

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: City of Redding Pump Station 1 Replacement Project

Lead Agency: City of Redding

Contact Name: Amber Kelley

Email: akelley@cityofredding.org Phone Number: 530-225-4046

Project Location: Redding , Shasta
City County

Project Description (Proposed actions, location, and/or consequences).

The City of Redding is proposing to replace the existing Pump Station 1, on the Sacramento River, with a new fish screened intake and pumping plant, which would be located approximately 1,400 feet upstream of the existing pump station as well as the restoration of Jenny Creek to an open channel. The objectives of this project are to improve the fish screens, increase intake capacity, update the design and service standards, and restore habitat along Jenny Creek. The new pump station would consist of five 900-horsepower vertical turbine pumps with electric motors, an electrical room, and a staff restroom within an approximately 4,000-square-foot pump station building. The new screened intake structure would entail two cylindrical fish screens that would be electrically operated 42-inch-diameter by 60-inch-long rotating drum wedge wire screen to accommodate a capacity of up to 42 million gallons per day. Additionally, a new access road from Overhill Drive to the Sacramento River Trail would be constructed along an existing pedestrian trail for access to the project site.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The majority of the potentially significant impacts can be mitigated to a less than significant level by implementing mitigation measures proposed in the Draft EIR, with the exception of the temporary increase in ambient noise levels due to construction activities. All other environmental effects would be less than significant or would not create an adverse effect.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no known controversial issues.

Provide a list of the responsible or trustee agencies for the project.

California Department of Fish and Wildlife
Central Valley Regional Water Quality Control Board - Region 5, Redding
U.S. Army Corps of Engineers
California State Lands Commission
Central Valley Flood Protection Board
Bureau of Reclamation
