Case Worker: Not reported
RB Case Number: 14-764
Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 06S1W17R02f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History:

The facility is located in a commercial/light industrial area near the South Bay Freeway and Lawrence Expressway. The site is approximately 14-acres, with a 4-acre building on-site. The facility is an active UPS package distribution facility. The site is located in the northern portion of the Santa Clara Valley at an elevation of approximately 10-ft above sea level. The Bay is located over a mile to the north. Site History February 2005 One 550-gal used oil UST (double-walled, reinforce fiberglass plastic UST) located in a pit directly north of the automotive shop, and its associated lines, and a used oil dump sink were removed from the site. The tank was operated by United Parcel Service (UPS). The UST was observed to be in good condition with no signs of damage or leakage during removal. No water or groundwater was observed in the excavation. During UST removal activities, stained pea gravel was observed and the gravel was excavated until a concrete slab was encountered at a depth of 8-ft bgs. April 2005 - Three soil samples (SS-1, SS-2 and SS-3) were collected: SS-1 from the bottom of the excavation side wall (north wall) adjacent to the concrete slab; SS-2 from the stained pea gravel stockpile; and SS-3 from the clean excavated material stockpile. Hydrocarbon odor was noted in samples SS-1 and SS-2. Maximum soil concentrations of TPH-d, TPH-g, TPH-m, and Oil & Grease were detected in the stained pea gravel stockpile sample, SS-2, at 6,400-ppm, 32-ppm, 63,000-ppm, and 16,000-ppm, respectively. Several VOCs and metal analytes were detected, at concentrations well below the US EPA Region PRGs. Due to the elevated TPH concentrations, a toxicity test was performed on the S-2 sample, and the sample passed the test. Based on the sampling results, impacts to the subsurface appear to be limited to the used oil and from no other sources. Sixteen soil borings (SB-1 through SB-16) were drilled around the former used oil UST pit to delineate used oil impacts in the subsurface to depths of 16-ft bgs. The lithology was predominantly clay. Used oil was

S100947253

detected in areas just peripheral to the former used oil pit at depths ranging from 8.5-ft to 14-ft bgs. Groundwater was encountered at 13.25-ft bgs, but no sample was taken. June 2005 - 284-tons of used oil-impacted soils were remediated via excavation and off-site disposal. The excavated dimensions were approximately 25-ft wide by 30-ft by 16-ft deep. Four sidewall soil samples were collected from a depth of 13-ft to 15-ft bgs as post-excavation soil analysis. Maximum soil concentration of TPH-m was detected at 120-ppm from south-wall sample at 15-ft bgs. All other analytes were below detection limits. The excavated material was backfilled, compacted and paved placed back into the excavation. No groundwater sample was taken. August 2006 Santa Clara Department of Environmental Health requested additional work to define the extent of soil and groundwater contamination at the site. August 2007 Four soil borings (SB-17, SB-18, SB-19, and SB-20) were advanced to 16-ft bgs. Soil samples above the water table were screened with a photoionization detector (PID). Three soil samples were collected from the vadose zone at each boring. Sample container for soil sample SB-19 (0-2-ft bgs) was broken during shipment to the laboratory and therefore not analyzed. Maximum soil concentrations of TPH-d, TPH-m, and Oil & Gas were detected in SB-18 (0-2-ft bgs) at 7.8-ppm, 70-ppm, and 270-ppm, respectively. All other samples were below detection limits. Groundwater samples were collected from each of the four soil borings and analyzed. Oil and Gas were not analyzed for groundwater collected from soil borings SB-17 and SB-19 due to insufficient amount of sample as a result of broken containers during shipment. One monitoring well, MW-A, was installed in the center of the former used oil UST pit (excavation area) to a depth of 21-ft bgs. The depth to water was gauged at 9.70-ft below top of casing, prior to and after development. No soil sample was collected from MW-A boring (clean fill) for laboratory analysis. Field screening results and visual inspection indicated no petroleum impact. September 2007 - Depth to water in MW-A was gauged at 9.75-ft below top of casing. Groundwater sample was collected for analysis. Maximum groundwater concentration of TPH-d was detected in sample SB-18 at 120-ppb. All other analytes were below detection limits.

and drove leaking package and vehicle to the terminal which resulted in more of the silicone oil releasing. Caller states personnel started cleaned up at approximately 1730 Hrs. Caller states some of the substance may have released to the pavement while returning the vehicle. Caller states this has been an ongoing problem with the terminal. Incident number 200809110001

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency Case Number: Not reported
Latitude: 37.4099379839931
Longitude: -121.992498153442
Case Type: Cleanup Program Site
Case Worker: RWP
Local Agency: Not reported
RB Case Number: 43S1175
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Indoor Air
Potential Contaminants of Concern: Freon
Site History: The site was occupied by Imtech from 1985 to 1999 who manufactured quartz products for the semiconductor industry - and a number of other currently unidentified occupants from 1970 to 1985. Imtech used hazardous materials including large amounts of Freon and lesser amounts of trichloroethene (TCE) and some aromatic volatile organic compounds. After leaving the site, investigations for a property transfer revealed groundwater-TCE up to 230 micrograms per liter (ug/L) on the east side of the property and very low soil-TCE levels that did not appear to be sources. With low soil-TCE levels and the highest groundwater-TCE level encountered on the upgradient edge of the site, the TCE appears to have originated from a currently unidentified offsite source somewhere upgradient of the site within an industrial area of Sunnyvale where a number of nearby potential sources exist. A recent vapor intrusion evaluation indicated that no TCE or other chlorinated volatile organic compounds were detected in the indoor air above levels of concern. Site closure is currently in process.

 POTW: Not reported
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 08/18/2008
Comments: The concrete slab in the building appeared to be in good condition.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 12/29/2003
Comments: The Final RAW included approval of the existing Cap as the final remedy.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/31/1998
Comments: DTSC oversaw removal of a subsurface concrete sump (approximately 6 feet long by 4 feet wide and 4 feet deep). After the concrete sump was removed, soil samples were collected to verify that no underlying soil contamination remained. The concrete materials were disposed at a Class III landfill. The sump excavation was backfilled with clean soil and patched with hot asphalt. In addition, five groundwater monitoring wells were closed. The well closure activities were conducted with oversight from the Santa Clara Valley Water District.

Completed Document Type: 5 Year Review Reports
Completed Date: 03/28/2016
Comments: EKI Inc on behalf of Stefani & Ricci, Inc., the site owner, conducted a Five-Year Review for the period from 2011 through 2015. Cap visual surveys have been performed annually from 2005 to 2010 and biennially since 2012. No breaches to the cap were observed by or reported to EKI between March 2010 and 2015. The Five-Year Review Report concludes that the remedy implemented at the Site (i.e. the cap and land use covenant) is functioning as intended by the decision documents and the remedy remains protective of human health and the environment.

Comments: The concrete slab in the building appeared to be in good condition.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 12/29/2003
Comments: The Final RAW included approval of the existing Cap as the final remedy.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/31/1998
Comments: DTSC oversaw removal of a subsurface concrete sump (approximately 6 feet long by 4 feet wide and 4 feet deep). After the concrete sump was removed, soil samples were collected to verify that no underlying soil contamination remained. The concrete materials were disposed at a Class III landfill. The sump excavation was backfilled with clean soil and patched with hot asphalt. In addition, five groundwater monitoring wells were closed. The well closure activities were conducted with oversight from the Santa Clara Valley Water District.

Background Info: From 1966 to 1984 the property was used for the manufacturing of magnetic media products. Shallow groundwater beneath the site was impacted with cyclohexanone, methyl ketone, perchloroethylene, trichloroethylene, dichloroethane, 1,1-dichloroethylene, trans-dichloroethylene, vinyl chloride, freon 113, benzene, xylene, toluene, and petroleum hydrocarbons. Cyclohexanone and methyl ethyl ketone have not been detected in the groundwater since 1987. However, chlorinated solvents remain. No known soil contamination has been identified, and it appears groundwater has been impacted by upgradient sources. Underground storage tanks and barrels were removed. A Remedial Action Order was issued in November 1986 and the Final Determinations of Non-compliance in March 1988. The Department conducted a series of investigations in 1992 and 1993 to determine the extent of the shallow groundwater contamination. In 1998, DTSC excavated 2 test pits to determine if potential source areas existed based on a geophysical survey. No source areas were found. A concrete sump was removed and soil samples were collected to verify that no underlying soil contamination remained. The concrete materials were disposed at a Class III landfill. The sump excavation was backfilled with clean soil and patched with hot asphalt. In addition, five groundwater monitoring wells were closed. The well closure activities were conducted with oversight from the Santa Clara Valley Water District. In 2001, the fifteen existing groundwater monitoring wells were sampled using diffusion bag samplers in order to determine the status of groundwater conditions at the site and to compare with historical data. The results indicated that the volatile organic compound (VOC) concentrations were consistent with previous sampling results.

Higher
Actual:
12 ft.

CA BOND EXP. PLAN:
 Responsible Party: DETAILED SITE EXPENDITURE PLAN
 Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: The RPs have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. This site has not been identified as an NPL site, nor does it appear to be a candidate in the future. Therefore, it is unlikely that federal funds are a viable source of revenue for this site.
 Site Description: This site was used for various kinds of electronics manufacturing since 1966. It is currently inactive.
 Hazardous Waste Desc: The soil and shallow ground water has been found to contain varying levels of cyclohexanone, methyl ethyl ketone (MEK), vinyl chloride, methylene chloride, benzene, xylene, toluene, ethyl benzene, perchloroethylene (PCE), trichloroethane (TCA), trichloroethylene (TCE), dichloroethane (DCA), trans-dichloroethylene and freon 113.
 Threat To Public Health & Env: These wastes create a potential for the contamination of drinking water. Some potential for direct contact also exist at this site. However, no evidence of affected wells used for drinking water was found in a study completed in late 1987.
 Site Activity Status: Underground storage tanks have been emptied and removed. Barrels have been removed. The site is now completely fenced. A remedial action order was issued to potential responsible parties in August, 1986. In March, 1988, DHS issued final notices of noncompliance with the RAO to the potentially responsible parties. DHS is conducting remedial investigation activities.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 07/16/2009
Comments: The Yerba Buena Way roadway was observed to be in good condition and well maintained, with no evidence of pavement disturbance. Additionally, the containment cell was well-vegetated and there was no ponded water, erosion, spalling or large cracks or holes observed. There was no evidence of any activities or conditions prohibited by the Deed Restriction in either the containment cell area or on Yerba Buena Way.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 05/19/2000
Comments: VCA - Signed Voluntary Cleanup Agreement (VCA) with the City of Santa Clara for the investigation and remediation of PAHs at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 04/27/2007
Comments: No problems noted during the inspection.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/17/2001
Comments: RIFS - Remedial Investigation/Feasibility Study approved. Investigations identified buried layers of black material, apparently derived from prior charcoal manufacturing activities. Samples of this material indicate the presence of polycyclic aromatic hydrocarbons (PAHs). Petroleum hydrocarbon-impacted soil was encountered underneath and surrounding a maintenance building and the existing garage. Groundwater samples have shown contamination.

Comments: DES - Remedial Design and Implementation Plan approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/05/2003
Comments: RMDL - Remedial Action approved. Approximately 15,636 cubic yards of polycyclic aromatic hydrocarbons (PAHs)-impacted material was placed in the consolidation cell and capped with a minimum of 2 feet of clean soil, and approximately 16,247 cubic yards of PAHs-impacted material, along with approximately 3,860 cubic yards of petroleum hydrocarbon-impacted soil, was excavated and removed offsite. Yerba Buena Way contained PAHs-impacted material. The Yerba Buena Way and the consolidation cell required deed restrictions and operation and maintenance. An Operation and Maintenance Plan was approved for the Consolidation Cell and Yerba Buena Way.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
| 06085C0061H | FEMA FIRM Flood data |

NATIONAL WETLAND INVENTORY

| | |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
| MILPITAS | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

| | |
|-----------------------------|--|
| Search Radius: | 1.25 miles |
| Location Relative to TP: | 1/8 - 1/4 Mile NNW |
| Site Name: | DYSAN CORPORATION |
| Site EPA ID Number: | CAD063541445 |
| Groundwater Flow Direction: | N ON A REGIONAL BASIS. |
| Measured Depth to Water: | 5 feet to 7 feet. |
| Hydraulic Connection: | The shallow aquifer and lower usable aquifer present at a depth of approximately 200 to 250 feet are separated by a continuous clay layer. |
| Sole Source Aquifer: | No information about a sole source aquifer is available |
| Data Quality: | Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s) |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|--|---------------------------|------------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Permeability Rate (in/hr) | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 9 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 0.60 Min: 0.20 | Max: 7.30 Min: 5.60 |
| 2 | 9 inches | 41 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 0.60 Min: 0.20 | Max: 7.80 Min: 5.60 |
| 3 | 41 inches | 76 inches | sandy clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. | Max: 0.60 Min: 0.20 | Max: 7.80 Min: 5.60 |

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Intervest Mortgage Investment Company to conduct a Phase I Environmental Site Assessment (ESA), in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 5201 Patrick Henry Drive in the City and County of Santa Clara County, California. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report.

PROPERTY DESCRIPTION

The subject property, which consists of an office building, is bound by Patrick Henry Drive to the west and Bunker Hill Lane to the south and is located in a commercial area of Santa Clara, California. The property totals approximately 7.07 acres and is improved with a three-story building totaling approximately 124,000 square feet. The building is not constructed with a basement or sub-grade area. The subject property is currently occupied by FileMaker. On-site operations include administrative activities. In addition to the subject property building, the property is improved with asphalt-paved parking areas and associated landscaping.

During the site reconnaissance, hazardous materials consisting of a 400-gallon diesel emergency generator, two compressed halon gas cylinders, and general cleaning supplies were observed in connection with FileMaker's on-site activities. No environmental concerns associated with the storage and/or use of these materials were noted during the site reconnaissance or during the review of regulatory records. Please refer to Section 7.1 for additional information.

According to historical sources, the current subject property building was constructed in 1980 for use as an office building and has since been occupied by Dysan Corporation (the original tenant), Claris Corporation circa 1990 to 2005, and FileMaker since 1995. Prior to the construction of the building, the property consisted of agricultural land.

Please refer to Section 3.1 for further information regarding the former use of the subject property for agricultural production.

The subject property, listed as Dysan Corporate Offices, was identified in the regulatory database as a Historical Underground Storage Tank (HIST UST) site and an Emissions Inventory Data (EMI) site, and is further discussed in Section 5.1.

The immediately surrounding properties consist of the following:

| Direction from Site | Address-Tenant/Use |
|---------------------|---|
| North | Relypsa Inc. (5301 Patrick Henry Drive) and Lumenis Inc. (5302 Betsy Ross Drive) |
| Northwest | Abbott Laboratories (5440 Patrick Henry Drive) |
| South | Bunker Hill Drive followed by an underground parking garage and four office buildings (3051 Tasman Drive) |
| East | Bunker Hill Plaza (5225 Betsy Ross Drive) |
| West | Patrick Henry Drive followed by Coherent Inc. (5200 Patrick Henry Drive) |

The northwest and west adjacent sites at 5200/5200-1 and 5440 Patrick Henry Drive were identified in the regulatory database as Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) No Further Remedial Action Planned (NFRAP), Spills, Leaks, Investigation, and Cleanup (SLIC), Resource Conservation and Recovery Act (RCRA) Large-Quantity Generator (LQG), FINDS, HIST UST, Haznet, and EMI sites. Additionally, the adjacent site to the north at 5301 Patrick Henry Drive was identified as a CERCLIS NFRAP, RCRA Small-Quantity Generator (SQG), FINDS, Haznet, and EMI site. Please refer to the Findings section below and to Section 5.1.

Based upon topographic map interpretation, the direction of groundwater flow beneath the subject property is inferred to be to the north toward San Francisco Bay. Based on groundwater monitoring information from the adjacent site at 5400 Patrick Henry Drive, groundwater is presumed to be present at an estimated depth of 7 to 29 feet below ground surface (bgs).

FINDINGS

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-05 as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. AEI's assessment has revealed the following RECs associated with the subject property or nearby properties:

- No on-site RECs were identified during the course of this assessment.

Historical Recognized Environmental Conditions (HRECs) are defined by the ASTM Standard Practice E1527-05 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's assessment has revealed the following HRECs associated with the subject property or nearby properties:

- No on-site HRECs were identified during the course of this assessment.

De Minimis Environmental Conditions include environmental concerns identified by AEI that warrant discussion but do not qualify as RECs, as defined by the ASTM Standard Practice E1527-05. AEI's assessment has revealed the following de minimis environmental conditions associated with the subject property or nearby properties:

- No on-site de minimis environmental conditions were identified during the course of this assessment.

Business Environmental Risks (BERs) include risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the subject property, not necessarily limited to those environmental issues required to be investigated in the standard ASTM scope. BERs may affect the liabilities and financial obligations of the client, the health & safety of site occupants, and the value and marketability of the subject property. AEI's assessment has revealed the following BERs associated with the subject property or nearby properties:

- The subject property, identified as Dysan Corporate Offices, was listed in the regulatory database as a HIST UST. According to the database and records on file with the Santa Clara Fire Department (SCFD) a concrete 1,200-gallon waste sump (identified as a UST in the database) was installed on the subject property in 1981. According to the SCFD records, a groundwater monitoring well was installed in connection with this sump for the purposes of leak detection. The monitoring well was subsequently been destroyed under the oversight of the Santa Clara Valley Water District (SCVWD). Although the date of the former well's destruction is unknown, it was likely when the waste sump was decommissioned as there was no evidence of the sump observed during AEI's site reconnaissance. Although no further information was found regarding the sump and associated monitoring well, based on the fact that the monitoring well was destroyed under the oversight of the SCVWD, AEI infers that the sump was also decommissioned under SCVWD oversight. Furthermore, it is unlikely that the well would have been destroyed if there was evidence of contamination detected in the well, as the well would have been retained and sampled in order to characterize a release. Based on this information, the former sump and associated well are not expected to represent a significant environmental concern.
- The regulatory database and SCFD records indicate that another underground container (installed in 1979) was present at the subject property. Although no specific information was available regarding this second container, based on information provided by the key site contacts, it may have been a former grease trap installed to service the kitchen of the subject property. During the site reconnaissance, an old cleanout typical of a grease trap was observed near the current grease trap, which has a second separate cleanout. Therefore, based on the presumed use of the container installed in 1979, the former underground container is not expected to represent a significant environmental concern.
- According to records on file with the SCVWD, three "other-active" wells, two destroyed wells and one abandoned well are located on the subject property. These wells are reportedly owned by the US EPA and permitted by the SCVWD. No hazardous materials were observed in the vicinity of the wells, which appeared to be properly capped and maintained. Based on this information, the wells present at the subject property are not expected to represent a significant environmental concern.
- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time.
- Due to the age of the subject property building, there is a potential that asbestos-containing materials (ACMs) are present. All suspect ACMs were observed in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, an asbestos survey adhering to AHERA sampling protocol should be performed prior to demolition or renovation activities that may disturb suspect ACMs.

- AEI Consultants observed interior areas of the subject building in order to identify the significant presence of mold. During the AEI's April 5, 2012 on-site reconnaissance, obvious visual signs of mold growth or conditions conducive for mold growth were observed on piping insulation within the equipment room located on the subject property roof. AEI re-inspected the area on April 30, 2012, and observed that the old pipe insulation had been removed and replaced with new insulation and wrapping. No evidence of mold was observed during AEI's re-inspection. Based on the remedial action conducted, the former presence of mold is not expected to represent a significant concern.

CONCLUSIONS, OPINIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment for the property located at 5201 Patrick Henry Drive in the City and County of Santa Clara, California, in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312). Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed no evidence of RECs in connection with the property. AEI recommends no further investigations for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment (ESA) performed in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 5201 Patrick Henry Drive in the City and County of Santa Clara, California (Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I Environmental Site Assessment is to assist the client in identifying potential environmental liabilities associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property, as well as regulatory non-compliance that may have occurred at the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

The goal of AEI Consultants in conducting the Phase I Environmental Site Assessment was to identify the presence or likely presence of any hazardous substances or petroleum products on the property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, groundwater, or surface water of the property.

1.2 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI Consultants in this report. AEI Consultants relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI Consultants has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data, or well data from adjacent sites are assumed based on contours depicted on the United States Geological Survey topographic maps. AEI Consultants assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.3 LIMITATIONS

Property conditions, as well as local, state, tribal and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, vapor intrusion, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-05.

If requested by the client, these non-scope issues are discussed in Section 7.2. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). ASTM Standard Practice E1527-05 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

- 1) 42 U.S.C § 9601(35)(B), referenced in the ASTM Standard Practice E1527-05.
- 2) Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
- 3) 42 U.S.C. 9601(40) and 42 U.S.C. 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property visit.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted

procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

1.4 LIMITING CONDITIONS

The performance of this Phase I Environmental Site Assessment was limited by the following conditions:

- The User did not complete the ASTM User questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this investigation.
- Due to a number of vehicles parked in the subject property parking lot and the vegetation present onsite, direct visual observation of many of the paved and landscaped surfaces of the property was not possible. Features may be present that were not observed during AEI’s site inspection.

1.5 DATA GAPS AND DATA FAILURE

According to ASTM E1527-05, data gaps occur when the Environmental Professional is unable to obtain information required, despite good faith efforts to gather such information.

Data failure is one type of data gap. According to ASTM E1527-05 “data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met”. Pursuant to ASTM Standards, historical sources are required to document property use back to the property’s first developed use or back to 1940, whichever is earlier.

The following data gap was identified during the course of this assessment:

| | | | | |
|--|--|--|----|---|
| Data Gap: | Lack of historical sources dating to 1940 | | | |
| Does this data gap affect the EP’s ability to identify RECs? | Yes | | No | X |
| Rationale | The earliest historical resource obtained during this investigation was an aerial photograph from 1948, which indicated development of the subject property for agricultural uses. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, it is assumed that prior to 1948 the subject property would have been used for agricultural purposes, if not undeveloped. Based on this notion, this data gap is not expected to significantly alter the findings of this investigation. | | | |
| Information/ sources consulted | Aerial photographs, Sanborn maps, city directories, building records | | | |

1.6 RELIANCE

All reports, both verbal and written, are for the benefit of Intervest Mortgage Investment Company and The Lincoln National Life Insurance Company. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement

with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's Proposal and Standard Terms & Conditions executed by Intervest Mortgage Investment Company on March 29, 2012. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

The subject property, which consists of an office building, is bound by Patrick Henry Drive to the west and Bunker Hill Lane to the south and is located in a commercial area of Santa Clara, California. The property totals approximately 7.07 acres and is improved with a three-story building totaling approximately 124,000 square feet. The building is not constructed with a basement or sub-grade area. The subject property is currently occupied by FileMaker. On-site operations include administrative activities. In addition to the subject property building, the property is improved with asphalt-paved parking areas and associated landscaping.

The subject property, listed as Dysan Corporate Offices, was identified in the regulatory database as a HIST UST site and an EMI site, and is further discussed in Section 5.1.

The Assessor's Parcel Number (APN) for the subject property is 104-50-004. According to Mr. Ryan Balzer, heating and cooling systems on the subject property are fueled by natural gas and electricity provided by Silicon Valley Power and Pacific Gas & Electric (PG&E), respectively, and potable water and sewage disposal are provided by municipal sources.

Refer to Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs for site location.

2.2 SITE AND VICINITY CHARACTERISTICS

The immediately surrounding properties consist of the following:

| Direction from Site | Address-Tenant/Use |
|---------------------|---|
| North | Relypsa Inc. (5301 Patrick Henry Drive) and Lumenis Inc. (5302 Betsy Ross Drive) |
| Northwest | Abbott Laboratories (5440 Patrick Henry Drive) |
| South | Bunker Hill Drive followed by an underground parking garage and four office buildings (3051 Tasman Drive) |
| East | Bunker Hill Plaza (5225 Betsy Ross Drive) |
| West | Patrick Henry Drive followed by Coherent Inc. (5200 Patrick Henry Drive) |

The northwest and west adjacent sites at 5200/5200-1 and 5440 Patrick Henry Drive were identified in the regulatory database as CERCLIS NFRAP, SLIC, RCRA-LQG, FINDS, HIST UST, Haznet, and EMI sites. Additionally, the adjacent site to the north at 5301 Patrick Henry Drive was identified as a CERCLIS NFRAP, RCRA SQG, FINDS, Haznet, and EMI site. Please refer to Section 5.1.

2.3 PHYSICAL SETTING

Geology: Based on a review of the United States Department of Agriculture (USDA) Soil Survey for the area of the subject property, the soils in the vicinity of the subject property are classified as Urbanland-Hangerone complex, 0 to 2 percent slope, drained. Soils from this series are characterized as a clay or gravelly loam.

| | |
|---|---|
| USGS Topographic Map: | Sunnyvale, California Quadrangle |
| Nearest surface water to subject property: | San Francisco Bay/0.82 mile north of the subject property |
| Gradient Direction/Source: | North/Topographic map interpretation |
| Estimated Depth to Groundwater/Source: | 7 to 29 feet below ground surface (bgs)/Groundwater monitoring information from the adjacent site at 5400 Patrick Henry Drive |

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

3.1 HISTORICAL SUMMARY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-05 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historic city directories, Sanborn fire insurance maps and agency records is as follows:

| Date Range | Subject Property Description/Use | Source(s) |
|--------------|----------------------------------|---|
| 1948-1980 | Agricultural land | Aerial photographs |
| 1980-Present | Current building | Aerial photographs, building records, city directories, site reconnaissance |

According to historical sources, the current subject property building was constructed in 1980 for use as an office building and has since been occupied by Dysan Corporation (the original tenant), Claris Corporation circa 1990 to 2005, and FileMaker since 1995. Prior to the construction of the building, the property consisted of agricultural land.

The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time.

If available, copies of historical sources are provided in the report appendices.

3.2 AERIAL PHOTOGRAPH REVIEW

AEI Consultants reviewed aerial photographs of the subject property and surrounding area. Aerial photographs were reviewed for the following years:

| Date(s) | Scale | Subject Property Description | Surrounding Area Descriptions |
|--|---|------------------------------|--|
| 1948, 1954, 1960, 1967, 1970 | 1:800, 1:500, 1:800, 1:800, 1:800 | Agricultural land | North: Agricultural land South: Agricultural land East: Agricultural land West: Agricultural land |
| 1981 | 1:800 | Current building | North: Vacant land South: Bunker Hill Lane followed by vacant land East: Betsy Ross Drive followed by the current building West: Patrick Henry Drive followed by the current building |

| | | | |
|------------|-------|------------------|--|
| 1982 | 1:800 | Current building | North: The current building on the western portion South: Bunker Hill Land followed by the current buildings East: Betsy Ross Drive followed by the current building West: Patrick Henry Drive followed by the current building |
| 1993, 2004 | 1:528 | Current building | North: The current buildings South: Bunker Hill Land followed by the current buildings East: Betsy Ross Drive followed by the current building West: Patrick Henry Drive followed by the current building |

3.3 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the Seattle Public Library online collection and the University of California, Berkeley McCone Hall Earth Science Library collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.4 CITY DIRECTORIES

A search of historic city directories was conducted for the subject property address using AEI's collection of Haines and Company's Criss-Cross Directories. Directories were available and reviewed for the years 1970, 1975, 1980, 1985, 1990, 1995, 2000, and 2005. The following table summarizes the results of the city directory search.

City Directory Search Results

| Date(s) | Occupant Listed |
|------------------------|--|
| 1970, 1975, 1980, 1985 | Address not listed |
| 1990 | Claris Corporation; Xidex Corporation Headquarters |
| 1995 | Claris Corporation |
| 2000, 2005 | Claris Corporation; Filemaker Inc. |

A review of historical city directories indicates the subject property was occupied by Claris Corporation circa 1990 to 2005 and Filemaker Inc. in 2005.

No environmental concerns were noted during the city directory review.

3.5 HISTORICAL TOPOGRAPHIC MAPS

In accordance with our approved scope of services, historical topographic maps were not reviewed as a part of this assessment.

3.6 CHAIN OF TITLE

In accordance with our approved scope of services, AEI reviewed historical ownership documentation to verify prior site ownership. AEI contracted Environmental Data Resources (EDR) to perform this review, who reviewed ownership records back to January 1947.

EDR identified the current site owner as Batton Associates, LLC, whom obtained ownership on February 24, 2000 from Marie A. Batton, an unmarried woman. Other historical owners were identified to include Fespar Enterprises, Inc, Marriott Corporation and several private individuals. Historical owners of potential environmental concern were not identified during the review of EDR's report. A copy of EDR's report is provided in the appendices.

4.0 REGULATORY AGENCY RECORDS REVIEW

4.1 REGULATORY AGENCIES

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to Activity and Use Limitations (AULs), defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1.1 HEALTH DEPARTMENT

On March 30, 2012, AEI contacted the Santa Clara County Department of Environmental Health (SCCDEH) for information on the subject property and nearby sites of concern. Files at this agency may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

No information indicating current or prior use or storage of hazardous materials, or the existence of AULs was on file for the subject property with the SCCEHD.

4.1.2 FIRE DEPARTMENT

On March 30, 2012, AEI contacted the Santa Clara Fire Department (SCFD) for information on the subject property to identify any evidence of previous or current hazardous material usage.

According to the database and records on file with the SCFD a concrete 1,200-gallon waste sump (identified as a UST in the database) was installed on the subject property in 1981. According to the SCFD records, a groundwater monitoring well was installed in connection with this sump for the purposes of leak detection. The monitoring well was subsequently been destroyed under the oversight of the Santa Clara Valley Water District (SCVWD). Although the date of the former well's destruction is unknown, it was likely when the waste sump was decommissioned as there was no evidence of the sump observed during AEI's site reconnaissance. Although no further information was found regarding the sump and associated monitoring well, based on the fact that the monitoring well was destroyed under the oversight of the SCVWD, AEI infers that the sump was also decommissioned under SCVWD oversight. Furthermore, it is unlikely that the well would have been destroyed if there was evidence of contamination detected in the well, as the well would have been retained and sampled in order to characterize a release. Based on this information, the former sump and associated well are not expected to represent a significant environmental concern.

The regulatory database and SCFD records indicate that another underground container (installed in 1979) was present at the subject property. Although no specific information was available regarding this second container, based on information provided by the key site contacts, it may have been a former grease trap installed to service the kitchen of the subject property. During the site reconnaissance, an old cleanout typical of a grease trap was observed near the current grease trap, which has a second separate cleanout. Therefore, based on the presumed use of the container installed in 1979, the former underground container is not expected to represent a significant environmental concern.

4.1.3 BUILDING DEPARTMENT

On April 9, 2012, AEI visited the Santa Clara Building Department's (SCBD) website for information on the subject property in order to identify historical tenants and property use. Please refer to the following table for a listing of permits reviewed:

Building Permits Reviewed

| Year(s) | Owner/Applicant | Description of Permit/Building Use |
|----------------|---------------------------|---|
| 1980 | Carl N. Swenson Co., Inc. | Erect new four-story office building with cafeteria |
| 1991 | Thermal Mechanical | Add trash enclosure, AC system |
| 2002 | Thermal Mechanical | Rooftop floor mounted AC units |
| 2007 | Progressive Electric | Replace UPS system in data center |
| 2008 | Progressive Electric | Install non-emergency generator with 8' CMU enclosure |

Records on file with the SCBD indicates the subject property building was constructed in 1980 for use as an office building. No information indicating current or prior use or storage of hazardous materials, or the existence of AULs was on file for the subject property with the SCBD.

4.1.4 PLANNING DEPARTMENT

On April 9, 2012, AEI contacted the Santa Clara Planning Department (SCPD) for information on the subject property in order to identify AULs associated with the subject property.

No information indicating the existence of AULs was on file for the subject property with the SCPD.

4.1.5 COUNTY ASSESSOR OFFICE

On March 30, 2012, AEI contacted the Santa Clara County Assessor's Office (SCCAO) for information on the subject property in order to determine the earliest recorded date of development and use.

According to the SCCAO, the earliest recorded date of development on subject property was 1980.

4.1.6 DEPARTMENT OF OIL AND GAS

Department of Oil and Gas (DOG) maps concerning the subject property and nearby properties were reviewed. DOG maps contain information regarding oil and gas development.

According to the DOG map, there are no oil or gas wells within 500 feet of the subject property. No environmental concerns were noted during the DOG map review.

4.1.7 OTHER

On April 17, 2012, AEI visited the Regional Water Quality Control Board (RWQCB) online Geotracker database, Santa Clara Valley Water District (SCVWD) online database and the Department of Toxic Substance Control (DTSC) online Envirostor and Hazardous Waste Tracking System (HWTS) databases for information on the subject property and nearby sites of concern. Files at these agencies may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

No information indicating current or prior use or storage of hazardous materials, or the existence of AULs was on file for the subject property with the RWQCB or DTSC.

According to records on file with the SCVWD, three "other-active" wells, two destroyed wells and one abandoned well are located on the subject property. These wells are reportedly owned by the US EPA and permitted by the SCVWD. No hazardous materials were observed in the vicinity of the wells, which appeared to be properly capped and maintained. Based on this information, the wells present at the subject property are not expected to represent a significant environmental concern. Refer to Section 4.1.2 for further information regarding the destroyed groundwater monitoring well formerly present at the subject property in connection with the former sump.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of federal, state, tribal, and local databases containing known and suspected sites of environmental contamination. The number of listed sites identified within the approximate minimum search distance (AMSD) from the Federal and State environmental records database listings specified in ASTM Standard E 1527-05 are summarized in the following table. A copy of the regulatory database report is included in Appendix B of this report.

The subject property, listed as Dysan Corporate Offices, was identified in the regulatory database as a HIST UST site and an EMI site, and is discussed below.

In determining if a site is a potential environmental concern to the subject property in the records summary table below, AEI has applied the following criteria to classify the site(s) as low concern: 1) the site(s) only hold an operating permit (which does not imply a release), 2) the site(s) have been granted "No Further Action" by the appropriate regulatory agency, and/or 3) based upon AEI's review, the distance and/or topographic position relative to the subject property reduce the level of risk associated with the site(s).

5.1 RECORDS SUMMARY

| Database | Search Distance (Miles) | Subject Property Listed | Total Number of Listings | Potential Environmental Concern to the Subject Property (Yes/No) |
|---------------------------------------|-------------------------|-------------------------|--------------------------|--|
| NPL | 1 | No | 1 | No; however, this site is further discussed below. |
| DELISTED NPL | 0.5 | No | 0 | |
| CERCLIS | 0.5 | No | 0 | |
| CERCLIS NFRAP | 0.5 | No | 9 | No; however two adjacent sites are further discussed below. |
| RCRA CORRACTS | 1 | No | 0 | |
| RCRA-TSD | 0.5 | No | 0 | |
| RCRA LG-GEN, SM-GEN, CESQGs, VGN, NLR | TP/ADJ | No | 2 | No |
| US ENG CONTROLS | TP | No | 0 | |
| US INST CONTROLS | TP | No | 0 | |
| ERNS | TP | No | 0 | |
| STATE/TRIBAL HWS | 1 | No | 33 | No; however based on their relative proximity 2 of the 33 sites are discussed below. |
| STATE/TRIBAL SWLF | 0.5 | No | 0 | |

| Database | Search Distance (Miles) | Subject Property Listed | Total Number of Listings | Potential Environmental Concern to the Subject Property (Yes/No) |
|---------------------------------------|-------------------------|-------------------------|--------------------------|---|
| STATE/TRIBAL REGISTERED STORAGE TANKS | TP/ADJ | No | 0 | |
| STATE/TRIBAL LUST | 0.5 | No | 13 | No; Based on the current regulatory status, relative distance from the subject property, and/or inferred direction of groundwater flow, these sites do not represent significant environmental concerns |
| STATE/TRIBAL ENG-INST CONTROLS | TP | No | 0 | |
| STATE/TRIBAL VCP | 0.5 | No | 0 | |
| STATE/TRIBAL BROWNFIELD | 0.5 | No | 0 | |
| ORPHAN | N/A | No | 6 | None of the identified orphan sites are located in the immediate vicinity (500-feet) of the subject property, and therefore, these sites are not expected to represent a significant environmental concern. |
| NON-ASTM DATABASES | TP/ADJ | Yes | 10 | No; however, the subject property is discussed below |

Site Name: Dysan Corporate Offices
Databases: HIST UST, EMI
Address: 5201 Patrick Henry Drive
Distance: Subject Property
Direction: Subject Property

Comments:
Refer to Section 4.1.2 for further information regarding the UST listing for the subject property.

The subject property is also listed as an EMI site. According to the regulatory database, the subject property emitted 0.002 ton of carbon monoxide and 0.002 ton of oxides of sulfur to the atmosphere in 2007. However, based on the nature of this release this listing is not expected to represent a significant environmental concern.

Site Name: Dysan Corporation, Abbott Laboratories Diagnostics Division, Rigid Disc Manufacturing, Anacomp Dysan Corporation, Anacomp Inc-Santa Clara
Databases: CERCLIS NFRAP (listed twice), SLIC (listed twice), RCRA LQG, FINDS, HIST UST, Haznet, EMI
Address: 5440 Patrick Henry Drive, 5200/5440 Patrick Henry Drive, 5200-1 Patrick Henry Drive
Distance: Adjacent beyond Patrick Henry Drive (approximately 40 feet)

Direction: West and Northwest (hydrologically cross-gradient)

Comments:

According to records on file with the Santa Clara Valley Water District (SCVWD), Dysan Corporation (later taken over by Anacomp) occupied the adjacent buildings to the west and northwest prior to 1991. Multiple tank farms storing petroleum products and solvents were located on the west and north west portions of these sites (at or over 400 feet from the subject property) and it appears that the subject property building at 5201 Patrick Henry Road housed Dysan Corporation's headquarters/offices.

According to monitoring data reviewed on the SCVWD online database for these sites, as of January 1994 groundwater contamination on the 5200 and 5440 Patrick Henry Drive properties was limited to 1,600 parts per billion diesel range hydrocarbons, while methyl ethyl ketone (MEK), acetone, cyclohexanone and Freon were non-detected. While the investigations at these sites appear to be open-inactive with the Regional Water Quality Control Board (RWQCB), based on the limited groundwater contamination detected in 1994, the inferred direction of groundwater flow and the relative distance of the former tank farms to the subject property, these sites are not expected to represent a significant environmental concern.

Site Name: Relypsa, Inc.

Databases: CERCLIS NFRAP, RCRA SQG, FINDS, Haznet, EMI

Address: 5301 Patrick Henry Drive

Distance: Adjacent

Direction: North (hydrologically downgradient)

Comments:

Based on a review of SCVWD records, it appears that this site was also formerly occupied by Dysan Corporation; however, in July 1982 a subsurface investigation showed groundwater contamination at this site was limited to 10 ppb isopropyl alcohol. In November 1987 a preliminary assessment was performed on this site and it was given a NFRAP status. Based on the limited contamination detected on this site, and the inferred direction of groundwater flow this site is not expected to represent a significant environmental concern.

Site Name: Coherent, Inc.

Databases: CERCLIS NFRAP, RCRA LQG, FINDS, NPDES, WDS, HAZNET, EMI, Envirostor

Address: 5100 Patrick Henry Drive

Distance: 0.076 mile

Direction: South (hydrologically upgradient)

Comments:

According to the regulatory database and the Department of Toxic Substances Control (DTSC) online database EnviroStor, Coherent, Inc. is a tiered permit site, and is inactive and in need of evaluation. No additional information was provided in the regulatory database, on GeoTracker, or EnviroStor. However, upon receiving pertinent information from the SCCDEH and SCFD in connection with the subject property, AEI will immediately issue an addendum to this report if items of environmental concern are identified.

Site Name: South Bay Asbestos Area

Database(s): NPL, CERCLIS, US ENG CONTROLS, US INST CONTROL, ROD, FINDS, HIST Cal-Sites, HIST CORTESE, DEED, ENVIROSTOR

Address: "Ft of Liberty St and Guadal"

Distance: 0.621 mile

Direction: North

Comments:

According to records on file with the DTSC, portions of the 550-acre region were utilized as landfills by an asbestos-cement pipe manufacturing plant for over 30 years. Additionally, some areas are believed to have been filled with asbestos-containing soils in order to increase the elevation of their property and decrease the chances of flooding. In 1983, a levee was constructed around the town of Alviso, California using materials that included serpentine, an asbestos-containing rock. Remedial activities included the removal of the asbestos-containing levee in 1994, the removal of asbestos-containing soil at four truck yards, paving of the landfills and placing deed restrictions on three landfill areas where asbestos-cement pipe was buried. Based on a review of a site map noting the above locations, it appears neither the subject property nor any adjacent sites were occupied by a landfill, truck yard or levee. Based on the nature of the contamination and the lack of subject property involvement with any asbestos-containing materials, this listing is not expected to represent a significant environmental concern.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-05, the following interviews were performed during this investigation in order to obtain information indicating RECs in connection with the subject property.

6.1.1 INTERVIEW WITH OWNER

Mr. Ryan Balzer, a representative of subject property owner Batton Associates, Inc., was interviewed during AEI's site reconnaissance on April 5, 2012 and April 30, 2012. Mr. Balzer has been associated with the subject property for approximately 32 years. Mr. Balzer was asked if he was aware of any of the following:

| | | | | |
|---|--|-----|----------|----|
| Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property. | | Yes | X | No |
| Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property. | | Yes | X | No |
| Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. | | Yes | X | No |
| Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality. | | Yes | X | No |

6.1.2 INTERVIEW WITH KEY SITE MANAGER

The facilities manager, Ms. Betty Miller, was interviewed during AEI's site reconnaissance on April 5, 2011 and April 30, 2012. Ms. Miller has been associated with the subject property since approximately 1999. Ms. Miller stated that there is an approximately 1,500-gallon underground grease trap near/beneath the trash enclosure. Please refer to Section 7.1 for further information. Ms. Miller as asked if she was aware of any of the following:

| | | | | |
|---|--|-----|----------|----|
| Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property. | | Yes | X | No |
| Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property. | | Yes | X | No |
| Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. | | Yes | X | No |
| Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality. | | Yes | X | No |

6.1.3 PAST OWNERS, OPERATORS AND OCCUPANTS

Interviews with past owners and occupants regarding historical onsite operations were not reasonably ascertainable. However, based on information obtained from other sources including aerial photographs, city directories, and building records, it is likely that the information provided by past owners and operators would have been duplicative.

6.1.4 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-05 and EPA's AAI Rule, certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the environmental professional. The responsibility for qualifying for Landowner Liability Protections (LLPs) by conducting the inquiries ultimately rests with the User, and providing the information to the environmental professional would be prudent if such information is available.

The User did not complete the ASTM User questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

6.2.1 ENVIRONMENTAL LIENS

In accordance with our approved scope of services, AEI contracted EDR to perform an environmental lien search for the subject property.

According to EDR, environmental liens were not identified during the review of historical ownership documentation. A copy of EDR's report is provided in the appendices.

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

No prior reports or relevant documentation in association with the subject property were made available to AEI during the course of this assessment.

7.0 SITE INSPECTION AND RECONNAISSANCE

On April 5, 2012 and April 30, 2012, a site reconnaissance of the subject property and adjacent properties was conducted by Ms. Jennifer Chan and Mr. Steve Kovach of AEI, respectively in order to obtain information indicating the likelihood of RECs at the subject property and adjacent properties as specified in ASTM Standard Practice E1527-05 §8.4.2, 8.4.3 and 8.4.4. During the onsite reconnaissance, AEI was accompanied by key site manager Mr. Ryan Balzer and facilities manager Ms. Betty Miller, who have been associated with the property for approximately 32 years and 13 years, respectively.

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

| Yes | No | Observation |
|-----|----|--|
| X | | Hazardous Substances and/or Petroleum Products in Connection with Property Use |
| X | | Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs) |
| | X | Hazardous Substance and Petroleum Product Containers and Unidentified Containers not in Connection with Property Use |
| | X | Unidentified Substance Containers |
| X | | Electrical or Mechanical Equipment Likely to Contain Fluids |
| | X | Interior Stains or Corrosion |
| | X | Strong, Pungent or Noxious Odors |
| | X | Pools of Liquid |
| X | | Drains, Sumps and Clarifiers |
| | X | Pits, Ponds and Lagoons |
| | X | Stained Soil or Pavement |
| | X | Stressed Vegetation |
| | X | Solid Waste Disposal or Evidence of Fill Materials |
| | X | Waste Water Discharges |
| X | | Wells |
| | X | Septic Systems |
| | X | Other |

The subject property is currently occupied FileMaker. On-site operations consist of administrative activities. The above-identified observed items are further discussed below.

HAZARDOUS SUBSTANCES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE

No hazardous materials or petroleum products were observed onsite, except for small amounts of cleaning and maintenance supplies. All materials were packaged in consumer quantities and no signs of inappropriate material handling were observed. Based on the nature of these materials, the presence or use of these materials at the subject property is not expected to represent a significant environmental concern.

ABOVEGROUND & UNDERGROUND HAZARDOUS SUBSTANCE OR PETROLEUM PRODUCT STORAGE TANKS (ASTs / USTs)

The subject property is equipped with an emergency generator. Approximately 400 gallons of diesel fuel are contained within the generator equipment. No evidence of leaks or spills was observed at the base of the generator. Based on the good condition of the equipment, the presence of the emergency generator and associated diesel fuel is not expected to represent a significant environmental concern.

ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic polychlorinated biphenyls (PCBs) were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Two pad-mounted transformers were observed on the subject property during the site inspection. Since the subject property was developed in 1980, PCB-containing transformers should be of low concern. No spills, staining or leaks were observed on or around the transformer. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Elevators

The subject property building is equipped with two hydraulic elevators. The hydraulic fluid contained within elevator systems can potentially contain PCBs. Based on the age of the building (post-1978), it is unlikely that the hydraulic fluid within the equipment contains PCBs. The equipment for the elevators is located behind the elevator in the lobby and near the mail room. No evidence of stains or leaks was observed at the base of the equipment during the site inspection. Based on the good condition and regular maintenance of the elevator equipment, the elevator is not expected to represent a significant environmental concern.

DRAINS, SUMPS AND CLARIFIERS

Numerous storm drains were observed in the parking area of the subject property. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

According to the facilities manager, Ms. Betty Miller, an approximately 1,500-gallon underground grease trap is located near/beneath the trash enclosure. However, based on the

non-hazardous nature of material entering the grease trap, it is not expected to represent a significant environmental concern.

Furthermore, an old cleanout, presumably associated with a former grease trap was observed in the same area as the current grease trap. Refer to Section 4.1.2 for further discussion.

STAINED SOIL OR PAVEMENT

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size of the stains, and the surficial nature of the staining, the staining is not expected to represent a significant environmental concern.

WELLS

According to records on file with the SCVWD, three "other-active" wells, two destroyed wells and one abandoned well are located on the subject property. These wells are reportedly owned by the US EPA and permitted by the SCVWD. No hazardous materials were observed in the vicinity of the wells, which appeared to be properly capped and maintained. Based on this information, the wells present at the subject property are not expected to represent a significant environmental concern.

7.2 NON-ASTM SERVICES

7.2.1 ASBESTOS-CONTAINING BUILDING MATERIALS

OSHA

For buildings constructed prior to 1981, the Code of Federal Regulations (29 CFR 1926.1101 and 29 CFR 1910.1001) define presumed asbestos-containing material (PACM) as 1. Thermal System Insulation (TSI), e.g., boiler insulation, pipe lagging, fireproofing; and 2. Surfacing Materials, e.g., acoustical ceilings. Building owners/employers are responsible for locating the presence and quantity of PACM. Building Owners/employers can rebut installed material as PACM by either having an inspection in accordance with Asbestos Hazard Emergency Response Act (AHERA) (40 CFR Part 763, Subpart E) or hiring an accredited inspector to take bulk samples of the suspect material.

Typical materials not covered by the presumptive rule include but are not limited to: floor tiles and adhesives, wallboard systems, siding and roofing. Building materials such as wallboard systems may contain asbestos but unless a building owner/employer has specific knowledge or should have known through the exercise of due diligence that these other materials contain asbestos, the standard does not compel the building owner to sample these materials.

NESHAP

The applicability of the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP, 40 CFR Chapter 61, Subpart M) apply to the owner or operator of a facility where an inspection for the presence of asbestos-containing materials (ACM), including Category I (asbestos containing packings, gaskets, resilient floor coverings and asphalt roofing products), and Category II (all remaining types of non-friable asbestos containing material not included in Category I that when dry, cannot be crumbled, pulverized or reduced to powder by hand pressure), non-friable ACM must occur prior to the commencement of demolition or renovation

activities. NESHAP defines ACM as any material or product that contains *greater than 1%* asbestos. It should be noted that the NESHAP regulation applies to all facilities regardless of construction date, including: 1. Any institutional, commercial, public, industrial, or residential structure, installation, or building; 2. Any ship; and 3. Any active or inactive waste disposal site. This requirement is typically enforced by the EPA or by local air pollution control/air quality management districts.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. The condition and friability of the identified suspect ACMs is noted in the following table:

Suspect Asbestos Containing Materials (ACMs)

| Material | Location | Friable | Condition |
|----------------------------------|------------------------------|---------------|---------------|
| Drywall Systems | Throughout Building Interior | No | Good |
| 2' x 2' Acoustical Ceiling Tiles | Lobby Area | No | Good |
| Resilient Floor Tiles | Mail Room | No | Good |
| Roofing Systems | Roof | Not Inspected | Not Inspected |

All observed suspect ACMs were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, an asbestos survey adhering to AHERA sampling protocol should be performed prior to demolition or renovation activities that may disturb suspect ACMs.

7.2.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has $\geq 1 \text{ mg/cm}^2$ (5,000 $\mu\text{g/g}$ or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm^2 to 2.0 mg/cm^2 . Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact lead-based paint on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition and monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on lead-based paint and lead-based paint hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, federally owned or subsidized housing is affected by this rule.

Lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state or local regulations in regards to lead-containing paints.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, it is unlikely that LBP is present.

7.2.3 RADON

Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this investigation. According to the California Department of Health Services Radon Database, three tests were conducted for radon levels in the subject property zip code (95054) in 2002. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the US EPA. Therefore, radon is not expected to represent a significant environmental concern.

7.2.4 DRINKING WATER SOURCES AND LEAD IN DRINKING WATER

The City of Santa Clara supplies potable water to the subject property. The most recent water quality report (2011) states that the 90th percentile value for lead levels in samples obtained from the area's water supply were 3.8 parts per billion (ppb) and therefore are well within standards established by the US EPA.

7.2.5 MOLD/INDOOR AIR QUALITY ISSUES

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI Consultants observed interior areas of the subject building in order to identify the significant presence of mold. During the AEI's April 5, 2012 on-site reconnaissance, obvious visual signs of mold growth or conditions conducive for mold growth were observed on piping insulation within the equipment room located on the subject property roof. AEI re-inspected the area on April 30, 2012, and observed that the old pipe insulation had been removed and replaced with new insulation and wrapping. No evidence of mold was observed during AEI's re-

inspection. Based on the remedial action conducted, the former presence of mold is not expected to represent a significant concern.

7.3 ADJACENT PROPERTY RECONNAISSANCE FINDINGS

| Yes | No | Observation |
|-----|----|--|
| | X | Hazardous Substances and/or Petroleum Products in Connection with Property Use |
| | X | Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs) |
| | X | Hazardous Substance and Petroleum Product Containers and Unidentified Containers not in Connection with Property Use |
| | X | Unidentified Substance Containers |
| X | | Electrical or Mechanical Equipment Likely to Contain Fluids |
| | X | Strong, Pungent or Noxious Odors |
| | X | Pools of Liquid |
| | X | Drains, Sumps and Clarifiers |
| | X | Pits, Ponds and Lagoons |
| | X | Stained Soil or Pavement |
| | X | Stressed Vegetation |
| | X | Solid Waste Disposal or Evidence of Fill Materials |
| | X | Waste Water Discharges |
| | X | Wells |
| | X | Septic Systems |
| | X | Other |

The above identified observed item is further discussed below.

ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Several pole-mounted and pad-mounted transformers were observed on the adjacent sites during the site inspection. No spills, staining or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

8.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

By signing this report, the senior author declares that, to the best of his or her professional knowledge and belief, he or she meets the definition of *Environmental Professional* as defined in §312.10 of 40 CFR Part 312.

The senior author has the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. The senior author has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 09/07/2011 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/28/2011 has revealed that there are 9 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/10/2011 has revealed that there are 4

EXECUTIVE SUMMARY

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/10/2011 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 03/14/2012 has revealed that there are 18 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 01/20/2012 has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/10/2011 has revealed that there is 1 RCRA-NonGen site within approximately 0.25 miles of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CAL SITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 11 HIST CORTESE sites within approximately 0.5 miles of the target property.

Summary Details:

Conditions at proposal October 15, 1984): Portions of Alviso, California, located in north Santa Clara County on the southern edge of the San Francisco Bay, served as dumping areas for over 30 years. Companies disposed of asbestos waste in an old municipal landfill. In addition, asbestos waste was used for fill material at various locations throughout the town. The site was first proposed for listing under the name Alviso Dumping Areas. Soil in the old landfill and around homes contains asbestos, according to tests conducted by the State. Construction activities and wind action stir up asbestos-laden dust, posing a potential health risk to residents. EPA and the State plan to continue sampling the soil and air throughout the 1-square-mile area to determine the degree of risk to public health. Evening winds may transport asbestos to the San Francisco Bay National Wildlife Refuge, which borders the town and harbors several endangered species. Status June 10, 1986): In July 1985, EPA entered into an Interagency Agreement with the U.S. Army Corps of Engineers to conduct a remedial investigation/feasibility study to determine the extent of contamination at the site and identify alternatives for remedial action. The remedial investigation is scheduled to begin in the spring of 1986. In October 1985, two areas of the town were paved to prevent exposure of residents to potentially significant levels of asbestos fibers. Additional measures are being considered to further reduce exposures to asbestos fibers.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Background Info: requirements of the Soil Management Plan (1997). The construction activities included construction of a Cap (consisting of five two-story office buildings, pavement and 18 inches of clean soil in landscaped areas), and installation of a passive gas collection system to remove methane migrating upward from under the Cap. On June 16, 1999, U.S. EPA and Legacy

Partners 2335 LLC entered into an Agreement and Covenant Not to Sue for the Collishaw Property. Santos Landfill - A portion of the Santos Landfill is Parcel 1 of the Eastern Parcel Agreement and Covenant Not to Sue which requires a deed restriction. Parcel 2 (not part of Santos Landfill) is part of the Eastern PPA, also requires a deed restriction since asbestos waste piping was found there. The rest of the Santos Landfill is the Summerset Mobile Estates mobile home park and the property located on the northern side of the Guadalupe River. Santos is planning to send U. S. EPA information that shows that the northern property is not part of the Santos Landfill. Sainte Claire Landfill - is located on the northern side of the Guadalupe River and divided into two parcels by Gold Street. The part on the eastern side of Gold Street is operated as a truck yard/storage yard. The part on the western side of Gold Street is undeveloped. Both parcels require a deed restriction as a landfill area that received asbestos waste in the past. Marshland Landfill is regulated under the RWQCB and a deed restriction has been recorded under the RWQCB authority. U.S. EPA and Legacy Partners entered into a Prospective Purchaser Agreement and Covenant Not to Sue for this area (now known as the Highway 237 Disposal Site) which included another Soil Management Plan during construction. During the 1950s, several landfills in the Alviso area accepted wastes from an asbestos cement pipe manufacturing facility. This waste was later used for raising the grade of the site and for constructing a ring-levee, resulting in asbestos contamination throughout the Alviso area and covering roughly 330 acres. The Site was listed on the Federal Superfund list in 1985. U.S. EPA has been the lead regulatory agency overseeing work. The Site was divided into two operable units - the Ring Levee and the Landfill/Truckyard. On September 30, 1997, U.S. EPA and Lincoln 237 Associates Limited Partnership and Lincoln Property Company No. 2233 Limited Partnership entered into two Prospective Purchaser Agreements and Covenant Not to Sue for the Western Parcel and the Eastern parcel, respectively. The agreements incorporated Soil Management Plans describing soil control measures for asbestos and asbestos containing materials, methane, petroleum hydrocarbons, and lead. A portion of the Santos Landfill is Parcel 1 of the Eastern Parcel. Parcel 2 (not part of Santos Landfill), is the other portion of the Eastern Parcel Agreement and requires a deed restriction since asbestos waste piping was found there. The Final Soil Management Report, dated January 28, 1999, describes the construction activities performed at the Eastern Parcel pursuant to the

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Legacy
Completed Document Type: Soils Management Plan
Completed Date: 06/08/2009
Comments: The Soil Management Plan addresses work to be conducted as part of Pacific Gas and Electric's TIVO U/G Service Upgrade project. The project work consists of installing a new power pole and feeders into an existing underground junction box. U.S. EPA approved the Plan on May 28, 2009. DTSC concurred with the Plan on June 8, 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/22/2010
Comments: The U.S. Environmental Protection Agency (EPA) approved the Third Five-Year Review Report. DTSC comments on the draft version of the Report were incorporated in the final version. EPA concluded that the remedy is protective of human health and the environment in the short-term. For the remedy to be protective in the long-term, institutional controls need to be implemented at the Summerset Mobile Estates portion of the former Santos Landfill and the Sainte Claire

Landfill. For the Marshland Landfill, EPA needs to prepare an Explanation of Significant Differences that will specify the use of Water Board title 27, California Code of Regulations requirements in lieu of deed restriction as specified in the Record of Decision and that no further controls are needed.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Saint Claire Landfill Parcels
Completed Document Type: Site Characterization Report
Completed Date: 05/11/2011
Comments: Parcels 015-41-006 and 015-04-015 were formerly operated as the Saint Claire Corporation Landfill. The U.S. EPA Record of Decision required institutional controls to be put in place for these parcels because of the potential presence of asbestos. The Report presents the results of soil sampling performed by the owner of the parcels. Ten soil borings were drilled on the two parcels and a total of 28 soil samples were collected and analyzed for asbestos. Only one of the 28 samples had an asbestos concentration exceeding the 1 percent action levels established by U.S. EPA for the South Bay Asbestos Area. Based on the sampling results, EPA and DTSC have determined that a land use covenant is not needed for the parcels.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 09/30/1991
Comments: Issued Orders to four of the Truckyard owners requiring them to pave their respective yards. By late 1992, three of the truckyards removed all asbestos contaminated fill to residential levels. For Neu Truck Yard, the remaining truck yard property, the US EPA will be conducting soil sampling to determine what further action is required. Not reported

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 09/14/2011
Comments: A Land Use Covenant that places restrictions on the Summerset Mobile Home Park was recorded with the Santa Clara County Recorder. The Covenant allows for the property to continue being used as a mobile home park, but prohibits other sensitive uses and requires a soil management for activities that disturb the soil.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF

DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D036
Waste name: NITROBENZENE

Waste code: D038
Waste name: PYRIDINE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Worker: LL
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
File Location: Stored electronically as an E-file
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: The elevator piston failed sometime in 2010. It is estimated that 50-60 gallons of hydraulic fluid was lost. A new piston for the elevator was installed within the old casing. In 2011, a soil boring was advanced inside the building near the elevator to approximately 13 feet. Moderate staining in soil and organic odors were noted in soil during advancement of the boring and hydraulic oil appeared to be present in soil at approximately 12.1 feet and on groundwater. A soil sample collected from this boring was reported to contain TPHd (180 ppm) and TPHmo (370 ppm). Grab groundwater samples were collected from three other borings also advanced at that time outside of the building. They were reported to have a maximum concentration of 100 ppb TPHd and 82 ppb TPHmo. Limited extent under the building.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D007
Waste name: CHROMIUM

Waste code: D009
Waste name: MERCURY

Waste code: D011
Waste name: SILVER

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: P098
Waste name: POTASSIUM CYANIDE

Waste code: U122
Waste name: FORMALDEHYDE

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Biennial Reports:

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Local Agency: SANTA CLARA VALLEY WATER DISTRICT
RB Case Number: 43S0808
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride
Site History: This site is south of and adjacent to the former Western Microwave site and southeast of former Intersil-Hammerwood. GWET has reduced chlorinated VOC (CVOC) levels in groundwater 100 to 400 ppb down to 50 to 200 ppb and appears to have been in an asymptotic mode for at least a year. However, prior soil analytical from a sump removal

activities in the 1990s indicated potential vadose-zone source under the northeastern corner of the building. Lockheed-Martin conducted a voluntary vapor intrusion (VI) assessment that revealed elevated CVOC levels in the soil gas but no detection of the CVOC of concern (vinyl chloride) in the indoor air. Other CVOC levels in indoor air were on the same order of magnitude as the outside/ambient air.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110012231959

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Longitude: -121.989483833313
Case Type: Cleanup Program Site
Case Worker: RWP
Local Agency: SANTA CLARA VALLEY WATER DISTRICT
RB Case Number: 43S0063
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride
Site History: During the vapor intrusion investigative review process, RWB conducted a record review that indicated no sidewall samples were collected from around the former UST. Soil gas testing - invoked by groundwater contaminants exceeding our environmental screening levels - indicated potential indoor air vapor intrusion issues that will be addressed by the installation of a sub-slab depressurization system.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D005
Waste name: BARIUM

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: U080
Waste name: METHANE, DICHLORO-

Waste code: U115
Waste name: ETHYLENE OXIDE (I,T)

Waste code: U154
Waste name: METHANOL (I)

Waste code: U240
Waste name: ACETIC ACID, (2,4-DICHLOROPHENOXY)-, SALTS & ESTERS

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

CA WDS:

Facility ID: San Francisco Bay 431006579
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

Status: Completed - Case Closed
Status Date: 12/04/2009
Lead Agency: SANTA CLARA COUNTY LOP
Case Worker: NP
Local Agency: Not reported
RB Case Number: 14-764
LOC Case Number: 06S1W17R02f
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: The facility is located in a commercial/light industrial area near the South Bay Freeway and Lawrence Expressway. The site is approximately 14-acres, with a 4-acre building on-site. The facility is an active UPS package distribution facility. The site is located in the northern portion of the Santa Clara Valley at an elevation of approximately 10-ft above sea level. The Bay is located over a mile to the north. Site History February 2005 u One 550-gal used oil UST (double-walled, reinforce fiberglass plastic UST) located in a pit directly north of the automotive shop, and its associated lines, and a used oil dump sink were removed from the site. The tank was operated by United Parcel Service (UPS). The UST was observed to be in good condition with no signs of damage or leakage during removal. No water or groundwater was observed in the excavation. During UST removal activities, stained pea gravel was observed and the gravel was excavated until a concrete slab was encountered at a depth of 8-ft bgs. April 2005 - Three soil samples (SS-1, SS-2 and SS-3) were collected: SS-1 from the bottom of the excavation side wall (north wall) adjacent to the concrete slab; SS-2 from the stained pea gravel stockpile; and SS-3 from the clean excavated material stockpile. Hydrocarbon odor was noted in samples SS-1 and SS-2. Maximum soil concentrations of TPH-d, TPH-g, TPH-m, and Oil & Grease were detected in the stained pea gravel stockpile sample, SS-2, at 6,400-ppm, 32-ppm, 63,000-ppm, and 16,000-ppm, respectively. Several VOCs and metal analytes were detected, at concentrations well below the US EPA Region PRGs. Due to the elevated TPH concentrations, a toxicity test was performed on the S-2 sample, and the sample passed the test. Based on the sampling results, impacts to the subsurface appear to be limited to the used oil and from no other sources. Sixteen soil borings (SB-1 through SB-16) were drilled around the former used oil UST pit to delineate used oil impacts in the subsurface to depths of 16-ft bgs. The lithology was predominantly clay. Used oil was detected in areas just peripheral to the former used oil pit at depths ranging from 8.5-ft to 14-ft bgs. Groundwater was encountered at 13.25-ft bgs, but no sample was taken. June 2005 - 284-tons of used oil-impacted soils were remediated via excavation and off-site disposal. The excavated dimensions were approximately 25-ft wide by 30-ft by 16-ft deep. Four sidewall soil samples were collected from a depth of 13-ft to 15-ft bgs as post-excavation soil analysis. Maximum soil concentration of TPH-m was detected at 120-ppm from south-wall sample at 15-ft bgs. All other analytes were below detection limits. The excavated material was backfilled, compacted

and paved placed back into the excavation. No groundwater sample was taken. August 2006 u Santa Clara Department of Environmental Health requested additional work to define the extent of soil and groundwater contamination at the site. August 2007 u Four soil borings (SB-17, SB-18, SB-19, and SB-20) were advanced to 16-ft bgs. Soil samples above the water table were screened with a photoionization detector (PID). Three soil samples were collected from the vadose zone at each boring. Sample container for soil sample SB-19 (0-2-ft bgs) was broken during shipment to the laboratory and therefore not analyzed. Maximum soil concentrations of TPH-d, TPH-m, and Oil & Gas were detected in SB-18 (0-2-ft bgs) at 7.8-ppm, 70-ppm, and 270-ppm, respectively. All other samples were below detection limits. Groundwater samples were collected from each of the four soil borings and analyzed. Oil and Gas were not analyzed for groundwater collected from soil borings SB-17 and SB-19 due to insufficient amount of sample as a result of broken containers during shipment. One monitoring well, MW-A, was installed in the center of the former used oil UST pit (excavation area) to a depth of 21-f

Number of Fatalities: 0
 Description: Caller states driver was on route and at approximately 1030 Hrs advising UPS of a leaking package. Caller states UPS Personnel responded at approximately 1200 Hrs and transferred vehicles and drove leaking package and vehicle to the terminal which resulted in more of the silicone oil releasing. Caller states personnel started cleaned up at approximately 1730 Hrs. Caller states some of the substance may have released to the pavement while returning the vehicle. Caller states this has been an ongoing problem with the terminal. Incident number 200809110001

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: The RPs have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. This site has not been identified as an NPL site, nor does it appear to be a candidate in the future. Therefore, it is unlikely that federal funds are a viable source of revenue for this site.
 Site Description: This site was used for various kinds of electronics manufacturing since 1966. It is currently inactive.
 Hazardous Waste Desc: The soil and shallow ground water has been found to contain varying levels of cyclohexanone, methyl ethyl ketone (MEK), vinyl chloride, methylene chloride, benzene, xylene, toluene, ethyl benzene, perchloroethylene (PCE), trichloroethane (TCA), trichloroethylene (TCE), dichloroethane (DCA), trans-dichloroethylene and freon 113.
 Threat To Public Health & Env: These wastes create a potential for the contamination of drinking water. Some potential for direct contact also exist at this site. However, no evidence of affected wells used for drinking water was found in a study completed in late 1987.

Site Activity Status: Underground storage tanks have been emptied and removed. Barrels have been removed. The site is now completely fenced. A remedial action order was issued to potentially responsible parties in August, 1986. In March, 1988, DHS issued final notices of noncompliance with the RAO to the potentially responsible parties. DHS is conducting remedial investigation activities.

Alternate Address: 1262 LAWRENCE STATION RD
Alternate City,St,Zip: SUNNYVALE, CA 94089
Background Info: From 1966 to 1984 the property was used for the manufacturing of magnetic media products. Shallow groundwater beneath the site was impacted with cyclohexanone, methyl ketone, perchloroethylene, trichloroethylene, dichloroethane, 1,1-dichloroethylene, trans-dichloroethylene, vinyl chloride, freon 113, benzene, xylene, toluene, and petroleum hydrocarbons. Cyclohexanone and methyl ethyl ketone have not been detected in the groundwater since 1987. However, chlorinated solvents remain. No known soil contamination has been identified, and it appears groundwater has been impacted by upgradient sources. Underground storage tanks and barrels were removed. A Remedial Action Order was issued in November 1986 and the Final Determinations of Non-compliance in March 1988. The Department conducted a series of investigations in 1992 and 1993 to determine the extent of the shallow groundwater contamination. In 1998, DTSC excavated 2 test pits to determine if potential source areas existed based on a geophysical survey. No source areas were found. A concrete sump was removed and soil samples were collected to verify that no underlying soil contamination remained. The concrete materials were disposed at a Class III landfill. The sump excavation was backfilled with clean soil and patched with hot asphalt. In addition, five groundwater monitoring wells were closed. The well closure activities were conducted with oversight from the Santa Clara Valley Water District. In 2001, the fifteen existing groundwater monitoring wells were sampled using diffusion bag samplers in order to determine the status of groundwater conditions at the site and to compare with historical data. The results indicated that the volatile organic compound (VOC) concentrations were consistent with previous sampling results.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/31/1998
Comments: DTSC oversaw removal of a subsurface concrete sump (approximately 6 feet long by 4 feet wide and 4 feet deep). After the concrete sump was removed, soil samples were collected to verify that no underlying soil contamination remained. The concrete materials were disposed at a Class III landfill. The sump excavation was backfilled with clean soil and patched with hot asphalt. In addition, five groundwater monitoring wells were closed. The well closure activities were conducted with oversight from the Santa Clara Valley Water District.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/17/2001
Comments: RIFS - Remedial Investigation/Feasibility Study approved. Investigations identified buried layers of black material, apparently derived from prior charcoal manufacturing activities. Samples of this material indicate the presence of polycyclic aromatic hydrocarbons (PAHs). Petroleum hydrocarbon-impacted soil was encountered underneath and surrounding a maintenance building and the existing garage. Groundwater samples have shown contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 01/21/2010
Comments: The Department of Toxic Substances Control (DTSC) has reviewed the Five-Year Review Yerba Buena Way. The Five Year Review is hereby approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 08/05/2003
Comments: O&M PLAN approved for operation and maintenance activities at both, the Consolidation Cell and Yerba Buena Way.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 07/13/2001
Comments: DES - Remedial Design and Implementation Plan approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/05/2003
Comments: RMDL - Remedial Action approved. Approximately 15,636 cubic yards of polycyclic aromatic hydrocarbons (PAHs)-impacted material was placed in the consolidation cell and capped with a minimum of 2 feet of clean soil, and approximately 16,247 cubic yards of PAHs-impacted material, along with approximately 3,860 cubic yards of petroleum hydrocarbon-impacted soil, was excavated and removed offsite. Yerba Buena Way contained PAHs-impacted material. The Yerba Buena Way and the consolidation cell required deed restrictions and operation and maintenance. An Operation and Maintenance Plan was approved for the Consolidation Cell and Yerba Buena Way.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 05/30/2001
Comments: RAP - Remedial Action Plan (RAP) approved for the remediation of the Santa Clara Gateway. The RAP required excavation and on-site consolidation and capping of the PAH-contaminated soil and excavation and off-site disposal of petroleum hydrocarbon-contaminated soil. The capped area will be deed restricted to prevent uncontrolled access

EPA Region: 09
Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

POTW: Not reported

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

NPDES:

Npdes Number: CAS000001

Facility Status: Active

Agency Id: 0

Region: 2

Regulatory Measure Id: 183814

Order No: 97-03-DWQ

Regulatory Measure Type: Enrollee

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/10/2011
Date Data Arrived at EDR: 01/05/2012

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/10/2011

| Number of Days to Update: 11 | Next Scheduled EDR Contact: 06/25/2012 |
| | Data Release Frequency: Varies |

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 10/07/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

The EDR Chain of Title Report

EDR Chain of Title

The EDR Chain of Title Report tracks a line of successive owners **from the present back to 1940** of a particular **parcel** of property, linked together by recorded transactions which pass title. Available nationwide, this report provides a summary of a property's ownership history and is a valuable source for determining the prior uses of a property

A network of professional **abstractors** following established procedures, uses client supplied address information to **locate**:

- Historical Chain of Title research
- Leases and Miscellaneous

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

File No. 2189. 8118(RWM)

Mr. Eric Terhorst
Chemical Engineer
Xidex Corporation
305 Soquel Way
Sunnyvale, Ca. 94086

Dear Mr. Terhorst:

We have received and reviewed your progress report dated August 15, 1986, which contains monitoring data and recommendations for cleanup of the groundwater pollution at your Santa Clara facility. In general we concur with your program for groundwater extraction and treatment as a method to remediate the pollution, provided that your monitoring program includes the items listed below:

- (1) Chemical analysis of groundwater samples for methyl ethyl ketone, acetone, and isopropanol once monthly for monitoring wells B-26, B-35, B-33, B-25, B-11, B-19, B-31, and quarterly for monitoring wells B-44, B-45, B-41, and B-32. Because of the proposed intermittent pattern of pumping, water samples should be taken from extraction wells R-1, R-2, and R-3 twice monthly at system start up and shut down.
- (2) Sets of water elevation measurements in wells once a month at system start up and shut down.

In regards to progress reports, we believe that some modification in the presentation of data is necessary to facilitate the review process, and to evaluate the progress of the cleanup by Regional Board staff. We request that monitoring reports include the following items, in addition to operational and flow logs:

- (1) Water elevation or piezometric surface contour maps.
- (2) Historical tabular summaries, and/or plots of chemical concentrations versus time, of chemical monitoring data for wells (laboratory analysis sheets should be attached as an appendix to the report).

The above monitoring program may be modified to accommodate changing conditions at the site at a later date.

File No. 2189.8118 (RWM)Mr. Eric Terhorst
Chemical Engineer
Xidex Corporation
305 Soquel Way
Sunnyvale, Ca. 94086

Dear Mr. Terhorst:

We have reviewed the status of your compliance with Order No. 85-131 adopted by the Regional Board on November 20, 1985, and find that you have not complied with Provisions C.2.(c) and C.5. Provision C.2.(c) required the submittal of a technical report by February 15, 1986, describing the adequacy of the extraction system to contain the pollution at your Santa Clara facility, and Provision C.5 required the submittal of progress reports on April 1, 1986 and June 1, 1986.

Please be advised that failure to submit technical reports as required by waste discharge requirements adopted by the Regional Water Quality Control Board exposes your company to administrative liability up to \$1000 per day pursuant to Section 13268 (b) (1) of the California Water Code. Hence, each day of delay increases your potential liability under the law.

We are considering enforcement action against your company for failure to comply with Order No. 85-131 as discussed above. Please submit a letter by June 27, 1986 that details the causes of the non-compliance and describes the actions you have taken and a schedule for actions you will take to achieve compliance. My recommendation for enforcement will be influenced by the contents of this letter.

If you have any questions concerning the requirements of this letter, please contact Robert W. Marek at (415) 464-4225.

Sincerely,

Roger B. James

Mr. Bob Marek
Regional Water Quality Control Board
1111 Jackson Street Room 6040
Oakland, CA 94607

Dear Mr. Marek:

This letter is to report our progress on groundwater cleanup at 5440 Patrick Henry and 5200 Patrick Henry Drive in Santa Clara.

SYSTEM OPERATION

The system has been operating as required since it was restarted September 15, 1986. During October and November 342,000 gallons of water were pumped and treated. The treatment system is consistently achieving reduction efficiencies of 95%. Typical influent concentration of MEK is approximately 50 ppm.

The pumps used at the recovery wells have been a source of difficulty. The pump seals are problematic and have been repacked several times. Recovery well R-2 was down for three weeks in November. All three pumps will be replaced during January with submersible Grundfos pumps. We will update you on this change in our next report.

GROUNDWATER QUALITY

Sampling in the monitoring wells shows continuing drops in the concentrations of pollutants, as shown by the summary of historical data given in Tables 1 and 2. All of the wells at 5440 Patrick Henry continue to show reductions except B-26, in which the concentration of MEK rose by an order of magnitude. (The lab was questioned about this anomaly and they claimed an arithmetic error had been made in the data reduction. This explanation was not satisfactory so the number for B-26 was left unchanged. I intend to recheck the lab's performance by sending replicates to another lab this month, and will report my findings in the next report.) A small amount of MEK was also detected in B-41, a downgradient monitoring well, but no MEK was detected in B-25, which is between the tank farm and B-41. This is a result which we feel also must be confirmed by further analysis.

At 5200 Patrick Henry, the concentration in B-19 rose by an order of magnitude. This could be the result of migration of MEK out of the tank farm's sandy back fill, toward the downgradient extraction well. Such a migration would be aided by the continuing operation of the extraction well. In general, the groundwater quality data show containment and further reductions in pollutant concentrations at 5200 Patrick Henry.

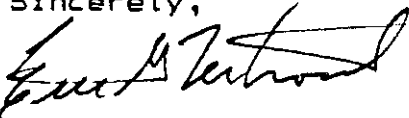

WATER LEVEL MEASUREMENTS

Water level measurements support the view that contamination is being contained and removed from the two sites. Results of measurements at 5440 are shown in Figures 1a through 1d. The influence of R-3 is clearly shown as levels drop over time in all the key wells (B-35, B-41, B-40, and B-11). The influence of R-2 will enhance the effect. As is pointed out in Questa's report (attached), a slight rise in the water levels between the eight-hour (1800 hours) and the twelve-hour (2200 hours) readings was due to the fact that the extraction well pumps were shut off before the readings at 2200 were completed. This is a mistake which will not be repeated. Water quality measurements at R-3 show a peak level is reached between eight and twelve hours after pumping begins. The concentrations of all three pollutants rise through the eight-hour period and taper off at twelve hours (detailed results are shown in the report from Scientific Environmental, copy attached).

Similar results are shown at 5200, as shown in Figures 2a through 2d. The water levels in key areas are influenced and the concentrations at R-2 peak between eight and twelve hours after startup. We feel that significant progress has been made toward cleanup of both sites.

Please call if you have questions or comments.

Sincerely,

Eric G. Terhorst
Chemical Engineer

Attn: Mr. Eric Terhorst

Subject: Water Level Monitoring At DYSAN
Buildings 5200 and 5440

Dear Eric:

Provided here are results of a series of groundwater level readings taken at DYSAN Corporation's tank farms at 5200 and 5440 Patrick Henry Drive in Santa Clara on November 11, 1986. The water level readings were made during the 12-hour extraction pumping cycle to examine the pumping influence on the water table near each tank farm. Four sets of water level readings were taken as follows:

- Prior to pump start-up (1000 hours);
- 4-hours after pump start-up (1400 hours);
- 8-hours after pump start-up (1800 hours);
- At pump shut-down (2200 hours).

The readings were converted to groundwater elevations and plotted on a map of each tank farm. Approximate contours were then drawn to illustrate the surface of the water table at the time of each reading. The results area displayed in Figure 1A - 1D and 2A - 2D, respectively, for Building 5440 and 5200. Field data summary sheets are attached for reference. The monitoring results for the two tank farms are summarized here.

Building 5440. Although Building 5440 tank farm has two extraction wells, R-2 and R-3, only R-3 was operating during the monitored cycle. All wells monitored during the 12-hour pumping period showed a decline in the water table elevation for the first 8-hours. At the 12-hour reading (2200 hours), the monitoring wells generally showed a rise in groundwater elevation, reflecting the immediate recovery of the water table following pump shut-down. The zone of influence of R-3 encompasses the wells located down gradient from the tank farm and will likely influence all of the contaminated wells when operating in concert with well R-2.

Building 5200. All wells monitored during the 12-hour pumping period showed a decline in the water table elevation for the first 8-hours and, in most cases, continuing through the full 12-hour period. Two wells showed a slight rise in the water table from the 1800 to 2200-hours readings; and this appears to be the result of recovery of the water table immediately following pump shut-

Page Two
Mr. E. Terhorst
December 11, 1986

down. Groundwater contours at Building 5200 indicate a pumping zone of influence which extends downgradient toward the Calabazas Creek levee. This zone directly influences wells which have had detectable levels of contamination during prior sampling. The extraction well, R-1, is hydraulically connected to the tank farm and will function to extract contaminated groundwater from the tank farm backfill and adjacent soils as intended.

If you have any further questions regarding our monitoring results and evaluation, please call Patrick Casey or myself at (415) 236-6114.

Sincerely,

QUALIFICATIONS

Jennifer Chan **Associate Consultant**

Education:

B.S. – Environmental Policy Analysis and Planning, University of California, Davis

Ms. Chan provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Environmental Transaction Analyses, Regulatory Database Reviews, and Historical Records Reviews.

Project experience for Ms. Chan includes:

- Phase I Environmental Site Assessments
- Environmental Transaction Screens
- Environmental Transaction Analyses
- Regulatory Database Reviews
- Historical Records Reviews

In addition, prior to joining the environmental service industry, Ms. Chan spent four years studying a broad range of environmental disciplines, including: urban, transportation, and environmental planning; natural resource management; and environmental law and policy.

Steve G. Kovach, REA - Due Diligence Manager, Northern California Region

B.A. - Botany, Miami University (Ohio)
Minor – Conservation and the Environment

California Registered Environmental Assessor (REA Class I 08274)
Certified OSHA 40-Hour Hazardous Waste Operations and Emergency Response

Mr. Kovach has spent over nine years working in a broad range of environmental and engineering disciplines including: engineering and environmental due diligence services, industrial air, water, and wastewater permit compliance and monitoring, hazardous waste management and disposal, electrical utilities projects, environmental engineering projects, and wetland ecology research. Mr. Kovach has worked closely with regulatory agencies including the US Environmental Protection Agency, Department of Toxic Substance Control, California Water Resources Control Board, California Integrated Waste Management Board, Bay Area Air Quality Management District, East Bay Municipal Utilities District, and the US Department of Energy.

Currently, Mr. Kovach is the Due Diligence Manager, Northern California Region for AEI, specializing in environmental due diligence services. As a senior member of AEI, Mr. Kovach provides staff supervision and senior review expertise to ensure ASTM compliance and satisfaction of client requirements for environmental assessments. AEI's review process provides for customization of reports to client needs, as well as strict conformance to ASTM standards. Additionally, Mr. Kovach provides senior project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Transaction Screens, and other related environmental assessments performed throughout California, Arizona, Nevada, Oregon, and Washington.

APPENDIX G

QUALIFICATIONS

Candace Quinn - Project Manager

BA Geography, magnum cum laude, Montclair State University
AHERA Asbestos Inspector Certificate-New York
OSHA 40-Hour Health and Safety Training

Ms. Quinn has 9 years of experience in the environmental industry providing project management for AEI.

Project experience for Ms. Quinn includes:

- Phase I Environmental Site Assessments, Transaction Screens, Limited Site Assessments, Regulatory Database Reviews, NJDEP Preliminary Assessment Reports
- Phase II Subsurface Investigations, Tank Tightness Testing, Ground Penetrating Radar Assessments, Soil Vapor and Soil Gas Investigations

Ms. Quinn specializes in due diligence to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Transaction Screens, Limited Site Assessments, and Preliminary Assessments. Additionally, Ms. Quinn designs and implements various Phase II Subsurface Investigations and Soil Vapor and Soil Gas Investigations in conjunction with regulatory agency requirements.

Margaret Garcia – National Client Manager

B.S. – Environmental Science, Villanova University, 2013

M.S. – Environmental Science, Rutgers, The State University of New Jersey, 2015

OSHA 40-Hour HAZWOPER and Annual 8-Hour Refreshers

EPA/AHERA Accredited Asbestos Inspector

New York State Asbestos Inspector

Ms. Garcia has been in the environmental and due diligence industry since 2013 and provides national client and project management to ensure ASTM compliance and satisfaction of client requirements.

Currently, Ms. Garcia serves as a National Client Manager, providing client services and review of environmental due diligence projects.

Project experience for Ms. Garcia includes:

- Phase I Environmental Site Assessments in compliance of the American Society for
- Testing and Materials (ASTM E1527 – 13)
- New Jersey Department of Environmental Protection (NJDEP) Preliminary Assessment
- (PA) reports
- Records Search with Risk Assessments (RSRA) reports
- Transaction Screens and Limited Site Assessments
- Historical Records Reviews
- Regulatory Database Reviews
- File and Database Reviews
- Asbestos and Lead-Based Paint Sampling
- Lead in Water Sampling
- Short-Term Radon Sampling

Field Experience for Ms. Garcia includes:

- Soil and Groundwater Sampling
- Soil Vapor and Indoor Air Sampling
- Asbestos Containing Material (ACM) Sampling
- Asbestos Surveys
- Asbestos Air Monitoring for Abatements
- Oversight of Soil Disposal and Hazardous Wastes
- Oversight of Soil Boring Advancements and Monitoring Well Installation

Ms. Garcia's experience also extends to a broad range of environmental disciplines including, but not limited to hazardous waste management, concepts of biodegradation and bioremediation, and land use planning and management. Ms. Garcia completed her M.S. in Environmental Science with a concentration in Pollution Prevention and Control from Rutgers, The State University of New Jersey.

Brie Solaegui – Director, Northern California Region

B.A. – Geography, University of California, Berkeley

Ms. Solaegui has been in the environmental service industry since 2006 and provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Environmental Transaction Analyses, Regulatory Database Reviews, Historical Records Reviews and Property Condition Assessments. She has successfully completed assessments on a variety of residential, commercial, and complex industrial sites. Ms. Solaegui is accustomed to all aspects of Due Diligence Property Assessments and the needs and requirements of a variety of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Freddie Mac, Fannie Mae, HUD, and customized client formats.

Project experience for Ms. Solaegui includes:

- Phase I Environmental Site Assessments
- Property Condition Assessments
- Environmental Transaction Screens
- Environmental Transaction Analyses
- Regulatory Database Reviews
- Historical Records Reviews
- Project Coordination and Setup

Current duties involve management of AEI's Northern California Region, including staff development and training, business development, client management, technical reviews of Environmental Site Assessment reports, and subcontractor management. In addition, prior to joining the environmental service industry, Ms. Solaegui spent four years studying a broad range of environmental disciplines, including: natural resource management, environmental planning and environmental policy.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of December 29, 2021 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Standard Owner Policy

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

Batton Associates, LLC

The estate or interest in the land hereinafter described or referred to covered by this Report is:

Fee

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

- a. General and special taxes and assessments for the fiscal year 2022-2023, a lien not yet due or payable.
 1. General and special taxes and assessments for the fiscal year 2021-2022.

| | |
|---------------------|--------------------|
| First Installment: | \$104,539.27, PAID |
| Penalty: | \$0.00 |
| Second Installment: | \$104,539.27, OPEN |
| Penalty: | \$0.00 |
| Tax Rate Area: | 007-029 |
| A. P. No.: | 104-50-004 |
 2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.
 3. An easement shown or dedicated on the map of Parcel Map recorded February 17, 1978 on file in [Book 413, Page 13 through 15](#), of Maps.
For: underground electric easement and incidental purposes.
 4. The terms and provisions contained in the document entitled "Installation and Maintenance of Landscape Improvements" recorded February 24, 1978 as [Book D486, Page 355](#) of Official Records.
 5. The terms and provisions contained in the document entitled "Installation and Maintenance of Illuminated Signs" recorded February 24, 1978 as [Book D486, Page 379](#) of Official Records.

6. The terms and provisions contained in the document entitled "Street Encroachment Agreement" recorded November 29, 1978 as [Book E126, Page 176](#) of Official Records.
7. An easement for exclusive easement for underground electrical systems and incidental purposes, recorded May 14, 1980 as [Book F327, Page 583](#) of Official Records.

In Favor of: City of Santa Clara, a Municipal corporation
Affects: as described therein

8. The fact that the land lies within the boundaries of the Bayshore North Redevelopment Project Area, as disclosed by the document recorded February 15, 2011 as Document No. [21084708](#) of Official Records.
9. A deed of trust to secure an original indebtedness of \$7,250,000.00 recorded May 03, 2012 as Instrument No. [21654417](#) of Official Records.
Dated: May 03, 2012
Trustor: Batton Associates, LLC, a California limited liability company
Trustee: First American Title Insurance Company, a California corporation
Beneficiary: The Lincoln National Life Insurance Company, an Indiana corporation

The above deed of trust states that it secures a line of credit. Before the close of escrow, we require evidence satisfactory to us that (a) all checks, credit cards or other means of drawing upon the line of credit have been surrendered to escrow, (b) the borrower has not drawn upon the line of credit since the last transaction reflected in the lender's payoff demand, and (c) the borrower has in writing instructed the beneficiary to terminate the line of credit using such forms and following such procedures as may be required by the beneficiary.

A document entitled "Absolute Assignment of Rents and Profits and Collateral Assignment of Leases" recorded May 03, 2012 as Instrument No. [21654418](#) of Official Records, as additional security for the payment of the indebtedness secured by the deed of trust.

10. Water rights, claims or title to water, whether or not shown by the Public Records.
11. Rights of parties in possession.

INFORMATIONAL NOTES

ALERT - CA Senate Bill 2 imposes an additional fee of \$75 up to \$225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

1. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structure known as 5201 Patrick Henry Drive, Santa Clara, CA.
2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

None
3. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.
4. Should this report be used to facilitate your transaction, we must be provided with the following prior to the issuance of the policy:
 - A. WITH RESPECT TO A CORPORATION:
 1. A certificate of good standing of recent date issued by the Secretary of State of the corporation's state of domicile.
 2. A certificate copy of a resolution of the Board of Directors authorizing the contemplated transaction and designating which corporate officers shall have the power to execute on behalf of the corporation.
 3. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
 4. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
 - B. WITH RESPECT TO A CALIFORNIA LIMITED PARTNERSHIP:
 1. A certified copy of the certificate of limited partnership (form LP-1) and any amendments thereto (form LP-2) to be recorded in the public records;
 2. A full copy of the partnership agreement and any amendments;
 3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
 4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
 5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
 - C. WITH RESPECT TO A FOREIGN LIMITED PARTNERSHIP:
 1. A certified copy of the application for registration, foreign limited partnership (form LP-5) and any amendments thereto (form LP-6) to be recorded in the public records;
 2. A full copy of the partnership agreement and any amendment;
 3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;

4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
 5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
- D. WITH RESPECT TO A GENERAL PARTNERSHIP:
1. A certified copy of a statement of partnership authority pursuant to Section 16303 of the California Corporation Code (form GP-I), executed by at least two partners, and a certified copy of any amendments to such statement (form GP-7), to be recorded in the public records;
 2. A full copy of the partnership agreement and any amendments;
 3. Requirements which the Company may impose following its review of the above material required herein and other information which the Company may require.
- E. WITH RESPECT TO A LIMITED LIABILITY COMPANY:
1. A copy of its operating agreement and any amendments thereto;
 2. If it is a California limited liability company, a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) to be recorded in the public records;
 3. If it is a foreign limited liability company, a certified copy of its application for registration (LLC-5) to be recorded in the public records;
 4. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, such document or instrument must be executed in accordance with one of the following, as appropriate:
 - (i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such documents must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
 - (ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
 5. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
 6. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
- F. WITH RESPECT TO A TRUST:
1. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
 2. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
 3. Other requirements which the Company may impose following its review of the material require herein and other information which the Company may require.
- G. WITH RESPECT TO INDIVIDUALS:
1. A statement of information.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

LEGAL DESCRIPTION

Real property in the City of Santa Clara, County of Santa Clara, State of California, described as follows:

PARCEL 110, AS SHOWN ON THAT PARCEL MAP FILED FOR RECORD IN THE OFFICE OF THE RECORDER OF THE COUNTY OF SANTA CLARA, STATE OF CALIFORNIA ON FEBRUARY 17, 1978, IN [BOOK 413 OF MAPS, PAGES 13, 14 AND 15.](#)

APN: 104-50-004

NOTICE I

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

If you have any questions about the effect of this new law, please contact your local First American Office for more details.

NOTICE II

As of January 1, 1991, if the transaction which is the subject of this report will be a sale, you as a party to the transaction, may have certain tax reporting and withholding obligations pursuant to the state law referred to below:

In accordance with Sections 18662 and 18668 of the Revenue and Taxation Code, a buyer may be required to withhold an amount equal to three and one-third percent of the sales price in the case of the disposition of California real property interest by either:

1. A seller who is an individual with a last known street address outside of California or when the disbursement instructions authorize the proceeds be sent to a financial intermediary of the seller, OR
2. A corporate seller which has no permanent place of business in California.

The buyer may become subject to penalty for failure to withhold an amount equal to the greater of 10 percent of the amount required to be withheld or five hundred dollars (\$500).

However, notwithstanding any other provision included in the California statutes referenced above, no buyer will be required to withhold any amount or be subject to penalty for failure to withhold if:

1. The sales price of the California real property conveyed does not exceed one hundred thousand dollars (\$100,000), OR
2. The seller executes a written certificate, under the penalty of perjury, certifying that the seller is a resident of California, or if a corporation, has a permanent place of business in California, OR
3. The seller, who is an individual, executes a written certificate, under the penalty of perjury, that the California real property being conveyed is the seller's principal residence (as defined in Section 1034 of the Internal Revenue Code).

The seller is subject to penalty for knowingly filing a fraudulent certificate for the purpose of avoiding the withholding requirement.

The California statutes referenced above include provisions which authorize the Franchise Tax Board to grant reduced withholding and waivers from withholding on a case-by-case basis.

The parties to this transaction should seek an attorney's, accountant's, or other tax specialist's opinion concerning the effect of this law on this transaction and should not act on any statements made or omitted by the escrow or closing officer.

The Seller May Request a Waiver by Contacting:
Franchise Tax Board
Withhold at Source Unit
P.O. Box 651
Sacramento, CA 95812-0651
(916) 845-4900

Privacy Policy

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its *Fair Information Values*, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's *Fair Information Values*. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

**CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
EXCLUSIONS**

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
 - (a) building; (d) improvements on the Land;
 - (b) zoning; (e) land division; and
 - (c) land use; (f) environmental protection.This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
 - (a) that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
 - (b) that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
 - (c) that result in no loss to You; or
 - (d) that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
 - (a) to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
 - (b) in streets, alleys, or waterways that touch the Land.This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows: For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

| Your Deductible Amount | <u>Our Maximum Dollar Limit of Liability</u> |
|--|---|
| Covered Risk 16: 1% of Policy Amount or \$2,500.00 (whichever is less) | \$10,000.00 |
| Covered Risk 18: 1% of Policy Amount or \$5,000.00 (whichever is less) | \$25,000.00 |
| Covered Risk 19: 1% of Policy Amount or \$5,000.00 (whichever is less) | \$25,000.00 |
| Covered Risk 21: 1% of Policy Amount or \$2,500.00 (whichever is less) | \$5,000.00 |

**ALTA RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)
EXCLUSIONS**

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
 - (a) and use
 - (b) improvements on the land
 - (c) and division
 - (d) environmental protectionThis exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date. This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
 - (a) a notice of exercising the right appears in the public records on the Policy Date
 - (b) the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking
3. Title Risks:

- (a) that are created, allowed, or agreed to by you
 - (b) that are known to you, but not to us, on the Policy Date -- unless they appeared in the public records
 - (c) that result in no loss to you
 - (d) that first affect your title after the Policy Date -- this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
- (a) to any land outside the area specifically described and referred to in Item 3 of Schedule A OR
 - (b) in streets, alleys, or waterways that touch your land
- This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

2006 ALTA LOAN POLICY (06-17-06) EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - i. the occupancy, use, or enjoyment of the Land;
 - ii. the character, dimensions, or location of any improvement erected on the Land;
 - iii. the subdivision of land; or
 - iv. environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
 - b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
- a. created, suffered, assumed, or agreed to by the Insured Claimant;
 - b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - c. resulting in no loss or damage to the Insured Claimant;
 - d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
 - e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
- a. a fraudulent conveyance or fraudulent transfer, or
 - b. a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an

accurate and complete land survey of the Land and not shown by the Public Records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

**2006 ALTA OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - i. the occupancy, use, or enjoyment of the Land;
 - ii. the character, dimensions, or location of any improvement erected on the Land;
 - iii. the subdivision of land; or
 - iv. environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - a. created, suffered, assumed, or agreed to by the Insured Claimant;
 - b. not Known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - c. resulting in no loss or damage to the Insured Claimant;
 - d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
 - e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
 - a. a fraudulent conveyance or fraudulent transfer; or
 - b. a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

**ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)
EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - i. the occupancy, use, or enjoyment of the Land;
 - ii. the character, dimensions, or location of any improvement erected on the Land;
 - iii. the subdivision of land; or
 - iv. environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
- b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - a. created, suffered, assumed, or agreed to by the Insured Claimant;
 - b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - c. resulting in no loss or damage to the Insured Claimant;
 - d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
 - e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - a. a fraudulent conveyance or fraudulent transfer, or
 - b. a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

APPENDIX J
RESUMES OF ENVIRONMENTAL PROFESSIONALS

PIANPIAN WU, PE

SENIOR PROJECT MANAGER

ENVIRONMENTAL ENGINEERING

Ms. Wu is a California licensed Professional Engineer with over 10 years of experience in the environmental industry, specializing in permitting, soil and groundwater investigation and remediation.

Pianpian brings more than two years of work experience with the Los Angeles Regional Water Quality Control Board (LARWQCB) at which she worked on the Water Quality Control Plan and the Ocean Plan for groundwater quality objectives and permit requirements. Her experience includes implementation of inspections for remedial projects and onsite wastewater treatment systems; preparing and issuing General and Individual WDRs to responsible parties; preparation of California Environmental Quality Act (CEQA) documents; data management and process; and preparation of enforcement correspondence.

With over 8 years of experience in the consulting firms, Pianpian also possesses extensive experience in project management; acquiring permits; site characterization; design and implementation of both in-situ and ex-situ soil and groundwater remediation technologies for treating various contaminants; management of field works; preparation of technical reports to meet scope and quality objectives and client expectations.

SELECTED PROJECTS

- Creekside Center Dry Cleaner, Vacuum Enhanced Pumping System, Hayward, CA
- Laguna Clara Apartments, Construction Dewatering Treatment – Permitting, Compliance Monitoring and Reporting, Santa Clara, CA
- 5201 Patrick Henry Drive, Phase I Environmental Site Assessment, Santa Clara, CA
- Pier 70 – 20th Street, Soil Disposal Evaluation, San Francisco, CA
- Defense Fuel Support Point-Norwalk, Biosparge, Soil Vapor Extraction and Light Non-Aqueous Phase Liquid Recovery, Norwalk, CA*
- Defense Fuel Support Point-Norwalk, Soil Excavation, Bioremediation and Backfilling, Norwalk, CA*
- Defense Fuel Support Point-San Pedro, High Vacuum Multi-Phase Extraction, San Pedro, CA*
- Defense Fuel Support Point-San Pedro, Thermal Remediation, San Pedro, CA*
- El Toro Pipeline Release Site, Dual-Phase Extraction, Tustin, CA*
- Former Airdrome Precision Components, In-Situ Chemical Oxidation (ISCO), Long Beach, CA*
- Former Southwest Marine, PCBs, Metals and Total Petroleum Hydrocarbon (TPH) Impacted Soil Excavation, Terminal Island, CA*
- Chevy Chase Property, Soil and Soil Vapor Investigation, Los Angeles, CA*
- Various Locations, Construction Dewatering Treatment – Permitting, Monitoring and Reporting, CA*

*Denotes work performed prior to employment at Langan

JEFFREY F. LUDLOW, PG

PRINCIPAL

ENVIRONMENTAL ENGINEERING

Mr. Ludlow has 37 years of experience in marketing, designing, and managing multidisciplinary environmental projects for private and public clients. Mr. Ludlow directs technical staff and subcontractors and provides project strategy, scheduling, budgetary control, and client and regulatory interfacing for projects ranging in size from \$1,000 to over \$4 million. His wide range of environmental experience includes assessing and remediating point source and nonpoint-source releases of organic and inorganic chemicals from tanks, sumps, waste ponds, wastewater streams, mine tailings and audits, and landfills. Mr. Ludlow developed Langan's vapor intrusion mitigation practice and has designed vapor control and landfill gas mitigation systems for dozens of commercial and residential development projects in Northern and Southern California. These projects typically involve construction of new buildings over groundwater contaminated with volatile organic compounds (VOCs), and petroleum hydrocarbons or are on former landfills with methane gas mitigation issues. In most projects, Langan also provided geotechnical engineering services and design input to the building foundation system. This integrated approach has allowed Mr. Ludlow to design vapor mitigation solutions that are cost effective, constructible and integral to other building systems that minimize disruption of the normal building activities.
