in 6 tanks (Tank IDs 61-66, located in organic treatment and storage area - Area 11) Plan was originally developed in March 2004 (for CH) and has been recently revised in 9/2010, 8/2012 and 2/2017. Logs note routine evaluation and revision of plan at least every 5 years. Plan is located onsite, and is signed by both a PE and management. Plan references the Hazardous Waste Contingency Plan as the source of reporting information. Inspection forms for daily container and tank inspections are included in plan, and are being utilized.  City/State/Zip: SAN JOSE, CA 95133  
 Site ID: 20342  
 CERS ID: 10093096  
 CERS Description: Underground Storage Tank

Violations:  
 Site ID: 20342  
 Site Name: CLEAN HARBORS SAN JOSE LLC  
 Violation Date: 02-24-2014  
 Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
 Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
 Violation Notes: Returned to compliance on 03/14/2014. During the 2/19 walk through the following containers were noted as being improperly or illegible marked/labelled: 5 gallon metal step can for debris without start date in the drum offload area; 20 gallon drum debris with illegible label in drum crushing area; step can of debris adjacent to Area 16 missing the start date and physical state; small bucket in corner of lab hood holding debris which was unlabeled.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
 Violation Description: Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.  
 Violation Notes: Plan does not address the redundant, but relevant tank overflow processes and procedures. Plan states "tanks have a fast response system for determining liquid level of each bulk storage with direct reading gauges and visual gauges..." and then references 112.7(a)(3)(iii). The plan does not provide the specifics of the "stick" procedure nor does it describe the high and high/high overflow alarm system and actions.

Eval Notes:	Facility accepts off site waste form various customers under a permit issued by DTSC. Permit effective date 2/10/2003. Facility generates waste from teh incidental operation of the above noted facility including contaminated debris and PPE, analytical "fingerprint" samples" from laboratory procedures, crushed drums that have been emptied of received contents, activated carbon from organic air emission controls, and paint related materials from the organization and acceptance of PaintCare materials. Noted that lab areas use 5 gallon just right can in a 55 gallon container to collect contaminated liquids. Facility generally packages onsite generated wastes with off site received wastes in permitted areas for off site disposal/processing. Permitted area 16, truck wash utilizes a dead sump to collect rinseate, which is then collected by a vacuum truck and processed onsite. Facility is acting as a PaintCare partner pursuant to HSC 25217.2(a)(5) and (a)(6). Labels on [Truncated]

Eval Date: 03-12-2020  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: Site was determined to no longer be eligible for the California Aboveground Petroleum Act. All eligible petroleum materials are stored in tanks managed within a DTSC permitted hazardous waste unit. In accordance with HSC 25270.2(a)(2), these tank are exempt from the definition of "storage tank". This exclusion is ONLY applicable to the California APSA program, and has no bearing on the federal status of the site, which appears to require a SPCB be prepared and implemented in accordance with 40 CFR 112. Permit will be closed based on findings.

Eval Notes: Facility accepts off site waste form various customers under a permit issued by DTSC. Permit effective date 2/10/2003. EPA ID CAD059494310. Facility generates waste from the incidental operation of the above noted facility including contaminated debris and PPE, analytical "Fingerprint" samples from laboratory procedures, crushed drums that have been emptied of received contents, activated carbon from organic air emission controls, and potentially contaminated water from "deadman" sumps in spill containment areas. Site is operated with each segregated hazard type managed in its own containment area. Within each area is also segregated PPE and water collection devices. Most PPE is bulked onsite in 40 yard containers used for bulking of contaminated items such as PPE, drums and packing materials. Site additionally operates a small "exempt transfer facility" area where wastes are offloaded for transfer but not opened, managed, bulked or otherwise managed. Onsite [Truncated]

Eval Notes: Conducted a SPCB inspection. Facility is a permitted hazardous waste Treatment, Storage and Disposal Facility. Site does not have any "permanent" petroleum storage, but does manage, handle and process oils, petroleum fractions, and waters contaminated with petroleum fractions. Management of regulated materials/wastes takes place in containers from 55 to 275 gallons in size, tanker trucks (loading and offloading), and routinely in 6 tanks (Tank IDs 61-66, located in organic treatment and storage area - Area 11) Plan was originally developed in March 2004 (for CH) and has been recently revised in 9/2010, 8/2012 and 2/2017. Logs note routine evaluation and revision of plan at least every 5 years. Plan is located onsite, and is signed by both a PE and management. Plan references the Hazardous Waste Contingency Plan as the source of reporting information. Inspection forms for daily container and tank inspections are included in plan, and are being utilized. Training [Truncated]

 CERS Description: Chemical Storage Facilities

Violations:  
 Site ID: 392750  
 Site Name: FLEA MARKET, THE  
 Violation Date: 06-10-2020  
 Citation: HSC 6.5.25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)  
 Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
 Violation Notes: Returned to compliance on 07/29/2020. The black 55 gallon drum with a solid waste lid and a clear label identifying the material as UN1325, Flammable, "Rags Containing Petroleum Naphtha & Ink", had a Accumulation Start Date of 4/1/2019. This is more than one year.

 Citation: 23 CCR 16 2638(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638(f)(1)  
 Violation Description: Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.  
 Violation Notes: Returned to compliance on 06/11/2015.

MARKET PARK BLOCKS 9 & 10 (Continued) S102808740

The float and chains did not trip the shear valve when initially tested with water. The floats were unstuck and operated properly. No further corrective actions required.

Violation Division: Santa Clara County Environmental Health  
 Violation Program: UST  
 Violation Source: CERS

Site ID: 392750  
 Site Name: FLEA MARKET, THE  
 Violation Date: 06-06-2018  
 Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665  
 Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.  
 Violation Notes: Returned to compliance on 06/06/2018. Spill bucket for the 87 gallon tank was hydrostatically tested for 1 hour and upon measurement dropped approximately 1/2 inch. Technician to determine cause of failure.

Evaluation:  
 Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 06-17-2014  
 Violations Found: Yes  
 Eval Type: Routine done by local agency  
 Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Eddie Martinez of Advanced Fuel Services. Site consists of two 4000 gallon tanks (regular gasoline and diesel) in a shared secondary containment and one dispenser pair. The annular space and sumps are monitored by a Gilbarco EMC panel and Gilbarco sensors. The UDCs are monitored by Bravo B-2000 float and chain assemblies. The Gilbarco sensors (annular- PA0259114400, sump- PA0259200010) were tested in water and provided audible and visible alarms. The sump sensors also provided positive shutdown of the turbines. Sensor out and power out (Fail Safe) shut down both turbines. Both turbines have VMI 99 LD 2000 leak detectors installed and both detected a 3.0 gph leak at 10 psi and held slow flow. Slow flow was also demonstrated at the nozzle. The Bravo float and chains were tested with water and functioned properly. Overfill protection is provided in all tanks by a [Truncated]

Eval Notes: Facility last submitted a complete hazardous materials business plan (HMBP) on 6-11-15. RESUBMIT BY 6-11-15. Facility has documented training for employees regarding emergency response and action plan. As of 1-1-2015, per 25506(a)(4), employees must receive specific HMBP training. The HMBP must contain "Training for all new employees and annual training, including refresher courses, for all employees in safety procedures in the event of a release or threatened release of a hazardous material, including, but not limited to, familiarity with the plans and procedures specified in paragraph (3). These training programs may take into consideration the position of each employee. This training shall be documented electronically or by hard copy and shall be made available for a minimum of three years." Note: Observed 19 reportable chemicals on-site and also reported on CERS. Permit will be modified to BP05 (16-21 reportable chemicals).

 Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Eddie Martinez (certifications current) of Advanced Fuel Services. Site consists of two 4000 gallon tanks (regular gasoline and diesel) in a shared secondary containment and one dispenser pair. The annular space and sumps are monitored by a Gilbarco EMC panel and sensors. The UDCs are monitored by Bravo B-2000 float and chain assemblies. The sensors were tested in water and provided audible and visible alarms. The sump sensors also provided positive shutdown of the turbines. Sensor out and power out (Fail Safe) shut down both turbines. Both turbines have VMI 99 LD 2000 leak detectors installed and both detected a 3.0 gph leak at 10 psi and held slow flow. Slow flow was also demonstrated at the nozzle. The Bravo float and chains were tested with water and functioned properly. Overflow protection is provided in all tanks by a flapper valve in the fill riser. The spill [Truncated]

 Environmental Interest/Information System:  
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:  
 Site ID: 440194  
 Site Name: Advanced Chemical Transport, Inc. DBA Actenviro  
 Violation Date: 01-12-2015  
 Citation: 22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)

Violation Description: Failure to maintain, reproduce, and provide the following documents at the facility where the FTU is operating: 1) The waste analysis plan for the treatment operation; 2) The written inspection schedule; 3) All training documents; 4) The contingency plan; 5) A copy of the most recent treatment notification and a copy of the most recent acknowledgement received from the Department, CUPA or authorized agency; 6) A copy of any local Air District permit and other permits required for the operation of the FTU; 7) A copy of the closure plan; 8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the operation of the facility within the last three years, as the documents would be available under the California Public Records Act. Returned to compliance on 04/03/2015. Facility does not have a closure plan for the Vylester unit. THIS IS A REPEAT CLASS II VIOLATION FROM THE 2012 INSPECTION.

Violation Notes: Santa Clara County Environmental Health

Violation Division: Santa Clara County Environmental Health  
 Violation Program: PBR  
 Violation Source: CERS

Site ID: 440194  
 Site Name: Advanced Chemical Transport, Inc. DBA Actenviro  
 Violation Date: 01-12-2015  
 Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 04/03/2015. Containers of wright's stain from the Hematology lab are marked "empty weekly" while accumulating waste in lab. Once moved to the outside waste storage area, containers are not re-marked with a accumulation start date. Additionally, a 1 gallon bottle of expired Gram's iodine was bagged and in the waste staging area without being labeled/marked.

 Citation: 22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22,

**ADVANCED CHEMICAL TRANSPORT, INC. DBA ACTENVIRO (Continued)** **S10094715**

Violation Description: Chapter 45, Section(s) 67450.2(c)(10)  
 Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment, (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.

Violation Notes: Returned to compliance on 04/03/2015. Facility failed to submit annual treatment notification of a PBR unit in 2013, 2014. IGNORE THE CORRECTIVE ACTION TEXT BELOW AND SUBMIT A TREATMENT NOTIFICATION INFORMATION USING THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) WITHIN THE NEXT 30 DAYS.

Site Name: Advanced Chemical Transport, Inc. DBA ACTenviro

Violation Date: 01-12-2015

Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple

Violation Description: Tiered Permitting Program - Administration/Documentation - General

Violation Notes: Returned to compliance on 04/03/2015. Facility failed to annually adjust its closure cost estimate in 2012, 2013 and 2014. Please adjust and resubmit your closure cost estimate noting inflation of the 2011 closure valuation of \$7.626. Adjustment factors for 2012, 2013, and

**ADVANCED CHEMICAL TRANSPORT, INC. DBA ACTENVIRO (Continued)** **S10094715**

2014 are 1.022, 1.016 and 1.014, respectfully. Please also note that the 2011 closure, line H notes agency notification costs of \$1,200. The cost of a closure permit from HMCDO is \$2598.00.

Violation Date: 01-12-2015

Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)

Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 04/03/2015. HMBP has not been updated since 2011. Law now requires all HMBP information to be submitted using California Electronic Reporting System (CERS).

Violation Division: Santa Clara County Environmental Health

Violation Program: HMRPP

Violation Source: CERS

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 01-12-2015

Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: Facility generates waste from outfall of analytical machines, staining sink, permitted treatment unit and from excess material (expired) disposal. Surface cleaning is done using Virox, wipes potentially contaminated and managed as biohazardous waste. Kit reagents were noted as being co-mingled in a single 5 gallon container in Microbiology. No incompatible wastes noted on day of inspection, but strongly recommend inventorying kits to ensure that potential incompatible kit reagents are not placed in the same bucket. Waste storage area located in shed outside main building. Waste accumulation area shed has spill and emergency response materials available, including eyewash bottles, absorbent, extinguisher, and acid neutralization kit. --Emergency information posted in this area notes Dan Larson as second emergency coordinator. Mr. Larson is no longer in the employ of Quest Diagnostics, Inc. Facility has a waste minimization plan, combined with activities of [Truncated]

Eval Program: HMRPP

**ADVANCED CHEMICAL TRANSPORT, INC. DBA ACTENVIRO (Continued)** **S10094715**

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection

Eval Date: 01-12-2015

Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: Treatment limited to Vylester container shredder. Vials treated by system contain RCRA Regulated waste (methanol/water mixture) but are not RCRA empty. Treatment conducted for waste minimization while maintaining worker safety from reduced exposure. Unit is located within secondary containment unit. Outfall container used to capture liquid released from shredded vials is within a secondary containment unit within the unit's containment. Shredded plastic vials resulting from the treatment are not F003 listed wastes because the vials contain a mixture of methanol and water (loaded as a mixture for preservation of samples). Per EPA Guidance RCRA Online documents 11249 and 13041, F003 solvents in mixtures containing other constituents prior to use do not carry the F003 listing but are subject to determination using hazardous waste characteristic criteria. The liquid waste from the machine should carry the D001 waste code (see above)

 Violations Found: No  
 Eval Type: Routine done by local agency  
 Eval Notes: This inspection was completed on 7/23/14. See eDocs.  
 Eval Division: Santa Clara County Environmental Health  
 Eval Program: HMRPP  
 Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 07-23-2014  
 Violations Found: Yes  
 Eval Type: Routine done by local agency  
 Eval Notes: Facility is subject to the hazardous materials business plan program (HMBP) and has not yet established a HMBP. The following chemicals above reporting thresholds were noted onsite today: 1. Cutting Coolant - 220 gallons 2. Waste Coolant - 55 gallons 3. Waste Oil - 55 gallons 4. Mixed Air with Carbon Dioxide - 1200 cu. ft. + 5. Argon gas - 1000 cu. ft. + 6. Argon/Carbon Dioxide Mixed Gas - 1200 cu. ft. + 7. Helium Gas - 1000 cu. ft. + 8. Oxygen Gas - 200 cu. ft. + 9. Propane - 8 x 8 gallon cylinders Please go to <http://cers.caepa.ca.gov> the California Environmental Reporting System (CERS) and use CERS ID#10343929 to access your account, create user account, obtain access, then enter and submit all your facility, inventory, map, emergency and training plan information. See Handout provided, getting started on CERS. Questions or to get assistance from a CERS specialist, please contact Jeffrey M. Hgbee at 408-918-4785.

JOHNSTONE SUPPLY (Continued) S113883210

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.  
 Violation Notes: Facility is conducting annual HMBP-related training of employees via a computer-based education program, but was unable to provide verification that employees have completed this training annually for at least the last 3 years. Additionally, the location of the HMBP and it's use should be included as part of the required annual training. A copy of the employee training template was provided to the facility during the inspection as a resource.

 Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
 Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.  
 Violation Notes: Facility incorrectly listed multiple refrigerants as having the "largest container" at 3 or 4 cubic feet. These products are under pressure and have a high gas expansion ratio, which differs between around 60 cubic feet to over 130 cubic feet. Verify with the product manufacturer or the Safety Data Sheet to determine each product's cubic foot amount per individual container. "Storage pressure" for R409 was listed as "ambient". It is a compressed gas and should be listed as "above ambient". Facility failed to include propane, oxygen and acetylene in the inventory disclosure. Since 2018, facilities must disclose an expanded Federal Hazard Category information. Update all hazardous inventory items to include this state requirement.

 CERS Description: Chemical Storage Facilities

Violations:  
 Site ID: 395567  
 Site Name: JOHNSON MATTHEY  
 Violation Date: 10-24-2014  
 Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11  
 Violation Description: Failure to determine if the waste generated is a hazardous waste.  
 Violation Notes: Returned to compliance on 11/21/2014. The grinding dust from tube and sheet metal production areas is being added to the shop debris hazardous waste drum. It was noted that the shop debris hazardous waste drum is only being manifested for Non-RCRA waste code 352 "Other Organic Solids." The grinding dust waste has not received a proper hazardous waste determination prior to disposal with the shop debris.

 Citation: 22 CCR 15 66262.41 - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
 Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.  
 Violation Notes: Returned to compliance on 12/06/2017. Emergency response and training plans were not submitted with the inventory on 2/28/17 as part of the annual submittal.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: HMRPP  
 Violation Source: CERS

Site ID: 395567  
 Site Name: JOHNSON MATTHEY  
 Violation Date: 11-06-2017  
 Citation: 22 CCR 15 66262.41 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66262.41  
 Violation Description: Failure of a large quantity RCRA generator to prepare the Biennial report (Form 8700), and submit to DTSC by March 1st on even numbered years; and maintain it onsite for three years.  
 Violation Notes: Returned to compliance on 12/06/2017. The Biennial report filed in 2016 is incomplete in that it does not list the codes for all RCRA wastes generated, only those shipped. Waste treated onsite need to be accounted for in the reporting. Additionally, the waste codes for all state wastes generated need to be included not just those associated with the RCRA waste streams for which a GM page is filed.

**JOHNSON MATTHEY (Continued)** **S105093138**

Chapter 45, Section(s) 67450.3(c)(8)

Violation Description: Failure to maintain the required documents, including waste analysis plan, contingency plan, training documents, Phase I Environmental Assessment, written inspections schedules, etc. at the facility where the FTU is operating and upon request make these documents available to the authorized agency, DTSC, the CUPA, or EPA, or local government agency.

Violation Notes: Returned to compliance on 12/06/2017. Review of waste treatment training records did not include A. Cervantes who was noted as documenting operating parameters in the batch treatment logs. Also, see training violation above regarding documenting training for PBR system operators in matrix plan.

Violation Division: Santa Clara County Environmental Health

Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11  
Violation Description: Failure to determine if the waste generated is a hazardous waste.

Violation Notes: Returned to compliance on 12/06/2017. Shop debris not carry the D010 waste designation with the addition of shop sweeps, dry grinding, blast residual and wet grinding filtered solids - all of which potentially contain selenium. IGNORE CORRECTIVE ACTION LANGUAGE BELOW. Please explain why commingled waste does not carry D010 waste designation. Shop wipes which are generally used with IPA are consolidated to shop debris, but waste stream does not carry the D001 designation and is being shipped as non-RCRA hazardous waste. IGNORE CORRECTIVE ACTION LANGUAGE BELOW. Please explain how wipes do not meet the definition of D001 at the point that they are discarded.

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filing each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of

**JOHNSON MATTHEY (Continued)** **S105093138**

both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 12/06/2017. Facility does not have a training plan that outlines the position, duty and name of each employee in that position. All other training plan elements are clearly defined and documented in training matrix (class, frequency and employee name and date trained).

Evaluation:  
 Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 01-09-2014  
 Violations Found: No  
 Eval Type: Routine done by local agency  
 Eval Notes: Performed routine inspection of hazardous waste treatment unit consisting of 1 neutralization tank and 1 evaporator. The system is hard plumbed along the top of the unit and correctly noted in Tiered Permit submittal via CERS as 1 PBR unit with 2 tanks. Treatment logs and tank inspections are logged correctly and the system is located inside a sealed floor with bermed secondary containment at entrance to HazMat Treatment and Storage Area. Tiered Permitting submittal in CERS is complete and up to date. Note: Facility is using a physical jack system to consolidate/compact waste gloves, rags and solid hazardous waste debris, which was located in the HazMat Treatment and Storage Area.

 Eval Notes: The following waste streams are being treated in one Permit by Rule Fixed Treatment Unit: etch rinses, mop water, ultrasonic wastewater and parts washer. The treated wastes are sent through 2 tanks: neutralization and evaporation. The wastes are treated in sequence

**JOHNSON MATTHEY (Continued)** **S105093138**

through each tank and are directly connected to each other. The hazardous waste treatment unit is properly marked with tanks located in secondary containment. The Permit is current with the last notification being made and accepted in CERS on 4/17/14. Facility maintains records of waste analysis plan, inspection schedules and logs, closure cost estimate, POTW zero discharge permit, Phase 1 checklist, security markings, tanks assessment (2011), and training records. Note: Facility is planning to add primary etch wastewater to the treatment system: 92% Water, 4.5% Sulfamic Acid, and 3.5% Hydrogen Peroxide. This primary etch wastewater may be hazardous for corrosivity and Nickel concentration.

 Eval Notes: Site manufactures Nickel-titanium (NiTi) wire, tubing, sheet and foil for use in the medical device industry. Site generates nickel contaminated wastes (most corrosive) which are subsequently treated onsite- etch rinse, mop water, ultrasonic clean solutions. Also generates waste concentrated etch solutions, nickel containing sludges and dusts, "shop debris" which is generally IPA or nickel contaminated solids, used mineral spirits, detergents, and EPA ID number CAD982484727. Site utilizes satellite accumulation throughout with

**JOHNSON MATTHEY (Continued)** **S105093138**

weekly pick up and empty of containers and consolidation to drums. Shop debris is compacted for volume reduction with no release of free liquids in compaction. Etch rinse from most stations to drum, moved to treatment area and batch treated. Solution in Core removal area to small open tray, "immediately" transferred at end of each process to waste drum in waste accumulation area. Dust control (particulate filters, bags) attached to dry [Truncated]

 Eval Type: Routine done by local agency  
 Eval Notes: Site operates onsite treatment unit for the neutralization of rinse waters and other dilute wastes containing regulated levels of metals (generally nickel with low levels of copper and selenium). System consists of 165 single walled poly tank used to pH balance, bringing waste with pH around 2 up to between 6-8 by addition of sodium hydroxide. Tank is transferred by pump, manually, and treated in batches. Tank contents then transferred to evaporator unit in which water is evaporated off and metals are collected as a sludge. Evaporator cleaned on regular basis to maintain high functionality (sludge insulates the heating coils if builds up too much). Tanks single walled, fitted with overflow monitoring and leak detection within bermed epoxy coated containment. PBR annual renewal filed 3/6/2017, accepted 3/27/107. reviewed the following documentation: Waste treatment operation process procedure Waste treatment log (dates, pH, amounts) Closure plan -- Plan is [Truncated]

Name: GOODMAN AIR CONDITIONING & HEATING  
 Address: 1070 COMMERCIAL ST STE 103  
 City,State,Zip: SAN JOSE, CA 95112  
 Site ID: 33918  
 CERS ID: 10491034  
 CERS Description: Chemical Storage Facilities

**Violations:**  
 Site ID: 33918  
 Site Name: GOODMAN AIR CONDITIONING & HEATING  
 Violation Date: 04-11-2014  
 Citation: 19 CCR 4 2729.5 - California Code of Regulations, Title 19, Chapter 4, Section(s) 2729.5  
 Violation Description: Failure to submit inventory reports (Activities, Owner/Operator, Hazardous Materials Descriptions and Map pages, if required). Documentation must be resubmitted (for facilities which exceed EPCRA thresholds) or re-certified (for facilities which do not exceed EPCRA thresholds) by March 1.  
 Violation Notes: Not reported  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: HMRPP  
 Violation Source: CERS

Site ID: 33918  
 Site Name: GOODMAN AIR CONDITIONING & HEATING  
 Violation Date: 08-02-2018  
 Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
 Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.  
 Violation Notes: Hazardous Material Inventory in CERS for R22 and R410 (compressed liquefied gases) were reported as being stored at ambient pressure, these must be listed as "pressurized" and are shall be reported in gallons, as required. Additionally, R410 is reported as a "mixture".

**GOODMAN AIR CONDITIONING & HEATING (Continued)** **S113016664**

but no additional information is listed. Submit additional chemical component information as listed on industry-provided Safety Data Sheet into CERS. Propane and other reportable chemicals were not listed in the Hazardous Material Inventory. See comment section for a full list of reportable inventory.

Hazardous Waste Summary:  
 Waste Code: D001  
 Waste Description: IGNITABLE WASTE  
 Waste Code: D002

JOHNSON MATTHEY INC (Continued) 1000209537

Waste Description: CORROSIVE WASTE  
 Waste Code: D007  
 Waste Description: CHROMIUM  
 Waste Code: D010  
 Waste Description: SELENIUM  
 Waste Code: D039  
 Waste Description: TETRACHLOROETHYLENE  
 Waste Code: F003  
 Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

was not available for review during the inspection conducted on 3/30/2017.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: HMRRP  
 Violation Source: CERS  
 Site ID: 128088  
 Site Name: KLAUER'S  
 Violation Date: 05-01-2017  
 Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple  
 Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General  
 Violation Notes: A pile of empty and non-empty waste propane cylinders was observed in the car clean-out area on 3/30/2017. Upon inquiry as to how the facility manages waste propane cylinders, the facility employees stated that they puncture all propane cylinders and recycle the cylinders for their scrap metal value, even when propane is remaining in the cylinders. The released propane is discharged into the air for disposal. This process constitutes G treatment of hazardous waste pursuant to HSC 25123.5 and cannot be conducted without authorization from the Department. Immediately cease this treatment practice and begin managing the non-empty propane cylinders as hazardous waste.

 Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
 Violation Description: Failure to complete and electronically submit a site map with all required content.  
 Violation Notes: The site map does not contain an evacuation staging area, loading and un-loading areas, access and exit points, emergency shut-offs, and the hazardous waste in the car collection waste area and the car clean-out areas. Furthermore, the location names used to identify the hazardous materials/wastes location on the hazardous materials inventory do not match the identification names used on the site map (e.g. drain area vs. drain building; customer yard vs. gravel customer area). Ensure that the location of hazardous materials/wastes handling and storage areas are accurately identified.

 Site ID: 128088  
 Site Name: KLAUER'S  
 Violation Date: 02-11-2014  
 Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple  
 Violation Description: Haz Waste Generator Program - Operations/Maintenance - General  
 Violation Notes: Returned to compliance on 05/26/2014. Used oil was found in the secondary containment in the drain area. Spills to secondary containment should be cleaned up when they occur.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: HW  
 Violation Source: CERS  
 Site ID: 128088  
 Site Name: KLAUER'S  
 Violation Date: 05-01-2017  
 Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
 Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
 Violation Notes: Returned to compliance on 06/08/2017. Incomplete, un-labeled, and mis-labeled containers of hazardous waste were frequently observed throughout the entire facility. The following containers and tanks of hazardous waste were observed to be un-labeled, mislabeled, or incompletely labeled on 3/30/2017: Used Oil Collection Center Area - 3 x 55 gallon drums marked as G used oil/G with no other required information - 3 x 55 gallon drums of used oil un-labeled (hazardous waste labels must be affixed to the container and not placed on a nearby wall) - Secondary containment containers for the used oil drums are almost halfway full of used oil and are un-labeled - Tertiary containment bins for used oil drums almost full of used oil are un-labeled - 27 x 1 gallon containers of dropped of used oil accumulating next to used oil drums are un-labeled Car Collection Waste Area - 14 x Gaylord boxes of hazardous waste (non-empty contaminated containers, non-RCRA hazardous waste liquids) missing

 Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
 Violation Description: Failure to provide the following training to all oil-handling personnel: 1. Operation and maintenance of equipment to prevent discharges. 2. Discharge procedure protocols. 3. Applicable pollution control laws, rules, and regulations. 4. General facility operations. 5. Contents of the SPCC Plan.  
 Violation Notes: Returned to compliance on 07/26/2017. Based upon operating procedures observed during the visit, Spill avoidance and best operational practices were not being followed or considered.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: APSA  
 Violation Source: CERS  
 Site ID: 128088  
 Site Name: KLAUER'S  
 Violation Date: 05-01-2017  
 Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194  
 Violation Description: Failure of the operator for placing wastes or treatment reagents in a tank system that could cause the tank, its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail; and for not using appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. (Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure).  
 Violation Notes: A large quantity of used oil/used antifreeze was observed to be accumulating in the used oil and used antifreeze tanks' secondary containment "vault" and leaking from the "vault" onto the open concrete floor. Observations indicate that preventative measures are not being taken to ensure that the tanks are not releasing hazardous waste (spills control) and/or overflows are not occurring.

 Citation: HSC 6.95 25510(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25510(a)  
 Violation Description: Failure to report a release or threatened release of a hazardous material to the unified program agency and to OES.  
 Violation Notes: Returned to compliance on 05/18/2017. The facility had an unauthorised release of their hazardous wastes (contents of gaylord boxes and oil/water separator contents) from the floor occurring in February, 2017 that required on-site hazardous waste clean-up and mitigation, but no notification was provided to HMCDD and CalOES.

Violation Description:	APSA Program - Operations/Maintenance - General	
Violation Notes:	Returned to compliance on 07/26/2017. This system has multiple failure points where fuel is escaping to the air and land. Maintaining original or approved operations is not being done at this time. The piping system between the funnel at the filter or relief point was also observed to be dripping fuel at multiple junctions and connections. The swing arm was observed to get pulled away from the draining tank with fuel still draining. The vehicles were observed being removed from the rack and carried to the next temporary storage station while fuel continued to drip and flow from the tanks.

Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.	
Violation Notes:	Automotive Drain Area: 1) Gasoline was observed to be spilling onto the dirt from an un-empty, punctured gasoline tank while the car was being transported near the automotive drain area. Ensure that all vehicles are completely drained of free-flowing automotive fluids prior to transport and the automotive fluids are properly captured and managed. Ensure that any dirt or debris contaminated from spills is properly collected and managed. 2) Spills of used oil and used antifreeze were observed throughout the entire automotive drain area, car collection waste area, and used oil collection center area. Absorbent was placed on some of the spills, but the absorbent was observed to be saturated in areas and has been left on the ground long enough to dry in other areas. Ensure that all spills are immediately cleaned up and any saturated absorbent is collected and managed as hazardous waste if required. 3) Hazardous waste was observed to be spilling out from the cracks in the [Truncated]

Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.	
Violation Notes:	1) The facility has profiled all gravel, dirt, carpet material, and absorbent waste that has been used to catch automotive fluids, such as used oil, as non-hazardous waste and no manifest or consolidated manifest has been used to transport debris saturated/contaminated with used oil in at least the past 3 years. However, two distinct waste streams generated from waste gravel, dirt, carpet, and absorbent were observed during inspection on 3/30/2017. The first waste stream is waste gravel, dirt, carpet, and absorbent that has not been contaminated or saturated by automotive fluid leaks. The second waste stream is of waste gravel, dirt, carpet, and absorbent that has become highly contaminated/saturated with automotive fluids, such as used

 Violation Date: 07-25-2017  
 Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)

Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.

Violation Notes: Rather than draining and collecting waste automotive fluids, including but not limited to fuel and used oil, that has been removed from vehicles and managing the fluids as hazardous waste, the facility is puncturing automotive fluid tanks and draining the fluids to the ground. Fuel was observed to be flowing and dripping from a decommissioned, blue Chevrolet fuel tank and pooling on the ground in the hold yard during inspection. Two streams of black automotive fluids running down the main road and at the entrance to the hold yard and a pool of used oil in a black piece of plastic that had fallen off of a vehicle in the customer yard were observed. The automotive fluid streams ended at small pools of automotive fluids located in the road. The facility has already made the determination that all automotive fluids are to be managed as hazardous waste. THIS IS A CLASS I VIOLATION. ALL CLASS I VIOLATIONS REQUIRE IMMEDIATE CORRECTIVE ACTION TO BE TAKEN

Compliance Evaluation Inspection

Eval General Type: 05-01-2017  
 Eval Date: Yes  
 Violations Found: Routine done by local agency  
 Eval Type: On-site to conduct a routine hazardous waste inspection with Hazardous Materials Specialist, Andrew Dyer. The facility walk through occurred on 3/30/2017, but facility employees stated that records were unable to be reviewed due to the effects of the February, 2017 flood, so records review was delayed until today. The facility is a "pick-n-pull" automotive dismantler that acquires vehicles, removes all hazardous wastes and fluids, and sells automotive parts, and a small quantity of intact vehicles, to customers. The customers "pick" the automotive part they would like to buy and it is removed from the vehicle. After approximately three weeks, the remaining vehicles and automotive parts are crushed on-site and sent for recycling. In addition to automotive dismantling activities, the facility operates a used oil collection center where the public can drop-off small quantities of used oil for proper management. The facility does not record the quantity of used oil generated [Truncated]

 Eval Type: Routine done by local agency  
 Eval Notes: I was on site, on March 30, 2017 at 1065 Commercial Street, Klauer's Pick-n-Pull, with Molly Pritz, HMS-II, from this office, for the 2017 APSA FACILITY-SPCC TEMPLATE (<10,000 GAL CAP) Permit Inspection. This is in conjunction with Molly Pritz of this office for the purposes of including the APSA Inspection along with the other permit inspections where she is lead. Today's APSA inspection confirmed this is a Tier 1 Qualified Facility based upon the volumes of materials stored on site. Some operations are doing fine, however there are areas of concern that are on-going. On-going discharge was observed in the vehicle tank fuel removing operation. Observations and records shall be reviewed to determine if this facility continues to be a Tier 1 Qualified Facility. March 30, 2017 was a facility walk-through, facilitated by David Steele, Production Supervisor, looking at the entire facility. We started with the customer waste fluids accumulation and drumming area. [Truncated]

 Violations Found: Yes  
 Eval Type: Routine done by local agency  
 Eval Notes: While on-site to conduct a routine hazardous waste inspection with Hazardous Materials Specialist, Andrew Dyer, it was observed that the facility extracts the gasoline and diesel from scrapped vehicles by puncturing the fuel tanks and allowing them to drain into a collection container. The gasoline is then pumped into one of three 500 gallon aboveground tanks and the diesel is pumped into the one 500 gallon aboveground tank. Per facility staff, the "reclaimed gasoline" is picked up by Lamb Fuels, who processes and recycles the gasoline for re-sale as a usable gasoline product. The diesel is reclaimed and used on-site. No additional information regarding the reclaimed gasoline and diesel was available during the facility walk through on 3/30/2017. The facility walk through was conducted on 3/30/2017 and the inspection report reviewed and issued on 5/1/2017. The delay in report issuance is because facility employees stated that all records and files were destroyed during the [Truncated]

 Treat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nards without a TTIWO will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. HAZARDOUS WASTE BIENNIAL REPORTER STATE MASTER

MAP FINDINGS

ROSENDIN ELECTRIC INC. (Continued) S121746065

Section(s) Multiple  
 Violation Description: Haz Waste Generator Program - Operations/Maintenance - General Returned to compliance on 05/26/2015. Observed waste coolant at bottom of secondary containment in storage area outside shop. Container storage areas must be maintained when weekly inspections indicate a leak or hazardous waste outside primary containment. Waste coolant at bottom of secondary containment should be placed in the designated hazardous waste container.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: HW  
 Violation Source: CERS  
 Site ID: 148987  
 Site Name: Rosendin Electric Inc.  
 Violation Date: 11-12-2019  
 Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11  
 Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.  
 Violation Notes: Returned to compliance on 12/10/2019. Observed 1 x 5 gallon bucket of fuel stabilizer in the power tool maintenance area. Mr. Matt informed me that the bucket had been there for 7 years and was unsure of how to use it. Determine if contents of bucket meet hazardous waste criteria.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: HW  
 Violation Source: CERS  
 Site ID: 148987  
 Site Name: Rosendin Electric Inc.  
 Violation Date: 11-12-2019  
 Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)  
 Violation Description: Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated  
 Violation Notes: Returned to compliance on 12/10/2019. Power tool maintenance area- Observed 5 x 5 gallon containers with no hazardous waste labels  
 Violation Division: Santa Clara County Environmental Health

 Violation Source: CERS  
 Site ID: 148987  
 Site Name: Rosendin Electric Inc.

MAP FINDINGS

ROSENDIN ELECTRIC INC. (Continued) S121746065

Violation Date: 04-17-2014  
 Citation: 19 CCR 4 2729.5 - California Code of Regulations, Title 19, Chapter 4, Section(s) 2729.5  
 Violation Description: Failure to submit inventory reports (Activities, Owner/Operator, Hazardous Materials Descriptions and Map pages, if required. Documentation must be resubmitted (for facilities which exceed EPCRA thresholds) or re-certified (for facilities which do not exceed EPCRA thresholds) by March 1.  
 Violation Notes: Returned to compliance on 05/26/2015. The last Hazardous Materials Business Plan (HMBP) was completed on 4-23-12 by Nick Zygaczenko. See copy of HMBP provided today. Please go to http://cers.caiepa.ca.gov and create a user account, obtain user access, then submit all facility information; your California Environmental Reporting System (CERS) ID# is 10356208. See also handout provided "Getting Started with the California Environmental Reporting System."

**Violations Found:** No  
**Eval Type:** Routine done by local agency  
**Eval Notes:** Onsite today for routine hazardous materials business plan program inspection, noted the following: -Facility completed all reporting requirements for the Hazardous Materials Business Plan (HMBP) in CERS on 9-11-13 -Target Specialty owns the property at the 1155 Mabury location -No significant spills or releases have occurred in the last 12 months -Emergency Response training has been completed No violations were noted today, thank you. Note: Facility has an active EPA ID Number. Approximately 3 to 10 gallons of returned goods from customers are located onsite and are not to be reused according to Tim Thompson, facility manager. Target Specialty distributes a variety of chemical products for use in industry and commercial facilities. The returned goods or damaged goods are determined to be waste and cannot be used. They are then properly disposed of as hazardous waste and the last shipment of hazardous waste was over 1 year ago. These materials should be managed as [Truncated]

Violation Date:	10-30-2019	
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22	
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.	
Violation Notes:	Returned to compliance on 01/22/2020. Observed 1 x 55 gal steel drum with commingled drained used oil filters and cartridge paper filters. It was unclear if the filters were sent off for metal recycling or managed as hazardous waste. Begin separating drained used oil filters destined for metal recycling and paper cartridge filters managed as hazardous waste, or manage the commingled stream as fully regulated hazardous waste.

Violation Date:	10-30-2019	
Citation:	40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35	
Violation Description:	Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.	
Violation Notes:	Returned to compliance on 01/22/2020. According to Mr. Dinh, the facility has two drums in the back shed for waste antifreeze storage, however waste antifreeze is generated rarely and the containers are currently empty. Two large engines and other debris prevented access to the antifreeze drums for further inspection. Ensure that sufficient aisle space is provided to all areas of the facility, including all hazardous waste storage areas.

Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.	
Violation Notes:	Returned to compliance on 01/22/2020. Observed 1 x 55 gal blue poly drum with a hole cut in the top near the dumpster with what observed to be rags, paint can lids, amongst other refuse. A solvent odor is apparent when standing near the drum. According to Mr. Dinh, the drum was left outside by unknown people and brought into the facility. No labels were observed on the drum. Perform a hazardous waste determination on the drum using analytical testing and if determined to be hazardous, manage as hazardous waste immediately.

Citation:	40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description:	Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system; 2) A device, such as a telephone (immediately available at the scene of Operations/Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes:	Returned to compliance on 01/22/2020. Observed two fire extinguishers with tags indicating that the extinguishers have not been serviced since 2001, and two fire extinguishers with tags indicating that the fire extinguishers have not been serviced since 2017. According to Mr. Dinh, Cintas comes to service the extinguishers yearly. Provide a invoice or billing statement that indicates that the fire extinguishers have been serviced, and request that the tags be replaced. Otherwise, ensure that the fire extinguishers are serviced immediately or dispose of them and acquire new ones.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Potential Contaminants of Concern: Diesel  
 Site History: The site is located at 1020 Berryessa Road and currently operates as a Chevron Bulk Fuel Terminal. The terminal facility covers approximately 10 acres and consists of a retention pond, bulk fuel storage tanks, a pipeline-terminal center, buildings, and truck load-out facilities. The current site configuration is shown on the site plan. The fuel terminal, in operation since the mid-1960s, is used as a transfer station distributing motor fuel and jet fuel

**CHEVRON SAN JOSE TERMINAL (Continued)**

S103620580

throughout the San Francisco Bay Area. The facility receives refined petroleum-hydrocarbon products from the Chevron Richmond Refinery by pipeline. This site is related to two separate cases under the Site Cleanup Program (CASE #: 2189.8309) and Waste Discharge Requirements (ORDER# 90-113). Information regarding the Site Cleanup Program case can be found at: http://geotracker.waterboards.ca.gov/profile\_report.asp?global\_id=SL374291196

 Address: 1020 BERRYESSA ROAD  
 City,State,Zip: SAN JOSE, CA 95133  
 Region: STATE  
 Facility Status: Open - Verification Monitoring  
 Status Date: 05/03/2011  
 Global ID: SL374291196  
 Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
 Lead Agency Case Number: Not reported  
 Latitude: 37.383952  
 Longitude: -121.884566  
 Case Type: Cleanup Program Site  
 Case Worker: KER  
 Local Agency: Not reported  
 RB Case Number: 2189.8309  
 File Location: Regional Board  
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Well used for drinking water supply  
 Potential Contaminants of Concern: Benzene, Toluene, Xylene, Diesel, Gasoline, Heating Oil / Fuel Oil, Waste Oil / Motor / Hydraulic / Lubricating  
 Site History: The site is an operating Chevron bulk fuel terminal and consists of a retention pond, bulk fuel storage tanks, a pipeline-terminal center, buildings, and truck load-out facilities. Since the mid-1960s, the bulk fuel terminal has been in operation as a transfer station for the distribution of vehicular and jet fuels. The facility receives refined petroleum hydrocarbon products via pipeline from the Chevron refinery in Richmond, California. The products are stored at the bulk fuel facility in above ground storage tanks, and are subsequently distributed from the facility by tanker trucks to various locations. Several spills and leaks were reported for this site between February, 1984 and July, 1986. Reports of these spills and leaks were based on observation or detection of hydrocarbons (I-ICs) in soil and groundwater monitoring wells. The storage tanks and oil water separators may be sources for the leaks. Site Cleanup requirements were adopted for this site in January 1990. The Order included tasks for onsite investigation and remediation, offsite investigation and remediation, and final cleanup for both onsite and offsite. Investigation of the extent of the problem and installation of onsite interim remedial actions has been ongoing. This site is related to two separate cases under the Leaking Underground Storage Tank (CASE #: 43-0021) and Waste Discharge Requirements (ORDER# 90-113).

CHEVRON SAN JOSE TERMINAL (Continued) S103620580

Information regarding the Leaking Underground Storage Tank case can be found at:

 Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description:

Failure to address in the SPCC Plan countermeasures for discharge discovery, response, and cleanup (both facility's and contractor's resources).

Violation Notes:

Returned to compliance on 03/14/2018. Page 56 of SPCC plan is referenced under disposal methods. This page shows a chart to detail how wastes must be disposed. Chart shows that solid, oiled wastes are to be sent to G incinerationG, G landfillG, or G landfillG. Non-oiled solids are to be sent to landfill or G recyclingG. Liquid oil wastes are to be sent to G recyclingG. Only liquids are to be sent to G landfillG, G disposalG, or G incinerationG. Non-oily liquids are to be sent to a G treatment facilityG. Disposal methods listed above are too general to determine if hazardous wastes generated from releases would be properly identified and managed as such.

RCRA Large Quantity Generator - Abandonment/Illegal Disposal/Unauthorized Treatment - General

Violation Description: Returned to compliance on 03/14/2018. Current practice is to triple rinse 55 gallon contaminated containers that formerly contained glycol, dispose of the rinsate to the oil/water separator, and cut and dispose of the drums as non-hazardous waste. At the time of inspection, eleven 55 gallon drums that formerly contained glycol were observed on the Loading Dock, three 55 gallon drums that formerly contained glycol were observed in the G Parts Stager/Former Truck Repair Stalls area, and two 55 gallon drums that formerly contained glycol were observed near the vapor recovery unit. Note that the last bill of lading observed for G empty drums that last contained ethylene glycol is from June, 2016. Triple-rinsing and cutting 55 gallon drums that formerly contained a hazardous material constitutes G treatment/G of a hazardous waste and cannot be conducted without authorization from HMCD. Either apply for an on-site hazardous waste treatment permit or ensure the drums are managed in accordance with one of the [Truncated]

 Citation: 22 CCR 15 66262.41 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66262.41  
 Violation Description: Failure of a large quantity RCRA generator to prepare the Biennial report (Form 8700), and submit to DTSC by March 1st on even numbered years; and maintain it onsite for three years.  
 Violation Notes: Returned to compliance on 03/14/2018. Facility failed to submit a Biennial Report with all required information. --- 1) The 2016 Biennial Report submitted for 2015 activities does not include the following hazardous wastes on the GM forms and their corresponding information: ~ 2500 pounds of Hazardous Waste, solid, n.o.s. (Benzene, Ethanol); waste codes D018, 352; transported by Veolia ES Technical Solutions (NJD080631369) and Dillard Environmental (CAD982523433) to Veolia ES Technical Solutions LLC TSDF (CAD008302903), Manifest #000751602VES (Ship Date: 3/19/2015) - 4 gallons of Non-RCRA hazardous waste, liquid (sodium hydroxide solution); waste code 123; transported by Clean Harbors Environmental Services (MAD039322250) to Clean Harbors San Jose LLC TSDF (CAD059494310), Manifest #009570449FLE (Ship Date: 12/29/2015) 2) The 2016 Biennial Report does not include: - the EPA ID Number, name, and address for each off-site TSDF to which waste was shipped in 2015 (CAD008302903, CAD059494310, the EPA ID [Truncated])

 Eval Notes: Complaint CO0142147 Complaint generated in response to release reported to State OES Warning Center. Complaint notes release of approximately 500 gallons of premium unleaded to containment. Follow up documentation amended the total volume to 200 gallons and noted product was regular unleaded gasoline. Review of internal incident documentation showed source of leak to be equipment failure of design and operation. System has been modified based on investigation, with booster blower being removed from service. Site has plans to bring on mobile VRU-type unit to allow for shutdown and full repair of source of leak. Source of leak was determined to be not related to filling or daily operation of a APSA eligible/regulator tank, but rather from unit design. APSA daily inspections were methodology by which failure was discovered.

 Eval Notes: CERS ID 01343905 Submittal of complete HMBP element 1/13/15, 2/25/16, 1/15/17 with additional complete submittals 10/25/16 and 10/5/17  
 Response plan is complete hazardous waste contingency plan Map is complete, addresses all required elements Documentation of training was reviewed and found to be complete. Last provided 2017. Training is done online, so each individual's training date varied. Notes: 1. Individual tank volumes do not match when comparing tank capacities provided on map and those provided in the inventory. Example: Tank 143 reported as 177156 gal in inventory but 210360 gal on map. This is a discrepancy of over 15%. Other tanks had similar discrepancies. Also, Tank 143 is reported in the inventory for Regular Unleaded Gas as having a capacity of 31,289,286 while actual volume is closer to 3,474,290 per map. 2. Inventory reports chemicals which are no longer on site in the maintenance shop/west storage area. Strongly recommend removing these items [Truncated]

 Eval Notes: Inspection conducted on 1/23/16 with Robin Ward (Hazardous Materials Specialist) and Molly Fritz (Hazardous Materials Specialist II). Terminal manager Curtis Aman and Head Plant Operator Gerald Miller were present for the physical facility walk-through and review of all documents made available on-site. All documents referenced in the plan were requested via email prior to inspection. All other documents not already provided were requested on-site at the time of inspection and again within 24 hours via email. Summary of observations: SPCC Plan: Facility is subject to a full SPCC plan and conducts and logs all technical amendments and 5 year reviews as required. Plan is stored on-site and facility employees know where to access it. Plan was last certified by a Professional Engineer and approved by management on 12/15/2016 and 1/3/2017, respectively. Annual Facility Tank Statement: Facility reports all bulk containers and tanks over 10,000 gallons on CERS inventory [Truncated]

Violation Description:	RCRA Large Quantity Generator - Abandonment/Illegal Disposal/Unauthorized Treatment - General	
Violation Notes:	Returned to compliance on 03/14/2018. Current practice is to triple rinse 55 gallon contaminated containers that formerly contained glycol, dispose of the rinse to the oil/water separator, and cut and dispose of the drums as non-hazardous waste. At the time of inspection, eleven 55 gallon drums that formerly contained glycol were observed on the Loading Dock, three 55 gallon drums that formerly contained glycol were observed in the G Parts Stage/former Truck Repair StallG area, and two 55 gallon drums that formerly contained glycol were observed near the vapor recovery unit. Note that the last bill of lading observed for G empty drums that last contained ethylene glycolG is from June, 2016. Triple-rinsing and cutting 55 gallon drums that formerly contained a hazardous material constitutes G treatmentG of a hazardous waste and cannot be conducted without authorization from HMCD. Either apply for an on-site hazardous waste treatment permit or ensure the drums are managed in accordance with one of the [Truncated]

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)	
Violation Description:	Failure to include in the SPOC Plan an adequate facility diagram, or no facility diagram included. The facility diagram is not required on a Tier 1 qualified facility SPOC Plan.	
Violation Notes:	Returned to compliance on 03/14/2018. Page 29 of the SPOC plan lists portable drums inside the G warehouseG, but this drum is currently stored in the building next to the office. Clarify Figure 2.1-2 to identify all allowed storage areas for portable containers. Note: Facility diagram appears to show this storage location, but text is too small to be legible.

Violation Description:	RCRA Large Quantity Generator Program - Operations/Maintenance - General	
Violation Notes:	Returned to compliance on 03/14/2018. Facility held drained used oil/fuel filters on-site for longer than the allowed time limit. "Parts Warehouse/Former Truck Repair Stalls": Observed 3 filters accumulating in the fill port of the former used oil tank. Per facility staff and former tank label information, maintenance activities that generate used fuel filters have not occurred since 2010. Make arrangements for the immediate removal of the filters. Submit to HMCD a copy of the bill of lading demonstrating that the filters were removed. Ensure that drained used oil/fuel filters are not held on-site for longer than one year when storing less than a ton of filters, or 150 days when storing a ton or more of filters. (Note: 1 ton = 2,000 lbs = approx. 8 drums uncrushed filters or 4 drums crushed filters.) [CCR 66266.130(c)(4), HSC 25250.22]

Violation Description: Failure to maintain adequate records of drainage when there is drainage of uncontaminated rainwater from liked areas into a storm drain or open watercourse; for example, records required under NPDES permit.
Violation Notes: Returned to compliance on 03/14/2018. Dike drainage inspection logs were not available on-site at the time of inspection and were not made available electronically within a 48 hours after the request. Plan refers to Figure 4.1-4 (page 62) for dike drainage logs but no such logs appear to be used by employees on-site. Provide the past 3 years of logs detailing drainages from concrete dike and from catchment basin.

Eval Notes: Complaint CO0142147 Complaint generated in response to release reported to State OES Warning Center. Complaint notes release of approximately 500 gallons of premium unleaded to containment. Follow up documentation amended the total volume to 200 gallons and noted product was regular unleaded gasoline. Review of internal incident documentation showed source of leak to be equipment failure of design and operation. System has been modified based on investigation, with booster blower being removed from service. Site has plans to bring on mobile VRU-type unit to allow for shutdown and full repair of source of leak. Source of leak was determined to be not related to filling or daily operation of a APSA eligible/regulator tank, but rather from unit design. APSA daily inspections were methodology by which failure was discovered.

Eval Type: Other, not routine, done by local agency  
Eval Notes: Complaint CO0142147 Complaint released in response to release reported to State OES Warning Center. Complaint notes release of approximately 500 gallons of premium unleaded to containment. Follow up documentation amended the total volume to 200 gallons and noted product was regular unleaded gasoline. Review of internal incident documentation showed source of leak to be equipment failure of design and operation. System has been modified based on investigation, with booster blower being removed from service. Site has plans to bring on mobile VRU-type unit to allow for shutdown and full repair of source of leak. Source of leak was determined to be not related to filling or daily operation of a APSA eligible/regulator tank, but rather from unit design. APSA daily inspections were methodology by which failure was discovered.

Environmental Interest/Information System:  
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.  
 US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.  
 HAZARDOUS AIR POLLUTANT MAJOR  
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 AIR EMISSIONS CLASSIFICATION UNKNOWN  
 HAZARDOUS AIR POLLUTANT MAJOR  
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:  
 Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 06-18-2018  
 Violations Found: No  
 Eval Type: Routine done by local agency  
 Eval Notes: Facility performs machining using various metals but primarily consisting of aluminum (6061). State ID # CALD00407978 is active. No CNC with high pressure or misting. Some deburring is performed using CNC machine while other, limited manual deburring is performed. Did not observe any metal fines. Used oil/coolant disposal receipts(consolidated manifests) for prior 3 years were reviewed. Facility uses alcohol in a 2 L (estimated) plastic upperware container to clean parts containing molly D tapping fluid. Operations manager is not present and David Dobson, machinist, is unsure if this is disposed of or if it is consumed through use. MINOR VIOLATIONS CORRECTED AT TIME OF INSPECTION. 5X55 gal used oil/coolant - no marking. MARKED. 5x55 gal used oil/coolant - open containers. CLOSED. NO emergency posting information. POSTED.

Eval Division: Santa Clara County Environmental Health  
 Eval Program: HW  
 Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 06-18-2018  
 Violations Found: Yes  
 Eval Type: Routine done by local agency  
 Eval Notes: Facility most recently electronically submitted a hazardous materials business plan (HMBP) today on 6-18-18. Prior to that, last submission was performed on 11-20-17. Reportable hazardous materials include but are not limited to: 5x55 gal used oil/coolant 6x10 gal propane cylinders 1x55 gal new coolant

Environmental Interest/Information System:  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be

CASCADE METALS CORPORATIO (Continued) S104162904

considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:  
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Violations:  
 Site ID: 139649  
 Site Name: OCULAR LABS  
 Violation Date: 01-04-2018  
 Citation: HSC 6.5 25123.3(h) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)  
 Violation Description: Failure to determine the status of any hazardous waste if a signed copy of the manifest isn't received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isn't received within 60 days of the date the waste was accepted by the initial transporter.  
 Violation Notes: Returned to compliance on 01/30/2018. With the exception of 5 manifests in 2015, site did not have copies of the TSDF (final destination) copies of manifests (23 generator-only copies noted).  
 Noted that manifests are marked with a "mail to" address which is not the facility address. EITHER OBTAIN, AND MAINTAIN, FINAL SIGNED COPIES OF ALL 2015, 2016 AND 2017 MANIFEST FROM THE "MAIL TO" ADDRESS OR FILE AN EXCEPTION REPORT AS DIRECTED BELOW. IN THE FUTURE, MAKE COPIES AVAILABLE (EITHER IN HARD COPY OR ELECTRONICALLY).

 Violation Description: Failure of the generator to prepare and maintain onsite, for a period of five years, adequate records to demonstrate that requirements and conditions of the grant of conditional authorization are met. Log demonstrating dates and quantities of wastes treated not maintained.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: CA  
 Violation Source: CERS  
 Site ID: 139649  
 Site Name: OCULAR LABS  
 Violation Date: 09-04-2014  
 Citation: HSC 6.5 25200.3(c)(7) - California Health and Safety Code, Chapter 6.5, Section(s) 25200.3(c)(7)  
 Violation Description: Failure of the generator to prepare and maintain onsite, for a period of five years, the following: (1) compliance records of all pretreatment and discharge records to the POTW; (2) records of the dates, concentrations, amounts, and types of waste treated; and (3) operating instructions that include: A) How to operate the treatment unit and carry out waste treatment; B) How to recognize potential and actual process upsets and respond to them; C) When to implement the contingency plan; D) How to determine if the treatment has been efficacious; and E) How to address the residuals of waste treatment.  
 Violation Notes: Returned to compliance on 09/15/2014. Facility does not record that Grisiron is treated on the onsite treatment records for the hazardous waste treatment unit. An example log was drafted and discussed with Robert Kim today.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: CA  
 Violation Source: CERS  
 Evaluation:  
 Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 01-04-2018  
 Violations Found: Yes  
 Eval Type: Routine done by local agency  
 Eval Notes: Treatment system is 10 gal (or less) batch treatment of dump of final cleaning step of coating process - Grisiron (a sodium hydroxide containing solution), pH tested cleaning solution in use, pH between 12 and 13 per litmus paper. Manually drain weekly up to 8 gallons of

OCULAR LABS (Continued)

S110374915

solution to isolated tank, which is manually activated. Once on, system automatically measures and pH, and calls for addition of citric acid for neutralization. Flush/drain to holding tank for pH sampling (if needed) then to sewer. Believe that its facility may qualify for treatment under the Conditionally Exempt, Small Quantity Treatment tier of treatment in that it treats and inorganic alkaline waste in quantities less than 55 gallons per month for the entire facility. Move from current level of authorization to CESQT may provide some regulatory relief. If you would like to discuss, please contact inspector.

 Compliance Evaluation Inspection  
 Eval Date: 01-04-2018  
 Violations Found: Yes  
 Eval Type: Routine done by local agency  
 Eval Notes: Facility makes lenses for eyeglasses, including shaping, grinding, polishing, and application of coatings for tint and scratch resistance. EPA ID number CVAL000340004, active on date of inspection. Used to ship routinely generated wastes including aluminum oxide polish slurry, excess flammable coatings and used oil from pump maintenance. Lens materials are generally plastic or polycarbonate. Polish systems set up to recirculate solutions after gross filtration for removal of polycarbonate materials. Clean out of excess slurry to hazardous waste management. Grinding codanis are filtered in-line and returned to process. Fortified only. Tints are non-hazardous per generator knowledge. To drain, through "hold" bucket to allow for pH test prior to discharge. Chocks used to hold lenses during

OCULAR LABS (Continued)

S110374915

manipulation are bonded to lens using "low boiling point" alloys. Excess alloy is melted off chocks after lens removed and re-introduced into chock adhesion machine. Scratch [Truncated]
