January 18, 2024

LEAD AGENCY: **Camptonville Community Services District**
15333 Cleveland Avenue
Camptonville, California 95922

PROJECT TITLE: Campbell Gulch Diversion Reconstruction Project

PROJECT LOCATION: The Proposed Project is located on District property located north of and adjacent to 16193 Mountain House Road, approximately 680 feet northeast of the intersection of Mountain House Road and Mackey Lane, just outside of the limits of the community of Camptonville with the Project site totaling 1.86 acres.

PROJECT DESCRIPTION:

The Project consists of emergency repair work to remove the existing diversion structure; construction of a new cast-in-place concrete spillway intake structure with screening to prevent the intake of vegetative growth, excess leafy debris, or ice; removal of an existing exposed conveyance pipeline within the creek bed approximately 650 feet downstream of the diversion; and installation of 60' linear feet of a 6" PVC conveyance pipeline at a minimum depth of 5 feet below the streambed of Campbell Gulch where the old pipeline is removed. The new pipeline will be installed by trenching through Campbell Gulch. A dewatering plan is proposed to divert flows from Campbell Gulch prior to the in-stream construction activities at the diversion structure and pipeline replacement locations. Additionally, improvements to the site access road are proposed to provide a safe, reliable route to the new diversion structure.
