

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Sacramento County Climate Action Plan

Lead Agency: Sacramento County

Contact Name: Todd Smith

Email: smithtodd@sacounty.gov Phone Number: 916-874-6918

Project Location: unincorporated Sacramento County

City

County

Project Description (Proposed actions, location, and/or consequences).

The overall objective of the 2024 CAP is to reduce GHG emissions generated from activities within the unincorporated county (community) and GHG emissions generated by County facilities and operational activities throughout the county, including facilities and operations located within incorporated cities, to meet or exceed GHG reduction goals under State laws. The CAP will establish a GHG emissions reduction strategy informed by a baseline inventory and forecast emissions, and establish a strategy for adapting to the impacts of climate change,

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The evaluation of potential environmental effects in the SEIR will focus on whether the CAP would result in any new or substantially more severe significant impacts compared to those identified in the certified 2030 General Plan EIR. At this time, the County has determined that the CAP could result in new or substantially more severe significant effects on the following resource areas: air quality, biological resources, energy, greenhouse gas emissions, transportation, and tribal cultural resources.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Areas of known controversy include the County's adopted 2030 General Plan growth management strategy, the County's Climate Emergency Declaration, and the feasibility of achieving carbon neutrality before 2045.

Provide a list of the responsible or trustee agencies for the project.

Potential trustee agencies:
California Air Resources Board
California Department of Water Resources
Delta Protection Commission
