Subject: **Phase I Environmental Site Assessment**
15006 and 15010 Nelson Avenue
Tustin, California

Dear Montana:

Ardent Environmental Group, Inc. (Ardent) has performed a Phase I Environmental Site Assessment (ESA) for the properties located at 15006 and 15010 Nelson Avenue in the City of Industry, California (site). Work was completed in general accordance with Profession Services Agreement dated July 29, 2021, between Overton Moore Properties (OMP) and Ardent. The attached report presents our methodology, findings, opinions, and conclusions regarding the environmental conditions at the site. If there are any questions, please feel free to call the undersigned at your convenience.

Sincerely,

Ardent Environmental Group, Inc.

Chris White
Staff Geologist

EXECUTIVE SUMMARY

Ardent Environmental Group, Inc. (Ardent) was retained by Overton Moore Properties (OMP) to perform a Phase I Environmental Site Assessment (ESA) for the property located at 15006 and 15010 Nelson Avenue in the City of Industry, California (site). The site has been used warehouse and distribution purposes. The site is an elongated property which has been occupied by commercial facilities in the northern portion of the site (15006 Nelson Avenue) and in the southern portion of the property (15010 Nelson Avenue). OMP is considering purchasing the site for commercial redevelopment. Document review and site assessment activities for this report were conducted between July 22, 2021, and August 23, 2021.

In summary, the following items were noted:

- From at least 1928 through 1952, the site was used for agricultural and residential purposes. By at least 1961, the site began to be used for commercial purposes. From approximately 1961 through 1982, the site was part of a larger property including the land located immediately northwest of the site. During this time, the site and adjacent property were used by a lumber company for storage of wood. In 1987, the site was used for freight distribution, and from at least 1992 through 2014, the site was used by American Brass and Iron (AB&I) for storage of cable, sewer pipe, and non-chemical building supplies. In approximately 2005, Scully Transportation (Scully) occupied the northern portion of the site for truck leasing, storage, and repair, while AB&I continued to use the southern portion of the site for building supply storage. In 2012, Scully vacated the northern portion of the site and AB&I (now known as “AB&I Foundry”) began operations in this portion of the property. The southern portion of the site has been occupied by Baolong Logistics Corporation (Baolong) and Tri-Line Express Inc. (Tr-Line) since this time who uses the property as truck trailer parking and maintenance facility. Overall, possible environmental concerns included the truck maintenance activities completed historically in the northern portion of the site by Scully and currently in the southern portion of the site by Baolong.
- The site is located within the San Gabriel Valley Groundwater Basin. Portions of the San Gabriel Valley Groundwater Basin have been listed on the National Priority List (NPL), or Superfund Site, known as “Operable Units.” The site is located within the Puente Valley Operable Unit. The Puente Valley Operable Unit is contaminated with volatile organic compounds (VOCs), namely chlorinated solvents including trichloroethene (TCE) and tetrachloroethylene (PCE), which were historically used by the commercial and industrial facilities located in this area. The site was investigated by the EPA and California Regional Water Quality Control Board, Los Angeles Region (LARWQCB) under its Well Investigation Program (WIP) in 1986. Following the completion of a subsurface investigation, the LARWQCB issued a no further action (NFA) letter dated November 18, 1993 and determined that the site had not contributed to the regional groundwater issue. The site is listed as a Historical-WIP on regulatory databases. Groundwater was last measured in a groundwater monitoring well at an adjacent property in 2018 at a depth of approximately 81 feet below the ground surface (bgs) and follows in a northwesterly direction. It should be noted that these groundwater monitoring wells have since gone dry due to a lowering groundwater table. Since the regional VOC groundwater issue is currently being treated by the State at potable groundwater well heads in the site vicinity,

the regional groundwater issue would be considered a controlled-recognized environmental condition (CREC).

- The property immediately southeast of and upgradient from the site at 15100 Nelson Avenue is listed as an active Cleanup Program Site with the LARWQCB due to a release of chlorinated solvents (PCE and TCE) which has affected soil and groundwater; the impacted groundwater has apparently migrated beneath the site. This property was formerly used by LA Signal to manufacture traffic signals. Subsequent investigations identified a small area of impacted soil and groundwater beneath the property. Soil remediation was completed using soil vapor extraction (SVE) and shallow soil gas sampling completed after remedial efforts indicated that no vapor intrusion issue was present. The consultant subsequently requested NFA status from the LARWQCB. The results of the human health risk assessment (HHRA) were provided to the Office of Environmental Health Hazard Assessment (OEHHA) for review. In January 12017, OEHHA agreed that no possible vapor intrusion issue was present based on industrial/commercial land use. Based on these results, the residual contaminants at the adjacent property (including possible off-gassing groundwater) would not be considered a vapor intrusion issue. In a letter dated June 24, 2021, the LARWQCB requested additional investigations including the installation of new groundwater monitoring wells (the old wells showed dry conditions due to a lowering groundwater table) and the completion of a deeper soil gas evaluation to assess the effectiveness of the SVE on deeper soils. As of the time of this report, no additional investigations have been completed. The release of VOCs impacting groundwater which is migrating beneath the site from the adjacent LA Signal property would be considered an REC.
- During the time that Scully operated at the site, the truck leasing and repair included fueling, truck washing, and maintenance (changing oil and lubrication). In April 1988, three diesel underground storage tanks (USTs, 3,500-, 4,000-, and 5,000-gallon) and associated fuel dispenser island, and one waste oil UST (2,000-gallon) were removed from the site under the direction and oversight of the Los Angeles County Department of Public Works (LACDPW). Following removal of a limited amount of petroleum hydrocarbon impacted soil, laboratory results of confirmation soil samples indicated no detectable to low concentrations of remaining chemicals. Based on these results, the LACDPW issued a no further action (NFA) letter dated July 28, 1994. Based on this information, the historical fuel and waste oil USTs formerly located in the northern portion of the site would be considered a historical-REC (HREC). Ardent reviewed these data and concurs with the LACDPW that no further work is needed.
- In 2010, a Phase I ESA was completed for the site which identified RECs in the northern portion of the site associated with the Scully operations. These RECs included a fuel dispensing island, two diesel aboveground storage tanks (ASTs), a clarifier, a floor drain and truck wash, and a chemical storage area. No RECs were noted in the southern portion of the site. A subsequent subsurface investigation was completed next to these features to assess whether a release had occurred. Laboratory results indicated no detectable concentrations of VOCs in soil samples. With the exception of the low concentrations of total petroleum hydrocarbons as gasoline (TPHg) and diesel fuel (TPHd) noted in soil samples collected the vicinity of the clarifier, no petroleum hydrocarbon contamination was noted in the vicinity of the remaining RECs. Based on these results, and the fact that Scully vacated the site and its truck maintenance operations two years later (in 2012), these former environmental concerns would no longer be considered an REC.

- Once vacating the site, AB&I Foundry occupied the northern portion and continued to use the property for sewer piping storage and distribution; no liquid chemical use, storage, or handling was noted and no truck maintenance or fueling operations were completed. Although the floor drains had all been filled with concrete, the three-stage clarifier was still noted immediately west of the warehouse building. It is unknown whether the clarifier is still connected to the municipal sewer, however, no liquid chemical uses were completed at the site by AB&I Foundry. Due to the lack of chemical uses, activities associated with AB&I Foundry would not be considered an environmental concern to the site, and the existing clarifier would be considered a de-minimis condition.
- Tri-Line uses the southern portion of the site for truck trailer parking and Baolong uses this portion of the site for truck maintenance. The maintenance activities were completed in a small area of the site on the concrete pavement. Numerous 1- and 5-gallon containers, and approximately five 55-gallon drums of waste oil were being stored in one small area of the site. Three additional 55-gallon drums containing waste oil were noted along the southwestern property line. Little to no staining was noted. Baolong also uses a 1,000-gallon AST of diesel fuel to fuel trucks. The AST was equipped with secondary containment with minor staining was noted on the concrete. The activities associated with Baolong would not be considered an environmental concern to the site, although the numerous containers of waste oil would be considered a de-minimis condition.
- Based on the age of the site buildings (1963 and 1981), asbestos-containing building materials (ACMs) and lead-based paint (LBP) may be present.
- No other on- or off-site environmental concerns were noted.

CONCLUSIONS

Ardent has performed this Phase I ESA in general conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527-13, ASTM Standard E 2600-15, and the EPA Standards and Practices for All Appropriate Inquiries (AAI), Final Rule (40 CFR, Part 312), for the property located at 15006 and 15010 Nelson Avenue in the City of Industry, California. Any limitations or exceptions encountered during completion of this report are stated in Section 1.4. No evidence or indication of RECs, HRECs, CRECs, or conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the site has been revealed, except for the following:

RECs

- The VOC-impacted groundwater migrating beneath the site from the adjacent LA Signal property would be considered an REC.

HRECs

- The historical fuel and waste oil USTs removed from the northern portion of the site would be considered an HREC.

CRECs

- The regional VOC impacted groundwater associated with the La Puente Operable Unit would be considered a CREC.

De-Minimis Condition

- The clarifier and miscellaneous containers of waste oil would be considered de-minimis conditions.

RECOMMENDATIONS

Based on the results of this Phase I ESA, Ardent has no recommendations for additional investigations at this time. Prior to redevelopment of the property, the clarifier should be abandoned in accordance with current regulatory guidelines and the miscellaneous containers of waste oil should be consolidated, profiled, and disposed of off-site. Prior to demolition of the on-site buildings, a comprehensive ACM and LBP survey should be completed. If present, asbestos should be removed, and LBP stabilized prior to demolition.

1. INTRODUCTION

Ardent Environmental Group, Inc. (Ardent) was retained by Overton Moore Properties (OMP) to perform a Phase I Environmental Site Assessment (ESA) for the property located at 15006 and 15010 Nelson Avenue in the City of Industry, California (site; Figure 1). Work was completed in general accordance with Professional Services Agreement dated July 29, 2021, between OMP and Ardent. The site has been used for warehouse and distribution purposes. The site is an elongated property which has been occupied by commercial facilities in the northern portion of the site (15006 Nelson Avenue) and in the southern portion of the property (15010 Nelson Avenue). The following sections identify the purpose, the involved parties, the scope of work, and the limitations and exceptions associated with the Phase I ESA.

1.1. Purpose of Phase I ESA

In accordance with the American Society for Testing and Materials (ASTM) E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Standard E1527-13), the objective of the Phase I ESA was to identify, to the extent feasible pursuant to ASTM Standard E1527-13, Recognized Environmental Conditions (RECs), Historical RECs (HRECs), Controlled RECs (CRECs), or conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property.

ASTM defines RECs as "…the presence or likely presence of any hazardous substance or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." ASTM defines HRECs as "…a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." ASTM defines CRECs as a REC "…resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example,

property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

Other environmental considerations include site features or conditions that may have an environmental component of interest, but which do not meet the ASTM definition of a REC, CREC, or HREC. ASTM does not necessarily require any actions to address the presence or condition, but such conditions are identified for the sake of thoroughness and completeness.

The United States Environmental Protection Agency ("USEPA" or "EPA") has stated that ASTM Standard E1527-13, is consistent with the Standards and Practices for All Appropriate Inquiries (AAI), Final Rule (40 Code of Federal Regulations [CFR], Part 312) and is compliant with the statutory criteria for all appropriate inquiries. All appropriate inquires, as defined in the AAI Final Rule, must be conducted by persons seeking the landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) prior to acquiring a property or seeking or receiving federal Brownfields grants under the authorities of CERCLA. The purpose of AAI, as defined in the AAI Final Rule, was to identify releases and threatened releases of hazardous substances which cause or threaten to cause the incurrence of response costs.

As part of this Phase I ESA, Ardent also assessed whether a vapor encroachment condition (VEC) exists at the site. The VEC assessment was completed following the ASTM E2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM Standard E2600-15). The objective of this work was to evaluate the possibility that hazardous materials or other adverse environmental conditions are present due to past or present use of the site and/or properties in the site vicinity.

1.2. Involved Parties

Mr. Chris White of Ardent conducted historical research, site reconnaissance, regulatory inquiries, and document review. Mr. Paul Roberts completed oversight and management. Mr. Roberts meets the definition of an environmental professional as set forth in the AAI Final Rule.

1.3. Scope of Work

Ardent's scope of work for this Phase I ESA is consistent with ASTM Standard E1527-13. The scope of work included the activities listed below.

- **Review of User Provided Information** – Review of information regarding title and judicial records for environmental liens or activity and use limitations, recorded environmental liens, actual or specialized knowledge or commonly known information regarding environmental conditions at the site, the relationship of the purchase price of the property to the fair market value, readily available maps, environmental reports, and other environmental documents pertaining to the site, as available and obtained from the user/client.
- **Records Review** – Acquisition and review of records, including federal, state, tribal, and local regulatory agency databases, for the site and for properties located within a specified radius of the site; local regulatory agency files for the site and selected nearby properties of potential environmental concern; physical setting sources, including topographic maps, geologic maps, and geologic and hydrogeologic reference documents; and historic land use information including aerial photographs, historical fire insurance rate maps, building department records, and city directories, as necessary, that are reasonably ascertainable, publicly available, can be obtained within reasonable time and cost, and are practically reviewable.
- **Vapor Encroachment Condition (VEC)** – Review available regulatory and client provided data to assess Tier 1 non-numeric screening for the site. Ardent evaluated whether contaminants were present in soil and/or groundwater in the site vicinity which might pose a VEC at the site.
- **Site Reconnaissance** – Performance of a site reconnaissance to visually observe the site and any structure(s) located on the site to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles. The purpose of the site reconnaissance is to obtain information indicating the likelihood of identifying RECs in connection with the site, including the general site setting, site usage, use and storage of hazardous materials and petroleum products, disposal of waste products and materials, sources of polychlorinated biphenyls (PCBs), and evidence of releases and possible risks of contamination from activities at adjacent properties.
- **Interviews** – Interviews with site representatives, including owners, occupants, and site managers, regarding the environmental condition of the site to the extent necessary and such persons are available. Interviews with state and/or local government officials, as necessary.
- **Report** – Evaluation of the information and data obtained by the Phase I ESA process outlined above and preparation of this Phase I ESA report documenting findings and providing opinions and conclusions regarding possible environmental impacts and RECs at the site.

1.4. Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard-of-care exercised by environmental consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ardent should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

The findings, opinions, and conclusions are based on an analysis of the observed site conditions and the referenced literature. It should be understood that the conditions of a site could change with time as a result of natural processes or the activities of man at the subject property or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ardent has no control. Ardent cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the site. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can eliminate the uncertainty altogether.

1.5. Special Terms and Conditions

As indicated in Section 13.1.5 of ASTM Standard E1527-13, the following, which is not in-tended to be all inclusive, represents out-of-scope items with respect to a Phase I ESA: asbestos-containing materials (ACMs), radon, lead-based paint (LBP), lead in drinking water, wetlands, regulatory compliance, cultural and historic risk, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, biological agents, and mold. As part of our agreement with the client, Ardent visually assessed site buildings (if present) for possible ACMs, LBP, and mold and researched the potential for radon exposure at the site. In addition, ASTM Standard E2600-15 supplements the ASTM Standard E1527-13 to include evaluation of VEC using Tier 1 screening.

This study did not include an evaluation of geotechnical conditions or potential geologic hazards. In addition, Ardent did not address interpretations of zoning regulations, building code requirements, or property title issues.

1.6. User Reliance

This report may be relied upon and is intended exclusively for use by the client, its partners, members, investors, affiliates, successors and assigns, and lenders. Any use or reuse of the findings, opinions, and/or conclusions of this report by parties other than the foregoing parties is undertaken at said parties' sole risk.

1.7. Physical Limitations

No physical limitations were encountered during the completion of this Phase I ESA report.

1.8. Data Gaps

No significant data gaps were noted during the preparation of this Phase I ESA report.

2. GENERAL SITE CHARACTERISTICS

The following sections describe the location and the current uses of the site and adjacent properties. A site location map is presented as Figure 1, a site vicinity map is presented as Figure 2, and a building layout and key features are presented in Figure 3. Selected photographs of the site and surrounding properties are provided in Appendix A.

2.1. Location and Legal Description

The site is located at 15006 and 15010 Nelson Avenue in City of Industry, California (Figure 2). The site has been issued the Los Angeles County Tax Assessor's Parcel Number (APN) 8208-011-029. A complete legal description is provided in the Commitment for Title Insurance provided in Appendix B.

The site is bounded by Nelson Avenue to the northeast, Nelson Square and Knights Bridge Express to the southeast; a Union Pacific Railroad to the southwest; and Melko Logistics Corporation to the northwest (Figure 2). Site boundary information was obtained during the site reconnaissance and from information provided by the client.

2.2. Site Description and Current Site Uses/Operations

The following paragraphs present a description of the structures present at the site, the tenants currently occupying the site, the activities being conducted on-site, the heating and cooling systems utilized in the site building, the sewage disposal system, and the potable water provider for the site, if any.

2.2.1. Site Description

The site is a rectangular-shaped property that comprises approximately 4.2-acres (Figure 2).

2.2.2. Occupants

At the time of this assessment, the northern portion of the site (15006 Nelson Ave) was occupied by AB&I Foundry who uses the site to store and distribute sewer pipes. The pipes are sold to wholesale companies. The southern portion of the site (15010 Nelson Ave) was occupied by Tri-Line Express Inc. (Tr-Line) and Baolong Logistics Corporation (Baolong) who uses the site as truck trailer parking and maintenance, respectively.

2.2.3. Heating and Cooling Systems

Heating and cooling systems at the site building are powered by electricity. The site maintains electricity from Southern California Edison.

2.2.4. Sewage Disposal/Septic Systems

Sewage disposal at the on-site building is reportedly connected to the municipal sewer system. There has been no indication that septic tanks have been used at the site.

2.2.5. Potable Water

Potable water is provided to the Suburban Water Systems. No groundwater wells (e.g., production, agricultural, domestic, or monitoring) were observed on the site.

2.3. Adjacent Properties

In general, the site vicinity is used for commercial and residential purposes (Figure 2). Nelson Avenue is immediately northeast of the site, followed by residential properties. Melko Logistics Corporation who uses the facility for warehousing and distribution purposes is immediately northwest of the site followed by Puente Creek. Union Pacific Railroad is located immediately southwest of the site, followed by Valley Boulevard. Knights Bridge Express (formerly LA Signal at 15100 Nelson Avenue) and Nelson Square a commercial distribution facility are located immediately southeast of the site.

No above ground storage tanks (ASTs), evidence of underground storage tanks (USTs), or possible hazardous materials or wastes were noted being used or stored by off-site facilities along the property line with the site.

3. USER PROVIDED INFORMATION

The following sections summarize information provided by the user to assist the environmental professional in identifying the possibility of RECs in connection with the site, and to fulfill the user's responsibilities in accordance with Section 6 of ASTM Standard E 1527-13. A copy of the user questionnaire is presented in Appendix B. The questionnaire was completed by Mr. Jason Hines of OMP.

3.1. Current Title Information

A Commitment for Title Insurance was provided to Ardent for review. The report was prepared by First American Title Insurance Company dated July 8, 2021. According to the Commitment for Title Insurance, the current owner of the site is "Bascacci Group, LLC." A copy of the Preliminary Title Report is included in Appendix B.

3.2. Environmental Liens or Activity and Use Limitations

Based on our review of the Commitment for Title Report, no records of environmental liens or activity and use limitations (AULs) associated with the subject property were noted. In addition, Mr. Hines was not aware of environmental liens or AULs against the subject property that are filed or recorded under federal, state, or local law.

3.3. Specialized Knowledge

Mr. Hines indicated that, for the purposes of this assessment, OMP has no specialized knowledge or experience pertaining to the site or the adjacent properties that is material to RECs in connection with the site.

3.4. Commonly Known or Reasonably Ascertainable Information

Mr. Hines indicated that OMP is not aware of commonly known or reasonably ascertainable information pertaining to the site that could be material to RECs in connection with the subject property.

3.5. Valuation Reduction for Environmental Issues

In a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to fair market value of the property if the property was not affected by hazardous substances or petroleum products. Mr. Hines indicated that the purchase price reflects fair market value.

3.6. Reason for Performing Phase I ESA

Ardent was retained by OMP to perform the Phase I ESA as part of its real estate due diligence activities for purchasing the site.

3.7. Other User Provided Information

OMP provided two previous environmental reports prepared by Frey Environmental Inc (Frey) for the subject property. The reports include a Phase I ESA, dated June 15, 2010 (referred to herein as "2010 Phase I ESA"), and a Phase II Limited Site Assessment, dated June 28, 2010 (referred to as "2010 Phase II LSA").

During completion of Ardent's Phase I ESA, OMP also retained Ardent to complete a separate Phase I ESA on the adjoining property located at 15100 Nelson Avenue. OMP is also considering purchasing this property for commercial redevelopment. The property is listed as an active Cleanup Program Site case (formerly known as the "Spills, Leaks, Investigations and Cleanup" [SLIC]) with the Regional Water Quality Control Board, Los Angeles Region (LARWQCB) due to groundwater contamination associated with the San Gabriel Valley Groundwater Basin Superfund Site. Since this property is located hydraulically upgradient from the site, Ardent also reviewed available files on the State Water Resources Control Board (SWRCB) GeoTracker website. The following presents a summary of the on- and off-site reports. Copies of the pertinent reports are provided in Appendix C.

3.7.1. 2010 Phase I ESA, dated June 15, 2010

The 2010 Phase IESA was completed for Scully Transportation (Scully), who was the site occupant at this time. The following presents the findings and conclusions of this report. It should be noted that the report did not include recommendations.

- From at least 1928 through 1964, the site was used for agricultural and residential purposes. Sometime between 1952 and 1964, the site was developed for warehousing and transportation use and remained in this capacity through the time of the 2010 Phase I ESA report. Scully operated the northern portion of the site (15006 Nelson Avenue) and used the site as a truck leasing, repair, storage, and fueling facility. The southern portion of the site (15010 Nelson Avenue) was used for storage of cable and non-chemical building supplies by American Brass and Iron.
- The site is located within the San Gabriel Valley Groundwater Basin. Portions of the San Gabriel Valley Groundwater Basin have been listed on the National Priority List (NPL), or Superfund Site. Portions of the San Gabriel Valley Groundwater Basin are contaminated with volatile organic compounds (VOCs), namely the chlorinated solvents trichloroethene (TCE) and tetrachloroethylene (PCE), which were

historically used by the commercial and industrial facilities located in this area. These areas of groundwater contamination are referred to as “Operable Units.” The site lies within the Puente Valley Operable Unit. According to Frey, groundwater was reported in a groundwater well installed at the site in 1989 at depths of approximately 63 to 71 feet below the ground surface (bgs). Groundwater flow direction was not provided in the report.

- In April 1988, three diesel USTs (3,500-, 4,000-, and 5,000-gallon) and associated fuel dispenser island, and one waste oil UST (2,000-gallon) were removed from the site under the direction and oversight of the Los Angeles County Department of Public Works (LACDPW). Confirmation soil samples collected beneath the clustered diesel USTs and dispenser island indicated elevated concentrations of petroleum hydrocarbons up to 5,400 milligrams per kilogram (mg/kg). No detectable concentrations of petroleum hydrocarbons were noted in confirmation soil samples collected within the waste oil UST excavation. In May and June 1988, soil borings were drilled for assess the extent of impacted soils. Based on the results, approximately 75 cubic yards of impacted soils were removed.
- In February 1989, a groundwater monitoring well (designated MW1) was installed immediately north of the former diesel UST excavation. Laboratory results of soil samples collected during the installation indicated no detectable concentrations of petroleum hydrocarbons and benzene, and low concentrations of toluene, ethylbenzene, and xylenes (TEX). Over the next five years (through 1993) groundwater was measured at depths ranging from approximately 63 to 71 feet bgs. With the exception of the first sampling event, laboratory results of six additional sampling events indicated no detectable concentrations of petroleum hydrocarbons and “selected VOCs,” assuming only BTEX. Based on these results, the LACDPW issued a no further action (NFA) letter dated July 28, 1994.
- As part of the 2010 Phase I ESA, Frey completed a site visit. During the site visit, the property was being used by Scully for truck leasing, maintenance, fueling, and repair. Two 6,000-gallon diesel ASTs and a dispenser island were located southwest of the Service Garage; no secondary containment was noted around d the ASTs. Immediately southwest of the Service Garage was the chemical storage area where Scully stored 55-gallon drums of diesel fuel and oil, and two 480-gallon oil ASTs. The concrete floor of the chemical storage area was stained, indicating a release. Further southwest of the chemical storage area was a truck wash with a drain. A former site occupant indicated that trucks were washed in the truck wash with “solvents” rather than soap and water. The floor drain located in the truck wash was black, indicating a release. The floor drain in the truck wash transferred wastewater to a clarifier located immediately northwest of the Service Garage. These features were noted by Frey to be considered environmental concerns.
- No other on- or off-site environmental concerns were noted.

Based on the results of the 2010 Phase I ESA, Frey identified RECs at the site including the fuel dispensing island, two diesel ASTs, the floor drain and truck wash, and the clarifier.

It should be noted that in 1986, the LARWQCB investigated the northern portion of the site at 15006 Nelson Avenue for possible contamination associated with the Well Investigation Program (WIP) of the San Gabriel Valley Groundwater Basin Superfund Site. Although Frey did not mention this investigation in its report, Ardent reviewed available files at the LARWQCB regarding this case. As noted herein, and following the completion of a subsurface investigation, the LARWQCB issued a no further action (NFA) letter dated November 18, 1993 and determined that the site had not contributed to the regional groundwater issue. The site is listed as a Historical-WIP on regulatory databases.

3.7.2. 2010 Phase II LSA, dated June 28, 2010

To address the RECs identified during completion of the 2010 Phase I ESA, Frey completed the 2010 Phase II LSA which included the advancement of twelve soil borings in selected areas of the site. The following presents a summary of the investigations, conclusions, and recommendations.

Fuel Dispensing Island – To further assess whether a release of diesel fuel had occurred in the vicinity of the dispenser island, Frey drill three soil borings in the vicinity of this feature. Laboratory results of soil samples collected at 5 feet bgs indicated no detectable concentrations of petroleum hydrocarbons and VOCs.

Two Diesel ASTs – Due to the lack of secondary containment around the two diesel ASTs, Frey drill three soil borings in the vicinity of these features. Laboratory results of soil samples collected at 5 feet bgs indicated no detectable concentrations of volatile organic compounds (VOCs) and total petroleum hydrocarbons (TPH) were not detected.

Clarifier – To further assess whether a release had occurred in the vicinity of the subsurface clarifier, Frey drill two soil borings adjacent to the influent and effluent pipelines of this feature. Soil samples were collected at 5, 10, 15, and 20 feet bgs from each soil boring and were analyzed for total petroleum hydrocarbons as gasoline (TPHg), as diesel fuel (TPHd), and as oil (TPHo), and VOCs.

With the exception of the soil sample collected at 10-foot bgs in one boring (B7), laboratory results of the remaining soil samples indicated no detectable concentrations of TPHg, TPHd, TPHo, and VOCs. Laboratory results of the soil sample collected at 10 feet bgs in boring B7 indicated low concentrations of TPHg at 24 milligrams per kilogram (mg/kg) and TPHd at 89 mg/kg. According to Frey, these concentrations would be considered low. However, based on Frey's experience, the LACDPW, lead regulatory agency for clarifier decommissioning, would require additional deeper soil samples if becoming involved with the case.

Floor Drain and Truck Wash – To further assess whether a release had occurred in the vicinity of the floor drain and truck wash, Frey drilled one boring adjacent to the floor drain located in the approximate center of the truck wash. Laboratory

results of soil samples collected at 5 and 10 feet bgs indicated no detectable concentrations of petroleum hydrocarbons and VOCs.

Chemical Storage Area – To further assess whether a release had occurred in the vicinity of the chemical storage area, Frey drill three soil borings in the vicinity of this feature. Laboratory results of soil samples collected at 1, 5, and 10 feet bgs from the 3 soil borings indicated no detectable concentrations of petroleum hydrocarbons and VOCs.

With the exception of the low concentrations of TPHg and TPHd noted in the vicinity of the clarifier, no contamination was noted in the vicinity of the RECs. Frey indicated that the LACDPW is the lead regulatory oversight agency for clarifiers in the site vicinity. If notified, the LACDPW would require additional deeper investigations to properly assess the lateral and vertical extent of these low concentrations.

Ardent reviewed these data with respect to current state and federal screening levels including the California Department of Toxic Substances Control Screening Levels and EPA Regional Screening Levels for industrial/commercial land use (DTSC-SLi and EPA-RSLi, respectively). As noted above, only petroleum hydrocarbons were detected in one soil sample collected adjacent to the clarifier. Based on this review, the concentrations of TPHg and TPHd would be considered low, well below the federal screening levels for TPHg (420 mg/kg) and state and federal screening levels for TPHd (500 and 560 mg/kg, respectively) based on the protection of human health. Based on this information, these concentrations would be considered low using today's guidelines. In addition, as noted above, deeper soil sample collected from this boring (at 15 and 20 feet bgs) indicated no detectable concentrations of petroleum hydrocarbons. Based on the lack of deeper contamination, these low concentrations appear to be very limited in extent. Based on the depth to groundwater (at least 81 feet bgs), there is a low likelihood that the residual concentrations would pose a threat to groundwater. The LACDPW is the lead regulatory agency for clarifier closure in the City of Industry. Based on the low concentrations, type of contaminant (i.e., petroleum hydrocarbons with no VOCs), limited extent, and our professional experience, there is a low likelihood that the LACDPW would require additional sampling, if this agency became involved during clarifier closure.

3.7.3. Regional Groundwater Investigations in the Site Vicinity

As noted above, the property located immediately southeast of the site and hydraulically upgradient from the subject property, is listed as an active Cleanup Program Site with the LARWQCB.

Prior to 1952, the property was used for agricultural purposes. The existing main steel processing buildings were constructed in 1955 and 1956. Various additions were constructed and demolished until the property achieved its current configuration between 2005 and 2008. The property was used for steel parts or steel rod/wire processing by M&A Steel, Techalloy, and Brough Industries from 1955 to at least 1986. By 1993, the site was used by LA Signal to manufacture traffic signals.

This property, located at 15100 Nelson Avenue, was initially investigated in the late-1980s and early-1990s for possible contributions to the regional VOC groundwater issues as part of the WIP of the San Gabriel Valley Groundwater Basin Superfund Site. Following investigations in the mid-1990s, it was determined that the historical land use as steel part or steel rod/wire processing had not contributed to the regional groundwater issue. The LARWQCB issued a NFA letter to Brough Industries.

Following completion of a Phase I ESA in 2008 and subsequent subsurface investigations in 2008 and 2010, it was determined that LA Signal, a predecessor to Brough Industries, used PCE and had impacted soil and groundwater with chlorinated solvents.

Subsequent investigations identified a small area of impacted soil and groundwater beneath the property. Soil remediation was completed using soil vapor extraction (SVE) and shallow soil gas sampling completed after remedial efforts indicated that no vapor intrusion issue was present. The consultant subsequently requested NFA status from the LARWQCB.

The results of the human health risk assessment (HHRA) were provided to the Office of Environmental Health Hazard Assessment (OEHHA) for review. In January 12017, OEHHA agreed that no possible vapor intrusion issue was present based on industrial/commercial land use. Based on these results, the residual contaminants at

the adjacent property (including possible off-gassing groundwater) would not be considered a vapor intrusion issue.

In a letter dated June 24, 2021, the LARWQCB requested additional investigations. According to this letter, the three existing groundwater wells were last monitored in 2010 due to the wells going dry from the lowering groundwater table. The LARWQCB requires the installation and monitoring of deeper groundwater monitoring wells.

The latest soil gas data collected after the operation of the SVE only assessed shallow soil gas concentrations; no deeper soil gas concentrations were assessed. Due to the lack of deeper sampling points, the LARWQCB requested a deeper soil gas evaluation to assess the effectiveness of the SVE on deeper soils.

The LARWQCB requested that a work plan be prepared and submitted for approval to further characterize and evaluate the extent of impacted groundwater and deep soil gas by the installation of additional groundwater monitoring wells and multi-depth soil vapor probes. The work plan was due to the LARWQCB by August 24, 2021.

4. PHYSICAL SETTING

The following sections include discussions of topographic, geologic, and hydrogeologic conditions in the vicinity of the site, based upon our document review and our visual reconnaissance of the site and adjacent areas.

4.1. Site Topography

Based on the review of the United States Geological Survey (USGS) 7.5 Minute Series, La Puente, California Topographic Quadrangle Maps dated 2012, the site has an approximate elevation of 311 feet above mean sea level (msl). Surface topography generally slopes northeast.

4.2. Geology

The site is located in the west-end of the Puente Valley, an east-west trending valley, bounded to the south by the Puente Hills and to the north by the San Jose Hills. The area is underlain by alluvial deposits of Quaternary age. The source area of these deposits is the local hills to the south and north. The deposits consist of clay to boulder size materials with sand and silt sizes predominating. The thickness of alluvial deposits overlying bedrock is approximately 1,000 feet.

4.3. Oil and Gas Maps

Based on a review of the California Department of Conservation, Geologic Energy Management Division (Cal-GEM) on-line well finder, the site is not located within an oil field and no oil or natural gas well have been installed on the site or in the immediate site vicinity. Based on this information, no methane gas issues are present.

4.4. Site Hydrology

The following sections discuss the site hydrology in terms of both surface waters and groundwater.

4.4.1. Surface Waters

No natural surface waterbodies, including ponds, streams, or other bodies of water are present on or adjacent to the site.

4.4.2. Groundwater

The site is located within the San Gabriel Valley Groundwater Basin. Portions of the San Gabriel Valley Groundwater Basin have been listed on the National Priority List (NPL), or Superfund Site, known as “Operable Units.” The site is located within the Puente Valley Operable Unit. The Puente Valley Operable Unit is contaminated with volatile organic compounds (VOCs), namely chlorinated solvents including trichloroethene (TCE) and tetrachloroethylene (PCE), which were historically used by the commercial and industrial facilities located in this area. The site was investigated by the EPA and LARWQCB under its WIP in 1986. Following the completion of a subsurface investigation, the LARWQCB issued a NFA letter dated November 18, 1993, and determined that the site had not contributed to the regional groundwater issue. The site is listed as a Historical-WIP on regulatory databases. Groundwater was last measured in groundwater monitoring wells at an adjacent property in 2018 at a depth of approximately 81 feet bgs and follows in a northwesterly direction. It should be noted that these groundwater monitoring wells have since gone dry due to a lowering groundwater table.

The EPA and LARWQCB have identified Potential Responsible Parties (PRPs) which are currently funding the treatment of VOC-impacted groundwater at potable water wells in the site vicinity. Since responsible parties have been identified and the water is being treated, the regional VOC groundwater issue would be considered a CREC.

The property immediately southeast of and upgradient from the site at 15100 Nelson Avenue is listed as an active Cleanup Program Site with the LARWQCB due to a release of chlorinated solvents (PCE and TCE) which has affected soil and groundwater; the impacted groundwater has apparently migrated beneath the site. This property was formerly used by LA Signal to manufacture traffic signals. Subsequent investigations identified a small area of impacted soil and groundwater beneath the property. Soil remediation was completed using SVE and shallow soil gas sampling completed after remedial efforts indicated that no vapor intrusion issue was present. The consultant subsequently requested NFA status from the LARWQCB. In a letter dated June 24, 2021, the LARWQCB requested additional investigations including the installation of new groundwater monitoring wells (the old wells showed dry conditions due to a lowering groundwater table) and the completion of a deeper soil gas evaluation to assess the effectiveness of the SVE on deeper soils. As of the time of this report, no additional investigations have been completed. The release of VOCs impacting groundwater which is migrating beneath the site from the adjacent LA Signal property would be considered an REC.

5. HISTORICAL LAND USE

Ardent conducted a historical record search for both the site and surrounding areas. This included a review of one or more of the following sources that were found to be both reasonably ascertainable and useful for the purposes of this Phase I ESA: historical aerial photographs, historical fire insurance maps, historical city directories, building permits and plans, topographic maps, property tax records, zoning/land use records, and a review of prior environmental assessment reports regarding the site. Copies of historical data are provided in Appendix C.

5.1. Summary of Historical Land Use of the Property

From at least 1928 through 1952, the site was used for agricultural and residential purposes. By at least 1961, the site began to be used for commercial purposes. From approximately 1961 through 1982, the site was part of a larger property including the land located immediately northwest of the site. During this time, the site and adjacent property were used by a lumber company for storage of wood. In 1987, the site was used for freight distribution, and from at least 1992 through 2014, the site was used by American Brass and Iron (AB&I) for storage of cable, sewer pipe, and non-chemical building supplies. In approximately 2005, Scully occupied the northern portion of the site for truck leasing, storage, and repair, while

AB&I continued to use the southern portion of the site for building supply storage. In 2012, Scully vacated the northern portion of the site and AB&I (now known as "AB&I Foundry") began operations in this portion of the property. The southern portion of the site has been occupied by Baolong and Tri-Line since this time who uses the property as truck trailer parking and maintenance facility. Overall, possible environmental concerns included the truck maintenance activities completed historically in the northern portion of the site by Scully and currently in the southern portion of the site by Baolong.

5.2. Summary of Historical Land Use of Adjoining Properties

From at least 1928 through 1952, the site vicinity was used for agricultural purposes with scattered residences. More significant commercial and residential development occurred in the early-1960s.

5.3. Fire Insurance Rate Maps

Historical Sanborn Fire Insurance Rate Maps (Sanborn maps) were requested from Environmental Database Resources (EDR) of Shelton, Connecticut. According to EDR, Sanborn maps were not available for the site or site vicinity.

5.4. Historical Aerial Photographs

Historical aerial photographs for select years between 1928 and 2016 were provided by EDR. The following presents a summary of our review.

- **1928 ,1938, 1948 and 1952**– The site and adjacent properties consisted of agricultural properties. A residence was noted on site. Nelson Avenue was present in its current configuration. Scattered residences were located throughout the site vicinity.
- **1964, 1972, 1977, and 1981 –** The site appeared to be part of a larger property located immediately northwest of the site. During this time frame, the site and adjoining property were used for storing wood by a lumber company. The site vicinity consists of commercial and residential properties.
- **1983, 1990, 1994, 2002, 2005, 2009, 2012, 2016** – In 1983, the northern portion of the site appeared to be used as a truck parking lot (i.e., freight distribution) and the southern portion of the site was vacant. By 1990, the entire site was paved and appeared to be used for building supply storage. In 2002, 2005, and 2009, the southern portion of the site was used for building supply storage, while the northern portion of the site was used for truck trailer parking. In 2012 and 2016, the southern portion of the site was used for truck trailer parking, while the northern portion of the site was used for building supply storage. The site vicinity continued to be used for commercial and residential purposes.

5.5. City of Industry Building Department (IBD)

Building permits for the site and site vicinity are issued and maintained by IBD. Ardent reviewed files associated with the two current address (15006 and 15010 Nelson Avenue). The first building permits issued to the site address of 15006 Nelson Avenue were dated 1963 for Dooley & Company to construct the existing on-site office building associated with its lumber business. Miscellaneous building and electrical permits dated 1984 through 1990 were issued to “American Brass & Iron.” Two permits indicating the use of “two fuel tanks” were issued to UPS Truck Leasing dated 1995 and 1996. During this time frame, two diesel fuel ASTs were located on-site. Miscellaneous permits for 15010 Nelson Avenue did not provide additional information that was not already known from other sources.

5.6. City Directories

Ardent reviewed city directories provided by EDR from 1961 through 2014. In 1961, the site vicinity was listed as residences; no listings for the site were noted. The existing site address of 15006 Nelson Avenue was first noted in 1992.The site address of 15010 Nelson Avenue was not observed in the city directory search.

As noted in the historical aerial photographs, the site appeared to have been part of the larger property that included the land immediately northwest of the site. From 1961 through 1982, the addresses of 15000 and 15002 Nelson Avenue (which included the site, were listed as “Dooley & Co.” and M&M Lumber.” During this time, the site and adjacent property appeared to have been used for lumber storage. In 1987, a possible site address of 15008 Nelson Avenue was noted as “Southwest Freight.” From 1992 through 2014, the site address of 15006 Nelson Avenue was listed as AB&I. In 2005 and 2010, this address was also listed as Scully.

An increase in commercial listings in the site vicinity occurred in the late-1960s. No listing of immediate environmental concern was noted.

5.7. Historical Topographic Maps

Historical topographic maps were provided by EDR for review. The maps were dated 18894, 1897, 1898, 1904, 1927, 1953, 1966, 1972, 1981, and 2012. The maps display elevation, buildings, and topographical features relative to the site location. These maps were of large scale, so site specific details were not provided.

5.8. Interviews

Interviews were conducted by Ardent with key site personnel (e.g., past and present owners, operators, and/or occupants), with the objective of obtaining information indicating RECs in connection with the subject property. The following are the site personnel interviewed for purposes of this assessment, and a summary of their comments with regards to site conditions.

5.8.1. Interview with Owner

The owner of the site was not available to interview.

5.8.2. Interview with Site Manager

No Site Manager was available for interviews.

5.8.3. Interviews with Occupant

Mr. Javier Herrera, a mechanic for Baolong, was interviewed by Ardent during the site reconnaissance. Mr. Manuel Ascencio, office manager for AB&I Foundry, was interviewed by Ardent during the site reconnaissance. The result of this interview is presented throughout the report.

5.8.4. Interviews with Local Government Officials

Ardent interviewed local regulatory representatives during completion of the agency file review. The results of these interviews are presented throughout the report.

5.8.5. Interviews with Others

No other interviews were completed during this Phase I ESA.

5.9. Previous Reports and Documents

As summarized in Section 3.7, previous environmental reports were obtained and reviewed during completion of this Phase I ESA.

6. SITE RECONNAISSANCE

The site and site vicinity reconnaissance were performed by Ardent personnel on August 17, 2021. The site reconnaissance involved a walking tour of the site and visual observations of adjoining properties. At the time of the site reconnaissance, the weather was sunny, with no weather-related obstructions noted. Selected photographs taken during these activities are included in Appendix A.

At the time of the site reconnaissance, the site was occupied by AB&I Foundry in the northern portion of the site and Baolong and Tri-Line in the southern portion. AB&I Foundry used the site for sewer pipe storage; no liquid chemicals were stored or distributed. Two buildings were located in the northern portion of the site, one was referred to as the Office Building and the other as the Warehouse Building (formerly used as a truck maintenance building by Scully). The floor drains in the Warehouse Building and former truck wash had been filled with concrete. The three-stage clarifier used by Scully was noted immediately northwest of the Warehouse Building, although it was unknown whether this feature was still connected to the municipal sewer system. No environmental concerns were noted in the northern portion of the site.

Tri-Line used the southern portion of the site for truck trailer parking and used a mobile home as an office. Baolong also used the southern portion of the site to maintain semi-trucks. This activity was completed on the concrete pavement in a small portion of the site (Figure 3). Waste oil generated by this facility was stored in numerous 1- and 5-gallon containers, and five 55-gallon drums in the waste oil storage area (Figure 3). Three unlabeled 55-gallon drums were also noted containing waste oil and were located along the southwestern property line (Figure 3). One 1,000-gallon AST was located near the office and used to store diesel fuel for the trucks (Figure 3). The AST was equipped with secondary containment. Overall, little to no staining was noted in the vicinity of these features, and therefore, these features would not be considered an environmental concern to the site.

The following presents the results of the site visit. The following information is provided as per ASTM standards and to summarize the current conditions at the site.

6.1. Use and Storage of Hazardous Substances and Petroleum Products

One 1,000-gallon diesel AST was located in the southern portion of the site and included secondary containment. Little to no staining was noted in the vicinity of this feature, and therefore, the 1,000-gallon diesel AST would not be considered an environmental concern to the site.

6.2. Storage and Disposal of Hazardous Wastes

As noted above, numerous 1- and 5-gallon containers and at least seven 55-gallon drums of waste oil were observed in the southern portion of the site. Little to no staining was noted on the pavement in the vicinity of these containers, and therefore, these features would not be considered an environmental concern to the site.

6.3. Unidentified Substance Containers

Three unidentified 55-gallon drums and numerous 1- and 5-gallon containers were noted in the southern portion of the site. The contents appeared to be waste oil. Little to no staining was noted on the pavement in the vicinity of these containers, and therefore, these features would not be considered an environmental concern to the site.

6.4. Aboveground Storage Tanks (ASTs) and Underground Storage Tanks (USTs)

No USTs were present on-site. Baolong used one 1,000-gallon diesel fuel AST to fuel trucks. Little to no staining was noted in the vicinity of this feature, and therefore, the 1,000-gallon diesel AST would not be considered an environmental concern to the site.

As noted herein, the northern portion of the site formerly used fuel and waste oil USTs that were removed and closed by regulatory agencies, and formerly used two fuel ASTs that have also been removed. These former features would no longer be considered an environmental concern to the site.

6.5. Evidence of Releases

Little to no petroleum hydrocarbon staining was noted throughout the site; no significant releases were observed.

6.6. Polychlorinated Biphenyls (PCBs)

Historically, PCBs (a group of hazardous substances and suspected human carcinogens) were widely used as an additive in cooling oils for electrical components. Typical sources of PCBs can include electrical transformers. One pad mounted transformer was located immediately northeast of the Warehouse Building (Figure 3). No stains or evidence of releases were noted. Based on this information, this feature would not be considered an environmental concern to the site.

6.7. Suspect Asbestos-Containing Building Materials (ACMs)

The manufacture of most ACMs was phased out in the 1970s, ending in 1980. Previously manufactured ACMs that were in stock continued to be used through approximately 1981. Some non-friable ACMs are still manufactured (e.g., roofing mastics). In general, buildings constructed after 1981 have a negligible potential to contain friable ACMs and a low potential for most non-friable ACMs, with the exception of roofing materials. Based on the age of the site buildings (1963 and 1981), ACMs may be present.

6.8. Lead Based Paint (LBP)

The manufacture of LBP was phased out in approximately 1978. Based on the age of the site building (1963 and 1981), LBP may be present.

6.9. Indications of Water Damage or Mold Growth

No indications of water damage or mold growth were observed at the site.

6.10. Wastewater Systems

A clarifier was noted immediately northwest of the Warehouse Building (formerly the Service Garage). This feature was formerly used by Scully to treat wastewater from its truck maintenance operations. During the site visit by Ardent, the floor drains associated with the clarifier had been filled with concrete. It was unknown whether the clarifier was still connected to the municipal sewer system.

Since no liquid chemicals are stored, handled, or used by AB&I Foundry, and the fact that little contamination was noted during a subsurface investigation completed in the vicinity of this feature immediately prior to Scully's vacating from the site, this feature would not be considered an environmental concern to the site.

6.11. Stormwater Systems

Concrete swales are located throughout the site which transfer rainwater runoff to a stormwater drain in the southwestern portion of the site. The stormwater drain appears to be connected to the municipal stormwater system. No stains or evidence of dumping was noted around the stormwater drain. Based on this information, this feature would not be considered an environmental concern to the site.

6.12. Wells

No groundwater monitoring wells, production wells, or agricultural wells were noted at the site. As summarized in Section 3.7, one former groundwater monitoring well designed MW1 was installed in the vicinity of the former fuel USTs. During Ardent' s site visit, a concrete patch was noted in this area, indicating that the former groundwater monitoring well had been abandoned.

6.13. Other Subsurface Structures

No other subsurface structures (e.g., sumps, vaults, hydraulic lifts, and other surface impoundments) were noted during the site reconnaissance.

6.14. Other Issues

No other environmental issues were noted during the site reconnaissance.

7. ENVIRONMENTAL DATABASE SEARCH

A computerized environmental information database search was performed by EDR for this Phase I ESA on August 2, 2021. The database search included federal, state, local, and tribal databases. A summary of the environmental databases searched, their corresponding search radii, and number of noted facilities of environmental concern is presented in Appendix E. In addition, a description of the assumptions and approach to the database search is provided in Appendix E. The review was conducted to evaluate whether the site or properties within the vicinity of the site have been reported as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects.

Eleven unmapped properties, due to poor or inadequate address information, were identified in the database report. However, based on the reviewed location information provided for these properties, and/or the types of databases on which the properties are listed, there is a low likelihood that they pose an environmental threat to the site.

The following paragraphs describe the databases that contain noted properties of environmental concern and include a discussion of the regulatory status of the facilities and potential environmental impact to the subject site.

7.1. Federal National Priorities List (NPL): Distance Searched – 1 mile

The NPL is the USEPA's database of uncontrolled or abandoned hazardous waste properties identified for priority remedial actions under the Superfund program. This database includes proposed NPL listings.

The site is located within the San Gabriel Valley Groundwater Basin. Portions of the San Gabriel Valley Groundwater Basin have been listed on the NPL, or Superfund Site, known as "Operable Units." The site is located within the Puente Valley Operable Unit. The Puente Valley Operable Unit is contaminated with VOCs, namely chlorinated solvents including TCE and PCE, which were historically used by the commercial and industrial facilities located in this area. The site was investigated by the EPA and LARWQCB under its WIP in 1986. Following the completion of a subsurface investigation, the LARWQCB issued a NFA letter

dated November 18, 1993, and determined that the site had not contributed to the regional groundwater issue. The site is listed as a Historical-WIP on regulatory databases.

The San Gabriel Valley Groundwater Basin was listed due to its listing as a federal Superfund Site. Since Potential Responsible Parties (PRP) have been identified and are funding the cleanup of impacted groundwater through state operated treatment system at potable groundwater well heads in the site vicinity, this listing would be considered a CREC.

7.2. Federal Delisted NPL: Distance Searched – 1 mile

This database contains delisted NPL properties under the Superfund program. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the USEPA uses to delete properties from the NPL. In accordance with 40 Code of Federal Regulations (CFR) 300.425. (e), properties may be deleted from the NPL where no further response is appropriate.

Neither the site nor properties located within the search radius were listed on this database.

7.3. Federal Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) List: Distance Searched – 0.5 mile

The CERCLIS database contains properties which are either proposed or on the NPL and properties which are in the screening and assessment phase for possible inclusion on the NPL. This database also includes properties listed as No Further Remedial Action Planned (NFRAP). These facilities are listed on either the Superfund Enterprise Management System (SEMS) or SEMS-Archive databases (SEMS-ARCHIVE).

The site was not listed on this database. Two facilities were listed on this database. The San Gabriel Valley Groundwater Basin was listed due to its listing as a federal Superfund Site. Since PRPs have been identified and are funding the cleanup of impacted groundwater through state operated treatment system at potable groundwater well heads in the site vicinity, this listing would be considered a CREC.

The remaining listing was for “Brough Industries,” located immediately southeast of and upgradient from the site at 15100 Nelson Avenue. As noted in Section 3.7, investigations are on-going for this facility. Based on information obtained to-date, this facility has impacted groundwater beneath the site with VOCs and therefore would be considered an REC.

7.4. Federal Corrective Action Report (CORRACTS): Distance Searched – 1 mile

The USEPA maintains this database of Resource Conservation and Recovery Act (RCRA) facilities that are undergoing corrective action. A corrective action order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.

Neither the site nor properties located within the search radius were listed on this database.

7.5. Federal Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal Facilities (TSDF) List: Distance Searched – 0.5 mile

The RCRA TSDF database (non-CORRACTS) is a compilation by the EPA of facilities that report generation, storage, transportation, treatment, or disposal of hazardous waste.

Neither the site nor properties located within the search radius were listed on this database.

7.6. Federal RCRA Generators List: Distance Searched – Site and Adjoining Properties

This list identifies sites that generate hazardous waste as defined by RCRA. Inclusion on this list is for permitting purposes and is not indicative of a release. Facilities on this list are identified as either large, small, or very small quantity generators (LQG, SQG, or VSQG, respectively) based on the amount of hazardous waste generated annually.

The site was listed as Scully, a former occupant of the northern portion of the site, at 15006 Nelson Avenue. This former occupant was listed as an SQG.

A former occupant of the property immediately northwest of the site, referred to as “The Truck Wash” at 15000 Nelson Avenue, was listed as an SQG. The property immediately southeast of the site at 15100 Nelson Avenue was listed as “Brough Industries Inc.” as an SQG.

7.7. Federal Institutional Control/Engineering Control Registries: Distance Searched – Site

These lists identify properties with engineering and/or institutional controls. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on the site. Deed restrictions are generally required as part of the institutional controls.

The site was not listed on this database. The San Gabriel Valley Groundwater Basin was listed on this database due to the treatment of groundwater at potable groundwater well heads. No other facilities located within a 0.5-mile radius were listed.

7.8. Federal Emergency Response Notification System (ERNS) List: Distance Searched – Site

The ERNS database, maintained by the USEPA, contains information on reported releases of oil and hazardous substances.

The site was not listed on this database.

7.9. EnviroStor Database (EnviroStor) or State-Equivalent CERCLIS: Distance Searched – 1 mile

The Envirostor database, also known as the State-equivalent CERCLIS, is maintained by the Cal-EPA, DTSC. This database contains information on Annual Work Plan (AWP) and both known and potentially contaminated properties. Two-thirds of these properties have been classified, based on available information, as needing NFA by the DTSC. The remaining properties are in various stages of review and remediation to determine if a problem exists. These properties are presented by EDR on the Historical Cal-Sites database and the Envirostor databases.

The site was not listed on this database. Nine properties were listed within the 1-mile search radius, six of which were located at least 0.64-mile cross- to downgradient from the site. One listing was for the regional San Gabriel Valley Groundwater Basin due to its listing as a federal Superfund Site. As noted above, the San Gabriel Valley Groundwater Basin Superfund Site is considered a CREC. Based on the distance, direction, and depth to groundwater, the remaining facilities would not be considered an environmental concern to the site.

The two remaining facilities are listed at least 0.046-mile cross- to upgradient from the site. Vertis, Inc. at 15354 Stafford Street is located approximately 0.46-mile south to southeast from the site and has been assigned to another agency. BDP Company located at “855 Anaheim-Puente” is located approximately 0.93-mile south to southeast of the site and was also assigned to another agency. Based on the distance and depth to groundwater, these facilities would not be considered an environmental concern to the site.

7.10. State Solid Waste Landfill Sites (SWLF): Distance Searched – 0.5 mile

The SWLF database consists of open and closed solid waste disposal facilities and transfer stations. The data comes from the Integrated Waste Management Board's Solid Waste Information System (SWIS) and the SWRCB Waste Management Unit Database (WMUD) database.

The site was not listed on this database. One facility, designated as "Maintenance District," was listed on this database. This facility is located approximately 0.44 mile southwest of and crossgradient from the site. Based on the distance, direction and depth to groundwater, this facility would not be considered an environmental concern to the site.

7.11. State Leaking Underground Storage Tank (LUST) Lists: Distance Searched – 0.5 mile

The LUST information system is obtained from by the SWRCB.

The site was listed on the LUST database as "EDNA Inc." at 15006 Nelson Avenue The listing is considered "closed." As noted in Section 3.7, a historical occupant (i.e., Scully) formerly used three fuel USTs and one waste oil UST. These features were successfully removed from the site and obtained regulatory closure. This listing would not be considered an environmental concern to the site.

Seventeen facilities were listed on this database within the site vicinity. These facilities were listed as closed cases and/or located down- to crossgradient from the site. Based on the distance, direction, depth to groundwater, and/or regulatory status, these facilities would not be considered an environmental concern to the site.

7.12. State Underground Storage Tank (UST) and Aboveground Storage Tank (AST) Registration List: Distance Searched – Site and Adjoining Properties

UST and AST databases are provided by the SWRCB. Inclusion on these lists is for permitting purposes and is not indicative of a release.

The site was listed on the historical UST and AST databases. As noted herein, these USTs and ASTs have been removed from the site and/or obtained regulatory closure. No adjoining properties were listed on the AST or UST databases.

7.13. State Voluntary Cleanup Programs (VCPs): Distance Searched – 0.5 mile

The State VCP database lists low threat level properties with either confirmed or unconfirmed releases. Project proponents have requested that the DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Neither the site nor any properties within the search radius were listed on this database.

7.14. Indian Reservations: Distance Searched – 1 mile

This list depicts Indian administered lands of the United States that have an area equal to or greater than 640-acres. No Indian Reservations were listed within a 1-mile radius from the site. Due to the lack of Indian Reservations within 1-mile of the site, other tribal database listings required by ASTM and AAI were deemed not applicable. These listings would include tribal-equivalent NPL, CERCLIS, Landfill and/or Solid Waste Disposal, LUST, UST and AST Registrations, Institutional Control/Engineering Control Registries, VCPs, and Brownfields.

Neither the site nor properties located within the search radius were listed on this database.

7.15. Other Non-ASTM and AAI Database: Distance Searched – Site

Other databases are included in the EDR report but are not required by ASTM or AAI. The site was listed on a number of other databases that are included in the EDR report but are not required by ASTM or AAI.

Former occupants Dooley Forest Products, Los Angeles Terminal, UPS Truck Leasing, EDNA Inc., and Scully Transportation were listed on Facility Index System (FINDS), Hazardous Materials Database (HAZNET), Hazardous Waste Tracking System (HWTS), Historical UST (CA HIST UST), California Integrated Water Quality System (CIWQS), California Environmental Reporting System (CERS), Cortese, HIST CORTESE, California Environmental Reporting System (CERS), Los Angeles County Hazardous Materials Storage (CA LOS ANGELES CO. HMS), Enforcement Compliance History Online (ECHO), Historical UST (HIST UST), Recovered Government Archives Leaking Underground Storage Tank (RGA LUST), FINDS, and/or Cleanup Program Sites: Spills, Leaks, Investigations and Cleanups (CA CPS-SLIC).

These listings are for general permitting purposes and are common for these types of business. The SLIC listing was associated with the closed WIP case discussed in Section 3.7.

The HAZNET database presents a list of waste manifests submitted to DTSC and is reviewed to assess the type and quantities of chemicals used at the site. According to the HAZNET database, Scully produced wastes such as “unspecified organic liquids”, and “other organic solids” from approximately 2000 through 2007.

The HAZNET database for UPS Truck Leasing indicated this former occupant disposed of waste from 1996 through 2000, including “aqueous solution,” “other organic solids,” and “oil/water separation sludge.” In 1996 and 1997, UPS Truck Leasing was reported to also dispose of “liquids with halogenated organic compounds,” indicating chlorinated solvent disposal. However, these listing only generated 0.1289 and 0.4409 tons of waste, which correlates to approximately 31-gallons (less than one 55-gallon drum) and 106-gallons (approximately two 55-gallon drums), respectively. Due to the small quantities of halogenated hydrocarbons produced and the results of the 2010 investigation completed by Frey (discussed in Section 3.7), there is a low likelihood that the site has contributed to the regional chlorinated solvent impacted groundwater beneath the site.

The HAZNET database for EDNA Inc. indicated that this facility disposed of contaminated soil from a site cleanup in 1988. This disposal activities were likely associated with the UST removal discussed in Section 3.7. EDNA also disposed of other organic solids and waste oil and mixed oil in 1988.

8. VAPOR ENCROACHMENT CONDITION (VEC)

Ardent completed a VEC study for the site using Tier 1 criteria as recommended by ASTM E2600-15. The Tier 1 screening identifies surrounding facilities that pose a possible vapor intrusion source to the site based on the results of the Phase I ESA investigations and certain criteria outlined by ASTM. These criteria include a certain distance from the target site (referred to by ASTM as within the “area of concern”); the types of chemicals used (referred to by ASTM as the “chemicals of concern”); and a plume test to determine if the plume associated with a source of contamination is close enough to the site to impact indoor air quality. A VEC is defined by ASTM as “…the presence or likely presence of chemicals of concern vapors in the vadose zone of the target property caused by the release of vapors from contaminated soil and/or groundwater either on or near the target property identified by the Phase I ESA.”

Although the site is located within an area of regionally VOC-impacted groundwater, based on the depth to groundwater (at least 81 feet bgs), there is a low likelihood that the VEC exists at the

site. In addition, the property immediately southeast of the site at 15100 Nelson Avenue (former LA Signal) recently completed a shallow soil gas survey and HHRA which was provided to the OEHHA for review. In January 12017, OEHHA agreed that no possible vapor intrusion issue was present based on industrial/commercial land use. Based on these results, the residual contaminants at the adjacent property (including possible off-gassing groundwater) would not be considered a VEC.

9. REGULATORY RECORDS REVIEW

The DTSC, LARWQCB, South Coast Air Quality Management District (SCAQMD), LACDPW, and Los Angeles County Sanitation District (LACSD) are the lead regulatory agencies for permitting and regulating USTs, ASTs, LUST cases, and/or facilities that use, store, or generate hazardous waste or hazardous materials. Records were requested using the current site addresses or obtained from on-line mapped sources.

9.1. Department of Toxic Substances Control (DTSC)

Ardent reviewed information on the DTSC Envirostor website for possible files regarding the site and adjoining properties. No records regarding the site were available.

9.2. California Regional Water Quality Control Board, Los Angeles Region (LARWQCB)

The site is listed as “Dooley Forest Products” at 15006 Nelson Avenue on the SWRCB GeoTracker website as a closed Cleanup Program Site (formerly SLIC) as part of the WIP of the San Gabriel Valley Groundwater Superfund Site. The site was identified as a possible responsible party (PRP) by the LARWQCB in 1985. Following the completion of subsurface investigations, the LARWQCB issued a NFA letter on November 18, 1993, indicating the site had not contributed to the regional groundwater issue. The site is not listed on the EPA website as a PRP for the Puente Operable Unit. In addition, Frey completed a subsurface investigation in suspect chemical use areas in later years (2010) and laboratory results indicated no detectable concentrations of VOCs throughout the northern portion of the site. Based on information reviewed during this assessment, Ardent concurs with the LARWQCB that there is a low likelihood that the site has contributed to the regional contaminated groundwater.

The property immediately southeast of and upgradient from the site at 15100 Nelson Avenue is listed as an active Cleanup Program Site with the LARWQCB due to a release of chlorinated

solvents (PCE and TCE) which has affected soil and groundwater; the impacted groundwater has apparently migrated beneath the site. This property was formerly used by LA Signal to manufacture traffic signals. Subsequent investigations identified a small area of impacted soil and groundwater beneath the property. Soil remediation was completed using SVE and shallow soil gas sampling completed after remedial efforts indicated that no vapor intrusion issue was present. The consultant subsequently requested NFA status from the LARWQCB. The results of the HHRA were provided to OEHHA for review. In January 12017, who agreed that no possible vapor intrusion issue was present based on industrial/commercial land use. Based on these results, the residual contaminants at the adjacent property (including possible off-gassing groundwater) would not be considered a vapor intrusion issue. In a letter dated June 24, 2021, the LARWQCB requested additional investigations including the installation of new groundwater monitoring wells (the old wells showed dry conditions due to a lowering groundwater table) and the completion of a deeper soil gas evaluation to assess the effectiveness of the SVE on deeper soils. As of the time of this report, no additional investigations have been completed. The release of VOCs impacting groundwater which is migrating beneath the site from the adjacent LA Signal property would be considered an REC.

9.3. South Coast Air Quality Management District (SCAQMD)

Ardent reviewed files for the site using the SCAQMD FIND database. No records regarding the site were available.

9.4. Los Angeles County Department of Public Works (LACDPW)

Ardent requested file reviews at the LACDPW. Although the LACDPW indicated that no records were found, as noted in Section 3.7, historical USTs were removed under the direction and oversight of the LACDPW. Based on the results of soil remediation by excavation and off-site disposal and groundwater monitoring, the LACDPW issued a NFA letter dated July 28, 1994. Based on this information, the former USTs would not be considered an environmental concern to the site.

9.5. Los Angeles County of Sanitation District (LACSD)

The LACSD maintains records of industrial waste treatment and discharges. Ardent received Inspection Report for Scully dated April 20, 2001, June 19, 2001, July 9, 2001, July 24, 2001, August 28, 2001, December 18, 2001, and April 29, 2002. These inspection reports were focused on the use of the truck wash area and associated clarifier. According to the inspection

reports, Scully was using "…mild alkaline soap…" for degreasing engines. No violations were noted during any of the inspections. During the 2002 inspection the effluent pH was measured at 7. Based on the results of the inspection reports and other information obtained during this assessment, the former truck wash and clarifier would not be considered an environmental concern to the site.

10. FINDINGS, OPINIONS AND CONCLUSIONS

Based upon the results of this Phase I ESA, the following findings, opinions, and conclusions are provided.

10.1. Findings and Opinions

The following presents a summary of findings and opinions associated with this Phase I ESA performed for the subject property, including known or suspect RECs, HRECs, CRECs, and de minimis environmental conditions (i.e., conditions that generally do not present a material risk of harm to public health or the environment).

- From at least 1928 through 1952, the site was used for agricultural and residential purposes. By at least 1961, the site began to be used for commercial purposes. From approximately 1961 through 1982, the site was part of a larger property including the land located immediately northwest of the site. During this time, the site and adjacent property were used by a lumber company for storage of wood. In 1987, the site was used for freight distribution, and from at least 1992 through 2014, the site was used by AB&I for storage of cable, sewer pipe, and non-chemical building supplies. In approximately 2005, Scully occupied the northern portion of the site for truck leasing, storage, and repair, while AB&I continued to use the southern portion of the site for building supply storage. In 2012, Scully vacated the northern portion of the site and AB&I (now known as "AB&I Foundry") began operations in this portion of the property. The southern portion of the site has been occupied by Baolong and Tri-Line since this time who uses the property as truck trailer parking and maintenance facility. Overall, possible environmental concerns included the truck maintenance activities completed historically in the northern portion of the site by Scully and currently in the southern portion of the site by Baolong.
- The site is located within the San Gabriel Valley Groundwater Basin. Portions of the San Gabriel Valley Groundwater Basin have been listed on the NPL, or Superfund Site, known as "Operable Units." The site is located within the Puente Valley Operable Unit. The Puente Valley Operable Unit is contaminated with VOCs, namely chlorinated solvents including TCE and PCE, which were historically used by the commercial and industrial facilities located in this area. The site was investigated by the EPA and LARWQCB under its WIP in 1986. Following the completion of a subsurface investigation, the LARWQCB issued a no further action (NFA) letter dated November 18, 1993 and determined that the site had not contributed to the regional groundwater issue. The site is listed as a Historical-WIP on regulatory databases. Groundwater was last measured in a groundwater monitoring well at an adjacent property in 2018 at a depth of approximately 81 feet below the ground surface (bgs) and follows in a northwesterly direction. It should

be noted that these groundwater monitoring wells have since gone dry due to a lowering groundwater table. Since the regional VOC groundwater issue is currently being treated by the State at potable groundwater well heads in the site vicinity, the regional groundwater issue would be considered a CREC.

- The property immediately southeast of and upgradient from the site at 15100 Nelson Avenue is listed as an active Cleanup Program Site with the LARWQCB due to a release of chlorinated solvents (PCE and TCE) which has affected soil and groundwater; the impacted groundwater has apparently migrated beneath the site. This property was formerly used by LA Signal to manufacture traffic signals. Subsequent investigations identified a small area of impacted soil and groundwater beneath the property. Soil remediation was completed using SVE and shallow soil gas sampling completed after remedial efforts indicated that no vapor intrusion issue was present. The consultant subsequently requested NFA status from the LARWQCB. The results of the HHRA were provided to OEHHA for review. In January 12017, OEHHA agreed that no possible vapor intrusion issue was present based on industrial/commercial land use. Based on these results, the residual contaminants at the adjacent property (including possible off-gassing groundwater) would not be considered a vapor intrusion issue. In a letter dated June 24, 2021, the LARWQCB requested additional investigations including the installation of new groundwater monitoring wells (the old wells showed dry conditions due to a lowering groundwater table) and the completion of a deeper soil gas evaluation to assess the effectiveness of the SVE on deeper soils. As of the time of this report, no additional investigations have been completed. The release of VOCs impacting groundwater which is migrating beneath the site from the adjacent LA Signal property would be considered an REC.
- During the time that Scully operated at the site, the truck leasing and repair included fueling, truck washing, and maintenance (changing oil and lubrication). In April 1988, three diesel USTs (3,500-, 4,000-, and 5,000-gallon) and associated fuel dispenser island, and one waste oil UST (2,000-gallon) were removed from the site under the direction and oversight of the LACDPW. Following removal of a limited amount of petroleum hydrocarbon impacted soil, laboratory results of confirmation soil samples indicated no detectable to low concentrations of remaining chemicals. Based on these results, the LACDPW issued a NFA letter dated July 28, 1994. Based on this information, the historical fuel and waste oil USTs formerly located in the northern portion of the site would be considered an HREC. Ardent reviewed these data and concurs with the LACDPW that no further work is needed.
- In 2010, a Phase I ESA was completed for the site which identified RECs in the northern portion of the site associated with the Scully operations. These RECs included a fuel dispensing island, two diesel ASTs, a clarifier, a floor drain and truck wash, and a chemical storage area. No RECs were noted in the southern portion of the site. A subsequent subsurface investigation was completed next to these features to assess whether a release had occurred. Laboratory results indicated no detectable concentrations of VOCs in soil samples. With the exception of the low concentrations of TPHg and TPHd noted in soil samples collected the vicinity of the clarifier, no petroleum hydrocarbon contamination was noted in the vicinity of the remaining RECs. Based on these results, and the fact that Scully vacated the site and its truck maintenance operations two years later (in 2012), these former environmental concerns would no longer be considered an REC.

- Once vacating the site, AB&I Foundry occupied the northern portion and continued to use the property for sewer piping storage and distribution; no liquid chemical use, storage, or handling was noted and no truck maintenance or fueling operations were completed. Although the floor drains had all been filled with concrete, the three-stage clarifier was still noted immediately west of the warehouse building. It is unknown whether the clarifier is still connected to the municipal sewer, however, no liquid chemical uses were completed at the site by AB&I Foundry. Due to the lack of chemical uses, activities associated with AB&I Foundry would not be considered an environmental concern to the site, and the existing clarifier would be considered a de-minimis condition.
- Tri-Line uses the southern portion of the site for truck trailer parking and Baolong uses this portion of the site for truck maintenance. The maintenance activities were completed in a small area of the site on the concrete pavement. Numerous 1- and 5-gallon containers, and approximately five 55-gallon drums of waste oil were being stored in one small area of the site. Three additional 55-gallon drums containing waste oil were noted along the southwestern property line. Little to no staining was noted. Baolong also uses a 1,000-gallon AST of diesel fuel to fuel trucks. The AST was equipped with secondary containment with minor staining was noted on the concrete. The activities associated with Baolong would not be considered an environmental concern to the site, although the numerous containers of waste oil would be considered a de-minimis condition.
- Based on the age of the site buildings (1963 and 1981), ACMs and LBP may be present.
- No other on- or off-site environmental concerns were noted.

10.2. Conclusions

Ardent has performed this Phase I ESA in general conformance with the scope and limitations of the American Society for Testing and Materials Practice E 1527-13, ASTM Standard E 2600-15, and the EPA Standards and Practices for All Appropriate Inquiries, Final Rule (40 CFR, Part 312), for the property located at 15006 and 15010 Nelson Avenue in the City of Industry, California. Any limitations or exceptions encountered during completion of this report are stated in Section 1.4. No evidence or indication of RECs, HRECs, CRECs, or conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the site has been revealed except for the following.

RECs

- The VOC-impacted groundwater migrating beneath the site from the adjacent LA Signal property would be considered an REC.

HRECs

- The historical fuel and waste oil USTs removed from the northern portion of the site would be considered an HREC.

CRECs

- The regional VOC impacted groundwater associated with the La Puente Operable Unit would be considered a CREC.

De-Minimis Condition

- The clarifier and miscellaneous containers of waste oil would be considered de-minimis conditions.

11. RECOMMENDATIONS

Based on the results of this Phase I ESA, Ardent has no recommendations for additional investigations at this time. Prior to redevelopment of the property, the clarifier should be abandoned in accordance with current regulatory guidelines and the miscellaneous containers of waste oil should be consolidated, profiled, and disposed of off-site. Prior to demolition of the on-site buildings, a comprehensive ACM and LBP survey should be completed. If present, asbestos should be removed, and LBP stabilized prior to demolition.

13. QUALIFICATIONS STATEMENT AND SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

Mr. Paul Roberts states that the Phase I ESA was performed under his direct supervision, and that he has reviewed and approved the report, and the methods and procedures employed in the development of the report conform to the minimum industry standards. Mr. Roberts certifies that Ardent project personnel and subcontractors are properly licensed and/or certified to do the work described herein.

Pursuant to Paragraph 12.13 of the ASTM Standard E1527-13:

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX B

CLIENT PROVIDED INFORMATION

PHASE I ENVIRONMENTAL SITE ASSESSMENT (ESA)
USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user of the Phase I ESA* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

Project Information	
Facility Name and Address:	15010 Nelson Avenue, City of Industry, CA
Reason for the Phase I ESA:	Purchasing the Property
Type of Property:	Industrial/Outdoor Storage
Site Owner and Contact Information:	Boscacci Group LLC Wilma M. Holgerson, (925) 310-4452 wimla@boscaccigroup.com
Site Contact Name and Contact Information:	Montana Kanen, (949) 922-7143 mkanen@omprop.com
Tax Assessors Parcel Number (APN):	8208011029

	Yes	No
1. Are you aware of any environmental cleanup liens against the subject property that are filed or recorded under federal, state, or local law?		X
2. Are you aware of any activity use limitations, such as engineering controls (engineered caps, liners, treatment methods, etc.), land use restrictions, or institutional controls (administrative measures restricting groundwater use, construction, or property use, etc.) that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?		X
3. Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property so that you would have specialized knowledge of the chemicals or processes used by this type of business?		X
4a. Does the purchase price being paid for the subject property reasonably reflect the fair market value of the subject property?	X	
4b. If you conclude that there is a difference in fair market price, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	X	
5. Are you aware of any commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as a user,		
5 (a) Do you know of the past uses of the property?	X	
5 (b) Do you know of any specific chemicals that are present or were once present on the subject property?	X	
5 (c) Do you know of spills or other chemical releases that have taken place at the subject property?	X	

5 (d) Do you know of any environmental cleanups that have taken place at the subject property?	X	
6. As the user of this ESA, based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?		X

If you answered "yes" to any of the questions (except 4a) above, please provide more detail below, or attach additional information to this document:

See previous Phase I provided, dated June 15, 2010

First American	ALTA Commitment for Title Insurance
Commitment	ISSUED BY First American Title Insurance Company File No: NCS-1078568-LA2

COMMITMENT FOR TITLE INSURANCE

Issued By

FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT-READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, *First American Title Insurance Company*, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

First American Title Insurance Company

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

COMMITMENT CONDITIONS

1. DEFINITIONS
   (a) "Knowledge" or "Known": Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
   (b) "Land": The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
   (c) "Mortgage": A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
   (d) "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
   (e) "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
   (f) "Proposed Policy Amount": Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
   (g) "Public Records": Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
   (h) "Title": The estate or interest described in Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:
   (a) the Notice;
   (b) the Commitment to Issue Policy;
   (c) the Commitment Conditions;
   (d) Schedule A;
   (e) Schedule B, Part I—Requirements; and
   (f) Schedule B, Part II—Exceptions.

4. **COMPANY'S RIGHT TO AMEND**
   The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY
   (a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
      (i) comply with the Schedule B, Part I—Requirements;
      (ii) eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
      (iii) acquire the Title or create the Mortgage covered by this Commitment.
   (b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
   (c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
   (d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
   (e) The Company shall not be liable for the content of the Transaction Identification Data, if any.
   (f) In no event shall the Company be obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
   (g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT
   (a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
   (b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
   (c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
   (d) The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
   (e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
   (f) When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT
   The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for the purpose of providing closing or settlement services.

8. PRO-FORMA POLICY
   The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. ARBITRATION
   Arbitration provision intentionally removed.

Commitment No.: NCS-1078568-LA2

SCHEDULE B, PART I

Requirements

All of the following Requirements must be met:

A. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

B. Pay the agreed amount for the estate or interest to be insured.

C. Pay the premiums, fees, and charges for the Policy to the Company.

D. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

E. Releases(s) or Reconveyance(s) of Item(s): None

F. Other: None

G. You must give us the following information:
   a. Any off record leases, surveys, etc.
   b. Statement(s) of Identity, all parties.
   c. Other: None

The following additional requirements, as indicated by "X", must be met:

[X] H. Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

The Company's Owner's Affidavit form (as provided by the company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

[] I. An ALTA/NSPS survey of recent date, which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

[X] J. The following LLC documentation is required from:

(i) a copy of the Articles of Organization
(ii) a copy of the Operating Agreement, if applicable
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Company Consent to the current transaction

[] K. The following partnership documentation is required :

(i) a copy of the partnership agreement, including all applicable amendments thereto
(ii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iii) express Partnership Consent to the current transaction

[] L. The following corporation documentation is required:

(i) a copy of the Articles of Incorporation
(ii) a copy of the Bylaws, including all applicable Amendments thereto
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Corporate Resolution consenting to the current transaction

[X] M. Based upon the Company's review of that certain partnership/operating agreement dated Not disclosed for the proposed insured herein, the following requirements must be met:
Any further amendments to said agreement must be submitted to the Company, together with an affidavit from one of the general partners or members stating that it is a true copy, that said partnership or limited liability company is in full force and effect, and that there have been no further amendments to the agreement. This Commitment will then be subject to such further requirements as may be deemed necessary.

[] N. A copy of the complete lease, as referenced in Schedule A, #3 herein, together with any amendments and/or assignments thereto, must be submitted to the Company for review, along with an affidavit executed by the present lessee stating that it is a true copy, that the lease is in full force and effect, and that there have been no further amendments to the lease. This Commitment will then be subject to such further requirements as may be deemed necessary.

[X] O. Approval from the Company's Underwriting Department must be obtained for issuance of the policy contemplated herein and any endorsements requested thereunder. This Commitment will then be subject to such further requirements as may be required to obtain such approval.

[] P. Potential additional requirements, if ALTA Extended coverage is contemplated hereunder, and work on the land has commenced prior to close, some or all of the following requirements, and any other requirements which may be deemed necessary, may need to be met:

[] Q. The Company's "Indemnity Agreement I" must be executed by the appropriate parties.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

Commitment No.: NCS-1078568-LA2

SCHEDULE B, PART II

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I-Requirements are met.

2. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.

3. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.

4. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.

5. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.

6. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

7. General and special taxes and assessments for the fiscal year 2021-2022, a lien not yet due or payable.

8. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

9. An easement for a pipe line and incidental purposes in the document recorded June 17, 1913 as Instrument No. 15, Book 5533 of Deeds, Page 218.

   The location of the easement cannot be determined from record information.

10. An easement for sewer and incidental purposes in the document recorded as Book 44697, Page 197 of Official Records.

11. The fact that the land lies within the boundaries of the Civic-Recreational-Industrial Redevelopment Project Area, as disclosed by the document recorded September 17, 1971 as Instrument No. 3729 of Official Records.

12. An easement for public utilities and incidental purposes in the document recorded December 15, 1981 as Instrument No. 81-1230523 of Official Records.

13. An easement for public utilities and incidental purposes in the document recorded September 15, 1988 as Instrument No. 88-1483363. of Official Records.

14. The effect of a document entitled "Quitclaim Deed", recorded July 31, 2001 as Instrument No. 01-1362735 of Official Records.

    Said document contains an erroneous legal description.

15. We find no outstanding voluntary liens of record affecting subject property. An inquiry should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any security interest in the subject property.

16. Water rights, claims or title to water, whether or not shown by the Public Records.

17. Rights of parties in possession.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

ALERT - CA Senate Bill 2 imposes an additional fee of $75 up to $225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

1. Taxes for proration purposes only for the fiscal year 2020-2021.

First Installment:	$29,749.26, PAID
Second Installment:	$29,749.25, PAID
Tax Rate Area:	04398
APN:	8208-011-029

2. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structure known as 15010 Nelson Avenue, City of Industry, CA.

3. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

4. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

The map attached, if any, may or may not be a survey of the land depicted thereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of this Commitment or the Policy, if any, to which the map is attached.

1.0 INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (ESA) conducted by FREY Environmental, Inc. (FREY) for the property located at 15006 Nelson Avenue in the City of Industry, California (known as the "Site" throughout the rest of this document). The assessor's parcel number for the Site is 8208-011-029. A Site Location Map and Site Vicinity Sketch are shown as Figures 1 and 2, respectively. The current Site owner is listed as Boscacci Group LLC.

2.0 OBJECTIVES

The objectives of the scope of work described below were to assess past and present land use practices, Site operations and conditions, and identify the potential presence of hazardous substances in the soil and groundwater beneath the Site to the extent feasible, pursuant to the processes described in the American Society for Testing and Materials (ASTM) guidelines (ASTM, 2005) and the "All Appropriate Inquires" rule promulgated by the United States Environmental Protection Agency on November 1, 2005 (EPA, 2005).

3.0 TERMINOLOGY

For the purposes of discussion, the following terms are used in this report:

- "Site" refers to the property depicted in Figure 2 and described in Section 6.1;

- "Immediate Site Vicinity" refers to the properties immediately adjacent to the Site that share a common boundary with the Site;

- "Recognized Environmental Conditions" (RECs) as defined in ASTM 1527-05 means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water on the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to the public health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate government agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

- The term "hazardous" is used here in general accordance with its definition in Title 22, Division 4, Chapter 30, California Code of Regulations (CCR). The terms "material" and "waste" are used interchangeably, and no legal distinction is implied between the two terms as used herein.

4.0 SCOPE OF WORK

The scope of work designed to provide the information needed to meet the objectives of the investigation was as follows:

- Conduct Site and Site Vicinity reconnaissance in order to compile a current list of companies/businesses that may utilize potentially hazardous materials in the Immediate Site Vicinity and (on a selective basis) in the Site Vicinity;
- Inspect the Site;
- Interview personnel familiar with the history of the Site;
- Review documentation on file at the Los Angeles County Department of Public Works
- Review permits on file at the Los Angeles County Department of Building and Safety
- Review permits on file at the Los Angeles County Sanitation District
- Review documentation on file at the Los Angeles County Department of Public Health
- Conduct a government agency database review of local, county, state and federal regulatory agency listings, and;
- Evaluation of data and report preparation.

The results of the Site inspection and record review, as described above, were evaluated and interpreted in the context of existing Site conditions and the hydrogeological setting. The scope of work did not include the testing or sampling of lead paint, asbestos, soil, groundwater or air.

5.0 PHYSICAL SETTING

5.1 REGIONAL GEOLOGY

The Site is located in the Puente Valley Groundwater sub-basin of the main San Gabriel Valley Groundwater Basin in the eastern portion of Los Angeles County (CH2M Hill, 1986). The San Gabriel Basin is a broad piedmont plain sloping from the San Gabriel Mountains on the north to the Whittier Narrows on the south. The underlying water bearing formations in the San Gabriel Basin are principally unconsolidated and partially consolidated nonmarine sediments of Recent and Pleistocene age (DWR, 1966). These water-bearing formations consist of gravel, boulders and coarse sediments over 4,000 feet in thickness. In the area of the Puente Valley, near the Site, the thickness of the water bearing sediments is approximately 100 feet (DWR, 1966).

5.2 REGIONAL HYDROGEOLOGY

Groundwater movement in the San Gabriel Basin is generally toward Whittier narrows. In the Site area, the groundwater flow direction is generally towards the west (DWR, 1966). Groundwater in the Site area is generally unconfined (CH2M Hill, 1986). Groundwater use in the San Gabriel Basin

is extensive, and it represents more than 90 percent of the available water supply. There is a heavy reliance on the alluvial aquifer for municipal water supply (CH2M Hill, 1986). Several groundwater supply wells are present in the San Gabriel Valley and have been shut down due to volatile organic compound contamination. The Regional Water Quality Control Board (RWQCB) is charged with assigning beneficial uses for waters within the San Gabriel Valley and to verify that the quality necessary for continued use is maintained. For groundwater beneath the Site, the assigned beneficial uses are municipal, agricultural, industrial process supply, and industrial service supply (RWQCB, 1994).

Depth to groundwater beneath the Site is estimated to be 65 feet below the ground surface based on a previous subsurface investigation which is described in greater detail in Section 7.1.

6.0 FIELD INVESTIGATION

6.1 SITE INSPECTION

FREY conducted a Site inspection on May 19, 2010. The facility was observed to be a truck leasing, repair, storage and fueling facility operated by Scully Transportation. The approximate southern third of the Site was used for the storage of cable and non-chemical building supplies and was occupied by American Brass and Iron.

The Site is rectangular in shape with approximate dimensions of 200 feet from northwest to southeast and approximately 850 feet from northeast to southwest. The total Site size is approximately 4.2 acres.

The entire Site is paved with concrete. Two buildings are present on Site. One building is used for office and administrative purposes. The office building has approximate dimensions of 40 feet by 40 feet and is located in the northern corner of the Site. The office building is of wood frame construction. The exterior of the building is stucco. No chemicals, other than those used for household cleaning, were observed in the office building.

The second building is used for truck maintenance and repair. The truck repair building is of cinder block wall construction with a wood framed roof. Four industrial sized roll up doors face toward the south. Office space, restrooms and a break room are located on the western-most portion of the truck repair building. A small parts area is located in the western portion of the truck repair building and extends into the western-most service bay area. The two middle service bays are used for truck repair and maintenance while the western and eastern service bays are used for tool and truck part storage. A floor drain was located in the center of each of the four service bays. No odors or heavy stains were observed in or around the floor drains.

Chemicals contained within the truck repair building were limited to the southern building corner. Three 55 gallon drums containing used oil filters, located on a spill containment skid, one 5 gallon bucket of oil, and two 55 gallon drums of gear oil were observed in the southern corner of the truck repair building. The concrete floor appeared in good condition with minor staining in the southern building corner.

The facility's chemical storage area is located on the south side of the eastern service bay. A sheet metal roof covers the chemical storage area. The hazardous material storage cabinet located in this area contained several containers of all purpose cleaner, gear lubricant, diesel, brake fluid, compressor oil, refrigerant lube, paint and filter driers. All containers located in the hazardous material storage cabinet were of 1-gallon capacity or less. Two 480 gallon, double walled, steel, above ground storage tanks (ASTs), which contain used oil and new oil, are located in the chemical storage area. Three 55 gallon drums of glass cleaner, diesel and used oil are also located in the chemical storage area. The diesel drum and the used oil drum are located on spill containment skids. A poly water tank and a power washer are also located in the chemical storage area. The floor of the chemical storage area is stained black.

An air compressor in a small wooden shed is located near the southwestern building corner. The concrete floor beneath the air compressor is free of staining.

A truck wash with a drain in the center is located south of the chemical storage area. The truck wash has approximate dimensions of 15 feet by 30 feet. The concrete floor of the truck wash is stained black.

A three stage clarifier with a sample box is located near the northern corner of the truck repair building. The clarifier is estimated to have a capacity of 1,000 gallons and appeared to be in good condition with no visible cracks. Liquids contained within the clarifier appeared to predominantly consist of water. No hydrocarbon or solvent odors were noted in the clarifier.

Two 6,000 gallon diesel ASTs are located approximately 65 feet south of the truck repair building. The diesel ASTs do not have secondary containment. A single fuel dispenser is located on the west side of the ASTs. Product piping, located approximately 16 feet above ground, runs from the two ASTs to the fuel dispensing island approximately 15 feet west of the ASTs. The product piping is plumbed to three fuel dispensers on the island. The product piping does not appear to be below grade in any location. No surficial staining was noted at the fueling island or around the ASTs.

Two storage trailers are located along the western property line. The storage trailers are used to store truck tires. The concrete located throughout the remainder of the Site contained some minor spots as a result of small spills from trucks while parked in the lot.

Utilities provided to the Site include water service from the Los Angeles Department of Water and Power, electricity by Southern California Edison, and trash removal by Athens Services. The Site did not appear to have natural gas service.

Six inch to eight inch, in ground steel plates (possibly sewer lids) are located in a linear fashion and run parallel to eastern property line toward the southern end of the property. It could not be determined what the purpose of these plates were during the Site visit. American Brass and Iron uses the southern quarter of the Site for the storage of pipe and cable. American Brass and Iron has an office located in a trailer. No other structures or chemicals could be seen in the southern quarter of the Site.

RECs observed during the Site inspection include the diesel ASTs, the chemical storage area, the floor drains, the clarifier, the truck wash area, and the potential sewer line located parallel to the eastern property line.

The Site layout is presented on Figure 3. Photographs of the Site appear in Appendix A.

6.2 IMMEDIATE SITE VICINITY RECONNAISSANCE

A reconnaissance of the Immediate Site Vicinity was also conducted on May 19, 2010 (Figure 2). The Site is bound on the north, across Nelson Avenue, by a residential neighborhood, on the east by the Nelson Square Business Park and a trucking facility, on the south by the Union Pacific Railroad tracks and on the west by a vacant lot. No RECs were observed during the Site Vicinity Reconnaissance.

6.3 INTERVIEW WITH KNOWLEDGEABLE PERSON

FREY spoke with Larry Perez, an employee with Scully Transportation on May 19, 2010. Mr Perez indicated that he had worked for Scully Transportation for approximately 6 years. He indicated that the facility appeared in its current state when he began working at Scully. Mr. Perez had no knowledge of the suspected sewer line which runs along the eastern property line. FREY located two in ground utility boxes with electrical conduit running into and out of the western portion of the Site. Mr. Perez was unsure of the purpose of the utility boxes.

Mr. Perez completed the ASTM questionnaire attached in Appendix B. Mr. Perez's answers were confirmed by FREY with the exception of the use of the Site for industrial purposes. Mr. Perez indicated that the Site is not used for industrial purposes while FREY indicated that it is being used for industrial purposes. This discrepancy is believed to be a difference of interpretation of the word industrial and does not affect the findings of this document.

7.0 REGULATORY AGENCY REVIEW

7.1 LOS ANGELES COUNTY DEPARTMENT OF PUBLIC WORKS

FREY reviewed the file maintained by the Los Angeles County Department of Public Works (LACDPW) on May 20 and May 24, 2010. The file consisted primarily of permits, inspection reports, inventory forms, material safety data sheets, certificates of compliance, a business emergency contingency plan and a formal complaint.

The file also contained a "Chronology of Environmental Works" which summarized work conducted between November 1987 and November 1993. No author or date of preparation appeared on the summary which was most likely prepared by the LACDPW in late 1993. One groundwater monitoring well installation report and various water sampling reports were also contained within the LACDPW file with dates between 1989 and 1993 and are briefly summarized as follows:

7.1.1. Drilling of One Soil Boring

One soil boring was drilled, reportedly at an angle, beneath the waste oil UST which was located south of the truck maintenance building. One soil sample was reportedly collected from a depth of 5 feet beneath the UST and analyzed for total petroleum hydrocarbons (TPH) and VOCs. TPH and VOCs were not detected in the soil sample (LACDPW, 1993).

7.1.2. UST Removal

In April, 1988, three diesel USTs (3,500 gallon, 4,000 gallon and 5,000 gallons) and one 2,000 gallon waste oil UST were removed from the Site. Soil samples collected from the base of the diesel UST excavation contained concentrations of TPH up to 3,900 mg/kg. Soil samples collected from the base of the waste oil UST excavation did not contain TPH. The soil sample collected from beneath the fuel dispenser island contained total recoverable petroleum hydrocarbons (TRPH) at a concentration of 5,400 mg/kg. The former location of the USTs is shown on Figure 2 (LACDPW, 1993 and WES, 1989).

7.1.3. Subsurface Soil Investigation

In May and June of 1988, two soil borings were hand augured to 5 feet bgs south of a shed located approximately 75 feet south of the existing office. The purpose of these two borings was not stated. Three soil borings were drilled around the excavation created through the removal of the diesel USTs. The three soil borings were drilled to final depths of 40 or 45 feet bgs. Soil samples were collected at five or 10 foot depth intervals and analyzed for TRPH. TRPH concentrations ranged from 2 mg/kg to 60 mg/kg (LACDPW, 1993).

7.1.4. Soil Excavation and Remediation

In June of 1988, an estimated 75 cubic yards of TRPH impacted soil was excavated from the diesel UST pit, spread on Site and aerated. Soil samples were collected from the aerated soils. Soils contained TRPH at concentrations ranging from 3,600 mg/kg to 8,900 mg/kg. In October, 1988, the excavated soils were reportedly hauled off Site for disposal (LACDPW, 1993).

7.1.5. Groundwater Monitoring Well Installation and Sampling

On February 1, 1989, groundwater monitoring well MW1 was drilled and installed immediately north of the diesel UST excavation. During drilling, soil samples were collected at five foot depth intervals until groundwater was encountered at a depth of approximately 65 feet bgs. Well MW1 was completed at a depth of 80 feet bgs. Soil samples were analyzed for TRPH, benzene, toluene, ethylbenzene and total xylenes (BTEX). No TRPH or benzene was detected in any of the soil samples. Low concentrations of TEX were detected in the soil samples (WES, 1989).

Groundwater samples were collected from MW1 in February 1989, November 1989, October 1991, November 1992, and in April, June and September of 1993. Groundwater samples were analyzed for TPH and selected VOCs in accordance with EPA Method No. 8015 and 602, respectively. With the exception of the first groundwater sampling event, TPH and VOCs were not detected in the groundwater samples collected from well MW1. The depth to groundwater ranged from 63.02 to 71.55 feet below top of the well casing (Aerovironment, 1993).

7.1.6. No Further Action Letter

The LACDPW issued a no further action letter for the Site dated July 28, 1994. The no further action (attached in Appendix C) letter concerned the environmental investigation work related to the soil and groundwater sampling discussed in Sections 7.1.1. and 7.1.5.

7.1.7 Miscellaneous Information

The file maintained by the LACDPW contained several letters, hand written notes, and other forms of documentation which provide additional information regarding environmental issues in the past.

A RWQCB letter dated July 7, 1986 (the oldest document in the file) requested a subsurface oil investigation centered around the waste oil UST. The letter was addressed to Guthmiller Trucking. The letter also discussed the application of oil to the unpaved portion of the Site for dust control. No further information was provided regarding this event.

A February 27, 1987 letter from the RWQCB to the LACDPW summarizes conclusions reached by the RWQCB. The letter stated that Guthmiller Trucking had used solvents at the Site but had vacated the Site without responding to a request for action by the RWQCB. Joseph Dooley of the Dooley Forest Company reportedly was informed of the concern and had the 1,000 gallon waste oil UST pumped out prior to re-leasing the Site. No further pertinent information was provided.

EDNA, Inc, former Site occupant, authored a letter dated March 27, 1987 which stated that, among other items, "Starting on March or April 1986, the trucks were cleaned without water and soap. The cleaning was done by use of a solvent."

A July 20, 1988 letter describes the drilling and sampling of two soil borings near the truck wash. One soil sample was collected from each boring at 5 feet bgs and analyzed for TPH and VOCs. TPH and VOCs were not detected in either soil sample. The location of these two borings was not shown.

A complaint report dated February 9, 1988 indicates that a spill of 600 gallons of diesel occurred on February 1, 1988. The complaint states action taken as "Pump what's floating into barrels". No further information was provided on the complaint.

Copies of information pertinent to the objective of this scope of work have been attached in Appendix C.

7.2 LOS ANGELES COUNTY DEPARTMENT OF BUILDING AND SAFETY

FREY visited the Los Angeles County Department of Building and Safety (LACDBS) on May 19, 2010. Several permits and other documents were located in a file and on microfiche. The oldest document on file was an application for a building permit dated August 15, 1964. The permit is for the construction of a 40 foot by 60 foot warehouse for the storage of conduit. The use of the existing building is listed as office and warehouse. The owner is listed as Power City Construction.

An application for building permit dated February 22, 1973 lists the property owner as Piedmont Trucking. Use of the property is listed as truck repair. ENDA Inc is listed as owner on an application for sewer permit dated December 8, 1981. A plumbing permit dated December 8, 1981 is for the installation of a sink, two toilets and 4 floor drains.

A building schematic diagram (portions of which were copied from microfiche) was dated 1981 and shows the construction detail of the service garage building which currently is present on Site. In addition, the schematics show the clarifier in detail and a circular structure listed as "the pit" which was observed during the site inspection. The Pit had a 24 inch cast iron lid labeled "sewer" which could not be removed during the site inspection. The clarifier is listed as having a 1,250 gallon capacity. Other items of interest on the schematic are the presence of a fill pit located approximately 75 feet south of the current building and the proposed installation of a 1,000 gallon waste oil UST. No additional documentation regarding the proposed installation of the 1,000 gallon waste oil UST

could be located. The schematic also shows a 40 foot by 160 foot building located along the railroad tracks to the south which is listed as the Dooley Lumber Co. existing storage shed with 2 story office building. A rail spur is shown on the southern-most section of the property.

An undated application for domestic wastewater clearance was also copied from the microfiche. The application lists American Brass and Iron as owner of record. The work description is listed as " Construction of 6 : private sewer line inside the lot and connection to 39" L.A.C.S.D. #2 trunk line".

A building permit dated January 30, 1996 is for the installation of two above ground fuel tanks. The property owner is listed as United Parcel Service.

Several trade (electrical, roof, sign, general building, HVAC) permits were observed in the file and had dates ranging from November 30, 1981 to February 20, 1996. Dooley Lumber applied for an electrical permit on November 30, 1981. No trade permits were dated between November 30, 1981 and the next oldest permit dated October 30, 1989. The October 30, 1989 document was a declaration by American Brass and Iron that hazardous materials would not be used on Site. Trade permits between the years 1989 and 1995 list American Brass and Iron as the owner or applicant. Trade permits between the years 1996 and April 6, 2001 (roofing permit) list United Parcel Service as owner.

The clarifier, pit associated with the clarifier, the pit located south of the service garage, the rail spur and the aboveground diesel tanks are considered RECs. Copies of relevant documents from the LACDBS have been attached in Appendix D.

7.3 LOS ANGELES COUNTY SANITATION DISTRICT

FREY requested that the Los Angeles County Sanitation District (LACSD) provide records for the Site. The LACSD responded that no records were available in their fax dated May 20, 2010. A copy of the LACSD response has been attached in Appendix E.

7.4 LOS ANGELES COUNTY DEPARTMENT OF PUBLIC HEALTH

On June 1, 2010, FREY reviewed the file for the Site maintained by the Los Angeles County Department of Public Health DPH). The file consisted of a log sheet first dated March 29, 2001 which documented the presence of two unlabeled 55 gallon drums located in the southeastern corner of the Site. A notice of violation was issued for the two drums. An additional inspection entry dated May 9, 2001 lists the drum contents as "pipe coating". A reinspection log sheet dated May 31, 2001 documents that the two drums were transported off Site for disposal. A copy of this information has been attached in Appendix F.

8.0 HISTORICAL INFORMATION REVIEW

FREY

8.1 HISTORICAL AERIAL PHOTOGRAPHS

Environmental Data Resources, Inc. (EDR) provided aerial photographs from 1928, 1938, 1948, 1952, 1968, 1976, 1990, 1994, 2002 and 2005. The scale for the aerial photographs ranged from 1 inch equals 480 feet to 1 inch equals 666 feet. The aerial photographs have been attached in Appendix G.

1928 A small rectangular shaped building, which appears to be single family home, is located on the Site immediately south of Nelson Avenue which appears to be a dirt road. The home is centered on a 'U' shaped drive way. The remainder of the Site appears as plowed fields. The railroad tracks which bound the Site on the south are in place. The Site Vicinity is lightly developed and is primarily used for agriculture.

1938 The 1938 photograph is similar to the 1928 photograph.

1948 The house has been removed from the Site. The remainder of the Site is vacant. The parcel which bounds the Site on the west remains vacant. A single family home is located on the parcel across Nelson Avenue to the north. The parcel which bounds the Site on the east has been graded into several small rectangles for what is most likely an agricultural operation. For the parcel on the east of the Site, two single family home sized buildings appear to front Nelson Avenue while a larger rectangular building is located along the railroad tracks. Parcels to the south of the railroad tracks have been developed with what appear to be single family homes. The Site Vicinity is still primarily used for agriculture.

1952 On the Site, a house appears on the west side of the U shaped driveway. A small shed or outbuilding appears south of the house. The parcel across Nelson Avenue to the north has been additionally developed with as many as four houses. The remainder of the photo is similar to the 1948 photograph.

1968 A rectangular building (with three sections) is located on the Site approximately 40 feet south of Nelson Avenue. An additional rectangular structure is located approximately 20 feet behind (south) these the building which fronts Nelson Avenue. Several trees and an undeveloped area are located further south of the second building. In the center of the Site and running to the south, an approximate distance of 350 feet, which runs the entire width of the Site, has been graded (noticeably lighter in color than the surrounding area) and leads to a large building located on the property which bounds the Site to the west. It could not be determined from the photograph what the purpose of this graded area was. The remainder of the Site appears undeveloped.

The property which bounds the Site on the west has been developed with a rectangular building towards Nelson Avenue and a larger warehouse or industrial building set back approximately 330 feet from Nelson Avenue. The warehouse or industrial building has a

graded surface which extends onto the Site and was discussed above. Two homes are located on the southern portion of the lot next door. Residential homes have been developed on the north side of Nelson Avenue. The northern half of the property which bounds the Site on the east appears vacant. A square building (approximately 120 feet per side) is located on the southern half of this property. The remainder of this parcel appears undeveloped. The Site Vicinity has been developed with residential homes north of Nelson Avenue and primarily commercial and industrial buildings to the south of Nelson Avenue.

1976 The two buildings located on the Site in the 1968 photograph remain. A third, small, square structure appears between the southern of the two buildings and the eastern property line. A dirt road runs along the eastern property line toward the southern-most edge of the Site. The southern-most 250 foot section of the Site shows 5 linear features, which run north to south, which can not be identified. The remainder of the Site appears to be paved with asphalt.

The parcels which bound the Site on the north and east remain the same as in the 1968 photograph. The southern half of the parcel which bounds the Site on the west has similar linear features as on the Site while the northern half appears similar to the 1968 photograph.

1990 The structures previously identified have been removed, and the entire Site paved with concrete. The truck repair building and the office building, currently on the Site, appear in the photo. Two rectangular structures are located south of the truck repair building. Several truck trailers are located on the Site.

The parcels to the north and south remain essentially the same as in the 1976 photograph. The parcel which bounds the Site on the west remains the same on the northern half. The southern half has been paved and a building constructed in the southern corner of this parcel. The Nelson Square business park has been constructed on the parcel which bounds the Site on the east. The remainder of this parcel remains the same as in previous photos.

1994 The scale and exposure of the photo make specific object identification difficult on the Site. The parcels which bound the Site appear similar to the 1990 photograph.

2002 The Site and Site Vicinity appear as they presently do.

2005 The Site and Site Vicinity appear as they presently do.

No RECs can be seen in the aerial photographs.

8.2 HISTORICAL TOPOGRAPHIC MAPS

EDR provided historical topographic maps from 1901, 1912, 1924, 1927, 1946, 1966, 1972, and

1981. The historical topographic maps have been attached in Appendix H.

The Site can not be located on the topographic maps from 1901 and 1912 due to the map scale. The 1924 and 1927 maps show the Site as undeveloped but does show Nelson Avenue and the Southern Pacific Railroad. The 1946 map has been labeled incorrectly and is a replication of the 1912 map.

The 1966, 1972 and 1981 maps show two buildings on the Site near Nelson Avenue. A railroad spur is shown on the southern portion of the Site.

The railroad spur is considered an REC. Railroad spurs are used for the loading and unloading of heavy materials. Liquid spills due to poor handling practices may have occurred in this area. Further, the braking of railroad cars in these areas can lead to the deposition of grease, oil, and metals into the area in the vicinity of the railroad spur.

8.3 SANBORN MAPS

EDR conducted a Sanborn Map search for the Site. The Site is listed as an "Unmapped Property". A copy of the EDR letter has been included in Appendix I.

8.4 CITY DIRECTORY REVIEW

EDR conducted a historical city directory review between the years of 1972 and 2008. Entries for the Site were listed for 1980, 1986, 1990, 1994, 2000 and 2008. The Site occupants are as follows:

Occupant	Year
Noble Transport, Inc & BF Walker Inc	1980
Guthmiller Inc & Mammoth of California	1986
American Brass and Iron	1990 & 1994
American Brass and Iron & UPS Truck Leasing	2000
American Brass & Iron Foundry, Scully Distribution Service and Scully Transportation	2008

The entries for 15001, 15003 15005, 15007, 15011 and 15015 Nelson Avenue (which bound the Site on the north) were listed as residential occupants between 1972 and 2008.

The occupant for the address of 15002 Nelson Avenue was listed as M&M Lumber and Monger & Matheson Co between 1972 through 1986. No listings were shown for 15002 Nelson Avenue between 1990 and 2008. The 15002 Nelson Avenue address bounds the Site on the west.

The property which bounds the Site on the east has an address of 15010 Nelson Avenue. No listings were shown in the City Directory for 15010 Nelson Avenue.

A copy of the city directory review has been attached in Appendix J. Based on the City Directory review, the Site occupants are considered RECs based on the common association of regulated materials with transportation companies and metal working companies such as American Brass and Iron. The surrounding properties are not considered RECs.

8.5 ENVIRONMENTAL LIENS

An environmental lien search was not requested as part of this scope of work.

9.0 GOVERNMENT AGENCY LISTING

9.1 OIL AND GAS

The nearest oil well drilled to the Site is listed as well No. 1 and was located approximately one quarter mile north of the Site. The well was reportedly abandoned by Chevron USA in 1899 and is not considered an REC in relation to the Site (EDR, 2010).

9.2 RADON

The Site is located in a moderate radon exposure zone according to a generalized assessment of radon potential in the zip code area of 91744. The radon assessment in contained within the "The EDR Radius Map with GeoCheck," document dated May 12, 2010. A copy of the report is included in Appendix K.

9.3 REGULATORY AGENCY DATABASE REVIEW

EDR reviewed 98 government agency databases for the Site and Site Vicinity. For a complete list and description of each database researched by EDR, and the descriptions and locations of the facilities identified, please refer to their report entitled, "The EDR Radius Map with GeoCheck," dated May 12, 2010. A copy of the report is included in Appendix K.

9.3.1 Site

The Site is listed on 11 government databases: AST, WIP, HIST CORTESE, LUST, SWEEPS UST, Los Angeles County HMS, RCRA-SQG, FINDS, HAZNET, NPDES and HIST UST. The EDR report identifies the Site by the addresses of 15000 and 15006 Nelson Avenue. It is our understanding that the Site address is 15006 and that the 15000 address concerns the vacant lot which bounds the Site on the west.

The AST database lists facilities which have above ground storage tanks. Scully Transportation Service is listed as the owner of an AST. The AST capacity is listed as 3,702 gallons.

The WIP (well investigation program) lists Dooley Forest Products as the occupant of the Site. The WIP is a list of facilities which may have used chlorinated solvents and are located in the vicinity of a groundwater production well.

The SWEEPS UST, Los Angeles County HMS, Historical CORTESE, and LUST (leaking underground storage tank) list EDNA Inc as the occupant of the Site. The LUST case was closed by the Los Angeles County Department of Public Works on September 15, 1994. The case was summarized as being opened on March 20, 1989 and concerned a gasoline release which impacted soil only. The soil samples were not analyzed for MTBE according to the EDR report. No further information was provided in the CORTESE, SWEEPS UST or Los Angeles County HMS listings.

Scully Transportation is listed on the RCRA-SQG, FINDs and HAZNET databases. Regulated materials listed as being used at the Site include tetrachloroethylene (PCE) (no amount given), waste oil and mixed oil (48.36 tons), oil/water separation sludge (12.51 tons), unspecified organic liquid mixture (1.08 tons) and other organic solids (0.3 tons).

Los Angeles Terminal is listed as the Site occupant on the NDPES and HIST UST lists. No further information is provided in the NPDES listing although the discharge address is listed as 3453 Enterprise Avenue in Hayward, California. The HIST UST lists a 10,000 gallon UST, 4,000 gallon UST and a 3,000 gallon UST as formerly being present on Site. Diesel was reportedly contained in each UST.

UPS Truck Leasing was listed on the HAZNET database. Regulated materials listed as being used at the Site include aqueous solutions with less than 10% total organic residues (1.62 tons), liquids with halogenated organic compounds greater than 1,000 mg/L (0.1289 tons) and unspecified aqueous solutions (0.2085 tons).

The presence of former USTs, the volume of regulated materials used, the use of regulated materials by numerous occupants, the confirmed use of PCE and halogenated compounds and the listing of a former occupant in the WIP are considered RECs.

9.3.2 Sites in the Immediate Site Vicinity

FREY

The property which bounds the Site on the west has an address of 15000 East Nelson Avenue. The Site is currently a vacant lot but was formerly occupied by Pacific Motor Trucking Company, LA Great Dane and Pac Motor Trucking. These companies are listed in the HAZNET, CHMIRS, NPDES, EMI, Los Angeles County HMS, CA WDS, RCRA-SQG, and the FINDS databases.

The database listings report that organic liquids with metals (0.0875 tons), aqueous solution with less than 10% total organic residues (0.442 tons), surplus inorganics (0.0025 tons), unspecified oil containing waste (0.3336 tons), waste oil and mixed oil (0.81 tons) and unspecified solvent mixture waste (3.72 tons) were formerly stored or used on this property. It was also reported that 100 gallons of diesel leaked from a truck on this property on November 13, 1997.

The California Waste Discharge System (CA WDS) lists the facility type as Industrial facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing operations. The property which bounds the Site on the west is considered an REC.

No other properties which bound the Site were listed on EDR database report.

9.3.3 Sites in the Site Vicinity

The Site is located within the limits of the San Gabriel Valley (Area 4) Superfund site. The San Gabriel Valley Superfund site has been the subject of environmental investigation since 1979 when groundwater contaminated with volatile organic compounds (VOCs) were detected in several groundwater supply wells.

Several properties within 1/4 mile are listed on the EDR report. The nearest listing to the Site, which does not share a boundary with the Site, and has a confirmed chemical release that is still under investigation or remediation is the former Texaco Service Station located at 241 North California Avenue, approximately 800 feet to the west from the Site. USTs were removed from the former Texaco service station in August 2008. Soil samples collected after removal of the USTs contained concentrations of TRPH, TPH-diesel, TPH-gasoline, toluene, ethylbenzene and total xylenes. The soil samples did not contain fuel oxygenates. The Site is currently under additional investigation (SWRCB, 2010). The fuel release at 241 North California Avenue is not considered a significant threat to the Site.

10.0 DATA GAPS

Data gaps were identified during the preparation of this report. The oldest documentation for the Site is the 1928 aerial photograph which shows one structure in place. Thus, it could not be established when the Site was undeveloped. A data gap between 1952 to 1964 was observed. During this time frame, the single structure (presumed to be a single family home) was replaced by a warehouse as documented in the 1964 building permit. The two identified data gaps do not alter the conclusions of this report.

11.0 CONCLUSIONS

FREY has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of the ASTM guidelines. Based on the data discussed above, FREY has reached the following conclusions:

- The Site was developed prior to 1928 and appeared to be used for residential purposes until sometime between 1952 and 1964. Between 1952 and 1964, the Site was developed for warehousing and transportation use and has remained in that capacity to the present date.

- Several RECs were observed during the preparation of this report. Historical RECs include the former diesel USTs and dispensers, the former waste oil UST, the former fill pit, the former cleaning of trucks with solvents, the release of 600 gallons of diesel, and the former railroad spur. Current RECs include the two diesel ASTs and fuel dispensers, the chemical storage area, the clarifier and associated floor drains in the service garage, the use of PCE and other regulated chemicals, the sewer line which runs along the eastern property line and the truck wash area.

12.0 LIMITATIONS

The judgements described in this report are professional opinions based solely within the limits of the scope of work authorized, and pertain to conditions judged to be present or applicable at the time the work was performed. Future conditions may differ from those described herein, and this report is not intended for future evaluations of this Site unless an update is conducted by a consultant familiar with environmental assessments.

This report was compiled partially of information supplied to FREY Environmental, Inc. from outside sources, other information that is in the public domain and a visual inspection of the Site. FREY Environmental, Inc. makes no warranty as to the accuracy of statements made by others, which may be contained in this report, nor are any other warranties or guarantees, expressed or implied, included or intended by the report, except that it has been prepared in accordance with the current accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing similar services.

Site conditions may change with time as the result of natural alterations or man-made changes on this or adjacent properties. Future environmental investigations conducted at the Site may reveal Site conditions not indicated in the data reviewed by FREY Environmental, Inc. Additionally, changes in standards or regulations applicable to the Site may occur. The findings of this report may be partially or wholly invalidated by changes of which FREY Environmental, Inc. is not aware or has not had the opportunity to evaluate.

Environmental assessments provide an additional source on information regarding the environmental conditions of a particular Site or facility. The report to the Client is a professional opinion and judgement, dependent upon FREY's knowledge and information obtained during the course of performance of the services.

13.0 PROFESSIONAL STATEMENTS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Sincerely,
FREY Environmental, Inc.

Joe Frey
Principal
Certified Engineering Geologist
CEG#1500

Evan Privett
Senior Project Geologist

ASTM QUESTIONNAIRE

Description of Site: Address:
Trucking Facility
15006 Nelson Avenue
Industry, California

Question	Owner[7]			Occupants (if applicable)			Observed During Site Visit		
1a. Is the *property* used for an industrial use?	Yes	No	Unk	(Yes)	(No)	Unk	(Yes)	No	TRANSPORTATION FACILITY
1b. Is any *adjoining property* used for an industrial use?	Yes	No	Unk	(Yes)	(No)	Unk	Yes	(No)	
2a. Did you observe evidence or do you have any prior knowledge that the *property* has been used for an industrial use in the past?	Yes	No	Unk	Yes	(No)	Unk	(Yes)	No	FORMERLY USED FOR TRUCKING
2b. Did you observe evidence or do you have any prior knowledge that any *adjoining property* has been used for an industrial use in the past?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
3a. Is the *property* used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	No	Unk	(Yes)	No	Unk	(Yes)	No	
3b. Is any *adjoining property* used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
4a. Did you observe evidence or do you have any prior knowledge that the *property* has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	No	Unk	Yes	(No)	Unk	(Yes)	(No)	
4b. Did you observe evidence or do you have any prior knowledge that any *adjoining property* has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
5a. Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the *property* or at the facility?	Yes	No	Unk	Yes	(No)	Unk	(Yes)	No	55 GALLON DRUMS OF OIL

Question	Owner[7]			Occupants (if applicable)			Observed During Site Visit		
5b. Did you observe evidence or do you have any prior knowledge that there have been previously any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the *property* or at the facility?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
6a. Are there currently any industrial *drums* (typically 55 gal (208 L)) or sacks of chemicals located on the property or at the facility?	Yes	No	Unk	Yes	(No)	Unk	(Yes)	No	55-GAL DRUMS
6b. Did you observe evidence or do you have any prior knowledge that there have been previously any industrial *drums* (typically 55 gal (208 L)) or sacks of chemicals located on the property or at the facility?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
7a. Did you observe evidence or do you have any prior knowledge that *fill dirt* has been brought onto the property that originated from a contaminated site?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
7b. Did you observe evidence or do you have any prior knowledge that *fill dirt* has been brought onto the property that is of an unknown origin?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
8a. Are there currently any *pits, ponds,* or *lagoons* located on the *property* in connection with waste treatment or wasta disposal?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
8b. Did you observe evidence or do you have any prior knowledge that there have been previously, any *pits, ponds,* or *lagoons* located on the *property* in connection with waste treatment or waste disposal?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
9a. Is there currently any stained soil on the *property*?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
9b. Did you observe evidence or do you have any prior knowledge that there has been previously, any stained soil on the *property*?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
10a. Are there currently any registered or unregistered storage tanks (above or underground) located on the *property*?	Yes	No	Unk	(Yes)	No	Unk	(Yes)	No	AGTS DIESEL & OIL
10b. Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the *property*?	Yes	No	Unk	(Yes)	No	Unk	(Yes)	No	USTS
11a. Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the *property* or adjacent to any structure located on the *property*?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
11b. Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the *property* or adjacent to any structure located on the *property*?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
12a. Is there currently evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?	Yes	No	Unk	Yes	(No)	Unk	(Yes)	No	STAINED CONCRETE IN CHEM STORAGE AREA

Question	Owner[7]			Occupants (if applicable)			Observed During Site Visit		
12b. Did you observe evidence or do you have any prior knowledge that there have been previously any leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring drains, walls, ceilings or exposed grounds on the property?	Yes	No	Unk	Yes	(No)	Unk	(Yes)	No	FORMER USTS
13a. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
13b. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)	
14. Does the *owner* or *occupant* of the *property* have any knowledge of *environmental liens* or governmental notification relating to past or recurrent violations of environmental laws with respect to the *property* or any facility located on the *property*?	Yes	No	Unk	Yes	(No)	Unk			
15a. Has the *owner* or *occupant* of the *property* been informed of the past existence of *hazardous substances* or *petroleum products* with respect to the *property* or any facility located on the *property*?	Yes	No	Unk	Yes	(No)	Unk			
15b. Has the *owner* or *occupant* of the *property* been informed of the current existence of *hazardous substances* or *petroleum products* with respect to the *property* or any facility located on the *property*?	Yes	No	Unk	Yes	(No)	Unk			
15c. Has the *owner* or *occupant* of the *property* been informed of the past existence of environmental violations with respect to the *property* or any facility located on the *property*?	Yes	No	Unk	Yes	(No)	Unk			
15d. Has the *owner* or *occupant* of the *property* been informed of the current existence of environmental violations with respect to the *property* or any facility located on the *property*?	Yes	No	Unk	Yes	(No)	Unk			
16. Does the *owner* or *occupant* of the *property* have any knowledge of any *environmental site assessment* of the *property* or facility that indicated the presence of *hazardous substances* or *petroleum products* on, or contamination of, the *property* or recommended further assessment of the *property*?	Yes	No	Unk	Yes	(No)	Unk			
17. Does the *owner* or *occupant* of the *property* know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any *hazardous substance* or *petroleum products* involving the *property* by any owner or occupant of the *property*?	Yes	No	Unk	Yes	(No)	Unk			
18a. Does the *property* discharge wastewater (not including sanitary sewage or storm water) onto or adjacent to the *property* and/or into a storm water system?	Yes	No	Unk	(Yes)	No	Unk	(Yes)	No	STORM WATER SYSTEM

Question	Owner[7]			Occupants (if applicable)			Observed During Site Visit	
18b. Does the *property* discharge waste water (not including sanitary waste or storm water) onto or adjacent to the *property* and/or into a sanitary sewer system?	Yes	No	Unk	(Yes)	No	Unk	(Yes)	No
19. Did you observe evidence or do you have any prior knowledge that any *hazardous substances* or *petroleum products*, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the *property*?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	Yes	No	Unk	Yes	(No)	Unk	Yes	(No)

Government Records/Historical Sources Inquiry

(See guide, Section 10)

21. Do any of the following Federal government record systems list the property or any property within the search distance noted below:

	Approximate Minimum Search Distance, miles (kilometers)		
Federal NPL site list	1.0 (1.6)	Yes	No
Federal CERCLIS list	0.5 (0.8)	Yes	No
Federal CERCLIS NFRAP site list	property and adjoining properties	Yes	No
Federal RCRA CORRACTS facilities list	1.0 (1.6)	Yes	No
Federal RCRA non-CORRACTS TSD facilities list	0.5 (0.8)	Yes	No
Federal RCRA generators list	property and adjoining properties	Yes	No
Federal ERNS list	property only	Yes	No

22. Do any of the following state record systems list the property or any property within the search distance noted below:

	Approximate Minimum Search Distance, miles (kilometers)		
State lists of hazardous waste sites identified for investigation or remediation:			
State — Equivalent NPL	1.0 (1.6)	Yes	No
State — Equivalent CERCLIS	0.5 (0.8)	Yes	No
State landfill and/or solid waste disposal site lists	0.5 (0.8)	Yes	No
State leaking UST lists	0.5 (0.8)	Yes	No
State registered UST lists	property and adjoining properties	Yes	No

23. Based upon a review of *fire insurance maps* 10.3.1.3 or consultation with the local fire department serving the *property*, all as specified in the guide, are any buildings or other improvements on the *property* or on an *adjoining property* identified as having been used for an industrial use or uses likely to lead to contamination of the *property*? Yes No

The *preparer* of the *transaction screen questionnaire* must complete and sign the following. (For definition of "preparer" and "user," see 5.3 or 3.3.28.)

EVAN PRIVETT FREY ENVIRONMENTAL

The *Owner* questionnaire was completed by:

Name
Title
Firm
Address

Phone number
Date
Preparer's relationship to site
Preparer's relationship to user (for example, principal, employee, agent, consultant)

The *Occupant* questionnaire was completed by:

Name Jerry Perce
Title Service Manager
Firm
Address Scully Truck Rental & Lease

Phone number 626-968-1663
Date 5-19-10
Preparer's relationship to site
Preparer's relationship to user (for example, principal, employee, agent, consultant)

The *Site Visit* questionnaire was completed by:

Name EVAN PRNEST
Title GEOLOGIST
Firm FREY ENVIRONMENTAL
Address

Phone number
Date 5-19-10
Preparer's relationship to site —
Preparar's relationship to user (for example, principal, employee, agent, consultant)

The *Government Records* and *Historical Sources Inquiry* questionnaire was completed by:

Name
Title
Firm
Address

Phone number
Date
Preparer's relationship to site
Preparer's relationship to user (for example, principal, employee, agent, consultant)

User's relationship to the site (for example, owner, prospective purchaser, lender, etc.)

If the preparer(s) is different from the user, complete the following:

Name of User
User's address

User's phone number

Copies of the completed questionnaires have been filed at:

Copies of the completed questionnaires have been mailed or delivered to:

Preparer represents that to the best of the preparer's knowledge the above statements and facts are true and correct and to the best of the preparer's actual knowledge no material facts have been suppressed or misstated.

Dear Mr. Novak:

UST LOCAL OVERSIGHT PROGRAM (LOP) CASE CLOSURE
LOCATION: 15006 NELSON AVENUE, INDUSTRY

We are recommending the site noted above for closure and we would like for you to concur with our recommendation. Enclosed is a completed copy of the Leaking Underground Fuel Storage Tank Program Case Closure Summary, the LOP Site Summary and a Site Map for this site. Also enclosed is a letter from your office indicating that no further action is required at this site with respect to the Well Investigation Program. As stated in the Closure Guidelines from the State Water Resources Control Board, this form is being sent to you for the 30-day comment period. Unless we hear from you within 30 days of the date of this letter, we will issue a closure letter for the site.

If you have any questions or need additional information about the work at this site, please contact Nilcole Long at (818) 458-3572.

Very truly yours,

HARRY W. STONE
Acting Director of Public Works

Dear Mr. Eisenberg:

UNDERGROUND STORAGE TANK (UST) CASE CLOSURE
CLOSURE PERMIT NO. 4238B
LOCATION: 15006 NELSON AVENUE, INDUSTRY

This letter confirms the completion of site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required. This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721 (e).

Please telephone Nicole Long at (818) 458-3572 if you have any questions regarding this matter.

Very truly yours,

HARRY W. STONE

LETTER OF CONFIRMATION
TANK REMOVAL AND CLARIFIER CLEANING
FORMER EDNA PROPERTY
15006 EAST NELSON AVENUE
CITY OF INDUSTRY, CALIFORNIA

Dear Mr. Boscacci:

This letter is to confirm that, as of this date, all fuel tanks have been removed and the waste oil clarifier has been cleaned at the former Edna Incorporated property located at 15006 East Nelson Avenue, City of Industry, California.

On April 8, 1988, four underground fuel storage tanks, and one fuel island dispenser, were removed by Rudy's Service Station Equipment Maintenance, Inc. (Rudy's), under contract to Edna Incorporated, the former property owner. The tanks were disposed of at American Metal Recycling, Incorporated, Ontario, California.

On May 19, 1989, one waste oil clarifier was pumped out and steam cleaned by Ancon, under the supervision of Western Environmental Services personnel. All clarifier contents were disposed of at Demeno Kerdoon, Compton, California.

Please call if you have any further questions.

Sincerely,
WESTERN ENVIRONMENTAL SERVICES INCORPORATED

LETTER REPORT
RESPONSE TO COMMENTS
OF REGIONAL QUALITY CONTROL BOARD
15006 EAST NELSON AVENUE
CITY OF INDUSTRY, CALIFORNIA

Dear Mr. Ghysels:

This letter is in response to comments made by Mr. Roy R. Sakajda of the California Regional Quality Control Board, in a correspondence dated January 24, 1989. The letter pertained to specific areas of technical concern which shall be undertaken in a soon to be implemented groundwater monitoring well installation and sampling program.

As per Mr. Sakajda's request this letter shall serve as written notice that all the recommended procedures and guidelines outlined in the January 24, 1989 letter shall be incorporated into WES's workplan.

WES appreciates the opportunity to provide environmental management services to TSA. If we can be of further assistance or provide additional information feel free to call.

Sincerely,
WESTERN ENVIRONMENTAL SERVICES, INC.

SITE ASSESSMENT – 15006 NELSON AVENUE, CITY OF INDUSTRY – DOOLEY FOREST PRODUCTS/EDNA INC. (FILE (NO. 86-16)

Your workplan, received January 4 1989, has been reviewed. It is conditionally approved subject to the following requirements which must be incorporated into the proposed program:

Soil Sampling

1. Sample tube ends must be covered by teflon or aluminum foil, capped, securely taped, labeled and cooled to 4 C for transport to analytical laboratory.

Well Location

1. Shift MW-1 to a position downgradient or adjacent to the dispensing station.

Well Installation

1. Extend boring a minimum of 20 feet into saturated horizon.

2. Obtain a sample of representative materials from saturated horizon and perform a sieve analysis. Submit along with filter pack sieve analyses (manufacturer) with technical report.

3. Install filter pack, seal and grout in such a fashion as to prevent bridging.

4. Seal shall be 3-5 feet in thickness.

5. Filter pack shall extend a minimum of 2 feet above the end of the screened interval.

6. Screen shall extend 10 feet above the static water table.

7. Cement bentonite grout shall be mixed according to DWR specifications and installed by tremie maintained no more than 5 feet from bottom.

8. Center screen in hole and do not rest on bottom.

9. Survey well head to .01 feet vertical from nearest USGS or USC&GS benchmarks. Location of benchmark together with survey data must be submitted with report.

10. A permit from the L.A. Co. Dept. of Health Services must be obtained prior to well installation.

Development

1. Development should not be initiated until the grout has set to maximum compressive strength (24 to 72 hours).

2. Do not use any method which will have longterm degassing effects on chemistry of formation water, e.g. air jetting or introduction of non-formation water; or damage the screen integrity, e.g. swabbing.

3. Develop until produced water has turbidity value of 10 NTUs or less.

Sampling

1. Obtain water sample from surface of first water encountered before advancing boring and analyze for TPH.

2. Formal sampling should lag 7 days after development to allow equilibration with formation water.

3. Sample at surface of well and at mid level in order to determine floating and dissolved constituents.

4. Sampling protocols and actions must not degas water samples or act to disperse floating contaminants. For example the bailer must be lowered gently and not splashed.

5. A bottom emptying device must be used for the mid-well sample and the sample vial filled slowly without splashing to minimize potential for degassing.

6. A separate water sample must be obtained at the same time and analyzed for suspended solids.

7. Purge well until pH, temperature and specific conductance are stabilized and turbididity is minimized.

Laboratory Analysis

1. Detection limits for EPA 418.1 for soil samples must be at least 1 mg/kg. Discuss with your laboratory before submitting samples for analysis.

2. Results from the EPA Method 8020 must meet the practical quantitation limits (PQL) of 5-10 ug/kg.

Indicate in writing that these areas of concern have been incorporated into your workplan. A final report is due to this Regional Board by March 3, 1989. You must notify staff 5 days in advance of field investigations. If you have any questions please contact Philip Chandler at (213) 620-6091.

WORKPLAN SUMMARY\COST ESTIMATE
GROUNDWATER MONITORING WELL INSTALLATION
EDNA INCORPORATED
15006 NELSON AVENUE
CITY OF INDUSTRY, CALIFORNIA

Dear Mr. Ghysels:

Transmitted herewith please find Western Environmental Services Incorporated's (WES) workplan summary\cost estimate for a groundwater monitoring well installation and sampling at Edna Inc., located at 15006 East Nelson Street, Industry, Los Angeles County, California.

The work shall include the drilling and installation of one four-inch diameter groundwater monitoring well, well purging and development, soil and groundwater sampling, and a report summarizing field procedures and sampling results.

The drilling shall be performed using a truck mounted drilling rig equipped with 6.75 inch inside diameter (I.D.), 10.00 inch outside diameter (O.D.) continuous flight hollow stem augers.

Samples shall be obtained using a split spoon, California modified sampler containing stainless steel sleeves. Samples shall be collected at five foot depth intervals until groundwater is encountered and also at the groundwater-soil interface. The sampler shall be cleaned with trisodium phosphate (TSP) and triple rinsed with deionized (D.I.) water before each sample is obtained. Upon recovery, samples shall be capped immediately with plastic lids, labeled, and placed within an ice chest to maintain laboratory conditions until delivery to a state certified laboratory for analyses.

P.O. Box 9806 • 2113 West 17th Street • Long Beach, California • 90810
213/495-1334 • 213/495-1036

At each sample depth, the sampler shall be advanced one foot with blows-per-foot recorded for evaluating soil density and consistency. The upper sample retainer shall be used to describe lithology in accordance with the Unified Soil Classification System (USCS) and the lower sample shall be submitted for chemical analyses. WES chain of custody procedures shall be followed to ensure integrity of the samples submitted for testing.

Following completion of soil sampling the boring shall be advanced an additional twenty feet into the aquifer and completed as a well.

The monitoring well shall be completed by installing four inch diameter, schedule 40 PVC casing. Screened casing perforated with machine cut 0.02 inch slots shall be installed within the saturated zone, taking into consideration the historical high groundwater table level

The well annular space shall be sand packed with Monterey number three sand to approximately two feet above the screened interval. A two foot bentonite seal shall be installed above the sand pack and the well shall be backfilled with concrete grout to within one foot of the surface. The well shall be completed at the surface using a steel vault and locking waterproof cover.

The well shall be properly purged and developed after installation and prior to the collection of the groundwater sample. Approximately three well casing volumes of groundwater shall be removed from the well prior to sampling. Following sufficient recovery, the sample points shall be tested for pH, temperature, specific conductivity and settleable solids. Upon sufficient stabilization samples shall be collected.

Groundwater samples shall be recovered with a clean Teflon bailer. Samples shall then be placed in one liter glass jars with Teflon septums, sealed with tape and stored on ice in an ice chest. WES chain-of-custody procedures shall be followed to ensure integrity of samples submitted for testing.

All samples shall be analyzed for aromatic volatile organics in accordance with EPA test methods 8020 (soil) and 602 (water), and total petroleum hydrocarbons in accordance with EPA test methods 418.1/3550 (soil) and 418.1 (water).

Attached please find Table 1 - Cost Estimate, Groundwater Quality Survey for additional information and a copy of the professional services agreement.

WES appreciates the opportunity to submit this workplan summary\cost estimate to Edna Inc. Should you have any questions or require any additional information, please feel free to call.

Sincerely,
WESTERN ENVIRONMENTAL SERVICES INCORPORATED

ADDITIONAL CLOSURE REQUIREMENTS

The additional information or requirements checked below must be submitted to the Los Angeles County Department of Public Works, Waste Management Division, P.O. Box 1460, Alhambra, CA 91802-1460, in order to complete the evaluation of Closure Permit No. 4238B.

[ ] Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets and north arrow.

[X] Insufficient number of samples were obtained. Additional samples required in accordance with attached Closure Permit Requirements.

[ ] Describe method of obtaining, handling, and/or transporting samples.

[ ] Indicate time and date samples were obtained.

[ ] Submit logs certified by a CA Registered Geologist, CA Certified Engineering Geologist, or CA Registered Civil Engineer with sufficient experience in soils for all borings.

[ ] Submit chain-of-custody documentation initiated by person obtaining sample through person at DOHS certified laboratory.

[ ] Disposal destination of tanks and evidence of legal disposal.

[ ] Analysis results by a State certified laboratory shall be submitted on laboratory letterhead showing analysis date, methods of extraction and methods of analysis.

[ ] Documentation as to depth of groundwater at facility.

[ ] Manifests to document hazardous waste disposal of removed soil.

[ ] Evidence of legal disposal of soils designated as nonhazardous.

[ ] Signature on the report is required of CA Registered Geologist, CA Certified Engineering Geologist, or CA Registered Civil Engineer with sufficient experience in soils.

[ ] Define the vertical and lateral extent of contamination.

[ ] Propose a remedial action plan to mitigate contamination.

[ ] Proposed future uses or improvements for the area related to the contamination.

[XX] Other Comply with all the requests by RWQCB. See all the letters attached

SAMPLING AT SUSPECTED TRUCK WASH AREA EDNA INCORPORATED INDUSTRY, CALIFORNIA

Dear Ms. Richards:

Attached please find Laboratory Data for the advancement of two shallow test borings in the immediate vicinity of a suspected truck wash area at the Edna facility. The site is located at 15006 East Nelson Street, Los Angeles County, City of Industry, California. The work accomplished on June 6, 1988 consisted of the advancement of two shallow borings and the quantitative analyses of select soil samples used to document subsurface soil conditions.

On June 6, 1988, two borings were advanced each to a total depth of five feet below surface grade by manual hand augering. Each boring was supplemented with the collection and laboratory analyses of one soil sample from each boring. The samples were tested for total petroleum hydrocarbons (TPH) and volatile pollutants in accordance with EPA test methods 8015 and 8240 respectively. Results of testing indicated non detectable concentrations for each parameter analyzed.

WES appreciates the opportunity to work with Edna Inc. on this environmental management issue relating to on site toxics. If we can be of further assistance or provide additional information, feel free to call.

Sincerely,
WESTERN ENVIRONMENTAL SERVICES, INC.

Closure Permit
No. 4238 B
File No.
I-12595-6H

o satisfy the permanent closure requirements for underground storage tanks reviously storing hazardous materials, site integrity must be demonstrated y the analysis of soil samples and, if applicable, groundwater samples as utlined below. These requirements are in addition to the conditions listed n the Application fo Closure or contained in an approved Closure Plan.

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
1-6	2-4ft below tank invert	TPH	EPA 418.1
7	2-4ft below tank invert	TPH	" "
one sample every 20ft along product piping	2-4ft below piping	TPH	EPA 418.1
one sample	2-4 ft below dispenser	TPH	EPA 418.1

All soil samples obtained shall be undisturbed and unexposed prior to analysis. The method used to obtain the samples and the date of sampling shall be included in the final report.

If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be developed by removing a minimum of four well volumes and a groundwater sample shall be obtained and analyzed.

The analysis results for all soil samples shall be expressed in milligrams per kilogram (mg/kg). Analysis results for groundwater samples shall be expressed in parts per billion (ppb).

Analysis results shall be reported on laboratory letterhead and shall include the following information: a) The date the analysis was conducted; b) The method of extraction (if applicable); c) The method of analysis.

All soil/groundwater samples obtained shall be handled and transported to a laboratory in strict accordance with applicable EPA regulations utilizing chain-of-custody procedures. Chain-of-custody documentation shall be included in the final report.

If the soil/groundwater analysis indicates undefined contamination at the facility, additional sampling shall be required to define the vertical and lateral extent present.

A final report that contains all of the above required information shall be submitted to the office above within one (1) month from the

LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
CLOSURE REPORT REQUIREMENTS

A closure report shall be submitted to the Los Angeles County Department of Public Works, Waste Management Division, P.O. Box 4089, Los Angeles, CA 90051 containing:

1. File number of facility and closure permit number.
2. Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets and north arrow.
3. Description of methods for obtaining, handling and transporting samples.
4. Time and date samples were obtained.
5. If borings were established, boring logs certified by a CA Registered Geologist, CA Certified Engineering Geologist or CA Registered Civil Engineer with sufficient experience in soils.
6. Chain-of-custody documentation initiated by person obtaining sample through person at State Department of Health Services certified laboratory.
7. Disposal destination of tanks and evidence of legal disposal.
8. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction and methods of analysis.
9. Documentation as to depth of groundwater at facility.
10. Manifests to document hazardous waste disposal of any removed soil.
11. Any observations of site contamination.
12. Remedial action plan to mitigate contamination.
13. Report to be signed by CA Registered Geologist, CA Certified Engineering Geologist or CA Registered Civil Engineer with sufficient experience in soils.

Gentlemen:

NOTICE OF NONCOMPLIANCE
HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT (HMUSP)
FACILITY AT: 15006 East Nelson Avenue

You were notified on September 10, 1987 to submit to this office on or before November 12, 1987 the item(s) checked below:

[ ] HMUSP application and/or accompanying fees.
[x] Tank integrity test results for the underground containers at the above location.
[x] Leak Detection Program (LDP). [x] Tank Monitoring Program (TMP).
[ ] LDP/TMP corrections. [ ] LDP/TMP final report.
[ ] Assessment report following closure of the following containers: _____
_____
[x] Site investigation proposal. [ ] Remedial action plan.
[ ] Progress report for the month of _____.
[ ] Other _____
_____

As of this date, our records show that you have not responded. Please be advised that the required information must be submitted to this office within 10 days from the date of this notice. Failure to comply with this notice will result in the referral of this matter to the District Attorney for possible prosecution.

If you have any questions concerning this matter, please contact Ofori Amoah of this office at (213) 226-4014.

Very truly yours,

T. A. TIDEMANSON
Director of Public Works

PROVISIONAL
HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT
COUNTY OF LOS ANGELES
DEPARTMENT OF PUBLIC WORKS
WASTE MANAGEMENT DIVISION
2250 ALCAZAR STREET
LOS ANGELES, CALIFORNIA 90033

PERMIT NO. 5317

EXPIRATION DATE APR 27 1988

PERMISSION IS HEREBY GRANTED UNDER LACC TITLE 11, DIVISION 4 TO:

I-12595-6H <<<<<<<< FILE NUMBER

Edna Incorporated <<<<<<<< PERMITTEE
15000 E.Nelson Avenue
Industry, CA 91744

<<<<<<<< FACILITY ADDRESS

TO STORE HAZARDOUS MATERIALS IN UNDERGROUND TANK(S) LOCATED AT THE FACILITY ABOVE.

NUMBER OF PERMITTED TANKS: 4

THIS PROVISIONAL PERMIT IS SUBJECT TO THE FOLLOWING REQUIREMENTS:

PART A — GENERAL CONDITIONS AND LIMITATIONS (ATTACHED).

PART B — AUTHORIZED HAZARDOUS MATERIAL STORAGE TANKS (ATTACHED).

PART C — SPECIFIC CONDITIONS AND LIMITATIONS:

1. THE PERMITTEE SHALL SUBMIT FOR APPROVAL AND IMPLEMENT A LEAK DETECTION PROGRAM (LDP) AND A TANK MONITORING PROGRAM (TMP) PREPARED IN ACCORDANCE WITH "UNDERGROUND STORAGE OF HAZARDOUS MATERIALS - GUIDELINES FOR EXISTING FACILITIES, OCTOBER 1986."

2. THE FOLLOWING TIME SCHEDULE SHALL APPLY TO SUBMITTALS REQUIRED BY THIS PROVISIONAL PERMIT:

   a. PERMIT FEE DUE BY (SEE INVOICE) To be billed

   b. TANK INTEGRITY TEST RESULTS DUE BY JAN 27 1988

   c. PROPOSALS FOR LDP AND TMP DUE BY JAN 27 1988

3. PERMIT EFFECTIVE DATE 9/29/87
   NOTE: THE EFFECTIVE DATE IS DETERMINED BY ORIGINAL DATE OF PERMIT APPLICATION.

PART D — SPECIAL CONDITIONS AND LIMITATIONS ATTACHED. YES [ ] NO [X]

This Provisional Permit is valid only for the continued operation of tanks providing suitable storage and expires six (6) months from the date of issue. Permittee has until the expiration date to complete an approved LDP and to install and be in compliance with an approved TMP. Upon full compliance with the approved LDP and TMP and all other conditions and limitations, this Provisional Permit will be replaced by a full term Operational Permit for the remainder of the unexpired five (5) year term from the effective date unless otherwise noted in Part D above.

DIRECTOR OF PUBLIC WORKS

BY _____ OCT 27 1987

PART B — TANK DATA
HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT NO. 5317

AUTHORIZED HAZARDOUS MATERIAL STORAGE TANKS

TANK NUMBER	CAPACITY (GALLONS)	CONTENTS
1	3,000	Diesel
2	4,000	Diesel
3	5,000	Diesel
4-sump	1,000	Waste Oil

HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT

PART A — GENERAL CONDITIONS AND LIMITATIONS

TERM OF PERMIT

1. The combined provisional and full term operational permits shall be valid for a maximum period of five (5) years from the effective date. However, if the Department of Public Works (DPW) finds that the life expectancy of a facility is less than five (5) years, the DPW may adjust the term of the permit to reflect such a condition.

FEES

2. All fees shall be due and payable on the billing date established by the DPW. Fees not paid within 30 calendar days from the billing date shall be considered delinquent. Delinquent fees shall be subject to a 10 percent penalty fee for each 30 day period beyond the billing date that the fee is due. Permits for which the annual permit fee installment is delinquent for 90 days or more are subject to suspension.

REPORTS AND RECORDS

3. At least annually and due by the anniversary of the effective date of this permit, a written report must be submitted to the Department of Public Works, Waste Management Division, P.O. Box 4089 Terminal Annex, Los Angeles, CA 90051 detailing (but not limited to) the following:

   a. Any changes in the type of hazardous materials stored within the facility.

   b. Any changes in the uses of the underground facility.

   c. Changes or modifications to monitoring procedure.

   d. A detailed account of any unauthorized discharges, and the remedial measures employed.

   e. Any modifications to the facility except for routine required maintenance.

   In the event there has been no change of operation nor unauthorized release, a negative declaration to that effect may be submitted.

   The report or negative declaration shall be certified by the permittee or an authorized representative who is responsible for operations at the facility.

   This report is required by local agencies to satisfy Section 25286(c) of the State of California Health and Safety Code. A report form will be made available to owners and operators to comply with this requirement. The report shall be delinquent 30 days after its due date and as such may result in suspension or revocation of the permit.

4. Every permittee shall provide testing, monitoring (if applicable), and inspections in compliance with this permit and shall maintain records adequate to demonstrate compliance therewith.

5. All required records shall be maintained by the permittee and made available for inspection for a period of time not less than three (3) years from the date of the required annual report for the year during which the testing, monitoring or inspection was performed. Said records shall be made available to the DPW, County Health Officer or Forester and Fire Warden during normal working hours and at any time upon reasonable notice.

RENEWALS AND EXTENSIONS

6. If this is a provisional permit, it may be extended to a maximum of one (1) additional year upon written application stating the reasons for such a request and upon approval by the Director of Public Works.

7. Every application for the renewal of a operational permit or extension of a provisional permit shall be made at least 30 days prior to the expiration date of such permit. If a timely application for renewal has been submitted, the permit shall remain in effect until the DPW has made a decision and any administrative appeal has been exhausted.

APPEALS

8. Any person dissatisfied with the decision of the DPW may appeal the decision, in writing, to the Appeals Board, setting forth with particularity the ground or grounds for the appeal. Such appeal shall be submitted within 30 days after notice of the decision has been given.

ADDITIONAL APPROVALS AND REPAIRS

9. Additional approvals shall be required for any of the following actions:

   a. Tank repair.

   b. Modifications.

   c. Change or addition of hazardous materials stored.

   d. Change of approved monitoring system.

10. Procedures for an application for a permit shall also apply to an application for an additional approval. Each application for an additional approval shall be accompanied by the appropriate fee and supporting information.

11. Any substantial modification or repair of a facility other than minor repairs or emergency repairs shall be in accordance with plans to be submitted to the DPW as an additional approval.

12. Permittee shall carry out routine maintenance, ordinary upkeep and minor repairs in a careful and safe manner. No permit will be required for such maintenance, upkeep and repairs.

13. Permittee may make emergency repairs to a facility in advance of seeking an additional approval whenever an immediate repair is required to prevent or contain an unauthorized discharge or to protect the integrity of the containment. However, within five (5) working days after such emergency repairs have been started, permittee shall seek additional approval by submitting drawings or other information adequate to describe the repairs to the DPW.

CLOSURES, DECONTAMINATION AND NEW CONSTRUCTION

14. Replacement of tanks at an existing facility shall be considered a closure of the tanks to be replaced and a new installation of tanks, and all fees shall be assessed accordingly.

15. No tank shall be abandoned. Tanks which are temporarily out of service, and are intended to be returned to use, must continue to be monitored and inspected. Any tank which is not being monitored and inspected must be closed or removed in a manner approved by the DPW.

16. Prior to any permanent or temporary closures being initiated, an Application for Closure form, the appropriate fee and required supporting information shall be filed with the DPW.

17. Plans for the decontamination of a facility shall be submitted to the DPW for approval no later than 30 days before the commencement of such operations. Other agencies having jurisdiction shall also be notified. These agencies include the California Regional Water Quality Control Board, the Los Angeles County Department of Health Services and the South Coast Air Quality Management District.

18. The installation of a new tank shall require submittal to the DPW of an application for new construction, the appropriate new construction plan clearance fee and supporting information as required by the DPW.

TRANSFERS

19. A Hazardous Materials Underground Storage Permit may be transferred to a new owner of the same facility provided:

   a. The new owner accepts full responsibility for all obligations under this permit at the time of the transfer of the facility.

   b. The transfer shall be documented on a form provided by the DPW within 30 days of transfer of ownership.

   c. The appropriate fee is paid.

UNAUTHORIZED DISCHARGES

20. As soon as any person in charge of a facility or responsible for emergency response for a facility has knowledge of any confirmed or unconfirmed unauthorized discharge of a hazardous material, such person shall take all necessary steps to ensure the discovery, containment, and cleanup of such discharge and shall notify the DPW of the occurrence as required.

21. Any owner or operator who has knowledge of a confirmed unauthorized discharge shall immediately notify the DPW.

22. Within the jurisdiction of the Los Angeles County Fire Department, an unauthorized discharge shall also be reported to the Los Angeles County Forester and Fire Warden, Fire Prevention and Conservation Bureau.

23. The permittee shall institute and complete all actions necessary to remedy the effects of any unauthorized discharge, whether sudden or gradual, and supply information on such actions to the DPW.

24. The continued use of, and permit approval for, existing facilities is subject to review and modification or termination by the DPW whenever there has been any unauthorized discharge. In determining whether continued underground storage in such facility is suitable, the DPW shall consider the age of the facility, the methods of containment, the methods of monitoring, the feasibility of the required retrofit, the concentration of the hazardous materials contained, the severity of potential unauthorized discharge and the suitability of other long term preventive measures.

EVALUATIONS AND INSPECTIONS

25. Whenever the approval or satisfaction of the DPW may be required for a design, monitoring, testing or other technical submittal by a permittee, the DPW may require such permittee, at the permittee's sole cost and expense, to retain a suitable qualified independent engineer, chemist or other appropriate professional consultant acceptable to the DPW, for the purpose of evaluating and rendering a professional opinion respecting the adequacy of such submittal.

26. The DPW may conduct inspections for the purpose of ascertaining compliance by the permittee and effecting corrections of any conditions which would constitute any violation of any statute, code, rule or regulation affecting the underground storage of hazardous materials.

27. Whenever necessary for the purpose of investigation or enforcement, or whenever a representative of the DPW, County Health Officer, or Forester and Fire Warden has reasonable cause to believe that there exists in any structure or upon any premises any condition which constitutes a violation, said representative may enter such structure or premises at all reasonable times to inspect the same, or to perform any duty imposed by law.

28. The permittee shall conduct regular inspections of the facility to assure compliance with this permit and shall maintain logs or file reports in accordance with this permit.

29. The DPW may require the periodic employment of special inspectors to conduct an audit or assessment of permittee's facility to make a hazardous material safety evaluation and to determine compliance.

30. Permittee shall, within 30 days of said evaluation, file with the DPW a plan to implement all recommendations, or shall demonstrate to the satisfaction of the DPW why such recommendations shall not be implemented.

31. The DPW may require that any regular or special inspection by the permittee be made in the presence of a representative of the DPW. The DPW may further require advance notice of not less than 72 hours as to the availability of equipment, material and personnel required to conduct such inspections.

SUSPENSIONS AND REVOCATIONS

32. This permit is subject to suspension or revocation if conditions exist which would justify denial of a permit or if permittee fails to correct unsatisfactory conditions.

33. Failure to adhere to all applicable conditions and limitations of this permit shall constitute a willful violation of Title 11, Division 4 of the Los Angeles County Code and may result in civil or criminal penalties, revocation of this permit, or both.

IF THERE ARE NO UNDERGROUND TANKS AT THIS FACILITY, GO TO PARTS F & G

(A) 012595-6H

EDNA INC
15000 E NELSON AVE
INDUSTRY CA 91744

RE: 15006 E NELSON AVE

FACILITY LOCATION

(B) APPLICATION IS HEREBY MADE FOR A HAZARDOUS MATERIAL UNDERGROUND STORAGE PERMIT (HMUSP) TO OPERATE AND MAINTAIN AN EXISTING FACILITY WITHIN LOS ANGELES COUNTY JURISDICTION.

NUMBER OF TANKS AT FACILITY: 4

(C) ASSESSOR PARCEL IDENTIFICATION (OBTAIN FROM PROPERTY TAX BILL):

MAP BOOK NUMBER 8208 PAGE NUMBER 011 PARCEL NUMBER 016

(D) THIS SUPPLEMENT MUST BE ACCOMPANIED BY:

[ ] STATE APPLICATION FOR PERMIT TO OPERATE UNDERGROUND STORAGE TANK FOR EACH CONTAINER, OR COPIES OF HAZARDOUS SUBSTANCE STORAGE STATEMENTS AS FILED WITH STATE
[ ] A STATEMENT VERIFYING SAFE STORAGE FOR EACH CONTAINER
[ ] HMUSP APPLICATION FEE (COMPLETE PART E)

(E) HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT (HMUSP) FEE SCHEDULE:

THE HMUSP APPLICATION FEE SHALL BE THE FIRST ANNUAL INSTALLMENT OF FIVE EQUAL ANNUAL INSTALLMENTS. CIRCLE AMOUNT REMITTED.

NUMBER OF TANKS:	HMUSP FEE (FIRST INSTALLMENT)		STATE SURCHARGE		TOTAL FEES DUE
1	$89	+	$56	=	$145
2	$106	+	$112	=	$218
3	$123	+	$168	=	$291
Including Sump (4)	$140	+	$224	=	($364)
5	$157	+	$280	=	$437
6 OR MORE	$72 + $17 PER TANK	+	$56 PER TANK	=	

MAKE CHECKS PAYABLE TO "L. A. COUNTY DEPARTMENT OF PUBLIC WORKS"

(F) TO BE FILLED OUT BY PERSONS CLAIMING AN EXEMPTION TO REGULATION:

[ ] THERE ARE NO UNDERGROUND STORAGE TANKS WITHIN THIS FACILITY.
[ ] FINAL INTERCEPTOR(S) REGULATED UNDER INDUSTRIAL WASTE PERMIT #_____.
[ ] UNDERGROUND STORAGE TANK WITHIN THIS FACILITY IS USED ONLY FOR THE EMERGENCY SPILL CONTAINMENT FOR ABOVE GROUND STORAGE TANKS.
[ ] OTHER (ATTACH A WRITTEN STATEMENT)

(G) ALL PERSONS FILING THIS FORM MUST COMPLETE THIS SECTION:

SIGNATURE F. Richards TITLE Office

PRINTED NAME F. Richards DATE 9/23/87

Revised 6/86

INSTRUCTIONS

HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT (HMUSP)
APPLICATION SUPPLEMENT

DO NOT USE THIS FORM FOR CLOSURE, TRANSFER OR RENEWAL OF AN EXISTING HMUSP, A NEW CONSTRUCTION PLAN CHECK, OR AN ADDITIONAL APPROVAL.

(A) Facility name, mailing address and facility address on new permit applications must correspond with information on Part II of the State Application for Permit to Operate Underground Storage Tank. Please correct mailing label information if affixed.

(B) This application supplement is to be used for application to operate and maintain existing tanks located within the jurisdiction of the Department of Public Works. Facilities located within the corporate limits of the cities of Long Beach, Los Angeles, San Fernando, Santa Monica, Torrance, Vernon and Walnut should contact the respective local agencies directly for permit information. Specify the number of tanks at the facility.

(C) Assessor parcel identification is required for new permit applications at existing facilities.

(D) The information required in Part D is the minimum necessary to allow issuance of a Provisional HMUSP. When a Provisional HMUSP has been issued for a facility, the owner will be required to submit for review and approval a facility plot plan, a Leak Detection Program (LDP) and a Tank Monitoring Program (TMP) to be implemented in accordance with a timetable to be included within the Provisional HMUSP as conditions and limitations. A full term HMUSP will be issued after implementation of approved LDP and TMP.

(E) The total fee accompanying this application represents the first annual installment of the five year HMUSP fee plus the State surcharge. On a five year permit basis, the annual installments total $445 for the first tank plus $85 for each additional tank. Future annual installments will be payable upon billing by the Department of Public Works.

(F) Persons that have been notified to file for a HMUSP and do not store any hazardous materials underground should check the appropriate box and return this form to avoid any unnecessary follow-up mailings.

The storage of hazardous waste in an underground tank where the specific tank is named in a hazardous waste facility permit issued by the California Department of Health Services is not subject to the HMUSP requirements. Owners of such facilities must furnish the permit number for facilities where this exclusion is requested.

Final interceptors in industrial waste pretreatment systems, catch basins, refinery pipelines, lagoons, storm drains, oil field gathering lines, well cellars, aboveground storage tank spill containment, unlined pits or sumps, and piping not directly associated with a permitted facility are not subject to a HMUSP.

(G) This HMUSP application supplement and each State Application for Permit to Operate Underground Storage Tank must be signed by:

1) A principal executive officer at the level of vice-president or by an authorized representative. The representative must be responsible for the overall operation of the facility where the tank(s) are located.
2) A general partner proprietor.
3) A principal executive officer, ranking elected official or authorized representative of a public agency.

Dear Ms. Richards:

Precision Tank Testing, Inc. is pleased to submit this proposal for surveying, drilling, sampling, and installation of vadose monitoring wells at your Industry location.

PROPOSAL ACTIVITIES

OKA
703834

The following activities are proposed.

PHASE 1

A: Identification of subsurface tanks, product lines, underground utilities and other targets using the latest electronic and geophysical instruments.

B: Documentation of the results of this investigation, including facility diagram.

C: Preparation of a proposal for submittal to L.A. County Public Works Department.

PHASE 2 "Wash Area" (For compliance with RWQCB)

A: Drill four 5 foot borings in the suspect area using a C.M.E. 75 truck-mounted hollow stem auger.

B: Full containment and refrigerated preservation of soil samples taken at depth of 5 feet as drilling progresses, for laboratory analysis.

C: Laboratory analysis of soil samples by methods 8015 & 8240 with 5020 laboratory methods. (Sample analysis turn-around time is normally one week from the day of collection.)

D: Preparation of a report by a licensed geologist, including the lab report for submittal to L.A. County Public Works Department.

PHASE 3 Tank Area (For compliance with L.A. County.)

A: Drill one 40 foot boring and five or more 20 foot borings (depending upon the plot plan) adjacent to three diesel tanks and one waste oil tank, using a C.M.E. 75 truck-mounted hollow stem auger.

B: Full containment and refrigerated preservation of soil samples taken respectively at depths of 5, 10, 20, 30, and 40 feet as drilling progresses, for laboratory analysis.

C: Laboratory analysis of soil samples by method 8015 and 8240 required laboratory methods. (Sample analysis turn-around time is normally one week from the day of collection.)

D: Preparation of a report by a licensed geologist, including the lab report for submittal to L.A. County.

E: Installation of vadose zone monitoring well casings.

Note: If contaminated soil is encountered, additional samples may be required to determine the extent,(lateral and vertical) of the contamination.

QUOTATION

Following is a quotation for the work described above. PTT is prepared to implement this project upon your authorization to proceed.

1. Underground location and shallow geophysical surveys.
2. Drilling, sampling and well casing materials.
3. Soil analysis and laboratory charges.
4. Overfill boxes & installation charges.
5. Geological services, report preparation and project management

Total price for the above services: Phase 1.....$

Phase 2.....

Phase 3.....

Note: If all phases are ordered at one time, total is ....$

TERMS

A 1/3 deposit is required prior to commencing work. Another 1/3 is required upon submittal of the lab report. The remaining 1/3 is due upon completion of the phases of the project.

This quotation is valid for 30 days.

We appreciate your consideration of our services and look forward to working with you on this project. Please call if you have any questions.

Very truly yours,

Robert Milligan

Acceptance of this proposal is indicated by your signature below.

Dear Mr. Dooley:

SITE INVESTIGATION PROPOSAL
15006 ~~15000~~ EAST NELSON STREET

This office has reviewed your site assessment proposal dated March 24, 1987, and finds as follows:

1. All three tanks (two diesel fuel and one waste oil) must be precision tested. Submit the field test data as required in the enclosed documentation information sheet to this office for review by October 12, 1987.

2. Soil sampling, handling, testing and reporting shall be in accordance with EPA methods. Soils shall be analyzed for total petroleum hydrocarbons using EPA 8015 and halogenated hydrocarbons using EPA 8240 by employing the Headspace Technique (5020).

3. A Hazardous Material Underground Storage Permit (HMUSP) must be filed along with required supporting information and fees by the date indicated thereon to continue operation of the subject tanks.

4. Your Site Assessment Report shall be submitted to this office by not later than November 12, 1987.

If you have any questions regarding this letter, please call Mr. Ofori K. Amoah at (213) 226-4014.

Very truly yours,

T. A. TIDEMANSON
Director of Public Works.

RE: 15000 East Nelson, City of Industry, California

Dear Mr. Amoah:

At your request, I am sending you this written proposal outlining the items that you and I have discussed over the past month on the telephone.

The proposal covers two concerns that you have mentioned to me.

FIRST CONCERN-DEISEL TANKS

You have requested that the two deisel tanks located in the front portion of the property be tested for leakage.

Based upon your recommendation, we are proposing to have the tanks tested by the use of a precision test. The deisel tanks can be found on the enclosed map just below the Nelson Avenue and are designated by the words "Deisel Pump".

SECOND CONCERN-SOLVENTS USED IN CLEANING TRUCKS

The former tenant on the property, Guthmiller Trucking, cleaned their trucks on the premises. Until March or April of 1986 the trucks were cleaned using water and soap.

Starting March or April 1986, the trucks were cleaned without water and soap. The cleaning was done by use of a solvent.

You have expressed the concern that the solvent may have caused pollution to the underlining water table.

I have discussed various testing methods with Mr. Frank Stillman of Tri-Aid Foundation Engineering.

I reviewed with him your suggestion of testing for EPA priority pollutants. He has informed me that the selection of the testing method is by EPA method number. He stated that on similar occasions, his firm has used EPA method number 8240 to test for solvents. Therefore, I am recommending a similar test in this case.

Headspace Test for 8020

Since the pollution of the solvents would necessarily have began on the top of the soil before working their way down to the water table, I am proposing that the test samples be taken from the first five feet of soil. I am suggesting three tests around the area that is marked on the enclosed map as washing area. The washing area is adjacent to the sump.

I look forward to your suggestions and recommendations to this proposal. If it meets with your approval, please let me know and Edna, Inc. will engage Tri-Aid Foundation Engineering to start the testing.

Very truly yours,

B. G. Dooley

SUBSURFACE INVESTIGATION FOR 15006 NELSON STREET, CITY OF INDUSTRY - GUTHMILLER TRUCKING/DOOLEY FOREST PRODUCTS (FILE NO. 86-38)

On June 16, 1986, the Guthmiller Trucking, Inc. site at 15006 Nelson Street in the City of Industry was inspected by this Board's staff. It was determined from observations and information obtained at that time, that solvents had been utilized onsite and that potential contamination pathways existed to groundwater underlying the site. Of specific interest was an underground waste storage tank. A workplan for subsurface investigation was requested of Guthmiller Trucking (copy enclosed) on July 7, 1986. Guthmiller subsequently relinquished their lease without responding to this request. The site investigation request was repeated to the site owner, Mr. Joseph Dooley of Dooley Forest Company on September 2, 1986. At that time in a jurisdictional discussion you indicated that the County would followup on this case since you correctly pointed out that it was first an underground tank monitoring case. In a conversation with Mr. Afari Amodi of your staff on December 18, we learned that no action has yet been taken by your Department. Upon talking to Mr. Dooley we found that the site had been rented again and that the tanks had been pumped out of 1000 gallons of unknown liquid and the materials manifested to De Menno Kesdoon in Compton (copy attached). Apparently no chemical analyses were performed on the material. We still need to know about the subsurface conditions and tank integrity of this facility. This means some form of subsurface investigation is necessary to verify that leakage has not occurred, specifically with reference to chlorinated hydrocarbons. This particular case is lagging well behind our other AB 1803 investigations in this study area.

We would appreciate your present attention to this matter. If you have any questions please call Philip B. Chandler at (213) 620-2385.

15000 Nelson Avenue
City of Industry, CA 19744

SUBSURFACE INVESTIGATION (FILE NO. 86-38)

On June 16, 1986, the Guthmiller Trucking, Inc. site at 15006 Nelson Street in the City of Industry was inspected by this Boards staff. It was determined from observations and information obtained at that time, that solvents have been utilized onsite and that potential contamination pathways exist to ground water underlying the site. Specifically this includes an underground waste storage tank. A workplan for subsurface investigation was requested of Guthmiller Trucking (copy attached) on July 17, 1986. Correspondence (copy attached) was subsequently received from James Leonard Crew, an Attorney, to the effect that Guthmiller will be leaving the site as of August 31, 1986, and indicating you as the owner of the site.

Since this is apparently your site, you are responsible for submitting a required workplan and conducting an investigation to determine the extent of soil or ground water contamination from possible leakage from the storage tank. Please implement the original request (copy attached) with the following modifications:

Item 3. A minimum depth of 40 feet is required for each proposed boring, unless a lesser depth is justified.

Item 4, 5, and 6. Soil sampling plan which contains at the minimum, the following elements:

a) Proposed methods and equipment for sample collection,

b) Sampling intervals in each boring, (e.g. surface, 5, 10 feet, etc.)

c) Number and type of soil samples. Discrete samples will be taken. Duplicate samples may be composited for screening purposes only. Boring depth decisions will depend on discrete samples.

d) Number of samples to be analyzed.

e) Analysis plan for specific priority constituents, based on EPA Method 8240 and any supplemental methods necessary to characterize organic materials pertinent to your site use history.

(EPA 412.1

Item 8. Contingency conversion specifications. If water is encountered the soil boring may be converted to a monitoring well and sampled for specific chemicals. Contingency planning should include:

a) Permitting.
b) Well design specifications.
c) Sampling and analysis plan including the list of parameters to be tested and the method of testing.

Item 9. A copy of any previous work of a similar nature conducted at the site, i.e., tank closure, should be submitted with the workplan.

Please submit the workplan to us by October 2, 1986. Should you believe that this request is unjustified, please submit your reasons and supporting information (i.e., previous investigations, reports prepared for other agencies) to us, in writing, within 14 days. If you have any questions, please call Philip Chandler at (213) 620-2385.

HANK H. YACOUB

SUBSURFACE INVESTIGATION (FILE NO. 86-38)
15006 E. NELSON AVE City / County

On June 16, 1986, your facility was inspected by Jonathan Bishop of this Board's staff. During the inspection your storage for waste oil and solvents and the application of oil to your yard was discussed.

In regard to your question about the application of oil to your yard, the Regional Board has no regulations prohibiting the application of clean(unused) oil to your yard for dust control. Used oil is considered a waste, and as such must managed as a hazardous waste, and can not be applied to your yard.

In regard to your waste tank, you are directed to submit a workplan for conducting a subsurface investigation to determine the past integrity of your waste tank. The plan must include the following:

1. The number and location of proposed borings.

2. A plot plan showing the boring locations.

3. The depth of each boring (a minimum depth of 40 feet is required with a minimum soil sampling frequency of 5, 10, 20, 30, and 40 feet below the asphalt).

4. The method and equipment used to collect the samples must be specified.

5. The number and type of samples (i.e. composite or discrete) must be specified. (Discrete samples are preferred.)

6. The samples must be analyzed by EPA Method No. 8240.

7. Subsurface investigations of this type must be directed and conducted by a registered geologist or certified engineering geologist or registered civil engineer, registered or certified by the State of California.

Please submit the workplan to us by August 15, 1986. If you have any questions, please call Jonathan Bishop at (213) 620-2997.

Raymond K Delacourt

RAYMOND K. DELACOURT
Senior Water Resource
Control Engineer

cc: Mr. Michael Mohajer, County of Los Angeles,
Department of Public Works

STATE BOARD

RWCQB → EPA 8240

1) Borings at the wash area.
2) Borings to 5' below surface to define the area of the washing trucks.
3)
4) Test the soil & analyse.

If there contamination in the ground

1) Define extent → laterally & vertical (40 feet deep)
   If they hit G/water → they will develop G/w wells and take samples & analyse in the lab.
2) If no G/w water is hit in the 40-foot borings, the case will be closed.
3) If the soil is contaminated, they will be define the extent of contamination, they will drill to the G/water
4) If they hit 40 feet

COUNTY

1) Test all u/G tanks. — phase I
2) Do Borings around all underground tanks — II
   Test the soil & analyse. — LDP.
3) TMP → Buy electronic to monitor the Container 24 hrs / day. Develope Make a well from the borings.

→ At least the 40-foot boring (Exploratory
   The rest of the borings will go 20 deep
   if G/water is met at the site.

NOTICE OF VIOLATION AND ORDER TO COMPLY

OWNER	FACILITY ID#:	DATE:
BUSINESS:		REFER REPLY TO:
ADDRESS:		
CITY:	ZIP:	

Attention: The items marked on this notice and issued to you represent violations of the California Code of Regulations (CCR) or the California Health and Safety Code (H&S) and/or the Los Angeles County Code. These violations may result in non compliance fees, permit revocation, and/or civil/criminal penalties. Any time granted for correction of the violation(s) does not preclude any enforcement action by this Department or other agencies. *You are hereby directed to correct the violations within the time specified.* Failure to do so will be considered an additional violation. (Referenced titles & chapters: Titles 19, 22, 23, 27 of the CCR, Chapters 6.5, 6.7, 6.95 of the H&S Code and Title 12 of the Los Angeles County Ordinance).

PERMIT REQUIREMENT Correction Date ____/____/____

101 ☐ Obtain a Unified Program Facility Permit by submitting a completed consolidated permit application package (CPP) (LA Co Ord. Sec. 12.50.075, 12.50.115).

HAZARDOUS WASTE GENERATOR REQUIREMENTS

HAZARDOUS WASTE DETERMINATION

Correction Date ____/____/____

501 ☐ Provide a hazardous waste determination for the following waste:

_____

_____

502 ☐ If using knowledge of the hazard characteristic and/or exclusion from regulation, provide supporting documentation (22CCR 66262.11).

_____

_____

IDENTIFICATION NUMBER

Correction Date ____/____/____

503 ☐ Obtain an EPA Identification number prior to treating, storing, disposal or transportation of hazardous waste (contact Cal-EPA at 916-324-1781, Fed EPA at 415-495-8895 for ID number).

504 ☐ Use a transporter or TSDF that has a valid Identification Number for transportation, treatment, storage, or disposal of hazardous waste [22CCR 66262.12(c)].

_____

_____

DISPOSAL, TREATMENT & TRANSPORTATION

Correction Date ____/____/____

505 ☐ Discontinue disposal of hazardous waste to an unauthorized location or to a facility which does not have a permit [H&S 25189.5(a)]

506 ☐ Obtain a permit/authorization for disposal of hazardous waste or legally dispose of such waste [H&S 25201(a), 22CCR 66270.1].

507 ☐ Discontinue transportation of hazardous waste or obtain a valid registration issued by DTSC prior to transportation or transfer of hazardous waste [H&S 25163(a)(1)].

508 ☐ Discontinue treatment of hazardous waste or obtain a valid permit or authorization for treatment of hazardous waste [H&S 25201(a)].

_____

_____

STORAGE

Correction Date ____/____/____

■ Discontinue storage or obtain a valid permit/authorization for storage of:

509 ☐ On-site hazardous waste in tanks or containers for more than 90 days [H&S 25201(a), 25123.3(b)(1), 22CCR 66262.34(c)].

510 ☐ On-site hazardous waste in tanks or containers in quantities exceeding 6,000 kilograms, or for more than the applicable accumulation period (180/270 days for generators of less than 1000 kg in any calendar month) [H&S 25201(a), 25123.3(h), 22CCR 66262.34(d)].

511 ☐ On-site hazardous waste for longer than one year or longer than the applicable accumulation time after 55 gallons has been reached at the point of generation (satellite storage) [22CCR 66262.34(e)].

512 ☐ Off-site hazardous waste in tanks/containers for any time period [H&S 25201(a), 25123.3(b)(2)].

513 ☐ Hazardous waste in other than containers, tanks, drip pads, or containment buildings [H&S 25201(a), 25123.3(b)(4)].

514 ☐ Hazardous waste at a transfer facility longer that 6 days or longer than 10 days for transfer facilities in industrially zoned areas [H&S 25201(a), 25123.3(b)(2),22CCR 66263.18].

515 ☐ Obtain an extension from DTSC for storage of hazardous waste at the staging site for remediation longer than one year [H&S 25201(a), 25123.3(e)].

_____

_____

DBA/Name	Owner

553 ☐ Remove/decontaminate all waste residues, contaminated tank systems and soils during closure of a tank system. Manage them as hazardous waste [22CCR 66265.197(a)].

554 ☐ Comply with buffer zone requirements for tanks containing ignitable or reactive hazardous waste per NFPA'S Flammable and Combustible Liquids Fire Code [22CCR 66265.198(b)].

RECYCLABLE MATERIALS

Correction Date ____/____/____

560 ☐ Store damaged batteries in closed containers which are capable of preventing release of acid and are labeled with the initial accumulation date [22CCR 66266.81(b)].

USED OIL/FILTERS

Correction Date ____/____/____

561 ☐ Discontinue contaminating used oil with hazardous waste (H&S Code section 25250.7).

562 ☐ Manage used oil to prevent discharge to sewer, drainage system, surface water, ground water, watercourses, or deposit on land. " Prevent" incineration of used oil or burning as fuel. [H&S 25250.05(a)].

563 ☐ Discontinue the use of used oil or recycled oil as a dust suppressant, insect or weed control agent [H&S 25250.5(b)].

■ Comply with the following requirements for handling used oil filters:

564 ☐ Manage used oil filters as hazardous waste, or . . . [22CCR 66266.130(a)].

565 ☐ Drain and recycle used oil filters as scrap metal within one year [22CCR 66266.130(b)].

566 ☐ Store filters in closed containers labeled with the words "Drained Used Oil Filters" and the accumulation start date [22CCR 66266.130 (c)(C)(3)].

567 ☐ Manage used oil that has been drained from used oil filters as hazardous waste [22CCR 66266.130(c)(6)].

PREPAREDNESS AND PREVENTION

Correction Date ____/____/____

568 ☐ Maintain site to minimize possibility of fire, explosion, or unplanned release of hazardous waste constituents to air, soil, or surface water, which could threaten human health or environment (22CCR 66265.31).

■ Equip the site with the following:

569 ☐ Internal communication alarm system [22CCR 66265.32(a)].

570 ☐ A device (i.e., telephone or two way radio) for calling outside emergency help [22CCR 66265.32(b)].

571 ☐ Fire, spill control and or decontamination equipment [22CCR 66265.32(c)].

572 ☐ Water at an adequate volume and pressure to supply water hose streams and foam-producing equipment, or automatic sprinkler [22CCR 66265.32(d)].

573 ☐ Test/maintain all communication and alarm systems, fire protection, spill control, or decontamination equipment (22CCR 66265.34)

574 ☐ Provide for immediate access to emergency communication and/or alarm systems during hazardous waste handling (22CCR 66265.34).

575 ☐ Maintain adequate aisle space for personnel and emergency equipment (22CCR 66265.35).

576 ☐ Make arrangements to familiarize police and fire emergency response, local hospitals, office of emergency services and or emergency response contractors, with potential hazards at the facility [22CCR 66265.37(a)].

577 ☐ Document in the operating records when state and local authorities refuse to enter into arrangement for emergency response [22CCR 66265.37(b)].

DOCUMENT REVIEW

MANIFEST SYSTEM

Correction Date ____/____/____

578 ☐ Prepare a complete Uniform Hazardous Waste Manifest for hazardous waste transported or sent offsite [22CCR 66262.20(a)].

579 ☐ Designate a facility on the manifest which is authorized to handle the hazardous waste [22CCR 66262.20 (b)].

580 ☐ Properly complete, sign, and date, applicable manifest sections [22CCR 66262.23(a)(1),(2)].

581 ☐ Submit generator manifest copies to CAL-EPA/Dept of Toxic Substances Control within 30 days of each shipment of hazardous waste [22CCR 66262.23(a)(4)].

582 ☐ Provide the appropriate manifest copies to the transporters [22CCR 66262.23(b)].

583 ☐ Submit the TSDF manifest copy that has been signed by all transporters (except rail transporters) and out-of-state facility operators to DTSC within 30 days for out-of-state shipments [H&S 25160(b)(3)].

■ Retain for a minimum of 3 years:

584 ☐ Signed copies of manifests [22CCR 66262.40(a)].

585 ☐ Shipping papers or receipts for milkrun operations for generators less than 100 kg/month [22CCR 66263.42(e)].

586 ☐ Copies of manifests/bills of lading for spent lead-acid batteries [22CCR 66266.81(a)(4), (B)].

DBA/Name	Owner

621 ☐ Amend contingency plan as necessary (22CCR 66265.54).
522 ☐ Maintain an emergency coordinator either on the premises or on call at all times (22CCR 66265.55).
625 ☐ Note the required information regarding the incident in the operating log [2CCR 66265.56(j)].

PERSONNEL TRAINING

Correction Date ____/____/____

626 ☐ For small quantity generators, ensure that the appropriate staff are adequately trained to manage waste and respond to emergencies [22CCR 66262.34 (d)(2)].
627 ☐ Ensure that training program is directed by a person trained in hazardous waste procedures [22CCR 66265.16(a)(2)].
628 ☐ Provide a training program directed by a representative trained in hazardous waste procedures [22CCR 66265.16(a)(2)].
629 ☐ Ensure that personnel complete the required training program within 6 months of employment, or work supervised positions prior to completing the training, to comply with the hazardous waste requirements [22CCR 66265.16(b), 66265.16(a)(1)].
630 ☐ Provide personnel an annual review of their initial training (on hazardous waste procedures) [22CCR 66265.16(c)].
631 ☐ Maintain onsite all required training documentation. [22CCR 66265.16(d)].
632 ☐ Maintain onsite training records on current and former employees within the last 3 years [22CCR 66265.16(e)].

SOURCE REDUCTION

Correction Date ____/____/____

634 ☐ Prepare and retain onsite current source reduction documents as applicable, and make them available to the inspector within five days of a request [H&S 25244.15(d), 25244.19, 25244.20, 25244.21].

■ Include the following required elements in the Source Reduction Evaluation Review and Plan (also known as a Source Reduction Plan):

635 ☐ Certification.
636 ☐ Amounts of wastes generated.
637 ☐ Process description.
638 ☐ Block diagrams.
639 ☐ Implementation schedule of selected source reduction measures (22CCR 67100.5).

CONSOLIDATION/REMOTE SITE COMPLIANCE

Correction Date ____/____/____

640 ☐ Submit the required notification to the CUPA before operating a consolidation site [H&S 25110.10(d)(1)].
641 ☐ Comply with the consolidation site operating requirements [H&S 25110.10(b)].
642 ☐ Submit the required notification before operating a remote site [H&S 25121.3(b)].
643 ☐ For non-RCRA waste at a remote site, comply with container and labeling requirements, notify the CUPA of the remote site exemption annually, and hold the waste at the site no longer than 10 days [H&S 25121.3(b)].

SITE MITIGATION/SITE CLOSURE

Correction Date ____/____/____

644 ☐ Provide a corrective action plan for unauthorized releases of hazardous waste or constituents to the ground (H&S 25187).
645 ☐ Owner or operator shall close the facility in a manner that:
a) minimizes the need for further maintenance, and
b) controls or eliminates all contaminated equipment, structures, and soil; or decontaminate by removing all hazardous waste residues (22CCR 66265.111, 66265.114, H&S 25187].

Re: Inspected drums **CC:**

☐ **Urgent** ☐ **For Review** ☐ **Please Comment** ☐ **Please Reply** ☐ **Please Recycle**

•Comments:

Here is the bill of lading for those two unmarked drums found at AB&I Los Angeles Service Center. Both drums were shipped to Oakland plant, the liquid contents of one drum was recycled and the remaining solids were sent to a landfill.

If you have any further questions, please call me at 510-633-5224.

Thank you

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✓ Library of Congress
- ✓ University Publications of America
- ✓ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Ryder System, Inc. (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.

2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.

3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.

2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.

3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.

4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/31/2010 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 01/29/2010 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 01/13/2010 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

AOCONCERN: San Gabriel Valley areas where VOC contamination is at or above the MCL as designated by region 9 EPA office.

A review of the AOCONCERN list, as provided by EDR, and dated 03/30/2009 has revealed that there is 1 AOCONCERN site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAN GABRIEL VALLEY		0 - 1/8 (0.000 mi.)	0	26

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/08/2010 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, and dated 02/22/2010 has revealed that there is 1

SWF/LF site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 01/13/2010 has revealed that there is 1 RCRA-NonGen site within approximately 0.25 miles of the target property.

Registry ID: 110012266804

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Pathway: GROUND WATER PATHWAY
Scoring: 4

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 4) is a ground water plume that runs along the axis of the San Jose Creek in the San Gabriel ground water basin in La Puenta, Los Angeles County, California. The plume is about1 mile long and 1 mile wide. Ground water is contaminated with trichloroethylene TCE) and perchloroethylene PCE), according to analyses by State agencies and local water companies. Many public wells in the area exceed the EPA SuggestedNo Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts per billion ppb) of TCE, alevel considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984): A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the three other San Gabriel Valley sites, was added tothe NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

CERCLIS Site Alias Name(s):
Alias Name: SAN GABRIEL VALLEY (AREA 4)
Alias Address: STIMSON AVE & OLD VALLEY BLVD
LA PUENTE, CA 91744
Site Description: The Puente Valley Operable Unit (PVOU) is located within the southeastern portion of the San Gabriel Valley, approximately 25 miles from the Pacific Coast, in eastern Los Angeles County. Located within the San Gabriel Valley is the San Gabriel Basin. The majority of the groundwater pumped from the main San Gabriel Basin is used for drinking water, supplied to the public by purveyors that are regulated as public water supply systems. Land use at the site includes industrial, commercial, and residential. The San Gabriel Valley has been the subject of environmental investigation since 1979 when groundwater contaminated with volatile organic compounds (VOCs) was first identified. In May 1984, four broad areas of contamination within the basin were listed as San Gabriel Areas 1 through 4 on the Environmental Protection Agency's (EPA's) National Priorities List (NPL). EPA subsequently divided the basin into eight operable units (OUs) to provide a means of describing hydrogeology and contaminant distribution, and planning remedial activities in the basin. In May 1993, EPA sent Special Notice letters to 58 potentially responsible parties (PRPs), requesting that these parties present a good faith offer to perform the remedial investigation/feasibility study (RI/FS) for the PVOU. Forty-two of these PRPs formed the Puente Valley Steering Committee

SAN GABRIEL VALLEY (AREA 4) (Continued) **1000114960**

(PVSC), and in September 1993 entered into an administrative order on consent (AOC) with EPA to conduct the RI/FS. Also in September 1993, EPA issued a unilateral administrative order (UAO) to two PRPs, Goe Engineering and Diversey Corporation, that failed to present a good faith offer. Diversey Corporation completed the activities that the UAO required in 1996, and the PVSC and EPA completed the RI/FS in May 1997. PRPs in the EL Monte and South El Monte OUs have entered into AOCs to perform the RI/FS for their respective OUs. EPA also issued UAOs to two parties in the El Monte OU. In the Baldwin Park OU, EPA issued a ROD in March 1993. After the Interim ROD was signed, and Special Notice letters were sent out, the PRPs were unable to make a unified offer for all of the work (i.e., shallow zone and intermediate zone cleanup, and Mid-Valley monitoring). In an effort to keep the cleanup process moving forward as expeditiously as possible, EPA carved out implementation of the remedy such that the intermediate and shallow zone work would be conducted by two different PRP groups or parties. An Explanation of Significant Differences (ESD) addressing the emerging contaminants perchlorate and 1,4-dioxane at OU 1 was completed on June 14, 2005.

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include;

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	Not reported
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Discharge Zip:	91744

CA WDS:

PUENTE READY MIX INC (Continued) **S101618904**

Facility ID:	4 19I002991
Facility Type:	Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	4
Facility Telephone:	6269680711
Facility Contact:	Ron Biang
Agency Name:	PUENTE READY MIX INC.
Agency Address:	Not reported
Agency City,St,Zip:	0
Agency Contact:	Not reported
Agency Telephone:	Not reported
Agency Type:	Private
SIC Code:	3273
SIC Code 2:	Not reported
Primary Waste:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA WDS:
Facility ID: 4 19I003791
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Primary Waste:	Stormwater Runoff
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Not reported
General Comments:	TRW operated the facility from 1968 to1983 and Benchmark from 1985 to 1989 both for the purpose of manufacturing computer circuit boards. Solvents were used and stored at the site. VOCs are present in the soil and groudwater beneath the site. Remediation techniques have included soil vapor extration and groundwater extraction and treatment. Elevated concentrations of trichloroethane, 1,1-dichloroethylene, and 1,4-dioxane are present in groundwater extending to the northwest from the site.

CA WDS:

Facility ID:	4 19I002644
Facility Type:	Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	4
Facility Telephone:	6269683801
Facility Contact:	Alan Franz
Agency Name:	PACTIV CORP.
Agency Address:	Not reported
Agency City,St,Zip:	0
Agency Contact:	Not reported
Agency Telephone:	Not reported
Agency Type:	Private
SIC Code:	3089

A E PLASTICS (Continued) **S100177996**

SIC Code 2:	Not reported
Primary Waste:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2010

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2010
Date Data Arrived at EDR: 04/02/2010
Date Made Active in Reports: 04/12/2010

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2010

Next Scheduled EDR Contact: 07/26/2010
Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009
Date Data Arrived at EDR: 09/02/2009

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 01/13/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 01/13/2010
Date Data Arrived at EDR: 01/15/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Next Scheduled EDR Contact: 05/24/2010
Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 02/08/2010

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/19/2009

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009
Date Made Active in Reports: 09/11/2009
Number of Days to Update: 16

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

RYDER CITY OF INDUSTRY
15006 NELSON AVENUE
CITY OF INDUSTRY, CA 91744

TARGET PROPERTY COORDINATES

Latitude (North):	34.03210 - 34° 1' 55.6''
Longitude (West):	117.9655 - 117° 57' 55.8''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	410868.1
UTM Y (Meters):	3765941.0
Elevation:	311 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	34117-A8 BALDWIN PARK, CA
Most Recent Revision:	1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

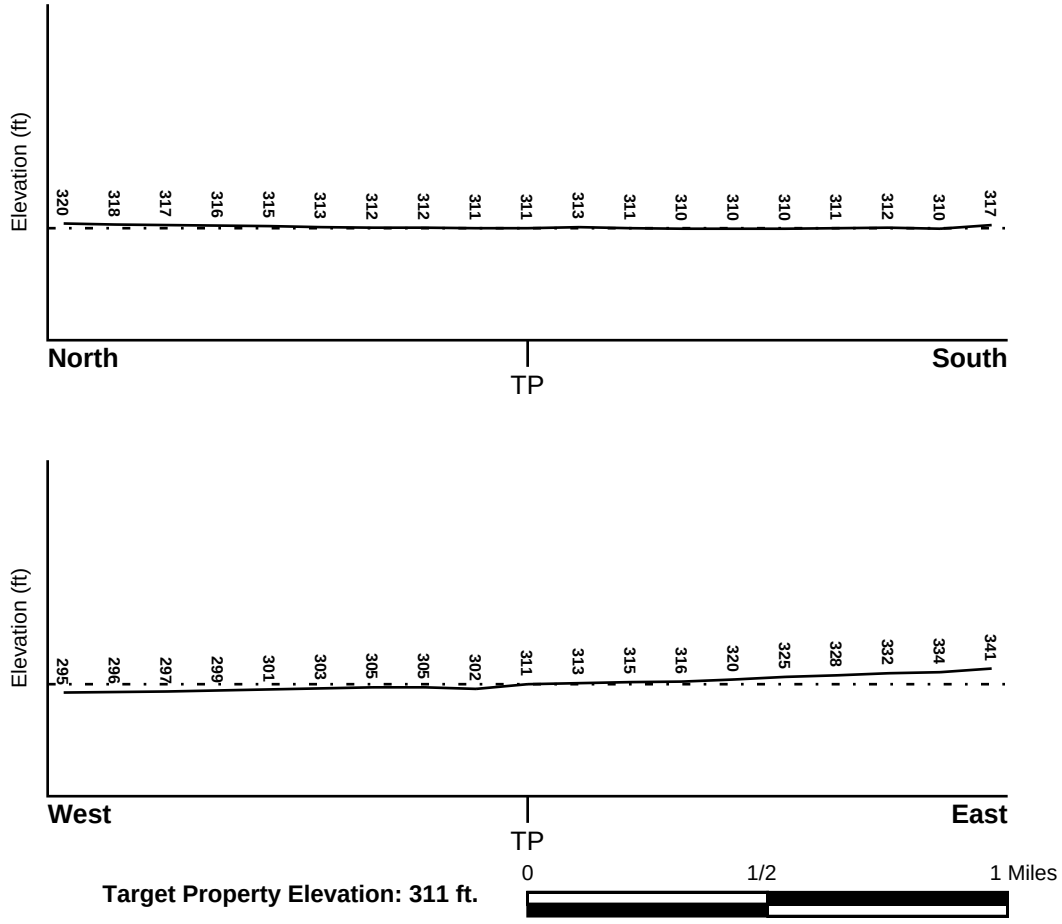
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BALDWIN PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile SE
Site Name:	Brough Industries Inc.
Site EPA ID Number:	CAD983633710
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	not available.
Hydraulic Connection:	Aquifers under the site are most likely hydraulically connected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

CA WELLS **1316**

Water System Information:

Prime Station Code:	01S/10W-31F04 S	User ID:	MET
FRDS Number:	1910039018	County:	Los Angeles
District Number:	15	Station Type:	WELL/AMBNT/MUN/INTAKE
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340200.0 1175800.0	Precision:	0.5 Mile (30 Seconds)
Source Name:	WELL B11B		
System Number:	1910039		
System Name:	SAN GABRIEL VALLEY WATER CO.-EL MONTE		
Organization That Operates System:			
	P O BOX 6010		
	EL MONTE, CA 91734		
Pop Served:	151064	Connections:	43161
Area Served:	EL MONTE/SAN GABRIEL BASIN		

Sample Collected:	05/01/2008	Findings:	.59 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	05/06/2008	Findings:	6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/06/2008	Findings:	5.6 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	05/06/2008	Findings:	4.3 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/06/2008	Findings:	.59 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	05/13/2008	Findings:	5.9 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/13/2008	Findings:	5.8 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	05/13/2008	Findings:	4.5 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/13/2008	Findings:	.58 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	05/13/2008	Findings:	4.2 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/13/2008	Findings:	5.4 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	05/13/2008	Findings:	4 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/13/2008	Findings:	14 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/21/2008	Findings:	7.8 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/21/2008	Findings:	6.8 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	05/21/2008	Findings:	4.7 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/21/2008	Findings:	.71 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	05/28/2008	Findings:	6.6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/28/2008	Findings:	6.3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	05/28/2008	Findings:	4.5 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/28/2008	Findings:	.56 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	06/04/2008	Findings:	5.1 UG/L
Chemical:	TETRACHLOROETHYLENE		

Sample Collected:	06/04/2008	Findings:	4.5 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	06/04/2008	Findings:	4.3 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06/04/2008	Findings:	.62 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	06/11/2008	Findings:	5.3 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06/11/2008	Findings:	5.8 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	06/11/2008	Findings:	4.4 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06/11/2008	Findings:	.66 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	06/17/2008	Findings:	6.5 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06/17/2008	Findings:	6.7 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	06/17/2008	Findings:	4.8 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06/17/2008	Findings:	.72 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	06/26/2008	Findings:	5.1 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06/26/2008	Findings:	4.6 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	06/26/2008	Findings:	4.1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06/26/2008	Findings:	.59 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	07/02/2008	Findings:	6.3 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	07/02/2008	Findings:	.52 UG/L
Chemical:	1,1-DICHLOROETHANE		
Sample Collected:	07/02/2008	Findings:	7 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	07/02/2008	Findings:	4.9 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	07/02/2008	Findings:	.79 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	07/09/2008	Findings:	7.9 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	07/09/2008	Findings:	.63 UG/L
Chemical:	1,1-DICHLOROETHANE		

Sample Collected:	07/09/2008	Findings:	8.2 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	07/09/2008	Findings:	5.9 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	07/09/2008	Findings:	1 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	07/17/2008	Findings:	6.6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	07/17/2008	Findings:	.59 UG/L
Chemical:	1,1-DICHLOROETHANE		
Sample Collected:	07/17/2008	Findings:	1.3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	07/17/2008	Findings:	5.3 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	07/17/2008	Findings:	.85 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	07/23/2008	Findings:	7.1 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	07/23/2008	Findings:	.56 UG/L
Chemical:	1,1-DICHLOROETHANE		
Sample Collected:	07/23/2008	Findings:	.59 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	07/23/2008	Findings:	5.5 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	07/23/2008	Findings:	.75 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	07/29/2008	Findings:	6.1 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	07/29/2008	Findings:	6.9 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	07/29/2008	Findings:	5.1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	07/29/2008	Findings:	.72 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	08/05/2008	Findings:	6.4 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	08/05/2008	Findings:	.55 UG/L
Chemical:	1,1-DICHLOROETHANE		
Sample Collected:	08/05/2008	Findings:	7.4 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	08/05/2008	Findings:	5.4 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	08/05/2008	Findings:	.78 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		

Sample Collected:	08/13/2008	Findings:	4.3 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	08/13/2008	Findings:	6.1 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	08/13/2008	Findings:	3.9 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	08/13/2008	Findings:	.57 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	08/20/2008	Findings:	4.8 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	08/20/2008	Findings:	5.6 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	08/20/2008	Findings:	4.1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	08/20/2008	Findings:	.61 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	08/20/2008	Findings:	5.07 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	08/20/2008	Findings:	7.17 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	08/20/2008	Findings:	4.91 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	08/20/2008	Findings:	.61 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	08/20/2008	Findings:	.4 MG/L
Chemical:	FLUORIDE (F) (NATURAL-SOURCE)		
Sample Collected:	08/20/2008	Findings:	11 UG/L
Chemical:	CHROMIUM (TOTAL)		
Sample Collected:	08/20/2008	Findings:	14 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/26/2008	Findings:	5.2 UG/L

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Addressee / Facility:	Not Reported		
Facility Latitude:	34 02 12	Facility Longitude:	117 57 18
City Served:	LA PUENTE		
Treatment Class:	Treated	Population:	10000

PWS currently has or had major violation(s) or enforcement: YES

VIOLATIONS INFORMATION:

Violation ID:	93V0001	Source ID:	Not Reported	PWS Phone:	Not Reported
Vio. beginning Date:	07/01/92	Vio. end Date:	12/31/92	Vio. Period:	006 Months
Num required Samples:	Not Reported	Number of Samples Taken:		Not Reported	
Analysis Result:	Not Reported	Maximum Contaminant Level:		Not Reported	
Analysis Method:	Not Reported				
Violation Type:	Initial Tap Sampling for Pb and Cu				
Contaminant:	LEAD & COPPER RULE				
Vio. Awareness Date:	Not Reported				

ENFORCEMENT INFORMATION:

Water System Information:

Prime Station Code:	01S/10W-31E02 S	User ID:	MET
FRDS Number:	1910039033	County:	Los Angeles
District Number:	15	Station Type:	WELL/AMBNT/MUN/INTAKE
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340232.0 1175816.0	Precision:	1,000 Feet (10 Seconds)
Source Name:	WELL B9B		
System Number:	1910039		
System Name:	SAN GABRIEL VALLEY WATER CO.-EL MONTE		
Organization That Operates System:			
	P O BOX 6010		
	EL MONTE, CA 91734		
Pop Served:	151064	Connections:	43161
Area Served:	EL MONTE/SAN GABRIEL BASIN		

Sample Collected:	02/06/2006	Findings:	.6 PCI/L
Chemical:	GROSS ALPHA COUNTING ERROR		
Sample Collected:	05/10/2006	Findings:	.6 PCI/L
Chemical:	GROSS ALPHA COUNTING ERROR		
Sample Collected:	08/08/2006	Findings:	3.3 MG/L
Chemical:	NITRATE (AS NO3)

District Number:	15	Station Type:	RESVR/AMBNT/MUN/INTAKE
Water Type:	Well/Groundwater	Well Status:	CM
Source Lat/Long:	340200.0 1175656.0	Precision:	100 Feet (one Second)
Source Name:	BLENDING RESERVOIR 128-R1		
System Number:	1910205		
System Name:	SUBURBAN WATER SYSTEMS-SAN JOSE		
Organization That Operates System:			
	1211 E. CENTER COURT DRIVE		
	COVINA, CA 91724		
Pop Served:	89591	Connections:	31997
Area Served:	Not Reported		
Sample Collected:	01/04/2000	Findings:	8 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	01/04/2000	Findings:	21.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/04/2000	Findings:	4880 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	01/11/2000	Findings:	22.2 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/11/2000	Findings:	5010 UG/L
Chemical:	NITRATE + NITRITE (AS N)		

Sample Collected:	01/19/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/19/2000	Findings:	4740 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	01/26/2000	Findings:	21.9 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/26/2000	Findings:	4950 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	02/02/2000	Findings:	11.7 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/02/2000	Findings:	2640 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	02/08/2000	Findings:	21.2 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/08/2000	Findings:	4790 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	02/15/2000	Findings:	12 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/15/2000	Findings:	2710 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	02/22/2000	Findings:	12.9 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/22/2000	Findings:	2910 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	02/22/2000	Findings:	1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	03/01/2000	Findings:	12 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/01/2000	Findings:	2780 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	03/06/2000	Findings:	.72 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	03/07/2000	Findings:	13 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/07/2000	Findings:	2820 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	03/14/2000	Findings:	12 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/14/2000	Findings:	2800 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	03/21/2000	Findings:	22 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/21/2000	Findings:	5040 UG/L
Chemical:	NITRATE + NITRITE (AS N)		

Sample Collected:	03/28/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/28/2000	Findings:	4790 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	04/04/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/04/2000	Findings:	4720 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	04/12/2000	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/12/2000	Findings:	4560 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	04/13/2000	Findings:	5.1 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	04/17/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/17/2000	Findings:	4700 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	04/25/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/25/2000	Findings:	4630 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	05/01/2000	Findings:	5.8 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	05/02/2000	Findings:	21.2 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/02/2000	Findings:	4790 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	05/09/2000	Findings:	20.7 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/09/2000	Findings:	4680 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	05/16/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/16/2000	Findings:	4740 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	05/23/2000	Findings:	20.7 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/23/2000	Findings:	4680 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	05/31/2000	Findings:	21.3 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/31/2000	Findings:	4810 UG/L
Chemical:	NITRATE + NITRITE (AS N)		

Sample Collected:	06/06/2000	Findings:	22 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06/06/2000	Findings:	4970 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	06/07/2000	Findings:	6 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	06/13/2000	Findings:	21.4 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06/13/2000	Findings:	4830 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	06/20/2000	Findings:	21.1 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06/20/2000	Findings:	4770 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	06/27/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06/27/2000	Findings:	4740 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	07/05/2000	Findings:	20.9 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/05/2000	Findings:	4721 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	07/12/2000	Findings:	20.8 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/12/2000	Findings:	4700 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	07/17/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/17/2000	Findings:	4740 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	07/25/2000	Findings:	21.5 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/25/2000	Findings:	4860 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	08/01/2000	Findings:	22.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/01/2000	Findings:	5110 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	08/04/2000	Findings:	7.2 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	08/08/2000	Findings:	22.3 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/08/2000	Findings:	5040 UG/L
Chemical:	NITRATE + NITRITE (AS N)		

Sample Collected:	08/16/2000	Findings:	20.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/16/2000	Findings:	4650 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	08/23/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/23/2000	Findings:	4630 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	08/29/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/29/2000	Findings:	4810 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	09/05/2000	Findings:	24 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	09/05/2000	Findings:	5330 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	09/05/2000	Findings:	6.9 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	09/12/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	09/12/2000	Findings:	4720 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	09/19/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	09/19/2000	Findings:	4810 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	09/25/2000	Findings:	.59 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	09/26/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	09/26/2000	Findings:	4790 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	10/02/2000	Findings:	7 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	10/03/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	10/03/2000	Findings:	4650 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	10/09/2000	Findings:	.52 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	10/10/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	10/10/2000	Findings:	4790 UG/L
Chemical:	NITRATE + NITRITE (AS N)		

Sample Collected:	10/16/2000	Findings:	.52 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	10/17/2000	Findings:	20.2 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	10/17/2000	Findings:	4560 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	10/24/2000	Findings:	20.3 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	10/24/2000	Findings:	4590 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	11/01/2000	Findings:	22.1 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/01/2000	Findings:	4990 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	11/06/2000	Findings:	5.9 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	11/08/2000	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/08/2000	Findings:	4520 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	11/13/2000	Findings:	21.5 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/13/2000	Findings:	4860 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	11/20/2000	Findings:	21.8 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/20/2000	Findings:	4920 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	11/28/2000	Findings:	20.9 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/28/2000	Findings:	4720 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	12/05/2000	Findings:	19.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	12/05/2000	Findings:	4430 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	12/06/2000	Findings:	6.2 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	12/12/2000	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	12/12/2000	Findings:	4740 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	12/19/2000	Findings:	20.9 MG/L
Chemical:	NITRATE (AS NO3)		

Sample Collected:	12/19/2000	Findings:	4720 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	12/26/2000	Findings:	19.8 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	12/26/2000	Findings:	4470 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	01/02/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/02/2001	Findings:	4500 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	01/08/2001	Findings:	7.4 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	01/08/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/09/2001	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/09/2001	Findings:	4700 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	01/16/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/16/2001	Findings:	4500 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	01/23/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/23/2001	Findings:	4500 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	01/29/2001	Findings:	.63 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	01/30/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/30/2001	Findings:	4500 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	02/05/2001	Findings:	.76 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	02/05/2001	Findings:	7.5 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	02/06/2001	Findings:	24 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/06/2001	Findings:	5400 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	02/13/2001	Findings:	.55 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	02/14/2001	Findings:	13 MG/L
Chemical:	NITRATE (AS NO3)		

Sample Collected:	02/14/2001	Findings:	2900 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	02/20/2001	Findings:	.54 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	02/21/2001	Findings:	18 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/21/2001	Findings:	4100 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	02/26/2001	Findings:	.8 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	02/28/2001	Findings:	14 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/28/2001	Findings:	3200 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	03/05/2001	Findings:	13 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/05/2001	Findings:	2900 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	03/05/2001	Findings:	1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	03/13/2001	Findings:	16 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/13/2001	Findings:	3600 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	03/19/2001	Findings:	.57 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	03/20/2001	Findings:	13 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/20/2001	Findings:	2900 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	03/27/2001	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/27/2001	Findings:	4700 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	04/03/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/03/2001	Findings:	4500 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	04/09/2001	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/09/2001	Findings:	4700 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	04/12/2001	Findings:	5.8 UG/L
Chemical:	PERCHLORATE		

Sample Collected:	04/16/2001	Findings:	.54 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	04/17/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/17/2001	Findings:	4500 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	04/24/2001	Findings:	.56 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	04/24/2001	Findings:	19 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/24/2001	Findings:	4300 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	04/30/2001	Findings:	.68 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/01/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/01/2001	Findings:	4500 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	05/02/2001	Findings:	6 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	05/07/2001	Findings:	.63 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/08/2001	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/08/2001	Findings:	4700 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	05/15/2001	Findings:	26 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/15/2001	Findings:	5900 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	05/21/2001	Findings:	.66 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/23/2001	Findings:	18 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/23/2001	Findings:	4100 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	05/29/2001	Findings:	.64 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/30/2001	Findings:	10 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/30/2001	Findings:	2300 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	06/06/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		

Sample Collected:	06/06/2001	Findings:	4500 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	06/08/2001	Findings:	6.8 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	06/11/2001	Findings:	.56 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06/12/2001	Findings:	12 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06/12/2001	Findings:	2700 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	06/19/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06/19/2001	Findings:	4500 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	06/19/2001	Findings:	.53 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06/25/2001	Findings:	.65 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06/27/2001	Findings:	19 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06/27/2001	Findings:	4300 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	07/03/2001	Findings:	18 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/03/2001	Findings:	4100 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	07/10/2001	Findings:	18 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/10/2001	Findings:	4100 UG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	07/12/2001	Findings:	.002 UG/L
Chemical:	N-NITROSODIMETHYLAMINE (NDMA)		
Sample Collected:	07/17/2001	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/17/2001	Findings:	4500 UG/L

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

A FIELD PROCEDURES
B BORING LOGS
C LABORATORY REPORTS

1.0 INTRODUCTION

This report presents the results of a soil boring investigation conducted at 15006 Nelson Avenue in the City of Industry, California (Site - Figures 1 and 2).

2.0 BACKGROUND

FREY conducted a Phase I Environmental Site Assessment (ESA) and presented the findings in a report dated June15, 2010. The ESA identified several recognized environmental conditions (RECs). RECs include the current fueling system which consists of two 6,000 gallon above ground storage (AST) tanks which contain diesel and four associated fuel dispensers. Additional current RECs also include the chemical storage area, the clarifier and associated floor drains in the service garage, the truck wash area and a private sewer line which runs from the southern portion of the Site to East Nelson Avenue. Historical RECs include a former waste oil underground storage tank (UST), three former diesel USTs, a 600 gallon diesel release, a former "fill pit", the former practice of cleaning trucks with solvents, and a former railroad spur located in the southern-most section of the Site (FREY, 2010).

3.0 SITE DESCRIPTION

3.1 SITE SETTING

The Site is rectangular in shape with approximate dimensions of 200 feet from northwest to southeast and approximately 850 feet from northeast to southwest. The total Site size is approximately 4.2 acres.

Scully Transportation occupies the approximate 2/3 of the Site. Scully Transportation leases, repairs, stores and fuels trucks at the Site. The approximate southern third of the Site is used for the storage of cable and non-chemical building supplies and is occupied by American Brass and Iron.

3.2 REGIONAL GEOLOGY

The Site is located in the Puente Valley Groundwater sub-basin of the main San Gabriel Valley Groundwater Basin in the eastern portion of Los Angeles County (CH2M Hill, 1986). The San Gabriel Basin is a broad piedmont plain sloping from the San Gabriel Mountains on the north to the Whittier Narrows on the south. The underlying water bearing formations in the San Gabriel Basin are principally unconsolidated and partially consolidated nonmarine sediments of Recent and Pleistocene age (DWR, 1966). These water-bearing formations consist of gravel, boulders and coarse sediments over 4,000 feet in thickness. In the area of the Puente Valley, near the Site, the thickness of the water bearing sediments is approximately 100 feet (DWR, 1966).

3.3 REGIONAL HYDROGEOLOGY

Groundwater movement in the San Gabriel Basin is generally toward Whittier narrows. In the Site area, the groundwater flow direction is generally towards the west (DWR, 1966). Groundwater in the Site area is generally unconfined (CH2M Hill, 1986). Groundwater use in the San Gabriel Basin is extensive, and it represents more than 90 percent of the available water supply. There is a heavy reliance on the alluvial aquifer for municipal water supply (CH2M Hill, 1986). Several groundwater supply wells are present in the San Gabriel Valley and have been shut down due to volatile organic compound (VOC) contamination. The Regional Water Quality Control Board (RWQCB) is charged with assigning beneficial uses for waters within the San Gabriel Valley and to verify that the quality necessary for continued use is maintained. For groundwater beneath the Site, the assigned beneficial uses are municipal, agricultural, industrial process supply, and industrial service supply (RWQCB, 1994).

Depth to groundwater beneath the Site is estimated to be 65 feet below the ground surface based on a previous subsurface investigation conducted at the Site (AeroVironment, 1993).

4.0 OBJECTIVE

The objective of the scope of work presented below was to assess the following current RECs: 1) diesel fuel storage and dispensing; 2) a chemical storage area; 3) a truck wash; and, 4) the clarifier.

5.0 SCOPE OF WORK

The scope of work, designed to provide the information needed to meet the objectives of the investigation, was as follows:

- Preparation and implementation of a Site specific Health and Safety Plan;
- Advance eleven direct push soil borings and collect soil samples at selected depth intervals;
- Advance one hand auger soil boring and collect soil samples at selected depth intervals;
- Laboratory analysis of selected soil samples for chemical constituents;
- Evaluation of data and report preparation.

6.0 FIELD INVESTIGATION

FREY directed the advancement of eleven direct push soil borings and one hand auger boring at the locations shown in Figure 2. The locations of the borings were designed to evaluate subsurface condition near the REC's without physically endangering the integrity of the structures. Soil samples were collected from the borings for lithologic description and chemical laboratory analyses.

All activities related to this subsurface investigation were conducted under the direction of a State of California Certified Engineering Geologist in accordance with the field procedures presented in Appendix A.

6.1 ADVANCEMENT AND SAMPLING OF SOIL BORINGS

On May 28, 2010, FREY personnel visited the Site to locate and mark the boring locations with white paint, then notified underground service alert and obtained an underground service alert number. FREY then notified the appropriate parties prior to conducting the field work.

On June 4, 2010, FREY personnel manually excavated soil borings B1 through B12 to depths of approximately four feet bgs to identify subsurface structures. Kehoe Testing and Engineering, under the direction of FREY advanced eleven direct-push soil borings (B1 through B11) with a direct-push drill rig. Direct-push soil borings were advanced with 1.5-inch outside diameter direct-push rods. Due to overhead clearance restraints, soil boring B12 was advanced with a hand operated auger. The following table lists the location and depths of each of the soil borings advanced:

Boring #	Location	Depth	Boring #	Location	Depth
B1	South End of Fuel Island	10 feet bgs	B7	South End of Clarifier	20 feet bgs
B2	Center of Fuel Island	10 feet bgs	B8	North End of Clarifier	20 feet bgs
B3	North End of Fuel Island	10 feet bgs	B9	Truck Wash	10 feet bgs
B4	Fuel Dispenser At ASTs	10 feet bgs	B10	Oil & Chemical Storage	10 feet bgs
B5	Southern Diesel AST	10 feet bgs	B11	Oil & Chemical Storage	10 feet bgs
B6	Northern Diesel AST	10 feet bgs	B12	Oil & Chemical Storage	5 feet bgs

Soil samples were collected in 1-inch diameter Teflon or brass sleeves at approximate 5-foot depth intervals from approximately 5 feet bgs to the bottom of each boring. In addition, three 5 gram Encore samples were taken from inside the sampler. Soil sample collection, preservation, and handling was performed in general accordance with EPA Method No.5035 protocols.

Soil samples were examined from each boring in order to characterize the soil lithology and to look for evidence of the presence of petroleum hydrocarbons. Soil samples were screened in the field for undifferentiated volatile organic compounds (UVOCs) using a photo ionization detector (PID). Field indications of UVOCs were not detected with the PID. Field procedures used in the advancement of borings B1 through B12 and collection of soil samples are presented in Appendix A. Boring logs and explanations regarding the format, terms and soil classification system used to describe the soil conditions are presented in Appendix B.

6.2 LABORATORY ANALYSES

The laboratory testing program included the analyses of selected soil samples for total petroleum hydrocarbons (TPH), modified for diesel or a carbon chain breakdown, in general accordance with EPA Method No. 8015BM. Selected soil samples were also analyzed for volatile organic hydrocarbons (VOCs) in general accordance with EPA Method No. 8260B.

7.0 RESULTS OF THE SUBSURFACE SOIL INVESTIGATION

7.1 SUBSURFACE CONDITIONS

During the advancement of soil borings B1 through B12 subsurface soils encountered beneath approximately 8-inches of concrete and 1-foot of gravel fill consisted predominantly of olive grey, moist, silty clay. Several of the borings had interbedded light brown, moist, silty to fine grained sand. Soil lithologies encountered at the Site during drilling operations are depicted on the boring logs included in Appendix B. Groundwater was not encountered during the drilling of boreholes B1 through B12 to maximum depths of 20 feet bgs.

7.2 LABORATORY RESULTS

TPH were detected at a concentration of 110 milligrams per kilogram (mg/kg) in soil sample B7-10 collected from soil boring B7 at 10 feet bgs. TPH were not detected in any of the other soil samples collected and analyzed from soil borings B1 through B12. VOCs were not detected in any of the soil samples collected and analyzed from soil borings B1 through B12.

The results of the laboratory analyses are presented in Table 1. Laboratory reports and quality assurance/quality control reports appear in Appendix C. The laboratory analyses of soil samples was performed by Baseline On-Site Analysis, a State-certified, hazardous waste testing laboratory based in Huntington Beach, California.

8.0 CONCLUSIONS

Based on the information presented in this report, it can be concluded that:

- Soil samples collected from borings beneath the investigated RECs did not contain concentrations of TPH or VOCs with the exception of boring B7;

- Soil sample B7-10, collected from boring B7 from a depth of 10 feet bgs, contained TPH at a concentration of 110 mg/kg. Soil sample B7-10 was the only sample collected during this investigation which contained TPH. Soil samples collected from depths of 5, 15 and 20 feet bgs from B7 did not contain TPH. Soil sample B7-10 did not contain VOCs.

- The presence of 110 mg/kg of TPH is not considered significant. However, the Los Angeles County Department of Public Works, the local oversight agency for this area, would require additional vertical and lateral assessment based upon the results of soil sample B7-10. In our experience, additional assessment would require the drilling of one boring in the location of B7 and three lateral assessment borings around the B7 boring location. Soil borings would most likely be required to be drilled to depths of 40 feet bgs.

9.0 LIMITATIONS

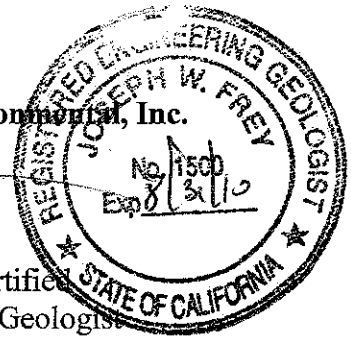
The judgements described in this report are professional opinions based solely within the limits of the scope of work authorized, and pertain to conditions judged to be present or applicable at the time the work was performed. Future conditions may differ from those described herein, and this report is not intended for future evaluations of this Site unless an update is conducted by a consultant familiar with environmental assessments.

This report was compiled partially on information supplied to FREY Environmental, Inc. from outside sources, other information that is in the public domain and a visual inspection of the property. FREY Environmental, Inc. makes no warranty as to the accuracy of statements made by others, which may be contained in this report, nor are any other warranties or guarantees, expressed or implied, included or intended by the report, except that it has been prepared in accordance with the current accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing similar services.

Site conditions may change with time as the result of natural alterations or man-made changes on this or adjacent properties. Future environmental investigations conducted at the Site may reveal Site conditions not indicated in the data reviewed by FREY Environmental, Inc. Additionally, changes in standards or regulations applicable to the Site may occur.

The findings of this report may be partially or wholly invalidated by changes of which FREY Environmental, Inc. is not aware or has not had the opportunity to evaluate. Environmental assessments provide an additional source on information regarding the environmental conditions of a particular property or facility. The report to the Client is a professional opinion and judgement, dependent upon FREY's knowledge and information obtained during the course of performance of the services.

Sincerely,
FREY Environmental, Inc.



Joe Frey
Principal Certified Engineering Geologist
CEG #1500

Evan Privett
Senior Project Geologist

APPENDIX A

FIELD PROCEDURES

A.1 DIRECT-PUSH SOIL BORING PROCEDURES AND SOIL SAMPLE COLLECTION

1. Soil borings B1 through B11 were advanced with a truck-mounted, hydraulic direct-push rig.

2. Soil samples were collected using a combination piston/split barrel sampler equipped with a 1-inch diameter acetate liner which was cut into six inch sections following sample retrieval.

3. The samplers were cleaned by FREY personnel between sample intervals using a brush and tap water followed by a brush and TSP solution, a tap water rinse, and deionized water rinse. The samplers were dried by air or with a towel prior to sampling.

4. Following retrieval of the split-barrel modified California sampler, the split-barrel sampler was opened and samples were collected using disposable "En Core" samplers. The disposable "En Core" sampler was placed into a stainless steel "En Core" T-handle sampling tool. Using the T-handle, the disposable "En Core" sampler was pushed into the sample core, and a soil sample was collected.

5 Following sample collection on June 4, 2010, the disposable "En Core" sampler was capped with an "En Core" push end cap. One, six inch acetate liner section had each end capped with end caps. Each sample was labeled with the sample number and project number.

6. The soil in the remaining sample liner was used for lithologic description and for field head space analysis.

7. Soil samples were placed in an ice chest cooled with ice.

8. The samples were delivered to the laboratory following collection. Sample handling, transport, and delivery to the laboratory were documented using Chain-of-Custody procedures, including the use of Chain-of-Custody forms.

A.2 HAND AUGER SOIL BORING PROCEDURES AND SOIL SAMPLE COLLECTION

1. Soil boring B12 was advanced with a hand auger.

2. The soil samples were collected by hand with the assistance of a drive sampler equipped with a 2-inch diameter sampler.

3. The sampler was cleaned by FREY personnel between sample intervals using a brush and tap water followed by a brush and TSP solution, a tap water rinse, and deionized water rinse. The samplers were dried by air or with a towel prior to sampling.

4. Soil samples were collected from the hand auger using and brass sleeve and disposable “En Core” samplers. The disposable “En Core” samplers were placed into a stainless steel “En Core” T-handle sampling tool. Using the T-handle sampling tool, the disposable “En Core” sampler was pushed into the soil and a soil sample was collected. One brass sleeve and three “En Core” samples were collected for each sample.

5. Following soil sample collection on June 4, 2010, each disposable “En Core” sampler was capped with an “En Core” push end cap. One, six inch sleeve had each end capped with end caps. Each sample was labeled with the sample number and project number.

6. The samples were placed in plastic bags and stored in an ice chest cooled using ice.

7. The samples were delivered to the laboratory following collection. Sample handling, transport, and delivery to the laboratory were documented using Chain-of-Custody procedures, including the use of Chain-of-Custody forms.

A.3 HEAD-SPACE ANALYSIS

1. Samples were extruded directly into a mason jar or ziplock bag and sealed.

2. The sample was allowed to equilibrate.

3. The sample was then connected to a PID, organic vapor analyzer.

4. The maximum gauge reading was recorded as the concentration in parts per million by volume (ppv).

LABORATORY REPORTS

BASELINE ON-SITE ANALYSIS™

Baseline On-Site Analysis
P. O. Box 2243
Huntington Beach, CA 92647

Toll Free: 888.753.7553
FAX: 714.840.1584

Laboratory Report

Client: FREY Environmental, Inc.
Client Address: 2817-A Lafayette Avenue
Newport Beach, California 92663

Project Name: Industry
Project Address: ---

Contact: Evan Privett

Report Date: 6/8/10
Lab Project Number: 10244
Client Project Number: 053-75

Date(s) Sampled: 6/4/10
Date(s) Received: 6/4/10
Date(s) Analyzed: 6/5-7/10
Sample Matrix: Soil

Analyses Requested:

1. **EPA 8015M – Total Petroleum Hydrocarbons as Diesel (TPH-D)**
2. **EPA 8015M – Total Petroleum Hydrocarbons with Carbon Chain Distribution (TPH-CC)**
3. **EPA 8260B – Volatile Organic Compounds (VOC's) with Fuel Oxygenates**

Baseline received samples collected from the project shown above. A Chain-of-Custody Record (COC) is attached.

All of the samples were analyzed for the parameters shown above per the COC. In this report, *Baseline* presents the results and a QA/QC summary for these analyses.

Brian K. Kato

Approved

Brian K. Kato, Laboratory Manager

Contact: Paul Roberts

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ardent Environmental Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 848A-4C48-81A7

PO # NA

Project 101275001

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 848A-4C48-81A7

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Ardent Environmental Group (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2021 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2021 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

HOWMET GLOBAL FASTEN EPA ID:: CAD030865299	135 NORTH UNRUH AVE	SSE 1/8 - 1/4 (0.245 mi.)	M69	400

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 9 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 7 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 12 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS:
Name: AB&I FOUNDRY SERVICE CENTER
Address: 15006 NELSON AVE
City,State,Zip: CITY OF INDUSTRY, CA 91744
Site ID: 2544
CERS ID: 10413658
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 2544
Site Name: AB&I FOUNDRY SERVICE CENTER
Violation Date: 08-28-2014
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 09/11/2014. OBSERVATION: Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. Facility failed to submit propane in cubic feet in the hazardous materials inventory and failed to properly submit training program in CERS (California Environmental Reporting System). CORRECTIVE ACTION: Complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. Submit propane in cubic feet and indicate that the training plans are "provided elsewhere in CERS" (check emergency response/contingency plan) within 30 days.

Pathway:	GROUND WATER PATHWAY
Scoring:	4

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 4) is a ground water plume that runs along the axis of the San Jose Creek in the San Gabriel ground water basin in La Puenta, Los Angeles County, California. The plume is about1 mile long and 1 mile wide. Ground water is contaminated with trichloroethylene TCE) and perchloroethylene PCE), according to

SAN GABRIEL VALLEY (AREA 4) (Continued) **1000114960**

analyses by State agencies and local water companies. Many public wells in the area exceed the EPA SuggestedNo Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts per billion ppb) of TCE, alevel considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984):
A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem.
EPA continues its investigation to identify sources of the contamination.
This site, along with the three other San Gabriel Valley sites, was added tothe NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

NPL:

Environmental Interest/Information System:
SUPERFUND NPL
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Region: STATE
Facility Status: **Open - Remediation**
Status Date: 02/28/2013
Global Id: T10000004390
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 34.029897
Longitude: -117.965797
Case Type: Cleanup Program Site
Case Worker: EPL
Local Agency: Not reported
RB Case Number: 102.0136
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Site History: The Site is a 4.74-acre property located at 15100 East Nelson Avenue in the City of Industry, California. The Site was formerly occupied by LA Signal Construction, Inc. (LA Signal) whose operations included manufacturing and installation of traffic signals between approximately 1997 until 2008. Regional Board case files indicate that LA Signals operations involved the use of chlorinated solvents including tetrachloroethylene (PCE). The Site is located in the Puente Valley Operable Unit of the San Gabriel Valley Superfund Site.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 154599
Site Name: SOLO ENTERPRISE CORP
Violation Date: 03-09-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/09/2016. OBSERVATION: The facility has not submitted a complete Hazardous Materials Inventory Chemical Description page for to the CUPA. During a tour of the facility and a review of the hazardous material inventory submittal dated 2/23/16 revealed that the quantity for the waste coolant was inaccurate and the reportable threshold for propane was not reported. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System (CERS).

POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and

SOLO ENTERPRISE CORPORATION (Continued) **S103642523**

disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

SIC Code:	3273
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0

PUENTE READY MIX (Continued) **S101618904**

Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 420384
Site Name: M&M tires
Violation Date: 06-16-2020
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: OBSERVATION: One 55-gallon drum of used, drained, and punctured oil and fuel metal filters located at hazardous wastes storage area was observed without a proper label with an accumulation start date info. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the used oil and fuel filters are being properly managed or submit a bill of lading to this department demonstrating proper disposal. OBSERVATION: Bills of lading for used oil and fuel filters were not available at the time of inspection. CORRECTIVE ACTION: Obtain copies of all bills of lading for used oil and fuel filters for the past three years and submit copies to the CUPA.

Violation Date: 09-22-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/22/2017. OBSERVATION: Outside area (2) 55-gallon drums storing used oil, missing hazardous waste markings CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled. Complete hazardous waste labels were affixed at time inspection, accumulation start date unknown and left blank
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 113326
Site Name: INDITEX INC
Violation Date: 09-22-2017
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 01/29/2018. OBSERVATION: Outside area by compressors (2) 55-gallon storing used oil, HW labels affixed, accumulation start date is unknown. CORRECTIVE ACTION: Since the accumulation start date is unknown you are required to contact a registered hazardous waste hauler and dispose of the used oil and and submit a copy of the manifest/receipt to the CUPA.

Site Name: INDITEX INC
Violation Date: 09-22-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 07/10/2019. OBSERVATION: The Hazardous Materials Business Plan (HMBP) submitted in the California Environmental Reporting System (CERS) on 02/20 & 03/28 2017 were reviewed and found to be inaccurate and/or missing information G Site map missing information per HSC 25505(a)2: Site map must have all of the following: contains north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. Update the map to satisfy HSC 25505(a)2. G Hazardous Materials inventories not accurate: Disclose all chemicals at or above 55gallons, 500lbs and/or 200cuft. Please enter maximum storage capacity for each include hazardous waste inventories. G CERS Consolidated Emergency Response/Contingency Plan missing information. The facility is required to upload an Emergency Response/Contingency

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if the waste generated is a hazardous waste.
Violation Notes:	Returned to compliance on 05/31/2019. OBSERVATION: Molten salt process, Kolene & Sulfuric Acid rinse waste water being discharge to POTW. Hazardous Waste determination analysis were not available for review at time of inspection. Any person who generates a waste shall determine if the waste is a hazardous waste. Per 22 CCR 66262.11 A person who generates a waste, as defined in section 66261.2, shall determine if that waste is a hazardous waste using the following method: (a) the generator shall first determine if the waste is excluded from regulation under section 66261.4 or section 25143.2 of the Health and Safety Code; (b) the generator shall then determine if the waste is listed as a hazardous waste in articles 4 or 4.1 of chapter 11 or in Appendix X of chapter 11 of this division. If the waste is listed in Appendix X and is not listed in articles 4 or 4.1

HOWMET GLOBAL FASTENING SYSTEMS INC. (Continued) **U003062214**

	of chapter 11, the generator may determine that the waste from his particular facility or operation is not a hazardous waste by either: (1) [Truncated]

Violation Date: 05-11-2016
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are

HOWMET GLOBAL FASTENING SYSTEMS INC. (Continued) **U003062214**

	or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes:	Returned to compliance on 11/08/2016. OBSERVATION: The Owner/Operator failed to re-certify their HW tank system assessment. The Owner/Operator shall obtain and keep on file at the facility a written assessment reviewed and certified by an independent, qualified, professional engineer, registered in California. The assessment shall be valid for a maximum period of five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. -The tank assessment on file was certified in January 2010 with amendments done in 2013, however, the complete tank assessment has not been re-certified within the past 5 years. CORRECTIVE ACTION: Immediately obtain a certified HW tank assessment that includes all of the required information in this section. Provide a copy of the certified HW tank system assessment to the CUPA and maintain a copy at the facility by 06/25/16.

Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

HOWMET GLOBAL FASTENING SYSTEMS INC. (Continued) **1007198802**

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HADDICKS TOWING, INC (Continued) **1000189179**

Reclamation: No reclamation requirements associated with this facility.
POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Contaminants of Concern: Not reported
Site History: The site consists of two 20,000-square-foot single-story concrete buildings at 230 and 250 South 9th Avenue in the City of Industry, California. An asphalt-paved driveway divides the properties and connects the parking areas behind the buildings. The 250 S. 9th Property had a solvent underground storage tank (UST) and a degreaser. Physicians Formula Cosmetics has used the properties as assembly plant, distribution center, and warehouse for packaged cosmetics. Volatile organic compounds (VOCs) contamination of soil and groundwater beneath the site was discovered in the early 1990s and documented through several investigations. The primary constituents of concern at the site are tetrachloroethene (PCE) and trichloroethene (TCE), although several other chlorinated VOCs were also detected. A soil vapor extraction (SVE) system was installed in late-1997 to remediate the VOCs-impacted soil beneath the former source areas. The SVE system operated from January 1998 through March 1999.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RB Case Number:	102.0020
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Not reported
Site History:	The site consists of two 20,000-square-foot single-story concrete buildings at 230 and 250 South 9th Avenue in the City of Industry, California. An asphalt-paved driveway divides the properties and connects the parking areas behind the buildings. The 250 S. 9th Property had a solvent underground storage tank (UST) and a degreaser. Physicians Formula Cosmetics has used the properties as assembly plant, distribution center, and warehouse for packaged cosmetics. Volatile organic compounds (VOCs) contamination of soil and groundwater beneath the site was discovered in the early 1990s and documented through several investigations. The primary constituents of concern at the site are tetrachloroethene (PCE) and trichloroethene (TCE), although several other chlorinated VOCs were also detected. A soil vapor extraction (SVE) system was installed in late-1997 to remediate the VOCs-impacted soil beneath the former source areas. The SVE system operated from January 1998 through March 1999.

File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Not reported
Site History: TRW operated the facility from 1968 to1983 and Benchmark from 1985 to 1989 both for the purpose of manufacturing computer circuit boards. Solvents were used and stored at the site. VOCs are present in the soil and groudwater beneath the site. Remediation techniques have included soil vapor extration and groundwater extraction and treatment. Elevated concentrations of trichloroethane, 1,1-dichloroethylene, and 1,4-dioxane are present in groundwater extending to the northwest from the site.

Lead Agency Case Number:	Not reported
Latitude:	34.028460086849
Longitude:	-117.97146019043
Case Type:	Cleanup Program Site
Case Worker:	EPL
Local Agency:	Not reported
RB Case Number:	102.0320
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	The subject property is located at 14923 Proctor Avenue, in the City of Industry, California (the Site). Cacique, Inc. (Cacique) has occupied the Site since approximately 1973. Areas of concern at the Site include the locations of the clarifier, the four-stage washer, the former strip tanks and the underground storage tanks. Multiple environmental site assessments have determined that the soil and groundwater beneath the Site has been impacted by volatile organic compounds (VOCs), including tetrachloroethylene (PCE) and trichloroethylene (TCE).

water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

CERS ID: 10284109
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 157523
Site Name: STOUGHTON PRINTING CO
Violation Date: 09-12-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 05/11/2020. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. Record review observed that the last shipment of flammable liquid waste was on 8/30/18. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Click Here:

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Gepaid: CAD983661950
TSD EPA ID: CAT080010101
CA Waste Code: 343 - Unspecified organic liquid mixture
Disposal Method: H01 - Transfer Station
Tons: 0.068

Year: 1995
Gepaid: CAD983661950
TSD EPA ID: CAT080010101
CA Waste Code: 741 - Liquids with halogenated organic compounds >= 1,000 Mg./L
Disposal Method: H01 - Transfer Station
Tons: 0.2502

Year: 1995
Gepaid: CAD983661950
TSD EPA ID: CAT080010101
CA Waste Code: 135 - Unspecified aqueous solution
Disposal Method: H01 - Transfer Station
Tons: 0.042

Year: 1995
Gepaid: CAD983661950

OPTO POWER CORP (Continued) **1000820168**

TSD EPA ID: CAT080010101
CA Waste Code: 214 - Unspecified solvent mixture
Disposal Method: H01 - Transfer Station
Tons: 0.756

Year: 1995
Gepaid: CAD983661950
TSD EPA ID: CAD097030993
CA Waste Code: 791 - Liquids with pH <= 2
Disposal Method: R01 - Recycler
Tons: 0.1292

Quarterly Update:	10/11/2017- This facility submitted a part A application but withdrew the application because the activity conducted at the facility did not require a permit. See letter dated 1/15/1988 and 2/24/1988 that approves the withdraw. The facility then received a variance on 11/15/1988 that states they are exempt from permit requirements. Also see tiered permit authorization dated 10/3/1994 which show this facility is regulated at a lower tier.

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 03/24/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

Elevation:	311 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5619056 BALDWIN PARK, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

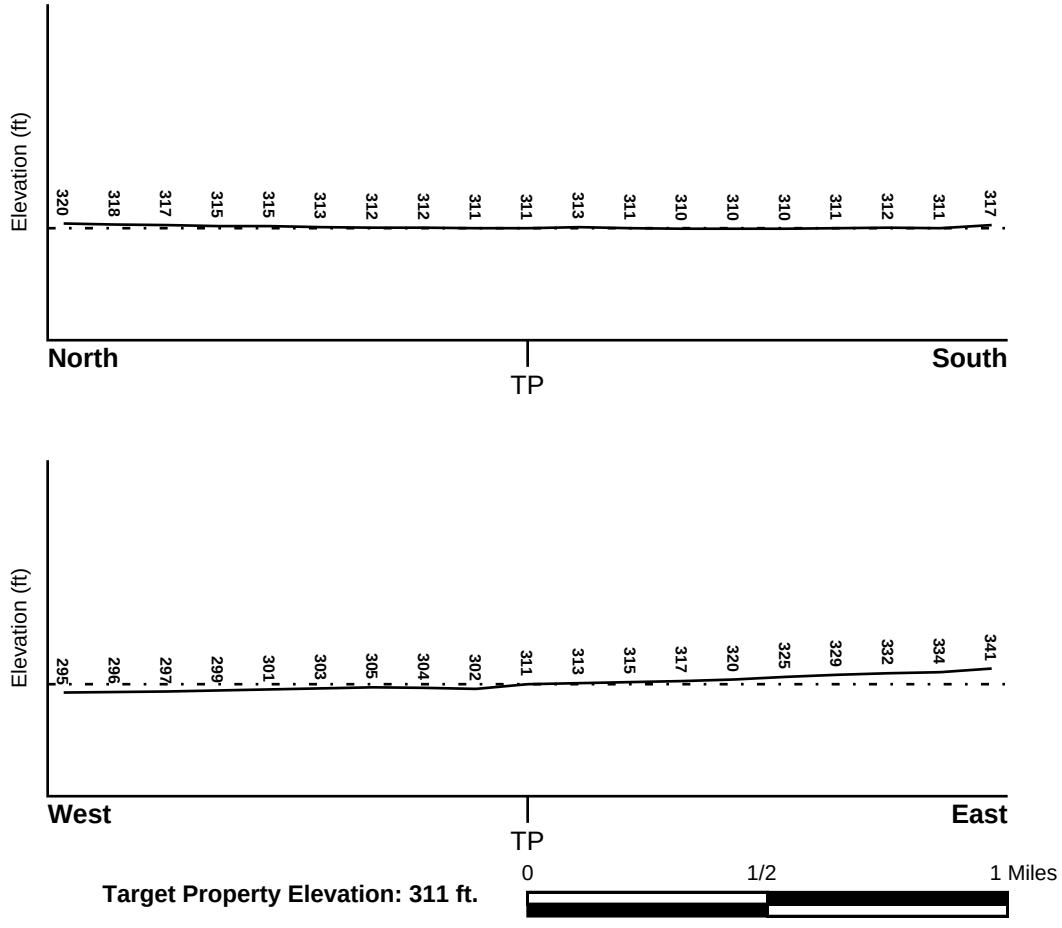
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1700F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BALDWIN PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	0 - 1/8 Mile SE
Site Name:	Brough Industries Inc.
Site EPA ID Number:	CAD983633710
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	not available.
Hydraulic Connection:	Aquifers under the site are most likely hydraulically connected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Violations:

Site ID:	2544
Site Name:	AB&I FOUNDRY SERVICE CENTER
Violation Date:	08-28-2014
Citation:	HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description:	Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 09/11/2014. OBSERVATION: Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. Facility failed to submit propane in cubic feet in the hazardous materials inventory and failed to properly submit training program in CERS (California Environmental Reporting System). CORRECTIVE ACTION: Complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. Submit propane in cubic feet and indicate that the training plans are "provided elsewhere in CERS" (check emergency response/contingency plan) within 30 days.

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA CERS: CERS
Source: California Environmental Protection Agency
Telephone: 916-323-2514
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

Date of Government Version: 04/19/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 07/15/2021
Date of Next Scheduled Update: 11/01/2021

CA HWTS: Hazardous Waste Tracking System
Source: Department of Toxic Substances Control
Telephone: 916-324-2444
DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 04/08/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 06/29/2021
Date of Next Scheduled Update: 10/18/2021

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Database Release Frequency: Annually
Date of Last EDR Contact: 07/09/2021
Date of Next Scheduled Update: 10/18/2021

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases.

Section 1: Facility Detail Reports . . . . . Page 3

All available detailed information from databases where sites are identified.

Section 2: Databases and Update Information. . . . . Page 14

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Tons:	4.2
Year:	1999
Gepaid:	CAL000160157
TSD EPA ID:	CAT080025711
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	R01 - Recycler
Tons:	0.462
Year:	1999
Gepaid:	CAL000160157
TSD EPA ID:	CAT080033681
CA Waste Code:	352 - Other organic solids
Disposal Method:	R01 - Recycler
Tons:	3.55
Year:	1998
Gepaid:	CAL000160157
TSD EPA ID:	CAT080013352
CA Waste Code:	135 - Unspecified aqueous solution

Disposal Method: R01 - Recycler
Tons: 0.21

Year: 1998
Gepaid: CAL000160157
TSD EPA ID: CAT080013352
CA Waste Code: 133 - Aqueous solution with total organic residues 10 percent or more
Disposal Method: R01 - Recycler
Tons: 0.9799

Year: 1997
Gepaid: CAL000160157
TSD EPA ID: CAD981696420
CA Waste Code: 222 - Oil/water separation sludge
Disposal Method: H01 - Transfer Station
Tons: 12.093

Year: 1997
Gepaid: CAL000160157
TSD EPA ID: CAT000613893
CA Waste Code: 741 - Liquids with halogenated organic compounds >= 1,000 Mg./L
Disposal Method: H01 - Transfer Station
Tons: 0.4409

Year: 1996
Gepaid: CAL000160157
TSD EPA ID: CAD981696420
CA Waste Code: 134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method: H01 - Transfer Station
Tons: 0.231

Year: 1996
Gepaid: CAL000160157
TSD EPA ID: CAT000613893
CA Waste Code: 741 - Liquids with halogenated organic compounds >= 1,000 Mg./L
Disposal Method: H01 - Transfer Station
Tons: 0.1289

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA HWTS: Hazardous Waste Tracking System
Source: Department of Toxic Substances Control
Telephone: 916-324-2444
DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 04/08/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 06/29/2021
Date of Next Scheduled Update: 10/18/2021

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Database Release Frequency: Annually
Date of Last EDR Contact: 07/09/2021
Date of Next Scheduled Update: 10/18/2021

INSPECTION REPORT

Report Date Range: 1/1/1950 to 8/16/2021

Facility Name: SCULLY TRANSPORTATION SERVICES, INC. **Facility ID:** 2061432

Situs Address: 15006 E NELSON Avenue
City of Industry, CA 91746 **TG:** **Dist No.:** 15

Sample Location: Other

Date of Inspection: 4/29/2002 12:00 am to 12:00 am Duration: Hr Inspection Type: Historical Task Type: Historical Inspection

Sample Location: Other Task ID: 36879 Inspection ID: 36879

Inspector(s): Greg Neunsinger **Contact(s):**

Task Comments:
PH=7, NO FLOW DURING INSPECTION. COMPANY IS NO LONGER PLANNING ON INSTALLING A ROOFED TRACTOR/TRAILER WASH PAD. THEY WILL CONTINUE TO USE THE EXPOSED BERM AREA AND PUMP THE WASH WATER TO A DRAIN THAT IS LOCATED IN THE SHOP AREA. PLUMBING FROM CLARIFIER HAS BEEN REPAIRED. THE COMPANY HAS LEASED THIS YARD AND DOES NOT WANT THE CAPITAL EXPENDITURE OF A ROOFED AREA.

Additional Comments:

Inspection Special Messages
Comments: NO VIOLATIONS OBSERVED

Date of Inspection: 12/18/2001 12:00 am to 12:00 am Duration: Hr Inspection Type: Historical Task Type: Historical Inspection

Sample Location: Other Task ID: 29732 Inspection ID: 29732

Inspector(s): Greg Neunsinger **Contact(s):**

Task Comments:
COMPANY HAS MADE A DECISION NOT TO INSTALL A COVERED TRACTOR AND TRAILER WASH AREA. ESTIMATES FOR CONSTRUCTION WERE MORE THAN THE LEASING COMPANY WANTED TO PAY. COMPANY MAY RECONSIDER AFTER A LONGER LEASE IS SIGNED. THEY ARE CURRENTLY USING THE SAME WASH AREA THAT UPS TRUCKING USED. THEY HAVE TO PUMP WASTEWATER TO A DRAIN IN THE GARAGE AREA. THEY WILL NOT PUMP DURING WET PERIODS.

Additional Comments:

Inspection Special Messages
Comments: NO VIOLATIONS OBSERVED

Date of Inspection: 8/28/2001 12:00 am to 12:00 am Duration: Hr Inspection Type: Historical Task Type: Historical Inspection

Sample Location: Other Task ID: 29733 Inspection ID: 29733

Inspector(s): Greg Neunsinger **Contact(s):**

Inspection Results Summary

Task Comments:
COMPANY IS PLANNING ON INSTALLING A COVERED VEHICLE WASH AREA. THE CURRENT TRUCK WASH AREA IS AN EXPOSED PAD THAT HAS ASPHALT PERIMETER BERMS TO CONTAIN THE WASH WATER. THE WASH WATER IS THEN PUMPED TO A DRAIN IN THE SHOP AREA. THE DRAIN IS CONNECTED TO A 3 STAGE CLARIFIER. RECENT PUMBING PROBLEMS DOWNSTREAM OF THE CLARIFIER HAVE BEEN REMEDIED. THE WASH AREA IS CURRENTLY IN THE BIDDING PROCESS AND CONSTRUCTION WILL BEGIN IN APPROXIMATELY 1 MONTH. THE COVERED WASH AREA SHOULD PLACE THE COMPANY IN AN EXEMPT CATAGORY. THE COMPANY LEASES TRUCKS AND REPAIRS TRUCKS.

Additional Comments:

Inspection Special Messages
Comments: CO. OUT OF BUSINESS

Comments: NO VIOLATIONS OBSERVED

Date of Inspection: 7/24/2001 12:00 am to 12:00 am Duration: Hr Inspection Type: Historical Task Type: Historical Inspection

Sample Location: Other Task ID: 29734 Inspection ID: 29734

Inspector(s): Greg Neunsinger **Contact(s):**

Task Comments:
COMPANY HAS A CLOG AND SUBSEQUENTLY FOUND COLLAPSED DISCHARGE LINE DOWNSTREAM OF THEIR CLARIFIER AND SAMPLE BOX. CLARIFIER DOES NOT DISCHARGE TO SEWER ON NELSON AVE. THE DISCHARGE LINE HAS 2 90 DEGREE BENDS AND FLOWS SOUTH ON PROPERTY TOWARDS VALLEY BLVD. COMPANY IS HAVING THE SEWER LINE TRACED. SOME EXCAVATION HAS BEEN DONE TO IDENTIFY CLOG AND COLLAPSED PIPE. THEY ARE GOING TO INSTALL A TRUCK WASH PAD THAT MAY HAVE A ROOF TO PREVENT RAINWATER INTRUSION.

Additional Comments:

Inspection Special Messages
Comments: NO VIOLATIONS OBSERVED

Date of Inspection: 7/9/2001 12:00 am to 12:00 am Duration: Hr Inspection Type: Historical Task Type: Historical Inspection

Sample Location: Other Task ID: 29735 Inspection ID: 29735

Inspector(s): Greg Neunsinger **Contact(s):**

Task Comments:
COMPANY HAS NOT DECIDED ON A PLAN FOR A TRACTOR TRAILER WASH OUT STATION. CURRENTLY THEY ARE USING A BERMED AREA THAT WAS LEFT BEHIND BY UPS TRUCK LEASING. THE AREA HAS A 2 INCH ASPHALT BERM, BUT THERE IS NO DRAIN AND THE LOW AREA HAS TO BE PUMPED TO THE CLARIFIER. I EXPLAINED ALL OPTIONS INCLUDING ROOF, RAINWATER DIVERSION DEVICE. THE AREA IS USED TO CLEAN THE EXTERIOR AND SOME ENGINE PARTS. THERE IS VISIBLE AMOUNTS OF OIL IN THE WASTEWATER. THEY HAVE A STEAM CLEANER AND THE MILD ALKALINE SOAP SOLUTION FOR ENGINE DEGREASING. THEY HAVE A 3 YEAR LEASE, SO LARGE CAPITAL IMPROVEMENTS WILL HAVE TO BE AGREED UPON BETWEEN THE TRUCK COMPANY AND THE PROPERTY OWNER. INFORMED CONTACT THAT THE CLARIFIER WILL NEED OCCAISIONAL CLEANING.

Additional Comments:

Inspection Special Messages
Comments: NO VIOLATIONS OBSERVED

Inspection Results Summary

Date of Inspection: 6/19/2001 12:00 am to 12:00 am Duration: Hr Inspection Type: Historical Task Type: Historical Inspection

Sample Location: Other Task ID: 22735 Inspection ID: 22735

Inspector(s): Greg Neunsinger **Contact(s):**

Task Comments:
COMPANY IS STILL DECIDING WHAT THEY ARE GOING TO DO REGARDING THE EXPOSED WASH PAD AND INDUSTIRAL WASTEWATER CONNECTION. CURRENTLY THEY ARE EXEMPT FROM PERMIT. THEY MAY MOVE THE TRUCK WASH OR USE IT WHERE IT IS. THE CONTACT IS LOOKING FOR ALTERNATIVE IDEAS. CURRENT SYSTEM HAS AN EXPOSED AREA AND THEY MANUALLY PUMP THE WASHWATER TO A DRAIN INSIDE OF THE SHOP AREA. TRUCK LEASING YARD.

Additional Comments:

Inspection Special Messages
Comments: NO VIOLATIONS OBSERVED

Date of Inspection: 4/20/2001 12:00 am to 12:00 am Duration: Hr Inspection Type: Historical Task Type: Historical Inspection

Sample Location: Other Task ID: 22736 Inspection ID: 22736

Inspector(s): Greg Neunsinger **Contact(s):**

Task Comments:
INSPECTION REQUEST FROM C. PAZ FOR TRUCK WASH PAD THAT IS LOCATED ON PROPERTY. WASH PAD HAS AN ASPHALT BERM AND A MANUALLY OPERATED PUMP THAT DIRECT WASH WATER FLOW TO A DRAIN THAT IS LOCATED INSIDE OF THE SHOP AREA. COMPANY CALLED CSD/IW AFTER RECENT LA FIRE/HAZ-MAT INSPECTION. 3 STAGE CLARIFIER AND SAMPLE BOX IS LOCATED ON WEST SIDE OF REPAIR FACILITY, PH=7. CONTACT INDICATED THAT WASH PAD MAY BE MOVED AND ROOFED.

APPENDIX G

RESUMES

RESUME OF CHRIS WHITE
Staff Environmental Geologist

EDUCATION

Bachelor of Science, Geology, 2017, Humboldt State University

REGISTRATIONS AND CERTIFICATIONS

SCAQMD Rule 403 South Coast Air Basin Fugitive Dust Control
HAZWOPER 40-Hour Training (with annual updates)

EMPLOYMENT HISTORY

2015-2017 Touré Associates (Environmental consulting)
2018-2021 – National Engineering and Consulting Group, Inc. (environmental consulting)
2021-present – Ardent Environmental Group, Inc. (environmental consulting)

PROFESSIONAL EXPERIENCE AND RESPONSIBILITIES

Mr. White has a strong background in geology, geochemistry, and environmental science. As a Staff Environmental Geologist, her experience has included air monitoring, air quality analysis, lead-based paint surveys, soil sampling, and overseeing various subcontractors for projects relating to construction, soil excavation for contaminated media, and remediation projects. His tasks also include coordinating environmental research, reviewing historical documents, data evaluation, and technical report preparation. Mr. White's project experience includes:

- **Phase I Environmental Site Assessment:** Report preparation includes site reconnaissance, research and review of regulatory and historical land use records, and identification of potential environmental concerns and/or impacts to the site.
- **Lead-Based Paint Surveys:** Conduct surveys of commercial buildings to identify lead-based paint using handheld x-ray fluorescence (XRF) analyzers and sampling paint chips from various media for detail analysis.
- **Lead Soil Sampling:** Conduct surveys of schools, residential and commercial buildings to identify and collect samples of suspect Lead-containing materials (LCM) and sampling of suspect materials for lead analysis. Support air sampling to assess lead dust in air to evaluate general site conditions and for monitoring and clearance of lead abatement.
- **Soil Remediation:** Mr. White has completed a long-term soil remediation project under the direction of the California Department of Toxic Substances Control (DTSC) that included the excavation of lead-contaminated soil from residential properties, schools, parks, and daycare centers.

RESUME OF PAUL A. ROBERTS
Principal Geologist

EDUCATION

Bachelor of Science, Geology, 1987, California State University, Fullerton, California

REGISTRATION AND CERTIFICATIONS

Professional Geologist, California PG 6897
Registered Geologist, Arizona RG 42445
Ventura County Well Inspector
OSHA 40-Hour Health and Safety Training (with annual updates)
OSHA 8-Hour Health and Safety Supervisor Training

EMPLOYMENT HISTORY

1986-1996 – Applied Geosciences Inc. (environmental consulting)
1996-1998 – ATC Associates (environmental consulting)
1998-2007 – Ninyo & Moore (environmental consulting)
2007-present – Ardent Environmental Group, Inc. (environmental consulting)

PROFESSIONAL EXPERIENCE AND RESPONSIBILITIES

As a Principal Geologist for Ardent Environmental Group, Inc., Mr. Roberts conducts and coordinates high-profile hydrogeologic and geologic field evaluations. Mr. Roberts also supervises staff- and project-level geologists, engineers, and scientists to complete the installation of groundwater monitoring wells and soil and groundwater remediation systems, as well as completing pilot tests and feasibility studies for remedial system design. Mr. Roberts is very familiar with mud- and air-rotary, sonic, direct-push, and hollow stem auger drilling techniques, and interprets geophysical data and soil physical analyses to design water well construction. As part of these tasks, Mr. Roberts interacts with clients, attorneys, and agency representatives. The following presents a partial list of projects supervised and/or completed by Mr. Roberts.

- **Water Replenishment District of Southern California (District), Santa Fe Springs:** California Professional Geologist retained to log and sample deep borings in preparation to install nested groundwater monitoring wells as part of the Central Basin Groundwater Contamination Study. The work was completed to assist the United States Geological Survey (USGS) and the District to find mergence zones or pathways where known volatile organic compound (VOC)-impacted shallow groundwater could be migrating into deeper water supply aquifers. The work included drilling pilot borings using mud-rotary drilling methods to depths of approximately 518 feet below the ground surface (bgs). During drilling activities, Mr. Roberts monitored drilling conditions, logged cuttings and collected soil samples for lithological interpretation. Following drilling activities, downhole geophysical equipment, including suspension velocity measurements, resistivity, spontaneous potential and natural gamma logging, and caliper and natural gamma logging, was used to further assess lithological conditions. Based on these data, Mr. Roberts assisted representatives from the USGS and District to design and oversee installation of 10 groundwater monitoring wells. Following installation, the wells were developed and sampled.

- **Former Ashland Chemical Plant, Santa Fe Springs:** Principal Geologist retained to log and sample deep borings for the installation of groundwater monitoring, extraction, and injection wells used to characterize and remediate VOC impacted groundwater associated with a former chemical plant. Sonic, mud-rotary, and hollow stem auger drilling methods were used to drill pilot borings to depths of up to 407 feet bgs. Hydropunch sampling results and soil physical analyses were used to design deep nested groundwater monitoring and remediation wells. Well development and sampling were also completed.

- **Former Optical Lens Manufacturing Facility, Costa Mesa:** Mr. Roberts is the Project Coordinator for an on-going VOC soil and groundwater investigation/remediation effort associated with a former optical lens manufacturing facility. The investigations are being completed under the direction and oversight of the Department of Toxic Substances Control (DTSC) as part of the regional Costa Mesa Site Discovery Project. Investigations have included the installation and sampling of groundwater monitoring wells, soil investigations and characterization, indoor air monitoring, and remedial design of a soil vapor extraction system (VES).

- **Former CENCO Refinery Properties, Santa Fe Springs**: Mr. Roberts supervised and coordinated the environmental activities associated with the acquisition and redevelopment of two properties formerly occupied by the CENCO Refinery. These properties, located immediately east and southeast of the main refinery, were used by CENCO and others for product storage and oil recycling. Oil field production and oil well drilling waste disposal was also historically associated with this land. Mr. Roberts worked with the City of Santa Fe Springs Fire Department and DTSC to investigate historical environmental issues; mitigate petroleum hydrocarbon and polychlorinated biphenyl (PCB)-impacted soil through on-site management by the installation of an impermeable cap (referred to as the “PCB-Capped Area”) or by excavation; removal of underground storage tanks (USTs); methane gas assessment, mitigation design and implementation, and monitoring; groundwater well video logging and abandonment; and oil well abandonment. Currently, Mr. Roberts completes annual inspections and 5-year reviews of the PCB-Capped Area and supervises the annual monitoring of methane gas beneath the buildings.

- **Former Nissan North America Corporate Headquarters, Carson:** Project Geologist to oversee the characterization of petroleum hydrocarbon-impacted soil and groundwater associated with a release from a fuel UST. Mr. Roberts oversaw the installation of 15 groundwater monitoring wells and four vapor extraction wells. Following completion of a soil vapor extraction pilot test, Mr. Roberts designed and implemented a VES which successfully remediated the impacted soil. Groundwater remediation was completed using in-situ air stripping techniques.

- **Northwest Pipe Company Property, Jurupa Valley; Commerce Casino, Commerce; Rock-Lomita Property, Torrance; Former Ball Glass Plant, Torrance; and BMW of Riverside, Riverside:** Principal Geologist managing and coordinating environmental characterization of petroleum hydrocarbon or VOC-impacted soil associated with releases from historical manufacturing activities or USTs at a number of properties throughout Southern California. Tasks included the installation of soil remediation systems, completion of pilot studies, and the design and implementation of full-scale SVE systems. These systems were operated until effluent soil vapor concentrations and/or the results of confirmation soil samples met residential or commercial standards. During these operations,

Mr. Roberts interacted with lead regulatory agencies including the Regional Water Quality Control Board, DTSC, or local fire departments. Most of these facilities also included the installation and monitoring of groundwater monitoring wells. Some of these systems are on-going.

- **Port of Los Angeles:** Project Geologist managing several environmental projects for the Port of Los Angeles (POLA) under an on-call contract. Project Geologist interacting with POLA personnel regarding environmental issues associated with land purchases, tenant audits, and on-call remediation. Projects have involved removal of underground storage tanks at the Yang Ming Terminal and continued groundwater monitoring, and the implementation of a corrosion study at a potential automobile storage yard in the Port of Los Angeles.

- **Alameda Corridor Transportation Authority:** Project Geologist managing numerous environmental projects under an on-call remediation services contract. Projects have involved remediation of petroleum pipelines and impacted soil discovered during construction activities of the Alameda Corridor. One project involved dredging metal-impacted soil from the Port of Los Angeles, where Mr. Roberts acted as the liaison between POLA and ACTA representatives.

- **Riverside County Transportation Commission (RCTC):** Project Manager for several projects for RCTC. On one occasion, RCTC discovered impacted soil and a groundwater well during redevelopment of a property in Corona. As not to delay grading activities, Mr. Roberts successfully obtained an expedited groundwater well destruction permit with Riverside County, profiled the soil for excavation and disposal, and abandoned the well. The property was subsequently developed with a Metrolink station with minimal delays.

- **Jack in the Box and Qdoba Restaurants:** Since 1991, Mr. Roberts has acted as Project Geologist managing numerous Phase I Environmental Site Assessments and other environmental issues regarding real estate transactions for Jack in the Box Inc. Since most of the properties are corner parcels which contained historical gasoline stations, Mr. Roberts would subsequently manage and conduct Phase II Subsurface Investigations to assess whether impacted soil and/or groundwater exists at the site and, if present, characterize the extent of the contaminants. In June 2012, Jack in the Box Inc. and Qdoba Restaurants (owned by Jack in the Box Inc.) awarded Ardent Environmental Group, Inc. an on-call environmental management contract for all Jack in the Box and Qdoba properties throughout the United States. Mr. Roberts is the Project Manager for this contract which includes completing Preliminary Environmental Reviews of possible property acquisitions, completing and managing Phase I and Phase II Environmental Site Assessments and asbestos surveys, and on-call consultation regarding environmental issues and concerns.
