

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Hastings Tract Pipe Replacement Project

Lead Agency: Reclamation District No. 2060, Hastings Tract

Contact Name: Michael Kynett

Email: kynett@mbkengineers.com

Phone Number: 916-799-0641

Project Location: Hastings Tract, Solano County

*City*

*County*

Project Description (Proposed actions, location, and/or consequences).

Reclamation District No. 2060 to relocate twin 48-inch diameter tide gates along Hastings Cut from the Unit 3 Cache Slough levee at its northeastern end to the Unit 1 Lindsey Slough levee at its southwestern end to maintain levee integrity and provide long-term flood protection to Hastings Tract.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Based on the Initial Study, the Project, including conservation measures that are part of the Project design, will not have significant effects on the environment. This conclusion is supported by the following findings:

- The Project will have no impact on cultural resources, land use and planning, mineral resources, population and housing, public services, recreation, transportation, tribal cultural resources, and wildfire. •The Project will result in less-than-significant impacts on aesthetics, agriculture and forestry resources, energy, geology and soils, greenhouse gas emissions, hazards and hazardous materials, noise, and utilities and service systems. •Mitigation is included to reduce potentially significant impacts to less-than-significant levels for biological resources and hydrology and water quality.
- With incorporation of mitigation measures, the Project will not substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.
- With incorporation of mitigation measures, the Project will not have environmental effects that are individually limited, but cumulatively considerable. •With incorporation of mitigation measures, the Project will not have environmental effects which would cause substantial adverse effects on human beings, either directly or indirectly.

Proposed Mitigation Measures: Mitigation measures included in the Project to avoid or minimize potential environmental impacts are included in the attached Initial Study, which is hereby incorporated and fully made part of this Mitigated Negative Declaration. Implementation of these mitigation measures will ensure that the potential environmental impacts of the Project are less than significant. RD 2060 has agreed to implement each of the identified mitigation measures, which will be adopted as part of the Mitigation Monitoring and Reporting Program.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

- The Lead Agency, Reclamation District No. 2060 is unaware of any areas of controversy.

Provide a list of the responsible or trustee agencies for the project.
