Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Arroyo Seco Water Reuse Project
Toject file. Arroyo deco water Neuse Froject
Lead Agency: City of Pasadena
Contact Name: Christina Monde
Email: cmonde@cityofpasadena.net Phone Number: 661-510-6981
Project Location: Pasadena Los Angeles
City
Project Description (Proposed actions, location, and/or consequences).
The proposed Project consists of two regional stormwater capture and treatment facilities, located within existing underutilized open space areas adjacent to the Arroyo Seco Channel. The San Rafael site (1.4 acres) is located in the City of Pasadena; and the San Pascual site (2.2 acres) is located within the cities of South Pasadena and Los Angeles. The Project would provide water quality benefits for multiple jurisdictions within the 5,005-acre drainage area of the two BMP sites, consisting primarily of residential, commercial, industrial, and transportation land uses.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Project's IS/MND identified the following mitigation measures (MMs) for the proposed Arroyo Seco Water Reuse Project:

Biological Resources: MM BIO-1 (Avoiding impacts to special status natural resources being protected in place during construction); MM BIO-2 (Protecting all trees to be preserved on-site during the construction process); MM BIO-3 (Migratory Bird Treaty Act and California Fish and Game Code with methods approved by the U.S. Fish and Wildlife Service [USFWS] and California Department of Fish and Wildlife [CDFW] to protect active bird/raptor nests); MM BIO-4 (Prior to tree removal, a pre-construction bat habitat assessment).

Cultural Resources: MM CUL-1 (Archaeological monitoring of any earthmoving activity in native soils).

Geology and Soils: MM GEO-1 (Process for encounter of paleontological resources during excavation).

Tribal Cultural Resources: MM TCR-1 (Retain a Native American Monitor Prior to Commencement of Ground Disturbing Activities); MM TCR-2 (Unanticipated Discovery of Tribal Cultural Resource Objects [Non-Ceremonial]); MM TCR-3 (Unanticipated Discovery of Human Remains and Associated Funerary or Ceremonial Objects).

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
Areas of controversy include tree removals and recreation/equestrian trail access.
Provide a list of the responsible or trustee agencies for the project.
