**SUBJECT: Phase I Environmental Site Assessment
5201 Patrick Henry Drive
Santa Clara, California
Langan Project No. 731769901**

Dear Ian Cunningham:

Langan Engineering and Environmental Services, Inc. (Langan) is pleased to submit this Phase I Environmental Site Assessment (ESA) for the property located at 5201 Patrick Henry Drive in Santa Clara, California (site).

In performing this Phase I ESA, we have endeavored to observe the degree of care and skill generally exercised by other consultants undertaking similar studies at the same time, under similar circumstances and conditions, and in the same geographical area.

The undersigned declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in #312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. We have developed and performed the all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

We appreciate the opportunity to assist you with this project. If you have any questions or need any information clarified, please call Mr. Jeffrey Ludlow at (415) 955-5200.

Sincerely yours,

Langan Engineering and Environmental Services, Inc.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
5201 Patrick Henry Drive
Santa Clara, California

E1.0 EXECUTIVE SUMMARY

Langan Engineering and Environmental Services, Inc. (Langan) has performed a Phase I Environmental Site Assessment (ESA) for the property located at 5201 Patrick Henry Drive in Santa Clara, California (site; Figure 1). The ESA was performed on behalf of DPR Construction (Client and User), which is under contract to purchase the site, in support of the Users' environmental due diligence phase of purchasing the site.

This Phase I ESA was conducted in substantial conformance with the American Society for Testing and Materials (ASTM) Practice E1527-13 (Standard Practice for ESA: Phase I ESA Process), and the United States Environmental Protection Agency's (USEPA) 2006 All Appropriate Inquiry (AAI) Rule (40 CFR Part 312). Completion of a Phase I ESA in accordance with the ASTM Practice and AAI Rule is needed to qualify for the bona fide prospective purchaser liability protections available under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA). The objective of this Phase I ESA was to identify the presence or likely presence, use, or release on the site of hazardous substances or petroleum products as defined in ASTM E1527-13 as a recognized environmental condition (REC).

E1.1 Site Description

The site is comprised of one property, 5201 Patrick Henry Drive in Santa Clara, California. 5201 Patrick Henry Drive (Santa Clara County Assessor's Parcel 104-50-004) is occupied by an asphalt surface parking lot and three-story concrete tilt-up commercial office building. The site is composed of one approximately 7.07 acre parcel (Figure 2). The site is bound by Galileo Pharmaceuticals Inc and a vacant commercial building to the north, Betsy Ross Road to the east, Bunker Hill Lane to the south, and Patrick Henry Drive to the west.

E1.2 Environmental Database and File Review

As part of the Phase I ESA, we have reviewed the environmental database report prepared by Environmental Data Resources, Inc. (EDR). The EDR report contains information from the environmental databases maintained by the USEPA, state, and local agencies within the ¼ to 1 mile search distance.

The address associated with the site was listed in FINDS, ECHO, HWTS, HAZNET, CERS, HIST UST, EMI, and RCRA NonGen/NLR databases. No spills or violations were reported on the site from previous operations involving the storage or handling of hazardous materials. Hazardous materials noted on-site include unspecified sludge waste in 2012 and oxygenated solvents (acetone, butanol, ethyl acetate etc.) in 2011.

EDR identified two historical underground storage tanks (USTs) on the site. The USTs were installed in 1979 and 1981 and are reported as used for waste. The 1979 UST had a capacity of 20 gallons and the 1981 UST had a capacity of 1,200 gallons. In the previous Phase I ESA prepared by AEI in June 2022, AEI proposes the 1979 20-gallon UST was a former grease trap due to conversations with the Owner and the presence of the grease interceptor on the site. Based on Santa Clara Fire Department (Fire Department) records, the 1980 W.F. Batton Office Building for the Dysan Corporation Final Bid Set Drawings, and conversations with the current Owner, the 1,200-gallon UST is likely a kitchen grease interceptor.

One 400-gallon diesel aboveground storage tank (AST), reported to be installed in 2008 for backup power generation, is currently on site. The AST is located within an 8-foot tall outdoor enclosure on the northeastern side of the building and does not have noticeable staining around the enclosure. Historical records from the Fire Department indicated annual inspections on the high level and secondary containment alarms need to be performed. No violations pertaining to the condition or use of the AST were identified.

Inquiries were made and records were searched at the California Department of Toxic Substances Control (DTSC), San Francisco Bay Regional Water Quality Control Board (RWQCB), County of Santa Clara, and City of Santa Clara regarding any additional files related to any fuel and hazardous materials leaks reported at the site. No additional relevant files were located at the time of this report. Based on our review of the neighboring properties, none of the off-site database listings represent possible presence, use, or release of hazardous substances or petroleum products that would result in contamination of soil and/or groundwater beneath the site and are not likely to represent a vapor encroachment concern (VEC) for the site. Relevant files are summarized below and in Section 4.0.

E1.3 Conclusions

Based on the databases searched by EDR, requests made for public documentation related to past or present environmental conditions at the site and surrounding area and our site reconnaissance, Langan has not identified any RECs associated with the site during this Phase I ESA.

De Minimis Conditions

De minimis conditions are defined by ASTM as environmental conditions that "generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." Possible environmental issues that in Langan's opinion are not likely historic, controlled or recognized environmental conditions but are de minimis conditions include the following at the site.

- Langan observed minor staining from site use as parking lots during the site reconnaissance.
- Lagan observed minor staining on flooring in the rooftop mechanical rooms, the first floor southeastern mechanical room, and the elevator service rooms.
- Langan observed minor staining in the third floor kitchen within a floor drain with evidence of corrosion.
- Records from the EDR report indicate historical use as agricultural land.

Recommendations

We recommend shallow soil sampling and analysis for pesticides, herbicides, and metals be conducted and a soil management plan be prepared prior to subsurface work involving soil excavation and off-site disposal. These tasks are needed to properly characterize the soils for disposal due to possible agricultural chemicals in the site soil resulting from historical agricultural use at the site.

1.0 INTRODUCTION

Langan Engineering and Environmental Services, Inc. (Langan) has completed this Phase I Environmental Site Assessment (ESA) for the property located at 5201 Patrick Henry Drive in Santa Clara, California (site; Figure 1). The ESA was performed on behalf of DPR Construction (Client and User), which is under contract to purchase the site, in support of the Users' environmental due diligence phase of purchasing the site.

1.1 Purpose

The purpose of this Phase I ESA is to:

- (1) Identify Recognized Environmental Conditions (RECs) in connection with the site, as defined in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E1527-13, which states: The presence or likely presence of any hazardous substances or petroleum products in, on, or at a site: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.
- (2) Satisfy the criteria of the United States Environmental Protection Agency's (USEPA) 40 Code of Federal Regulations (CFR) Part 312 Subpart C Standards and Practices §312.20 All Appropriate Inquiry (AAI) Rule.

1.2 Scope of Phase I ESA

This Phase I ESA was conducted utilizing a standard of good commercial and customary practice that is consistent with ASTM E1527-13. Any significant scope-of-work additions, deletions, or deviations to ASTM E1527-13 are noted in Section 9.0 of this report. In general, the scope of this assessment consisted of obtaining information from the Users; reviewing reasonably ascertainable information and environmental data relating to the site; reviewing maps and records maintained by federal, state, and local regulatory agencies; interviewing persons knowledgeable about the site; and conducting a site reconnaissance. The specific scope of this assessment included the following:

1. A site reconnaissance to observe conditions and assess the site's location with respect to adjoining and surrounding property uses and natural surface features. The reconnaissance included the surrounding roads and observations of surrounding

properties from public rights-of-way to identify obvious potential environmental conditions on neighboring properties. The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the site and then progressing to adjacent and surrounding properties. Photographs taken as part of the site reconnaissance are provided in Appendix A.

2. As per ASTM E1527-13, a questionnaire was provided to the Client, and to the owner to obtain information related to the site. Copies of the completed questionnaires are provided in Appendix B.
3. A review of environmental databases maintained by USEPA, state, and local agencies within the approximate minimum search distance. Environmental Data Resources, Inc. (EDR) prepared the environmental database report, which is included in Appendix C. State and local agency records are included in Appendix D.
4. Physical characteristics of the site were determined through referenced sources for topographic, geologic, soils, and hydrologic data.
5. A review and interpretation of Sanborn Fire Insurance Maps (Sanborn Maps), aerial photographs, historical topographic maps, and city directories to identify previous activities on and in the vicinity of the site. Copies are included in Appendices E, F, G, and H respectively.
6. A review of User-provided documents pertaining to historical site use. Copies of relevant User-provided documents are included in Appendix I.

1.3 Assumptions, Limitations and Exceptions

This Phase I ESA report was prepared for DPR Construction for the site located in Santa Clara, California. The report is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. Langan cannot assume responsibility for use of this report for any property other than the site addressed herein, or by any other third party without a written authorization from Langan.

Langan's scope of services, which is described in Section 1.2, was limited to that agreed to with the Users and no other services beyond those explicitly stated are implied. Reasonable effort has been made to check that the information obtained is factual and from reliable sources, but no responsibility is assumed for its accuracy. If no hazardous substances or conditions are reported to be on the site, it should not be interpreted as a guarantee that they do not exist. Langan assumes no responsibility or liability for errors in the information used or statements from sources other than those of Langan. All conclusions and recommendations in this report

concerning the site are those professional opinions of the Langan personnel involved with the project, and this report should not be considered a legal interpretation of existing environmental regulations. Opinions presented herein apply to site conditions existing at the time of our assessment and cannot necessarily be taken to apply to site changes or conditions of which Langan are not aware and have not had the opportunity to evaluate.

The services performed and agreed upon for this effort comports to those prescribed in the ASTM Standard E1527-13. Intrusive sampling (e.g., soil borings and groundwater sampling) was not performed as part of this Phase I ESA.

This Phase I ESA was not intended to be a definitive investigation of possible environmental impacts at the site. The purpose of this investigation was limited to evaluating if there is reason to suspect the possibility of RECs at the site. It should be understood that even the most comprehensive Phase I ESA may fail to detect environmental liabilities at a particular site. Therefore, Langan cannot "insure" or "certify" that the site is free of environmental impacts. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed, within the limits prescribed by our Client, with the customary standard of care exercised by professionals performing similar services under similar circumstances within the same jurisdiction.

The conclusions, opinions, and recommendations provided in this report are based solely on the specific activities as required for the performance of ASTM E1527-13 and are intended exclusively for the purpose stated herein, at the specified site as it existed at the time of our reconnaissance.

1.4 Special Terms and Conditions and User Reliance

The Client requested no special terms or conditions regarding this Phase I ESA. Langan has prepared this report specifically for the use of the Client. The findings contained within the report shall not, in whole or in part, be disseminated or conveyed to any other party, nor be used by any other party, in whole or in part without written prior consent of the Client and Langan. Other parties cannot rely on this Phase I ESA and the conclusions therein, unless Langan receives a written request from the Client, at which time a "Reliance Letter" will be prepared for the interested party. The relying party will be subject to the same terms and conditions and limitations as agreed to by the Client.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The site is comprised of one approximately 7.07 acre property, 5201 Patrick Henry Drive (Santa Clara County Assessor's Parcel 104-50-004) in Santa Clara, California. The site is occupied by an approximately 63,900 square foot three-story office building and surrounding asphalt surface parking lot. The site is bound by Galileo Pharmaceuticals, Inc. and vacant commercial office buildings to the north, Becky Ross Road to the east, Bunker Hill Lane to the south, and Patrick Henry Drive to the west.

2.2 Site and Vicinity General Characteristics

The site is located in a light industrial area of Santa Clara. According to the United States Geological Survey (USGS) Topographic Maps, reviewed by Langan in EDR's Historical Topographic Map Report (Appendix G), the site is at approximately 10 feet above mean sea level (msl). The site topography is generally flat, and gently slopes down toward the north to the San Francisco Bay. Photographs showing the current site use are provided in Appendix A.

2.3 Current Use of the Property and Adjoining Properties

The site is currently occupied by an asphalt surface parking lot and a three-story tilt-up concrete office building (Figure 2). The site is currently vacant and owned by Batton Associates.

The current uses of the adjoining properties include:

- North: Galileo Pharmaceuticals (5301 Patrick Henry Drive), vacant commercial office building (5302 Betsy Ross Road);
- East: Betsy Ross Road and Cisco Jasper (3003 Bunker Hill Lane);
- West: Patrick Henry Drive, Coherent Inc (5100 Patrick Henry Drive) and commercial office buildings (5200 Patrick Henry Drive); and
- South: Bunker Hill Lane, an asphalt surface parking lot, and commercial buildings (2962 Bunker Hill Lane).

2.4 Descriptions of Structures, Roads, and Other Site Improvements

5201 Patrick Henry Drive (Santa Clara County Assessor's Parcel 104-50-004) is occupied by an asphalt surface parking lot and three-story tilt-up concrete office building. A detailed description

of current uses of the site observed during the site reconnaissance is discussed in Section 5.0. Photographs showing the current site use are provided in Appendix A.

3.0 USER PROVIDED INFORMATION

3.1 User/Owner Questionnaire

Per ASTM E1527-13, user and owner questionnaires were provided to the User to inquire about specialized information related to the site.

Mr. Ian Cunningham of DPR Construction, completed the User questionnaire. Mr. Cunningham was not aware of activity and use limitations associated with the site. Mr. Cunningham was not aware of any pending, threatened, or past litigation, administrative proceedings, or any notices from any government entities regarding violation of environmental laws relating to hazardous substances or petroleum products at the site.

Mr. Ryan Balzer of Batton Associates, completed the Owner questionnaire. Mr. Balzer was not aware of activity and use limitations associated with the site. Mr. Balzer was not aware of any pending, threatened, or past litigation, administrative proceedings, or any notices from any government entities regarding violation of environmental laws relating to hazardous substances or petroleum products at the site. The completed User and Owner questionnaires are included in Appendix B.

3.2 Title Records

The site's preliminary title insurance, updated January 5, 2022 by First American Title Insurance Company, National Commercial Services, was provided by the User (Appendix I). The title identified an underground electrical systems easement around the eastern, southern, and western edges of the property along the roadways. Additionally, one power transformer and one aboveground diesel tank were identified along the northern edge of the building on-site. No environmental liens or easements were identified in the title records.

3.3 Environmental Liens or Activity and Use Limitations

The User is not aware of any environmental liens or activity and use limitations in connection to the site.

3.4 Specialized Knowledge

The User does not have any specialized knowledge of the site.

3.5 Commonly Known and Reasonable Ascertainable Information

The User is not aware of any commonly known and reasonable ascertainable information regarding the site.

3.6 Valuation Reduction for Environmental Issues

The User is not aware of any valuation reduction for environmental issues in connection with the site.

3.7 Owner, Site Manager, and Occupant Information

The site is currently commercial property. The site is owned by Batton Associates, LLC but is currently unoccupied office space.

3.8 Reason for Performing Phase I ESA

It is our understanding that the Client has requested this study as part of their environmental due diligence regarding their potential purchase of the site.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

Langan reviewed an environmental database search report, prepared by EDR, for the site (Target Property [TP]) and surrounding area. The EDR report is a listing of properties identified on select federal and state standard source environmental databases within the approximate search radius specified by ASTM Standard Practice for E1527-13. This information is reported to Langan by EDR, and to EDR by government sources; therefore, neither Langan nor EDR can verify the completeness and accuracy of the database information. Langan reviewed each environmental database on a record-by-record basis to evaluate if certain sites identified in the report are suspected to represent a potential impact to the site. A copy of regulatory database information was provided by EDR and is included in Appendix C.

The following summary table lists the number of properties by database within the prescribed search radius appearing in the EDR Radius Map Report:

| Database | Minimum Search Area | Site Listed | Properties Within Search Area |
|--|----------------------------|--------------------|--------------------------------------|
| Federal | | | |

A description of the reviewed databases and date of government version is provided in the EDR Radius Map Report (Appendix C). A summary of site database listings and other properties identified within the prescribed search area that may have an impact on the site is presented below.

Site (5201 Patrick Henry Drive)

The address associated with the site was listed in FINDS, ECHO, HWTS, HAZNET, CERS, HIST UST, EMI, and RCRA NonGen/NLR. No spills or violations were reported on the site from previous operations involving the storage or handling of hazardous materials. Hazardous materials noted on-site include unspecified sludge waste in 2012 and oxygenated solvents (acetone, butanol, ethyl acetate etc.) in 2011. Santa Clara Fire Department (Fire Department) records also note diesel, mineral oil, bromotrifluoromethane, and electrolyte/sulfuric acid in hazardous materials and wastes inventory reports from 2010 to 2019 (Appendix D). Only diesel is listed as stored in a tank.

EDR identified two historical USTs on the site. The USTs were installed in 1979 and 1981 and are reported as used for waste. The 1979 UST had a capacity of 20 gallons and the 1981 UST had a capacity of 1,200 gallons. In the previous Phase I ESA prepared by AEI in June 2022, AEI proposes the 1979 20-gallon UST was a former grease trap due to conversations with the Owner and the presence of the grease interceptor on the site. The 1,200-gallon UST is reported by the Fire Department as a single-walled concrete waste sump with an adjacent monitoring well for leak detection purposes (Appendix D). Fire Department records report it as containing emergency spill containment, oil and grease, and waste water. The 1980 W.F. Batton Office Building for the Dysan Corporation Final Bid Set Drawings (1980 Drawings) include plans for a 1,200-gallon precast concrete grease interceptor to be installed along the northern side of the building and connected to the kitchen (Appendix I, drawings P-1 and P-13). Evidence of a grease interceptor was identified during the site reconnaissance at this approximate location (Appendix A, Photographs 10 and 11). Additionally, the Owner indicated no knowledge of underground storage tanks. No nearby monitoring well was identified during site reconnaissance; however, based on conversations with the Owner and the 1980 Drawings, the 1,200-gallon UST is likely the kitchen grease interceptor.

One 400-gallon diesel aboveground storage tank, reported to be installed in 2008 for backup power generation, is currently on site. The AST is located within an 8-foot tall outdoor enclosure on the northeastern side of the building and does not have noticeable staining around the enclosure. Historical records from the Fire Department indicated annual inspections on the high

level and secondary containment alarms need to be performed. No violations pertaining to the condition or use of the AST were identified.

Neighboring Properties

Based on our review of the neighboring properties, most of the nearby database listings were closed by the regulatory agency, were hydrologically cross gradient or down gradient, or were determined to be a significant distance (greater than a 1/4 mile) from the site. Below is a summary of neighboring properties of concern in regards to possible contamination at the site (Figure 3).

South Bay Asbestos Area

The South Bay Asbestos Area is located approximately 0.6 miles downgradient of the site and is retained as a property of concern due to its status on the National Priorities List (NPL). Historically, asbestos waste was disposed of within landfills and used as fill material within this 550-acre area. The South Bay Asbestos Area was placed on the NPL in 1986 and cleanup activities included removing asbestos debris and soils, installing landfill caps, and putting land use restrictions in place, among others. According to the USEPA, cleanup actions are considered complete and long-term maintenance and inspections are ongoing.

Lake Merritt Business Park (5101 Patrick Henry Drive)

Lake Merritt Business Park, located up-gradient of the site across Bunker Hill Lane, was listed in CPS-SLIC and CERS as a cleanup program site for waste oil, motor oil, hydraulic fluid, and lubricating fluid. According to the subsurface investigation reports obtained through GeoTracker, two failed hydraulic jacks allowed for the release of a combined estimated 30 to 40 gallons of hydraulic fluid in 2002 (RGA, 2003a; RGA, 2003b). One failed hydraulic jack is located approximately 15 feet below the slab of the northwestern building on the property (NW jack). The second failed hydraulic jack is located approximately 15.5 feet below the slab of the northeastern building on the property (NE jack). During the initial subsurface investigation, a steel casing was placed around each failed hydraulic jack PVC pipe and groundwater and soil samples were collected from within the steel casings.

At the NW jack, total petroleum hydrocarbons (TPH) diesel and motor oil were detected in soil with maximum concentrations of 97 milligrams per kilogram (mg/kg) and 720 mg/kg, respectively. TPH diesel and motor oil were detected in groundwater at 34 milligrams per liter (mg/L) and 280 mg/L, respectively. At the NE jack, TPH diesel and motor oil were detected in soil with maximum concentrations of 80 mg/kg and 530 mg/kg, respectively. TPH gasoline, diesel, and motor oil were detected in groundwater at 0.06 mg/L, 5.6 mg/L and 54 mg/L, respectively.

During a second subsurface investigation, two borings were advanced to a depth of 16 feet below ground surface (bgs) to the west and northwest of the presumed NW jack release. Two additional borings were advanced to depths of 12 feet bgs and 16 feet bgs to the north and northeast of the presumed NE jack release. Groundwater grab samples were collected from each borehole and analyzed for TPH, gasoline, diesel, and motor oil. TPH was not detected in any groundwater sample.

The locations of the failed hydraulic jacks are approximately 300 feet south (NW jack) and 450 feet southeast (NE jack) of the site. Both locations are considered up-gradient. Based on no detections of TPH between the presumed release areas in groundwater, petroleum-impacted groundwater from Lake Merritt Business Park is not considered a concern at the site. Lake Merritt Business Park received case closed status for both failed hydraulic jacks on 9/30/2003.

Anacomp Inc., Xidex Corporation, Dysan Corporation (5200 and 5440 Patrick Henry Drive)

5200 and 5440 Patrick Henry Drive are located west and northwest of the site, across Patrick Henry Drive. Groundwater flow was determined to be northerly and northeasterly during the site investigations on these properties in the 1980s and 1990s, therefore they are most likely cross-gradient and of the site. The properties were listed in CPS-SLIC, CERS, and SEMS-ARCHIVE for environmental actions reported by the California Regional Water Quality Control Board San Francisco Bay Region (RWQCB) due to spillage, inadequate chemical handling practices, overflows and/or possible leakages surrounding underground tank farms on the properties. Contaminants of concern include methyl ethyl ketone (MEK), cyclohexanone, isopropyl alcohol (IPA), acetone, diglyme, Freon 113, and TPH diesel.

From 1979 to 1992, Anacomp Inc. (formerly Xidex Corporation, formerly Dysan Corporation) manufactured computer hard disks and floppy disks on the properties. In 1982, industrial solvents IPA (700 mg/L), cyclohexanone (440 mg/L), and MEK (49,000 mg/L) were detected in groundwater at elevated concentrations, resulting in further remedial investigation and remedial action. In 1988, TPH diesel was detected at a maximum concentration of 2,500 mg/L in groundwater after tank removal activities.

The following underground tanks were reported to be removed in 1988 from the two properties:

| Location | Capacity (gallons) | Compound stored |
|--------------------------|---------------------------|--|
| 5200 Patrick Henry Drive | 7,300 | MEK |
| | 7,300 | MEK |
| | 7,300 | Cyclohexanone |
| | 7,300 | Cyclohexanone, diethylene glycol dimethyl ether |
| | 10,000 | Diesel |
| | 10,000 | Diesel |
| 5440 Patrick Henry Drive | 7,300 | MEK |
| | 7,300 | MEK, cyclohexanone, diethylene glycol dimethyl ether |
| | 10,000 | Diesel |
| | 10,000 | Diesel |

All associated piping was capped at both ends at 5200 Patrick Henry Drive and removed at 5440 Patrick Henry Drive.

A shallow groundwater extraction system consisting of extraction wells, an on-site air stripper, and disposal of treated water into the sanitary sewer system operated intermittently from 1986 to 1991, when the company ceased manufacturing activities. After system shut down in 1991, shallow groundwater monitoring continued quarterly in 1992 and 1993. The only compound detected above cleanup goals was TPH-diesel (maximum 1.2 mg/L in May 1993). The properties received a no further action notice in 1994 due to the determination "the current concentration of TPH-diesel does not threaten human health or the environment" (RWCQB, 1994).

GeoTracker lists additional potential solvent contamination on the 5440 Patrick Henry Drive property with a case closed status as of 6/2/2009. The regulatory activities are listed as leak detection in 1988 and may refer to the aforementioned tank removal on the property. No site history or cleanup action are reported and no records were identified in 2009 from the EDR database search.

Coherent Inc., Anacorp Inc., Bacharach Instruments (5100 Patrick Henry Drive)

5100 Patrick Henry Drive is located southwest from the site, across the intersection of Bunker Hill Lane and Patrick Henry Drive, and is cross-gradient and up-gradient of the site. The property is listed on CERS HAZ WASTE, CERS, HWTS, CUPA LISTINGS, and HAZNET. 5100 Patrick Henry Drive is currently operated by Coherent Inc. and is reported to store, handle, and/or generate hazardous waste such as liquids with pH less than or equal to 2 with metals, other organic solids,

laboratory waste chemicals, unspecific oil-containing waste, and oxygenated solvents (acetone, butanol, ethyl acetate, etc.).

The property historically served as operations for manufacturing of computer hard disks and floppy drives by Anacorp Inc. The former operator Bacharach Instruments is listed as a hazardous waste generator of various halogenated and non-halogenated solvents. Subsurface investigations in 1991, prior to Coherent operating on the property, identified trace volatile organic compounds (VOCs) in soil and groundwater samples. Detected compounds in soil include benzene, toluene, Freon 113, and trichloroethene (TCE). Detected compounds in groundwater grab samples include TCE (0.1 mg/L) and cis-1,2-dichloroethene (DCE; 0.01 mg/L); however, only Freon 113 was detected in groundwater from installed monitoring wells. Therefore, the reported contaminants of potential concern on the property were TCE and Freon 113. Data collected during the investigation does not suggest an on-site source of TCE or Freon 113 and the property received a site closure status by the RWQCB on 3/24/1993.

Silicon Valley Bank Financial Group (3003 Tasman Drive)

Silicon Valley Bank Financial Group is located approximately 0.16 miles up-gradient, southeast of the site and is listed in the AST database. No pertinent information was identified in the AST database. There is no documented release reported on the property.

Orphan Listings

According to EDR, an orphan listing is a property that cannot be mapped due to poor or inadequate address information. Upon further research, Langan concluded that none of the orphan listings appear to be within applicable search distances to the site and are not considered properties of concern.

4.2 Physical Setting Sources

Topography

According to the USGS Topographic Maps, reviewed by Langan in EDR's Historical Topographic Map Report (Appendix G), the site is at approximately 10 feet above msl. The site topography is generally flat and slopes down toward the north towards San Francisco Bay.

Geology and Hydrogeology

The site is underlain by fine-grained silts and clays. The Natural Resources Conservation Service (NCRS) soil resource report identifies underlying soils as mostly Urbanland-Hangerone complex with the western portion of the site as Urbanland-Embarcadero complex with 0 to 2 percent

slopes. Urbanland refers to disturbed and human-transported material (fill). The Hangerone complex is described as poorly drained clays with some deeper clay loam and gravelly loam layers. The Embarcadero complex is described as very poorly drained silty clays with some shallow clay and clay loam layers. Parent material for both complexes is described as alluvium derived from metamorphic and sedimentary rock and/or metavolcanics.

Groundwater has been observed at depths ranging from 5.49 to 7.47 feet bgs (0.72 to 1.98 feet above msl) during subsurface investigations at nearby 5100 Patrick Henry Drive. Groundwater flow is believed to be north/northeast towards San Francisco Bay (Figure 1). The on-site groundwater elevation is likely affected by local variations in subsurface conditions and seasonal variations in rainfall.

4.3 Surface Water and Flood Plain Conditions

Surface Water

The Calabazas Creek is the closest surface water body, approximately 0.14 miles west of the site (Figure 1). The San Tomas Aquino Creek and an unknown surface water body feature are approximately 0.18 miles east of the site. Both creeks are believed to flow towards the salt evaporators and San Francisco Bay, located approximately 0.85 miles north of the site.

Flood Plain

According to the United States Department of Homeland Security Federal Emergency Management Agency (FEMA) Map Service Center, the site located within an area with reduced floor risk due to levee protection.

4.4 Nearby Well Locations

Langan's review of documents provided by EDR indicates one well on the subject property; however, no evidence of a current well was observed during site reconnaissance. Langan's site reconnaissance and review of the RWQCB online GeoTracker website identified a total of six historical wells, all reported by Santa Clara Valley Water District to be destroyed or abandoned (Figure 2). Santa Clara Valley Water District provided well destruction completion notices for three monitoring water wells (CW-1, CW-2, and CW-3) in 2012 (Appendix I). The presumed three former monitoring well locations were observed during the site reconnaissance as anomalous patches in the asphalt surface. The two former water wells and one unidentified well were not observed. Additionally, according to files provided by the Fire Department, a groundwater monitoring well was installed as leak detection for a 1,200 gallon sump on site in

1981. It is reported as destroyed under the oversight of Santa Clara Valley Water District. No formal well destruction completion notices were identified for the two former water wells and one unidentified well.

The closest well to the site is reported as unknown in the EDR documents from the Department of Water Resources and is located 0.2 miles west of the site.

4.5 Historical Use Information on the Site, Adjoining Properties, and Surrounding Properties

Sanborn Maps Review

Sanborn Fire Insurance Maps were developed in the 1800s and 1900s for use as an assessment tool for fire insurance rates in urban areas. The Sanborn Library was searched by EDR and no Sanborn Maps were available for review for the site.

Aerial Photograph Review

Langan reviewed aerial photographs to evaluate past uses and relevant characteristics of the site and surrounding properties. We reviewed the following aerial photographs from EDR: 1939, 1948, 1950, 1956, 1963, 1968, 1974, 1979, 1982, 1993, 1998, 2006, 2009, 2012, and 2016. Appendix F contains copies of the aerial photographs from EDR.

| Year | Site Description | Surrounding Properties Description |
|------|--|--|
| 1939 | The site appears to be agricultural land with some evidence of irrigation system elements. | The surrounding properties appear to be agricultural land with some evidence of irrigation system elements. The closest structures are approximately ¼ mile to the east of the site. |
| 1948 | No observed changes. | No observed changes. |
| 1950 | No observed changes. | No observed changes. |
| 1956 | The site has been improved with three structures in the southwest corner. An access path of unknown material is located along the western side and through the center of the site leading to the three structures. | No observed changes. |
| 1963 | Four structures observed in the southwest corner with a few smaller structures, presumed to be agricultural or irrigation related, within the center of the site. | New roadways have been constructed in the surrounding area. |
| 1968 | No observed changes. | No observed changes. |
| 1974 | The path through the center of the site is no longer apparent. | No observed changes. |

| Year | Site Description | Surrounding Properties Description |
|-------------|--|--|
| 1979 | The site appears to be vacant land with paved roadways along the eastern, southern, and western boundaries in the approximate locations of current Betsy Ross Road, Bunker Hill Lane, and Patrick Henry Drive. | Surrounding properties to the east and southwest have been improved with structures. Additional roadways have been constructed in the surrounding area. |
| 1982 | The site has been improved with a building in the approximate location of the current building and surrounding asphalt parking area. | Surrounding properties to the north, south, and west, have been improved with buildings and asphalt lots. A surface water body is apparent to the northeast. |
| 1993 | No observed changes. | The surrounding property to the north has been improved with an additional building. |
| 1998 | No observed changes. | No observed changes. |
| 2006 | No observed changes. | No observed changes. |
| 2009 | No observed changes. | No observed changes. |
| 2012 | No observed changes. | No observed changes. |
| 2016 | No observed changes. | No observed changes. |

Historical Topography Maps Review

Langan reviewed the following Historical Topographic Maps from EDR: 1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980, 2012, 2015, and 2018. Appendix G contains copies of the Historical Topographic Maps.

The average elevation at the site remains relatively unchanged from 1889 to 2018, at approximately 10 feet above msl. Calabazas Creek is located approximately 1/8 mile west of the site and San Tomas Aquino Creek is located approximately ¼ mile east of the site. Topographic maps confirmed that the site did not have structures or roadways from 1889 until 1956, as identified on the aerial imagery.

City Directory Review

Langan reviewed the city directory abstracts obtained from EDR from 1991 through 2017 for the site. Appendix H contains a copy of the City Directory Report.

| Year | Site Occupant Name |
|-------------|--|
| 1991 | Claris Corporation and Xidex Corporation Headquarters |
| 1994 | Claris Corporation |
| 1999 | Claris Corporation Customer Service and Filemaker Inc. |
| 2001 | Claris Corporation and Galileo |
| 2009 | Claris Corporation and Filemaker Inc. |
| 2014 | Claris Corporation and Filemaker Inc. |
| 2017 | Claris Corporation and Filemaker Inc. |

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the site and then progressing to the adjacent and surrounding properties.

The assessment of the adjacent and surrounding properties was limited to identifying, if possible, any indications of past or current use that may involve the use, storage, disposal, or generation of hazardous substances or petroleum products; noting the general type of current use; the general topography of the surrounding area; and providing a general description of adjoining or adjacent structures.

Ms. Pianpian Wu and Ms. Amanda Harrold of Langan performed a site and vicinity reconnaissance on behalf of Langan on 5 August 2022. Appendix A contains photographs from the site reconnaissance.

5.2 General Site Setting and Reconnaissance Observations

The site is currently three-story vacant commercial office building and associated asphalt parking lot. The photographs showing the current site use are provided in Appendix A.

Past Use of Property

Various equipment remain from past use of the site. A grease interceptor, pad-mounted transformer, and 400-gallon AST for a diesel generator are located along the northern portion of the building. Various electronics and storage areas remain in the northwestern first floor former server room including an observed control panel for the diesel generator.

Description of Structures

The site is currently occupied by a three-story tilt-up concrete commercial office building and asphalt surface parking lot (Figure 2).

Roads

The site is bound by Betsy Ross Road to the east, Bunker Hill Lane to the south, and Patrick Henry Drive to the west. CA-237 is located approximately 0.4 miles to the north.

Storm Drains

Storm drains were observed at various locations along the edges of the asphalt surface parking lot and presumed to connect to the City of Santa Clara storm drain network. Storm drains are labeled as "no dumping, drains to Bay."

5.3 Site Observations

Hazardous Substances and Petroleum Products in Connection with Identified Uses

Langan observed two elevator service rooms within the building with presumed hydraulic fluid and one 400-gallon diesel AST located within an outdoor 8-foot tall enclosure near the northeastern corner of the building reported as used for backup power generation. One pad mounted transformer is located outside, along the northern portion of the building.

Hazardous Substances and Petroleum Products in Connection with Unidentified Uses

Langan did not observe hazardous substances or petroleum products in connection with unidentified uses at the site during the reconnaissance.

Storage Tanks

Langan observed one 400-gallon diesel AST and one grease interceptor on the site.

Odors

Langan observed potential organic odors within the eastern elevator service room during the reconnaissance. No odors were observed within other areas of the building, including the western elevator service room.

Pools of Liquids

Langan did not observe any pools or ponded liquids at the site during the reconnaissance excluding landscape items (see pits, ponds, or lagoons).

Drums

Langan did not observe any drums at the site during the reconnaissance.

Polychlorinated Biphenyls (PCBs)

Langan did not observe polychlorinated biphenyls (PCBs) or PCB-containing equipment at the site during the reconnaissance; however, four transformers were observed on Site (Appendix A). Three transformers were identified as dry transformers (non-PCB) and a non-PCB label was observed on the pad-mounted transformer located outside along the northern edge of the building. Transformers installed after 1977 are less likely to be PCB containing and, based on the construction of the building in 1983, it is presumed the transformers were installed at the earliest, in the 1980s. Therefore, it is likely that the transformers do not contain PCBs. No spills or stains were observed around any of the transformers.

Pits, Ponds, or Lagoons

Langan observed one pond on the exterior of the building, along the western edge, and one flowing water feature within the building. Both features are believed to be lined and connected to the recycled water irrigation system; however, Langan was unable to confirm the lining of the exterior pond due to landscape rock elements along the bottom.

Stained Soil or Pavement

Langan observed *de minimis* stained asphalt associated with cars on the surface asphalt parking lot during the reconnaissance. Langan also observed *de minimis* staining on flooring in the rooftop mechanical rooms, the first floor southeastern mechanical room, and the elevator service rooms. Additionally, *de minimus* staining was observed within the third floor kitchen within a floor drain with evidence of corrosion. No significant cracks were observed within the concrete flooring at these locations.

Stressed Vegetation

Langan did not observe stressed vegetation at the site during the reconnaissance.

Solid Waste

Langan observed one presumed solid waste collection container within the western elevator service room. Langan did not observe solid waste at the rest of the site during the reconnaissance.

Wastewater

Langan did not observe wastewater discharges at the site during the reconnaissance.

Wells

Langan did not observe any current wells at the site during the reconnaissance. Three patched asphalt areas were observed in the vicinity of reported former monitoring wells within the asphalt lot on site.

Septic Systems

Langan did not observe septic systems at the site during the reconnaissance.

Utilities

Utility vaults believed to be related to water lines, electrical lines, gas lines, and storm water lines are present along the site boundaries.

6.0 INTERVIEWS

6.1 Subject Site User

For the Phase I ESA, Langan was introduced to and interviewed the site User of this report, as defined in ASTM E1527-13. The purpose of the interview was to obtain information indicating possible RECs in connection with the site and to provide further details regarding historical use of the site.

Mr. Ian Cunningham of DPR Construction, stated that he has no specialized knowledge or experience related to the site or nearby properties. Mr. Cunningham stated that he was not aware of any current government notifications, violations of environmental laws, or litigation at the site.

6.2 Owners/Tenants of Current and Adjacent Properties

Mr. Ryan Balzer, the site manager for the current owner Batton Associates, was interviewed as part of this Phase I ESA. Mr. Balzer stated that he has no knowledge of hazardous materials being disposed of on-site or being stored in USTs. Based on his knowledge of the site, the reported USTs are most likely grease interceptors related to the on-site kitchen. Mr. Balzer was not aware of any current government notifications, violations of environmental laws, or litigation at the site.

Owners/tenants of adjacent properties were not available for interview as part of this Phase I ESA.

7.0 VAPOR ENCROACHMENT ASSESSMENT

An evaluation of potential vapor encroachment concern (VEC) was included as consideration for this assessment due to the presence of VOC contamination in groundwater, soil, and soil gas in the vicinity of the site. Migration, as defined by ASTM E1527-13 Section 3.2.56, is the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor intrusion is defined as the migration of volatile chemicals from the subsurface into overlying buildings. Our assessment for potential vapor encroachment concern or vapor migration at the site was performed in general accordance with ASTM E1527-13, but did not include an assessment related to vapor intrusion.

Properties within 1/10th of a mile from the site with current or historical known releases of petroleum hydrocarbons were evaluated as part of the vapor encroachment assessment. Within 1/3rd of a mile of the site, properties with known or historical releases of other volatile chemicals were evaluated. Langan reviewed EDR's Radius Map Report with GeoCheck and the VEC Application (Appendix C) to evaluate potential vapor encroachment concerns from the surrounding properties meeting the above criteria.

Based on the analysis using the VEC application, Langan identified the following facilities as potential sources of vapor encroachment to the site: 5101 Patrick Henry Drive (listed on GeoTracker, CPS-SLC, and CERS) and 5100 Patrick Henry Drive (listed on GeoTracker and CERS). These facilities are located approximately 400 feet south and up-gradient of the site. Based on the reviewed historical documentation for the properties, vapor encroachment to the site is unlikely. The contaminant of concern at 5101 Patrick Henry Drive is TPH motor oil which is unlikely to volatilize and cause a vapor encroachment concern. Although TCE and DCE were identified within grab groundwater samples at 5100 Patrick Henry Drive in 1991, the samples results were not replicated in monitoring wells installed between the original sample location and the site. The low levels of VOCs detected in 1991 are not indicative of a current groundwater plume near the site.

Therefore, a VEC for this site is unlikely.

8.0 PHASE I ESA FINDINGS AND CONCLUSION

Langan's findings with respect to known and suspect RECs and de minimis conditions, and our opinion of these findings are as follows:

8.1 Known or Suspect RECs

Based on the databases searched by EDR, requests made for public documentation related to past or present environmental conditions at the site and surrounding area, and our site reconnaissance, Langan has not identified any RECs associated with the site during this Phase I ESA.

8.2 De Minimis Conditions

De minimis conditions are defined by ASTM as environmental conditions that "generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." Possible environmental issues that in Langan's opinion are not likely historic, controlled or recognized environmental conditions but are de minimis conditions include the following at the site.

- Langan observed minor staining from site use as parking lots during the site reconnaissance.
- Langan observed minor staining on flooring in the rooftop mechanical rooms, the first floor southeastern mechanical room, and the elevator service rooms.
- Langan observed minor staining in the third floor kitchen within a floor drain with evidence of corrosion.
- Records from the EDR report indicate historical use as agricultural land.

8.3 Data Gaps

The site history could not be researched in five-year intervals back to 1940 because of a lack of readily available information. It is Langan's opinion that this variation from the ASTM standard does not significantly affect the results of this Phase I ESA or the ability to assess the presence of a REC at the site, because land use did not change frequently enough to warrant a five year interval history evaluation.

8.4 Conclusion

Langan conducted this Phase I ESA with a standard of commercial and customary practice using the local standard of care that is consistent with ASTM E1527-13. Any significant scope-of-work deviations, deletions, or additions to ASTM E1527-13 are noted in Sections 9.0 and 10.0 of this report.

The site is located in a light industrial area of Santa Clara, California and is comprised of one property: 5201 Patrick Henry Drive. The site is occupied by an asphalt surface parking lot and three story concrete tilt-up commercial office building. The site is bound by Galileo Pharmaceuticals Inc. and a vacant commercial office building to the north, Betsy Ross Road to the east, Bunker Hill Lane to the south, and Patrick Henry Drive to the west.

According to the USGS Topographic Maps, reviewed by Langan in EDR's Historical Topographic Map Report (Appendix G), the site is at approximately 10 feet above msl. The site topography is generally flat, and gently slopes down toward the north. Photographs showing the current site use are provided in Appendix A.

Based on review of the Sanborn Fire Insurance Maps, aerial photographs, topographical maps, and city directories, the site was use for agricultural purposes until the 1980s when the current commercial office building and asphalt lot were constructed. Previous occupants include various commercial office tenants.

Langan did not identify a REC associated with the site during this Phase I ESA.

8.5 Recommendations

We recommend shallow soil sampling and analysis for pesticides, herbicides, and metals be conducted and a soil management plan be prepared prior to subsurface work involving soil excavation and off-site disposal. These tasks are needed to properly characterize the soils for disposal due to possible agricultural chemicals in the site soil resulting from historical agricultural use at the site.

9.0 DEVIATIONS

This Phase I ESA has been performed without deviation to, and in conformance with, ASTM Practice E1527-13 (Standard Practice for ESA: Phase I ESA Process) except as noted. No expressed or implied representation or warranty is included or intended in the report, except that the services were performed within the limits prescribed by the Client, and with the customary thoroughness and competence of our profession.

10.0 ADDITIONAL SERVICES

The scope of services performed for this study did not include the following non-ASTM required Phase I ESA items: radon, asbestos containing materials (ACM), lead-based paint (LBP), lead in drinking water, PCB-containing material, emerging contaminants, wetlands, cultural and historical

resources, industrial hygiene, health and safety, ecological resources, endangered species, mold, indoor air quality, and biological agents.

12.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The signatures of the environmental professional(s) responsible for this Phase I ESA are provided on the submittal letter and/or cover page of this report.

13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

The qualifications of the environmental professionals that conducted this ESA are presented in the resumes provided in Appendix J. Langan declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in #312.10 of 40 CFR 312. Langan has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. Langan has developed and performed the all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

**Subject: Request for Information
Phase I Environmental Site Assessment
5201 Patrick Henry Drive
City of Santa Clara, California
Langan Project No.: 731769901**

Dear Ian:

Langan is pleased at the opportunity to conduct a Phase I Environmental Site Assessment (ESA) for the 5201 Patrick Henry Drive (Site) property located in Santa Clara, California. To provide a more comprehensive assessment, we request Phase I ESA users/clients to provide the information listed attached. Please indicate if you have knowledge of such information and return this letter to us by email or fax. Please also send us any such documentation you may have regarding this information.

We appreciate your assistance in initiating this assessment. If you have any questions, contact me at (408) 283-3638..

Sincerely yours,

Langan Engineering and Environmental Services, Inc.

Amanda Harrold, EIT
Senior Staff Engineer

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Please complete the below form and return to
Langan Engineering and Environmental Services, Inc.

Providing the following information (if available) to the environmental professional (Langan) is one of the requirements to qualify for one of the *Landowner Liability Protections* offered under CERCLA. Missing or incomplete information could result in a determination that "all appropriate inquiry" is not complete.

General Information

User/Client Name (s): _____

Property Name: 5201 Patrick Henry Drive

Addresses: _____

Property Type: _____

Type of Property Transaction:

- | | |
|-----------------------|-------------------------------------|
| Purchase of property | <input checked="" type="checkbox"/> |
| Financing of property | <input type="checkbox"/> |
| Sale of property | <input type="checkbox"/> |
| Ground Lease | <input type="checkbox"/> |
| Build to Suit Lease | <input type="checkbox"/> |
| Other _____ | |

Reason Why Phase I ESA is required: _____

Site Contact (s): _____

Required Information

The citation at the end of each item (e.g. 40 CFR 312.XX) is the section of EPA's November 1, 2005 AAI Final Rule which discusses that item.

(1.) Environmental cleanup liens that are filed or recorded against the *property* (40 CFR 312.25). Yes No

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? [Please note, unless specifically delegated in the Scope of Work for the Phase I ESA, it is the User's responsibility to undertake a review of recorded land title records and judicial records to identify any environmental liens and to report these liens to the environmental professional conducting a Phase I ESA.]

Note 1 – In certain jurisdictions, federal, tribal, state or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

(2.) Activity and use limitations that are in place on the site or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi). **Yes** **No**

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? [Please note, unless specifically delegated in the Scope of Work for the ESA, it is the User's responsibility to undertake a review of recorded land title records and judicial records to identify any activity and use limitations and to report these limitations to the environmental professional conducting a Phase I Environmental Site Assessment.]

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). **Yes** **No**

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). **Yes** **No**

- (a.) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? [If no, proceed to Parts 4a and 4b.]
- (b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
- (c.) Identify an explanation for the lower price and provide a written record of such explanation as an attachment.

(5.) Commonly known or reasonably known or reasonably ascertainable information about the property (40 CFR 312.30). **Yes** **No**

- Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,
- (a.) Do you know the past uses of the property?
- (b.) Do you know of specific chemicals that are present or once were present at the property?
- (c.) Do you know of spills or other chemical releases that have taken place at the property?
- (d.) Do you know of any environmental cleanups that have taken place at the property?

(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate Investigation (40 CFR 312.31). **Yes** **No**

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

ASTM E-1527-13, Section 10.9

Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? **Yes** **No**

Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? **Yes** **No**

Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? **Yes** **No**

EXECUTIVE SUMMARY

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS..... Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2022 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless

EXECUTIVE SUMMARY

information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2022 has revealed that there are 9 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 5

EXECUTIVE SUMMARY

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/25/2022 has revealed that there are 20 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 21 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 2 CA UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 CA SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 21 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 17 CA CUPA Listings sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

located in north Santa Clara County on the southern edge of the San Francisco Bay, served as dumping areas for over 30 years. Companies disposed of asbestos waste in an old municipal landfill. In addition, asbestos waste was used for fill material at various locations throughout the town. The site was first proposed for listing under the name Alviso Dumping Areas. Soil in the old landfill and around homes contains asbestos, according to tests conducted by the State. Construction activities and wind action stir up asbestos-laden dust, posing a potential health risk to residents. EPA and the State plan to continue sampling the soil and air throughout the 1-square-mile area to determine the degree of risk to public health. Evening winds may transport asbestos to the San Francisco Bay National Wildlife Refuge, which borders the town and harbors several endangered species. Status June 10, 1986): In July 1985, EPA entered into an Interagency Agreement with the U.S. Army Corps of Engineers to conduct a remedial investigation/feasibility study to determine the extent of contamination at the site and identify alternatives for remedial action. The remedial investigation is scheduled to begin in the spring of 1986. In October 1985, two areas of the town were paved to prevent exposure of residents to potentially significant levels of asbestos fibers. Additional measures are being considered to further reduce exposures to asbestos fibers.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/10/2015
Comments: The Fourth Five-Year Review Report for the Site was finalized by The U.S. Environmental Protection Agency and was signed by the Acting Assistant Director of the Region 9, Superfund Division on 9/10/2015. The Five-Year Review Report concluded that the Site remedy is protective of human health and the environment. Five recommendations were made in the Five Year Review Report to ensure proper operation of the remedy and continued protectiveness.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Land Use Restriction Monitoring Report
Completed Date: 08/03/2011
Comments: The advisory was provided.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Summerset Mobile Home Estates
Completed Document Type: * Land Use Restriction Monitoring Report
Completed Date: 10/19/2012
Comments: An inspection was performed and report was submitted by the site owner, as required by section 4.06 of the Land Use Covenant, to verify compliance with its restrictions and requirements. The report documented two projects involving disturbance of the soil. The projects were performed in compliance with the US EPA- and DTSC-approved Soil Management Plan. Site use and activities were found to be in compliance with the Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 07/01/1996
Comments: Fact sheet updates the community on the status of the project and the proposed plan to remove the temporary replacement levees.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports

remedy is protective of human health and the environment in the short-term. For the remedy to be protective in the long-term, institutional controls need to be implemented at the Summerset Mobile Estates portion of the former Santos Landfill and the Sainte Claire Landfill. For the Marshland Landfill, EPA needs to prepare an Explanation of Significant Differences that will specify the use of Water Board title 27, California Code of Regulations requirements in lieu of deed restriction as specified in the Record of Decision and that no further controls are needed.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Saint Claire Landfill Parcels
Completed Document Type: Site Characterization Report
Completed Date: 05/11/2011
Comments: Parcels 015-41-006 and 015-04-015 were formerly operated as the Saint Claire Corporation Landfill. The U.S. EPA Record of Decision required institutional controls to be put in place for these parcels because of the potential presence of asbestos. The Report presents the results of soil sampling performed by the owner of the parcels. Ten soil borings were drilled on the two parcels and a total of 28 soil samples were collected and analyzed for asbestos. Only one of the 28 samples had an asbestos concentration exceeding the 1 percent action levels established by U.S. EPA for the South Bay Asbestos Area. Based on the sampling results, EPA and DTSC have determined that a land use covenant is not needed for the parcels.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Summerset Mobile Home Estates
Completed Document Type: Land Use Restriction
Completed Date: 09/14/2011
Comments: A Land Use Covenant that places restrictions on the Summerset Mobile Home Park was recorded with the Santa Clara County Recorder. The Covenant allows for the property to continue being used as a mobile home park, but prohibits other sensitive uses and requires a soil management for activities that disturb the soil.

Completed Area Name: OU-2 -Ring Levee
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 05/27/1997
Comments: Completed RA.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 06/26/1991
Comments: Issued ROD for the Ring Levee Operable Unit (OU) requiring removal of the entire levee, after flood control improvements on the Coyote Creek were completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 09/29/1989
Comments: Issued Record of Decision (ROD) for the truckyards/landfill requiring that sampling be conducted on these properties followed by capping or soil removal.

Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 09/25/2017
Comments: Rutherford MHC Management submitted a letter to DTSC and U.S. EPA to verify compliance with the Land Use Covenant that was recorded with Santa Clara County for the Summerset Mobile Home Park.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Legacy
Completed Document Type: Land Use Restriction
Completed Date: 10/21/2004
Comments: Recorded Deed Restrictions.

Completed Area Name: OU-2 -Ring Levee
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 01/06/1994
Comments: Completed RA. In July 1993, US EPA and the responsible parties encapsulated the asbestos contaminated fill in a Highway 237 embankment under construction.

Completed Area Name: OU-2 -Ring Levee
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/30/1986
Comments: Not reported

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Legacy
Completed Document Type: Soils Management Plan
Completed Date: 06/08/2009
Comments: The Soil Management Plan addresses work to be conducted as part of Pacific Gas and Electric's TIVO U/G Service Upgrade project. The project work consists of installing a new power pole and feeders into an existing underground junction box. U.S. EPA approved the Plan on May 28, 2009. DTSC concurred with the Plan on June 8, 2009.

Completed Sub Area Name: Summerset Mobile Home Estates
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 04/10/2015
Comments: Rutherford MHC Management performed an inspection of the Summerset Mobilehome Park and submitted a report of the inspection to DTSC as required by section 4.06 of the Land Use Covenant to verify compliance with its restrictions and requirements. The report outlined disturbances of the soil that have occurred since the prior report dated September 27, 2012. The report noted that each soil disturbance was performed in compliance with the EPA- and DTSC-approved Soil Management Plan and concluded the property continues to be used in a manner consistent with the Land Use Covenant.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 09/30/1991
Comments: Issued Orders to four of the Truckyard owners requiring them to pave their respective yards. By late 1992, three of the truckyards removed all asbestos contaminated fill to residential levels. For Neu Truck Yard, the remaining truck yard property, the US EPA will be conducting soil sampling to determine what further action is required.

Background Info: requirements of the Soil Management Plan (1997). The construction activities included construction of a Cap (consisting of five two-story office buildings, pavement and 18 inches of clean soil in landscaped areas), and installation of a passive gas collection system to remove methane migrating upward from under the Cap. On June 16, 1999, U.S. EPA and Legacy Partners 2335 LLC entered into an Agreement and Covenant Not to Sue for the Collishaw Property. Santos Landfill - A portion of the Santos Landfill is Parcel 1 of the Eastern Parcel Agreement and Covenant Not to Sue which requires a deed restriction. Parcel 2 (not part of Santos Landfill) is part of the Eastern PPA, also requires a deed restriction since asbestos waste piping was found there. The rest of the Santos Landfill is the Summerset Mobile Estates mobile home park and the property located on the northern side of the Guadalupe River. Santos is planning to send U. S. EPA information that shows that the northern property is not part of the Santos Landfill. Sainte Claire Landfill - is located on the northern side of the Guadalupe River and divided into two parcels by Gold Street. The part on the eastern side of Gold Street is operated as a truck yard/storage yard. The part on the western side of Gold Street is undeveloped. Both parcels require a deed restriction as a landfill area that received asbestos waste in the past. Marshland Landfill is regulated under the RWQCB and a deed restriction has been recorded under the RWQCB authority. U.S. EPA and Legacy Partners entered into a Prospective Purchaser Agreement and Covenant Not to Sue for this area (now known as the Highway 237 Disposal Site) which included another Soil Management Plan during construction. During the 1950s, several landfills in the Alviso area accepted wastes from an asbestos cement pipe manufacturing facility. This

waste was later used for raising the grade of the site and for constructing a ring-levee, resulting in asbestos contamination throughout the Alviso area and covering roughly 330 acres. The Site was listed on the Federal Superfund list in 1985. U.S. EPA has been the lead regulatory agency overseeing work. The Site was divided into two operable units - the Ring Levee and the Landfill/Truckyard. On September 30, 1997, U.S. EPA and Lincoln 237 Associates Limited Partnership and Lincoln Property Company No. 2233 Limited Partnership entered into two Prospective Purchaser Agreements and Covenant Not to Sue for the Western Parcel and the Eastern parcel, respectively. The agreements incorporated Soil Management Plans describing soil control measures for asbestos and asbestos containing materials, methane, petroleum hydrocarbons, and lead. A portion of the Santos Landfill is Parcel 1 of the Eastern Parcel. Parcel 2 (not part of Santos Landfill), is the other portion of the Eastern Parcel Agreement and requires a deed restriction since asbestos waste piping was found there. The Final Soil Management Report, dated January 28, 1999, describes the construction activities performed at the Eastern Parcel pursuant to the

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

S121743365

Site Name: Micro Lithography Inc (MLI)
Violation Date: 07-29-2020
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 08/27/2020. Hazardous waste stored in fume hood containing Pirahha has an accumulation date > 1 year (from 2018).

Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 06S1W16L01s
Latitude: 37.406949
Longitude: -121.979764
Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: Not reported
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: The elevator piston failed sometime in 2010. It is estimated that 50-60 gallons of hydraulic fluid was lost. A new piston for the elevator was installed within the old casing. In 2011, a soil boring was advanced inside the building near the elevator to approximately 13 feet. Moderate staining in soil and organic odors were noted in soil during advancement of the boring and hydraulic oil appeared to be present in soil at approximately 12.1 feet and on groundwater. A soil sample collected from this boring was reported to contain TPHd (180 ppm) and TPHmo (370 ppm). Grab groundwater samples were collected from three other borings also advanced at that time outside of the building. They were reported to have a maximum concentration of 100 ppb TPHd and 82 ppb TPHmo. Limited extent under the building.

TSD EPA ID: CAD059494310
CA Waste Code: 214 - Unspecified solvent mixture
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.198

Year: 2010
Gepaid: CAD981568595
TSD EPA ID: ARD069748192
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 0.9075

Year: 2009
Gepaid: CAD981568595
TSD EPA ID: ARD069748192
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 1.089

Year: 2009
Gepaid: CAD981568595
TSD EPA ID: CAD980675276
CA Waste Code: 135 - Unspecified aqueous solution
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 0.462

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROETHANE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
 Site ID: 152524
 Site Name: Tesla, Inc.
 Violation Date: 06-10-2021
 Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
 Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
 Violation Notes: Returned to compliance on 07/23/2021. Hazardous waste containers are not properly labeled: (DINO) 55 gallon drum and 2 x 5 gallon drums storing used coolant are not labeled as hazardous waste. (FA Lab) 5-gallon container storing waste acid is not labeled as hazardous waste, (haz waste acc. area) 55-gallon drum of used oil has no label. 55-gallon drum used to accumulate used oil is labeled "EMPTY DAILY".

Site ID: 152524
Site Name: Tesla, Inc.
Violation Date: 06-10-2021
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Documentation not provided to indicate that personnel signing the manifest have received the required DOT training.
Violation Division: Sunnyvale Department of Public Safety
Violation Program: HW
Violation Source: CERS,

Site ID: 152524
Site Name: Tesla, Inc.
Violation Date: 07-28-2020
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/24/2020. Used portable used oil containers are not properly labelled as hazardous waste (x3).

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-29-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Not reported
Eval Division: Sunnyvale Department of Public Safety
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-10-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: LN2 dewer has been on site for < 30 days. Facility would like to obtain a permit for continued use. Inspector will initiate paperwork, facility to update CERS inventory. CERS was last submitted 03/01/2021. Training documentation not available at time of inspection. Facility to send inspector this documentation within 3 business days. (6/28/2021 - Some employees have received HAZWOPER training and refreshers, however, all employees have not been trained on emergency response related to hazardous materials. Violation #14 issued. MK) No signature obtained due to COVID-19 protocol. Verbal consent to inspect granted.

Eval Division: Sunnyvale Department of Public Safety
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 11-14-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Closure walkthrough. Facility will decontaminate areas and conduct sampling.

Eval Division: Sunnyvale Department of Public Safety
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-13-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Hazardous waste is properly labeled and secondarily contained. Manifests maintained on-site for approximately 3 years, since operating facility. Hazardous waste inspections maintained on-site, transitioning to an electronic module in the future. Initial training and annual refresher training- OK.

Eval Division: Sunnyvale Department of Public Safety

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 01/07/2014.
Violation Division: Sunnyvale Department of Public Safety
Violation Program: HW
Violation Source: CERS,

Site ID: 36776
Site Name: Hologic Corp
Violation Date: 01-12-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/13/2017. Sodium azide waste in storage room labeled with previous accumulation start date from 2015. Update with the current date or properly dispose
Violation Division: Sunnyvale Department of Public Safety
Violation Program: HW
Violation Source: CERS,

Site ID: 36776
Site Name: Hologic Corp
Violation Date: 07-09-2020
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 08/06/2020. Solder waste is not collected at the point of generation. Collect solder waste in an appropriate container with a hazardous waste label.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 04-08-2021
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 05/05/2021. Solder waste is not collected at the point of generation and disposed of as hazardous waste. - Throughout facility. Collect solder waste in a container that is properly labeled as a hazardous waste and closed when not in use.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U123
Waste Description: FORMIC ACID (C,T)

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker: RWP
Local Agency: SANTA CLARA VALLEY WATER DISTRICT
RB Case Number: 43S0174
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, * * 1,2-DICHLOROBENZENE, Other Solvent or Non-Petroleum Hydrocarbon, Freon, Tetrachloroethylene (PCE), Vinyl chloride, Xylene
Site History: Sobrato Development (Sobrato) - RP for former WMI - conducted groundwater extraction and treatment (GWET) at the site until 2003 when asymptotic chlorinated VOC levels were achieved. Based on a successful subsequent enhanced reductive dechlorination (ERD) pilot study, Sobrato proceeded with a full-scale ERD injection program that has been at least partially successful in reducing the CVOC levels in groundwater. The Regional Water Board issued closure for on-site vapor intrusion concerns in 2006. With elevated CVOC levels in the downgradient well P5 and off-site groundwater data gaps, however, Sobrato also evaluated the adjacent off-property building to verify that IA-CVOC levels were below levels of concern. Adjacent sites overseen by the Water Board include the upgradient Lockheed-Martin site to the south and cross-gradient Intersil-Hammerwood site to the west. A slurry wall separates the subject site and Intersil-Hammerwood who installed the wall as part of the Permeable Reaction Barrier at the north end of that site. With the PRB functioning as intended, the downgradient off-site groundwater impacts at well P5 appear to be originating from the subject site.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.

Primary Waste: CNWTRS
Waste Type2: Not reported
Waste2: Contaminated Ground Water
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

City,State,Zip: SUNNYVALE, CA 94089-2211
Region: STATE
Facility Status: Completed - Case Closed
Status Date: 02/14/2017
Global Id: SL18285706
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: Not reported
Latitude: 37.407187317016
Longitude: -121.989140510559
Case Type: Cleanup Program Site
Case Worker: RWP
Local Agency: SANTA CLARA VALLEY WATER DISTRICT
RB Case Number: 43S0808
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride

Site History: This site is south of and adjacent to the former Western Microwave site and southeast of former Intersil-Hammerwood. GWET has reduced chlorinated VOC (CVOC) levels in groundwater 100 to 400 ppb down to 50 to 200 ppb and appears to have been in an asymptotic mode for at least a year. However, prior soil analytical from a sump removal activities in the 1990s indicated potential vadose-zone source under the northeastern corner of the building. Lockheed-Martin conducted a voluntary vapor intrusion (VI) assessment that revealed elevated CVOC levels in the soil gas but no detection of the CVOC of concern (vinyl chloride) in the indoor air. Subsequent indoor air testing indicated that CVOC levels in the breathing zone were on the same order of magnitude as the outside/ambient air.

Historic Generators:

Receive Date: 19930525
Handler Name: LOCKHEED ADVANCED MARINE SYSTEM
Federal Waste Generator Description: Not a generator, verified
State District Owner: CA
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: Yes
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 19900522
Handler Name: LOCKHEED MISSILES & SPACE CO.
Federal Waste Generator Description: Large Quantity Generator
State District Owner: Not reported
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Comments: Source of Activity: Manufacturing of printed circuit board, chemical etching, electrolysis plating, silk screening. CA Circuit moved to Fremont, CA by July 1984. On 11/01/84 removed wastes & decontamination of premises process certified by Emcon, but DHS & RWQCB not satisfied. RWQCB is conducting an investigation on adjacent property to determine the source of contamination. Preliminary Assessment submitted to EPA (Cercla 104).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: De-Certification
Completed Date: 01/01/1984
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 01/01/1984
Comments: Approximately of 7,410 gallons of contaminated liquid and 10,280 pounds of contaminated soil were removed from the site. The site was referred to the RWQCB subsequent to the removal action for the investigation of suspected groundwater contamination. Based on this referral, the site is "decertified" and the previous cert is considered a removal action.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Region: STATE
Facility Status: Open - Remediation
 Status Date: 07/15/2021
 Global Id: SL18228626
 Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
 Lead Agency Case Number: Not reported
 Latitude: 37.4096587510007
 Longitude: -121.989483833313
 Case Type: Cleanup Program Site
 Case Worker: RWP
 Local Agency: SANTA CLARA VALLEY WATER DISTRICT
 RB Case Number: 43S0063
 File Location: Regional Board
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
 Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride
 Site History: Installation of the Permeable Reactive Barrier (PRB) in the mid-1990s effectively remediates all groundwater passing through the PRB to levels approaching or below MCLs. During the vapor intrusion investigative review process, RWB conducted a record review that indicated no sidewall samples were collected from around the former UST.. When the consultant reported a substantial vinyl chloride spike exceeding 2,000 parts per billion (ppb) upgradient of the PRB, Regional Water Board (RWB) staff soon thereafter required additional groundwater sampling from wells close to the building, revealing that one of the wells exceeded our groundwater environmental screening levels (ESLs) for potential vapor intrusion. Based on the ESL exceedance, we required a vapor intrusion investigation that revealed vinyl chloride (VC) and trichloroethene (TCE) in soil gas respectively exceeding our soil gas ESLs by factors of 60 and 8. Additional soil gas testing confirmed those results, leading to sub-slab soil vapor sampling that indicated sub-slab TCE exceeded our ESLs. RWB subsequently required submittal of a workplan for a sub-slab depressurization system (SSDS) and approved the SSDS workplan in May 2009.

Status: Completed - Case Closed
Status Date: 12/04/2009
Case Worker: Not reported
RB Case Number: 14-764
Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 06S1W17R02f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: The facility is located in a commercial/light industrial area near the South Bay Freeway and Lawrence Expressway. The site is approximately 14-acres, with a 4-acre building on-site. The facility is an active UPS package distribution facility. The site is located in the northern portion of the Santa Clara Valley at an elevation of approximately 10-ft above sea level. The Bay is located over a mile to the north. Site History February 2005 One 550-gal used oil UST (double-walled, reinforce fiberglass plastic UST) located in a pit directly north of the automotive shop, and its associated lines, and a used oil dump sink were removed from the site. The tank was operated by United Parcel Service (UPS). The UST was observed to be in good condition with no signs of damage or leakage during removal. No water or groundwater was observed in the excavation. During UST removal activities, stained pea gravel was observed and the gravel was excavated until a concrete slab was encountered at a depth of 8-ft bgs. April 2005 - Three soil samples (SS-1, SS-2 and SS-3) were collected: SS-1 from the bottom of the excavation side wall (north

S100947253

wall) adjacent to the concrete slab; SS-2 from the stained pea gravel stockpile; and SS-3 from the clean excavated material stockpile. Hydrocarbon odor was noted in samples SS-1 and SS-2. Maximum soil concentrations of TPH-d, TPH-g, TPH-m, and Oil & Grease were detected in the stained pea gravel stockpile sample, SS-2, at 6,400-ppm, 32-ppm, 63,000-ppm, and 16,000-ppm, respectively. Several VOCs and metal analytes were detected, at concentrations well below the US EPA Region PRGs. Due to the elevated TPH concentrations, a toxicity test was performed on the S-2 sample, and the sample passed the test. Based on the sampling results, impacts to the subsurface appear to be limited to the used oil and from no other sources. Sixteen soil borings (SB-1 through SB-16) were drilled around the former used oil UST pit to delineate used oil impacts in the subsurface to depths of 16-ft bgs. The lithology was predominantly clay. Used oil was detected in areas just peripheral to the former used oil pit at depths ranging from 8.5-ft to 14-ft bgs. Groundwater was encountered at 13.25-ft bgs, but no sample was taken. June 2005 - 284-tons of used oil-impacted soils were remediated via excavation and off-site disposal. The excavated dimensions were approximately 25-ft wide by 30-ft by 16-ft deep. Four sidewall soil samples were collected from a depth of 13-ft to 15-ft bgs as post-excavation soil analysis. Maximum soil concentration of TPH-m was detected at 120-ppm from south-wall sample at 15-ft bgs. All other analytes were below detection limits. The excavated material was backfilled, compacted and paved placed back into the excavation. No groundwater sample was taken. August 2006 Santa Clara Department of Environmental Health requested additional work to define the extent of soil and groundwater contamination at the site. August 2007 Four soil borings (SB-17, SB-18, SB-19, and SB-20) were advanced to 16-ft bgs. Soil samples above the water table were screened with a photoionization detector (PID). Three soil samples were collected from the vadose zone at each boring. Sample container for soil sample SB-19 (0-2-ft bgs) was broken during shipment to the laboratory and therefore not analyzed. Maximum soil concentrations of TPH-d, TPH-m, and Oil & Gas were detected in SB-18 (0-2-ft bgs) at 7.8-ppm, 70-ppm, and 270-ppm, respectively. All other samples were below detection limits. Groundwater samples were collected from each of the four soil borings and analyzed. Oil and Gas were not analyzed for groundwater collected from soil borings SB-17 and SB-19 due to insufficient amount of sample as a result of broken containers during shipment. One monitoring well, MW-A, was installed in the center of the former used oil UST pit (excavation area) to a depth of 21-ft bgs. The depth to water was gauged at 9.70-ft below top of casing, prior to and after development. No soil sample was collected from MW-A boring (clean fill) for laboratory analysis. Field screening results and visual inspection indicated no petroleum impact. September 2007 - Depth to water in MW-A was gauged at 9.75-ft below top of casing. Groundwater sample was collected for analysis. Maximum groundwater concentration of TPH-d was detected in sample SB-18 at 120-ppb. All other analytes were below detection limits.

Description: Caller states driver was on route and at approximately 1030 Hrs advising UPS of a leaking package. Caller states UPS Personnel responded at approximately 1200 Hrs and transferred vehicles and drove leaking package and vehicle to the terminal which resulted in more of the silicone oil releasing. Caller states personnel started cleaned up at approximately 1730 Hrs. Caller states some of the substance may have released to the pavement while returning the vehicle. Caller states this has been an ongoing problem with the terminal. Incident number200809110001

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)
provides California with information on hazardous waste shipments for
generators, transporters, and treatment, storage, and disposal
facilities.
RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

| <p>Case Type: Case Worker: Local Agency: RB Case Number: File Location: Potential Media Affected: Potential Contaminants of Concern: Site History:</p> | <p>Cleanup Program Site RWP Not reported 43S1175 All Files are on GeoTracker or in the Local Agency Database Indoor Air Freon The site was occupied by Imtech from 1985 to 1999 who manufactured quartz products for the semiconductor industry - and a number of other currently unidentified occupants from 1970 to 1985. Imtech used hazardous materials including large amounts of Freon and lesser amounts of trichloroethene (TCE) and some aromatic volatile organic compounds. After leaving the site, investigations for a property transper revealed groundwater-TCE up to 230 micrograms per liter (ug/L_ on the east side of the property and very low soil-TCE levels that did not appear to be sources. With low soil-TCE levels and the highest groundwater-TCE level encountered on the upgradient edge of the site, the TCE appears to have originated from a currently unidentified offsite source somewhere upgradient of the site within an industrial area of Sunnyvale where a number of nearby potential sources exist. A recent vapor intrusion evaluation indicated that no TCE or other chlorinated volatile organic compounds were detected in the indoor air above levels of concern. Site closure is currently in process.</p> |

12 ft.

CA BOND EXP. PLAN:
 Responsible Party: DETAILED SITE EXPENDITURE PLAN
 Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: The RPs have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. This site has not been identified as an NPL site, nor does it appear to be a candidate in the future. Therefore, it is unlikely that federal funds are a viable source of revenue for this site.
 Site Description: This site was used for various kinds of electronics manufacturing since 1966. It is currently inactive.
 Hazardous Waste Desc: The soil and shallow ground water has been found to contain varying levels of cyclohexanone, methyl ethyl ketone (MEK), vinyl chloride, methylene chloride, benzene, xylene, toluene, ethyl benzene, perchloroethylene (PCE), trichloroethane (TCA), trichloroethylene (TCE), dichloroethane (DCA), trans-dichloroethylene and freon 113.
 Threat To Public Health & Env: These wastes create a potential for the contamination of drinking water. Some potential for direct contact also exist at this site. However, no evidence of affected wells used for drinking water was found in a study completed in late 1987.
 Site Activity Status: Underground storage tanks have been emptied and removed. Barrels have been removed. The site is now completely fenced. A remedial action order was issued to potential responsible parties in August, 1986. In March, 1988, DHS issued final notices of noncompliance with the RAO to the potentially responsible parties. DHS is conducting remedial investigation activities.

since 2012. No breaches to the cap were observed by or reported to EKI between March 2010 and 2015. The Five-Year Review Report concludes that the remedy implemented at the Site (i.e. the cap and land use covenant) is functioning as intended by the decision documents and the remedy remains protective of human health and the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/06/2001
Comments: The fifteen existing groundwater monitoring wells were sampled using diffusion bag samplers in order to determine the status of groundwater conditions at the site and to compare with historical data. The results indicated that the volatile organic compound (VOC) concentrations were consistent with previous sampling results.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Plan
Completed Date: 08/02/2001
Comments: DTSC approves Groundwater Investigation Workplan using diffusion bag samplers to sample existing 15 groundwater monitoring wells.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 03/28/2012
Comments: The consultant for the site owner submitted a report of an inspection of the cap over contaminated soil. No breaches to the cap was observed. The cap inspection will now be performed every two years.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 03/25/2016
Comments: In accordance with the Operation and Maintenance (O&M) Plan, Section 4, EKI Inc. performed a biennial cap inspection on behalf of Stefani & Ricci, Inc., the site owner on February 12, 2016. It was observed during the inspection that all requirements of the O&M Agreement/Plan were met. No breaches to the cap were observed during the inspection.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 03/09/2018
Comments: The Department of Toxic Substances Control (DTSC) received the 2018 Annual Cap Operation and Maintenance Log for the Site, dated February 12, 2018. In accordance with the Operation and Maintenance Plan, Section 4, an inspection was performed on February 7, 2018. No breaches to the cap were observed.

Comments: The Final RAW included approval of the existing Cap as the final remedy.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/31/1998
Comments: DTSC oversaw removal of a subsurface concrete sump (approximately 6 feet long by 4 feet wide and 4 feet deep). After the concrete sump was removed, soil samples were collected to verify that no underlying soil contamination remained. The concrete materials were disposed at a Class III landfill. The sump excavation was backfilled with clean soil and patched with hot asphalt. In addition, five groundwater monitoring wells were closed. The well closure activities were conducted with oversight from the Santa Clara Valley Water District.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/29/2003
Comments: The Final RAW included approval of the existing Cap (the existing 10,000-square foot building foundation onsite) as the final remedy.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 12/29/2003
Comments: The Final RAW included approval of the existing Cap as the final remedy.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/31/1998
Comments: DTSC oversaw removal of a subsurface concrete sump (approximately 6 feet long by 4 feet wide and 4 feet deep). After the concrete sump was removed, soil samples were collected to verify that no underlying soil contamination remained. The concrete materials were disposed at a Class III landfill. The sump excavation was backfilled with clean soil and patched with hot asphalt. In addition, five groundwater monitoring wells were closed. The well closure activities were conducted with oversight from the Santa Clara Valley Water District.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 03/01/2004
Comments: An existing 10,000 square-foot building concrete floor slab was left in place to serve as a cap preventing direct contact with soil potentially containing contaminants of concern beneath the building. A Risk Management Plan and Health and Safety Plan are required for DTSC review and approval should future earthwork activities disturb impacted soils at the site.

Alternate City,St,Zip: SUNNYVALE, CA 94089
Background Info: From 1966 to 1984 the property was used for the manufacturing of magnetic media products. Shallow groundwater beneath the site was impacted with cyclohexanone, methyl ketone, perchloroethylene, trichloroethylene, dichloroethane, 1,1-dichloroethylene, trans-dichloroethylene, vinyl chloride, freon 113, benzene, xylene, toluene, and petroleum hydrocarbons. Cyclohexanone and methyl ethyl ketone have not been detected in the groundwater since 1987. However, chlorinated solvents remain. No known soil contamination has been identified, and it appears groundwater has been impacted by upgradient sources. Underground storage tanks and barrels were removed. A Remedial Action Order was issued in November 1986 and the Final Determinations of Non-compliance in March 1988. The Department conducted a series of investigations in 1992 and 1993 to determine the extent of the shallow groundwater contamination. In 1998, DTSC excavated 2 test pits to determine if potential source areas existed based on a geophysical survey. No source areas were found. A concrete sump was removed and soil samples were collected to verify that no underlying soil contamination remained. The concrete materials were disposed at a Class III landfill. The sump excavation was backfilled with clean soil and patched with hot asphalt. In addition, five groundwater monitoring wells were closed. The well closure activities were conducted with oversight from the Santa Clara Valley Water District. In 2001, the fifteen existing groundwater monitoring wells were sampled using diffusion bag samplers in order to determine the status of groundwater conditions at the site and to compare with historical data. The results indicated that the volatile organic compound (VOC) concentrations were consistent with previous sampling results.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 04/13/2012
Comments: The City of Santa Clara submitted its Annual Summary Report for 2011 that documents the results of a visual inspection of the consolidation cell cap surface. DTSC approved the Report and recommended that a checklist be included in next year's inspection report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 11/29/2012
Comments: The results of the inspection noted that the consolidated cell cap and the Yerba Buena Way cap surfaces were in very good condition with no visible cracks or deterioration that would allow surface water to penetrate through the cap.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 03/11/2014
Comments: The City of Santa Clara performed a cap inspection on February 18, 2014 in accordance with the Operations and Maintenance Plan. The inspection noted that, with the exception of the west end, the consolidation cell cap is in very good condition with few visible cracks or deterioration that would allow surface to penetrate through the cap. The west end of the consolidation cell is being reconstructed to be within the property boundaries. The Yerba Buena Way (now Great American Parkway) cap surfaces were in satisfactory condition.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 04/25/2008
Comments: The roadway and cell area are in good condition. However, a section of the fence was damaged.

well maintained, with no evidence of pavement disturbance. Additionally, the containment cell was well-vegetated and there was no ponded water, erosion, spalling or large cracks or holes observed. There was no evidence of any activities or conditions prohibited by the Deed Restriction in either the containment cell area or on Yerba Buena Way.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/05/2003
Comments: RMDL - Remedial Action approved. Approximately 15,636 cubic yards of polycyclic aromatic hydrocarbons (PAHs)-impacted material was placed in the consolidation cell and capped with a minimum of 2 feet of clean soil, and approximately 16,247 cubic yards of PAHs-impacted material, along with approximately 3,860 cubic yards of petroleum hydrocarbon-impacted soil, was excavated and removed offsite. Yerba Buena Way contained PAHs-impacted material. The Yerba Buena Way and the consolidation cell required deed restrictions and operation and maintenance. An Operation and Maintenance Plan was approved for the Consolidation Cell and Yerba Buena Way.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 05/30/2001
Comments: RAP - Remedial Action Plan (RAP) approved for the remediation of the Santa Clara Gateway. The RAP required excavation and on-site consolidation and capping of the PAH-contaminated soil and excavation and off-site disposal of petroleum hydrocarbon-contaminated soil. The capped area will be deed restricted to prevent uncontrolled access

Completed Date: 05/16/2011
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 09/30/2010
Comments: The Yerba Buena Way roadway was observed to be in good condition and well maintained, with no evidence of pavement disturbance. Additionally, the containment cell was well-vegetated and there was no ponded water, erosion, spalling or large cracks or holes observed. There was no evidence of any activities or conditions prohibited by the Deed Restriction in either the containment cell area or on Yerba Buena Way.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

MAP FINDINGS

SANTA CLARA GATEWAY (Continued)

S104549167

Completed Document Type: Remedial Action Completion Report
 Completed Date: 08/05/2003
 Comments: RMDL - Remedial Action approved. Approximately 15,636 cubic yards of polycyclic aromatic hydrocarbons (PAHs)-impacted material was placed in the consolidation cell and capped with a minimum of 2 feet of clean soil, and approximately 16,247 cubic yards of PAHs-impacted material, along with approximately 3,860 cubic yards of petroleum hydrocarbon-impacted soil, was excavated and removed offsite. Yerba Buena Way contained PAHs-impacted material. The Yerba Buena Way and the consolidation cell required deed restrictions and operation and maintenance. An Operation and Maintenance Plan was approved for the Consolidation Cell and Yerba Buena Way.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Remedial Action Plan
 Completed Date: 05/30/2001
 Comments: RAP - Remedial Action Plan (RAP) approved for the remediation of the Santa Clara Gateway. The RAP required excavation and on-site consolidation and capping of the PAH-contaminated soil and excavation and off-site disposal of petroleum hydrocarbon-contaminated soil. The capped area will be deed restricted to prevent uncontrolled access

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Operation and Maintenance Plan
 Completed Date: 08/05/2003
 Comments: O&M PLAN approved for operation and maintenance activities at both, the Consolidation Cell and Yerba Buena Way.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Design/Implementation Workplan
 Completed Date: 07/13/2001
 Comments: DES - Remedial Design and Implementation Plan approved.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Standard Voluntary Agreement
 Completed Date: 05/19/2000
 Comments: VCA - Signed Voluntary Cleanup Agreement (VCA) with the City of Santa Clara for the investigation and remediation of PAHs at the site.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Land Use Restriction - Site Inspection/Visit
 Completed Date: 04/27/2007
 Comments: No problems noted during the inspection.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Land Use Restriction - Site Inspection/Visit
 Completed Date: 07/16/2009
 Comments: The Yerba Buena Way roadway was observed to be in good condition and well maintained, with no evidence of pavement disturbance. Additionally, the containment cell was well-vegetated and there was no ponded water, erosion, spalling or large cracks or holes observed.

Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 01/21/2010
Comments: The Department of Toxic Substances Control (DTSC) has reviewed the Five-Year Review Yerba Buena Way. The Five Year Review is hereby approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 02/03/2006
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/17/2001
Comments: RIFS - Remedial Investigation/Feasibility Study approved. Investigations identified buried layers of black material, apparently derived from prior charcoal manufacturing activities. Samples of this material indicate the presence of polycyclic aromatic hydrocarbons (PAHs). Petroleum hydrocarbon-impacted soil was encountered underneath and surrounding a maintenance building and the existing garage. Groundwater samples have shown contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 02/18/2015
Comments: DTSC concurred with the conclusion of the Five-Year Review that the selected remedial action remains protective of human health and the environment.

Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 02/02/2017
Comments: City of Santa Clara staff performed an inspection of the capped areas of the site on January 30, 2017 and submitted an annual summary report documenting the inspection. No damage to or deterioration of the capped areas were observed and the cap was found to be in satisfactory condition. Based on the annual summary report, DTSC concluded site is in compliance with the Land Use Covenant and the Operation and Maintenance Agreement.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 03/30/2011
Comments: The certification report that all remedial activities have been completed as outline in the approved Remedial Action Workplan. The lead contaminated soil in the exposed areas have been removed to unrestricted use and backfilled with cleanup imported materials.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 10/26/2010
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 05/06/2010
Comments: This is a Voluntary Cleanup Agreement between the Department and Habitat for Humanity, Silicon Valley for the investigation and cleanup of lead contamination for residential use.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 11/15/2010
Comments: The Gianera Work Notice has been completed to announce the start of the RAW implementation to remove lead contaminated soil.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 09/16/2010
Comments: The Gianera Removal Action Worlplan was public notice on September 22, 2010 and was sent to the San Jose Press Democrat on September 16, 2010. The public comment period will run from September 22 through October 22, 2010.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/22/2011
Comments: Final Completion Report documents the remedial activities that were conducted under the approved Removal Action Workplan. Approxamety 123 tons of lead contaminated soil was excavated. Confirmation samples showed they met the cleanup goal of 80 mg/kg for unrestricted use.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 05/11/2010
Comments: DTSC approved the supplemental soil investigation work plan to characterize the vertial extent of the lead contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
|---|-------------------------|
| 06085C0061H | FEMA FIRM Flood data |
| <u>Additional Panels in search area:</u> | <u>FEMA Source Type</u> |
| 06085C0045H | FEMA FIRM Flood data |
| 06085C0062J | FEMA FIRM Flood data |

NATIONAL WETLAND INVENTORY

| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
|------------------------------------|--|
| MILPITAS | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

| | |
|-----------------------------|--|
| Search Radius: | 1.25 miles |
| Location Relative to TP: | 1/8 - 1/4 Mile NNW |
| Site Name: | DYSAN CORPORATION |
| Site EPA ID Number: | CAD063541445 |
| Groundwater Flow Direction: | N ON A REGIONAL BASIS. |
| Measured Depth to Water: | 5 feet to 7 feet. |
| Hydraulic Connection: | The shallow aquifer and lower usable aquifer present at a depth of approximately 200 to 250 feet are separated by a continuous clay layer. |
| Sole Source Aquifer: | No information about a sole source aquifer is available |
| Data Quality: | Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s) |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| Not Reported | | |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|--|---------------------------|------------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Permeability Rate (in/hr) | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 9 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 0.60 Min: 0.20 | Max: 7.30 Min: 5.60 |
| 2 | 9 inches | 41 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 0.60 Min: 0.20 | Max: 7.80 Min: 5.60 |
| 3 | 41 inches | 76 inches | sandy clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. | Max: 0.60 Min: 0.20 | Max: 7.80 Min: 5.60 |

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.
