STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Custom Soil Resource Report for Santa Clara Area, California, Western Part

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (<http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/>) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (<https://offices.sc.egov.usda.gov/locator/app?agency=nrcs>) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

Custom Soil Resource Report

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

Custom Soil Resource Report

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
 Web Soil Survey URL:
 Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Santa Clara Area, California, Western Part
 Survey Area Data: Version 10, Sep 9, 2021

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 11, 2021—Jun 16, 2021

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend (5201 Patrick Henry Drive)

| Map Unit Symbol | Map Unit Name | Acres in AOI | Percent of AOI |
|------------------------------------|---|--------------|----------------|
| 145 | Urbanland-Hangerone complex, 0 to 2 percent slopes, drained | 5.0 | 70.7% |
| 150 | Urbanland-Embarcadero complex, 0 to 2 percent slopes, drained | 2.1 | 29.3% |
| Totals for Area of Interest | | 7.1 | 100.0% |

Map Unit Descriptions (5201 Patrick Henry Drive)

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

Custom Soil Resource Report

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Santa Clara Area, California, Western Part

145—Urbanland-Hangerone complex, 0 to 2 percent slopes, drained

Map Unit Setting

National map unit symbol: 1nszw

Elevation: 0 to 220 feet

Mean annual precipitation: 14 to 24 inches

Mean annual air temperature: 57 to 61 degrees F

Frost-free period: 275 to 325 days

Farmland classification: Not prime farmland

Map Unit Composition

Urban land: 70 percent

Hangerone, drained, and similar soils: 25 percent

Minor components: 5 percent

Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Urban Land

Setting

Landform: Basin floors

Landform position (three-dimensional): Talf

Down-slope shape: Linear

Across-slope shape: Linear

Parent material: Disturbed and human-transported material

Description of Hangerone, Drained

Setting

Landform: Basin floors

Landform position (three-dimensional): Talf

Down-slope shape: Linear

Across-slope shape: Linear, convex

Parent material: Alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics

Typical profile

A1 - 0 to 9 inches: clay

A2 - 9 to 17 inches: clay

Bw - 17 to 27 inches: clay

Bk - 27 to 35 inches: clay

Ck - 35 to 45 inches: clay loam

C - 45 to 72 inches: gravelly loam

2Ab - 72 to 89 inches: clay

Properties and qualities

Slope: 0 to 2 percent

Depth to restrictive feature: More than 80 inches

Drainage class: Poorly drained

Runoff class: Low

Capacity of the most limiting layer to transmit water (Ksat): Moderately low to moderately high (0.06 to 0.20 in/hr)

Depth to water table: More than 80 inches

Frequency of flooding: None

Custom Soil Resource Report

Frequency of ponding: None
Calcium carbonate, maximum content: 25 percent
Gypsum, maximum content: 2 percent
Maximum salinity: Nonsaline to slightly saline (0.2 to 4.0 mmhos/cm)
Sodium adsorption ratio, maximum: 5.0
Available water supply, 0 to 60 inches: Moderate (about 8.3 inches)

Interpretive groups

Land capability classification (irrigated): 2s
Land capability classification (nonirrigated): 3s
Hydrologic Soil Group: C
Ecological site: R014XG904CA - Dry Clayey Bottom
Hydric soil rating: Yes

Minor Components

Clear lake

Percent of map unit: 2 percent

III. TYPE OF COMPANY: STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODE:

Use either one or two SIC codes (a four digit number) that best describe your company's products, services, or industrial activity.

Example: 7384 Photofinishing lab 3672 Printed circuit boards

First: 7371 Software Programming Second: _____

IV. PRIOR PERMIT STATUS: Check yes or no to each question:

- | | | |
|--------------------------|-------------------------------------|--|
| YES | NO | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 1. Did you file a PBR Notice of Intent to Operate (DTSC Form 8462) in 1992 for this location? |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 2. Do you now have or have you ever held a state or federal hazardous waste facility full permit or interim status for any of these treatment units? |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 3. Do you now have or have you ever held a state or federal full permit or interim status for any other hazardous waste activities at this location? |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 4. Have you ever held a variance issued by the Department of Toxic Substances Control for the treatment you are now notifying for at this location? |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 5. Has this location ever been inspected by the state or any local agency as a hazardous waste generator? |

V. PRIOR ENFORCEMENT HISTORY: Not required from generators only notifying as conditionally exempt.

- | | | |
|--------------------------|-------------------------------------|---|
| YES | NO | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Within the last three years, has this facility been the subject of any convictions, judgments, settlements, or final orders resulting from an action by any local, state, or federal environmental, hazardous waste, or public health enforcement agency? |

(For the purposes of this form, a notice of violation does not constitute an order and need not be reported unless it was not corrected and became a final order.)

- If you answered Yes, check this box and attach a listing of convictions, judgments, settlements, or orders and a copy of the cover sheet from each document. (See the Instructions for more information)

VI. ATTACHMENTS:

1. A plot plan/map detailing the location(s) of the covered unit(s) in relation to the facility boundaries.
2. A unit specific notification form for each unit to be covered at this location.

VII. **CERTIFICATIONS:** *This form must be signed by an authorized corporate officer or any other person in the company who has operational control and performs decision-making functions that govern operation of the facility (per title 22, California Code of Regulations (CCR) section 66270.11). All three copies must have original signatures.*

Waste Minimization I certify that I have a program in place to reduce the volume, quantity, and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment.

Tiered Permitting Certification I certify that the unit or units described in these documents meet the eligibility and operating requirements of state statutes and regulations for the indicated permitting tier, including generator and secondary containment requirements. I understand that if any of the units operate under Permit by Rule or Conditional Authorization, I will also be required to provide required financial assurances by January 1, 1994, and conduct a Phase I environmental assessment by January 1, 1995.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete.

I am aware that there are substantial penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

OPERATING REQUIREMENTS:

Please note that generators treating hazardous waste onsite are required to comply with a number of operating requirements which differ depending on the tier(s) under which one operates. These operating requirements are set forth in the statutes and regulations, some of which are referenced in the Tier-Specific Factsheets.

SUBMISSION PROCEDURES:

You must submit two copies of this completed notification by certified mail, return receipt requested, to:

Department of Toxic Substances Control
Form 1772
Onsite Hazardous Waste Treatment Unit
400 P Street, 4th Floor (walk in only)
P.O. Box 806
Sacramento, CA 95812-0806.

You must also submit one copy of the notification and attachments to the local regulatory agency in your jurisdiction as listed in the instruction materials. You must also retain a copy as part of your operating record.

All three forms must have original signatures, not photocopies.

CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT**UNIT SPECIFIC NOTIFICATION**

(pursuant to Health and Safety Code Section 25201.5(a))

UNIT NAME Silver Recovery Unit R-11UNIT ID NUMBER Unit 1 (one)

NUMBER OF TREATMENT DEVICES:

1 Tank(s)

____ Container(s)

Please Note: Generators operating units under Conditionally Exempt Small Quantity Treatment may not operate any other units under other permitting tiers or hold any other state or federal hazardous waste permit or authorization for this facility.

Each unit must be clearly identified and labeled on the plot plan attached to Form 1772. Assign your own unique number to each unit. The number can be sequential (1, 2, 3) or you may use any system you choose.

This category is only available to generators that treat less than 55 gallons or 500 pounds of hazardous waste in any calendar month in ALL units at this facility and that are not otherwise required to obtain a hazardous waste facilities permit. This volume limit applies to the TOTAL hazardous waste treated onsite in any calendar month, and is NOT a limit for each wastestream or unit separately. The wastestreams treated must be limited to those listed in title 22, CCR, section 67450.11, which are also listed below.

Enter the estimated monthly total volume of hazardous waste treated by this unit. This should be the maximum or highest amount treated in any month. Indicate in the narrative (Section II) if your operations have seasonal variations.

I. WASTESTREAMS AND TREATMENT PROCESSES:Estimated Monthly Total Volume Treated: _____ pounds and/or 55 gallons

The following are the eligible wastestreams and treatment processes. Please check all applicable boxes:

1. Aqueous wastes containing hexavalent chromium may be treated by the following process:

a. Reduction of hexavalent chromium to trivalent chromium with sodium bisulfite, sodium metabisulfite, sodium thiosulfate, ferrous sulfate, ferrous sulfide or sulfur dioxide provided both pH and addition of the reducing agent are automatically controlled.

2. Aqueous wastes containing metals listed in Title 22, CCR, section 66261.24 (a)(2), including silver from photofinishing, and/or fluoride salts may be treated by the following technologies:

- a. pH adjustment or neutralization.
- b. Precipitation or crystallization.
- c. Phase separation by filtration, centrifugation, or gravity settling.
- d. Ion exchange.
- e. Reverse osmosis.
- f. Metallic replacement.
- g. Plating the metal onto an electrode.
- h. Electrodialysis.
- i. Electrowinning or electrolytic recovery.
- j. Chemical stabilization using silicates and/or cementitious types of reactions.
- k. Evaporation.
- l. Adsorption.

**CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT
UNIT SPECIFIC NOTIFICATION**
(pursuant to Health and Safety Code Section 25201.5(a))

3. Aqueous wastes with total organic carbon less than ten percent as measured by EPA Method 9060 and less than one percent total volatile organic compounds as measured by EPA Method 8240 may be treated by the following technologies:

- a. Phase separation by filtration, centrifugation or gravity settling, but excluding super critical fluid extraction.
- b. Adsorption.
- c. Distillation.
- d. Biological processes conducted in tanks or containers and utilizing naturally occurring microorganisms.
- e. Photodegradation using ultraviolet light, with or without the addition of hydrogen peroxide or ozone, provided the treatment is conducted in an enclosed system.
- f. Air stripping or steam stripping.

4. Sludges, dusts, solid metal objects and metal workings which contain or are contaminated with metals listed in title 22, CCR, section 66261.24 (a)(2) and/or fluoride salts may be treated by the following technologies:

- a. Chemical stabilization using silicates and/or cementitious types of reactions.
- b. Physical processes which change only the physical properties of the waste such as grinding, shredding, crushing, or compacting.
- c. Drying to remove water.
- d. Separation based on differences in physical properties such as size, magnetism or density.

5. Alum, gypsum, lime, sulfur or phosphate sludges may be treated by the following technologies:

- a. Chemical stabilization using silicates and/or cementitious types of reactions.
- b. Drying to remove water.
- c. Phase separation by filtration, centrifugation or gravity settling.

6. Wastes identified in title 22, CCR, section 66261.120, that meet the criteria and requirements for special waste classification in title 22, CCR, section 66261.122 may be treated by the following technologies:

- a. Chemical stabilization using silicates and/or cementitious types of reactions.
- b. Drying to remove water.
- c. Phase separation by filtration, centrifugation or gravity settling.
- d. Screening to separate components based on size.
- e. Separation based on differences in physical properties such as size, magnetism or density.

**CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT
UNIT SPECIFIC NOTIFICATION**
(pursuant to Health and Safety Code Section 25201.5(a))

7. Wastes, except asbestos, which have been classified by the Department as special wastes pursuant to title 22, CCR, section 66261.124, may be treated by the following technologies:
- a. Chemical stabilization using silicates and/or cementitious types of reactions.
 - b. Drying to remove water
 - c. Phase separation by filtration, centrifugation or gravity settling.
 - d. Magnetic separation.
8. Inorganic acid or alkaline wastes may be treated by the following technology:
- a. pH adjustment or neutralization.
9. Soils contaminated with metals listed in title 22, CCR, section 66261.24 (a)(2), (Persistent and Bioaccumulative Toxic Substances) may be treated by the following technologies:
- a. Chemical stabilization using silicates and/or cementitious types of reactions.
 - b. Screening to separate components based on size.
 - c. Magnetic separation.
10. Used oil, unrefined oil waste, mixed oil, oil mixed with water and oil/water separation sludges may be treated by the following technologies:
- a. Phase separation by filtration, centrifugation or gravity settling, but excluding super critical fluid extraction.
 - b. Distillation.
 - c. Neutralization.
 - d. Separation based on differences in physical properties such as size, magnetism or density.
 - e. Reverse osmosis.
 - f. Biological processes conducted in tanks or containers and utilizing naturally occurring microorganisms.
11. Containers of 110 gallons or less capacity which are not constructed of wood, paper, cardboard, fabric, or any other similar absorptive material, which have been emptied as specified in Title 40 of the Code of Federal Regulations (CFR), section 261.7 or inner liners removed from empty containers that once held hazardous waste or hazardous material and which are not excluded from regulation may be treated by the following technologies provided the treated containers and rinseate are managed in compliance with applicable requirements:
- a. Rinsing with a suitable liquid capable of dissolving or removing the hazardous constituents which the container held.
 - b. Physical processes such as crushing, shredding, grinding or puncturing, that change only the physical properties of the container or inner liner, provided the container or inner liner is first rinsed and the rinseate is removed from the container or inner liner.
12. Multi-component resins may be treated by the following process:
- a. Mixing the resin components together in accordance with the manufacturer's instructions.

**CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT
UNIT SPECIFIC NOTIFICATION**
(pursuant to Health and Safety Code Section 25201.5(a))

II. NARRATIVE DESCRIPTIONS: *Provide a brief description of the specific waste treated and the treatment process used.*

1. SPECIFIC WASTE TYPES TREATED: Photographic chemicals, developer, wash water
, fixer and bleach
2. TREATMENT PROCESS(ES) USED: Electrolytic and metallic exchange silver recovery
unit.

III. RESIDUAL MANAGEMENT: *Check Yes or No to each question as it applies to all residuals from this treatment unit.*

YES NO

1. Do you discharge non-hazardous aqueous waste to a publicly owned treatment works (POTW)/sewer?
2. Do you discharge non-hazardous aqueous waste under an NPDES permit?
3. Do you have your residual hazardous waste hauled offsite by a registered hazardous waste hauler?
If you do, where is the waste sent? *Check all that apply.*
- a. Offsite recycling
- b. Thermal treatment
- c. Disposal to land
- d. Further treatment
4. Do you dispose of non-hazardous solid waste residues at an offsite location?
5. Other method of disposal. Specify: _____

IV. BASIS FOR NOT NEEDING A FEDERAL PERMIT:

In order to demonstrate eligibility for one of the onsite treatment tiers, facilities are required to provide the basis for determining that a hazardous waste permit is not required under the federal Resource Conservation and Recovery Act (RCRA) and the federal regulations adopted under RCRA (Title 40, Code of Federal Regulations (CFR)).

Choose the reason(s) that describe the operation of your onsite treatment units:

1. The hazardous waste being treated is not a hazardous waste under federal law although it is regulated as a hazardous waste under California state law.
2. The waste is treated in wastewater treatment units (tanks), as defined in 40 CFR Part 260.10, and discharged to a publicly owned treatment works (POTW)/sewerage agency or under an NPDES permit. 40 CFR 264.1(g)(6) and 40 CFR 270.2.

**CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT
UNIT SPECIFIC NOTIFICATION**
(pursuant to Health and Safety Code Section 25201.5(a))

IV. BASIS FOR NOT NEEDING A FEDERAL PERMIT: (continued)

3. The waste is treated in elementary neutralization units, as defined in 40 CFR Part 260.10, and discharged to a POTW/sewering agency or under an NPDES permit. 40 CFR 264.1(g)(6) and 40 CFR 270.2.
4. The waste is treated in a totally enclosed treatment facility as defined in 40 CFR Part 260.10; 40 CFR 264.1(g)(5).
5. The company generates no more than 100 kg (approximately 27 gallons) of hazardous waste in a calendar month and is eligible as a federal conditionally exempt small quantity generator. 40 CFR 260.10 and 40 CFR 261.5.
6. The waste is treated in an accumulation tank or container within 90 days for over 1000 kg/month generators and 180 or 270 days for generators of 100 to 1000 kg/month. 40 CFR 262.34, 40 CFR 270.1(c)(2)(i), and the Preamble to the March 24, 1986 Federal Register.
7. Recyclable materials are reclaimed to recover economically significant amounts of silver or other precious metals. 40 CFR 261.6(a)(2)(iv), 40 CFR 264.1(g)(2), and 40 CFR 266.70.
8. Empty container rinsing and/or treatment. 40 CFR 261.7.
9. Other: Specify: _____

V. TRANSPORTABLE TREATMENT UNIT: Check Yes or No. Please refer to the Instructions for more information.

- YES NO
 Is this unit a Transportable Treatment Unit?

If you answered yes, you must also complete and attach Form 1772E to this page.

The Tier-Specific Factsheets contain a summary of the operating requirements for this category. Please review those requirements carefully before completing or submitting this notification package.

DEPARTMENT OF TOXIC SUBSTANCES CONTROL

Region 2- 700 Heinz Avenue, Suite 200

Berkeley, CA 94710

**CHECKLIST AND INITIAL VERIFICATION INSPECTION REPORT FOR
Permit by Rule, Conditionally Authorized, and Conditionally Exempt Notifiers**

FACILITY NAME: CLARIS CORPORATION EPA ID NUMBER: CAL000112070
 PHYSICAL ADDRESS: 5201 PATRICK HENRY DR, SANTA CLARA
 FACILITY CONTACT-NAME: TEX TYNER PHONE: 408-987-7270
 SIC CODE(S): 7371 INSPECTION DATE: 3/14/95 Local# _____

NOTIFIED UNIT COUNT: PBR _____ CA _____ CESW _____ CESQT 1 TOTAL 1
 CORRECT UNIT COUNT: PBR _____ CA _____ CESW _____ CESQT 0 TOTAL 0

This checklist and inspection report identify violations of state law regarding onsite treaters of hazardous waste, operating under an onsite permitting tier. This inspection verifies the information provided on form DTSC 1772. It also covers generator requirements, although a separate checklist may be used for those requirements. A checkmark indicates violation of the law, which are explained in more detail on the attached note sheets. The governing laws are the Health and Safety Code (HSC) and Title 22 of the California Code of Regulations (22 CCR).

Generator Standards:

Each inspection agency may use their own generator inspection checklist or protocols, which are summarized below. A full evaluation of each item or document is not conducted during the Verification Inspection, unless serious deficiencies are suspected.

NO

- ___ 1. Contingency plan has been prepared (adequately minimize releases, has alarm/communication system, lists emergency equipment and phone numbers for emergency coordinators).
- ___ 2. Written training documents and records prepared for employees handling hazardous waste.
- ___ 3. Meet container management standards (storage time limits, closed, labelled, compatibility, inspected weekly, in good condition, with ignitables/reactives 50 feet from property line).
- ___ 4. Meet tank management standards (either secondary containment or integrity assessments, plus storage time limits, labelled, compatibility, inspected daily, in good condition, with ignitables/reactives 50 feet from property line).
- ___ 5. All wastes are properly identified.

Treatment Items-Facility Wide: (Facility must submit a revised Form 1772 to correct errors or omissions.)

- ___ 6. All units under PBR, CA, and CE are properly indicated on Form DTSC 1772. (Add any new units with unit sheets or correct tier on the unit sheet.)
- ___ 7. All generator identification information on Form DTSC 1772 is correct.
- ___ 8. The submitted plot plan/map adequately shows the location of all regulated units.
- ___ 9. There are records documenting compliance with sewer agency pretreatment standards and industrial waste discharge requirements, where applicable.
- ___ 10. Generator has prepared/maintained source reduction documents requirements (SB 14/SB 1726). For many wastes, a checklist or plan is required only if annual hazardous waste volume is over 5,000 kilograms (approx 11,000 pounds or 1,350 gallons). HSC 25244.15, 25244.19-.21

For CA or PBR notifiers:

- ___ 11. The generator has an annual waste minimization certification. (PBR submit with renewals.)

DEPARTMENT OF TOXIC SUBSTANCES CONTROL

Region 2- 700 Heinz Avenue, Suite 200

Berkeley, CA 94710

**CHECKLIST AND INITIAL VERIFICATION INSPECTION REPORT FOR
Permit by Rule, Conditionally Authorized, and Conditionally Exempt Notifiers
UNIT SHEET**

Complete one unit sheet for each unit either listed in the notification or identified during the inspection.

Unit Number: # 1 Unit Name: SILVER RECOVERY UNIT R-11
 Notified Tier: CESQT Correct Tier: EXEMPT

Notified Device Count: Tanks 1 Containers
 Correct Device Count: Tanks Containers 1

For each Unit:

- NO
12. All hazardous wastes treated are generated onsite.
13. The unit notification is accurate as to the number of tank(s) and/or container(s).
- X 14. The estimated notification monthly treatment volume is appropriate for the indicated tier. *
15. The waste identification/evaluation is appropriate for the tier indicated.
16. The wastestream(s) given on the notification form are appropriate for the tier.
17. The treatment process(es) given on the notification form are appropriate for the tier.
18. The residuals management information on the form is correct and documented for the unit.
19. The indicated basis for not needing a federal permit on the notification form is correct.
20. There are written operating instructions and a record of the dates, volumes, residual management, and types of wastes treated in the unit.
21. There is a written inspection schedule (containers-weekly and tanks-daily).
22. There is a written inspection log maintained of the inspections conducted.
23. If the unit has been closed, the generator has notified DTSC and the local agency of the closure.

For each CA or PBR unit:

24. The generator has secondary containment for treatment in containers.

For each PBR unit:

25. There is a waste analysis plan
26. There are waste analysis records.
27. There is a closure plan for the unit.

Unit Comments/Observations: (If this is a unit that was not included on the notification form, the violation is operating without a permit-HSC 25201(a). Note if the activity is currently ineligible for onsite authorization.)

* < 10g fixer used /month, so less << 10g treated.

Permit by Rule, Conditionally Authorized, and Conditionally Exempt Notifiers
SIGNATURE SHEET**

Onsite Recycling: Only answer if this facility recycles more than 100 kilograms/month of hazardous waste onsite.

NO

- ___ 28. The appropriate local agency has been notified. HSC 25143.10
___ 29. Activities claimed under the onsite recycling exemption are appropriate. HSC 25143.2 et sec.

Releases: If there has been a release, provide the following information: number of releases, date(s), type(s) and quantity of materials/waste, and the cause(s). Use unit sheet or attach additional pages.

YES

- ___ 30. Within the last three years, were there any **unauthorized or accidental releases to the environment** of hazardous waste or hazardous waste constituents from onsite treatment units?
___ 31. Within the last three years, were there any **unauthorized or accidental releases to the environment** of hazardous waste or hazardous waste constituents from any location at this facility?

For purposes of a Tiered Permitting inspection, an unauthorized and/or accidental release to the environment does not include spills contained within containment systems.

This report may identify conditions observed this date that are alleged to be violations of one or more sections at the California Health and Safety Code (HSC) or the California Code of Regulations, Title 22 (22 CCR) relating to the management of hazardous waste. The violations may be described in more detail on the attached note sheets. If any violations are noted, the facility is required to submit a signed Certification of Return to Compliance within 30 days, unless otherwise specified. (A certification form is provided.) If any corrections are needed to the initial notification, the facility will submit a revised notification within 30 days to the Department of Toxic Substances Control with a copy to the local enforcement agency.

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction

Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

RECEIVED

Reviewed 11/26/08 AH

OCT 07 2008

To: Agency Name: **Santa Clara Fire Department-Hazardous Materials Division**

Agency Mailing Address: **1675 Lincoln Street
Santa Clara, CA 95050**

S.C.F.D.

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: FileMaker Inc.

Facility Street Address: 5201 Patrick Henry Dr.

City: Santa Clara

Date of Current HMBP: August 20, 2008

I certify that: (Check the appropriate box.)

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification along with a signed Unified Program Consolidated Form (UPCF) Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials which would require updating of the HMBP.

Name of Owner/Operator (Print): Betty Miller

Title: Facilities/Security Manager

Signature of Owner/Operator: Betty Miller

Date: August 20, 2008

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

Page 1 of 4

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made (see section 3, below).

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all that apply):

Bells; Horns/Sirens; Verbal (i.e., shouting); Other (specify _____)

b. Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance Phone No.: **911**

State Office of Emergency Services Phone No.: **(800) 852-7550**

b. Post-Incident Contacts*:

Certified Unified Program Agency (CUPA) Phone No.: **(408) 615-4960**

Fire Department Hazardous Materials Program Phone No.: **(408) 615-4960**

California EPA Department of Toxic Substances Control Phone No.: **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health Phone No.: **(408) 452-7288**

Air Quality Management District Phone No.: **(415) 771-6000**

Regional Water Quality Control Board Phone No.: **(510) 622-2300**

* Phone numbers for agencies in Unidocs' Member Agency geographic jurisdictions are available at www.unidocs.org.

c. Emergency Resources:

Poison Control Center* Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **KP Santa Clara Medical Center** Phone No.: **(408) 236-6440**

Address: **960 Killy Blvd. 710 Lawrence Expwy** City: **Santa Clara, CA 95051**

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

- a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator (*or his/her designee when the emergency coordinator is on call*) shall:
 - i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
 - ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects (*e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.*).
 - iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
 - iv. Notify appropriate local authorities (*i.e., call 911*).
 - v. Notify the State Office of Emergency Services at 1-800-852-7550.
 - vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
 - vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.
- b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
 - i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
 - ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
 - iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
 - iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

- a. Name, address, and telephone number of the facility's owner/operator;
- b. Name, address, and telephone number of the facility;
- c. Date, time, and type of incident (*e.g., fire, explosion, etc.*);
- d. Name and quantity of material(s) involved;
- e. The extent of injuries, if any;
- f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
- g. Estimated quantity and disposition of recovered material that resulted from the incident;
- h. Cause(es) of the incident;
- i. Actions taken in response to the incident;
- j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(e)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

| 1. Equipment Category | 2. Equipment Type | 3. Locations * | 4. Description** |
|---|---|-------------------|---|
| Personal Protective Equipment, Safety Equipment, and First Aid Equipment | <input type="checkbox"/> Cartridge Respirators | | |
| | <input type="checkbox"/> Chemical Monitoring Equipment (<i>describe</i>) | | |
| | <input checked="" type="checkbox"/> Chemical Protective Aprons/Coats | | |
| | <input checked="" type="checkbox"/> Chemical Protective Boots | | |

| | <input type="checkbox"/> Fire Extinguisher Systems <i>(describe)</i> | |
| | <input checked="" type="checkbox"/> Fire Extinguishers <i>(describe)</i> | Throughout internal Facility and Diesel Tank area. |
| | <input type="checkbox"/> Other <i>(describe)</i> | |
| Spill Control | <input checked="" type="checkbox"/> Absorbents <i>(describe)</i> | Proposed Absorbents used for diking to control spill in case Valley Oil truck fuel leaks. |
| | <input checked="" type="checkbox"/> Berms/Dikes <i>(describe)</i> | Proposed Spill Storm Drain Mat from emergency spill kit to cover nearest storm drain in case of Truck fuel leak. |
| | <input type="checkbox"/> Other <i>(describe)</i> | |
| Equipment and Decontamination Equipment | <input type="checkbox"/> Decontamination Equipment <i>(describe)</i> | |
| | <input type="checkbox"/> Emergency Tanks <i>(describe)</i> | |
| | <input type="checkbox"/> Exhaust Hoods | |
| | <input type="checkbox"/> Gas Cylinder Leak Repair Kits <i>(describe)</i> | |
| | <input type="checkbox"/> Neutralizers <i>(describe)</i> | |
| | <input type="checkbox"/> Overpack Drums | |
| | <input type="checkbox"/> Sumps <i>(describe)</i> | |
| | <input type="checkbox"/> Other <i>(describe)</i> | |
| Communications and Alarm Systems | <input type="checkbox"/> Chemical Alarms <i>(describe)</i> | |
| | <input type="checkbox"/> Intercoms/ PA Systems | |
| | <input type="checkbox"/> Portable Radios | |
| | <input checked="" type="checkbox"/> Telephones | Personal (cell phones) |
| | <input checked="" type="checkbox"/> Tank Leak Detection Systems | Low fuel level switch (alarm/shutdown) |
| Additional Equipment <i>(Use Additional Pages if Needed.)</i> | <input type="checkbox"/> Other <i>(describe)</i> | |
| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |

* Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.

** Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

Page 1 of 2

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. [Note: Items marked with an asterisk (*) are required.]:

1. Personnel are trained in the following procedures:

| |
|---|
| <input checked="" type="checkbox"/> Internal alarm/notification * |
| <input checked="" type="checkbox"/> Evacuation/re-entry procedures & assembly point locations* |
| <input checked="" type="checkbox"/> Emergency incident reporting |
| <input type="checkbox"/> External emergency response organization notification |
| <input type="checkbox"/> Location(s) and contents of Emergency Response/Contingency Plan |
| <input checked="" type="checkbox"/> Facility evacuation drills, that are conducted at least (<i>specify</i>): "Annually" (e.g., "Quarterly", etc.) |

2. Chemical Handlers are additionally trained in the following:

| |
|---|
| <input checked="" type="checkbox"/> Safe methods for handling and storage of hazardous materials * |
| <input checked="" type="checkbox"/> Location(s) and proper use of fire and spill control equipment |
| <input checked="" type="checkbox"/> Spill procedures/emergency procedures |
| <input checked="" type="checkbox"/> Proper use of personal protective equipment * |
| <input checked="" type="checkbox"/> Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (<i>i.e., inhalation, ingestion, absorption</i>) * |
| <input type="checkbox"/> Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (<i>e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.</i>) * |

3. Emergency Response Team Members are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

| |
|---|
| <input checked="" type="checkbox"/> Personnel rescue procedures |
| <input checked="" type="checkbox"/> Shutdown of operations |
| <input checked="" type="checkbox"/> Liaison with responding agencies |
| <input checked="" type="checkbox"/> Use, maintenance, and replacement of emergency response equipment |
| <input checked="" type="checkbox"/> Refresher training, which is provided at least annually * |
| <input checked="" type="checkbox"/> Emergency response drills, which are conducted at least (<i>specify</i>): "Annually" (e.g., "Quarterly", etc.) |

Record Keeping
(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. [Note: Items marked with an asterisk (*) are required.]:

| | |
|-------------------------------------|--|
| <input checked="" type="checkbox"/> | Current employees' training records (to be retained until closure of the facility) * |
| <input checked="" type="checkbox"/> | Former employees' training records (to be retained at least three years after termination of employment) * |
| <input checked="" type="checkbox"/> | Training Program(s) (i.e., written description of introductory and continuing training) * |
| <input checked="" type="checkbox"/> | Current copy of this Emergency Response/Contingency Plan * |
| <input checked="" type="checkbox"/> | Record of recordable/reportable hazardous material/waste releases * |
| <input checked="" type="checkbox"/> | Record of hazardous material/waste storage area inspections * |
| <input checked="" type="checkbox"/> | Record of hazardous waste tank daily inspections * |
| <input type="checkbox"/> | Description and documentation of facility emergency response drills |

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. [Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at www.unidocs.org), you do not need to attach a copy.]

Check the appropriate box:

| | |
|-------------------------------------|--|
| <input checked="" type="checkbox"/> | We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections. |
| <input type="checkbox"/> | We will use our own documents to record inspections. (A blank copy of each document used must be attached to this HMBP.) |

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

To: Agency Name: **Santa Clara Fire Department-Hazardous Materials Division**
Agency Mailing Address: **1675 Lincoln Street**
Santa Clara, CA 95050

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: FileMaker Inc.

Facility Street Address: 5201 Patrick Henry Dr. City: Santa Clara

Date of Current HMBP: July 24, 2007

I certify that: *(Check the appropriate box.)*

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. *(See bottom of page for details.)* If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification along with a signed Unified Program Consolidated Form (UPCF) Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials which would require updating of the HMBP.

Name of Owner/Operator *(Print)*: Betty Miller Title: Facilities/Security Manager

Signature of Owner/Operator:  Date: July 24, 2007

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; **and**
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; **and**
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory; **and**
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; **and**
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP.

**UNIFIED PROGRAM CONSOLIDATED FORM

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

Page 1 of 4

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made (see section 3, below).

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all that apply):

Bells; Horns/Sirens; Verbal (i.e., shouting); Other (specify _____)

b. Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance Phone No.: **911**

State Office of Emergency Services Phone No.: **(800) 852-7550**

b. Post-Incident Contacts*:

Certified Unified Program Agency (CUPA) Phone No.: **(408) 615-4960**

Fire Department Hazardous Materials Program Phone No.: **(408) 615-4960**

California EPA Department of Toxic Substances Control Phone No.: **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health Phone No.: **(408) 452-7288**

Air Quality Management District Phone No.: **(415) 771-6000**

Regional Water Quality Control Board Phone No.: **(510) 622-2300**

* Phone numbers for agencies in Unidocs' Member Agency geographic jurisdictions are available at www.unidocs.org.

c. Emergency Resources:

Poison Control Center* Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **KP Santa Clara Medical Center** Phone No.: **(408) 236-6440**

Address: **900 Kiely Blvd.** City: **Santa Clara, CA 95051**

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

- a. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the emergency coordinator (*or his/her designee when the emergency coordinator is on call*) shall:
 - i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
 - ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects (*e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.*).
 - iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
 - iv. Notify appropriate local authorities (*i.e., call 911*).
 - v. Notify the State Office of Emergency Services at 1-800-852-7550.
 - vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
 - vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.
- b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
 - i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility.
 - ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
 - iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
 - iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

- a. Name, address, and telephone number of the facility's owner/operator;
- b. Name, address, and telephone number of the facility;
- c. Date, time, and type of incident (*e.g., fire, explosion, etc.*);
- d. Name and quantity of material(s) involved;
- e. The extent of injuries, if any;
- f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
- g. Estimated quantity and disposition of recovered material that resulted from the incident;
- h. Cause(es) of the incident;
- i. Actions taken in response to the incident;
- j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(e)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

| 1. Equipment Category | 2. Equipment Type | 3. Locations * | 4. Description** | |
|---|---|-------------------|------------------------------|---|
| Personal Protective Equipment, Safety Equipment, and First Aid Equipment | <input type="checkbox"/> Cartridge Respirators | | | |
| | <input type="checkbox"/> Chemical Monitoring Equipment (<i>describe</i>) | | | |
| | <input checked="" type="checkbox"/> Chemical Protective Aprons/Coats | | | |

| Communications and Alarm Systems | <input type="checkbox"/> Other <i>(describe)</i> | |
| | <input type="checkbox"/> Chemical Alarms <i>(describe)</i> | |
| | <input type="checkbox"/> Intercoms/ PA Systems | |
| | <input type="checkbox"/> Portable Radios | |
| | <input checked="" type="checkbox"/> Telephones | Personal (cell phones) |
| | <input checked="" type="checkbox"/> Tank Leak Detection Systems | Low fuel level switch (alarm/shutdown) |
| Additional Equipment <i>(Use Additional Pages if Needed.)</i> | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |

* Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.

** Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

Page 1 of 2

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. [Note: Items marked with an asterisk (*) are required.]:

1. Personnel are trained in the following procedures:

| |
|---|
| <input checked="" type="checkbox"/> Internal alarm/notification * |
| <input checked="" type="checkbox"/> Evacuation/re-entry procedures & assembly point locations* |
| <input checked="" type="checkbox"/> Emergency incident reporting |
| <input type="checkbox"/> External emergency response organization notification |
| <input type="checkbox"/> Location(s) and contents of Emergency Response/Contingency Plan |
| <input checked="" type="checkbox"/> Facility evacuation drills, that are conducted at least (specify): "Annually" (e.g., "Quarterly", etc.) |

2. Chemical Handlers are additionally trained in the following:

| |
|--|
| <input checked="" type="checkbox"/> Safe methods for handling and storage of hazardous materials * |
| <input checked="" type="checkbox"/> Location(s) and proper use of fire and spill control equipment |
| <input checked="" type="checkbox"/> Spill procedures/emergency procedures |
| <input checked="" type="checkbox"/> Proper use of personal protective equipment * |
| <input checked="" type="checkbox"/> Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e., inhalation, ingestion, absorption) * |
| <input type="checkbox"/> Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.) * |

3. Emergency Response Team Members are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

| |
|---|
| <input checked="" type="checkbox"/> Personnel rescue procedures |
| <input checked="" type="checkbox"/> Shutdown of operations |
| <input checked="" type="checkbox"/> Liaison with responding agencies |
| <input checked="" type="checkbox"/> Use, maintenance, and replacement of emergency response equipment |
| <input checked="" type="checkbox"/> Refresher training, which is provided at least annually * |
| <input checked="" type="checkbox"/> Emergency response drills, which are conducted at least (specify): "Annually" (e.g., "Quarterly", etc.) |

Record Keeping
(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. [Note: Items marked with an asterisk (*) are required.]:

| | |
|-------------------------------------|--|
| <input checked="" type="checkbox"/> | Current employees' training records (to be retained until closure of the facility) * |
| <input checked="" type="checkbox"/> | Former employees' training records (to be retained at least three years after termination of employment) * |
| <input checked="" type="checkbox"/> | Training Program(s) (i.e., written description of introductory and continuing training) * |
| <input checked="" type="checkbox"/> | Current copy of this Emergency Response/Contingency Plan * |
| <input checked="" type="checkbox"/> | Record of recordable/reportable hazardous material/waste releases * |
| <input checked="" type="checkbox"/> | Record of hazardous material/waste storage area inspections * |
| <input checked="" type="checkbox"/> | Record of hazardous waste tank daily inspections * |
| <input type="checkbox"/> | Description and documentation of facility emergency response drills |

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. [Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at www.unidocs.org), you do not need to attach a copy.]

Check the appropriate box:

| | |
|-------------------------------------|--|
| <input checked="" type="checkbox"/> | We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections. |
| <input type="checkbox"/> | We will use our own documents to record inspections. (A blank copy of each document used must be attached to this HMBP.) |

To: Agency Name: Fire Dept / City of Santa Clara
Agency Mailing Address: 1675 Lincoln St
Santa Clara CA 95050-4653

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: File Maker, Inc
Facility Street Address: 5201 Patrick Henry Dr City: Santa Clara
Date of Current HMBP: August 20, 2008

RECEIVED

FEB 16 2010

I certify that: (Check the appropriate box.)

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator (Print): Betty Miller Title: Facilities Mgr
Phone: 408/987-7377 Signature: Betty Miller Date: 1/27/2010
(For 2009 Reporting)

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

INSPECTION REPORT - PART 2 - DEFICIENCIES

Inspection Type: Business Plan Underground Storage Tank
 Hazardous Waste Generator Cal Accidental Release Prevention Program
 Hazardous Waste Treatment Aboveground Storage Tank
 Fire Code Other:

VIOLATIONS: Codes noted below in the "Violation Code" column represent specific violations of State law and/or local Ordinance. Time granted for correction of deficiencies does not preclude any enforcement action by this Department or other agencies.

| Violation Code | Summary of Deficiencies, Observations, and Required Corrective Actions | Corrective Actions Taken |
|----------------|---|--------------------------|
| CFC | See the fire and life safety inspection report for fire code violations. | |
| CFC31 | Send in HMBP annual certification for the year 2010. | |
| | HMBP certification for 2009 attached. A certification for 2010 will be sent Aug. 2010, anniversary date for HMBP. | |
| | Betty Miller | |

All deficiencies must be corrected within 30 days of the inspection date unless otherwise noted above. Please write a brief description of corrective actions taken to bring this facility into compliance in the right column above, sign the certification statement below and submit it to this Office within 35 days of the inspection date. My signature acknowledges I consented to this inspection. (Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)

Received by: Betty Miller Title: X Fac Mgr Date: 01/21/10
 Printed Name: Betty Miller Phone No.: 408/987-7377

Certification: I certify under penalty of perjury that this facility has complied with the directives in this Notice to Comply.
 Signature of owner/Operator: Betty Miller Title: Facilities Mgr Date: 1/27/10

(Facility sends yellow copy to Fire Department and keeps pink copy)

Fire and Life Safety Inspection Report

Business Name: File Maker Inc.
 Business Address: 5201 Patrice Henry
 Contact Person: Betty Miller

Fire Permit Number: 031771
 Business Phone No.: 408-987-7000
 Date of Inspection: 01/21/10

The following violations require correction in accordance with applicable laws and ordinances.

EXTERIOR

- 1. Provide adequate clearance (36 inches) around hydrants, sprinkler risers, fire department connections and post indicator valves.
- 2. Repair or replace protective covers for fire department connection and ensure that connections rotate smoothly.
- 3. Lock in the open position all fire protection control valves.
- 4. Dumpsters located within 5 feet of any combustible building shall be protected with automatic sprinklers.
- 5. Remove trash, dead vegetation, and/or other combustible waste.
- 6. Post approved address or building number sign on building.
- 7. Provide access for emergency vehicles. Minimum clearances: 20 feet in width; and 13 feet, 6 inches in height.

FIRE PROTECTION SYSTEMS AND EQUIPMENT

- 8. Provide 5-year service certification for fire sprinkler/standpipe system.
- 9. Fire sprinkler systems shall be monitored by an approved monitoring company.
- 10. Provide additional fire sprinklers and/or sprinkler wrench in spare head cabinet.
- 11. Maintain a minimum vertical clearance of 18 inches for storage up to 12 feet and 36 inches for storage above 12 feet between all storage and fire sprinklers.
- 12. Provide additional fire sprinkler protection in areas noted. Obtain Fire Permit from the Fire Prevention Division.
- 13. Fire sprinkler systems are required to be inspected on a quarterly basis. Records shall be maintained on-site for five years.
- 14. Automatic fire protection systems other than sprinkler and/or standpipe systems are required to be serviced and tagged every six months and after each use.
- 15. Kitchen hood and duct system requires regular cleaning to prevent accumulation of grease.
- 16. Provide and mount a class K fire extinguisher within 30 feet of all commercial cooking areas.
- 17. Fire extinguishers are required to be visually inspected monthly and be tagged on an annual basis to certify that a annual maintenance inspection has been performed.
- 18. Provide additional fire extinguishers with a minimum rating and travel distance specified on backside of this report.
- 19. Mount fire extinguishers so that the top of the extinguisher does not exceed five feet from the floor.
- 20. Remove obstructions and maintain access to fire extinguishers; fire hose cabinets and/or manual pull stations.
- 21. Fire alarm systems shall be tested on an annual basis. Records shall be maintained on site.

HAZARDOUS MATERIALS

- 22. Provide an approved flammable liquids cabinet.
- 23. Class I Flammable and Class II Combustible Liquids shall be dispensed by an approved means.
- 24. Label all chemical storage, use and transportation points.
- 25. Incompatible materials shall be segregated by hazard class and material to meet.
- 26. Provide approved emergency eyewash and/or shower.
- 27. Provide secondary containment for hazardous materials.
- 28. Secure compressed gas cylinders.

- 29. Secondary containment shall be monitored for discharges by an approved method.
- 30. Submit revised Hazardous Material Inventory Statement.
- 31. Submit Hazardous Material Management Plan to Hazardous Materials Division. Maintain copy on site for emergency.
- 32. Provide and maintain on site Material Safety Data Sheets for all hazardous materials.
- 33. Hazardous waste shall be handled in accordance with the IFC and State law.

EXITS

- 34. Remove obstructions from aisles, corridors, stairways and exit.
- 35. Provide free opening hardware on exit doors.
- 36. Provide exit illumination.
- 37. Provide emergency lighting as required.
- 38. Install approved exit signs at exit doors and along exit ways as required.

ELECTRICAL

- 39. Discontinue use of extension cords in lieu of permanent wiring.
- 40. Discontinue use of non-approved multi-plug adapters.
- 41. Approved multi-plug adapters shall be connected to a permanently installed receptacle.
- 42. Extension and approved multi-plug adapter cords shall not be subject to environmental or physical damage.
- 43. Label high voltage areas and electric rooms.
- 44. Remove combustible storage from electric room(s).
- 45. Repair or remove frayed, damaged or spliced wiring.
- 46. Provide covers for all electrical boxes, outlets and circuit breaker panels.
- 47. Label all circuit breakers.
- 48. Maintain access to all electrical control panels.

GENERAL SAFETY

- 49. Provide an approved dust collection system.
- 50. Combustible storage shall not exceed 12 feet in height without additional fire protection.
- 51. Restore firewalls, occupancy separations or other rated elements to their original classifications.
- 52. Remove obstructions to rated fire doors and test operation on a monthly basis.
- 53. Provide seismic bracing for materials or items, which may present an egress or life safety hazard during a seismic event.
- 54. Remove all combustible storage within 36 inches of any heat producing equipment or appliances.
- 55. Seismically secure water heater.
- 56. Post occupant load sign at main exit.
- 57. Provide an approved locking cabinet in an approved location, which is accessible to the Fire Department in an emergency, for your hazardous material management plan or other emergency plan.

ADMINISTRATIVE

- 58. Obtain and/or post Business License/Fire permit in a visible location.
- 59. Building construction or remodeling requires a permit from the Building Department.
- 60. The occupancy classification for this facility does not correspond with the activities conducted.

VIOLATION LOCATION DESCRIPTION AND/OR OTHER VIOLATIONS NOT LISTED

31) Send in Certification form for HMMP for the year 2010. (attached)

Verify that your high level alarm and secondary containment alarms are functionally tested on an annual basis and this testing shall be documented. Test completed 2/1/10. (see attach. 2)

You are hereby ordered to correct, or submit a plan to correct, the violation(s) noted within 30 hours (days) from the date of service of this notice. Your cooperation is appreciated. Prompt correction of the violation(s) will avoid the necessity for legal actions.

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction

Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

01-27-11
JN

12-28-10 JN

To: Agency Name: Fire Dept / City of Santa Clara
Agency Mailing Address: 1675 LINCOLN ST
Santa CLARA CA 95050-4653

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: FileMaker, Inc
Facility Street Address: 5201 Patrick Henry DR City: Santa CLARA
Date of Current HMBP: August 20, 2008

I certify that: (Check the appropriate box.)

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

OR

Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator (Print): Betty Miller Title: FACILITIES MGR
Phone: 408/987-7377 Signature: Betty Miller Date: 12/23/10
(2010 REPORTING)

- By checking the upper box on this form, you are certifying that:
- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
 - There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
 - The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
 - The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
 - There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?

Yes**Underground Petroleum Storage (UST)**

Does your facility *own or operate* underground storage tanks?

No**Hazardous Waste**

Is your facility a Hazardous Waste Generator?

No

Does your facility treat hazardous waste on-site?

No

Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?

No

Does your facility consolidate hazardous waste generated at a remote site?

No

Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?

No

Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.

No

Is your facility a Household Hazardous Waste (HHW) Collection site?

No**Excluded and/or Exempted Materials**

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?

No

Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.

No

Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?

No**Additional Information**

No additional comments provided.

benefit of the City of Santa Clara, recorded free of charge. AFTER RECORDING, RETURN TO: the Government Code.

City of Santa Clara
1500 Warburton Avenue
Santa Clara, California 95050

ELECTRIC EASEMENT: UNDERGROUND

MARRIOTT CORPORATION, A DELAWARE CORPORATION, grantors,

hereby grant to the City of Santa Clara, a municipal corporation, an easement and right-of-way to be used for the purpose of installing, maintaining, repairing and replacing underground electrical systems, and any other necessary structures and appurtenances thereto.

The underground system will consist of conduits, cables, vaults, and splice boxes installed flush with or below grade and other necessary appurtenances. Transformers and switches will be mounted above grade on a concrete pad.

B The easement and right-of-way shall be for the exclusive use of public utilities including public communication services. Private ^{UTILITY} facilities will not be allowed in the easement and right-of-way except to cross or connect to the serving agency.

No structures shall be built on the easement and right-of-way. The easement and right-of-way may be used for parking, driveways, and landscaping exclusive of trees.

The easement and right-of-way shall include a reasonable right of access to and egress from said real property over adjoining lands of Grantor.

The easement and right-of-way are located in the City of Santa Clara, County of Santa Clara, State of California and are described as follows:

A 10.00 FOOT UNDERGROUND ELECTRICAL EASEMENT LYING IN SECTION 16, TOWNSHIP 6 SOUTH, RANGE 1 WEST, MOUNT DIABLO BASE AND MERIDIAN, SANTA CLARA COUNTY, CALIFORNIA, BEING 10.00 FEET IN WIDTH AND TO THE RIGHT OF THE FOLLOWING DESCRIBED LINE, SAID LINE BEING THE LEFT LINE OF SAID EASEMENT:

BEGINNING AT THE CENTER LINE INTERSECTION OF GREAT AMERICA PARKWAY AND TASMAN DRIVE AS SHOWN ON SHEET 4 OF 8 SHEETS ON THE RECORD OF SURVEY FILED FOR RECORD AUGUST 22, 1974 IN BOOK 345 OF MAPS, PAGES 1-8, IN THE RECORDS OF SANTA CLARA COUNTY, CALIFORNIA; THENCE SOUTH 89° 40' 40" WEST ALONG THE CENTER LINE OF TASMAN DRIVE AS SHOWN ON SAID RECORD OF SURVEY, 700.01 FEET; THENCE NORTH 0° 00' 34" WEST, 850.00 FEET; THENCE SOUTH 89° 40' 40" WEST, 544.09 FEET; THENCE NORTH 0° 00' 34" WEST, 1,770.29 FEET, TO THE SOUTHERLY LINE OF MOUNTAIN VIEW-ALVISO ROAD AS SHOWN ON SAID RECORD OF SURVEY, BEING THE BEGINNING OF A CURVE CONCAVE TO THE SOUTH, HAVING A RADIUS OF 970.00 FEET; THENCE WESTERLY ALONG SAID CURVE CONCAVE TO THE SOUTH, 75.93 FEET, THROUGH A CENTRAL ANGLE OF 4° 29' 05" TO A CURVE CONCAVE TO THE SOUTHWEST HAVING A RADIUS OF 50.00 FEET, BEING THE TRUE POINT OF BEGINNING; THENCE SOUTHEASTERLY ALONG SAID CURVE CONCAVE TO THE SOUTHWEST, 73.75 FEET, THROUGH A CENTRAL ANGLE OF 84° 30' 40" TO A TANGENT LINE; THENCE SOUTH 00° 00' 34"

CERTIFICATE

I, Richard Niederriter, hereby certify that I am the duly elected Secretary of Marriott Corporation, a Delaware Corporation, and, as such, have custody of the records of the Corporation.

I also hereby certify that at a duly called and convened meeting of the Board of Directors of Marriott Corporation, held on July 8, 1976, at the office of the Corporation, 5161 River Road, Bethesda, Maryland, at which meeting a quorum was present and voting throughout, the attached resolutions were duly adopted.

I also hereby certify that such resolutions are still in full force and effect and have not been modified, changed, annulled, nor amended since the above meeting.

IN WITNESS WHEREOF, I have hereunto set my hand and seal of Marriott Corporation, this 23rd day of January, 1978.

MARRIOTT CORPORATION

Richard Niederriter
Secretary

D 486 REC 434

RESOLVED, that the following must be approved by the Board of Directors or its Executive Committee before binding commitments are made:

1. Any transaction or contract required by law to be so approved;
2. Any purchase or sale of property involving a total purchase or sales price in excess of \$500,000 and any lease of property where the annual fixed rental obligation is in excess of \$100,000;
3. Any transactions otherwise requiring such approval; i.e., various financing contracts where the lender or other parties to the transaction require Board of Directors or Executive Committee approval as a condition of the transaction.

All other real estate transactions, except where otherwise directed by the Board of Directors or Executive Committee, shall be approved as follows:

1. Purchases and leases of real property for new units shall be approved by the President except purchases and leases for new Big Boy West units which shall be approved by the President or by the President of the Restaurant Operation Division.
2. Purchases and sales of other real property having a total purchase or sales price in excess of \$50,000 and leases of other real property having an annual fixed rental obligation in excess of \$20,000 shall be approved by the President.
3. Purchases and sales of other real property having a total purchase or sales price of less than \$50,000 and leases of real property having an annual fixed rental obligation of less than \$20,000 shall be approved by the President or by the President of the Corporate Division having responsibility for the transaction.

The Corporate Controller will be responsible for establishing audit procedures that will insure that the required approvals are obtained for all such transactions.

FURTHER RESOLVED, that upon obtaining the necessary approvals the President or any Corporate Division President, Senior Vice President, or Corporate Vice President is hereby authorized to sign and execute on behalf of the Corporation any legal document relating to the purchase, sale, lease or development of real property including but not limited to deeds, mortgages, deeds

Secretary of the
State of New York
of charge under Section 44
of the Government Code

of trust, leases, guarantees of leases, amendments to leases, memorandums of leases, agreements, and contracts; and it is

FURTHER RESOLVED, that the Secretary or any Assistant Secretary is hereby authorized to attest on behalf of the Corporation the signature, execution and binding effect of any legal document described herein; however, such attestation shall not be required to make such document legally binding; and it is

FURTHER RESOLVED, that the foregoing Resolution shall supersede and render of no further force and effect the Resolution entitled "Determination of Real Estate Items to be Submitted to the Board" adopted March 4, 1969.

In consideration of the adoption by the City Council of the City of Santa Clara of Resolution No. 4049 at its meeting of November 21, 1978, a true copy of which is attached hereto marked Exhibit "A", and by this reference incorporated herein and subject to all the terms, conditions, and restrictions printed as General Provisions of this agreement, also by reference incorporated herein, the undersigned DYSAN CORPORATION, 2388 Walsh Avenue, Santa Clara, California and W. F. BATTON & MARIE BATTON and W. F. BATTON & COMPANY, INC., 1101 East Meadow Drive, Palo Alto, California for themselves, their heirs, assigns, or successors in interest (hereinafter collectively referred to as PERMITTEES) of the lands described in said resolution and herein described, agree that in accordance with the General Provisions and Exhibit "A":

ENDORSED COPY

1. The permitted encroachments will run with the lands identified on the March 1, 1978 maps of the Assessor of the County of Santa Clara as follows: Parcels 104-50-9, 104-50-6, 104-50-11, 104-50-4, and 104-49-4, located adjacent and in vicinity of the intersection of Bunker Hill Lane and Patrick Henry Drive in Santa Clara; and,

2. The permitted encroachment will be covered by an insurance policy as described in the General Provisions, of not less than \$1,000,000 issued by a single insurance company having a policyholders surplus of at least \$25,000,000 or if insurance is written by more than one company each company shall have policyholders surplus of at least ten times the amount insured.

3. All the provisions of this agreement and General Provisions shall be deemed provisions of said resolution. All of the provisions of said resolution shall be deemed provisions of this agreement and General Provisions.

IN WITNESS WHEREOF, the undersigned PERMITTEES have executed this agreement this 17th day of Nov, 1978.

WRITTEN EVIDENCE OF AUTHORITY OF PERSON OR PERSONS EXECUTING THIS DOCUMENT ON BEHALF OF CORPORATION, PARTNERSHIP, OR JOINT VENTURE, OR ANY OTHER ORGANIZATION OTHER THAN A SOLE PROPRIETORSHIP SHALL BE ATTACHED.

ATTACH ACKNOWLEDGMENT OF THE PERSON OR PERSONS EXECUTING THIS DOCUMENT ON BEHALF OF THE GRANTOR.

GENERAL PROVISIONS

For benefit of the City of Santa Clara. Recorded free of charge under Section 6108 of the Government Code.

The permittee or permittees, referred to hereinafter as Permittees, agree that:

1. The Permittees will hold the City of Santa Clara and its officers and employees harmless from, and will indemnify them against all tort claims, tort liability, and tort loss, and in particular from and against all such claims, liability, and loss predicated on active or passive negligence of the City of Santa Clara, resulting directly or indirectly from the installation or maintenance of the encroachment permitted by the resolution noted in this agreement. This hold harmless obligation shall not terminate until the encroachment referred to in said resolution has been removed and the area restored to a condition satisfactory to the Department of Public Works.

2. The Permittees will, at their own cost and expense, maintain in full force and effect an insurance policy or policies issued by an insurance company or companies satisfactory to the City Attorney and written by an insurance company or companies having a policyholders surplus as shown in this agreement. Policy or policies shall afford liability insurance covering all operations, including but not limited to premises (definition of "premises" to be expanded to include this encroachment), products, injuries and automobiles and injury to property for single limit of not less than the amount shown in this agreement applying to bodily injuries, personal injuries and property damage or a combination of such injuries. Said policy or policies shall be expanded to include contractual liability assumed under this agreement with respect to bodily injuries, personal injuries and property damage. Said policy or policies shall include City of Santa Clara and its officers and employees, jointly and severally as additional insured and shall apply as primary insurance and shall stipulate that no other insurance effected by the City of Santa Clara will be called on to contribute to a loss covered hereunder. Said policy or policies shall provide thirty (30) days notice to the City Clerk, City of Santa Clara, City Hall, if the policy or policies should be cancelled or materially changed. The permission granted by said resolution shall automatically terminate upon the termination of such insurance. Upon such termination the undersigned Permittees, their heirs and assigns, shall forthwith remove, or cause to be removed, the encroachment permitted by said resolution and all materials used in connection with its construction, without expense to the City of Santa Clara, and shall restore the area to a condition satisfactory to the Department of Public Works.

3. The permission granted by said resolution is merely a revocable license. The City Council of the City of Santa Clara may revoke said permission at will, and, upon the revocation thereof, the undersigned Permittees, their heirs and assigns, will within 30 days after written notification of the revocation of said permission, remove or cause to be removed the encroachment permitted by said resolution and all materials used in connection with its construction without expense to the City of Santa Clara, and shall restore the area to a condition satisfactory to the Department of Public Works.

4. All of the provisions of this agreement shall run with the land described in Resolution and shall bind the permittees, their successors and assigns including subsequent purchasers and owners of the land. The land with which the covenants run is described in paragraph 1 of the Street Encroachment Agreement. The covenants shall also run with the segment of the public streets fronting on said parcels in favor of the City of Santa Clara, its successors and assigns, as owner thereof.

RESOLUTION NO. 4049

A RESOLUTION OF THE CITY OF SANTA CLARA GRANTING PERMISSION
TO DYSAN CORPORATION AND W.F. BATTON & MARIE BATTON AND W.F.
BATTON & COMPANY, INC. TO CONSTRUCT AND MAINTAIN CERTAIN
PIPES AS ITEMIZED BELOW UNDER AND ACROSS BUNKER HILL LANE
AND PATRICK HENRY DRIVE

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SANTA CLARA, as
follows:

That permission, revocable at the will of the City Council of the City
of Santa Clara and automatically terminating upon failure to continue in force
the insurance protection hereinafter referred to, is hereby granted to DYSAN
CORPORATION, 2388 Walsh Avenue, Santa Clara, California, and W. F. BATTON &
MARIE BATTON W.F. BATTON & COMPANY, INC., 1101 East Meadow Drive, Palo Alto,
California (hereinafter referred to collectively as PERMITTEES) to construct and
maintain the following described facilities at the location indicated:

| | |
|---------------------------|-------------------------------|
| 2 - 6" Telephone Conduits | Sta 20+00 Patrick Henry Drive |
| 2 - 6" Telephone Conduits | Sta 12+50 Patrick Henry Drive |
| 2 - 6" Telephone Conduits | Sta 2+50 Bunker Hill Lane |
| 2 - 6" Telephone Conduits | Sta 5+90 Bunker Hill Lane |

across and under Patrick Henry Drive and Bunker Hill Lane as above locations are
shown on those Improvement Plans for Improvement Project No. 174, Marriott
Industrial Park.

Copies of City of Santa Clara Tracing Nos. 7764-A, 7765-A, dated
November 15, 1978 showing the location of the above facilities is attached hereto
and is incorporated herein.

PROVIDED, HOWEVER, that this permission shall not become effective until:

A. There shall have been executed and acknowledged by the PERMITTEES,
and each of them, and delivered to the City Clerk of City, who shall have same re-
corded in the Office of the County Recorder of Santa Clara County, a street encroach-
ment agreement, a copy of which is attached hereto as Exhibit "A" and which is
hereby declared to be a part of this resolution.

B. There shall have been delivered to the City Clerk the policy of
insurance provided for in said Agreement, and the City Attorney shall have approved
same as complying with the requirements of said Agreement. The City Attorney may,
at his option, accept in lieu of said insurance policy the certificate of an
insurance company certifying to the existence of such policy.

EXHIBIT "A"

FURTHER PROVIDED, that the underground pipes shall be so designed and operated so as not to interfere with City utilities and facilities in the area.

FURTHER PROVIDED, that the PERMITTEES shall secure the necessary permits, if any, from the Department of Public Works and pay the necessary permit fees before starting work.

FURTHER PROVIDED, that the clearance between the top of concrete street curb and the top of pipe shall not be less than two (2') feet within the established public right of way.

FURTHER PROVIDED, that PERMITTEES shall designate the location of said underground pipes with a permanent form of identification which shall be installed above ground at either end and in line with the pipes.

FURTHER PROVIDED, that the PERMITTEES shall give at least one week's prior notice to the public utilities companies, the Santa Clara Electric Department and Santa Clara Water Department regarding any change of location of their facilities which may be necessary, or for access for the purpose of constructing, reconstructing, maintaining or operating, repairing and/or removing their facilities.

FURTHER PROVIDED, that the PERMITTEES shall assume all costs, maintenance, and repair of the encroachment, and no cost or obligation of any kind shall accrue to the City of Santa Clara by reason of this permission granted.

PASSED AND ADOPTED BY THE CITY COUNCIL OF THE CITY OF SANTA CLARA this
21st day of November, 1978, by the following vote:

- AYES: COUNCILMEN: Hansen, Kiely, Mahan, Street, Texera and Mayor Gissler
- NOES: COUNCILMEN: None

ELECTRIC EASEMENT: UNDERGROUND

OFFICIAL RECORDS
SANTA CLARA COUNTY
GEORGE A MANN
REGISTERAR RECORDER

W.F. Batton and Marie A. Batton, grantors,

hereby grant to the City of Santa Clara, a municipal corporation, an easement and right-of-way to be used for the purpose of installing, maintaining, repairing and replacing underground electrical systems, and any other necessary structures and appurtenances thereto.

The underground system will consist of conduits, cables, vaults, and splice boxes installed flush with or below grade and other necessary appurtenances. Transformers and switches will be mounted above grade on a concrete pad.

The easement and right-of-way shall be for the exclusive use of public utilities including public communication services. Private facilities will not be allowed in the easement and right-of-way except to cross or connect to the serving agency.

No structures shall be built on the easement and right-of-way. The easement and right-of-way may be used for parking, driveways, and landscaping exclusive trees.

The easement and right-of-way shall include a reasonable right of access to and egress from said real property over adjoining lands of Grantor.

The easement and right-of-way are located in the City of Santa Clara, County of Santa Clara, State of California and are described as follows:

The southerly 10.00 feet of the northerly 112.72 feet of the westerly 260.25 feet of the easterly 270.25 feet of Parcel 10 as shown on that Parcel Map recorded in Book 413 of Maps pages 13, 14 and 15 of Santa Clara County Records

TOGETHER WITH the southerly 15.00 feet of the northerly 127.72 feet of the westerly 15.00 feet of the easterly 270.25 feet of said Parcel 10, recorded in Book 413 of Maps at pages 13, 14, and 15, Santa Clara County Records.

IN WITNESS WHEREOF, said grantors have hereunto set their hands this 18th day of April, 1980.

Contact: Amanda Harrold

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Langan were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

REPORT VIABILITY

Report Viability Dates per ASTM E1527-21

| | |
|------------------------------------|--|
| Site Visit | June 6, 2022 |
| Regulatory Database Review | May 20, 2022 |
| Interview(s) | Property Owner: June 6, 2022 Key Site Manager: June 6, 2022 |
| EP Declaration | June 9, 2022 |
| Lien Search (if conducted by AEI) | N/A |
| Report Viability per ASTM E1527-21 | Wednesday, November 16, 2022 |

The dates listed are required for Users who are using the report in connection with CERCLA liability protections. The User may have their own criteria when the report is being used for business risk purposes, and not CERCLA liability protections.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by W.F. Batton Management Company to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), and incorporates procedures specified in ASTM Standard Practice E1527-21, for the property located at 5201 Patrick Henry Drive, Santa Clara, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

| Property Information | |
|---|---|
| Site Address(es) | 5201 Patrick Henry Drive, Santa Clara, Santa Clara County, California 95054 |
| Property ID (APN or Block/Lot) | 104-50-004 |
| Location | Eastern side of Patrick Henry Drive, northern side of Bunker Hill Lane and western side of Betsy Ross |
| Property Type | Office |
| Site and Building Information | |
| Approximate Site Acreage/Source | 7.07/Assessor |
| Number of Buildings | 1 |
| Building Construction Date(s)/Source | 1980/Agency records |
| Building Square Footage (SF)/Source | 136,551/Client provided |
| Number of Floors/Stories | 3 |
| Basement or Subgrade Area(s) | None identified |
| Number of Units | 1 |
| Additional Improvements | Asphalt-paved parking/drive areas, concrete-paved walkways and loading dock, fence-enclosed HVAC equipment area, in-ground grease interceptor, emergency generator with 400-gallon integral diesel tank in concrete block enclosure, fountain, and landscaped areas |
| On-site Occupant(s) | Vacant |
| Current On-site Operations/Use | None - currently vacant |
| Current Use of Hazardous Substances | Yes; refer to Section 7.1 |
| Regulatory Information | |
| Regulatory Database Listing(s) | HIST UST, EMI, FINDS, HAZNET, HWTS, RCRA Non Gen/NLR, ECHO, CERS |

A chronological summary of historical subject property information is as follows:

| Date Range | Subject Property Description and Occupancy (Historical Addresses) | Source(s) |
|-------------------|--|----------------------------------|
| 1889-1939 | Unimproved land (no known address) | Topographic Maps |
| 1939-1950 | Unimproved agricultural land (no known address) | Aerial photographs, prior report |

| Date Range | Subject Property Description and Occupancy (Historical Addresses) | Source(s) |
|--------------|--|--|
| 1956-1974 | Agricultural land, residential and/or agricultural-type buildings (no known address) | Aerial photographs |
| 1979 | Unimproved graded land (no known address) | Aerial photographs |
| 1980-2021 | Current building constructed for commercial office uses; occupied by multiple commercial office tenants (5201 Patrick Henry Drive) | Agency records, prior report, aerial photographs, city directories |
| 2021-Present | Current commercial building/vacant (5201 Patrick Henry Drive) | Site observation, interviews |

The immediately surrounding properties consist of the following:

| Direction | Tenant/Use (Address) | Regulatory Database Listing(s) |
|--------------|---|--------------------------------|
| North | Galileo Pharmaceuticals (5301 Patrick Henry Drive) and vacant commercial office building (5302 Betsy Ross Drive) | Yes; refer to Section 5.1 |
| East | Betsy Ross Drive, followed by: Cisco Jasper (3003 Bunker Hill Lane) | None identified |
| South | Bunker Hill Lane, followed by: multi-tenant commercial buildings (2062, 3032, 3052, 3058 and 3062 Bunker Hill Lane, and 3001, 3003, 2005 and 3021 Tasman Drive | Yes; refer to Section 5.1 |
| West | Patrick Henry Drive, followed by: Coherent (5100 Patrick Henry Drive) and commercial office buildings (5200 and 5440 Patrick Henry Drive) | Yes; refer to Section 5.1 |

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

FINDINGS

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as the (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the current ASTM Standard E1527. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- The subject property, identified as Dysan Corporate Offices, was listed on the Historic Underground Storage Tank (HIST UST) database in the EDR regulatory database report. According to the database and records on file with the Santa Clara Fire Department (SCFD), a concrete 1,200-gallon waste sump (identified as a UST in the database) was installed on the subject property in 1981. According to the SCFD records, a groundwater monitoring well was installed in connection with this sump for the purposes of leak detection. The monitoring well was subsequently destroyed under the oversight of the Santa Clara Valley Water District (SCVWD). Although the date of the former well's destruction is unknown, it was likely when the waste sump was decommissioned as there was no evidence of the sump observed during AEI's site reconnaissance. Although no further information was found regarding the sump and associated monitoring well, based on the fact that the monitoring well was destroyed under the oversight of the SCVWD, AEI infers that the sump was also decommissioned under SCVWD oversight. Furthermore, it is unlikely that the well would have been destroyed if there was evidence of contamination detected in the well, as the well would have been retained and sampled in order to characterize a release. Based on this information, the former sump and associated well are not considered a REC. No additional action or investigation appears warranted at this time.
- The EDR regulatory database report and SCFD records indicate that a second underground container was present at the subject property. This container was listed in the EDR regulatory database as 20-gallons in capacity but was noted in SCFD records as 7,300-gallons in capacity. Although no specific information was available regarding this second container, based on an interview with Mr. Ryan Balzer (owner representative

and key site manager), it may have been a former grease trap installed to service the kitchen of the subject property. During the site reconnaissance, a current and former grease interceptor were observed on the northern side of the building. Therefore, based on the presumed use of the container installed in 1979, this feature is not expected to represent a significant environmental concern.

- A reviewed SCVWD Well Map identified three destroyed groundwater monitoring wells, two destroyed water production wells and one destroyed unregistered well. No additional pertinent information was provided by SCVWD. No wells were observed during the onsite reconnaissance. Although no further information was provided for the destroyed wells formerly onsite, based on the fact that the wells were destroyed under the oversight of the SCVWD, it is unlikely that they had any evidence of contamination, as they would have been retained and sampled in order to characterize a release. Based on this information, the wells noted in SCVWD records are not expected to represent a significant environmental concern.
- The subject property was historically used for agricultural purposes between at least 1939 and circa 1974. Additionally, between 1956 and 1974, residential-type buildings and/or agricultural-type buildings appear to be located on the southwestern side of the subject property. Due to the historical use of the subject property, there is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite as well as the potential that fuel tanks may have formerly been present. The subject property was redeveloped with the current site building in 1980 and the majority of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Additionally, no documentation of any fuel tanks at the subject property was found during the course of this assessment. Finally, the subject property is developed and used for commercial and/or light industrial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time.
- Due to the age of the subject property building, there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, a thorough asbestos survey is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13, incorporating procedures specified in ASTM Standard Practice E1527-21, of 5201 Patrick Henry Drive, Santa Clara, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), and incorporates procedures specified in ASTM Standard Practice E1527-21, for the property located at 5201 Patrick Henry Drive, Santa Clara, Santa Clara County, California ([Appendix A: Figures](#) and [Appendix B: Property Photographs](#)).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings,

conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to [Section 6.3](#) for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- Due to the size of the property, AEI observed a representative sample of interior spaces. AEI observed the following areas: Lobby, Offices, Elevator equipment rooms, Mechanical equipment rooms, Server room, Restrooms, and Storage rooms. Due to the commercial nature of building use, this limited inspection method is expected to be adequate for the purposes of this assessment.

1.6 DATA FAILURE AND DATA GAPS

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the

current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

AEI did not identify evidence of data failure during the course of this assessment.

1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of W.F. Batton Management Company. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by W.F. Batton Management Company on May 19, 2022. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

| Property Information | |
|---|---|
| Site Address(es) | 5201 Patrick Henry Drive, Santa Clara, Santa Clara County, California 95054 |
| Property ID (APN or Block/Lot) | 104-50-004 |
| Location | Eastern side of Patrick Henry Drive, northern side of Bunker Hill Lane and western side of Betsy Ross |
| Property Type | Office |
| Site and Building Information | |
| Approximate Site Acreage/Source | 7.07/Assessor |
| Number of Buildings | 1 |
| Building Construction Date(s)/Source | 1980/Agency records |
| Building Square Footage (SF)/Source | 136,551/Client provided |
| Number of Floors/Stories | 3 |
| Basement or Subgrade Area(s) | None identified |
| Number of Units | 1 |
| Additional Improvements | Asphalt-paved parking/drive areas, concrete-paved walkways and loading dock, fence-enclosed HVAC equipment area, in-ground grease interceptor, emergency generator with 400-gallon integral diesel tank in concrete block enclosure, fountain, and landscaped areas |
| On-site Occupant(s) | Vacant |
| Current On-site Operations/Use | None - currently vacant |
| Current Use of Hazardous Substances | Yes; refer to Section 7.1 |
| Regulatory Information | |
| Regulatory Database Listing(s) | HIST UST, EMI, FINDS, HAZNET, HWTS, RCRA Non Gen/NLR, ECHO, CERS |

2.2 ON-SITE UTILITIES

| Utility | Source/System Information |
|----------------------------------|----------------------------------|
| Heating System | Natural gas |
| Cooling System | Electricity |
| Potable Water | City of Santa Clara |
| Sewage Disposal/Treatment | City of Santa Clara |

Utility source/system information listed in the table above is provided by Mr. Ryan Balzer, owner, unless otherwise noted above.

2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed commercial and industrial area of Santa Clara, California. The immediately surrounding properties consist of the following:

| Direction | Tenant/Use (Address) | Regulatory Database Listing(s) |
|--------------|---|--------------------------------|
| North | Galileo Pharmaceuticals (5301 Patrick Henry Drive) and vacant commercial office building (5302 Betsy Ross Drive) | Yes; refer to Section 5.1 |
| East | Betsy Ross Drive, followed by: Cisco Jasper (3003 Bunker Hill Lane) | None identified |
| South | Bunker Hill Lane, followed by: multi-tenant commercial buildings (2062, 3032, 3052, 3058 and 3062 Bunker Hill Lane, and 3001, 3003, 2005 and 3021 Tasman Drive | Yes; refer to Section 5.1 |
| West | Patrick Henry Drive, followed by: Coherent (5100 Patrick Henry Drive) and commercial office buildings (5200 and 5440 Patrick Henry Drive) | Yes; refer to Section 5.1 |

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

2.4 PHYSICAL SETTING

| | |
|--|--|
| Geologic Unit: Description/Source | Marine sedimentary and alluvial deposits of the Cenozoic era/USGS and United States Department of the Interior |
| Soil Series: Description/Source | The USDA Soil Survey identified Urban Land-Hangerone Complex and Urban Land-Embarcadero Complex with 0-2% slopes. The Hangerone Complex is described as poorly drained clay, clay loam and gravelly loam with a depth of 89 inches. The parent material is described as alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. The Embarcadero Complex is described as very poorly drained clay loam, clay and silty clay with a depth of 98 inches. The parent material is described as alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. The Urban Land Index identified 70% urban land with 30% Hangerone, Embarcadero and minor components. |
| Groundwater Flow Direction/Source | Northwest/SCVWD's December 2, 1994 LUST Case Closure Summary for Edelweiss Dairy – 5400 Bayfront Plaza, Santa Clara, California (located approximately 1,200 feet north of the subject property) |
| Estimated Depth to Groundwater/Source | 6-8 feet bgs/SCVWD's December 2, 1994 LUST Case Closure Summary for Edelweiss Dairy – 5400 Bayfront Plaza, Santa Clara, California (located approximately 1,200 feet north of the subject property) |
| Surface waters on the subject property or adjoining sites | None |
| Additional notes | None |

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

| Date Range | Subject Property Description and Occupancy (Historical Addresses) | Source(s) |
|--------------|--|--|
| 1889-1939 | Unimproved land (no known address) | Topographic Maps |
| 1939-1950 | Unimproved agricultural land (no known address) | Aerial photographs, prior report |
| 1956-1974 | Agricultural land, residential and/or agricultural-type buildings (no known address) | Aerial photographs |
| 1979 | Unimproved graded land (no known address) | Aerial photographs |
| 1980-2021 | Current building constructed for commercial office uses; occupied by multiple commercial office tenants (5201 Patrick Henry Drive) | Agency records, prior report, aerial photographs, city directories |
| 2021-Present | Current commercial building/vacant (5201 Patrick Henry Drive) | Site observation, interviews |

The subject property was historically used for agricultural purposes between at least 1939 and circa 1974. Additionally, between 1956 and 1974, residential-type buildings and/or agricultural-type buildings appear to be located on the southwestern side of the subject property. Due to the historical use of the subject property, there is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite as well as the potential that fuel tanks may have formerly been present. The subject property was redeveloped with the current site building in 1980 and the majority of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Additionally, no documentation of any fuel tanks at the subject property was found during the course of this assessment. Finally, the subject property is developed and used for commercial and/or light industrial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time.

If available, copies of historical sources are provided in [Appendix D](#).

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1939-2016 (non-inclusive)):

| Year(s) | Subject Property Description | Adjoining Site Descriptions |
|---------|---|---|
| 1939 | The subject property appears to be agricultural land partially equipped with an irrigation system | NORTH: Agricultural land with irrigation system EAST: Agricultural land with irrigation system |

| Year(s) | Subject Property Description | Adjoining Site Descriptions |
|------------------------------|--|--|
| | | SOUTH: Agricultural land with irrigation system WEST: Agricultural land |
| 1948, 1950 | No significant changes | NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes |
| 1956 | The subject property appears to be agricultural land and a roadway. Residential-type buildings and/or agricultural-type buildings appear to be located on the southwestern side of the subject property. | NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes |
| 1963, 1968, 1974 | No significant changes | NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes |
| 1979 | The subject property appears to be unimproved graded land | NORTH: Unimproved graded land EAST: Roadway followed by a commercial-type building SOUTH: Roadway followed by unimproved graded land WEST: Roadway followed by unimproved graded land, and a commercial-type building |
| 1982 | The subject property appears to be redeveloped with the existing commercial building and paved areas. | NORTH: Commercial-type building, paved areas, equipment/vehicle storage areas EAST: No significant changes SOUTH: Roadway followed by commercial-type buildings WEST: Roadway followed by a vacant graded lot and commercial-type buildings |
| 1993 | No significant changes | NORTH: Commercial-type buildings EAST: No significant changes SOUTH: No significant changes WEST: Roadway followed by commercial-type buildings |
| 1998, 2006, 2009, 2012, 2016 | No significant changes | NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes |

Subject property:

- Agricultural land and associated structures - Refer to Section 3.0

Adjoining Site(s):

- No potential environmental concerns identified

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1991 to 2017. The first listing for the subject property appeared in 1991. The following table summarizes the results of the city directory search.

Subject Property

| Year(s) | Address - Occupant Listed |
|------------------|--|
| 1991 | 5201 Patrick Henry Drive – Claris Corporation and Xidex Corporation Headquarters |
| 1994 | 5201 Patrick Henry Drive – Claris Corporation |
| 1999 | 5201 Patrick Henry Drive – Claris Corporation Customer Service and Filemaker, Inc. |
| 2001 | 5201 Patrick Henry Drive – Claris Corporation and Galileo |
| 2009, 2014, 2017 | 5201 Patrick Henry Drive – Claris Corporation and Filemaker, Inc. |

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

A search of historical city directories was also conducted for the adjoining sites noted below utilizing EDR. Please refer to the appendices for a complete list of historical adjoining site tenants identified by EDR. The table below summarizes the potential tenants of concern based on AEI's review of the historical city directories.

| Direction | Address(es) |
|------------------|---|
| West | 5200 Patrick Henry Drive - Fujitsu Network Transmission Service (1996-1999); Toyota Motor Corp (2004) |

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- Potential tenants of environmental concern were identified for the adjoining western site. This property was listed in the regulatory database in association with these tenants and is further discussed in Section 5.1.

3.4 HISTORICAL TOPOGRAPHIC MAPS

In an attempt to close any data failure, AEI reviewed historical topographic maps utilizing USGS. Historical topographic maps were reviewed for the years 1899-2012 (non-inclusive). No additional historical information was obtained from available topographic maps except that the subject property was unimproved between 1889 and 1959.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|---|----------------|-------------------|-------------------------|---|
| Santa Clara County Environmental Health Department (SCCEHD) | May 23, 2022 | Email | Ms. Melissa Beloso | No hazardous substances records on file |

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|---|----------------|-------------------|-------------------------|--------------------|
| State Water Resources Control Board (SWRCB) | May 23, 2022 | Website | GeoTracker | No records on file |

4.2 FIRE DEPARTMENT

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|--|----------------|---------------------------------|-------------------------|-------------------------|
| City of Santa Clara Fire Department (SCFD) | May 23, 2022 | Website (NextRequest) and Email | Ms. Stephanie Davis | Records discussed below |

UST and Sump Documentation

The SCFD file included an Application for Permit to Operate an Underground Storage Tank (UST), which was prepared for Dysan Corporation and was associated with a 1,200-gallon single-walled concrete sump for disposal of unspecified waste. The sump installation date is listed as 1981. A second Application for Permit to Operate a UST was issued to Dysan Corporation, and is associated with the installation of a 7,300-gallon single-walled carbon steel UST with unspecified waste in 1979. No additional information about the sump or UST was included in the SCFD file. The subject property was identified as a Hist UST in the regulatory database in association with these features. Please refer to Section 5.1 for additional discussion.

Claris

The file included a February 17, 1994 letter from DTSC to Claris Corporation, which indicated that Claris was a conditionally exempt small quantity treatment facility. A separate Onsite Hazardous Waste Treatment Notification Form indicated that Claris was a software programming facility that contained one silver recovery tank (Unit R-11) that treated an average of 55-gallons per month. The wastes treated were noted as photographic chemicals, developer, wash water, fixer and bleach. The treatment process used was an electrolytic and metallic exchange silver recovery

unit. As of 1995, the facility conducted photo processing, but not enough waste was collected in a three year time period to be taken offsite. The unit is identified as exempt from permitting requirements. No violations were noted during inspections. Based on the lack of violations or associated releases reported, the information on file with the SCFD for the former Claris tenant is not expected to represent a significant environmental concern.

FileMaker

The file included a Hazardous Material Business Plan Certification Form for FileMaker, Inc., dated August 20, 2008, which indicated that the business was a registered hazardous material storage facility with no registered hazardous wastes, ASTs or USTs. The non-waste hazardous material inventory statement included diesel fuel that was stored in a 400-gallon AST. Inspections of FileMaker did not identify any significant violations. The file contained CERS documentation for FileMaker dating back to 2013, which indicated that the business was a hazardous material storage facility that stored bromotrifluoromethane(745 cubic feet of non-flammable gas), diesel fuel (400-gallon AST), electrolyte/sulfuric acid and mineral oil (75-gallon containers).

The SCFD file also included several permits for the installation of fire protection equipment, installation of a new hood and duct in the kitchen, installation of the 400-gallon diesel AST in 2008 and replacement of UPS equipment. No additional pertinent information was included in the file. Based on the lack of reported releases, the information on file with the SCFD for the former FileMaker tenant is not expected to represent a significant environmental concern.

4.3 BUILDING DEPARTMENT

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|--|----------------|-------------------|-------------------------|-------------------------|
| City of Santa Clara Building Department (SCBD) | May 23, 2022 | Website | N/A | Records discussed below |

Records Summary

| Year(s) | Owner/Applicant | Description of Permit and Building Use |
|------------|-----------------|---|
| 1980 | Not provided | Permit to erect new 4-story office building with cafeteria, build storage racks |
| 1991 | Not provided | Add trash enclosure and AC system |
| 1999 | Not provided | Demolish interior office non-bearing walls |
| 2002 | Not provided | Remove and replace HVAC equipment |
| 2007 | Not provided | Replace UPS system in data center |
| 2008 | Not provided | Install non-emergency generator |
| 2011 | Not provided | Remove and replace boilers in interior chiller room |
| 2012 | Not provided | Interior alterations - upgrade restrooms and locker rooms on 3rd floor |
| 2016, 2017 | Not provided | Multiple building permits - no details provided |

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the SCBD.

4.4 PLANNING DEPARTMENT

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|--|----------------|-----------------------|-------------------------|---|
| City of Santa Clara Planning Department (SCPD) | May 23, 2022 | Website and Telephone | Staff | No evidence indicating the existence of AULs on file for the subject property |

4.5 ASSESSOR'S OFFICE

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|--------------------------------------|----------------|-------------------|-------------------------|---|
| Santa Clara County Assessor's Office | May 23, 2022 | Website | N/A | Information obtained is discussed below |

Records Summary

| | |
|--------------------------------|--------------|
| APN | 104-50-004 |
| Acreage | 7.07 acres |
| Construction Date | Not provided |
| Building Square Footage | Not provided |
| Current Owner | Not provided |

4.6 OTHER AGENCIES SEARCHED

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|---|----------------|-------------------|-------------------------|-------------------------|
| CA State Water Resources Control Board (SWRCB) GeoTracker | May 23, 2022 | Website | N/A | No records on file |
| SWRCB GeoTracker Historical Hazardous Substance Storage Information | May 23, 2022 | Website | N/A | No records on file |
| CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS) | May 23, 2022 | Website | N/A | Records discussed below |
| CA DTSC EnviroStor | May 23, 2022 | Website | N/A | No records on file |
| Bay Area Air Quality Management District (BAAQMD) | May 23, 2022 | Website and Email | Rochele Henderson | Records discussed below |
| Santa Clara Valley Water District (SCVWD) | May 23, 2022 | Website | N/A | Records discussed below |

HWTS

The HWTS database included the following records for the subject property:

- File Maker Apple, Inc. – this site is listed as an active hazardous waste transporter as of September 10, 2012. No manifest records were included in the HWTS database.
- File Maker – this site is listed as an inactive hazardous waste transporter as of November 22, 2010. Manifest records identified the removal and offsite disposal of approximately 0.0165-tons of oxygenated solvents under manifest in 2010.
- File Maker – this site is listed as an inactive hazardous waste transporter as of June 14, 2011. No manifest records were included in the HWTS database.
- Batton Associates LLC – this site is listed as an inactive hazardous waste transporter as of December 17, 2012. Manifest records identified the removal and offsite disposal of approximately 0.9-tons of unspecified sludge waste under manifest in 2012.
- Claris – this site is listed as an inactive hazardous waste transporter as of June 30, 1998. No manifest records were included in the HWTS database.

No potential environmental concerns were noted during the review of HWTS records.

BAAQMD

The BAAQMD file included a May 16, 2019 permit for the diesel fuel-powered emergency generator, which expires on June 1, 2023. The emergency generator was originally permitted in October 2007. No additional information was included in the BAAQMD files.

No potential environmental concerns were noted during the review of BAAQMD records.

SCVWD

The SCVWD Well Map identified three destroyed groundwater monitoring wells, two destroyed water production wells and one destroyed unregistered well. No additional pertinent information was provided by SCVWD. No wells were observed during the onsite reconnaissance. Although no further information was provided for the destroyed wells formerly onsite, based on the fact that the wells were destroyed under the oversight of the SCVWD, it is unlikely that they had any evidence of contamination, as they would have been retained and sampled in order to characterize a release. Based on this information, the wells noted in SCVWD records are not expected to represent a significant environmental concern.

4.7 OIL AND GAS WELLS

| Agency | Date Referenced | Resource | Oil or gas wells located within 500 feet of the subject property |
|---|------------------------|-----------------|---|
| California Geologic Energy Management Division (CalGEM) | May 23, 2022 | CalGEM Map | No |

4.8 OIL AND GAS PIPELINES

| Agency | Date Referenced | Resource | Pipelines located within 500 feet of the subject property |
|---|------------------------|------------------------|--|
| National Pipeline Mapping System (NPMS) | May 23, 2022 | NPMS Public Map Viewer | No |

4.9 STATE ENVIRONMENTAL SUPERLIENS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 STATE PROPERTY TRANSFER LAWS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in [Appendix C](#) of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

| Database | Search Distance (Miles) | Subject Property | Adjoining Site(s) | Other Nearby Sites of Concern |
|--|-------------------------|------------------|-------------------|-------------------------------|
| Federal NPL (Superfund) sites | 1.0 | | | |
| Federal Delisted NPL sites | 1.0 | | | |
| Federal CERCLA removals/orders lists | 0.5 | | | |
| Federal CERCLA sites with NFRAP | 0.5 | | ✓ | |
| Federal RCRA facilities undergoing Corrective Action | 1.0 | | | |
| Federal RCRA TSD facilities | 0.5 | | | |
| Federal RCRA generator lists (LQG, SQG, VSQG) | SP/ADJ | | ✓ | |
| Federal RCRA NonGen/NLR list | SP/ADJ | ✓ | ✓ | |
| Federal IC/EC registries | SP | | | |
| Federal ERNS list | SP | | | |
| State- and tribal "Superfund" equivalent sites | 1.0 | | ✓ | |
| State- and tribal hazardous waste facilities | 1.0 | | ✓ | |

| Database | Search Distance (Miles) | Subject Property | Adjoining Site(s) | Other Nearby Sites of Concern |
|--|-------------------------|------------------|-------------------|-------------------------------|
| State/Tribal landfill and solid waste disposal lists | 0.5 | | | |
| State/Tribal leaking storage tanks | 0.5 | | ✓ | |
| State/Tribal registered storage tanks | SP/ADJ | ✓ | ✓ | |
| State/Tribal voluntary cleanup sites | 0.5 | | | |
| State/Tribal EC/IC registries | SP | | | |
| State/Tribal brownfield sites | 0.5 | | | |
| Orphans | N/A | | | |
| Additional Environmental Record lists | SP/ADJ | ✓ | ✓ | |

| | |
|---------------------------------|--|
| Facility Name | Dysan Corporate Offices |
| Address | 5201 Patrick Henry Drive |
| Distance & Direction | Subject Property |
| Hydrologic Position | N/A |
| Databases Listed | HIST UST |
| Comments | <p>The HIST UST database indicated that one 1,200-gallon UST of unspecified waste was installed at the subject property in 1981, and one 20-gallon "waste" tank was installed at the subject property in 1979. According to records on file with the Santa Clara Fire Department (SCFD) and AEI's prior Phase I ESA (2012), a concrete 1,200-gallon waste sump (identified as a UST in the database) was installed on the subject property in 1981. According to the SCFD records, a groundwater monitoring well was installed in connection with this sump for the purposes of leak detection. The monitoring well was subsequently destroyed under the oversight of the Santa Clara Valley Water District (SCVWD). Although the date of the former well's destruction is unknown, it was likely when the waste sump was decommissioned as there was no evidence of the sump observed during AEI's site reconnaissance. Although no further information was found regarding the sump and associated monitoring well, based on the fact that the monitoring well was destroyed under the oversight of the SCVWD, AEI infers that the sump was also decommissioned under SCVWD oversight. Furthermore, it is unlikely that the well would have been destroyed if there was evidence of contamination detected in the well, as the well would have been retained and sampled in order to characterize a release. Based on this information, the former sump and associated well are not considered to represent a significant environmental concern.</p> <p>No additional information was provided regarding the former 20-gallon "waste tank" installed in 1979. Per SCFD records, this tank was 7,300-gallons in capacity; however, no additional details were provided. Based on an interview with Mr. Ryan Balzer (owner representative and key site manager), this tank may have been a former grease trap installed to service the kitchen of the subject property. During the site reconnaissance, a current and former grease interceptor were</p> |

| | |
|--|--|
| | observed on the northern side of the building. Therefore, based on the presumed use of the container installed in 1979, this feature is not expected to represent a significant environmental concern. |
|--|--|

| | |
|---------------------------------|--|
| Facility Name | FileMaker, FileMaker, Inc., FileMaker Apple, Inc. |
| Address | 5201 Patrick Henry Drive |
| Distance & Direction | Subject Property |
| Hydrologic Position | N/A |
| Databases Listed | EMI, FINDS(2), HAZNET, HWTS(2), RCRA Non Gen/NLR, ECHO, CERS |
| Comments | The EMI, FINDS and CERS databases indicated that FileMaker maintained an air emissions permit with BAAQMD from 2008 to 2019. The HAZNET and HWTS databases indicated that this site is an inactive hazardous waste transporter that had approximately 0.0165 tons of oxygenated solvents transported to an offsite disposal facility under manifest in 2010. The RCRA database indicated that this site is a registered non-generator of hazardous waste/no longer regulated facility with no reported violations. Information on the EPA website ECHO indicates and FRS Facility Report indicates that the facility is in compliance with no outstanding violations. Based on lack of violations reported and the non-release nature of these listings, they are not expected to represent a significant environmental concern. |

| | |
|---------------------------------|---|
| Facility Name | Claris |
| Address | 5201 Patrick Henry Drive |
| Distance & Direction | Subject Property |
| Hydrologic Position | N/A |
| Databases Listed | HWTS |
| Comments | The HWTS database indicated that this site is an inactive hazardous waste transporter facility as of June 30, 1998. There are no listings pertaining to any spills or releases of hazardous substances at this site and no associated violations were reported. Based on lack of violations reported and the non-release nature of this listing, it is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|--|
| Facility Name | Batton Associates, LLC |
| Address | 5201 Patrick Henry Drive |
| Distance & Direction | Subject Property |
| Hydrologic Position | N/A |
| Databases Listed | HAZNET, HWTS |
| Comments | The HAZNET and HWTS database indicated that this site is an inactive hazardous waste transporter facility as of December 17, 2012. This site had approximately 0.9-tons of unspecified sludge waste transported to an offsite disposal facility under manifest in 2012. There are no listings pertaining to any spills or releases |

| | |
|--|---|
| | of hazardous substances at this site and no associated violations were reported. Based on lack of violations reported and the non-release nature of these listings, they are not expected to represent a significant environmental concern. |
|--|---|

| | |
|---------------------------------|--|
| Facility Name | Anacomp, Inc. – Santa Clara, Abbott Diagnostics Division/Lab, Fujitsu Personal Systems, Inc., Dysan Corporation, Anacomp Dysan Corp., Apple Inc. (Patrick Henry 1) |
| Address | 5200/5440 Patrick Henry Drive |
| Distance & Direction | Adjoining to the west |
| Hydrologic Position | Cross-gradient |
| Databases Listed | CPS-SLIC(3), CERS(3), SEMS Archive(2), RCRA Non Gen/NLR(2), FINDS, ECHO, CUPA Listings(2), CERS HAZ Waste, HIST UST, EMI, NPDES, CIWQS |
| Comments | There are multiple listings for this site in the CPS-SLIC and CERS databases, which indicated that the groundwater contamination case associated with a release of dichloroethene (DCE) and trichlorethylene (TCE) was closed as of March 23, 1994. A second CPS-SLIC case associated with Anacomp was closed on June 2, 2009. This SLIC case involved a release of solvents, and no information about this case was included in the SLIC database or GeoTracker. This site is also listed on the SEMS-Archive database under the name of Dysan Corporation and Abbott Diagnostics Division, which indicated that the cases were archived as of July 12, 1990 and December 18, 1990, respectively, and a No Further Remedial Action Planned determination was granted. The CERS databases indicated that this site is a registered hazardous waste generator, air emissions and chemical storage facility with reported violations. The HIST UST database identified multiple "product," diesel and "waste" USTs at this site. The EMI listing is associated with air emissions permits maintained with BAAQMD. The NPDES and CIWQS listings are associated with terminated storm water construction permits. The CUPA database indicated that Abbott Diagnostics Lab was a registered hazardous waste generator. The RCRA database indicated that this site was a registered non-generator of hazardous waste with no reported violations. No pertinent information was included in the FINDS and ECHO databases. The March 23, 1994 Site Closure Letter prepared by RWQCB for Anacomp indicated that groundwater gradient at this site was to the northeast, which is parallel to the subject property. Groundwater sampling on three sides of the building at this site did not identify TCE or DCE in soil or first encountered groundwater. Based on gradient, groundwater sampling results and regulatory case closure, further review of regulatory agency records was not deemed necessary and this site is not considered to represent a significant environmental concern. |

| | |
|---------------------------------|------------------------------|
| Facility Name | Balzer Family Investments LP |
| Address | 5302 Betsy Ross Drive |
| Distance & Direction | Adjoining to the north |
| Hydrologic Position | Down-gradient |
| Databases Listed | RCRA Non Gen/NLR |

| | |
|-----------------|--|
| Comments | The RCRA database indicated that Balzer Family Investment LP is a registered non-generator of hazardous waste with no reported violations. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |
|-----------------|--|

| | |
|---------------------------------|---|
| Facility Name | Claris Corporation |
| Address | 5302 Betsy Ross Drive |
| Distance & Direction | Adjoining to the north |
| Hydrologic Position | Down-gradient |
| Databases Listed | CUPA Listings |
| Comments | The CUPA database indicated that Claris Corporation maintained a hazardous waste generator permit. No additional pertinent information was included in the CUPA database. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|---|
| Facility Name | Ilypsa Inc. |
| Address | 5301 Patrick Henry Drive |
| Distance & Direction | Adjoining to the north |
| Hydrologic Position | Down-gradient |
| Databases Listed | SEMS-Archive, RCRA-SQG, FINDS, ECHO, CUPA Listings, EMI |
| Comments | The SEMS-Archive database indicated that this site is listed on the No Further Remedial Action Planned (NFRAP) database. The case was reportedly archived as of November 1, 1987. The RCRA database indicated that this site is a registered small quantity hazardous waste generator with no reported violations. The FINDS database indicated that this site is listed on the RCRA and State Master databases. No pertinent information was included in the ECHO database. The CUPA database indicated that this site is a registered hazardous waste generator. The EMI database indicated that this site maintained an air emissions permit with BAAQMD from 1995 to 2016. Based on the regulatory status, and the inferred direction of groundwater flow, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|--|
| Facility Name | Applied Immune Sciences- OST |
| Address | 5301 Patrick Henry Drive |
| Distance & Direction | Adjoining to the north |
| Hydrologic Position | Down-gradient |
| Databases Listed | CUPA Listings |
| Comments | The CUPA database indicated that this site is a registered hazardous waste generator facility. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|--|
| Facility Name | Apple, Inc. – Patrick Henry 2/02 |
| Address | 5301 Patrick Henry Drive |
| Distance & Direction | Adjoining to the north |
| Hydrologic Position | Down-gradient |
| Databases Listed | CERS HAZ Waste, CERS, RCRA Non Gen/NLR |
| Comments | The CERS and CERS HAZ Waste databases indicated that this site is a registered hazardous waste generator and chemical storage facility with no reported violations. The RCRA database indicated that this site is a registered non-generator of hazardous waste with no reported violations. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|--|
| Facility Name | Abbott Laboratories Diagnostics Division |
| Address | 5301 Patrick Henry Drive |
| Distance & Direction | Adjoining to the north |
| Hydrologic Position | Down-gradient |
| Databases Listed | RCRA-SQG |
| Comments | The RCRA database indicated that this site is a registered small quantity hazardous waste generator with no reported violations. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|--|
| Facility Name | Coherent, Inc. |
| Address | 5100 Patrick Henry Drive |
| Distance & Direction | Adjoining to the west |
| Hydrologic Position | Cross-gradient |
| Databases Listed | CUPA Listings, HAZNET, HWTS, CERS HAZ Waste, CERS |
| Comments | The CUPA database indicated that this site is a registered hazardous waste generator. The HAZNET and HWTS listings are associated with the removal and offsite disposal of various hazardous wastes under manifest. The CERS listings indicated that this site is a registered hazardous waste generator, hazardous waste onsite treatment, large quantity hazardous waste generator and industrial storm water facility with reported violations. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|--|
| Facility Name | Bacharach Instruments, Anacom (former) |
| Address | 5100 Patrick Henry Drive |
| Distance & Direction | Adjoining to the west |

| | |
|----------------------------|--|
| Hydrologic Position | Cross-gradient |
| Databases Listed | SEMS-Archive, RCRA-LQG, EnviroStor, CPS-SLIC, EMI, NPDES, WDS, CIWQS |
| Comments | The SEMS-Archive database indicated that this site is an archived facility as of June 1, 1986. The RCRA database indicated that this site is a registered large quantity hazardous waste generator with no reported violations. The EnviroStor database indicated that this is an inactive tiered permit facility that needs evaluation. The CPS-SLIC database indicated that the Cleanup Program case associated with trichloroethylene (TCE) and freon contamination was closed on June 28, 2021. The site history noted that the case was closed by RWQCB on March 24, 1993. An additional listing in the CPS-SLIC database indicated that the case is open and eligible for closure as of June 28, 2021; this listing appears to be a duplicate since the case was closed on June 28, 2021. The EMI listing is associated with permitted air emissions with BAAQMD. The NPDES, WDS and CIWQS listings are associated with industrial waste water discharges at this site. Based on the regulatory status, and the inferred direction of groundwater flow, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|--|
| Facility Name | Lake Marriott Business Park |
| Address | 5101 Patrick Henry Drive |
| Distance & Direction | Adjoining to the south |
| Hydrologic Position | Up-gradient |
| Databases Listed | CPS-SLIC(2), CERS |
| Comments | The CPS-SLIC and CERS databases indicated that the release case associated with waste oil, motor oil, hydraulic oil and lubricating oil was closed on September 30, 2003. RWQCB's case closure letter indicated that prior groundwater investigations were conducted to determine if hydraulic fluid releases had occurred when the hydraulic jacks that operate the elevators in the buildings had failed. Petroleum hydrocarbons were not detected in the groundwater samples and the case was closed. Based on the regulatory status, and the lack of reported impacts to the groundwater, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|---|
| Facility Name | SVB Financial Group |
| Address | 3005 Tasman Drive |
| Distance & Direction | Adjoining to the south |
| Hydrologic Position | Up-gradient |
| Databases Listed | AST |
| Comments | No pertinent information was included in the AST database. However, a listing in this database indicates that one or more ASTs are currently registered at this site. No associated releases were reported. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

| | |
|---------------------------------|---|
| Facility Name | Silicon Valley Bank Financial Group |
| Address | 3003 Tasman Drive |
| Distance & Direction | Adjoining to the south |
| Hydrologic Position | Up-gradient |
| Databases Listed | AST |
| Comments | No pertinent information was included in the AST database. However, a listing in this database indicates that one or more ASTs are currently registered at this site. No associated releases were reported. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern. |

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

| Relation to Property | Name | Date Interviewed | Method of Contact | Year First Associated w/ Property | Notes |
|---------------------------------------|-----------------|------------------|---------------------|-----------------------------------|--|
| Owner Representative/Key Site Manager | Mr. Ryan Balzer | June 6, 2022 | Telephone and Email | 1983 | Interviewed; see Interview Summary table below |

INTERVIEW SUMMARY

| Question | Owner (Representative)/Key Site Manager Response/ Comment |
|--|---|
| Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features? | Yes - grease interceptor; refer to Section 7.1.4 |
| Do you have any knowledge of previous environmental investigations conducted on site? | No |
| Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products? | No |
| Are you aware of any known plans for site redevelopment or change in site use? | No |
| Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? | No |
| Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? | No |
| Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? | No |
| Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality? | No |

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

| Question | Response/ Comment |
|--|--------------------------|
| 1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? | Information not provided |
| 2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? | Information not provided |
| 3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? | Information not provided |
| 4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? | Information not provided |
| 5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). | Information not provided |

| Question | Response/ Comment |
|--|---------------------------------|
| <p>Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:</p> <p>(a) Do you know the past uses of the property?</p> <p>(b) Do you know of specific chemicals that are present or once were present at the property?</p> <p>(c) Do you know of spills or other chemical releases that have taken place at the property?</p> <p>(d) Do you know of any environmental cleanups that have taken place at the property?</p> | |
| <p>6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).</p> <p>Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?</p> | <p>Information not provided</p> |

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI by the client during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (5201 Patrick Henry Drive, Santa Clara, California 95054), prepared by AEI Consultants (May 1, 2012)

AEI consultants prepared the Phase I ESA for Intervest Mortgage Investment Company. The assessment was conducted in accordance with the requirements of ASTM E1527-05. At the time of the prior assessment, the subject property was developed with the existing 124,000 square-foot 3-story building that was occupied by FileMaker. On-site operations include administrative activities. In addition to the subject property building, the property is improved with asphalt-paved parking areas and associated landscaping.

During the site reconnaissance, hazardous materials consisting of a 400-gallon diesel emergency generator and general cleaning supplies were observed in connection with FileMaker's on-site activities. No environmental concerns associated with the storage and/or use of these materials were noted during the site reconnaissance or during the review of regulatory records.

According to historical sources, the current subject property building was constructed in 1980 for use as an office building and has since been occupied by Dysan Corporation (the original tenant), Claris Corporation circa 1990 to 2005, and FileMaker since 1995. Prior to the construction of the building, the property consisted of agricultural land.

AEI did not identify any evidence of RECs, HRECs or de minimis environmental conditions in connection with the subject property.

AEI identified the following Business Environmental Risks (BERs) in connection with the subject property:

- The subject property, identified as Dysan Corporate Offices, was listed in the regulatory database as a HIST UST. According to the database and records on file with the Santa Clara Fire Department (SCFD) a concrete 1,200-gallon waste sump (identified as a UST in the database) was installed on the subject property in 1981. According to the SCFD records, a groundwater monitoring well was installed in connection with this sump for the purposes of leak detection. The monitoring well was subsequently destroyed under the oversight of the Santa Clara Valley Water District (SCVWD). Although the date of the former well's destruction is unknown, it was likely when the waste sump was decommissioned as there was no evidence of the sump observed during AEI's site reconnaissance. Although no further information was found regarding the sump and associated monitoring well, based on the fact that the monitoring well was destroyed under the oversight of the SCVWD, AEI infers that the sump was also decommissioned under SCVWD oversight. Furthermore, it is unlikely that the well would have been destroyed if there was evidence of contamination detected in the well, as the well would have been retained and sampled in order to characterize a release. Based on this information, the former sump and associated well were not expected to represent a significant environmental concern.
- The regulatory database and SCFD records indicate that another underground container (installed in 1979) was present at the subject property. Although no specific information was available regarding this second container, based on information provided by the key site contacts, it may have been a former grease trap installed to service the kitchen of the subject property. During the site reconnaissance, an old cleanout typical of a grease trap was observed near the current grease trap, which has a second separate cleanout. Therefore, based on the presumed use of the container installed in 1979, the former underground container was not expected to represent a significant environmental concern.
- According to records on file with the SCVWD, three "other-active" wells, two destroyed wells and one abandoned well are located on the subject property. These wells are reportedly owned by the US EPA and permitted by the SCVWD. No hazardous materials were observed in the vicinity of the wells, which appeared to be properly capped and maintained. Based on this information, the wells present at the subject property were not expected to represent a significant environmental concern.
- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property was deemed warranted at that time.
- Due to the age of the subject property building, there is a potential that asbestos-containing materials (ACMs) are present. All suspect ACMs were observed in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, an asbestos survey adhering to AHERA sampling protocol should be performed prior to demolition or renovation activities that may disturb suspect ACMs.

- AEI Consultants observed interior areas of the subject building in order to identify the significant presence of mold. During the AEI's April 5, 2012 on-site reconnaissance, obvious visual signs of mold growth or conditions conducive for mold growth were observed on piping insulation within the equipment room located on the subject property roof. AEI re-inspected the area on April 30, 2012, and observed that the old pipe insulation had been removed and replaced with new insulation and wrapping. No evidence of mold was observed during AEI's re-inspection. Based on the remedial action conducted, the former presence of mold was not considered to represent a significant concern.

AEI recommended no further investigations for the subject property following the 2012 Phase I ESA.

In addition, AEI was provided with a Monitoring Well Map that depicted one abandoned well, one destroyed well and three active wells on the subject property. AEI was provided with a Well Destruction Completion Notice, dated September 12, 2012, which indicate that three wells were destroyed under SCVWD permit. The file included manifest records for the removal of non-RCRA hazardous waste liquids under manifest in 2012. No additional pertinent information regarding wells was provided to AEI for review.

A copy of the reports is included in the appendices.

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

| | |
|--|--|
| Site Reconnaissance Date | June 6, 2022 |
| AEI Site Assessor(s) | Christopher Olsen |
| Property Escort(s)/ Relationship(s) to Property | None - Mr. Ryan Balzer provided the lockbox code and permitted AEI to access all interior and exterior areas of the subject property. |
| Units/Areas Observed | <p>Representative interior common areas such as:</p> <ul style="list-style-type: none"> • Lobby • Offices • Elevator equipment rooms • Mechanical equipment rooms • Server room • Restrooms • Storage rooms <p>Exterior areas: all exterior areas were accessed</p> |
| Area(s) not accessed and reason(s) | Other interior areas not listed above; refer to Section 1.5 |
| Other Physical Constraints | None |

Reconnaissance Findings Summary

| Feature | Observed on Subject Property (see Section 7.1) | Observed on Adjoining Property (see Section 7.2) |
|---|---|---|
| Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use | ✓ | |
| Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs) | ✓ | |
| Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use | | |
| Unidentified Substance Containers | | |
| Electrical or Mechanical Equipment Likely to Contain Fluids | ✓ | ✓ |
| Interior Stains or Corrosion | | |
| Strong, Pungent, or Noxious Odors | | |
| Pools of Liquid | | |
| Drains, Sumps, and Clarifiers | ✓ | ✓ |
| Pits, Ponds, and Lagoons | | |
| Stained Soil or Pavement | ✓ | ✓ |
| Stressed Vegetation | | |
| Solid Waste Disposal or Evidence of Fill Materials | | |
| Waste Water Discharges | | |
| Wells | | |
| Septic Systems | | |
| Biomedical Wastes | | |

| Feature | Observed on Subject Property (see Section 7.1) | Observed on Adjoining Property (see Section 7.2) |

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 REGULATED HAZARDOUS SUBSTANCES/WASTES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE

| Substance/Waste (size/quantity) | Location | Operations Associated with Material | Disposal Method/Frequency | Secondary Containment | Staining/Spills |
|---|-----------------------------------|-------------------------------------|---------------------------|-----------------------|-----------------|
| Paint (5-gallon buckets and 1-quart containers) | Storage room | Facility maintenance | N/A | No | None observed |
| Diesel (400-gallon AST) | Northeastern side of the building | Fuel for backup generator | N/A | Yes (double-walled) | None observed |

Based on the lack of a documented release and the lack of evidence of mismanagement, these materials are not expected to represent a significant environmental concern. Refer to Section 7.1.2 below for a detailed discussion of the diesel AST.

7.1.2 ABOVEGROUND/UNDERGROUND HAZARDOUS SUBSTANCE OR PETROLEUM PRODUCT STORAGE TANKS (ASTs/USTs)

AST(s)

| Size (gallons) | Contents | Installation Date | AST Condition | Location | Construction/Secondary Containment | Product Piping | Staining/Spills |
|----------------|----------|-------------------|---------------|-------------------------------------|------------------------------------|----------------|-----------------|
| 400 | Diesel | 2008 | Good | Enclosure northeast of the building | Double-walled | None | None |

The subject property is equipped with an emergency generator. Approximately 400-gallons of diesel fuel are contained within the generator equipment. Based on a review of agency records, the generator was installed in 2008. No evidence of leaks or spills was observed at the base of the generator. Based on the good condition of the equipment, the presence of the emergency generator and associated diesel fuel is not expected to represent a significant environmental concern.

7.1.3 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

| Type | Quantity | Owner | Presumed Date of Installation | Spills or Stains Observed (Yes/No) | Non-PCB Label (Yes/No) |
|-------------|----------|----------------------|-------------------------------|------------------------------------|------------------------|
| Pad-Mounted | 1 | Silicon Valley Power | 1980 | No | Yes |

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

Elevators

The subject property is equipped with two hydraulic elevators. Based on the age of the building (post-1978), it is unlikely that the hydraulic fluid within the equipment contains PCBs. The equipment for the elevators is located in ground floor mechanical equipment rooms. No evidence of stains or leaks was observed at the base of the equipment during the site reconnaissance. The elevators are reportedly maintained by Star Elevator. Based on the good condition and regular maintenance of the elevators, they are not expected to represent a significant environmental concern.

7.1.4 DRAINS, SUMPS, AND CLARIFIERS

Multiple storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

AEI observed a current grease trap manhole on the northern side of the subject property. Furthermore, an old cleanout, presumably associated with a former grease trap was observed in the same area as the current grease trap. Refer to Section 4.2 and 5.1 for further discussion of the former grease trap. Based on the non-hazardous nature of materials entering the current grease trap, this feature is not expected to represent a significant environmental concern.

7.1.5 STAINED SOIL AND PAVEMENT

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Transformer(s)

Multiple pad-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.2 DRAINS, SUMPS, AND CLARIFIERS

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2.3 STAINED SOIL AND PAVEMENT

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

| Material Type | Location |
|--|--|
| Plaster (acoustical and smooth) | Walls and ceilings |
| Ceiling tile | Ceiling systems |
| Thermal systems insulations, packings, and gaskets | Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment |
| Floor tile and associate mastics, flooring felts, and papers (under hardwood/other) | Floors |
| Vinyl sheet flooring and adhesives | Floors |
| Cove base and associated mastics | Walls |
| Ceramic tile adhesives and grouts | Walls, floors, and ceilings |
| All adhesives | Mirrors, wall coverings, construction, etc. |
| Grout and caulking | Windows and doors |
| Gypsum board, tape, and joint compound | Wall and ceiling systems |
| Insulation materials | Walls, ceilings, and attic spaces |
| Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations) | Roof and parapet wall systems |
| Brick and block, mortars | Walls |

The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, a thorough asbestos survey is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

8.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥ 1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, it is unlikely that LBP is present; however, LCP may be present. Based on the good condition of the observed painted surfaces, potential LCP is not considered a significant environmental concern at this time.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # C929-4D37-AE43

PO # 307470

Project 463077

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: C929-4D37-AE43

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

AEI Consultants (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

SANTA CLARA, CA 95050-8168

For facility located at:

5201 PATRICK HENRY DR/MC C-32
SANTA CLARA, CA 95050-8168

Authorization Date: 02/17/94

Dear Conditionally Exempt Small Quantity Treatment Facility:

ACKNOWLEDGEMENT OF UNITS OPERATING UNDER CONDITIONAL EXEMPTION FOR SMALL QUANTITY TREATMENT

The Department of Toxic Substances Control (DTSC) has received your facility specific notification (form DTSC 1772) and form for Conditionally Exempt Small Quantity Treatment (form DTSC 1772A). Your notifications are administratively complete, but have not been reviewed for technical adequacy. A technical review of your notifications will be conducted when an inspection is performed. At any time, you may be inspected and will be subject to penalty if violations of laws or regulations are found.

The Department acknowledges receipt of your completed notification for the treatment unit(s) listed on the last page of this letter. These units operating under Conditional Exemption are authorized by California law without additional Department action, pursuant to Health and Safety Code sections 25201.5. Your authorization to operate continues until you notify DTSC that you have stopped treating waste and have fully closed the unit(s). You will be charged annual fees calculated on a calendar year basis for each year you operate and have not notified DTSC that the units have been closed.

You must notify the DTSC 60 days before first treating hazardous wastes in any new unit. You must also notify the DTSC whenever information you provided in these notifications changes. To revise information, mail a cover letter to the above address explaining the changes, attach just the pages of your notification package that have changed, and sign and date at the signature space on page 3 of form 1772.

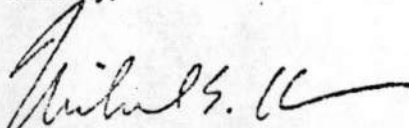

Your status to operate under Conditional Exemption-Small Quantity Treatment is contingent upon the accuracy of information submitted by you in the notification mentioned above, and your compliance with all applicable requirements in the Health and Safety Code. Any misrepresentation or any failure to fully disclose all relevant facts shall render your authorization to operate null and void. If at any time, the total volume of hazardous waste treated in any month exceeds 55 gallons or 500 pounds, you will be in violation of the conditions of this category. This category also prohibits you from holding any other hazardous waste facility permits or other grants of authorization. If you subsequently obtain any other hazardous waste permits or other grants of authorization, you must convert to a different onsite treatment tier.

You are also required to properly close any treatment unit. Additional guidance on closure will be issued and distributed to all authorized onsite facilities later this year.

If you have any questions regarding this letter, or have questions on operating requirements for your facility, please contact the nearest DTSC regional office, or this office at the letterhead address or phone number.

Sincerely,

Michael S. Horner, Chief
Onsite Hazardous Waste Treatment Unit
Permit Streamlining Branch
Hazardous Waste Management Program

Units authorized to operate at this location:

UNDER CONDITIONAL EXEMPTION SMALL QUANTITY TREATMENT:

UNIT 1 (ONE)

MAILING ADDRESS, IF DIFFERENT:

COMPANY NAME (DBA) _____

STREET _____

CITY _____ STATE _____ ZIP _____

COUNTRY _____
(only complete if not USA)

CONTACT PERSON _____ PHONE NUMBER(____) _____
(First Name) (Last Name)

III. TYPE OF COMPANY: STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODE:

Use either one or two SIC codes (a four digit number) that best describe your company's products, services, or industrial activity.

Example: 7384 Photofinishing lab 3672 Printed circuit boards

First: 7371 Software Programming Second: _____

IV. PRIOR PERMIT STATUS: Check yes or no to each question:

- | YES | NO | |
|--------------------------|-------------------------------------|--|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 1. Did you file a PBR Notice of Intent to Operate (DTSC Form 8462) in 1992 for this location? |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 2. Do you now have or have you ever held a state or federal hazardous waste facility full permit or interim status for any of these treatment units? |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 3. Do you now have or have you ever held a state or federal full permit or interim status for any other hazardous waste activities at this location? |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 4. Have you ever held a variance issued by the Department of Toxic Substances Control for the treatment you are now notifying for at this location? |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 5. Has this location ever been inspected by the state or any local agency as a hazardous waste generator? |

V. PRIOR ENFORCEMENT HISTORY: Not required from generators only notifying as conditionally exempt.

- | YES | NO | |
|--------------------------|-------------------------------------|---|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Within the last three years, has this facility been the subject of any convictions, judgments, settlements, or final orders resulting from an action by any local, state, or federal environmental, hazardous waste, or public health enforcement agency? |

(For the purposes of this form, a notice of violation does not constitute an order and need not be reported unless it was not corrected and became a final order.)

- If you answered Yes, check this box and attach a listing of convictions, judgments, settlements, or orders and a copy of the cover sheet from each document. (See the Instructions for more information)

VI. ATTACHMENTS:

1. A plot plan/map detailing the location(s) of the covered unit(s) in relation to the facility boundaries.
2. A unit specific notification form for each unit to be covered at this location.

VII. **CERTIFICATIONS:** *This form must be signed by an authorized corporate officer or any other person in the company who has operational control and performs decision-making functions that govern operation of the facility (per title 22, California Code of Regulations (CCR) section 66270.11). All three copies must have original signatures.*

Waste Minimization I certify that I have a program in place to reduce the volume, quantity, and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment.

Tiered Permitting Certification I certify that the unit or units described in these documents meet the eligibility and operating requirements of state statutes and regulations for the indicated permitting tier, including generator and secondary containment requirements. I understand that if any of the units operate under Permit by Rule or Conditional Authorization, I will also be required to provide required financial assurances by January 1, 1994, and conduct a Phase I environmental assessment by January 1, 1995.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete.

I am aware that there are substantial penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

OPERATING REQUIREMENTS:

Please note that generators treating hazardous waste onsite are required to comply with a number of operating requirements which differ depending on the tier(s) under which one operates. These operating requirements are set forth in the statutes and regulations, some of which are referenced in the Tier-Specific Factsheets.

SUBMISSION PROCEDURES:

You must submit two copies of this completed notification by certified mail, return receipt requested, to:

Department of Toxic Substances Control
Form 1772
Onsite Hazardous Waste Treatment Unit
400 P Street, 4th Floor (walk in only)
P.O. Box 806
Sacramento, CA 95812-0806.

You must also submit one copy of the notification and attachments to the local regulatory agency in your jurisdiction as listed in the instruction materials. You must also retain a copy as part of your operating record.

All three forms must have original signatures, not photocopies.

CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT**UNIT SPECIFIC NOTIFICATION**

(pursuant to Health and Safety Code Section 25201.5(a))

UNIT NAME Silver Recovery Unit R-11UNIT ID NUMBER Unit 1 (one)NUMBER OF TREATMENT DEVICES: 1 Tank(s) _____ Container(s)

Please Note: Generators operating units under Conditionally Exempt Small Quantity Treatment may not operate any other units under other permitting tiers or hold any other state or federal hazardous waste permit or authorization for this facility.

Each unit must be clearly identified and labeled on the plot plan attached to Form 1772. Assign your own unique number to each unit. The number can be sequential (1, 2, 3) or you may use any system you choose.

This category is only available to generators that treat less than 55 gallons or 500 pounds of hazardous waste in any calendar month in ALL units at this facility and that are not otherwise required to obtain a hazardous waste facilities permit. This volume limit applies to the TOTAL hazardous waste treated onsite in any calendar month, and is NOT a limit for each wastestream or unit separately. The wastestreams treated must be limited to those listed in title 22, CCR, section 67450.11, which are also listed below.

Enter the estimated monthly total volume of hazardous waste treated by this unit. This should be the maximum or highest amount treated in any month. Indicate in the narrative (Section II) if your operations have seasonal variations.

I. WASTESTREAMS AND TREATMENT PROCESSES:Estimated Monthly Total Volume Treated: _____ pounds and/or 55 gallons

The following are the eligible wastestreams and treatment processes. Please check all applicable boxes:

1. Aqueous wastes containing hexavalent chromium may be treated by the following process:

a. Reduction of hexavalent chromium to trivalent chromium with sodium bisulfite, sodium metabisulfite, sodium thiosulfate, ferrous sulfate, ferrous sulfide or sulfur dioxide provided both pH and addition of the reducing agent are automatically controlled.

2. Aqueous wastes containing metals listed in Title 22, CCR, section 66261.24 (a)(2), including silver from photofinishing, and/or fluoride salts may be treated by the following technologies:

- a. pH adjustment or neutralization.
- b. Precipitation or crystallization.
- c. Phase separation by filtration, centrifugation, or gravity settling.
- d. Ion exchange.
- e. Reverse osmosis.
- f. Metallic replacement.
- g. Plating the metal onto an electrode.
- h. Electrodialysis.
- i. Electrowinning or electrolytic recovery.
- j. Chemical stabilization using silicates and/or cementitious types of reactions.
- k. Evaporation.
- l. Adsorption.

**CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT
UNIT SPECIFIC NOTIFICATION**
(pursuant to Health and Safety Code Section 25201.5(a))

3. Aqueous wastes with total organic carbon less than ten percent as measured by EPA Method 9060 and less than one percent total volatile organic compounds as measured by EPA Method 8240 may be treated by the following technologies:

- a. Phase separation by filtration, centrifugation or gravity settling, but excluding super critical fluid extraction.
- b. Adsorption.
- c. Distillation.
- d. Biological processes conducted in tanks or containers and utilizing naturally occurring microorganisms.
- e. Photodegradation using ultraviolet light, with or without the addition of hydrogen peroxide or ozone, provided the treatment is conducted in an enclosed system.
- f. Air stripping or steam stripping.

4. Sludges, dusts, solid metal objects and metal workings which contain or are contaminated with metals listed in title 22, CCR, section 66261.24 (a)(2) and/or fluoride salts may be treated by the following technologies:

- a. Chemical stabilization using silicates and/or cementitious types of reactions.
- b. Physical processes which change only the physical properties of the waste such as grinding, shredding, crushing, or compacting.
- c. Drying to remove water.
- d. Separation based on differences in physical properties such as size, magnetism or density.

5. Alum, gypsum, lime, sulfur or phosphate sludges may be treated by the following technologies:

- a. Chemical stabilization using silicates and/or cementitious types of reactions.
- b. Drying to remove water.
- c. Phase separation by filtration, centrifugation or gravity settling.

6. Wastes identified in title 22, CCR, section 66261.120, that meet the criteria and requirements for special waste classification in title 22, CCR, section 66261.122 may be treated by the following technologies:

- a. Chemical stabilization using silicates and/or cementitious types of reactions.
- b. Drying to remove water.
- c. Phase separation by filtration, centrifugation or gravity settling.
- d. Screening to separate components based on size.
- e. Separation based on differences in physical properties such as size, magnetism or density.

**CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT
UNIT SPECIFIC NOTIFICATION**
(pursuant to Health and Safety Code Section 25201.5(a))

7. Wastes, except asbestos, which have been classified by the Department as special wastes pursuant to title 22, CCR, section 66261.124, may be treated by the following technologies:
- a. Chemical stabilization using silicates and/or cementitious types of reactions.
 - b. Drying to remove water
 - c. Phase separation by filtration, centrifugation or gravity settling.
 - d. Magnetic separation.
8. Inorganic acid or alkaline wastes may be treated by the following technology:
- a. pH adjustment or neutralization.
9. Soils contaminated with metals listed in title 22, CCR, section 66261.24 (a)(2), (Persistent and Bioaccumulative Toxic Substances) may be treated by the following technologies:
- a. Chemical stabilization using silicates and/or cementitious types of reactions.
 - b. Screening to separate components based on size.
 - c. Magnetic separation.
10. Used oil, unrefined oil waste, mixed oil, oil mixed with water and oil/water separation sludges may be treated by the following technologies:
- a. Phase separation by filtration, centrifugation or gravity settling, but excluding super critical fluid extraction.
 - b. Distillation.
 - c. Neutralization.
 - d. Separation based on differences in physical properties such as size, magnetism or density.
 - e. Reverse osmosis.
 - f. Biological processes conducted in tanks or containers and utilizing naturally occurring microorganisms.
11. Containers of 110 gallons or less capacity which are not constructed of wood, paper, cardboard, fabric, or any other similar absorptive material, which have been emptied as specified in Title 40 of the Code of Federal Regulations (CFR), section 261.7 or inner liners removed from empty containers that once held hazardous waste or hazardous material and which are not excluded from regulation may be treated by the following technologies provided the treated containers and rinseate are managed in compliance with applicable requirements:
- a. Rinsing with a suitable liquid capable of dissolving or removing the hazardous constituents which the container held.
 - b. Physical processes such as crushing, shredding, grinding or puncturing, that change only the physical properties of the container or inner liner, provided the container or inner liner is first rinsed and the rinseate is removed from the container or inner liner.
12. Multi-component resins may be treated by the following process:
- a. Mixing the resin components together in accordance with the manufacturer's instructions.

**CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT
UNIT SPECIFIC NOTIFICATION**
(pursuant to Health and Safety Code Section 25201.5(a))

II. NARRATIVE DESCRIPTIONS: *Provide a brief description of the specific waste treated and the treatment process used.*

1. SPECIFIC WASTE TYPES TREATED: Photographic chemicals, developer, wash water
, fixer and bleach
2. TREATMENT PROCESS(ES) USED: Electrolytic and metallic exchange silver recovery
unit.

III. RESIDUAL MANAGEMENT: *Check Yes or No to each question as it applies to all residuals from this treatment unit.*

YES NO

1. Do you discharge non-hazardous aqueous waste to a publicly owned treatment works (POTW)/sewer?
2. Do you discharge non-hazardous aqueous waste under an NPDES permit?
3. Do you have your residual hazardous waste hauled offsite by a registered hazardous waste hauler?
If you do, where is the waste sent? *Check all that apply.*
- a. Offsite recycling
- b. Thermal treatment
- c. Disposal to land
- d. Further treatment
4. Do you dispose of non-hazardous solid waste residues at an offsite location?
5. Other method of disposal. Specify: _____

IV. BASIS FOR NOT NEEDING A FEDERAL PERMIT:

In order to demonstrate eligibility for one of the onsite treatment tiers, facilities are required to provide the basis for determining that a hazardous waste permit is not required under the federal Resource Conservation and Recovery Act (RCRA) and the federal regulations adopted under RCRA (Title 40, Code of Federal Regulations (CFR)).

Choose the reason(s) that describe the operation of your onsite treatment units:

1. The hazardous waste being treated is not a hazardous waste under federal law although it is regulated as a hazardous waste under California state law.
2. The waste is treated in wastewater treatment units (tanks), as defined in 40 CFR Part 260.10, and discharged to a publicly owned treatment works (POTW)/sewerage agency or under an NPDES permit. 40 CFR 264.1(g)(6) and 40 CFR 270.2.

**CONDITIONALLY EXEMPT-SMALL QUANTITY TREATMENT
UNIT SPECIFIC NOTIFICATION**
(pursuant to Health and Safety Code Section 25201.5(a))

IV. BASIS FOR NOT NEEDING A FEDERAL PERMIT: (continued)

3. The waste is treated in elementary neutralization units, as defined in 40 CFR Part 260.10, and discharged to a POTW/sewering agency or under an NPDES permit. 40 CFR 264.1(g)(6) and 40 CFR 270.2.
4. The waste is treated in a totally enclosed treatment facility as defined in 40 CFR Part 260.10; 40 CFR 264.1(g)(5).
5. The company generates no more than 100 kg (approximately 27 gallons) of hazardous waste in a calendar month and is eligible as a federal conditionally exempt small quantity generator. 40 CFR 260.10 and 40 CFR 261.5.
6. The waste is treated in an accumulation tank or container within 90 days for over 1000 kg/month generators and 180 or 270 days for generators of 100 to 1000 kg/month. 40 CFR 262.34, 40 CFR 270.1(c)(2)(i), and the Preamble to the March 24, 1986 Federal Register.
7. Recyclable materials are reclaimed to recover economically significant amounts of silver or other precious metals. 40 CFR 261.6(a)(2)(iv), 40 CFR 264.1(g)(2), and 40 CFR 266.70.
8. Empty container rinsing and/or treatment. 40 CFR 261.7.
9. Other: Specify: _____

V. TRANSPORTABLE TREATMENT UNIT: Check Yes or No. Please refer to the Instructions for more information.

- YES NO
 Is this unit a Transportable Treatment Unit?

If you answered yes, you must also complete and attach Form 1772E to this page.

The Tier-Specific Factsheets contain a summary of the operating requirements for this category. Please review those requirements carefully before completing or submitting this notification package.

DEPARTMENT OF TOXIC SUBSTANCES CONTROL

Region 2- 700 Heinz Avenue, Suite 200

Berkeley, CA 94710

**CHECKLIST AND INITIAL VERIFICATION INSPECTION REPORT FOR
Permit by Rule, Conditionally Authorized, and Conditionally Exempt Notifiers**

FACILITY NAME: CLARIS CORPORATION EPA ID NUMBER: CAL000112070
 PHYSICAL ADDRESS: 5201 PATRICK HENRY DR, SANTA CLARA
 FACILITY CONTACT-NAME: TEX TYNER PHONE: 408-987-7270
 SIC CODE(S): 7371 INSPECTION DATE: 3/14/95 Local# _____

NOTIFIED UNIT COUNT: PBR _____ CA _____ CESW _____ CESQT 1 TOTAL 1
 CORRECT UNIT COUNT: PBR _____ CA _____ CESW _____ CESQT 0 TOTAL 0

This checklist and inspection report identify violations of state law regarding onsite treaters of hazardous waste, operating under an onsite permitting tier. This inspection verifies the information provided on form DTSC 1772. It also covers generator requirements, although a separate checklist may be used for those requirements. A checkmark indicates violation of the law, which are explained in more detail on the attached note sheets. The governing laws are the Health and Safety Code (HSC) and Title 22 of the California Code of Regulations (22 CCR).

Generator Standards:

Each inspection agency may use their own generator inspection checklist or protocols, which are summarized below. A full evaluation of each item or document is not conducted during the Verification Inspection, unless serious deficiencies are suspected.

NO

- ___ 1. Contingency plan has been prepared (adequately minimize releases, has alarm/communication system, lists emergency equipment and phone numbers for emergency coordinators).
- ___ 2. Written training documents and records prepared for employees handling hazardous waste.
- ___ 3. Meet container management standards (storage time limits, closed, labelled, compatibility, inspected weekly, in good condition, with ignitables/reactives 50 feet from property line).
- ___ 4. Meet tank management standards (either secondary containment or integrity assessments, plus storage time limits, labelled, compatibility, inspected daily, in good condition, with ignitables/reactives 50 feet from property line).
- ___ 5. All wastes are properly identified.

Treatment Items-Facility Wide: (Facility must submit a revised Form 1772 to correct errors or omissions.)

- ___ 6. All units under PBR, CA, and CE are properly indicated on Form DTSC 1772. (Add any new units with unit sheets or correct tier on the unit sheet.)
- ___ 7. All generator identification information on Form DTSC 1772 is correct.
- ___ 8. The submitted plot plan/map adequately shows the location of all regulated units.
- ___ 9. There are records documenting compliance with sewer agency pretreatment standards and industrial waste discharge requirements, where applicable.
- ___ 10. Generator has prepared/maintained source reduction documents requirements (SB 14/SB 1726). For many wastes, a checklist or plan is required only if annual hazardous waste volume is over 5,000 kilograms (approx 11,000 pounds or 1,350 gallons). HSC 25244.15, 25244.19-.21

For CA or PBR notifiers:

- ___ 11. The generator has an annual waste minimization certification. (PBR submit with renewals.)

DEPARTMENT OF TOXIC SUBSTANCES CONTROL

Region 2- 700 Heinz Avenue, Suite 200

Berkeley, CA 94710

**CHECKLIST AND INITIAL VERIFICATION INSPECTION REPORT FOR
Permit by Rule, Conditionally Authorized, and Conditionally Exempt Notifiers
UNIT SHEET**

Complete one unit sheet for each unit either listed in the notification or identified during the inspection.

Unit Number: # 1 Unit Name: SILVER RECOVERY UNIT R-11
 Notified Tier: CESQT Correct Tier: EXEMPT

Notified Device Count: Tanks 1 Containers
 Correct Device Count: Tanks Containers 1

For each Unit:

- NO
12. All hazardous wastes treated are generated onsite.
13. The unit notification is accurate as to the number of tank(s) and/or container(s).
- X 14. The estimated notification monthly treatment volume is appropriate for the indicated tier. *
15. The waste identification/evaluation is appropriate for the tier indicated.
16. The wastestream(s) given on the notification form are appropriate for the tier.
17. The treatment process(es) given on the notification form are appropriate for the tier.
18. The residuals management information on the form is correct and documented for the unit.
19. The indicated basis for not needing a federal permit on the notification form is correct.
20. There are written operating instructions and a record of the dates, volumes, residual management, and types of wastes treated in the unit.
21. There is a written inspection schedule (containers-weekly and tanks-daily).
22. There is a written inspection log maintained of the inspections conducted.
23. If the unit has been closed, the generator has notified DTSC and the local agency of the closure.

For each CA or PBR unit:

24. The generator has secondary containment for treatment in containers.

For each PBR unit:

25. There is a waste analysis plan
26. There are waste analysis records.
27. There is a closure plan for the unit.

Unit Comments/Observations: (If this is a unit that was not included on the notification form, the violation is operating without a permit-HSC 25201(a). Note if the activity is currently ineligible for onsite authorization.)

* < 10g fixer used /month, so less << 10g treated.

Berkeley, CA 94710

**CHECKLIST AND INITIAL VERIFICATION INSPECTION REPORT FOR
Permit by Rule, Conditionally Authorized, and Conditionally Exempt Notifiers
SIGNATURE SHEET**

Onsite Recycling: Only answer if this facility recycles more than 100 kilograms/month of hazardous waste onsite.

NO

- ___ 28. The appropriate local agency has been notified. HSC 25143.10
___ 29. Activities claimed under the onsite recycling exemption are appropriate. HSC 25143.2 et sec.

Releases: If there has been a release, provide the following information: number of releases, date(s), type(s) and quantity of materials/waste, and the cause(s). Use unit sheet or attach additional pages.

YES

- ___ 30. Within the last three years, were there any **unauthorized or accidental releases to the environment** of hazardous waste or hazardous waste constituents from onsite treatment units?
___ 31. Within the last three years, were there any **unauthorized or accidental releases to the environment** of hazardous waste or hazardous waste constituents from any location at this facility?

For purposes of a Tiered Permitting inspection, an unauthorized and/or accidental release to the environment does not include spills contained within containment systems.

This report may identify conditions observed this date that are alleged to be violations of one or more sections at the California Health and Safety Code (HSC) or the California Code of Regulations, Title 22 (22 CCR) relating to the management of hazardous waste. The violations may be described in more detail on the attached note sheets. If any violations are noted, the facility is required to submit a signed Certification of Return to Compliance within 30 days, unless otherwise specified. (A certification form is provided.) If any corrections are needed to the initial notification, the facility will submit a revised notification within 30 days to the Department of Toxic Substances Control with a copy to the local enforcement agency.

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction

Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

RECEIVED

Reviewed 11/26/08 AH

OCT 07 2008

To: Agency Name: **Santa Clara Fire Department-Hazardous Materials Division**

Agency Mailing Address: **1675 Lincoln Street
Santa Clara, CA 95050**

S.C.F.D.

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: FileMaker Inc.

Facility Street Address: 5201 Patrick Henry Dr.

City: Santa Clara

Date of Current HMBP: August 20, 2008

I certify that: (Check the appropriate box.)

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification along with a signed Unified Program Consolidated Form (UPCF) Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials which would require updating of the HMBP.

Name of Owner/Operator (Print): Betty Miller

Title: Facilities/Security Manager

Signature of Owner/Operator: Betty Miller

Date: August 20, 2008

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP.

If EPCRA, sign below:

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

Page 1 of 4

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made (see section 3, below).

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all that apply):

Bells; Horns/Sirens; Verbal (i.e., shouting); Other (specify _____)

b. Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance Phone No.: **911**

State Office of Emergency Services Phone No.: **(800) 852-7550**

b. Post-Incident Contacts*:

Certified Unified Program Agency (CUPA) Phone No.: **(408) 615-4960**

Fire Department Hazardous Materials Program Phone No.: **(408) 615-4960**

California EPA Department of Toxic Substances Control Phone No.: **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health Phone No.: **(408) 452-7288**

Air Quality Management District Phone No.: **(415) 771-6000**

Regional Water Quality Control Board Phone No.: **(510) 622-2300**

* Phone numbers for agencies in Unidocs' Member Agency geographic jurisdictions are available at www.unidocs.org.

c. Emergency Resources:

Poison Control Center* Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **KP Santa Clara Medical Center** Phone No.: **(408) 236-6440**

Address: **960 Killy Blvd. 710 Lawrence Expwy** City: **Santa Clara, CA 95051**

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

- a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator (*or his/her designee when the emergency coordinator is on call*) shall:
 - i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
 - ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects (*e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.*).
 - iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
 - iv. Notify appropriate local authorities (*i.e., call 911*).
 - v. Notify the State Office of Emergency Services at 1-800-852-7550.
 - vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
 - vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.
- b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
 - i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
 - ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
 - iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
 - iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

- a. Name, address, and telephone number of the facility's owner/operator;
- b. Name, address, and telephone number of the facility;
- c. Date, time, and type of incident (*e.g., fire, explosion, etc.*);
- d. Name and quantity of material(s) involved;
- e. The extent of injuries, if any;
- f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
- g. Estimated quantity and disposition of recovered material that resulted from the incident;
- h. Cause(es) of the incident;
- i. Actions taken in response to the incident;
- j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(e)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

| 1. Equipment Category | 2. Equipment Type | 3. Locations * | 4. Description** |

* Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.

** Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

Page 1 of 2

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. [Note: Items marked with an asterisk (*) are required.]:

1. Personnel are trained in the following procedures:

| |
|---|
| <input checked="" type="checkbox"/> Internal alarm/notification * |
| <input checked="" type="checkbox"/> Evacuation/re-entry procedures & assembly point locations* |
| <input checked="" type="checkbox"/> Emergency incident reporting |
| <input type="checkbox"/> External emergency response organization notification |
| <input type="checkbox"/> Location(s) and contents of Emergency Response/Contingency Plan |
| <input checked="" type="checkbox"/> Facility evacuation drills, that are conducted at least (<i>specify</i>): "Annually" (e.g., "Quarterly", etc.) |

2. Chemical Handlers are additionally trained in the following:

| |
|---|
| <input checked="" type="checkbox"/> Safe methods for handling and storage of hazardous materials * |
| <input checked="" type="checkbox"/> Location(s) and proper use of fire and spill control equipment |
| <input checked="" type="checkbox"/> Spill procedures/emergency procedures |
| <input checked="" type="checkbox"/> Proper use of personal protective equipment * |
| <input checked="" type="checkbox"/> Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (<i>i.e., inhalation, ingestion, absorption</i>) * |
| <input type="checkbox"/> Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (<i>e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.</i>) * |

3. Emergency Response Team Members are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

| |
|---|
| <input checked="" type="checkbox"/> Personnel rescue procedures |
| <input checked="" type="checkbox"/> Shutdown of operations |
| <input checked="" type="checkbox"/> Liaison with responding agencies |
| <input checked="" type="checkbox"/> Use, maintenance, and replacement of emergency response equipment |
| <input checked="" type="checkbox"/> Refresher training, which is provided at least annually * |
| <input checked="" type="checkbox"/> Emergency response drills, which are conducted at least (<i>specify</i>): "Annually" (e.g., "Quarterly", etc.) |

Record Keeping
(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. [Note: Items marked with an asterisk (*) are required.]:

| | |
|-------------------------------------|--|
| <input checked="" type="checkbox"/> | Current employees' training records (to be retained until closure of the facility) * |
| <input checked="" type="checkbox"/> | Former employees' training records (to be retained at least three years after termination of employment) * |
| <input checked="" type="checkbox"/> | Training Program(s) (i.e., written description of introductory and continuing training) * |
| <input checked="" type="checkbox"/> | Current copy of this Emergency Response/Contingency Plan * |
| <input checked="" type="checkbox"/> | Record of recordable/reportable hazardous material/waste releases * |
| <input checked="" type="checkbox"/> | Record of hazardous material/waste storage area inspections * |
| <input checked="" type="checkbox"/> | Record of hazardous waste tank daily inspections * |
| <input type="checkbox"/> | Description and documentation of facility emergency response drills |

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. [Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at www.unidocs.org), you do not need to attach a copy.]

Check the appropriate box:

| | |
|-------------------------------------|--|
| <input checked="" type="checkbox"/> | We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections. |
| <input type="checkbox"/> | We will use our own documents to record inspections. (A blank copy of each document used must be attached to this HMBP.) |

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

To: Agency Name: **Santa Clara Fire Department-Hazardous Materials Division**
Agency Mailing Address: **1675 Lincoln Street**
Santa Clara, CA 95050

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: FileMaker Inc.

Facility Street Address: 5201 Patrick Henry Dr. City: Santa Clara

Date of Current HMBP: July 24, 2007

I certify that: *(Check the appropriate box.)*

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. *(See bottom of page for details.)* If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification along with a signed Unified Program Consolidated Form (UPCF) Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials which would require updating of the HMBP.

Name of Owner/Operator *(Print)*: Betty Miller Title: Facilities/Security Manager

Signature of Owner/Operator:  Date: July 24, 2007

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; **and**
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; **and**
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory; **and**
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; **and**
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

Page 1 of 4

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made (see section 3, below).

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all that apply):

Bells; Horns/Sirens; Verbal (i.e., shouting); Other (specify _____)

b. Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance Phone No.: **911**

State Office of Emergency Services Phone No.: **(800) 852-7550**

b. Post-Incident Contacts*:

Certified Unified Program Agency (CUPA) Phone No.: **(408) 615-4960**

Fire Department Hazardous Materials Program Phone No.: **(408) 615-4960**

California EPA Department of Toxic Substances Control Phone No.: **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health Phone No.: **(408) 452-7288**

Air Quality Management District Phone No.: **(415) 771-6000**

Regional Water Quality Control Board Phone No.: **(510) 622-2300**

* Phone numbers for agencies in Unidocs' Member Agency geographic jurisdictions are available at www.unidocs.org.

c. Emergency Resources:

Poison Control Center* Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **KP Santa Clara Medical Center** Phone No.: **(408) 236-6440**

Address: **900 Kiely Blvd.** City: **Santa Clara, CA 95051**

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

- a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator (*or his/her designee when the emergency coordinator is on call*) shall:
 - i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
 - ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects (*e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.*).
 - iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
 - iv. Notify appropriate local authorities (*i.e., call 911*).
 - v. Notify the State Office of Emergency Services at 1-800-852-7550.
 - vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
 - vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.
- b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
 - i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
 - ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
 - iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
 - iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

- a. Name, address, and telephone number of the facility's owner/operator;
- b. Name, address, and telephone number of the facility;
- c. Date, time, and type of incident (*e.g., fire, explosion, etc.*);
- d. Name and quantity of material(s) involved;
- e. The extent of injuries, if any;
- f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
- g. Estimated quantity and disposition of recovered material that resulted from the incident;
- h. Cause(es) of the incident;
- i. Actions taken in response to the incident;
- j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(e)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

| 1. Equipment Category | 2. Equipment Type | 3. Locations * | 4. Description** | |
|---|---|-------------------|------------------------------|---|
| Personal Protective Equipment, Safety Equipment, and First Aid Equipment | <input type="checkbox"/> Cartridge Respirators | | | |

| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |
| | <input type="checkbox"/> | |

* Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.

** Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

Page 1 of 2

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. [Note: Items marked with an asterisk (*) are required.]:

1. Personnel are trained in the following procedures:

| |
|---|
| <input checked="" type="checkbox"/> Internal alarm/notification * |
| <input checked="" type="checkbox"/> Evacuation/re-entry procedures & assembly point locations* |
| <input checked="" type="checkbox"/> Emergency incident reporting |
| <input type="checkbox"/> External emergency response organization notification |
| <input type="checkbox"/> Location(s) and contents of Emergency Response/Contingency Plan |
| <input checked="" type="checkbox"/> Facility evacuation drills, that are conducted at least (specify): "Annually" (e.g., "Quarterly", etc.) |

2. Chemical Handlers are additionally trained in the following:

| |
|--|
| <input checked="" type="checkbox"/> Safe methods for handling and storage of hazardous materials * |
| <input checked="" type="checkbox"/> Location(s) and proper use of fire and spill control equipment |
| <input checked="" type="checkbox"/> Spill procedures/emergency procedures |
| <input checked="" type="checkbox"/> Proper use of personal protective equipment * |
| <input checked="" type="checkbox"/> Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e., inhalation, ingestion, absorption) * |
| <input type="checkbox"/> Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.) * |

3. Emergency Response Team Members are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

| |
|---|
| <input checked="" type="checkbox"/> Personnel rescue procedures |
| <input checked="" type="checkbox"/> Shutdown of operations |
| <input checked="" type="checkbox"/> Liaison with responding agencies |
| <input checked="" type="checkbox"/> Use, maintenance, and replacement of emergency response equipment |
| <input checked="" type="checkbox"/> Refresher training, which is provided at least annually * |
| <input checked="" type="checkbox"/> Emergency response drills, which are conducted at least (specify): "Annually" (e.g., "Quarterly", etc.) |

Record Keeping
(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

| | |
|-------------------------------------|---|
| <input checked="" type="checkbox"/> | Current employees' training records <i>(to be retained until closure of the facility) *</i> |
| <input checked="" type="checkbox"/> | Former employees' training records <i>(to be retained at least three years after termination of employment) *</i> |
| <input checked="" type="checkbox"/> | Training Program(s) <i>(i.e., written description of introductory and continuing training) *</i> |
| <input checked="" type="checkbox"/> | Current copy of this Emergency Response/Contingency Plan * |
| <input checked="" type="checkbox"/> | Record of recordable/reportable hazardous material/waste releases * |
| <input checked="" type="checkbox"/> | Record of hazardous material/waste storage area inspections * |
| <input checked="" type="checkbox"/> | Record of hazardous waste tank daily inspections * |
| <input type="checkbox"/> | Description and documentation of facility emergency response drills |

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *[Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at www.unidocs.org), you do not need to attach a copy.]*

Check the appropriate box:

| | |
|-------------------------------------|--|
| <input checked="" type="checkbox"/> | We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections. |
| <input type="checkbox"/> | We will use our own documents to record inspections. <i>(A blank copy of each document used must be attached to this HMBP.)</i> |

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

02-17-10
JN

02-18-10 JN ✓

To: Agency Name: Fire Dept / City of Santa Clara
Agency Mailing Address: 1675 Lincoln St
Santa Clara CA 95050-4653

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: File Maker, Inc
Facility Street Address: 5201 Patrick Henry Dr City: Santa Clara
Date of Current HMBP: August 20, 2008

RECEIVED

FEB 16 2010

I certify that: (Check the appropriate box.)

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator (Print): Betty Miller Title: Facilities Mgr
Phone: 408/987-7377 Signature: Betty Miller Date: 1/27/2010
(For 2009 Reporting)

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

INSPECTION REPORT - PART 2 - DEFICIENCIES

Inspection Type: Business Plan Underground Storage Tank
 Hazardous Waste Generator Cal Accidental Release Prevention Program
 Hazardous Waste Treatment Aboveground Storage Tank
 Fire Code Other:

VIOLATIONS: Codes noted below in the "Violation Code" column represent specific violations of State law and/or local Ordinance. Time granted for correction of deficiencies does not preclude any enforcement action by this Department or other agencies.

| Violation Code | Summary of Deficiencies, Observations, and Required Corrective Actions | Corrective Actions Taken |
|----------------|---|--------------------------|
| CFC | See the fire and life safety inspection report for fire code violations. | |
| CFC31 | Send in HMBP annual certification for the year 2010. | |
| | HMBP certification for 2009 attached. A certification for 2010 will be sent Aug. 2010, anniversary date for HMBP. | |
| | Betty Miller | |

All deficiencies must be corrected within 30 days of the inspection date unless otherwise noted above. Please write a brief description of corrective actions taken to bring this facility into compliance in the right column above, sign the certification statement below and submit it to this Office within 35 days of the inspection date. My signature acknowledges I consented to this inspection. (Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)

Received by: Betty Miller Title: X Fac Mgr Date: 01/21/10
 Printed Name: Betty Miller Phone No.: 408/987-7377

Certification: I certify under penalty of perjury that this facility has complied with the directives in this Notice to Comply.
 Signature of owner/Operator: Betty Miller Title: Facilities Mgr Date: 1/27/10

(Facility sends yellow copy to Fire Department and keeps pink copy)

Fire and Life Safety Inspection Report

Business Name: File Maker Inc.
 Business Address: 5201 Patrice Henry
 Contact Person: Betty Miller

Fire Permit Number: 031771
 Business Phone No.: 408-987-7000
 Date of Inspection: 01/21/10

The following violations require correction in accordance with applicable laws and ordinances.

EXTERIOR

- 1. Provide adequate clearance (36 inches) around hydrants, sprinkler risers, fire department connections and post indicator valves.
- 2. Repair or replace protective covers for fire department connection and ensure that connections rotate smoothly.
- 3. Lock in the open position all fire protection control valves.
- 4. Dumpsters located within 5 feet of any combustible building shall be protected with automatic sprinklers.
- 5. Remove trash, dead vegetation, and/or other combustible waste.
- 6. Post approved address or building number sign on building.
- 7. Provide access for emergency vehicles. Minimum clearances: 20 feet in width; and 13 feet, 6 inches in height.

FIRE PROTECTION SYSTEMS AND EQUIPMENT

- 8. Provide 5-year service certification for fire sprinkler/standpipe system.
- 9. Fire sprinkler systems shall be monitored by an approved monitoring company.
- 10. Provide additional fire sprinklers and/or sprinkler wrench in spare head cabinet.
- 11. Maintain a minimum vertical clearance of 18 inches for storage up to 12 feet and 36 inches for storage above 12 feet between all storage and fire sprinklers.
- 12. Provide additional fire sprinkler protection in areas noted. Obtain Fire Permit from the Fire Prevention Division.
- 13. Fire sprinkler systems are required to be inspected on a quarterly basis. Records shall be maintained on-site for five years.
- 14. Automatic fire protection systems other than sprinkler and/or standpipe systems are required to be serviced and tagged every six months and after each use.
- 15. Kitchen hood and duct system requires regular cleaning to prevent accumulation of grease.
- 16. Provide and mount a class K fire extinguisher within 30 feet of all commercial cooking areas.
- 17. Fire extinguishers are required to be visually inspected monthly and be tagged on an annual basis to certify that a annual maintenance inspection has been performed.
- 18. Provide additional fire extinguishers with a minimum rating and travel distance specified on backside of this report.
- 19. Mount fire extinguishers so that the top of the extinguisher does not exceed five feet from the floor.
- 20. Remove obstructions and maintain access to fire extinguishers; fire hose cabinets and/or manual pull stations.
- 21. Fire alarm systems shall be tested on an annual basis. Records shall be maintained on site.

HAZARDOUS MATERIALS

- 22. Provide an approved flammable liquids cabinet.
- 23. Class I Flammable and Class II Combustible Liquids shall be dispensed by an approved means.
- 24. Label all chemical storage, use and transportation points.
- 25. Incompatible materials shall be segregated by hazard class and material to meet.
- 26. Provide approved emergency eyewash and/or shower.
- 27. Provide secondary containment for hazardous materials.
- 28. Secure compressed gas cylinders.

- 29. Secondary containment shall be monitored for discharges by an approved method.
- 30. Submit revised Hazardous Material Inventory Statement.
- 31. Submit Hazardous Material Management Plan to Hazardous Materials Division. Maintain copy on site for emergency.
- 32. Provide and maintain on site Material Safety Data Sheets for all hazardous materials.
- 33. Hazardous waste shall be handled in accordance with the IFC and State law.

EXITS

- 34. Remove obstructions from aisles, corridors, stairways and exit.
- 35. Provide free opening hardware on exit doors.
- 36. Provide exit illumination.
- 37. Provide emergency lighting as required.
- 38. Install approved exit signs at exit doors and along exit ways as required.

ELECTRICAL

- 39. Discontinue use of extension cords in lieu of permanent wiring.
- 40. Discontinue use of non-approved multi-plug adapters.
- 41. Approved multi-plug adapters shall be connected to a permanently installed receptacle.
- 42. Extension and approved multi-plug adapter cords shall not be subject to environmental or physical damage.
- 43. Label high voltage areas and electric rooms.
- 44. Remove combustible storage from electric room(s).
- 45. Repair or remove frayed, damaged or spliced wiring.
- 46. Provide covers for all electrical boxes, outlets and circuit breaker panels.
- 47. Label all circuit breakers.
- 48. Maintain access to all electrical control panels.

GENERAL SAFETY

- 49. Provide an approved dust collection system.
- 50. Combustible storage shall not exceed 12 feet in height without additional fire protection.
- 51. Restore firewalls, occupancy separations or other rated elements to their original classifications.
- 52. Remove obstructions to rated fire doors and test operation on a monthly basis.
- 53. Provide seismic bracing for materials or items, which may present an egress or life safety hazard during a seismic event.
- 54. Remove all combustible storage within 36 inches of any heat producing equipment or appliances.
- 55. Seismically secure water heater.
- 56. Post occupant load sign at main exit.
- 57. Provide an approved locking cabinet in an approved location, which is accessible to the Fire Department in an emergency, for your hazardous material management plan or other emergency plan.

ADMINISTRATIVE

- 58. Obtain and/or post Business License/Fire permit in a visible location.
- 59. Building construction or remodeling requires a permit from the Building Department.
- 60. The occupancy classification for this facility does not correspond with the activities conducted.

VIOLATION LOCATION DESCRIPTION AND/OR OTHER VIOLATIONS NOT LISTED

31) Send in Certification form for HMMP for the year 2010. (attached)
Verify that your high level alarm and secondary containment alarms are functionally tested on an annual basis and this testing shall be documented. Test completed 2/1/10. (see attach. 2)

You are hereby ordered to correct, or submit a plan to correct, the violation(s) noted within 30 hours (days) from the date of service of this notice. Your cooperation is appreciated. Prompt correction of the violation(s) will avoid the necessity for legal actions.

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction

Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

01-27-11
JN

12-28-10 JN

To: Agency Name: Fire Dept / City of Santa Clara
Agency Mailing Address: 1675 LINCOLN ST
Santa CLARA CA 95050-4653

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: FileMaker, Inc
Facility Street Address: 5201 Patrick Henry DR City: Santa CLARA
Date of Current HMBP: August 20, 2008

I certify that: (Check the appropriate box.)

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

OR

Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator (Print): Betty Miller Title: FACILITIES MGR
Phone: 408/987-7377 Signature: Betty Miller Date: 12/23/10
(2010 REPORTING)

- By checking the upper box on this form, you are certifying that:
- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
 - There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
 - The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
 - The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
 - There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?

Yes**Underground Petroleum Storage (UST)**

Does your facility *own or operate* underground storage tanks?

No**Hazardous Waste**

Is your facility a Hazardous Waste Generator?

No

Does your facility treat hazardous waste on-site?

No

Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?

No

Does your facility consolidate hazardous waste generated at a remote site?

No

Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?

No

Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.

No

Is your facility a Household Hazardous Waste (HHW) Collection site?

No**Excluded and/or Exempted Materials**

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?

No

Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.

No

Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?

No**Additional Information**

No additional comments provided.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/25/2022 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless

EXECUTIVE SUMMARY

information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2022 has revealed that there are 9 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 5

EXECUTIVE SUMMARY

RCRA-LQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/24/2022 has revealed that there are 20 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 21 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 2 CA UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 CA SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 18 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 17 CA CUPA Listings sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

located in north Santa Clara County on the southern edge of the San Francisco Bay, served as dumping areas for over 30 years. Companies disposed of asbestos waste in an old municipal landfill. In addition, asbestos waste was used for fill material at various locations throughout the town. The site was first proposed for listing under the name Alviso Dumping Areas. Soil in the old landfill and around homes contains asbestos, according to tests conducted by the State. Construction activities and wind action stir up asbestos-laden dust, posing a potential health risk to residents. EPA and the State plan to continue sampling the soil and air throughout the 1-square-mile area to determine the degree of risk to public health. Evening winds may transport asbestos to the San Francisco Bay National Wildlife Refuge, which borders the town and harbors several endangered species. Status June 10, 1986): In July 1985, EPA entered into an Interagency Agreement with the U.S. Army Corps of Engineers to conduct a remedial investigation/feasibility study to determine the extent of contamination at the site and identify alternatives for remedial action. The remedial investigation is scheduled to begin in the spring of 1986. In October 1985, two areas of the town were paved to prevent exposure of residents to potentially significant levels of asbestos fibers. Additional measures are being considered to further reduce exposures to asbestos fibers.

Completed Info:

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Summerset Mobile Home Estates
Completed Document Type: Land Use Restriction
Completed Date: 09/14/2011
Comments: A Land Use Covenant that places restrictions on the Summerset Mobile Home Park was recorded with the Santa Clara County Recorder. The Covenant allows for the property to continue being used as a mobile home park, but prohibits other sensitive uses and requires a soil management for activities that disturb the soil.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 09/30/1991
Comments: Issued Orders to four of the Truckyard owners requiring them to pave their respective yards. By late 1992, three of the truckyards removed all asbestos contaminated fill to residential levels. For Neu Truck Yard, the remaining truck yard property, the US EPA will be conducting soil sampling to determine what further action is required.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Legacy
Completed Document Type: Land Use Restriction
Completed Date: 10/21/2004
Comments: Recorded Deed Restrictions.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Legacy
Completed Document Type: Soils Management Plan
Completed Date: 06/08/2009
Comments: The Soil Management Plan addresses work to be conducted as part of Pacific Gas and Electric's TIVO U/G Service Upgrade project. The project work consists of installing a new power pole and feeders into an existing underground junction box. U.S. EPA approved the Plan on May 28, 2009. DTSC concurred with the Plan on June 8, 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/22/2010
Comments: The U.S. Environmental Protection Agency (EPA) approved the Third Five-Year Review Report. DTSC comments on the draft version of the Report were incorporated in the final version. EPA concluded that the

remedy is protective of human health and the environment in the short-term. For the remedy to be protective in the long-term, institutional controls need to be implemented at the Summerset Mobile Estates portion of the former Santos Landfill and the Sainte Claire Landfill. For the Marshland Landfill, EPA needs to prepare an Explanation of Significant Differences that will specify the use of Water Board title 27, California Code of Regulations requirements in lieu of deed restriction as specified in the Record of Decision and that no further controls are needed.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Saint Claire Landfill Parcels
Completed Document Type: Site Characterization Report
Completed Date: 05/11/2011
Comments: Parcels 015-41-006 and 015-04-015 were formerly operated as the Saint Claire Corporation Landfill. The U.S. EPA Record of Decision required institutional controls to be put in place for these parcels because of the potential presence of asbestos. The Report presents the results of soil sampling performed by the owner of the parcels. Ten soil borings were drilled on the two parcels and a total of 28 soil samples were collected and analyzed for asbestos. Only one of the 28 samples had an asbestos concentration exceeding the 1 percent action levels established by U.S. EPA for the South Bay Asbestos Area. Based on the sampling results, EPA and DTSC have determined that a land use covenant is not needed for the parcels.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/10/2015
Comments: The Fourth Five-Year Review Report for the Site was finalized by The U.S. Environmental Protection Agency and was signed by the Acting Assistant Director of the Region 9, Superfund Division on 9/10/2015. The Five-Year Review Report concluded that the Site remedy is protective of human health and the environment. Five recommendations were made in the Five Year Review Report to ensure proper operation of the remedy and continued protectiveness.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Summerset Mobile Home Estates
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 04/10/2015
Comments: Rutherford MHC Management performed an inspection of the Summerset Mobilehome Park and submitted a report of the inspection to DTSC as required by section 4.06 of the Land Use Covenant to verify compliance with its restrictions and requirements. The report outlined disturbances of the soil that have occurred since the prior report dated September 27, 2012. The report noted that each soil disturbance was performed in compliance with the EPA- and DTSC-approved Soil Management Plan and concluded the property continues to be used in a manner consistent with the Land Use Covenant.

Comments: Rutherford MHC Management submitted a letter to DTSC and U.S. EPA to verify compliance with the Land Use Covenant that was recorded with Santa Clara County for the Summerset Mobile Home Park.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Land Use Restriction Monitoring Report
Completed Date: 08/03/2011
Comments: The advisory was provided.

Completed Area Name: OU 1-Main Site
Completed Sub Area Name: Summerset Mobile Home Estates
Completed Document Type: * Land Use Restriction Monitoring Report
Completed Date: 10/19/2012
Comments: An inspection was performed and report was submitted by the site owner, as required by section 4.06 of the Land Use Covenant, to verify compliance with its restrictions and requirements. The report documented two projects involving disturbance of the soil. The projects were performed in compliance with the US EPA- and DTSC-approved Soil Management Plan. Site use and activities were found to be in compliance with the Land Use Covenant.

Completed Area Name: OU-2 -Ring Levee

Background Info: requirements of the Soil Management Plan (1997). The construction activities included construction of a Cap (consisting of five two-story office buildings, pavement and 18 inches of clean soil in landscaped areas), and installation of a passive gas collection system to remove methane migrating upward from under the Cap. On June 16, 1999, U.S. EPA and Legacy Partners 2335 LLC entered into an Agreement and Covenant Not to Sue for the Collishaw Property. Santos Landfill - A portion of the Santos Landfill is Parcel 1 of the Eastern Parcel Agreement and Covenant Not to Sue which requires a deed restriction. Parcel 2 (not part of Santos Landfill) is part of the Eastern PPA, also requires a deed restriction since asbestos waste piping was found there. The rest of the Santos Landfill is the Summerset Mobile Estates mobile home park and the property located on the northern side of the Guadalupe River. Santos is planning to send U. S. EPA information that shows that the northern property is not part of the Santos Landfill. Sainte Claire Landfill - is located on the northern side of the Guadalupe River and divided into two parcels by Gold Street. The part on the eastern side of Gold Street is operated as a truck yard/storage yard. The part on the western side of Gold Street is undeveloped. Both parcels require a deed restriction as a landfill area that received asbestos waste in the past. Marshland Landfill is regulated under the RWQCB and a deed restriction has been recorded under the RWQCB authority. U.S. EPA and Legacy Partners entered into a Prospective Purchaser Agreement and Covenant Not to Sue for this area (now known as the Highway 237 Disposal Site) which included another Soil Management Plan during construction. During the 1950s, several landfills in the Alviso area accepted wastes from an asbestos cement pipe manufacturing facility. This

waste was later used for raising the grade of the site and for constructing a ring-levee, resulting in asbestos contamination throughout the Alviso area and covering roughly 330 acres. The Site was listed on the Federal Superfund list in 1985. U.S. EPA has been the lead regulatory agency overseeing work. The Site was divided into two operable units - the Ring Levee and the Landfill/Truckyard. On September 30, 1997, U.S. EPA and Lincoln 237 Associates Limited Partnership and Lincoln Property Company No. 2233 Limited Partnership entered into two Prospective Purchaser Agreements and Covenant Not to Sue for the Western Parcel and the Eastern parcel, respectively. The agreements incorporated Soil Management Plans describing soil control measures for asbestos and asbestos containing materials, methane, petroleum hydrocarbons, and lead. A portion of the Santos Landfill is Parcel 1 of the Eastern Parcel. Parcel 2 (not part of Santos Landfill), is the other portion of the Eastern Parcel Agreement and requires a deed restriction since asbestos waste piping was found there. The Final Soil Management Report, dated January 28, 1999, describes the construction activities performed at the Eastern Parcel pursuant to the

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 11-09-2020
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 02/10/2021. No employee training plan available available for current employees, provide a written training plan for all hazardous waste handling employees, plan shall include job title including duties, name of each person at each job title, type and frequency of training. Provide copy to CUPA within 30 days. Also provide training records for current and previous employees for last three years.

Waste Code: D008
Waste Description: LEAD

Waste Code: D018
Waste Description: BENZENE

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U080
Waste Description: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: BUNKER HILL LANE ELEVATOR
Address: 2933 BUNKER HILL LANE
City,State,Zip: SANTA CLARA, CA 95054
Region: STATE
Facility Status: Completed - Case Closed
Status Date: 11/23/2011
Global Id: T10000003349
Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 06S1W16L01s
Latitude: 37.406949
Longitude: -121.979764
Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: Not reported
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: The elevator piston failed sometime in 2010. It is estimated that 50-60 gallons of hydraulic fluid was lost. A new piston for the elevator was installed within the old casing. In 2011, a soil boring was advanced inside the building near the elevator to approximately 13 feet. Moderate staining in soil and organic odors were noted in soil during advancement of the boring and hydraulic oil appeared to be present in soil at approximately 12.1 feet and on groundwater. A soil sample collected from this boring was reported to contain TPHd (180 ppm) and TPHmo (370 ppm). Grab groundwater samples were collected from three other borings also advanced at that time outside of the building. They were reported to have a maximum concentration of 100 ppb TPHd and 82 ppb TPHmo. Limited extent under the building.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Program: Sunnyvale Department of Public Safety
Violation Source: HMRRP
CERS,

Site ID: 156813
Site Name: Stanford Research Systems, Inc.
Violation Date: 04-08-2021
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Returned to compliance on 05/05/2021. Solder waste is not collected at the point of generation and disposed of as hazardous waste. - Throughout facility. Collect solder waste in a container that is properly labeled as a hazardous waste and closed when not in use.

regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Returned to compliance on 05/05/2021. Solder waste is not collected at the point of generation and disposed of as hazardous waste. - Throughout facility.

Hazardous Waste Summary:

Waste Code: D001

Waste Description: IGNITABLE WASTE

Waste Code: D002

Waste Description: CORROSIVE WASTE

Waste Code: D003

Waste Description: REACTIVE WASTE

Waste Code: D007

Waste Description: CHROMIUM

Waste Code: D008

Waste Description: LEAD

Waste Code: D011

Waste Description: SILVER

Waste Code: D035

Waste Description: METHYL ETHYL KETONE

Waste Code: D039

Waste Description: TETRACHLOROETHYLENE

Waste Code: F003

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U002

Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U123

Waste Description: FORMIC ACID (C,T)

Waste Code: U154

Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Site History: chloride, Xylene
Sobrato Development (Sobrato) - RP for former WMI - conducted groundwater extraction and treatment (GWET) at the site until 2003 when asymptotic chlorinated VOC levels were achieved. Based on a successful subsequent enhanced reductive dechlorination (ERD) pilot study, Sobrato proceeded with a full-scale ERD injection program that has been at least partially successful in reducing the CVOC levels in groundwater. The Regional Water Board issued closure for on-site vapor intrusion concerns in 2006. With elevated CVOC levels in the downgradient well P5 and off-site groundwater data gaps, however, Sobrato also evaluated the adjacent off-property building to verify that IA-CVOC levels were below levels of concern. Adjacent sites overseen by the Water Board include the upgradient Lockheed-Martin site to the south and cross-gradient Intersil-Hammerwood site to the west. A slurry wall separates the subject site and Intersil-Hammerwood who installed the wall as part of the Permeable Reaction Barrier at the north end of that site. With the PRB functioning as intended, the downgradient off-site groundwater impacts at well P5 appear to be originating from the subject site.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.

Primary Waste: CNWTRS
Waste Type2: Not reported
Waste2: Contaminated Ground Water
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Status Date: 02/14/2017
Global Id: SL18285706
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: Not reported
Latitude: 37.407187317016
Longitude: -121.989140510559
Case Type: Cleanup Program Site
Case Worker: RWP
Local Agency: SANTA CLARA VALLEY WATER DISTRICT
RB Case Number: 43S0808
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride

Site History: This site is south of and adjacent to the former Western Microwave site and southeast of former Intersil-Hammerwood. GWET has reduced chlorinated VOC (CVOC) levels in groundwater 100 to 400 ppb down to 50 to 200 ppb and appears to have been in an asymptotic mode for at least a year. However, prior soil analytical from a sump removal activities in the 1990s indicated potential vadose-zone source under the northeastern corner of the building. Lockheed-Martin conducted a voluntary vapor intrusion (VI) assessment that revealed elevated CVOC levels in the soil gas but no detection of the CVOC of concern (vinyl chloride) in the indoor air. Subsequent indoor air testing indicated that CVOC levels in the breathing zone were on the same order of magnitude as the outside/ambient air.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: Approximately of 7,410 gallons of contaminated liquid and 10,280 pounds of contaminated soil were removed from the site. The site was referred to the RWQCB subsequent to the removal action for the investigation of suspected groundwater contamination. Based on this referral, the site is "decertified" and the previous cert is considered a removal action.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Discovery

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl

MAP FINDINGS

SCR-INTERSIL-1276 HAMMERW (Continued)

S100937460

Site History: chloride
 Installation of the Permeable Reactive Barrier (PRB) in the mid-1990s effectively remediates all groundwater passing through the PRB to levels approaching or below MCLs. During the vapor intrusion investigative review process, RWB conducted a record review that indicated no sidewall samples were collected from around the former UST.. When the consultant reported a substantial vinyl chloride spike exceeding 2,000 parts per billion (ppb) upgradient of the PRB, Regional Water Board (RWB) staff soon thereafter required additional groundwater sampling from wells close to the building, revealing that one of the wells exceeded our groundwater environmental screening levels (ESLs) for potential vapor intrusion. Based on the ESL exceedance, we required a vapor intrusion investigation that revealed vinyl chloride (VC) and trichloroethene (TCE) in soil gas respectively exceeding our soil gas ESLs by factors of 60 and 8. Additional soil gas testing confirmed those results, leading to sub-slab soil vapor sampling that indicated sub-slab TCE exceeded our ESLs. RWB subsequently required submittal of a workplan for a sub-slab depressurization system (SSDS) and approved the SSDS workplan in May 2009.
