Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Bliven Grading Abatement	
Lead Agency: County of Santa Clara Department of P	lanning and Development
Contact Name: Robert Cain, Senior Planner	
Email: robert.cain@pln.sccgov.org	Phone Number: (408) 299-5706
Project Location: San Martin	Santa Clara
City	County
Project Description (Proposed actions, location, and/o	r consequences).
	nove approximately 990 cubic yards of unpermitted fill and conduct imately 1,620 cubic yards of soil. The unpermitted fill contains the

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Impacts of the proposed project are limited to the threat posed by the dieldrin located in the soil, which is to be treated and moved under the proposed projects. It is vital that this toxin is properly mitigated and is not spread to additional areas, especially San Martin Creek or through airborne dust. There is also a possibility that the removal of soil will disturb previously unidentified historic or prehistoirc cultural resources.

CR-MIT 1 Requires archaeological survey if artifacts are discovered.

CR-MIT 2 Details required actions if historic or prehistoric resources are discovered.

HAZ-MIT 1 Requires government oversight of soil decontamination from the Santa Clara County Department of Environmental Health, the Central Coast Regional Water Quality Control Board, or the California Department of Toxic Substances Control.

HAZ-MIT 2 Details dust management requirements.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues agencies and the public.	raised by
The unpermitted soil added to this property is known to contain dieldrin, a controlled substance considered to be	toxic.
Provide a list of the responsible or trustee agencies for the project.
