**Phase I Environmental Site Assessment and Phase II Preliminary Soil and Groundwater Quality Evaluation
Intel Central Utility Building Expansion Project Site
3065 Bowers Avenue
Santa Clara, California**

SECTION 1: INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) and Phase II Preliminary Soil and Groundwater Quality Evaluation (Preliminary Phase II) performed at the proposed Intel SC1 Central Utility Building (CUB) Expansion Project location on a portion of the 3065 Bowers Avenue parcel in Santa Clara, California (Site) as shown on Figures 1 and 2. This work was performed for Intel Corporation in accordance with our November 30, 2022 agreement (Agreement).

1.1 PURPOSE

The scope of work presented in the Agreement for the Phase I ESA was prepared in general accordance with ASTM E1527-21 titled, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, “Standards and Practices for All Appropriate Inquiries; Final Rule” (AAI Rule, 40 CFR Part 312). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the Site.

As defined by ASTM E1527-21, the term Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition¹ is not a recognized environmental condition.

Cornerstone Earth Group, Inc. (Cornerstone) understands that Intel Corporation owns the Site and intends to construct a new Central Utility Building on the property. We performed the Phase I ESA to support Intel Corporation in evaluation of Recognized Environmental Conditions (RECs) at the Site. The Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs at the Site.

¹ A de minimis condition is defined by the ASTM Standard as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The scope of work presented in the Agreement for the Preliminary Phase II was to evaluate baseline soil and groundwater quality and to evaluate the RECs identified in the Phase I ESA for the purpose of providing information regarding the nature and extent of possible contamination.

1.2 SCOPE OF WORK

As presented in our Agreement, the scope of work performed included the following:

- A reconnaissance of the Site to note readily observable indications of significant releases of hazardous materials to structures, soil, soil vapor or groundwater.
- Drive-by observation of adjoining properties to note readily apparent activities involving hazardous materials that have or could significantly impact the Site.
- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents on-Site or at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Historical research including review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Interviews with persons reportedly knowledgeable of current and/or prior Site uses, including the current Site owner and occupant(s).
- Advance six borings using limited access direct push technology; collected two soil samples in the upper approximately 3 feet from each boring for laboratory analyses.
- Advance three of six borings to groundwater using limited access direct push technology; collect three groundwater samples for laboratory analyses.
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA and the Preliminary Phase II are presented in Section 11; the terms and conditions of our Agreement are presented in Appendix A.

1.3 ASSUMPTIONS

In preparing this Phase I ESA and Preliminary Phase II Investigation, Cornerstone can neither warrant nor guarantee that records obtained from or prepared by other parties, such as, but not limited to, regulatory agency records, interview responses, maps, related documents, and environmental reports prepared by others are accurate or complete. Cornerstone relied on the information obtained during this study unless we had actual knowledge that the information was incorrect or unless it was obvious that the information was incorrect based on other information obtained. We also assumed that the boundaries of the Site, based on information provided by Intel Corporation, are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

1.4 ENVIRONMENTAL PROFESSIONAL

The Phase I ESA was performed by Stason I. Foster, P.E. and Ron L. Helm, C.E.G. We declare that, to our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the All-Appropriate Inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

The Preliminary Phase II Investigation was performed by Michael F. Chang, P.E. and Ron L. Helm, C.E.G.

SECTION 2: SITE DESCRIPTION

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7 based on our on-Site observations.

2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the Site, based on information provided by Intel Corporation.

Table 1. Location and Ownership

Assessor's Parcel No. (APN)	Part of APN 216-46-015
Reported Address/Location	3065 Bowers Avenue, Santa Clara California
Owner	Intel Corporation
Approximate Lot Size	Part of 25.9 acre parcel (see Figure 2).

2.2 CURRENT/PROPOSED USE OF THE SITE

The current and proposed uses of the Site are summarized in Table 2.

Table 2. Current and Proposed Uses

Current Use	Employee parking lot
Proposed Use	Intel SC1 Central Utility Building

2.3 SITE SETTING AND ADJOINING PROPERTY USE

Land use in the general Site vicinity appears to be primarily commercial. During the Site visit, adjoining properties were observed from the Site and from adjacent public thoroughfares. Based on our Site vicinity reconnaissance, adjoining property uses are summarized below in Table 3.

Table 3. Adjoining Property Uses

North	Parking lot associated with the Intel Bowers Avenue property. Silicon Valley Christian Assembly is located further to the north.
South	Parking lot associated with the Intel Bowers Avenue property. Central Expressway and a multi-tenant office building are located further to the south.
East	Intel Building SC1
West	A commercial building occupied by Applied Materials is located across Bowers Avenue to the northwest and an undeveloped parcel is located across the Bowers Avenue/Central Expressway intersection to the southwest.

Although hazardous materials likely are used at the Applied Materials property to the northwest, as well as within the easterly adjoining Intel Building SC1, no chemical storage immediately adjacent to the Site boundaries was apparent and no evidence of spills or other conditions on the adjoining properties were observed that are considered indicative of Recognized Environmental Conditions at the Site.

SECTION 3: USER PROVIDED INFORMATION

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is Intel Corporation. The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions in connection with the Site, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property’s use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

ASTM E1527-21 categorizes the requirement to conduct a search for Environmental Liens and AULs as a User responsibility. A search of land title records for environmental liens and AULs

was not within the scope of the current Phase I ESA and the User did not provide such search results to Cornerstone.

3.2 SPECIALIZED KNOWLEDGE AND COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

To assist in the identification of Recognized Environmental Conditions, Intel completed an environmental questionnaire and also provided soil and groundwater sampling data recently obtained during construction activities at the easterly adjoining Building SC1 location. The questionnaire and sampling data are discussed below in Section 8.1.

SECTION 4: RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency database records provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E1527-21. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix B.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with respect to the Site. The customary practice is to review information from standard sources that is reasonably ascertainable within reasonable time and cost constraints.

4.1.1 On-Site Database Listings

Although 3065 Bowers Avenue (which includes the Site) was identified in several of the researched regulatory agency databases, the database listings appear to be associated with easterly adjoining Intel buildings/facilities. The database listings associated with the Intel facility at 3065 Bowers Avenue are summarized in Table 4.

Table 4. Intel Database Listings

Facility Name and Address	Database Listings*
3065 Bowers Avenue	
Intel	AST
Intel SC1	AST
Intel-SC2	CERS, CUPA, AST,
Intel Corporation	EMI, TRIS, PRP, ERNS, SPILLS 90, NPDES, CIWQS
Intel Corporation SC1/2	CPS-SLIC, HAZNET, HWTS, CERS, RCRA-LQG, WDS, FINDS, ECHO, PFAS ECHO, ENVIROSTOR, HIST UST, NPDES, CIWQS

* A description of the database sources is contained in the EDR database report attached in Appendix B.

4.1.2 Adjoining Property Database Listings and Nearby Spill Incidents

Database listings for adjoining properties and selected nearby spill incidents are summarized in Table 5.

Table 5. Adjoining Property Database Listings and Selected Nearby Spill Incidents

Facility Name and Address	Approximate Distance and Direction from Site	Database Listings*
Applied Materials 3050 Bowers Avenue	Adjoining to the northwest (across Bowers Avenue)	NPL, CPS-SLIC, ENVIROSTOR, SEMS, RCRA-LQG, US ENG CONTROLS, INST CONTROLS, HIST UST, ROD, PRP, CIWQS, CERS, CUPA, WDS, HAZNET, ENF, EMI, AST, CA SPILLS 90, among others.
Wyle Electronics 3000 Bowers Avenue	Adjoining to the southwest (across Bowers Avenue & Central Expressway)	LUST, HIST LUST, HIST CORTESE, CERS, HAZNET, HWTS, NPDES, CIWQS, CUPA, among others.
Hewlett-Packard (Avantek/Agilent) 3175 Bowers Avenue	350 feet north	CPS-SLIC, LUST, SEMS-ARCHIVE, ENVIROSTOR, HIST UST, ENF, CUPA, CERS, HAZNET HWTS, ERNS, CIWQS, CHMIRS, EMI, WDS, among others.
Synertek, Inc. 3050 Coronado Blvd.	950 feet east-northeast	NPL, CPS-SLIC, ENVIROSTOR, SEMS, RCRA-LQG, US ENG CONTROLS, INST CONTROLS, ROD, PRP, DEED, among others.
Coronado Plaza 3190 Coronado Blvd.	550 feet northeast	CPS-SLIC, HAZNET, CERS, HWTS, CA SPILLS 90, among others.

* A description of the database sources is contained in the EDR database report attached in Appendix B.

4.1.3 Further Review of Database Listings

As summarized in Tables 4 and 5, 3065 Bowers Avenue, as well as several other adjoining and nearby properties, were identified as reported spill incidents as indicated by listings on the national priorities list (NPL), cleanup program site (CPS) and leaking underground storage tank (LUST) databases.

To obtain additional information regarding these spill incidents, a cursory review of readily available documents obtained from the state Geotracker (<http://geotracker.waterboards.ca.gov>) and Envirostor (<http://www.envirostor.dtsc.ca.gov>) databases was performed. Geotracker is a database and geographic information system (GIS) that provides online access to environmental data. It tracks regulatory data about leaking underground storage tank (LUST), Department of Defense, Site Cleanup Program and Landfill sites. The Envirostor database is maintained by the Department of Toxic Substances Control (DTSC) and contains information on investigation, cleanup, permitting, and/or corrective actions that are planned, being conducted or have been completed under DTSC's oversight. The Envirostor database includes the following site types: Federal Superfund sites; State Response sites; Voluntary Cleanup sites; and School sites. Additional documents pertaining to the NPL listings were obtained from the US EPA website.

4.1.3.1 Intel, 3065 Bowers Avenue

Based on the information reviewed, Intel at 3065 Bowers Avenue is listed as an open case on the CPS database (Case # 43S0328). The case files include information pertaining to the

removal of a diesel UST in 1988 and associated groundwater sampling from the UST excavation and from a monitoring well (SC4-1). The case files, however, pertain to a diesel UST that was located at Intel's SC4 facility at 2625 Walsh Avenue in Santa Clara, which is a LUST case (Case # 06S1W33B01f) that was closed by the Santa Clara Valley Water District in 1996. The CPS case at 3065 Bowers Avenue appears to have been inaccurately opened; Intel at 3065 Bowers Avenue was identified as the responsible party for the UST release at 2625 Walsh Avenue, but the release did not occur on the 3065 Bowers Avenue property.

4.1.3.2 Other nearby NPL, CPS and LUST Cases

Based on the information reviewed pertaining to the NPL, CPS and LUST cases listed in Table 5, reported releases from these properties do not appear likely to have impacted soil, soil vapor or groundwater at the Site. In general, a northerly groundwater flow direction has been reported in the Site vicinity and the documented releases are not shown to have migrated to the Site.

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to 3065 Bowers Avenue at the Santa Clara Building Department and the Santa Clara Fire Department. As of the date of this report, the Fire Department had not responded to our request for files.

Information available at the Building Department included plans and permits associated with the initial development of the 3065 Bowers Avenue property for occupancy by Intel in 1970. A large number of additional permits, plans and associated documents dated between 1970 and 2023 appeared to pertain to subsequent facility additions and alterations. Other than the existing parking lot, no on-Site development was readily apparent based on a cursory review of the available documents².

4.2.2 Geologic Energy Management Division Maps

To evaluate the presence of oil or gas wells on-Site and in the immediate Site vicinity, maps available on-line at the California Department of Conservation, Geologic Energy Management Division (CalGEM) website were reviewed. Review of the available map for the Site area did not show oil or gas wells on-Site or on the adjacent properties.

SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

² Due to the large number of documents, a detailed review of each document was not feasible within the time and budget constraints of this Phase I ESA. A cursory review was conducted.

5.1 RECENT USGS TOPOGRAPHIC MAP

A 2018 USGS 7.5-minute topographic map was reviewed to evaluate the physical setting of the Site. The Site’s elevation is approximately 40 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the northeast towards the San Francisco Bay.

5.2 HYDROGEOLOGY

Based on information presented in the California Geotracker database pertaining to nearby properties, groundwater beneath the Site is likely present at depths of approximately 5 to 15 feet. Groundwater was observed during the Preliminary Phase II investigation on January 27, 2023, at a depth of approximately 9 feet at the time of drilling. Groundwater likely flows toward the north or northeast.

SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and adjoining properties to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the Site. The ASTM standard requires the identification of all obvious uses of the Site from the present back to the Site’s first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources. The identification of obvious uses of adjoining properties also is required.

6.1 HISTORICAL SUMMARY

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 6.

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1939 and 2020 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix C.
- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historic topographic maps dated 1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980, 2012, 2015 and 2018; copies of historic topographic maps reviewed are presented in Appendix C.
- **Historical Fire Insurance Maps:** EDR reported that the Site was not within the coverage area of fire insurance maps.

Table 6. Summary of Historical Source Information

Date	Source	Comments
1889 to 1968	Topographic maps	<p>Site: No structures are depicted on-Site. The topographic maps dated between 1953 and 1968 depict the Site as being occupied by an orchard.</p> <p>Adjoining Properties: Shown to consist of undeveloped land or orchards.</p>

Date	Source	Comments
1939, 1948, 1950, 1956, 1963 and 1968	Aerial photographs	<p>Site: Shown to be occupied by an orchard.</p> <p>Adjoining Properties: Shown to be occupied by an orchard.</p>
1973 and 1980	Topographic map	<p>Site: No structures are depicted on-Site.</p> <p>Adjoining Properties: The existing Intel Building SC1 is depicted adjacent to the east of the Site by 1973. Other adjoining properties generally appear to have been developed with commercial buildings by 1980.</p>
1974 to 2020	Aerial photographs	<p>Site: The Site is shown to be developed with a parking lot (similar to the existing conditions).</p> <p>Adjoining Properties: The existing Intel Building SC1 is depicted adjacent to the east of the Site by 1974 and associated parking lots are shown to the north and south. The existing Applied Materials building is shown to be under construction to the northwest (across Bowers Avenue) in 1974. Commercial buildings are shown to have been constructed across Central Expressway to the southwest by 1982 and south by 1993.</p>

6.1.1 City Directory Review

To obtain additional information regarding past uses of the Site and adjoining properties, business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five-year intervals for the years spanning 1922 through 2017.

Intel was listed as an occupant of 3065 Bowers Avenue on directories dated between 1975 and 2009. Among others, the listed business names at adjoining parcels include Applied Materials at 3050 Bowers Avenue; Elmar Electronics, Wyle Electronics, Fairchild Camera and Instrument Corporation and Arrow Electronics at 3000 Bowers Avenue; and Aventek, Hewlett-Packard and Agilent at 3175 Bowers Avenue. These adjoining property occupants are generally consistent with the discussion above in Section 4.1.3.

SECTION 7: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 7. Photographs of the Site are presented in Section 7.2.1.

7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on January 13, 2023. The Site reconnaissance was conducted by walking representative areas of the Site and the Site periphery. The Site also was observed from adjacent public thoroughfares. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials, or other objects.

7.2 OBSERVATIONS

At the time of our visit, the Site was developed with an asphalt paved parking lot, along with associated landscaping. The parking lot was being used as a staging area for equipment and materials associated with in-progress construction activities at the easterly adjoining Intel Building SC1. In addition to various stored building materials, three temporary trailer mounted emergency generators with integral diesel fuel tanks and two separate approximately 500-gallon diesel fuel above ground storage tanks (ASTs) were present on-Site. The generators and ASTs were located within portable secondary containment berms on a paved portion of the parking lot. No fuel spills or leaks were observed.

A stockpile of soil covered by polyethylene sheeting also was present on-Site that reportedly was generated during construction activities at the easterly adjoining Intel Building SC1.

Table 7. Summary of Readily Observable Site Features

General Observation	Comments
Aboveground Storage Tanks	Observed as described above
Agricultural Wells	Not Observed
Air Emission Control Systems	Not Observed
Boilers	Not Observed
Burning Areas (waste burn pits or ash disposal areas)	Not Observed
Chemical Mixing Areas	Not Observed
Chemical Storage Areas	Observed as described above
Drainage Ditches	Not Observed
Drums, Totes, and Intermediate Bulk Containers	Not Observed
Elevators	Not Observed
Emergency Generators	Observed as described above
Equipment Maintenance Areas	Not Observed
Fill Placement (<i>i.e.</i> , fill used to build up the site elevations)	Not Observed
Groundwater Monitoring Wells	Not Observed
Hoods and Ducting (associated with chemical use)	Not Observed
Hydraulic Vehicle or Equipment Lifts	Not Observed
Incinerators	Not Observed
Petroleum Pipelines or Wells	Not Observed
Pits, Ponds, or Lagoons.	Not Observed
Railroad Lines	Not Observed
Row Crops or Orchards	Not Observed
Septic Systems or Cesspools	Not Observed
Solid Waste Disposal Areas (other than municipal trash containers)	Not Observed
Stained Soil or Pavement	Not Observed
Stains or Corrosion on Floors, Walls, or Ceilings	Not Observed
Standing Surface Water or Pools	Not Observed
Stockpiles of Soil or Debris	Observed as described above
Stressed Vegetation (unrelated to the lack of water)	Not Observed
Strong, Pungent, or Noxious Odors	Not Observed
Sumps, Clarifiers, Oil-Water Separators, or similar structures	Not Observed
Transformers	Not Observed
Underground Storage Tanks	Not Observed
Unidentified Substance Containers	Not Observed
Vehicle Maintenance Areas	Not Observed
Vehicle Wash Areas	Not Observed
Wastewater Neutralization Systems	Not Observed

The comment "Not Observed" does not warrant that these features are not present on-Site; it only indicates that these features were not readily observed during the Site visit.

7.2.1 Site Photographs

Photograph 1. View of the Site looking east toward Building SC1.

Photograph 2. View of the Site looking southeast

Photograph 3. On-Site generators and ASTs.

Photograph 4. On-Site stockpiled soil.

SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS

8.1 ENVIRONMENTAL QUESTIONNAIRE / CURRENT OWNER AND OCCUPANT INTERVIEW

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire for completion by the Site owner (Intel). The completed questionnaire is attached in Appendix E. The information provided on the questionnaire appears generally consistent with our on-Site observations and information obtained from other data sources.

During the Site visit, Ms. Margherita Lai, (Intel Bowers Site Manager | Corporate Services Technology Development) and Mr. David Jackson (Environmental Engineer with Intel) also were interviewed regarding their knowledge of the Site. Ms. Lai and Mr. Jackson were not aware of

any prior chemical storage or spills on-Site (*i.e.*, at the planned Central Utility Building location). Prior agricultural use of the Site was noted, along with the possible presence of residual agricultural chemicals.

Mr. Jackson provided three recent reports documenting soil and groundwater sampling activities that were completed to facilitate in-progress construction activities at the easterly adjoining Building SC1 location. Copies of these reports are included in Appendix E.

Soil sampling was conducted at the SC1 building to facilitate disposal of excess soil during construction activities. Analyses of composite soil samples identified elevated concentrations of arsenic (up to 32.6 milligrams per kilogram [mg/kg]), total lead (up to 101 mg/kg) and soluble lead (up to 5.49 milligrams per liter [mg/L]) in the upper 4 feet of soil. Low concentrations of diesel and oil range petroleum hydrocarbons and organochlorine pesticides also were detected but did not exceed the Water Board's residential environmental screening levels (ESLs³). Volatile organic compounds (VOCs) were not detected.

A grab groundwater sample collected from an excavation within the basement of the SC1 building also was analyzed. Petroleum hydrocarbons were not detected and the detected metal concentrations reportedly were typical of natural background levels. VOCs also were not detected in the groundwater sample. It was noted, however, that the laboratory reporting limits for a few of the VOCs (1,2,3-trichloropropane, 1,2-dibromo-3-chloropropane, 1,2-dibromoethane, hexachlorobutadiene, and naphthalene) exceeded their respective direct exposure ESLs.

8.2 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

8.3 INTERVIEWS WITH STATE AND/OR LOCAL GOVERNMENT OFFICIALS

Per the ASTM Standard, a reasonable attempt should be made to interview at least one staff member of any one of the following types of state and/or local government agencies: fire department, health department, building department, or other agency having jurisdiction over hazardous waste disposal or other environmental matters in the area.

The Santa Clara Building Department and Santa Clara Fire Department were contacted during this study. The Fire Department is the Certified Unified Program Agency (CUPA) responsible for implementing California's Unified Hazardous Waste and Hazardous Materials Management regulatory program for properties within Santa Clara. Files pertaining to the Site were requested from each of these agencies; a summary of the information obtained was discussed in Section 4.2.1.

³ Environmental Screening Levels (ESLs) established by the Water Board (January 2019) are used to screen sites for potential human health concerns where releases of chemicals have occurred. These screening levels are risk-based concentrations derived from standardized equations combining exposure information assumptions with toxicity data. Under most circumstances, the presence of a chemical at concentrations below the corresponding screening level can be assumed not to pose a significant health risk.

SECTION 9: PRELIMINARY SOIL AND GROUNDWATER QUALITY INVESTIGATION

On January 27, 2023, six exploratory borings were advanced using a direct push drilling rig for purposes of evaluating soil and groundwater quality beneath the Site. As shown on Figure 3, the borings were spaced approximately evenly throughout the Site and positioned as follows:

- Exploratory boring EB-1 was advanced near the northwestern Site boundary in the presumed down-gradient groundwater flow direction. The boring was advanced to a depth of approximately 15 feet for soil and groundwater sample collection.
- Exploratory borings EB-2 and EB-6 were located at the northeast and southeast paved portions of the Site, respectively. The borings were advanced to a depth of approximately 5 feet for soil sample collection.
- Exploratory boring EB-3 was located at the western portion of the site within a landscaped area. The boring was advanced to a depth of approximately 5 feet for soil sample collection.
- Exploratory boring EB-4 was located at the eastern portion of the Site near the SC1 building; hazardous materials have been used in that building. The boring was advanced to a depth of approximately 20 feet for soil and groundwater sample collection.
- Exploratory boring EB-5 was located near the southwestern Site boundary, generally on the up-gradient portion of the Site with respect to the anticipated groundwater flow direction. The boring was advanced to a depth of approximately 20 feet for soil and groundwater sample collection.

9.1 SUBSURFACE MATERIALS

Borings within paved sections contained up to approximately 8 inches of aggregate base underlying the asphalt section. Lean clay with sand fill was observed in exploratory borings EB-1 through EB-6, extending to an approximate depth between 1 and 3½ feet. The native material encountered consisted of lean clay with sand to a clayey sand. No apparent chemical odors, staining, or discolored soil were observed in the soil samples from the exploratory borings.

The water yielding zone consisted of wet clayey sand to poorly graded sand with clay. Groundwater was first observed in the groundwater borings at the time of drilling at approximately depths of between 9 and 14 feet. Groundwater appeared to stabilize at a depth of approximately 9 feet. The lithologic observations are included on the boring logs in Appendix F.

Excess soil generated from this investigation was disposed in accordance with Intel's Environmental Health and Safety protocols communicated to Cornerstone's field engineer at the time of drilling.

9.2 ORGANIC VAPOR READINGS

Soil samples retrieved from the exploratory borings were monitored with a MiniRAE 3000 Organic Vapor Meter (OVM) to record volatile organic compound (VOC) vapors. Organic vapor readings appeared consistent between and within the borings, with OVM readings of 0.0 to 0.1

parts per million by vapor [ppm_v]. The OVM measurements are included on the boring logs in Appendix F.

9.3 SOIL QUALITY EVALUATION

9.3.1 Soil Sample Collection and Laboratory Analyses

Soil samples were collected and analyzed from approximate depths of 1 and 3 feet for each boring. The soil samples from these borings were collected in new acetate liners. The ends of the liners were covered in Teflon film, capped, and labeled with a unique sample identifier. A Field duplicate was collected from boring EB-6 and analyzed as a quality control/quality assurance (QA/QC) measure. Field duplicates are additional samples collected at a sampling location to enable statistical analysis of the resulting data. Field duplicate samples are two separate samples collected at the same (i.e., as close as possible) time, from the same source, at the same depth or sample location as the associated field sample. The duplicate samples were collected in separate containers and analyzed for various analytes independently by the same method and laboratory as the associated field sample. Based on an approximate frequency of one duplicate for every 20 soil samples (i.e., 5 percent), one field duplicate sample, EB-6 (1.5-2), was collected as the duplicate sample for EB-6 (1-1.5). Additionally, one sample from EB-1 was collected from the aggregate base layer. The samples were placed in an ice-chilled cooler for transportation to a state-certified laboratory under chain of custody control.

Selected soil samples from borings EB-1 through EB-6 were analyzed for low-level polycyclic aromatic hydrocarbons (PAHs) (EPA Test Method 8270 SIM), 17 California Assessment Manual (CAM) metals (EPA Test Method 6010B/7471A), organochlorine pesticides (OCPs) (EPA Test Method 8081), and polychlorinated biphenyls (PCBs) (EPA Test Method 8082). The sample collected from the aggregate base layer at EB-1 was additionally analyzed for asbestos using polarized light microscopy (PLM) and a California Air Resources Board (CARB) 435 Prep Method.

9.3.2 Soil Analytical Summary

Cornerstone compared detected compounds to applicable residential and commercial Environmental Screening Levels (ESLs)⁴ established by the Water Board. Metal concentrations also were compared to natural background/ambient concentrations (Scott, 1991, Bradford, 1996, and Duverge, 2011)⁵.

Detected concentrations were also compared to the total threshold limit concentrations (TTLC)⁶ where established. Additionally, asbestos data was compared to the California Air Resources Board (CARB) Asbestos Toxic Control Measure (ATCM) regulatory threshold of 0.25 percent for

⁴ Environmental Screening Levels (ESLs) established by the Water Board (January 2019) are used to screen sites for potential human health concerns where releases of chemicals have occurred. These screening levels are risk-based concentrations derived from standardized equations combining exposure information assumptions with toxicity data. Under most circumstances, the presence of a chemical at concentrations below the corresponding screening level can be assumed not to pose a significant health risk.

⁵ Naturally occurring background concentrations of metals, such as arsenic, nickel and chromium, amongst others, in soil may exceed their respective screening levels. Cal/EPA generally does not require cleanup of soil to below background concentrations. Thus, for the metals detected, these data also were compared to regional published background concentrations.

⁶ The TTLC is the level at which a solid waste is considered hazardous per Title 22 of the California Code of Regulations and is pertinent when evaluating waste disposal options.

construction and grading projects. Detected compounds are presented in Table A (Metals and Asbestos), and Table B (PAHs, PCBs, and OCPs) in the Tables section of this report. Chain of custody documentation and laboratory analytical reports are presented in Appendix G.

A summary of the soil quality analytical results is provided below:

- Chromium, nickel, and cobalt were detected in the shallow soil samples collected from EB-1 at concentrations that exceed their published background/ambient concentrations. Cobalt concentrations also exceeded its residential ESL. However, the detected metal concentrations of these metals are below their respective commercial ESLs. Nickel is additionally below its residential screening criteria.
- Soil disposal facilities typically require analysis for soluble chromium and nickel when total concentrations of these metals are greater than 50 mg/kg and 200 mg/kg, respectively. Several samples exceed these threshold values.
- Arsenic was detected at a concentration of 17.2 mg/kg in sample EB-2 (3-3.5) which exceeds its typical natural background concentration of 11 mg/kg (Duverge, 2011). Note that natural background concentrations of arsenic are often well above its commercial ESL of 0.31 mg/kg; however, the California Environmental Protection Agency generally does not require cleanup of metals in soil to below background levels. Bradford et al. (1996) estimated that background arsenic concentrations in California soil types range from 0.6 mg/kg to 11 mg/kg. Scott (1991) documented background arsenic concentrations ranging up to 20 mg/kg. Duverge (2011) concluded that the mean and upper estimate (the 99th percentile) for background arsenic levels in the San Francisco Bay Region are 4.61 mg/kg and 11 mg/kg, respectively.

The calculated 95 percent upper confidence limit (UCL)⁷ for arsenic concentration is 7.88 mg/kg, which is within the range of typical background/ambient concentrations.

- The remaining detected metal concentrations are below their respective residential and commercial screening criteria, and within the range of published ambient/background concentrations.
- Asbestos was not detected in the aggregate base sample collected at EB-1.
- The detected PAH and OCP concentrations were below their respective residential and commercial ESLs.
- PCBs were not detected above laboratory reporting limits.

⁷ The 95 percent UCL was calculated for arsenic using USEPA's ProUCL software Version 5.2 (USEPA, 2022). The 95 percent UCL provides reasonable confidence that the true site average concentration will not be underestimated and accounts for uncertainties due to limited sampling data. The 95 percent UCL of a mean is defined as a value that, when calculated repeatedly for randomly drawn subsets of site data, equals or exceeds the true mean 95 percent of the time. The 95 percent UCL of the mean provides a conservative estimate of the average (or mean) concentration. A chemical contaminant is not considered to be present at a level of concern if the calculated 95 percent UCL is less than its respective regulatory threshold concentration.

Detected concentrations from duplicate samples EB-6 (1.5-2), and EB-6 (1-1.5) are generally of similar magnitude. For compounds detected above laboratory reporting limits, the average relative percent difference between the field sample and duplicate sample is 41 percent. This level of variability is expected given the heterogeneous nature of soil media. Results are summarized in Tables A and B in the Tables section of this report.

9.4 GROUNDWATER QUALITY EVALUATION

Cornerstone collected grab groundwater samples from exploratory borings EB-1, EB-4, and EB-5 to evaluate the groundwater quality beneath the Site. The borings were advanced approximately 5 feet to 10 feet into the first water yielding zone for the collection of groundwater samples.

9.4.1 Groundwater Sample Collection and Analyses

At each boring a temporary polyvinyl chloride (PVC) well casing was extended to the bottom of the boring. A clean Teflon sampling tube was inserted into the temporary casing, and groundwater samples were collected using an inertial pump check valve. Samples were collected in pre-preserved, laboratory-provided sampling containers. A field blank sample of distilled water was also collected to measure atmospheric conditions that could potentially contaminate the samples. The containers were labeled with a unique sample identifier, placed in an ice-chilled cooler, and transported to a state certified laboratory under chain of custody control.

The samples were analyzed for VOCs by EPA Test Method 8260B. The laboratory analytical results are summarized in Table C in the Tables section of this report. The laboratory analytical reports are presented in Appendix G.

9.4.2 Groundwater Analytical Results

The groundwater analytical results were compared to the State Water Resources Control Board's Maximum Contaminant Levels (MCLs, commonly called drinking water standards) (January 2023).

A summary of the groundwater analytical results is provided below:

- Methylene chloride was detected in the groundwater sample from EB-1 at a concentration below its MCLs.
- Acetone was detected above method detection limits in the groundwater samples collected, however an MCL has not been established.
- No other VOCs were detected in the groundwater samples analyzed.

Acetone and methylene chloride are common laboratory solvents, laboratory contamination may represent the source of these detected constituents.

A field blank was collected for quality assurance and control. Field blank samples can measure if there are any atmospheric conditions at the sampling Site that could contaminate the samples. The field blank sample was collected by pouring distilled water into laboratory-provided

groundwater sample containers. Detected concentrations of acetone in the field blank were similar to those reported in the field sample; in addition, chloroform also was reported at a low concentration and may also be a laboratory contaminant. Results are summarized in Table C in the Tables section of this report.

SECTION 10: FINDINGS, OPINIONS, AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed the Phase I ESA in general conformance with ASTM E1527-21 to support Intel Corporation in evaluation of Recognized Environmental Conditions. Cornerstone also performed the Preliminary Phase II Investigation to evaluate baseline soil and groundwater quality and to evaluate potential RECs identified in the Phase I ESA. Our findings, opinions and conclusions are summarized below.

10.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the Site historically was occupied by an orchard. Intel Building SC1 was constructed on the 3065 Bowers Avenue property in approximately 1970 and the Site (*i.e.*, at the planned Central Utility Building location) was concurrently developed with the existing parking lot. The parking lot currently is being used as a staging area for equipment and materials associated with in-progress construction/renovation activities at the easterly adjoining SC1 building.

10.2 CHEMICAL STORAGE AND USE

Although various chemicals have been used and stored by Intel on portions of the 3065 Bowers Avenue property, no on-Site chemical use or storage was identified during this study except for diesel fuel within three temporary trailer mounted emergency generators and associated ASTs. These generators reportedly were recently placed on-Site to support construction activities at the easterly adjoining SC1 building. The generators and ASTs are located within portable secondary containment berms on a paved portion of the on-Site parking lot and no fuel spills or leaks were observed.

10.3 SOIL AND GROUNDWATER QUALITY

As discussed in Section 9, sampling was performed to evaluate baseline soil and groundwater quality and to evaluate potential RECs identified in the Phase I ESA.

The Site historically was used for agricultural purposes. Recent analyses by others of soil samples collected at the nearby SC1 building location identified elevated concentrations of arsenic, total lead and soluble lead in the upper 4 feet of soil. These metals are commonly associated with pesticides used at agricultural properties. On-Site soil samples were collected during this Preliminary Phase II Investigation to evaluate if similar concentrations of metals may be present in on-Site soil.

Based on analytical data obtained during this Preliminary Phase II Investigation, pesticides were not detected in soil at concentrations exceeding their respective residential or commercial ESLs, or California's hazardous waste criteria (Total Threshold Limit Concentration [TTLC]). Detected concentrations of pesticide related metals (lead and arsenic) in soil are generally consistent with natural background/ambient concentrations, except that arsenic in one sample (EB-2 [3-3.5])

appears to be greater than typical background/ambient levels. However, the calculated 95 percent upper confidence limit (UCL) for the reported on-Site arsenic concentrations is 7.88 mg/kg, which is within the range of published background concentrations.

Concentrations of chromium and nickel above typical background/ambient levels were detected in shallow soil collected from boring EB-1, primarily in the sample collected from the aggregate baserock underlying the asphalt pavement. Similarly, cobalt concentrations detected in soil from EB-1 exceed its residential ESL but did not exceed its commercial ESL.

Typical background/ambient concentrations for chromium and nickel as reported by Scott (1991) are up to 170 and 145 mg/kg, respectively. However, greater background concentrations have been documented in some soil types. As summarized by Anderson (1998), several studies reported nickel concentrations greater than 2,000 mg/kg in serpentinite ultramafic rocks. Bradford (1996) reported a maximum background cobalt concentration of 46.9 mg/kg, which is similar to the greatest concentration (51.5 mg/kg) detected in on-Site soil.

Nickel, chromium, and cobalt tend to occur in similar geological environments (e.g., serpentinite). Based on our experience, baserock used beneath pavements may contain serpentinite, depending upon the source from which the material was obtained. It appears likely that these metal concentrations are associated with baserock below the on-Site pavements. The detected nickel, chromium, and cobalt concentrations did not exceed established commercial screening levels. However, at the time of construction, the receiving facility for excess soil likely will require additional soil sampling/profiling and soluble metals testing. Excess soil may require special handling procedures if disposed off-Site and may require disposal at a permitted facility.

Analyte concentrations detected in groundwater samples obtained during this study were below their respective maximum contaminant levels (drinking water standards); the low concentrations of detected contaminants appear likely to be associated with laboratory contamination.

10.4 IMPORTED SOIL

If the planned development will require importing soil for Site grading, we recommend documenting the source and quality of imported soil. The DTSC's October 2001 Clean Fill Advisory provides useful guidance on evaluating imported fill.

10.5 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site.

10.6 DATA GAPS

ASTM Standard E1527-21 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by the ASTM Standard despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- As of the date of this report, the Santa Clara Fire Department had not responded to our request for available files. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. Considering that the Site has been used as a parking lot since development of the 3065 Bowers Avenue property, it appears unlikely that the Fire Department would have information that would significantly alter the findings of this Phase I ESA. We do not consider this data gap to be significant.
- Contact information for the former occupants and owners of the Site was not provided to us. Thus, former occupants and owners were not interviewed during this study. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. We do not consider this data gap to be significant.

10.7 DATA FAILURES

As described by ASTM Standard E1527-21, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five-year intervals back to the first use or to 1940 (whichever is earlier). The ASTM Standard requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data failures were identified during this Phase I ESA.

10.8 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E1527-21. Based on the information presented in the Phase I ESA and the subsequent Preliminary Phase II Investigation, this assessment did not identify Recognized Environmental Conditions⁸.

Based on soil quality data obtained during this study, elevated concentrations of nickel, chromium and cobalt are present in on-Site soil, primarily associated with baserock below the on-Site pavements. The detected concentrations, however, did not exceed commercial screening levels and, thus, are considered to be a de minimis condition⁹. Recent soil sampling by others at the adjacent SC1 building identified elevated lead and arsenic concentrations. Most lead and arsenic concentrations detected in on-Site soil are typical of natural background/ambient levels; greater concentrations potentially could be present based on the Site's proximity to the areas sampled by others at building SC1. Any excess soil generated

⁸ Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

⁹ A de minimis condition is defined by the ASTM Standard as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

during the planned construction/earthwork activities should be appropriately managed/disposed and may require disposal at a permitted facility.

This assessment also did not identify any Controlled Recognized Environmental Conditions¹⁰ or Historical Recognized Environmental Conditions¹¹ associated with the Site.

SECTION 11: LIMITATIONS

Cornerstone performed this Phase I ESA and Preliminary Phase II Investigation to support Intel Corporation in evaluation of Recognized Environmental Conditions associated with the Site. Intel Corporation understands that this work product cannot wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This report is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. Intel Corporation understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, additional samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E1527-21, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

Intel Corporation may have provided Cornerstone environmental documents prepared by others. Intel Corporation understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

This report, an instrument of professional service, was prepared for the sole use of Intel Corporation and may not be reproduced or distributed without written authorization from Cornerstone. Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

¹⁰ A Recognized Environmental Condition that has been addressed to the satisfaction of the applicable regulatory agency with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

¹¹ A previous release of hazardous substances or petroleum products affecting the Site that has been addressed to the satisfaction of the applicable regulatory agency and meeting unrestricted use criteria established by the applicable regulatory agency without subjecting the Site to any controls.

11.1 REPORT VIABILITY

Per ASTM E1527-21 and 40 CFR Part 312, a Phase I Environmental Site Assessment report is presumed to be viable when it is conducted within one year prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction), provided that the following components of the inquiries were conducted or updated within 180 days prior to the date of purchase or the date of the intended transaction:

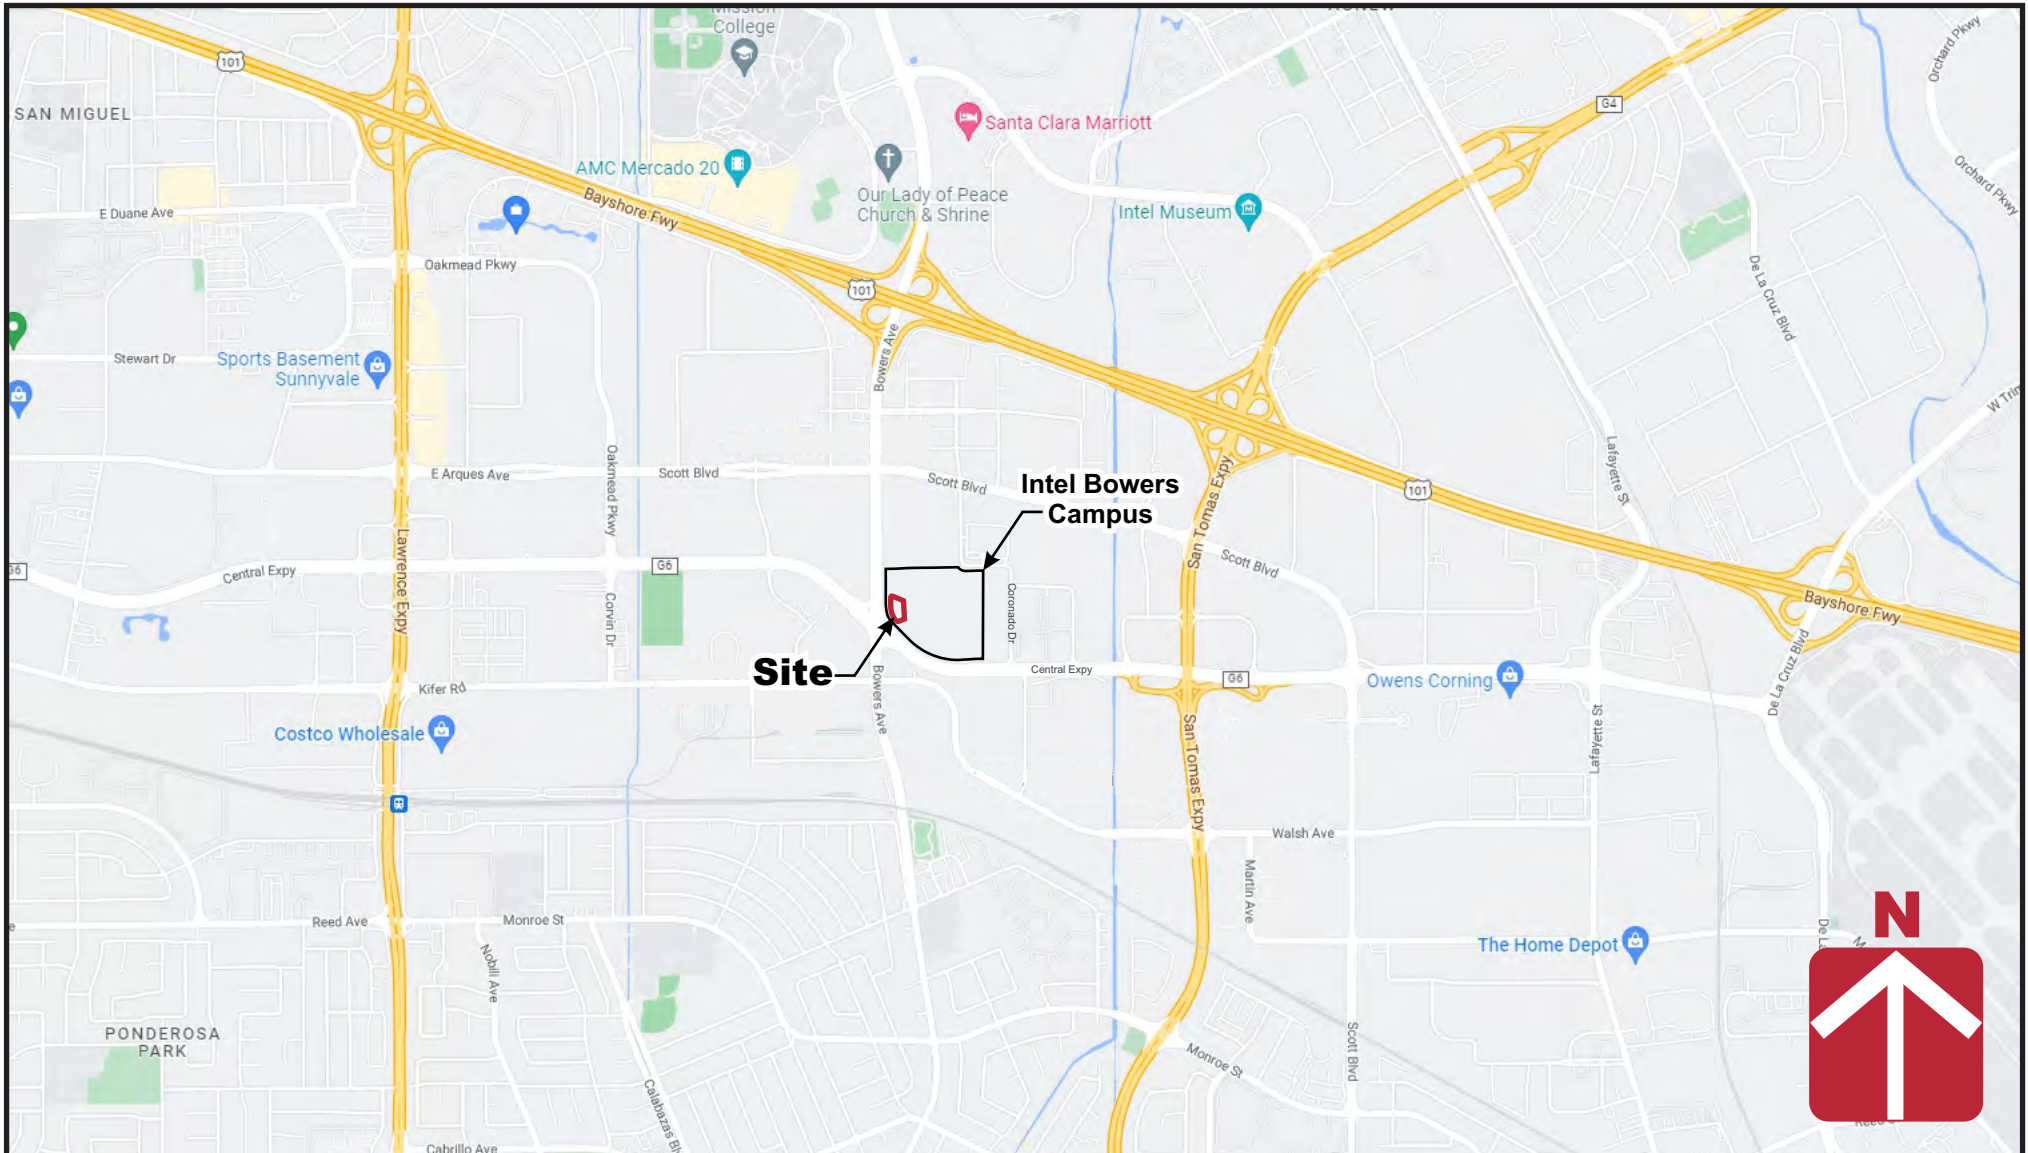

Task

Interview with current owner and occupant
Review of standard government environmental record sources
Visual observation of the Site and of adjoining properties
Declaration by the Environmental Professional
Searches for recorded environmental cleanup liens

APPENDIX A – TERMS AND CONDITIONS

**CORNERSTONE EARTH GROUP, INC.
TERMS AND CONDITIONS**

1. Agreement

- 1.1 Cornerstone Earth Group, Inc.'s ("Cornerstone") services are defined by and limited to (a) those services (the "Work") described in the attached proposal, which is incorporated herein by this reference, and (b) these Terms and Conditions of Agreement ("Terms and Conditions"). Together, the proposal and Terms and Conditions form the "Agreement." This Agreement represents the entire agreement between the Client and Cornerstone (collectively, the "Parties") and supersedes all prior negotiations, representations, or agreements, either written or oral. The Agreement can only be amended by a written instrument signed by both the Client and Cornerstone. In the event that the Client authorizes the Work by means of a purchase order or other writing ("Confirmation"), it is expressly agreed that these Terms and Conditions shall apply, and any terms, conditions or provisions appearing in the Confirmation are void and inapplicable except to the extent the Confirmation authorizes the Work and binds the Client to this Agreement.
- 1.2. Failure to immediately enforce any provision in this Agreement shall not constitute a waiver of the right to enforce that provision or any other provision. No waiver by the Parties of a breach of any term or covenant contained in this Agreement, whether by conduct or otherwise, in any one or more instances shall be deemed to be or construed as a further or continuing waiver of any such breach or as a waiver of a breach of any other term or covenant in this Agreement.

2. Scope of Services

- 2.1 Cornerstone will serve the Client by providing professional counsel and technical advice based on information furnished by the Client. The Client will make available to Cornerstone all known information regarding existing and proposed conditions of the site, and will immediately transmit any new information that becomes available or any change in plans. The Client and Cornerstone agree that Cornerstone, its officers, directors, employees, agents and/or subcontractors shall not be liable for any claims, damages, costs, or losses arising from or in any way related to conditions not actually encountered during the course of Cornerstone's Work and Cornerstone shall not have any liability or responsibility for losses resulting from inaccurate or incomplete information supplied by the Client, and the Client agrees to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against claims, damages, costs or losses arising therefrom. Cornerstone, its officers, directors, employees, agents and/or subcontractors shall not be liable for failing to discover any condition the discovery of which would reasonably require the performance of services not authorized by the Client.

3. Terms of Payment

- 3.1 The Client's obligation to pay for the Work is in no way dependent upon the Client's ability to obtain financing. The Client's obligation to pay for the Work is in no way dependent upon the Client's successful completion of the Client's project. No provision of this Agreement shall be construed to constitute a "Pay-When-Paid" clause or a "Pay-If-Paid" clause.
- 3.2 Payment for the Work shall be due and payable upon receipt of Cornerstone's invoice. To be recognized, any dispute over charges must be claimed in writing within thirty (30) calendar days of the billing date. Any dispute over an invoice amount shall not affect the Client's obligation to pay invoice amounts not in dispute. Amounts unpaid thirty (30) calendar days after the issue date of Cornerstone's invoice shall be assessed a service charge of 1 percent per month on balances outstanding.
- 3.3 Timely payment is a substantial condition of the Client's performance under this Agreement. Cornerstone may at its option withhold delivery of reports or other work product or suspend performance of the Work pending receipt of payments for all past due invoices and Cornerstone, its officers, directors, employees, agents and/or subcontractors shall have no liability to the Client for delay or damage caused because of such withholding or suspension. In the event that Cornerstone must take legal action to enforce this Agreement for payment for the Work performed and Cornerstone prevails, Cornerstone will be reimbursed by the Client for all expenses, including but not limited to reasonable attorney's fees and litigation costs.

4. Standard of Care

- 4.1 While performing the Work under this Agreement, Cornerstone shall exercise the degree of care and skill ordinarily exercised under similar circumstances by members of the environmental and geotechnical engineering consulting professions, as applicable, performing the kind of services to be performed hereunder and practicing in the same or similar locality at the same period of time.
- 4.2 Except for the express promise set forth in Subsection 4.1 herein, Cornerstone neither makes, nor offers, nor shall Cornerstone be liable to the Client for any express or implied warranties with respect to the performance of the Work.

5. Force Majeure

- 5.1 Cornerstone will diligently proceed with its services and will complete the Work in a timely manner, but it is expressly agreed to and understood by the Client that Cornerstone shall not be held responsible for delays occasioned by factors beyond its control, nor by factors which could not reasonably have been foreseen at the time of the execution of the Agreement between the parties.
- 5.2 Except for the obligation to pay for the Work performed and expenses incurred, neither Cornerstone nor the Client shall be liable for its failure to perform hereunder, in whole or in part, due to contingencies beyond its reasonable control, included, but not limited to, strikes or other concerted acts of workmen not in Cornerstone's employ, whether direct or indirect, riots, war, acts of terrorism, fire, floods, storms, washouts, acts of God or the public enemy, explosions, accidents, epidemics, breakdowns, injunctions, compliance with any law, regulation or order, whether valid or invalid, of the United States of America or any governmental body or any instrumentality thereof, whether now existing or hereafter created.

6. Effect of Delay or Impediment to Work

- 6.1 If any event occurs which causes or may cause Cornerstone: (a) to be impeded in its performance of the Services; or (b) to be delayed in the completion of the Work within the time provided in the attached proposal and/or in an applicable Change Order due to any act or omission of the Client, its officers, directors, employees and agents, or the Client's contractors, or due to any contingency beyond Cornerstone's control as provided in Section 5 herein, Cornerstone shall notify the Client in writing within ten (10) business days of the date on which Cornerstone becomes aware of such event.
- 6.2 The Client shall notify Cornerstone in writing of the Client's agreement or disagreement with Cornerstone's claim of an impediment or delay to performance within five (5) business days after receipt of Cornerstone's notice under Subsection 6.1. If the Client agrees with Cornerstone's claim, the time for performance of such requirement may be extended as mutually agreed in writing by the parties as provided in Subsection 1.1. If the Client disputes Cornerstone's assertion of an impediment or delay, such dispute shall be resolved pursuant to Section 17.
- 6.3 Impediments or delays to performance, addressed pursuant to this Section, shall not (a) constitute a breach hereunder; (b) give rise to any special right to terminate this Agreement; or (c) give rise to a claim by the Client for damages or other relief, if and to the extent that such impediment or delay is due to any act or omission of the Client, its officers, directors, employees and agents, or the Client's contractors, or due to any contingency beyond Cornerstone's control as provided in Section 5.

7. Right of Entry

- 7.1 Unless otherwise agreed in writing, the Client shall furnish and/or secure right of entry to the Site described in the proposal for Cornerstone personnel and equipment in order for Cornerstone to perform the Work. The Client shall waive any claim against Cornerstone, its officers, directors, employees, agents and/or subcontractors and agree to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors from any claims arising from entry onto the Site which is the subject of the Work.

- 7.2 The Parties acknowledge and agree that although Cornerstone will take reasonable precautions to minimize damage to property, including landscapes, hardscapes, crops and underground utilities, any and all damages, losses or expenses which could result from damage to such property due to Cornerstone's performance of the Work under this Agreement shall be the sole and exclusive responsibility of the Client provided that such damages, losses or expenses are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein. The Client shall indemnify, defend and hold harmless Cornerstone, its officers, directors, employees, agents and/or subcontractors from any damages, losses or expenses including, without limitation, attorney's fees, sustained or incurred by Cornerstone, its officers, directors, employees, agents and/or subcontractors as a result of any and all claims arising out of any damage to subsurface utilities due to Cornerstone's performance of the Work under this Agreement, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.

8. Monitoring of Construction

- 8.1 The Client acknowledges and understands that unanticipated or changed conditions may be encountered during construction. There is a substantial risk to the Client and to Cornerstone if Cornerstone is not engaged to provide complete services, including but not limited to, construction observation services. Such risks include the increased likelihood of misinterpretation of Cornerstone's findings and conclusions and error in implementing recommendations by Cornerstone. If Client fails to retain Cornerstone to provide complete services, the Client agrees, notwithstanding any other provisions of this Agreement, to the fullest extent permitted by law, to indemnify and hold harmless Cornerstone, its officers, partners, employees and Cornerstones from and against any and all claims, suits, demands, liabilities, losses, damages or costs, including reasonable attorneys' fees and defense costs arising out of or in any way connected with the Work or arising out of implementing or interpreting Cornerstone's work product except when the Claim arises from the sole negligence of Cornerstone or where the Claim arises from the willful, wanton or reckless conduct of Cornerstone.
- 8.2 Cornerstone shall not be required to make exhaustive or continuous on-site observations to check the quality or quantity of the Work and shall not be responsible for any contractor's failure to carry out the work in accordance with the contract documents.
- 8.3 Cornerstone shall not be responsible for the acts or omissions of any contractor or subcontractor or any of the contractors' or subcontractors' agents or employees or other persons performing any work on the Project.

9. Changed Conditions

- 9.1 If, during the term of this Agreement, circumstances or conditions that were not originally contemplated by or known to Cornerstone are revealed, to the extent that they affect the scope of services, compensation, schedule, allocation of risks or other material terms of this Agreement, Cornerstone may call for renegotiation of appropriate portions of this Agreement. Cornerstone shall notify the Client of the changed conditions necessitating renegotiation, and Cornerstone and the Client shall promptly and in good faith enter into renegotiation of this Agreement to address the changed conditions. If terms cannot be agreed to, the parties agree that either party has the absolute right to terminate this Agreement, in accordance with the termination provision hereof.

10. Jobsite Safety

- 10.1 Neither the professional activities of Cornerstone nor the presence of Cornerstone or its employees, subconsultants and subcontractors shall relieve the Client or the Client's General Contractor of its obligations, duties and responsibilities, including, but not limited to, health and safety programs. Cornerstone and its personnel have no authority to exercise any control over the site or any construction contractor or its employees in connection with their work or any health or safety programs or procedures. The Client acknowledges and agrees that Cornerstone shall not be responsible for jobsite safety.

11. Hazardous Materials and Environmental Contamination

- 11.1 The Client hereby warrants that if it knows or has any reason to assume or suspect that hazardous or toxic substances, or any other type of environmental hazard, contamination or pollution may exist at the Site, the Client will immediately inform Cornerstone to the best of the Client's knowledge of such hazardous or toxic substances, environmental hazard, contamination or pollution's type, quantity and location.
- 11.2 Cornerstone, its officers, directors, employees, agents and/or subcontractors shall have no title to, ownership of, or legal responsibility and/or liability for any and all contamination at the Site, including, but not limited to, the groundwater thereunder. "Contamination at the Site" includes but is not limited to any hazardous or toxic substance, or any other type of environmental hazard, contamination or pollution present at or under the Site, including, but not limited to the ground water thereunder, which is not brought onto the Site by Cornerstone, its officers, directors, employees, agents and/or subcontractors.
- 11.3 Cornerstone and the Client agree that the discovery of unanticipated Contamination at the Site may constitute a changed condition mandating renegotiation and/or termination of this Agreement. Cornerstone and the Client agree that the discovery of unanticipated Contamination at the Site may make it necessary for Cornerstone to take immediate measures to protect the public health, safety and the environment. The Client agrees that Cornerstone may take any or all measures that in Cornerstone's professional opinion are justified to preserve and protect the health and safety of Cornerstone's personnel, the public and the environment, and the Client agrees to compensate Cornerstone for the cost of such services.
- 11.4 The Client agrees to indemnify, defend and hold harmless Cornerstone, its officers, directors, employees, agents and/or subcontractors from any and all damages, losses or expenses, including, but not limited to, reasonable attorney's fees and legal costs connected therewith, liabilities, penalties and fines sustained by Cornerstone, its officers, directors, employees, agents and/or subcontractors as a result of any and all claim with respect to and arising out of any and all Contamination at the Site, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.
- 11.5 Subsurface sampling may result in unavoidable contamination of certain subsurface areas, as when a probe or boring is advanced or drilled through a contaminated area into a clean soil or water-bearing zone. Because of the risks posed by such work, and because subsurface sampling is often a necessary part of Cornerstone's Work, the Client hereby agrees to waive all claims against Cornerstone, its officers, directors, employees, agents and/or subcontractors with respect to and arising out of any and all subsurface sampling, including but not limited to claims relating to cross-contamination occurring because of such subsurface sampling, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.

12. Disposal of Samples and Drill Cuttings

- 12.1 Unless mutually agreed in writing by the Parties as provided in Subsection 1.1 herein, Cornerstone shall hold samples collected during the performance of the Work no longer than thirty (30) calendar days after their date of collection. Drill cuttings and waste materials will be left on-Site. In the event that soil, rock, water, drill cuttings and/or other samples or materials are contaminated or are suspected to contain hazardous materials or other toxic substances hazardous or detrimental to public health, safety or the environment as defined by federal, state or local law, Cornerstone will, after completion of testing, notify the Client of the same in order for the Client to arrange for the disposal of the samples and/or materials. The Client recognizes and agrees that Cornerstone at no time assumes title to said samples and/or materials, and that the Client is responsible for the disposal of such samples and/or materials. The Client agrees to pay all costs associated with any storage, transport and/or disposal of samples and/or materials, and to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors from any and all claims arising out of or in any way related to the storage, transport and/or disposal of asbestos, hazardous or toxic substances, and/or pollutants, including but not limited to any samples and/or materials.

13. Use and Ownership of Documents

- 13.1 All reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents and instruments prepared by Cornerstone as instruments of service shall remain the property of Cornerstone. Cornerstone shall retain all common law, statutory and other reserved rights, including copyright thereto. In the event the Client, the Client's contractors or subcontractors, or anyone for whom the Client is legally liable makes or permits to be made any changes to reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents prepared by Cornerstone without obtaining Cornerstone's prior written consent, the Client shall assume full responsibility for the results of such changes. Therefore, the Client agrees to waive any claim against Cornerstone and to release Cornerstone from any liability arising directly or indirectly from such changes. In addition, the Client agrees, to the

fullest extent permitted by law, to indemnify and hold harmless Cornerstone from any damages, liabilities or costs, including reasonable attorney’s fees and costs of defense, arising from such changes.

The Client agrees that all reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents and other services furnished to the Client or its agents and/or employees by Cornerstone, which are not paid for, shall be immediately returned upon demand and may not be used by the Client for any purpose. Any reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents, advice or opinions provided by Cornerstone to the Client as part of the Work are provided for the sole and exclusive use of the Client for specific application to the Site detailed in this Agreement. Any third party use of any drafts, reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents, advice or opinion of Cornerstone is the sole responsibility of the Client.

14. Insurance

- 14.1 Cornerstone, its officers, directors, employees and agents have and shall maintain during the term of this Agreement insurance in the following types: (a) Worker’s Compensation Insurance; (b) Employer’s Liability Insurance; (c) Commercial General Liability Insurance (GLI); and (d) Professional Liability Insurance.
- 14.2 Cornerstone shall, at the Client’s request, provide the Client with a certificate of insurance or other satisfactory evidence that such insurance has been obtained and are maintained in force through the term of this Agreement. Any additional insurance policy or increase in the coverage of existing insurance required by the Client shall constitute an additional expense under this Agreement, and the Client shall reimburse Cornerstone for any additional premiums and costs incurred by Cornerstone in connection with obtaining such additional insurance.

15. Prevailing Wage Obligations

- 15.1 The Client shall notify Cornerstone in writing if the Work contemplated by this Agreement constitutes a “public work” under any and all federal, state and/or local prevailing wage laws, and/or living wage laws, including but not limited to the Davis-Bacon Act and the provisions of California Labor Code §§ 1720 *et seq.* In addition, the Client shall notify Cornerstone if Cornerstone is obligated by statute, any public contracting authority and/or a developer to pay prevailing wages and benefits and/or any predetermined wages or benefits (collectively, “prevailing wage obligations”). In the event that Cornerstone must adhere to federal, state and/or local prevailing wage obligations for the Work performed, the Client shall provide Cornerstone with any and all prevailing wage determinations applicable to the Work to be performed under this Agreement. Any prevailing wage obligations might affect the payment terms contemplated by this Agreement and thus constitute a changed condition mandating renegotiation and/or termination of this Agreement. The Client understands and agrees that Cornerstone will rely on the representations made by the Client with regard to prevailing wage obligations and the Client agrees to indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney’s fees and legal costs, arising from Cornerstone’s reliance upon the Client’s representations regarding prevailing wage obligations.

16. Limitations—THIS CLAUSE LIMITS CORNERSTONE’S LIABILITY

- 16.1 Cornerstone shall not be responsible for the validity or accuracy of data collected by others or for interpretations made by others.
- 16.2 Cornerstone’s relationship with the Client under this Agreement shall be that of an independent contractor. Nothing in this Agreement shall be construed to designate Cornerstone, its officers, directors, employees, agents and/or subcontractors as employees, agents, joint ventures or partners of the Client. Cornerstone shall have no authority to bind, commit or obligate the Client in any manner and shall not hold itself out to third parties as being capable of doing so.
- 16.3 The Client and Cornerstone have discussed the risks and rewards associated with this project, as well as Cornerstone’s fee for services. After negotiation, the Client and Cornerstone have expressly agreed to allocate certain of the risks so that, to the fullest extent permitted by law, the total aggregate liability of Cornerstone, its officers, directors, employees, agents and subcontractors to the Client and all third-parties is limited to \$50,000 or the amount of Cornerstone’s fee, whichever is greater, for any and all injuries, damages, claims, losses, expenses, or claim expenses (including attorney’s fees) arising out of this Agreement from any cause or causes. Such causes include but are not limited to Cornerstone’s negligence, errors, omissions, strict liability, breach of contract or breach of warranty. In no event shall Cornerstone, its officers, directors, employees, agents and/or subcontractors be liable in contract, tort, strict liability, warranty or otherwise, for any special, incidental or consequential damages, such as but not limited to delay, disruption, loss of product, loss of anticipated profits or revenue, loss of use of any equipment or system, non-operation or increased expense of operation of any equipment or systems, cost of capital, or cost of purchase or replacement equipment systems or power.
- 16.4 Notwithstanding any other provision of this Agreement , the total aggregate liability of Cornerstone, its officers, directors, employees, agents and subcontractors to the Client and all third parties, including attorney’s fees awarded pursuant to this Agreement, for claims, damages or losses arising out of the treatment, transport, storage, discharge, dispersal or release of hazardous materials, shall be limited to \$50,000 or the amount of Cornerstone’s fee, whichever is greater and regardless of the legal theory under which liability is imposed.
- 16.5 For an additional 5% of Cornerstone’s total fee or \$500, whichever is greater, Cornerstone will raise the limitation of liability up to the amount that actually would be paid by Cornerstone’s insurance carriers if Client and Cornerstone initial below:

LIMITATION INCREASE: THE LIMITATION OF LIABILITY IS INCREASED TO THE ACTUAL AMOUNT PAID BY CORNERSTONE’S INSURANCE CARRIERS IN EXCHANGE FOR AN ADDITIONAL FEE OF 5% OF THE TOTAL SERVICE CHARGE OR \$500, WHICHEVER IS GREATER.

Client’s Initial	Date	Cornerstone’s Initial	Date

- 16.6 The Client shall indemnify, defend and hold harmless Cornerstone and its officers, directors, employees, agents and subcontractors from any and all damages, losses, or expenses, included but not limited to reasonable legal expenses and attorney’s fees connected therewith, sustained by Cornerstone, its officers, directors, employees, agents and subcontractors as a result of any and all claims, demands, suits, causes of action, proceedings, judgments and liabilities for property damage, statutory penalty and/or personal injury with respect to and arising out of the Client’s negligent acts, omissions or material breach of this Agreement. In the event a claim is the result of joint negligent acts or omissions of the Client and Cornerstone, the Client’s duty of indemnification shall be in proportion to its respective allocable share of the joint negligence.
- 16.7 Client acknowledges and agrees that in no event shall any action or proceeding be brought against Cornerstone or proceeding be brought against Cornerstone by Client or its assignees for any claim or cause of action arising from or in any way related to the Work or this Agreement unless such action or proceeding is commenced within three (3) years from the Date of Completion of Work provided by Cornerstone under this Agreement. The Date of Completion shall be the date of the final invoice for the Work performed under this Agreement.
- 16.8 If Client requests that Cornerstone’s work product be relied upon by a third party, including, but not limited to a lender, Client agrees to provide the third party with a copy of these terms and conditions, and Client agrees to require said third party to agree to limit Cornerstone’s total liability to Client and any third party as described in paragraph 16.4 and Client agrees to indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney’s fees and legal costs, arising from third party claims, damages, costs and losses arising our of or in any way related to Work.

17. Disputing Cornerstone’s Performance

- 17.1 Except as provided in Section 6 and Subsection 17.2 herein, if Cornerstone shall breach any provision herein, the Client shall notify Cornerstone within five (5) business days of the Client’s knowledge of such breach. Except as provided in Subsections 17.3 herein, upon receipt of the Client’s notice, Cornerstone shall have the option to take such corrective measures, if any, to remedy the breach, and shall notify the Client within five (5) business days after receipt of the

Client's notification of the corrective measures Cornerstone shall take and the estimated time period within which the corrective measures shall be taken. In no event shall Cornerstone be liable to the Client for any damages without being given a reasonable opportunity to remedy its breach as provided herein.

- 17.2 The Client shall make no claim for professional negligence unless the Client has first provided Cornerstone with a written certification executed by an independent Consultant currently practicing in the same discipline and locality as Cornerstone and licensed in the State of California. This certification shall (a) contain the name and license number of the certifier; (b) specify the acts or omissions that the certifier contends are not in conformance with the standard care for a Cornerstone performing professional services under similar circumstances; and (c) state in detail the basis for the certifier's opinion that such acts or omissions do not conform to the standard of care. This certificate shall be provided to Cornerstone no less than thirty (30) calendar days prior to the presentation of any claim or the institution of any mediation, arbitration or judicial proceeding.
- 17.3 Cornerstone agrees that upon receipt of written notice from the Client pursuant to Subsection 17.2 herein it will implement necessary corrections to the Work performed by Cornerstone that fails to conform to the standard of care that Cornerstone has accepted pursuant to Subsection 4.1, as mutually agreed in writing by the Parties as provided in Subsection 1.1. herein, if such written notice is received within one (1) year of the performance of the Work failing to conform to Subsection 4.1. If Cornerstone has been paid by the Client for such Work, Cornerstone shall perform the corrections at its own expense. If Cornerstone has not been paid by the Client for such Work, and the Work is subsequently corrected to conform with the standard of care that Cornerstone has accepted pursuant to Subsection 4.1, the Client shall pay Cornerstone in accordance with Section 3 herein.
- 17.4 In no event shall Cornerstone, its officers, directors, employees, agents and/or subcontractors be liable for any special, incidental or consequential damages, such as but not limited to delay, disruption, loss of product, loss of anticipated profits or revenue, loss of use of any equipment or system, non-operation or increased expense of operation of any equipment or systems, cost of capital, or cost of purchase or replacement equipment systems or power, or any other incidental, special, indirect or consequential damages of any kind or nature whatsoever resulting from Cornerstone's performance or failure to perform the Work in accordance with the standard of care that Cornerstone has accepted pursuant to Subsection 4.1.

18. Termination

- 18.1 Cornerstone shall have the right to terminate this Agreement ten (10) business days after written notice is sent to the Client if (a) the Client fails to pay any of Cornerstone's undisputed invoices within sixty (60) days from the date of the invoice; or (b) Cornerstone's attached proposal and/or the Work was based upon misinformation, whether by the Client or a third party, or upon information not fully disclosed to Cornerstone, whether by the Client or a third party.
- 18.2 Except as provided for in Section 6, and after compliance with Section 17, the Client shall have the right to terminate this Agreement ten (10) business days after written notice is sent to Cornerstone if Cornerstone fails to comply in any material respect with any of the material provisions herein and subsequently fails to notify the Client pursuant to Subsections 17.1 and 17.3 of the corrective measures Cornerstone intends to take.
- 18.3 The termination of this Agreement by Cornerstone under Subsection 18.1 herein, or by the Client under Subsection 18.2 herein, shall not relieve the Client of its obligations to pay Cornerstone for any of the Work performed and expenses incurred as of the date of termination, and shall not constitute a waiver by Cornerstone or the Client of any cause of action for breach of this Agreement or any provision herein.

19. Aerial Drone and GPS Services

- 19.1 Aerial drone or global positioning system hand-held meters (gps) technology can provide data both more quickly and relatively accurately as it relates to property conditions and construction issues at the project. Cornerstone may utilize "unmanned aerial vehicles" (UAVs) or gps to assist its personnel in providing information to Client about the project. However, Cornerstone does not utilize such data and does not intend Client to infer that such data could be used to replace or to perform in-lieu of a site survey performed by a licensed civil engineer or licensed land surveyor. Although the mapping data can be relatively accurate, especially when calibrating to known onsite surveyed (*controlled*) points provided by the project civil engineer/land surveyor, the accuracy of such data cannot be guaranteed, and such data is strictly intended for use by Cornerstone as part of their investigation. Client agrees not to rely, use, disseminate, or otherwise share such data provided through Cornerstone's use of UAVs or gps with third parties unless expressly authorized in writing by Cornerstone or to comply with legal mandates. The level of accuracy and data should not be used for anything beyond informational purposes only relating to site grading or construction activities or tasks Cornerstone agrees to undertake in writing pursuant either to this Agreement and/or any amendment thereto.
- 19.2 Client expressly acknowledges and understands that the process of locating any fixed works designed by a civil engineer or determining alignments or elevations is required by California law to be performed by, or under the responsible charge of, persons licensed to perform land surveying by the State of California. Client agrees and understands that data acquired by Cornerstone through the use of UAVs or gps cannot be used for locating fixed works designed by a civil engineer, determining alignments or elevations, or performing other tasks that a licensed civil engineer and/or land surveyor must perform. Client agrees to defend, indemnify, and hold harmless Cornerstone from any and all claims, liabilities, and damages arising out of and/or relating to any third party's use and/or misuse of data gathered by Cornerstone through the use of UAVs for any purpose other than what Cornerstone describes in writing to Client. Client expressly acknowledges that data gathered by Cornerstone through the use of UAVs and gps does not represent either a topographical survey and/or an overlay of a boundary on an orthogonally rectified photo, and such work product must be prepared and certified by a licensed civil engineer and/or land surveyor.

20. CADD Files

- 20.1 In accepting and utilizing any drawings or other data on any form of electronic media generated and provided by Cornerstone, Client agrees that all such drawings are instruments of professional service by Cornerstone, who shall be deemed the author of the drawings and data, and shall retain all common law, statutory law and other rights, including copyrights. The electronic files submitted by Cornerstone to the Client are submitted for an acceptance period of 60 days. Any defects the Client discovers during this period will be reported to Cornerstone and will be corrected as part of Cornerstone's Scope of Services. The Client further agrees not to use these drawings and data, in whole or part, for any purpose or project other than the project which is subject of this Agreement. The Client agrees to waive all claims against Cornerstone resulting in any way from any unauthorized changes or reuse of the drawings and data for any other project by anyone other than Cornerstone. In addition, the Client agrees, to the fullest extent permitted by law, to indemnify and hold Cornerstone harmless from any damage, liability, or cost, including reasonable attorney's fees and costs of defense, arising from any changes made by anyone other than Cornerstone or from any reuse of the drawings and data without the prior written consent of Cornerstone.

21. Miscellaneous Provisions

- 21.1 "Indemnity Defined." The term "indemnify" shall mean indemnify, defend and hold harmless from and against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney's fees and all legal costs incurred on appeal, and all interest thereon, accruing or resulting to any and all persons, firms, or any other legal entities, on account of any damages or losses to property or persons, including death or economic losses, arising out of the item, matter, action or inaction specified in the specific provision.
- 21.2 "Choice of Counsel." In any circumstance whereby Cornerstone is entitled to indemnification by the Client, Cornerstone shall have the right to select counsel of its choosing.
- 21.3 "Successors and Assigns." This Agreement shall be binding upon and inure to the benefit of the Parties and their successors and assigns as provided herein. The Client shall not assign, sell, transfer or subcontract this Agreement or any interest herein without the prior written consent of Cornerstone. Cornerstone shall not assign, sell, transfer or subcontract this Agreement or any interest herein without the prior written consent of the Client. The Client hereby consents to the subcontracting of those portions of the Work as the attached proposal herein indicates are or will be subcontracted. Notwithstanding the above, Cornerstone shall have the right to assign monies due hereunder for the Work performed and expenses incurred.

- 21.4 Third Party Beneficiaries. The Parties agree that this Agreement is not intended by either Cornerstone or the Client to give any benefits, rights, privileges, actions or remedies to any person or entity, partnership, firm or corporation as a third party beneficiary or otherwise under any theory of law, that is not a signatory to this Agreement.
- 21.5 Survival. In order that the Parties may fully exercise their rights and perform their obligations arising from the performance of this Agreement, any provisions of this Agreement that are necessary to ensure such exercise or performance shall survive the termination of this Agreement.
- 21.6 Severability. If any part, term or provision of this Agreement shall be held illegal, unenforceable or in conflict with any federal, state or local law having jurisdiction over this Agreement, the validity of the remaining parts, terms or provisions of this Agreement shall not be affected thereby.
- 21.7 Choice of Law and Venue. This Agreement shall be governed by California law. The venue for any legal action brought pursuant to this Agreement shall be located within the County of Santa Clara, State of California.
- 21.8 Publicity. Unless otherwise mutually agreed in writing by the parties as provided in Subsection 1.1, Cornerstone may use and publish the Client's name and a general description of Cornerstone's services with respect to the Work in describing Cornerstone's experience and qualifications to other clients or prospective clients.
- 21.9 Signatories. Each undersigned representative of the Parties to this Agreement certifies that he or she is fully authorized to enter into the terms and conditions of this Agreement and to execute and legally bind such Party to this document.
- 21.10 Corporate Protection. It is intended by the parties to this Agreement that Cornerstone's services in connection with the Work shall not subject Cornerstone's individual employees, officers or directors to any personal legal exposure for the risks associated with this Project. Therefore, and notwithstanding anything to the contrary herein, the Client agrees that as the Client's sole and exclusive remedy, any claim, demand or suit shall be directed and/or asserted only against Cornerstone, a California Corporation, and not against any of Cornerstone's individual employees, officers or directors.
- 21.11 Code Compliance. Cornerstone shall exercise usual and customary professional care in its efforts to comply with applicable laws, codes and regulations as of the date of this Agreement.
- 21.12 Quotation. Unless stated in writing, this quotation shall not remain in effect after thirty (30) days of the Proposal date.
- 21.13 Contractors State License. Cornerstone maintains a General Engineering A license (No. 905816) with a Hazardous Substances Removal and Remedial Actions Certification with the State of California, which are regulated by the Contractors State License Board. Any questions concerning a contractor may be referred to the Registrar, Contractors State License Board, P.O. Box 26000, Sacramento, California 95826.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/27/2022 has revealed that there are 5 NPL sites within approximately 1.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>INTEL MAGNETICS</i> Cerclis ID:: 901661 EPA Id: CAD092212497	<i>3000 OAKMEAD VILLAGE</i>	<i>W 1/8 - 1/4 (0.171 mi.)</i>	<i>0</i>	<i>234</i>
<i>MONOLITHIC MEMORIES</i> Cerclis ID:: 901398 EPA Id: CAD049236201	<i>1165 E ARQUES AVE</i>	<i>WNW 1/2 - 1 (0.914 mi.)</i>	<i>0</i>	<i>253</i>

Lists of Federal Delisted NPL sites

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 10/27/2022 has revealed that there

EXECUTIVE SUMMARY

is 1 Delisted NPL site within approximately 1.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
INTEL CORP. (SANTA C) EPA ID:: CAT000612184 Site ID:: 902632	2880 NORTHWESTERN PK	SE 1/4 - 1/2 (0.291 mi.)	P416	2110

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/27/2022 has revealed that there are 6 SEMS sites within approximately 0.75 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there are 15 SEMS-ARCHIVE sites within approximately 0.75 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/21/2022 has revealed that there are 3 CORRACTS sites within approximately 1.25 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 15 RCRA-LQG sites within approximately 0.5 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 08/15/2022 has revealed that there are 4 US INST CONTROLS sites within approximately 0.75 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/25/2022 has revealed that there are 70 CA ENVIROSTOR sites within approximately 1.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 10 CA UST sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 CA SWEEPS UST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CA SPILLS 90: Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

A review of the CA SPILLS 90 list, as provided by EDR, and dated 06/06/2012 has revealed that there are 9 CA SPILLS 90 sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 77 RCRA NonGen / NLR sites within approximately 0.5 miles of the target property.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, has revealed that there are 2 HIST FTTS sites within approximately 0.25 miles of the target property.

PFAS RCRA MANIFEST: To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

A review of the PFAS RCRA MANIFEST list, as provided by EDR, and dated 01/03/2022 has revealed that there are 2 PFAS RCRA MANIFEST sites within approximately 0.5 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there are 38 PFAS ECHO sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 34 CA CUPA Listings sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2021 has revealed that there are 93 CA HAZNET sites within approximately 0.25 miles of the target property.

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CA CERS list, as provided by EDR, and dated 07/18/2022 has revealed that there are 37 CA CERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.375 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

CA RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the CA RGA LUST list, as provided by EDR, has revealed that there are 6 CA RGA LUST sites within approximately 0.25 miles of the target property.

Address: 3065 BOWERS AVE
City,State,Zip: SANTA CLARA, CA 95054
Site ID: 124491
CERS ID: 10087228
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 124491
Site Name: INTEL - SC2
Violation Date: 11-16-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: "Failure to prepare an SPCC Plan which fulfills all basic requirements that include: 1. The SPCC Plan must be prepared in accordance with good engineering practices. 2. Have full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC Plan. 3. Prepare the SPCC Plan in writing. 4. Follow the sequence of the SPCC rule or include a cross-reference. 5. If the SPCC Plan calls for additional procedures, methods, or equipment not yet fully operational, discuss the items in separate paragraphs."

Violation Notes: Returned to compliance on 02/15/2019.
Violation Division: Santa Clara City Fire Department
Violation Program: APSA
Violation Source: CERS,

Site ID: 124491
Site Name: INTEL - SC2
Violation Date: 11-16-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.

Violation Notes: Returned to compliance on 02/15/2019. 1) Plan does not identify the appropriate qualifications for personnel performing tests and inspections, the industry standard which is to be used, and does not account for container size, configuration, and design. Plan only states that horizontal belly tanks on the generators are shop constructed and shall be inspected and integrity tested every 15-20 years, unless equivalence tank environmental protection of the tanks can be demonstrated by a registered engineer.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 11/27/2018. Hazardous Materials Inventory does not include the hazardous waste treatment system tanks and all hazardous waste streams above reportable thresholds (e.g. 55 gallon drum of used ethylene glycol). Report liquefied compressed gases (e.g. liquified petroleum gas) are reported in the physical state in which they are stored (liquid; gallons). Universal waste-electronic devices is incorrectly reported in cubic feet, rather than pounds.

Violation Date: 11-16-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to ensure the following before allowing drainage of uncontaminated rainwater from diked area into a storm drain or discharge of an effluent into an open watercourse, lake, or pond, bypassing the facility treatment system: 1. Keep bypass valve normally sealed closed. 2. Inspect the retained rainwater 3. Open and reseal bypass valves under responsible supervision.

Violation Notes: Returned to compliance on 02/15/2019. A diked area is used for sized secondary containment around Tank G-3 and a manual valve is used for liquid removal, but the Plan does not discuss an inspection and drainage procedures

Site Name: INTEL - SC2
Violation Date: 11-16-2018
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if the waste generated is a hazardous waste.
Violation Notes: Returned to compliance on 11/29/2018. During inspection and in the tank system assessment, 30% hydrogen peroxide from clean rinse and R&D is identified as being directed to the AWN systems. A hazardous waste determination to identify whether the hydrogen peroxide meets the narrative definition of oxidizer [22CCR 66261.21(a)(4)] has not been conducted. Note that over 8% hydrogen peroxide meets the DOT definition of oxidizer. Determine if the waste hydrogen peroxide meets the hazardous waste definition of oxidizer. Submit documentation of the hazardous waste determination to SCFD for review.

Site Name: INTEL - SC2
Violation Date: 11-16-2018
Citation: 22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)
Violation Description: Failure to maintain the required documents, including waste analysis plan, contingency plan, training documents, Phase I Environmental Assessment, written inspections schedules, etc. at the facility where the FTU is operating and upon request make these documents available to the authorized agency, DTSC, the CUPA, or EPA, or local government agency.
Violation Notes: Returned to compliance on 11/28/2018. The Waste Analysis Plan does not identify the parameters for which each hazardous waste stream will be analyzed and the rationale for the selection of these parameters, the test methods which will be used to test for these parameters, the sampling and management methods which will be used to obtain a representative sample of the waste to be analyzed (Appendix I of Chapter 11 22CCR or an equivalent sampling method), and the frequency

Name: INTEL - M2
Address: 3065 BOWERS AVE
City,State,Zip: SANTA CLARA, CA 95054
Site ID: 124489
CERS ID: 10127311
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 124489
Site Name: INTEL - M2
Violation Date: 03-10-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 03/11/2020. Hazardous material inventory site map submitted on March 9 and March 10, 2020 is incomplete. During the inspection, an Uninterrupted Power Supply (UPS) room with sulfuric acid (in disclosable quantities) was observed at M2 West Yard. This should be on Figure 3, at GRID C1/D1/C2/D2 area. Please add the hazardous materials location on the site map and resubmit within 30 days of this inspection report. New site map was submitted during the inspection.

Violation Date: 03-10-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 03/11/2020. Hazardous material inventory submitted on March 9 and 10, 2020 is incomplete. During the inspection, observed disclosable quantities of sulfuric acid stored within the Uninterrupted Power Supply (UPS) room (within the battery bank). Please update the inventory in the California Environmental Reporting System (CERS) within 30 days of this inspection report. Facility submitted updated information into CERS during the inspection.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS AIR POLLUTANT MAJOR STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Waste Code:	D022
Waste Description:	CHLOROFORM
Waste Code:	D024
Waste Description:	M-CRESOL
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D038
Waste Description:	PYRIDINE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:	P078
Waste Description:	NITROGEN DIOXIDE (OR) NITROGEN OXIDE NO2
Waste Code:	P098
Waste Description:	POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)
Waste Code:	P105
Waste Description:	SODIUM AZIDE
Waste Code:	P106
Waste Description:	SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)
Waste Code:	P119
Waste Description:	AMMONIUM VANADATE (OR) VANADIC ACID, AMMONIUM SALT
Waste Code:	U002
Waste Description:	2-PROPANONE (I) (OR) ACETONE (I)
Waste Code:	U003
Waste Description:	ACETONITRILE (I,T)
Waste Code:	U006
Waste Description:	ACETYL CHLORIDE (C,R,T)
Waste Code:	U007
Waste Description:	2-PROPENAMIDE (OR) ACRYLAMIDE
Waste Code:	U014
Waste Description:	AURAMINE (OR) BENZENAMINE, 4,4'-CARBONIMIDOYLBIS[N,N-DIMETHYL-
Waste Code:	U031
Waste Description:	1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)
Waste Code:	U039
Waste Description:	P-CHLORO-M-CRESOL (OR) PHENOL, 4-CHLORO-3-METHYL-
Waste Code:	U052
Waste Description:	CRESOL (CRESYLIC ACID) (OR) PHENOL, METHYL-
Waste Code:	U057
Waste Description:	CYCLOHEXANONE (I)
Waste Code:	U080
Waste Description:	METHANE, DICHLORO- (OR) METHYLENE CHLORIDE
Waste Code:	U092
Waste Description:	DIMETHYLAMINE (I) (OR) METHANAMINE, N-METHYL- (I)
Waste Code:	U109
Waste Description:	1,2-DIPHENYLHYDRAZINE (OR) HYDRAZINE, 1,2-DIPHENYL-
Waste Code:	U123
Waste Description:	FORMIC ACID (C,T)

Federal Waste Generator Description: Large Quantity Generator
State District Owner: Not reported
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 20040226
Handler Name: INTEL CORPORATION - BOWERS CAMPUS
Federal Waste Generator Description: Large Quantity Generator
State District Owner: Not reported
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110070087568

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate

Summary Details:

Conditions at proposal October 15, 1984): Intel Magnetics produces and tests magnetic products and bubble memories at a plant in Santa Clara, Santa Clara County, California. The facility occupies approximately 1 acre and is surrounded by industrial and business areas. Monitoring wells on the site are contaminated with 1,1,1-trichloroethane, trichlorofluoromethane, 1,1-dichloroethylene, and trichloroethylene, according to analyses conducted by a consultant to Intel. Contamination is believed to have resulted from leaking tanks. About 300,000 people depend on wells within 3 miles of the site as a source of drinking water. Intel is working with the California Regional Water Quality Control Board (CRWQCB) to determine the extent of contamination of ground water and soils. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status June 10, 1986): The company has installed a system to pump and treat contaminated ground water. CRWQCB, in conjunction with EPA and the California Department of Health Services, is overseeing response actions at the site.

Background Info: Intel Corporation operates a microprocessor testing facility at this one-acre site. The site is located adjacent to other industrial and commercial development. Chemicals used in the manufacturing process and wastes generated from this process were handled and stored onsite in drums and in an underground storage tank.
Soil and shallow groundwater at the site are contaminated with trichloroethane (TCA), trichloroethylene (TCE), Freon-113, dichloroethane (DCA), and dichloroethylene (DCE). Approximately 300,000 people residing within a three-mile radius of this site depend on local groundwater for their drinking water. This groundwater is derived from a deep aquifer.
While there are no reported impacts on public or private wells, four City of Sunnyvale municipal wells and twenty of the twenty-seven City of Santa Clara municipal wells are located within a three-mile radius of the site. The closest municipal well to the site is City of Santa Clara Well #21. This well is located approximately 2800 feet from the nearest contaminated monitoring well.

Summary Details:

Conditions at proposal October 15, 1984): Monolithic Memories, Inc., manufactures integrated circuits at a plant in Sunnyvale, Santa Clara County, California. The facility occupies about 20 acres and is surrounded by residential, industrial, and business areas. Monitoring wells on the site are contaminated with xylene, chloroform, and trichloroethylene, according to analyses conducted by a consultant to the company. Contamination is believed to have resulted from leaking underground storage tanks. About 300,000 people depend on wells within 3 miles of the site as a source of drinking water. Monolithic Memories has stopped using the underground tanks and is presently working with the California Regional Water Quality Control Board (CRWQCB) to characterize the extent of ground water contamination. The plant received Interim Status under Subtitle C of the Resource Conservation and Recovery Act (RCRA) when the company filed Part A of its permit application. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status February 1986): Under the direction of CRWQCB, the company has commenced a program of pumping and treating ground water to contain the plume while the remedial investigation is underway. CRWQCB, in conjunction with EPA and the California Department of Health Services, is overseeing the various response actions. This site remains in proposed status until EPA implements the appropriate elements of its final policy for placing RCRA-related sites on the NPL and then applies the policy to this site. Status July 22, 1987): Subsequent investigation revealed that this site is not subject to the Subtitle C permitting requirements of RCRA. Its score on the Hazard Ranking System,

APPLIED MATERIALS (Continued)

1000284775

Conditions at proposal October 15, 1984): Applied Materials produces equipment for manufacturing wafers for the electronics industry at a plant in Santa Clara, Santa Clara County, California. The facility occupies about 2.5 acres and is surrounded by business and industrial areas. Monitoring wells on the site are contaminated with Freon 113, tetrachloroethylene, 1,1,1-trichloroethane, 1,1-dichloroethylene, and trichloroethylene, according to analyses conducted by a consultant to Applied Materials. Contamination is believed to have resulted from leaking tanks. About 300,000 people depend on wells within 3 miles of the site as a source of drinking water. Applied Materials is working with the California Regional Water Quality Control Board (CRWQCB) to determine the extent of contamination of ground water and soils. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. The plant received Interim Status under the Resource Conservation and Recovery Act (RCRA) when the company filed Part A of a permit application. Status January 1986): The company has installed and is operating a system to pump and treat contaminated ground water. CRWQCB, in conjunction with EPA and the California Department of Health Services, is overseeing response actions at the site. Site investigations and cleanup continue to be regulated by the board's Waste Discharge Requirements. This site remains in proposed status until EPA implements the appropriate elements of its final policy for placing RCRA-related sites on the NPL and then applies the policy to this site. Status July 22, 1987): Subsequent investigation revealed that this site is not subject to the Subtitle C permitting requirements of RCRA. Its score on the Hazard Ranking System, which EPA uses to evaluate sites for the NPL, is above the cutoff point of 28.50, and EPA received no information that prevents placing the site on the NPL. Therefore, it is being placed on the NPL.

Category as of 08/2019:

NPL Status: Currently on the Final NPL
Category Description: Depth To Aquifer-> 100 Feet
Category Value: 240

NPL Status: Currently on the Final NPL
Category Description: Distance To Nearest Population-> 0 And <= 1/4 Mile
Category Value: 10

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

TSCA SUBMITTER

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

SUPERFUND NPL

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at proposal October 15, 1984): National Semiconductor Corp. manufactures electronic equipment at a plant in Santa Clara, Santa Clara County, California. The facility occupies about 50 acres and is surrounded by residential, industrial, and business areas. Monitoring wells on the site are contaminated with vinyl chloride, trichloroethylene, and 1,1-dichloroethylene, according to analyses conducted by a consultant to National Semiconductor Corp. Contamination is believed to have resulted from leaking underground storage tanks. The same contaminants have been detected in monitoring wells off the facility. About 300,000 people depend on wells within 3 miles of the site as a source of drinking water. National Semiconductor has taken the leaking tanks out of service and is working with the California Regional Water Quality Control Board (CRWQCB) to determine the extent of ground water contamination. This is one of 19 sites in the SouthBay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status February 1986): Under the direction of CRWQCB, the company has commenced a program of pumping and treating ground water to contain the plume while the remedial investigation is underway. CRWQCB, in conjunction with EPA and the California Department of Health Services, is overseeing the various response actions. EPA believes that it may be possible to clean up this site under Subtitle C of the Resource Conservation and Recovery Act (RCRA). This site remains in proposed status until EPA implements the appropriate elements of its final policy for placing RCRA-related sites on the NPL and then applies the policy to this site. Status July 22, 1987): Subsequent investigation revealed that this site is not subject to the Subtitle C permitting requirements of RCRA. Its score on the Hazard Ranking System, which EPA uses to evaluate sites for the NPL, is above the cutoff point of 28.50, and EPA received no information that prevents placing the site on the NPL. Therefore, it is being placed on the NPL.

Waste Description:	1,1-DICHLOROETHYLENE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Longitude: -121.998689174652
Case Type: Cleanup Program Site
Case Worker: MJD
Local Agency: Not reported
RB Case Number: 43S0084
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Benzene, Xylene, * Volatile Organic Compounds (VOC)
Site History: Background: National Semiconductor Corporation (NSC) is located at 2900 Semiconductor Drive, Santa Clara. The NSC site is bordered by Central Expressway to the north, Kifer Road to the south, Lawrence Expressway to the east, and industrial/commercial buildings to the west. The site encompasses approximately 60 acres. NSC occupied the site and began manufacturing semiconductors in 1967. Semiconductor manufacturing ceased in 1999, and the site currently is used for research and development and general corporate administration. Volatile organic compounds (VOCs) have been used for semiconductor manufacturing at this site. The Regional Water Quality Control Board (Water Board) is the lead regulatory agency overseeing soil and groundwater investigation and cleanup activities at this Site. Site Investigation: NSC conducted an initial assessment of soil and groundwater conditions at the site in 1982. Soil and groundwater samples were collected adjacent to underground solvent tanks. Chemical analyses of these samples indicated that VOCs, including trichloroethene (TCE), tetrachloroethene (PCE) and their degradation products, had impacted soil and groundwater in these areas. Extensive subsequent investigations confirmed that VOCs have impacted soil at the site and the two uppermost aquifers to a depth of approximately 60 feet. Contamination from other nearby VOC release sites have also commingled with the NSC plume. The commingled plume extends north to U.S. Highway 101, west to Santa Trinita Avenue and east to Lakeside Drive. Groundwater monitoring is conducted annually to assess the lateral and vertical extent of VOCs in groundwater and evaluate the effectiveness of the remediation systems currently operating. The latest monitoring event consisted of measuring groundwater levels in 199 monitoring and extraction wells and collecting and analyzing groundwater samples from 80 monitoring and extraction wells. In 2004, a Focused Risk Assessment was completed at the NSC site to evaluate potential intrusion of VOC vapors from groundwater into buildings at the site and the potential risks posed by vapor intrusion to human health. The results of the assessment indicated that VOC vapor intrusion is not occurring at NSC. While VOC concentrations in shallow groundwater exceed cleanup standards, the deeper drinking water aquifers have not been affected by the contamination. Drinking water is provided to the site and the surrounding areas through municipal water supply companies. Site Cleanup Activities: Cleanup measures implemented at the NSC site since the mid-1980s including source removal, soil excavation, groundwater extraction and treatment, soil vapor extraction (SVE), and ozone sparging. Residual VOCs are present in the groundwater, but have been significantly reduced from historical highs exceeding 100,000 micrograms per liter (%g/L) to concentrations that are generally less than 500 %g/L. NSC continues extensive groundwater remediation with a network of on-site

and off-site extraction wells and treatment systems and on-site SVE and ozone sparging systems. The remediation systems are effective in preventing the spread of VOCs and reducing VOCs in soil and groundwater, and are currently removing over 200 pounds of VOCs per year. Next Steps: Groundwater remediation and annual groundwater monitoring and reporting will continue for the foreseeable future. NSC regularly evaluates the effectiveness of its remediation systems and reports the results to the Water Board every five years. The next review is scheduled for October 2006.

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
SUPERFUND NPL
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that

these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS AIR POLLUTANT MAJOR STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.

Primary Waste: CNWTRS
Waste Type2: Not reported
Waste2: Contaminated Ground Water
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Scoring: 2

Summary Details:

Conditions at proposal June 24, 1988): Synertek, Inc. SI) manufactured electronics in five buildings on a 3.5-acre site at 3050 Coronado Boulevard in Santa Clara, Santa Clara County, California, from March 1978 to February 1985. SI, a subsidiary of Honeywell, Inc., operated a neutralization system consisting of three buried tanks during 1974-82. Building 1 is adjacent to the tank system, which was removed in April 1985. A buried tank for storing trichloroethylene TCE) and trichloroethane TCA) was installed in 1976 and removed in February 1985. According to California Regional Water Quality Control Board CRWQCB) files, the neutralization tank and solvent storage tank appear to have leaked. In 1985, Honeywell found TCE, TCA, and other chlorinated solvents in ground water on and off the site. Both the shallow and deep aquifers are contaminated. An estimated 300,000 people obtain drinking water from public wells within 3 miles of the site. Honeywell is constructing a single-well extraction system to pump contaminated ground water to the surface, route it through two air-stripping towers to remove contaminants, and discharge the treated water to the storm sewer. The discharge will be regulated under a permit issued by CRWQCB under the National Pollutant Discharge Elimination System. The pumping system is scheduled to be in operation shortly. Status October 4, 1989): Under CRWQCB orders, Honeywell is conducting a remedial investigation/feasibility study to determine the type and extent of contamination at the site and identify alternatives for remedial action. The work is meeting the schedule outlined in the orders. Honeywell plans to remove a large concrete neutralization tank in the near future.

Category as of 08/2019:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194
Violation Description: Failure to comply with general tank operating requirements: (a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail;. (b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: (1) spill prevention controls (e.g., check valves, dry discount couplings); (2) overflow prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and (3) maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., standby tank with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank).

Citation: 22 CCR 15 66265.192(k) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(k)

Violation Description: Failure to include all required information in the tank system assessment.

Violation Notes: Returned to compliance on 09/02/2020. All three tank system assessments include discrepancies, inaccuracies, and are incomplete. On-site assessor is Todd McWhorter. Registered Professional Engineer is Neal P. Hay (Civil, No. 55634) and assessments are signed and stamped on 3/13/2014. Used Antifreeze Tank: - The Certified Assessment Form (PE) for AST Systems identifies the AST as a double-walled tank in AST configuration and AST Primary vessel construction sections, but then identifies it as single-walled in the Design Standard and AST Secondary Containment sections. AST primary vessel construction also stated that Double wall tank not subject to steel thickness analysis. Note that tank is single-walled. - The tank contents are identified as Waste Coolant at the top of the assessment, but then described as waste oil in six places throughout the rest of the assessment. - Internal/External pump description says No pump, gravity feed but a pump is used to remove the waste from the tank (truncated)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

WDS:
 Name: 3050 BOWERS APPLIED MAT. B1
 Address: 3050 BOWERS AVE Building 1
 City: SANTA CLARA
 Facility ID: San Francisco Bay 438152001
 Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
 NPDES Number: CAG912003 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
 Subregion: 2
 Facility Telephone: 4085635151
 Facility Contact: ALICIA COLLINS
 Agency Name: GLOBAL ENVIRON SAFETY&HEALTH
 Agency Address: 3050 BOWERS AVE M/S 2763
 Agency City,St,Zip: SANTA CLARA 95054
 Agency Contact: ALICIA COLLINS
 Agency Telephone: 4085635151
 Agency Type: Private
 SIC Code: 3573
 SIC Code 2: Not reported
 Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
 Primary Waste: CNWTRS
 Waste Type2: Not reported
 Waste2: Contaminated Ground Water
 Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: Producer-User: Reclamation requirements that have been issued to a producer of reclaimed water who also uses the product.
 POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
 Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 02/05/2016
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective actions. Applied Materials, Inc. began operations in the building on the Site (Building 1) in 1970 as a semi-conductor wafer manufacturing facility. Applied Materials discovered volatile organic compounds downgradient from three underground storage tanks in November 1983 and implemented a full-scale groundwater monitoring, extraction, and treatment program in 1985. The United States Environmental Protection Agency (EPA) included the Site on the National Priorities List in 1987. EPA signed Records of Decision in 1990 and 1993. Groundwater extraction and treatment and institutional controls were selected as the remedy for groundwater. Groundwater extraction and treatment was implemented from 1985 through 2002. The Regional Water Quality Control Board was the lead regulatory agency overseeing investigation and cleanup until transferring the Site back to EPA in 2006. Limited groundwater extraction and treatment was implemented from April 2014 through March 2015.
