

**CALIFORNIA ENVIRONMENTAL QUALITY ACT**

**NOTICE OF EXEMPTION**

To: Office of Planning and Research  
State Clearinghouse  
P.O. Box 3044, 1400 Tenth Street, Room 212  
Sacramento, California 95812-3044

From: Department of Toxic Substances Control  
Permitting Division  
8800 Cal Center Drive  
Sacramento, California 95826

**Project Title:** Emergency Permit for Treatment of Hazardous Waste, World Oil Environmental Services, Compton, California

**Project Location:** 1300 South Santa Fe Avenue, Compton, California 90221

**County:** Los Angeles

**Project Applicant:** Rosemary Domino, Director, Environmental Affairs

**Approval Action Under Consideration by DTSC:** Emergency Permit

**Statutory Authority:** California Health and Safety Code, Chapter 6.5

**Project Description:** The California Department of Toxic Substances Control (DTSC), pursuant to authority granted under California Code of Regulations (CCR), Title 22, Division 4.5, Chapter 20, Sec. 66270.61, has issued an Emergency Permit to the World Oil Environmental Services (EPA ID# CAD028277036) to store Toxic Substances Control Act classified waste past the ten (10) day storage limit. Specifically, a tank trailer containing approximately 2,700 gallons of used oil contaminated with polychlorinated biphenyl will be stored until an authorized hazardous waste treatment, storage, and disposal facility is able to receive the tank trailer. The contaminated used oil is currently being stored at World Oil Environmental Services located at 1300 South Santa Fe Avenue, Compton, California.

**Background:** Upon arriving at World Oil Environmental Services located at 1300 South Santa Fe Avenue, Compton, California, the tank trailer of used oil was evaluated and found to have a PCB concentration greater than 5 parts per million. This classified the used oil as a Toxic Substances Control Act (TSCA) hazardous waste. World Oil Environmental Services does not have a permit to manage the TSCA hazardous waste, and an authorized hazardous waste treatment, storage, and disposal facility is not able to receive the waste prior to the ten (10) day storage limit.

**Project Activities:** The contaminated used oil will be stored in a manner that is protective of the environment by implementing the following controls:

State of California – California Environmental Protection Agency  
Department of Toxic Substances Control

- The tank trailer must remain parked within the secondary containment system under tarps until the tank trailer is transported to an authorized facility.
- To prevent risk to the public, public access is restricted during the storage of the tank trailer.
- Movement and storage of the tank trailer will be in accordance with established standards.
- The tank trailer will be transported to an authorized facility where the TSCA hazardous waste will be offloaded, the tank trailer will be decontaminated, and waste generated during decontamination will be managed by an authorized facility.

Within 10 business days of the expiration of this permit, World Oil Environmental Services will submit a final report, signed in accordance with Title 22, CCR Sec. 66270.11(d). The report shall include certification that the storage area has been cleared of all residual hazardous waste generated from this emergency treatment and all generated waste has been properly managed. The Emergency Permit is effective beginning December 13, 2023, and shall expire on January 31, 2024.

**Name of Public Agency Approving Project:** Department of Toxic Substances Control

**Name of Person or Agency Carrying Out Project:** World Oil Environmental Services

**Exempt Status:** Categorical Exemption [CCR Title 14, Sec.15330]

**Reasons Why Project is Exempt:** This action is necessary to prevent, minimize, stabilize, mitigate, or eliminate the release or threat of release of hazardous waste. The hazardous waste will be stored until it is able to be shipped to an authorized facility for proper disposal.

The administrative record for this project is available to the public by appointment at the following location:
