**Re: PHASE-I ENVIRONMENTAL SITE ASSESSMENT
APPROXIMATE 10-ACRE UNDEVELOPED PARCEL
ASSESSOR PARCEL # 3118-006-024
NORTH SIDE OF AVENUE H; EAST OF 20TH STREET WEST
LANCASTER, CALIFORNIA 93536**

Dear Ms. Fagenson;

Bruin Geotechnical Services Inc. (Bruin) is pleased to submit our report describing the findings of the Phase I Environmental Site Assessment (ESA) of the approximate 10-acre undeveloped parcel, located on the north side of Avenue H, and east of 20th Street West, (Assessor Parcel number 3118-006-024), Lancaster, Los Angeles County, California 93536 (the Site). This assessment was prepared in accordance with the Environmental Protection Agency (EPA) Standards and Practices for AAI; Final Rule, 40 CFR Part 312 (AAI) and American Standard for Testing Materials 1527-13.

The purpose of the Phase I ESA was to identify, to the extent feasible, recognized environmental conditions (RECs) in connection with the Site. This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property management, and regulatory agencies.

If you have any questions or require further clarification of the report findings, please contact the undersigned at your convenience. Thank you for the opportunity to be of service to you.

Yours very truly,
Bruin Geotechnical Services Inc.

Mark Stevens
Director of Geological Services

Attachment: Phase I Environmental Site Assessment Report

**PHASE I
ENVIRONMENTAL SITE ASSESSMENT**

Undeveloped Property

1.0 EXECUTIVE SUMMARY

Affordable Storage Centers (Client) engaged Bruin Geotechnical Services, Inc. (Bruin) to conduct a Phase I Environmental Site Assessment (ESA) of the approximate 10-acre undeveloped parcel, located on the north side of Avenue H, and east of 20th Street West, (Assessor Parcel number 3118-006-024), Lancaster, Los Angeles County, California 93536 (the Site). This assessment was prepared in accordance with the Environmental Protection Agency (EPA) Standards and Practices for AAI; Final Rule, 40 CFR Part 312; and American Standard for Testing Materials (ASTM) 1527-13.

The purpose of the Phase I ESA was to identify, to the extent feasible, recognized environmental conditions (RECs) in connection with the Site. This assessment included site reconnaissance, research of historical records and map research, interviewing property management personnel and regulatory agency contacts.

The Site consists of an undeveloped parcel, totaling approximately 10-acres in size, situated on the north side of Avenue H, and east of 20th Street West in Lancaster, Los Angeles County, California. The Site is unpaved and unimproved. The vicinity of the Site can generally be described as a combination of undeveloped and residential properties.

The results of this assessment have revealed no Recognized Environmental Conditions (RECs) associated with the Site.

Except for the limitations and exceptions discussed in Section 2.4, this Phase I ESA complies with the AAI. No additional services beyond the scope of the AAI were conducted as part of this assessment.

2.0 INTRODUCTION

Affordable Storage Centers (Client) engaged Bruin Geotechnical Services, Inc. (Bruin) to conduct a Phase I Environmental Site Assessment (ESA) of the approximate 10-acre undeveloped parcel, located on the north side of Avenue H, and east of 20th Street West, (Assessor Parcel number 3118-006-024), Lancaster, Los Angeles County, California 93536 (the Site). This assessment was prepared in accordance with the Environmental Protection Agency (EPA) Standards and Practices for AAI; Final Rule, 40 CFR Part 312; and American Standard for Testing Materials (ASTM) 1527-13.

2.1 Purpose

The purpose of the Phase I ESA was to identify, to the extent feasible, Recognized Environmental Conditions (RECs) in connection with the Site and, to a lesser extent, identify RECs associated with adjacent sites that may impact the Site. This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property management and regulatory agencies.

2.2 Scope of Services

The scope of work for this project includes:

- Site History Review;
- Geological and Hydrogeological Review;
- Interviews;
- Agency Records Review;
- Site and Off-Site Reconnaissance;
- Previous Environmental Report Review; and
- Report Preparation.

2.3 Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

2.4 Limitations and Exceptions

The report has been prepared in accordance with generally accepted environmental methodologies referred to in AAI and ASTM, and contains all of the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report.

The conclusions of this report are based in part, on the information provided by others. The possibility remains that unexpected environmental conditions may be encountered at the Site in locations not specifically investigated. Should such an event occur, Bruin must be notified in order that we may determine if modifications to our conclusions are necessary.

The objective of this report was to assess environmental conditions at the site, within the context of our contract and existing environmental regulations within the applicable jurisdiction. Evaluating compliance of past or future owners with applicable local, provincial and federal government laws and regulations was not included in our contract for services.

A property questionnaire was issued to the Site contact provided to Bruin, Edward Fagenson, buyer of the Site, to fill out. According to Mr. Fagenson, they are not aware of any adverse environmental conditions associated with the Site.

2.5 Special Terms and Conditions

There were no special terms or contractual conditions for this assessment.

2.6 User Reliance

Bruin understands that the Client entity, and its parents, partners, affiliates, investors, lenders, assignees, designees, successors, and assigns intend to rely upon this report as an evaluation of the environmental conditions at the Site for the purpose of deciding whether and under what conditions to proceed with the real estate transaction involving the Site. The work was performed with sufficient detail and scope to meet the standard diligence practices for an environmental assessment for an institutional investor of real estate in the current marketplace. Bruin understands that the intent is to complete an investigation which will help satisfy one of the requirements to qualify Client and its parents, partners, affiliates, investors, lenders, assignees, designees, successors, and assigns for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitation on CERCLA liability and that Client, and its parents, partners, affiliates, investors, lenders, assignees, designees, successors, and assigns may rely upon the work for the above purpose.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The Site consists of an undeveloped parcel, totaling approximately 10-acres in size, situated on the north side of Avenue H, and east of 20th Street West, in Lancaster, Los Angeles County, California. The lot is unpaved, unfenced, and unimproved. The vicinity of the Site can generally be described as a combination of undeveloped and residential properties. Appendix A provides a Site Location Map.

3.2 Structures, Roads, Other Improvements on the Site

The Site consists of land of low relief, which is currently undeveloped, unpaved, and adjacent to undeveloped properties. Avenue H is located along the south side of the site, beyond which are single-family residential properties. Dirt paths made by vehicles and pedestrians are located through portions of the Site.

3.3 Physical and Environmental Setting

Topographic coverage is provided by the U. S. Geological Survey (USGS) 7.5-minute Lancaster West, California quadrangle map. The Site is situated approximately 2,315 feet above mean sea level in an area of low relief. The regional topography slopes gradually towards the north-northwest.

No surface bodies of water were observed at the Site. Ponds associated with Amargosa Creek are located approximately 0.2-miles west of the Site. A well was depicted in a topographic map dated 1930, located approximately 0.1-mile east of the Site. From a review of the Federal Emergency Management Agency (FEMA) Flood Zone Map Panel that covers the Los Angeles County area, the **Site is located within a Special Flood Hazard Zone.**

One Sensitive receptor, a family child care facility, is reportedly not located within a ¼ mile radius of the Site, towards the southeast.

3.4 Geology and Hydrogeology

The subject Site is located in the central portion of Antelope Valley portion of the Mojave Desert at approximately 2,315 feet above mean sea level (msl). According to the EDR database, subsurface soils are part of the Hesperia formation, and include loamy fine sand. The Site is underlain by Pleistocene sand and gravel. Names of the deeper geological formations and age, including soil layer compositions, are available in the EDR Radius Map Report with Geocheck® (See Appendix H).

Alluvial deposits in the Antelope Valley consist primarily of detrital sediments derived from surrounding mountain ranges. These sediments are known to attain thickness as great as 8,000 feet in some parts of the valley. The alluvium is composed of unconsolidated deposits of sand, gravel, silt and clay, which overlie crystalline igneous and metamorphic rocks that form the basement complex in the region

The Site is located within the central portion of the Lancaster subunit of the Antelope Valley Groundwater Basin. A review of nearby facilities listed on the State Water Resources Control Board Geotracker Database is limited, but indicates that depth to groundwater at the Site vicinity is greater than 20 feet below ground surface (bgs). Groundwater wells are reportedly located in the Site vicinity. The groundwater flow pattern is expected to follow the local topographic gradient, which is towards the north-northwest. Details on water wells located within a one-mile radius of the Site, including a location map, are provided in the Physical Setting Source Summary section of the EDR Radius Map Report with Geocheck® (See Appendix G).

4.0 USER PROVIDED INFORMATION

4.1 Property Owner Questionnaire

An AAI questionnaire pertaining to ownership and potential environmental liens was provided by Edward Fagenson, buyer of the site. According to Mr. Fagenson, they are not aware of any adverse environmental conditions regarding the Site.

4.2 Title Records

A Title Report for the Site was not provided to Bruin for this assessment.

4.3 Specialized Knowledge

The property contact for the Site denied any specialized knowledge or awareness of environmental issues that would be considered a Recognized Environmental Condition at the Site or nearby properties.

4.4 Commonly Known or Reasonably Ascertainable Information

The property contact for the Site was not aware of any environmental impacts to the Site. Previous environmental reports for the Site were not provided to Bruin.

4.5 Valuation Reduction for Environmental Issues

The property contact for the Site was not aware of a value reduction for environmental issues for the Site.

4.6 Property Manager, Occupant Information

Contractual agreements between owner and occupant were not provided to Bruin for review, as the property is undeveloped.

5.0 HISTORICAL RECORDS REVIEW

A historical review of Site land uses was conducted by Bruin using information from the following sources:

- Interviews;
- Historical maps;
- Aerial photographs;
- Topographical maps; and
- Previous Environmental Reports.

The sources were reviewed for indications of past site land use and/or site activities that may have involved the manufacture, generation, use, storage and/or disposal of hazardous materials. A summary of the review of each of the sources is provided in the following subsections. Support for the historical records review is provided in Appendix D.

5.1 Owners, Tenants, Property Managers

The property contact for the Site did not provide Bruin with previous reports for the Site. The current Site owners reportedly are the Clapp Family Revocable Trust and the Prout Childrens' Trust, who have reportedly owned the Site property since approximately 1994.

5.2 Historical Maps

A review of the Sanborn Fire Insurance Map database indicates that coverage for the Site vicinity was not available.

Examination of the California Department of Conservation, Division of Oil Gas and Geothermal Resources (CDOGGR) regional well maps, available at the CDOGGR website, was conducted to examine the Site's potential of being impacted by possible previous oil well activities. Based on these well records, no oil, gas, or geothermal wells are located onsite or within a one-mile radius of the Site.

A review of Historical Topographical Maps is detailed in Section 5.4 of this report.

5.3 Aerial Photographs

A review of historical aerial photographs for the following years: 1928, 1940, 1948, 1953, 1968, 1970, 1974, 1981, 1989, 1994, 2002, 2005, 2009, 2012 and 2016 for the Site and adjoining properties follows:

Year	Features
1928	The Site and vicinity are undeveloped and mostly undisturbed. Some dirt paths are viewed on the Site and in the greater Site vicinity. A road is viewed along the south side of the Site. An area of denser vegetation is viewed approximately 0.1-mile to the east of the Site, in the approximate location where a well is depicted on a 1930 topographic map.
1940	The Site and Site vicinity appear substantially unchanged from conditions viewed in the 1928 aerial photograph.
1948	The Site and Site vicinity appear substantially unchanged from conditions viewed in the 1940 aerial photograph.
1953	The Site and Site vicinity appear substantially unchanged from conditions viewed in the 1948 aerial photograph.
1968	The Site remains undeveloped, but now with a path running east-west through the middle of the Site. The immediate vicinity also contains numerous paths running east-west and north-south. A pond is now viewed west of the Site.
1970	The Site and Site vicinity remain substantially unchanged from conditions viewed in the 1968 aerial photograph.
1974	The Site and vicinity remain substantially unchanged from conditions viewed in the 1970 aerial photograph.
1981	The Site and vicinity remain substantially unchanged from conditions viewed in the 1974 aerial photograph.
1989	The Site remains substantially unchanged from conditions viewed in the 1981 aerial photograph. The area south of the Site has seen clearing and grading.
1994	The Site and vicinity appear substantially unchanged from conditions viewed in the 1989 aerial photograph.
2002	The Site appears substantially unchanged from conditions viewed in the 1994 aerial photograph. The area south of the Site now contains single-family residences.
2005	The Site and vicinity appear substantially unchanged from conditions viewed in the 2002 aerial photograph.
2009	The Site and vicinity appear substantially as in the 2005 aerial photograph.
2012	The Site and vicinity appear substantially as in the 2009 aerial photograph
2016	The Site and vicinity appear substantially as in the 2012 aerial photograph

5.4 Topographical Maps

A review of available historical topographic maps was conducted for the site and surrounding area for the following years: 1915, 1917, 1930, 1933, 1948, 1958, 1974 and 2012.

Year	Features
1915	The Site and immediate vicinity are depicted as undeveloped. Roads are depicted in the Site vicinity, including one along the south side of the Site. A water channel is depicted approximately 0.5-mile west of the Site, and railroad tracks are depicted approximately 1.2-miles to the east.
1917	The Site and vicinity remain substantially unchanged from conditions depicted in the 1915 topographic map.
1930	The Site and vicinity remain substantially unchanged from conditions depicted in the 1917 topographic map, with the addition of a well depicted approximately 0.1 mile east of the Site.
1933	The Site and vicinity remain undeveloped and substantially unchanged from conditions depicted in the 1930 topographic map.
1948	The Site and vicinity remain substantially unchanged from conditions depicted in the 1933 topographic map.
1958	The Site remains undeveloped, but now with a path running east-west through the middle of the Site. The immediate vicinity also contains numerous paths running east-west and north-south. Amargosa Creek, located approximately 0.5-mile west of the Site, now contains ponds associated with a newly depicted sewage disposal facility.
1974	The Site and vicinity remain substantially unchanged from conditions depicted in the 1958 topographic map, with the addition of a groundwater recharge basin located approximately 0.2-mile west of the Site.
2012	The 2012 topographic map is essentially a street map, without depiction of any structures or development.

5.5 Previous Environmental Reports

Previous environmental reports for the Site were not presented to Bruin for review.

6.0 SITE RECONNAISSANCE

The purpose of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the Site.

6.1 Methodology and Limiting Conditions

The Site reconnaissance was conducted by Robert Glaser, Environmental Director for Bruin, on December 1, 2021. The weather during the site visit was clear, and the temperatures in the upper 50-degree range. All areas of the Site were accessible at the time of the inspection. Relevant photographs from the Site visit are provided in Appendix F.

6.2 Site Features - Required

The Site consists of land of low relief, which is currently undeveloped, unpaved, and adjacent to undeveloped and residential properties. Avenue H is located along the south side of the Site, beyond which are single-family housing. Several dirt paths where vehicles and pedestrians have traversed are located throughout the Site. Debris, consisting of household type trash, is located in piles and also scattered on the northwest and northwestern-central portions of the Site.

The Site has nearby access to electrical service through overhead power lines, by Southern California Edison, by underground natural gas, provided by the Gas Company, and by water through the City of Lancaster.

As part of the ASTM Phase I Environmental Site Assessment, data on a series of topics must be collected during the Site visit. Specifics for each of the following topics are provided in the following sub-sections.

- Hazardous Materials
- Hazardous Wastes
- Solid Wastes / Recyclables
- Wastewater / Stormwater
- Drains, Sumps, and Clarifiers
- Underground Storage Tanks (USTs)
- Aboveground Storage Tanks (ASTs)
- Wells
- Stained Pavement, Corrosion, Soil or Stressed Vegetation
- Pits, Ponds, or Lagoons
- Odors
- Polychlorinated Biphenyls

6.2.1 Hazardous Materials

Evidence of hazardous materials, including drums or other containers, was not viewed on the Site. No hazardous materials or wastes were observed on the Site. No significant surface staining or stressed vegetation was observed on the Site property during Bruin's Site visit.

6.2.2 Hazardous Wastes

Evidence of hazardous material use, and waste generation (e.g., hazardous waste accumulation containers) was not observed at the Site. Household type debris was observed on the Site. No areas of hazardous waste generation or surface staining were observed at the time of Bruin's Site visit.

6.2.3 Solid Waste / Recyclables

No evidence of solid waste disposal or recyclable segregation was observed on the Site.

6.2.4 Wastewater / Stormwater

No routine sources of industrial wastewater were observed at the Site. Stormwater contact with the Site is directed onto adjacent properties and streets, and into storm drains.

6.2.5 Drains, Sumps, Clarifiers

Neither storm drains nor clarifiers were observed on the Site.

6.2.6 Underground Storage Tanks

No indirect evidence of current or previous USTs, such as concrete pads, fill ports, vents, dispensers, or electrical conduits was observed during the Site visit.

6.2.7 Aboveground Storage Tanks

No ASTs were observed during the Site visit. No indirect evidence of ASTs, such as cement pads, odors, or soil staining was observed to suggest that ASTs were formerly present on site.

6.2.8 Wells

No evidence of water wells, injection wells, groundwater monitoring, or oil and gas wells was observed during the Site visit.

6.2.9 Stained Pavement, Corrosion, Soil, or Stressed Vegetation

No significantly stained soil or stressed vegetation was observed during the Site visit.

6.2.10 Pits, Ponds, Lagoons, Standing Water

No evidence of pits, ponds, or lagoons was observed during Bruin's Site visit.

6.2.11 Odors

No strong, pungent or noxious odors were detected during the Site visit.

6.2.12 PCBs

The past use of polychlorinated biphenyls (PCBs) in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors manufactured before 1978 was common. Since the Site is undeveloped, PCBs are not expected to be located on the Site property.

6.3 Current Use of Adjoining Properties

Appendix B provides a surrounding land use map. At the time of the Site visit, the properties adjacent to the Site consisted of the following:

North	Undeveloped properties
East	Undeveloped properties
South	Avenue H, beyond which are residential properties
West	Undeveloped properties

6.4 Site Features – Optional

The ASTM Phase I Environmental Site Assessment does not require data on the following environmental topics, but the information is provided because it was readily available.

6.4.1 Radon

The EDR Radius Map and Geocheck® Report (Appendix G) provides information on radon concentrations based on geography. A summary of the information is provided in this section. The EPA action level for indoor radon concentrations is 4 picocuries per liter of air (pCi/L). For Zip Code 93536, 22 sample locations were tested by the Federal Environmental Protection Agency (EPA). Of the sample sites, no sample from any test exceeded 4 pCi/L. Based on the EPA Map of Radon Zones' category of Zone 2, which indicates moderate radon potential measurements of between 2 to 4 pCi/L, and indications that none out of twenty-two samples from the Site vicinity exceeded the 4 pCi/L, radon appears to be a low concern at the Site.

6.4.2 Mold and Indoor Air Quality

Since there are no permanent structures on the Site property, mold is not anticipated to be an issue.

6.4.3 Lead-Based Paint/Asbestos

Lead-based paint and asbestos-containing materials (ACMs) were commonly used prior to 1978. Since there are no permanent structures currently on the Site, lead-based paint and ACMs are not likely to be present on the Site.

6.4.4 Electromagnetic Fields

No high voltage electrical transmission lines and associated poles were observed adjacent to the Site. The California Public Utilities Commission and the California Department of Health Services have not concluded that exposure to magnetic fields from utility electric facilities is a health hazard.

6.4.5 Vapor Encroachment Screen

The Vapor Encroachment Screen performed for the Site did not reveal potential significant sources for hazardous vapor migration onto the Site property from off-site sources, based on local area geology and status of nearby facilities. The Vapor Encroachment Screen is included in Appendix H of this report.

7.0 AGENCY RECORDS REVIEW

The purpose of the agency records review is to obtain and review records that will help identify recognized environmental conditions (RECs) in connection with the Site and, to a lesser extent, identify RECs associated with adjacent sites that may impact the Site.

Some records reviewed pertain not only to the Site, but also to properties within an additional approximate minimum search distance to help assess the likelihood of problems from migrating hazardous substances or petroleum products. Unless stated otherwise the approximate minimum search distances used below are as specified in the AAI Standard.

7.1 Environmental Liens or Activity and Use Limitations (AULs)

No environmental liens or other activity and use limitations were identified for the Site location.

7.2 Environmental Records

A search of available federal and state environmental records was obtained from Environmental Data Resources (EDR) of Milford, Connecticut. A copy of this search report is provided in Appendix I.

A review of the regulatory information from this database search for possible recognized environmental conditions (RECs) within the AAI approximate minimum search distance is provided in Tables 1 and 2. The Site is not listed in the EDR report, or within the summary as follows:

Table 1 - Federal Environmental Records

Record Source	Within Site	Nearby/Adjoining Properties
National Priorities List (NPL)	0	0
Delisted NPL	0	0
CERCLIS	0	0
CERCLIS NFRAP	0	0
RCRA CORRACTS TSD	0	0
RCRA Non-CORRACTS TSD	0	0
RCRA LQG (waste generators)	0	0
RCRA SQG (waste generators)	0	0
FINDS	0	0
EDR Historical Auto Database	0	0
Institutional/Engineering Controls	0	0

Table 2 - State Environmental Records

Record Source	Within Site	Nearby/Adjoining Properties
Hazardous Waste	0	0
Hazardous Waste Generators	0	0
Equivalent NPL	0	0
Equivalent CERCLIS	0	0
Landfill/Solid Waste Disposal	0	0
Leaking Underground Storage Tanks (LUST)	0	0
Spills, Leaks, Investigations, and Cleanups (SLIC)	0	0
Registered Underground Storage Tank	0	0
Voluntary Cleanup	0	0
Brownfield	0	0
WIP	0	0

Based on absence of listed hazardous generating facilities, it is unlikely that a significant environmental impact to the Site from nearby facilities has occurred.

7.3 Agency Contacts

Bruin contacted the following agencies regarding environmental issues at the Site. Below is a summary of the findings.

- **City of Lancaster, Building Department** was contacted, and reported no historical permits for the Site located in their files.
- **Los Angeles County Assessor's Office** was not visited in person. The computer records were reviewed. The parcel number is 3118-006-024, showing no improvements to the Site.
- **Los Angeles County Department of Environmental Health** reported that no records related to underground storage tanks or other issues were located for the Site location.
- **Los Angeles County Fire Department** reported that no records related to underground storage tanks or other issues were located for the Site location.
- **Regional Water Quality Control Board** reported no records within their files for the Site location.

8.0 FINDINGS

8.1. GENERAL

The Site consists of an undeveloped parcel, totaling approximately 10-acres in size, situated on the north side of Avenue H, and east of 20th Street West, in Lancaster, Los Angeles County, California. The lot is unpaved, unfenced, and unimproved. The vicinity of the Site can generally be described as a combination of undeveloped and residential properties. Appendix A provides a Site Location Map.

8.2. GEOLOGICAL / HYDROLOGICAL

The subject Site is located in the central portion of Antelope Valley portion of the Mojave Desert at approximately 2,315 feet above mean sea level (msl). According to the EDR database, subsurface soils are part of the Hesperia formation, and include loamy fine sand. The Site is underlain by Pleistocene sand and gravel. Names of the deeper geological formations and age, including soil layer compositions, are available in the EDR Radius Map Report with Geocheck® (See Appendix H).

Alluvial deposits in the Antelope Valley consist primarily of detrital sediments derived from surrounding mountain ranges. These sediments are known to attain thickness as great as 8,000 feet in some parts of the valley. The alluvium is composed of unconsolidated deposits of sand, gravel, silt and clay, which overlie crystalline igneous and metamorphic rocks that form the basement complex in the region

The Site is located within the central portion of the Lancaster subunit of the Antelope Valley Groundwater Basin. A review of nearby facilities listed on the State Water Resources Control Board Geotracker Database is limited, but indicates that depth to groundwater at the Site vicinity is greater than 20 feet below ground surface (bgs). Groundwater wells are reportedly located in the Site vicinity. The groundwater flow pattern is expected to follow the local topographic gradient, which is towards the north-northwest. Details on water wells located within a one-mile radius of the Site, including a location map, are provided in the Physical Setting Source Summary section of the EDR Radius Map Report with Geocheck® (See Appendix G).

8.3. ENVIRONMENTAL SETTING

Topographic coverage is provided by the U. S. Geological Survey (USGS) 7.5-minute Lancaster West, California quadrangle map. The Site is situated approximately 2,315 feet above mean sea level in an area of low relief. The regional topography slopes towards the north-northwest.

No surface bodies of water were observed at the Site. Ponds associated with Amargosa Creek are located approximately 0.2-miles west of the Site. A well was depicted in a topographic map dated 1930, located approximately 0.1-mile east of the Site. From a review of the Federal Emergency Management Agency (FEMA) Flood Zone Map Panel that covers the Los Angeles County area, the Site is located within a Special Flood Hazard Zone. One Sensitive receptor, a family child care facility, is reportedly not located within a ¼ mile radius of the Site, towards the southeast.

8.4 HISTORICAL LAND USE

Historical sources reviewed, provided consistent information for the land use of the subject property. According to the aerial photos, the entire Site was undeveloped and unused from at least 1928 through present day.

1. **HISTORICAL OWNERS** – According to the City of Lancaster Building Department, and the Los Angeles County Assessor’s Office, historical owners are not listed within their records. A copy of the Title Report was not provided to Bruin for review. According to the Site contact, the current Site owners are the Clapp Family Revocable Trust and the Prout Childrens’ Trust, who have reportedly owned the Site property since approximately 1994.
2. **EASEMENTS / OPEN LIENS / ENVIRONMENTAL RESTRICTIONS** – No open liens, environmental restrictions, or environmental easements (e.g., oil pipelines) were identified during our research of public records. A title report for the subject property was not provided for review during this assessment.
3. **HAZARDOUS MATERIALS AND WASTE** –
Current –Although household type debris was observed on the Site, No evidence of hazardous waste generation (e.g., hazardous waste accumulation containers) was observed on the Site during Bruin’s Site visit.
Historical –No evidence of existing hazardous materials or waste was identified.
4. **UNDERGROUND STORAGE TANKS (USTs)** – Current – No evidence of an operating UST was identified for the Site. Historical – No evidence of historical USTs was identified for the Site through records/database research.
5. **ABOVEGROUND STORAGE TANKS (ASTs)** – Current – No evidence of an operating AST was identified for the Site. No evidence was identified to confirm the previous presence of ASTs.
6. **AGENCY CONTACTS** – No unresolved environmental compliance issues (e.g., outstanding Notices of Violation) with regulatory agencies were identified for the subject property.
7. **SURROUNDING LAND USE** – The Site is undeveloped. Surrounding land use consists of a mixture undeveloped and residential properties.

CONCLUSIONS

The purpose of the Phase I ESA was to identify, to the extent feasible, recognized environmental conditions (RECs) (1) in connection with the Site. This assessment included site reconnaissance, research of historical records and map research, interviews with property managers and regulatory agency contacts.

Bruin performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of AAI and ASTM for the Site, the approximate 10-acre undeveloped parcel, located on the north side of Avenue H, and east of 20th Street West, (Assessor Parcel number 3118-006-024), Lancaster, Los Angeles County, California 93536 (the Site). This assessment was prepared in accordance with the Environmental Protection Agency (EPA) Standards and Practices for AAI; Final Rule, 40 CFR Part 312; and American Standard for Testing Materials (ASTM) 1527-13. Any exceptions to, or deletions from, this practice are described in Section 11 of this report. The following conclusions have been reached based on the services conducted.

The results of this assessment have revealed no Recognized Environmental Conditions (RECs) (1) associated with the Site.

(1) REC - This term is defined as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into the structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with the law. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

9.0 RECOMMENDATIONS

Based on the information collected during this Phase I environmental site assessment, no additional environmental site investigations are warranted for potential RECs or de minimis conditions.

10.0 OPINION

There were no data gaps that significantly affected our ability to identify recognized environmental conditions associated with the Site.

11.0 DEVIATIONS

Except for the limitations and exceptions discussed in Section 2.4, this Phase I ESA complies with the AAI and ASTM Standards.

12.0 ADDITIONAL SERVICES

No additional services beyond the scope of the AAI were conducted as part of this assessment.

14.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared by:

Mark Stevens
Director

Robert Glaser
Director of Environmental Health and Safety

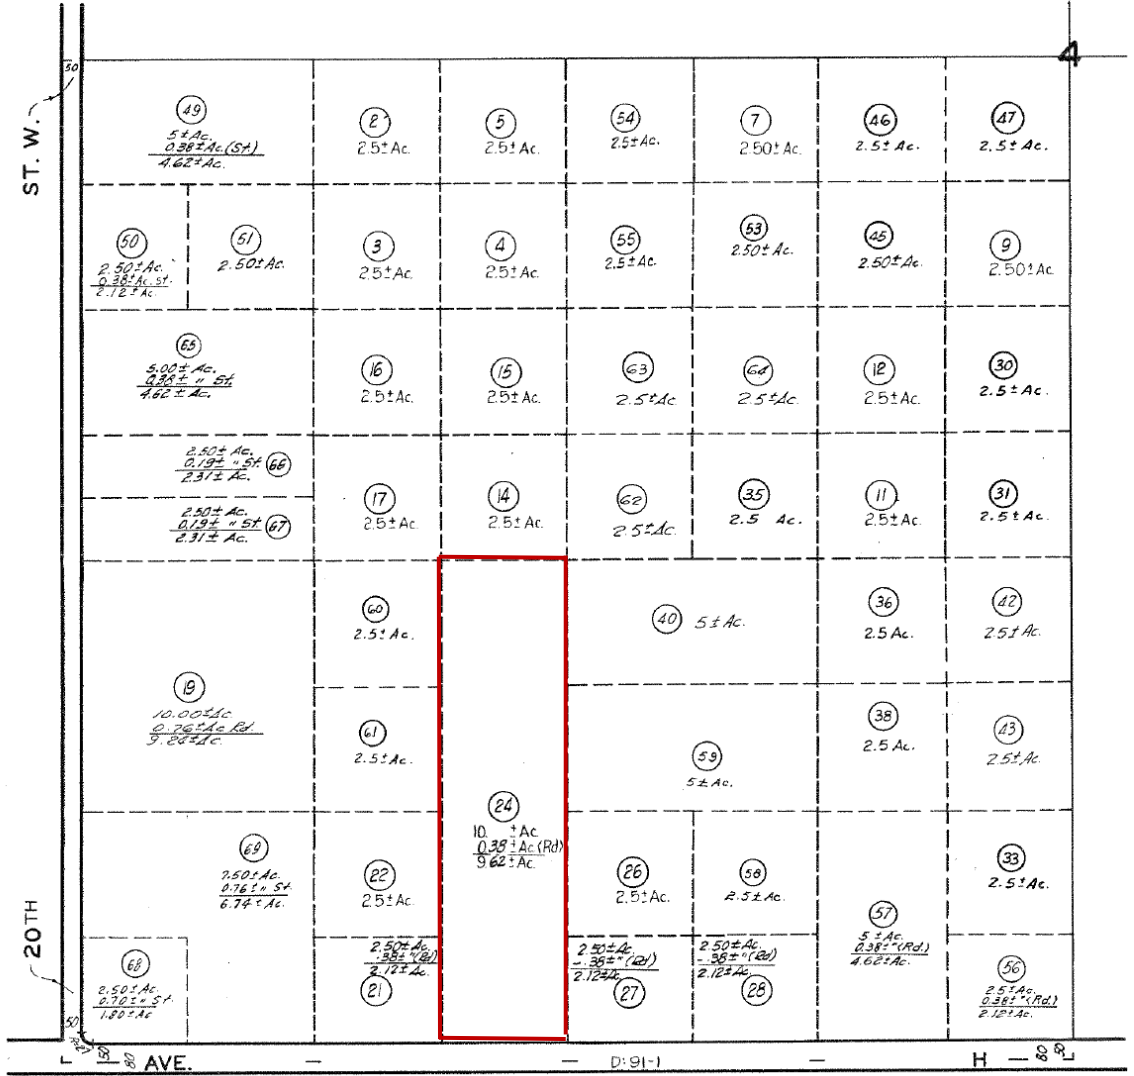

15.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

The qualifications of the environmental professionals involved in the preparation of this report are provided in Appendix G.

OWNER QUESTIONNAIRE

Phase I Questionnaire

Property Address: APN: 3118-006-024

The following questionnaire is required by the new ASTM Standard E-1527-05, which adheres to the new All Appropriate Inquiries Rule, written into law on November 1, 2005 by the United States Environmental Protection Agency. If you answer yes to any of the questions, and need additional space to explain, please use additional paper and reference the question number.

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the Property that are filed or recorded under federal, tribal, state or local law? If so, please provide.

No development ever done on the raw land. No cleanup liens found in title search

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the Property and/or have been filed or recorded in a registry under federal, tribal, state or local law? If so, please provide.

Title search shows: IN Special Flood Hazard area, IN Area of Potential Flooding, IN Seismic, Liquefaction area. See attached.

(3.) Specialized knowledge or experience of the person seeking to qualify for the Landowner's Liability Protection (LLP) (40 CFR 312.28).

As the user of this Phase I Environmental Site Assessment ESA do you have any specialized knowledge or experience related to the Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No adjoining properties, Land never previously developed. Site visit suggests no dumping.

Phase I Questionnaire

Property Address: APN: 3118-006-024

The following questionnaire is required by the new ASTM Standard E-1527-05, which adheres to the new All Appropriate Inquiries Rule, written into law on November 1, 2005 by the United States Environmental Protection Agency. If you answer yes to any of the questions, and need additional space to explain, please use additional paper and reference the question number.

(4.) Relationship of the purchase or rental price to the fair market value of the Property if it were not contaminated (40 CFR 312.29).

Does the purchase or rental price being paid for this Property reasonably reflect the fair market value of the Property?

Yes, we think so. Similar properties in the area available for sale for slightly more per acre.

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Property?

(5.) Commonly known or reasonably ascertainable information about the Property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the Property? Please identify:

No past use

(b.) Do you know of specific chemicals that are present or once were present at the Property? (Please provide an inventory of bulk liquids/chemicals and locations):

None

(c.) Do you know of spills or other chemical releases that have taken place at the Property?

No

(d.) Do you have any prior knowledge that the Property was developed with a gas station, dry cleaner, machine shop or industrial facility in the past?

No

Phase I Questionnaire

Property Address: APN: 3118-006-024

The following questionnaire is required by the new ASTM Standard E-1527-05, which adheres to the new All Appropriate Inquiries Rule, written into law on November 1, 2005 by the United States Environmental Protection Agency. If you answer yes to any of the questions, and need additional space to explain, please use additional paper and reference the question number.

(e.) Have you been informed of the past existence of hazardous substances or petroleum products with respect to the Property or any facility located on the Property?

No

(f.) Do you know if one or more underground storage tanks (USTs) or septic tanks are currently, or were previously located at the Property? (Indicate size, contents and locations of USTs).

No

(g.) Do you know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the Property by any owner or occupant of the Property?

No

(h.) Do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the Property?

No dumping visible when we walked the site.

(i.) What year was the Property building constructed (if developed)?

Not previously developed.

(j.) Do you know of any environmental cleanups that have taken place at the Property?

No

Phase I Questionnaire

Property Address: APN: 3118-006-024

The following questionnaire is required by the new ASTM Standard E-1527-05, which adheres to the new All Appropriate Inquiries Rule, written into law on November 1, 2005 by the United States Environmental Protection Agency. If you answer yes to any of the questions, and need additional space to explain, please use additional paper and reference the question number.

(k.) Are you in possession of any previous environmental reports for the Property? (e.g. Phase I Environmental Site Assessment or subsurface investigation reports. If so, please provide).

No

(l.) Are you in possession of any previous environmental permits for the Property?

No

(6.) The degree of obviousness of the presence of likely presence of contamination at the Property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the Property are there any obvious indicators that point to the presence or likely presence of contamination at the Property?

No

(7.) For what purpose is this Phase I Environmental Site Assessment being conducted, i.e. real estate transaction, lender requirement, etc.?

Real Estate Transaction. Plan to develop RV & Boat storage facility.

(8.) Who is the current owner of the Property and how long has he/she owned the Property?

Betsy Clapp, Trustee of the Clapp Family Revocable Trust and Maita Prout, Trustee of the Prout Childrens Trust. We believe the owners have held the property since 1994.

(9.) List Current and Past Tenants (if any) and approximate dates:

None

Phase I Questionnaire

Property Address: APN: 3118-006-024

The following questionnaire is required by the new ASTM Standard E-1527-05, which adheres to the new All Appropriate Inquiries Rule, written into law on November 1, 2005 by the United States Environmental Protection Agency. If you answer yes to any of the questions, and need additional space to explain, please use additional paper and reference the question number.

(10.) List current hazardous materials/chemicals used/stored/generated, (if any), which are above household quantities:

None

(11.) Do you have a Title Search for the Property (if so, please provide)?

Yes. Attached.

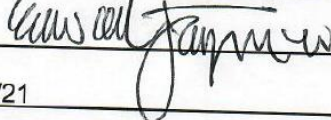

If not, would you like us to order one? This is not within the ASTM Standard scope. However, we are required to ask the Client this question, even though it is an additional scope, not included in the ASTM standard. The approximate cost for a Title Search with analysis and incorporation into the report is \$500.

I certify that the above responses were made to the best of my knowledge.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Certified Sanborn® Map Report

11/29/21

Site Name:

3118-006-024
AVE H VIC 20 STW
Lancaster, CA 93534
EDR Inquiry # 6768144.3

Client Name:

Summit Environmental Systems
30021 Garces Ct
Bear Valley Springs, CA 93561
Contact: Robert Glaser

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Summit Environmental Systems were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edr.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 0618-423F-880D

PO # NA

Project 21-626

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 0618-423F-880D

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Summit Environmental Systems (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. Robert David Glaser

SUMMARY

I am currently the Director of Environmental Health and Safety for Bruin Geotechnical Services, where I have coordinated, conducted, wrote and reviewed hundreds of environmental Site Assessments, Pollution Prevention plans, Spill Prevention plans, and Health and Safety Plans. I have investigated and remediated numerous impacted soil and groundwater sites, performed facility startups and facility closures for major transportation companies throughout the country. My duties also included writing, designing and Implementing Environmental Health and Safety plans, I have managed and trained staff regarding Environmental and EH&S Projects at numerous locations.

Bruin Geotechnical Services, Palmdale, California; 2004-Present Director of Environmental Health and Safety

- ◆ Coordinated, conducted, wrote and reviewed hundreds of environmental Site Assessments, Pollution Prevention plans, Spill Prevention plans, and Health and Safety Plans. Wrote, designed and Implemented Environmental Health and Safety plans, Managed and trained staff regarding Environmental and EH&S Projects at numerous locations.
- ◆ Worked extensively with Local and State Government agencies, including Regional Water Quality Control Boards, Air Quality Management Districts, State Air Resources Board, Department of Health Services, Fire Departments and Planning Commissions.
- ◆ Conducted numerous Underground Storage Tank removals and soil and groundwater investigation and remediation projects.
- ◆ Conducted Environmental and Safety Audits for numerous local and national clients.
- ◆ Trained and Mentored staff in Environmental Compliance and OSHA related Safety and Injury Prevention programs.

ATC Associates, Arcadia, California, 1998-2004 Senior Project Manger

- ◆ On an as-requested basis, Managed Environmental Projects ranging from Phase-I and Phase-II Environmental Site Assessments to Underground Storage Tank removal and remediation projects.
- ◆ Consulted with companies to help them develop Environmental Health and Safety Plans.

EMCON Associates, Burbank, California, 1992-1994
Environmental Scientist

- ◆ Performed Phase-I and Phase-II Environmental Site Assessments and Underground Storage Tank removal and remediation projects.

Jacobs Engineering Group, Pasadena, California, 1990-1992
Environmental Scientist

- ◆ Performed Underground Storage Tank removal and remediation projects at military bases throughout southern California.

EDUCATION

- ◆ Biological Studies curriculum from Antelope Valley College.
- ◆ Hazardous materials Management program curriculum from the University of California at Los Angeles Extension.
- ◆ Bachelor's Degree in Environmental Studies from University of California at Santa Barbara.

CERTIFICATIONS

- ◆ Registered Environmental Assessor (#04443), State of California, 1992
- ◆ 40-Hour Hazardous Waste Worker (HAZWOPER) Certified, 1991
- ◆ 30-Hour OSHA General Industry Certification, 1998 and 2010
- ◆ Certified Environmental Manager (#1780), State of Nevada, 2004

KEY PROGRAM AUTHORIZING

- ◆ Illness and Injury Prevention Program
- ◆ Airborne Contaminate Program
- ◆ Chemical Inventory Management Program
- ◆ Waste Management and Minimization Program
- ◆ Underground Storage Tank Program
- ◆ Storm Water Pollution Prevention Plan
- ◆ Spill Prevention Control and Countermeasure Plan
- ◆ Heat Stress Program

ADDITIONAL INFORMATION

I have an exceptional working relationship with clients, and government agencies, labor and management. I have excellent knowledge of state and federal environmental and safety regulations, am computer proficient, organized, and write clear and concise reports.

Disclaimer - Copyright and Trademark Notice

The EDR Vapor Encroachment Worksheet enables EDR's customers to make certain online modifications that effects maps, text and calculations contained in this Report. As a result, maps, text and calculations contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. Environmental Data Resources shall not be responsible for any customer's decision to include or not include in any final report any records determined to be within the relevant minimum search distances.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.**

Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by EDR. The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

STANDARD ENVIRONMENTAL RECORDS	Default Area of Concern (Miles)*	property	1/10	> 1/10
Lists of Federal NPL (Superfund) sites	1.0	0	0	0
Lists of Federal Delisted NPL sites	1.0	0	0	0
Lists of Federal sites subject to CERCLA removals and CERCLA orders	0.5	0	0	0
Lists of Federal CERCLA sites with NFRAP	0.5	0	0	0
Lists of Federal RCRA facilities undergoing Corrective Action	1.0	0	0	0
Lists of Federal RCRA TSD facilities	0.5	0	0	0
Lists of Federal RCRA generators	0.25	0	0	0
Federal institutional controls / engineering controls registries	0.5	0	0	0
Federal ERNS list	0.001	0	0	-
Lists of state- and tribal (Superfund) equivalent sites	1.0	0	0	0
Lists of state- and tribal hazardous waste facilities	1.0	0	0	0
Lists of state and tribal landfills and solid waste disposal facilities	0.5	0	0	0
Lists of state and tribal leaking storage tanks	0.5	0	0	0
Lists of state and tribal registered storage tanks	0.25	0	0	0
State and tribal institutional control / engineering control registries	not searched	-	-	-
Lists of state and tribal voluntary cleanup sites	0.5	0	0	0
Lists of state and tribal brownfield sites	0.5	0	0	0

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists	0.5	0	0	0
Local Lists of Landfill / Solid Waste Disposal Sites	0.5	0	0	0
Local Lists of Hazardous waste / Contaminated Sites	1.0	0	0	0
Local Lists of Registered Storage Tanks	0.25	0	0	0
Local Land Records	0.5	0	0	0
Records of Emergency Release Reports	0.5	0	0	0
Other Ascertainable Records	1.0	0	0	0

EDR HIGH RISK HISTORICAL RECORDS

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing
SEMS..... Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS..... Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG..... RCRA - Large Quantity Generators
RCRA-SQG..... RCRA - Small Quantity Generators
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System

EXECUTIVE SUMMARY

US ENG CONTROLS..... Engineering Controls Sites List

RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2021	Source: EPA
Date Data Arrived at EDR: 08/04/2021	Telephone: N/A
Date Made Active in Reports: 08/31/2021	Last EDR Contact: 11/05/2021

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 09/15/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/03/2022
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 07/12/2021	Source: Department of the Navy
Date Data Arrived at EDR: 08/06/2021	Telephone: 843-820-7326
Date Made Active in Reports: 10/22/2021	Last EDR Contact: 11/08/2021
Number of Days to Update: 77	Next Scheduled EDR Contact: 02/21/2022
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/23/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/23/2021	Telephone: 703-603-0695
Date Made Active in Reports: 11/12/2021	Last EDR Contact: 11/18/2021
Number of Days to Update: 81	Next Scheduled EDR Contact: 03/06/2022
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/23/2021	Source: Environmental Protection Agency

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 07/15/2021	Source: CalEPA
Date Data Arrived at EDR: 07/15/2021	Telephone: 916-323-2514
Date Made Active in Reports: 10/06/2021	Last EDR Contact: 10/19/2021
Number of Days to Update: 83	Next Scheduled EDR Contact: 01/31/2022
	Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/18/2021	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/18/2021	Telephone: 202-307-1000

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

	Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/23/2021	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/10/2021	Telephone: 860-424-3375
Date Made Active in Reports: 11/08/2021	Last EDR Contact: 11/12/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

3118-006-024
AVE H VIC 20 STW
LANCASTER, CA 93534

TARGET PROPERTY COORDINATES

Latitude (North):	34.720574 - 34° 43' 14.07"
Longitude (West):	118.162313 - 118° 9' 44.33"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	393572.7
UTM Y (Meters):	3842474.8
Elevation:	2317 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12021695 LANCASTER WEST, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C0410F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
Not Reported	

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LANCASTER WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Pond

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 4 Min: 1.4	Max: 9.6 Min: 8.5
2	3 inches	24 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 4 Min: 1.4	Max: 9.6 Min: 8.5
3	24 inches	72 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 4 Min: 1.4	Max: 9.6 Min: 8.5

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
