## **Summary Form for Electronic Document Submittal**

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #:	
Project Title: Ridgecrest/ Inyokern Pavement	
_ead Agency: <u>Caltrans</u>	
Contact Name: Rebeka Riesen	
Email:	Phone Number: 442-359-8454
Project Location: Ridgecrest, Kern	
City	County
Project Description (Proposed actions, location, and/or consequences).	
The California Department of Transportation (Caltrans) proposes to rehab facilities, and make other improvements on State Route 178 from post mi area.	

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Less than Significant Effect for Biological Resources: No Temporary or Permanent impacts are anticipated for sensitive Flora or Fauna species in the project area. However, incidental observations during construction could occur. Therefore, standard avoidance and minimization measures are proposed to ensure impacts to these species will not occur as a result of this project.

Less than Significant Effect for Greenhouse Gas Emissions: The project does not have potential to result in significant impacts requiring the implementation of avoidance, minimization, and/or mitigation measures. The following avoidance and minimization measures will be implemented to reduce impacts; 7-1.02A and 7-1.02C, Emissions Reduction, and Section 14-9.02, Air Pollution Control, along with Standard Specifications Section 12.

Less than Significant for Hazardous Waste: No Acutely hazardous material is expected to be handled within the project area. Preliminary site investigations will occur and ADL testing will occur prior to construction.

Less than Significant for Hydrology & Water Quality: Temporary and permanent impacts will occur to Waters of the State due to culvert work. Temporary Soil Stabilization, Sediment Control, Tracking Control, Wind Erosion Control, Non-Stormwater Management, and Waste Management and materials Pollution BMPs will be implemented.
