CA BOND EXP. PLAN:
 Responsible Party: NPL SITE CLEANUP WORKPLAN
 Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: Applied Materials, the responsible party, has been conducting remedial activities under the direction of the RWQCB. DHS has budgeted \$50,000 for oversight and monitoring of the RP's cleanup activities. DHS will seek cost recovery for 100 percent of direct costs plus staff costs and overhead related to the project. The responsible party will pay all costs associated with site investigation and remediation.

Site Description: Applied Materials operates a semiconductor equipment manufacturing facility at this site. The site encompasses 9 acres and is surrounded by industrial and commercial development.

Hazardous Waste Desc: Soil and ground water contamination were reported in 1984. The source of contamination were two acid neutralization tanks and one waste solvent tank. The following contaminants have been detected in soil and ground water: trichloroethane (TCA), trichloroethylene (TCE), dichloroethylene (DCE), dichloroethane (DCA).

Threat To Public Health & Env: About 300,000 people living within 3 miles of the site depend on ground water as a source of drinking water. Contaminated ground water at the site represents a potential threat to the water supply system. City of Sunnyvale's municipal well, No. 21, is located 0.7 miles upgradient of the site.

Site Activity Status: In 1985, the underground tanks were removed and approximately 60 cubic yards of contaminated soil surrounding the tanks were removed. A ground water extraction system has been installed. The extracted water is treated and discharged to a storm sewer leading to a tributary to San Thomas Aquino Creek.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

SUPERFUND NPL

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Violations:

Site ID: 135006
Site Name: Microsemi PPG
Violation Date: 05-24-2018
Citation: 22 CCR 12 66262.20 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.20

Violation Description: Failure to prepare a Uniform Hazardous Waste Manifest and, if necessary, a Continuation Sheet, before the transport of a hazardous waste off-site for transfer, treatment, storage, or disposal.

Violation Notes: Used gold filters from electroplating process are being shipped to a TSDF, but are not being transported on a Uniform Hazardous Waste Manifest. The used filters are a F006 Hazardous Waste and require transport on a Uniform Hazardous Waste Manifest.

INTEL CORPORATION - MAGNETICS (Continued)

S100833410

Site Description: oversight and monitoring of the RP's cleanup activities. DHS will recover 100 percent of direct costs plus staff costs and overhead related to this project. Intel Corporation operates a microprocessor testing facility at this one acre site. The site is located adjacent to other industrial and commercial development. Chemical used in the manufacturing process and wastes generated from this process were handled and stored onsite in drums and in an underground storage tank.

Hazardous Waste Desc: Soil and shallow ground water at the site are contaminated with trichloroethane (TCA), trichloroethylene (TCE), Freon-113, dichloroethane (DCA) and dichloroethylene (DCE). The source of contamination has not been identified.

Threat To Public Health & Env: Approximately 300,000 people residing within a 3-mile radius of this site depend on local ground water for drinking water. This ground water is derived from a deep aquifer. It is not known if this deep aquifer is hydraulically connected to the contaminated shallow zone at the site. While there are no reported impacts on public or private wells, four City of Sunnyvale municipal wells and 20 of the 27 City of Santa Clara municipal wells are located within a 3-mile radius of the site. The closest municipal well to the site is City of Santa Clara well No. 21. This well is located approximately 2,800 feet from the nearest contaminated monitoring well.

Site Activity Status: An underground storage tank which was used to store solvents at the facility has been removed and a system of ground water monitoring and extraction wells has been installed. Contaminated ground water is currently being pumped at a rate of 12,000 gallons per day and is treated by carbon adsorption prior to discharge into the Calabasas Creek and the South San Francisco Bay. Intel Corporation has completed their investigation to characterize the nature and extent of ground water contamination. The RWQCB has concluded that contamination is mainly from sources off the site. The RWQCB has issued an order to conduct additional RI/FS work.

Environmental Interest/Information System:

HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 03/31/1993
Comments: The site is being overseen by the SFRWQCB pursuant to Order No. 91-119. The report which was the basis for this screening was produced pursuant to this order. The groundwater is contaminated with organic solvents. The following chemicals are listed followed by the highest result for the last round of analysis. (March or June '92): Dichloroethane(1.8 ppm), Dichloroethylene(13 ppm), Perchloroethylene(<2 ppm), Trichloroethane(17ppm), Trichloroethylene(140 ppm), and Freon 113(90ppm). VOC concentrations have decreased approximately 40 to 70 percent since groundwater extraction began in Jan. 1991. dn5

Violation Program: HMRRP
Violation Source: CERS,

Site ID: 145511
Site Name: Lin-Zhi International, Inc.
Violation Date: 11-12-2020
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 12/11/2020. Hazardous waste container in lab with accumulation date of 6/15/2019 is now being stored over a year, remove the waste and provide documentation to CUPA.

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
 US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
 US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1 Addendum
Completed Date: 06/08/2016
Comments: DTSC updated the site screening completed in 2014 based on new information included in a Facility Closure Report and provided by California Environmental Management Service Company, Inc., the consultant for Micro-Chem. Micro-Chem ceased operations in October 2015 and surface wipe samples and soil samples were collected in March and April 2016 as part of facility closure activities that were overseen by the City of Santa Clara Fire Department. One section of drywall was removed and disposed as hazardous waste due to copper (8,000 micrograms per wipe). The concentrations of lead, arsenic, and cyanide detected in soil samples were below the applicable DTSC screening levels or U.S. EPA Regional Screening Levels for residential (i.e. unrestricted) land use. The Santa Clara Fire Department signed off on both the final hazardous materials closure of the Micro-Chem facility and the final closure of the wastewater treatment unit that had been operated under permit-by-rule. The Site is located on a property that is part of the Intel Magnetics/Micro Storage Corporation (IM/MSC) Superfund Site, but Micro-Chem has not been identified by the U.S. Environmental Protection Agency as a responsible party for the IM/MSC Superfund Site. The updated site screening recommended a "No Further Action" status for the site/facility.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1 Addendum
Completed Date: 04/17/2014
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective actions. The U.S. Environmental Protection Agency (EPA) placed the Site on the National Priorities in May 1986. Groundwater at the Site is contaminated with volatile organic compounds, which is believed to have resulted from surface spills and a leak from an underground storage tank. EPA selected a remedy for the Site with

S103947954

groundwater pump and treat as the primary component in a 1991 Record of Decision. A groundwater extraction treatment system was operated until 1996 and monitored natural attenuation (MNA) has been the de facto remedy at the Site since system operation ceased. The Regional Water Quality Control Board was lead agency overseeing cleanup at the Site until July 2006, when EPA took over as the lead agency. EPA has not yet formally documented the change in the remedy to MNA in an Explanation of Significant Differences or ROD amendment. DTSC concluded that the site status should be "Refer to EPA".

Violations:

Site ID: 380252
Site Name: Coresite Real Estate 3032 Coronado, LP
Violation Date: 08-18-2020
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)

Violation Description: Failure to amend the SPCC Plan within 6 months: 1. When the facility has had a change in design, construction, operation, or maintenance which affects the facility s discharge potential. AND/OR 2. To include more effective proven technology at the time of the 5-year SPCC Plan review and evaluation.

Violation Notes: Returned to compliance on 08/26/2021. Added more tanks since 2016 and did not amend the tank form. Need a new form indicating total 2080 gals. Updated SPCC 2018 includes the additional 3 tanks. CL

Violation Division: Santa Clara City Fire Department
Violation Program: APSA
Violation Source: CERS,

Site ID: 380252
Site Name: Coresite Real Estate 3032 Coronado, LP
Violation Date: 08-19-2019
Citation: 23 CCR 16 2715(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(f)

Violation Description: Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).

Violation Notes: Returned to compliance on 10/24/2019. Sump 2 for tank 1 piping leaking diesel inside the sump. The fittings eappears to be leaking. Repair the leak and provide report of test. Corrected 10-24-19 gtr

Site Name: Coresite Real Estate 3032 Coronado, LP
Violation Date: 08-17-2017
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.
Violation Notes: Returned to compliance on 09/12/2017. For February, no alarms were recorded but printout had multiple alarms
Violation Division: Santa Clara City Fire Department
Violation Program: UST
Violation Source: CERS,

to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Overfill prevention equipment is an audible visual alarm set at 90% but the visual alarm activates but is not easily visible due to a cloudy cover. Replace the cover and retest to confirm that the audible capabilities are functioning.

Site Name: Coresite Real Estate 3032 Coronado, LP
Violation Date: 08-26-2021
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: DO monthly inspections since October 2020 except 6/2021, were not being acknowledged by the owner/operator within 72 hours of receiving the report from the DO. Discussed with the o/o that signed copies are maintained offsite. Provide signed copies to the requesting inspector for the last year.

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1 Addendum
Completed Date: 05/07/2014
Comments: In 1974, Synertek leased the Site for semiconductor manufacturing. The Site is currently occupied by Crystal Solar. Groundwater contamination was discovered at the Site in 1982. The identified sources of the groundwater contamination were solvent and neutralization tanks. The U.S. Environmental Protection Agency (U.S. EPA) listed the Site on the National Priorities List in 1989; however, the Regional Water Quality Control Board (RWQCB) has been overseeing the cleanup of the Site. Honeywell, who acquired Synertek in 1979, operated a groundwater extraction and treatment from 1987 to 2001, when a trial period of monitoring natural attenuation was begun. U.S. EPA's 2012 Fourth Five-Year Review stated that 1,1-TCA and Freon-113 were below cleanup standards in all wells. The Report concluded that TCE is the main contaminant of concern. The Five-Year Review recommended that alternative remedies be evaluated for the Site. The 2013 CH2M Hill Focused Feasibility Study recommended enhanced in-situ bioremediation followed by monitored natural attenuation. The Site's history indicates that it is actively being managed by U.S. EPA and RWQCB. In the site screening, DTSC made a "Refer to RWQCB" status recommendation.

RB Case Number: 43S1060
File Location: Not reported
Potential Media Affected: Not reported
Potential Contaminants of Concern: Not reported
Site History: No Water Board oversight of cleanup at this site. This case is included in Geotracker because the site is covered by the Water Boards NPDES general permits for discharges from pump and treat systems to surface waters (one each for fuels- and VOC-impacted sites). This can happen for two reasons: (i) the site is overseen by another agency (e.g., USEPA or DTSC) and needs coverage under one of the NPDES general permits or (ii) construction dewatering in an area of groundwater contamination necessitates NPDES general permit coverage. Including this case in Geotracker helps staff to receive and review required NPDES reports. Discharger received a Notice of Termination on March 12, 2009.

September 1989 and is currently under the oversight of the San Francisco Regional Water Quality Control Board.

Not reported

Synertek Inc, a subsidiary of Honeywell Inc, manufactured semiconductor products in the Synertek #1 facility from 1978 to 1988. Between 1974 and 1982, one 100-gallon solvent tank and three neutralization tanks were installed at the Site.

These tanks were found to be the source of the soil and groundwater contamination. The tanks and contaminated soil was removed in 1985. Groundwater is being remediated.

File Location: Regional Board
Potential Contaminants of Concern: * Volatile Organic Compounds (VOC)
Potential Media Affected: Other Groundwater (uses other than drinking water)
Site History: The pollutants released to groundwater at the site are the volatile organic compounds (VOCs), trichloroethene, dichloroethene, trichloroethene and several other VOCs. The VOC concentrations in groundwater have been significantly reduced through groundwater

extraction and treatment. The site is currently under monitored natural attenuation status. A pilot test of enhanced in-situ bioremediation (EISB) has been carried out. The results of the pilot test show that EISB is effective in breaking down VOCs. A proposal for expanding the EISB treatment to further reduce VOC concentrations in groundwater has been submitted.

Begin Date: 1982-11-01 00:00:00
 How Discovered: Site Assessment/Site Investigation
 How Discovered Description: Soil and groundwater sampled.
 Stop Method: Close and Remove Tank
 Stop Description: Underground solvent tank and three neutralization tanks excavated and removed.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Year: 2018
Gepaid: CAL000402725
TSD EPA ID: NVT330010000
CA Waste Code: 141 - Off-specification, aged or surplus inorganics
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As
Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 0.01000
Year: 2018
Gepaid: CAL000402725
TSD EPA ID: AZD081705402
CA Waste Code: 551 - Laboratory waste chemicals
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No
Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.01250
Year: 2018
Gepaid: CAL000402725
TSD EPA ID: MXC130619001
CA Waste Code: 343 - Unspecified organic liquid mixture
Disposal Method: H020 - Solvents Recovery
Tons: 1.90090
Year: 2018
Gepaid: CAL000402725
TSD EPA ID: NVT330010000
CA Waste Code: 122 - Alkaline solution without metals pH >= 12.5
Disposal Method: H039 - Other Recovery Of Reclamation For Reuse Including Acid
Regeneration, Organics Recovery Ect
Tons: 0.16680
Year: 2018
Gepaid: CAL000402725

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: DUPONT PHOTOMASKS
Address: 2920/2970 CORONADO DR.
City: SANTA CLARA
Facility ID: San Francisco Bay 431006914
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 2
Facility Telephone: 4084921900
Facility Contact: BOB MANSFIELD

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Comments: Phase I Environmental Site Assessment and Results of Phase II Subsurface Investigation report submitted by 3200 Coronado Drive LLC to meet the All Appropriate Inquiries requirement under the California Land Reuse and Revitalization Act.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: AB 389 Response Plan
Completed Date: 04/14/2017
Comments: The selected response action will be accomplished using one of two approaches, or a combination. Approach 1 would involve excavating and consolidating contaminated soil on-site, beneath the foundation of the proposed parking garage. Approach 2 would involve capping contaminated soil in place beneath buildings, parking structures, parking lots, or 2 feet of clean soil in landscaped areas. Under either approach, contaminated soil that cannot be readily accommodated on-Site due to available capacity or construction schedule may be off-hauled and disposed of at an appropriate permitted disposal facility.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SANTA CLARA, CA 95054

CA BOND EXP. PLAN S100833474
N/A

Site 38 of 51 in cluster H

Relative:
Higher
Actual:
43 ft.

CA BOND EXP. PLAN:
 Reponsible Party: RWQCB REFERRAL SITE
 Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: The Synertek site is proposed for the National Priority List. The RWQCB will continue to have lead responsibility for monitoring the RP's remedial activities. Until such time as the RWQCB refers the site to DHS for follow-up using Bond funds, no money will be budgeted from the fund for this site.
 Site Description: Synertek Buildings #1 and #3 are located near the intersection of Stender Way and Coronado Drive in Santa Clara. The site occupies about two acres and is surrounded by residential, industrial and commercial development.
 Hazardous Waste Desc: The volatile organic compounds present in the ground water at the site include trichloroethylene (TCE), trichloroethane (TCA), dichloroethane (DCA), dichloroethene (DCE), trans-1,2-dichloroethylene (DCE), vinyl chloride, Freon

113, acetone, xylenes, ethylbenzene, chloroethane, toluene, methyl ethyl ketone and methyl isobutyl ketone.

Threat To Public Health & Env: About 300,000 people living within 3 miles of the site depend on ground water as a source of drinking water. Contaminants which have migrated from the site into the ground water represent a potential threat to aquifers used for drinking water.

Site Activity Status: Soil borings in the vicinity of underground storage tanks indicated leakage from the tanks. In 1985, Honeywell (the owner of Synertek) removed underground collection, receiving and processing tanks. The tanks and contaminated soils were disposed of offsite. The RWQCB issued site cleanup requirements on July 15, 1987 for this site. In June, 1987 Honeywell began operating an onsite ground water extraction and treatment system.

groundwater extraction system was installed at the truck loading area and groundwater was extracted and concentrations of TCA significantly reduced. The extraction system was turned off when solvent concentrations reached asymptotic levels in the extracted groundwater. The sanitary sewer where PCE was released was excavated and replaced. The site was then put under monitored natural attenuation. It was closed in October 2011.

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 01/30/2020. Provide verification as unable to verify ICC cert for DO Elmer Mortera

Violation Description: 6.95, Section(s) 25508(a)(1)
Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 04/21/2017.
Violation Division: Santa Clara City Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 390572
Site Name: CoreSite Real Estate 2901 Coronado, L.L.C.
Violation Date: 11-17-2020
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 04/13/2021. DO monthly inspection report for February 2020 was not on site at time of inspection. The owner/operator did not acknowledge the DO monthly inspection report within 72 hours of receiving a copy from the DO. Discussed having this signed by one of the operators regardless of whether there is a finding observed by the DO. Note- 4/13/21-DO report in folder.

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CPS-SLIC:

Name: XES INCORPORATED
Address: 2805 BOWERS AVENUE
City,State,Zip: SANTA CLARA, CA 95051
Region: STATE
Facility Status: Completed - Case Closed
Status Date: 12/03/2015
Global Id: T10000008072
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: Not reported
Latitude: 37.37217
Longitude: -121.97638
Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: Not reported
RB Case Number: 43S0461
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Dichloroethane (DCA), Dichloroethene (DCE), Vinyl chloride, Freon
Site History: Not reported

APPLIED MATERIALS, BLDG 3 (Continued)

S128623174

Violation Description: Failure to continuously monitor the interstitial space of the tank, piping and/or sumps sump such that the leak detection activates an audible/visual alarm when a leak is detected.

Violation Notes: Returned to compliance on 01/06/2016. relay switch is not working to communicate with remote monitoring station

Violation Division: Santa Clara City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 385331
Site Name: APPLIED MATERIALS, BLDG 3
Violation Date: 12-19-2014
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)

Violation Description: Failure to maintain on site an approved monitoring plan.

Violation Notes: Returned to compliance on 01/05/2015. Provide UST plot map. Identify sensors in valve boxes, that SB989 testing is conducted, and VR failure turns off pumps.

Violation Division: Santa Clara City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 385331
Site Name: APPLIED MATERIALS, BLDG 3
Violation Date: 12-13-2013
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 12/19/2013. See letter to FM Automatic shutdown of tool is required for overfill protection when it is connected in the future.

Violation Division: Santa Clara City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 385331
Site Name: APPLIED MATERIALS, BLDG 3
Violation Date: 12-19-2014
Citation: HSC 6.7 25286(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25286(a)

Violation Description: Failure to submit an complete and accurate application for a permit to operate an underground storage tank, or for renewal of the permit.

Violation Notes: Returned to compliance on 01/05/2015. CERS should indicate there is a containment sump and isolation is used as corrosion protection.
