STATE CLEARINGHOUSE

Lateral QQc Regulating Basin Project EIR
SCH# 2023120468
San Joaquin County

Dear Mr. Killingsworth:

The Division of Safety of Dams (DSOD) has reviewed the Environmental Impact Report for the Lateral QQc Regulating Basin Project, submitted by South San Joaquin Irrigation District (District), which proposes the construction of a regulating basin, a concrete flow control structure, and a basin inlet pipe. The proposed regulating basin would be approximately 18.8 acres with an operational volume of 52-acre feet.

As defined in sections 6002 and 6003, Division 3, of the California Water Code, dams 25 feet or higher with a storage capacity of more than 15 acre-feet, and dams higher than 6 feet with a storage capacity of 50 acre-feet or more are subject to State jurisdiction. The dam height is the vertical distance measured from the maximum possible water storage level to the downstream toe of the barrier.

As proposed, the work will be subject to the jurisdiction of DSOD. As such, a construction application, together with plans, specifications, and the appropriate filing fee, must be filed with DSOD for the work. All dam safety related issues must be resolved prior to approval of the application, and the work must be performed under the direction of a civil engineer registered in California. Erik Malvick, our Design Engineering Branch Manager, is responsible for the application process and can be reached at (916) 820-7820.

If you have any questions or need additional information, you may contact Area Engineer Jasper Mizani at (916) 565-7822 or me at (916) 565-7820.

Sincerely,

Handwritten signature of Timothy W. Jimenez in black ink.

Timothy W. Jimenez, P.E., Regional Engineer
Central Region
Field Engineering Branch
