Project Description: *(please use a separate page if necessary)*

The City of Redding is proposing to replace the existing Pump Station 1, on the Sacramento River, with a new fish screened intake and pumping plant, which would be located approximately 1,400 feet upstream of the existing pump station as well as the restoration of Jenny Creek to an open channel. The objectives of this project are to improve the fish screens, increase intake capacity, update the design and service standards, and restore habitat along Jenny Creek. The new pump station would consist of five 900-horsepower vertical turbine pumps with electric motors, an electrical room, and a staff restroom within an approximately 4,000-square-foot pump station building. The new screened intake structure would entail two cylindrical fish screens that would be electrically operated 42-inch-diameter by 60-inch-long rotating drum wedge wire screen to accommodate a capacity of up to 42 million gallons per day. Additionally, a new access road from Overhill Drive to the Sacramento River Trail would be constructed along an existing pedestrian trail for access to the project site.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
