Project Title: Highway Safety Improvement Projects
HSIPSL-5441 (081)
Overnight Intersection Visibility Systemic Improvements

Project Locations: Citywide.

Description of Nature, Purpose, and Beneficiaries: See attached project description

Public Agency Approving Project: City of Moreno Valley

Name of Person or Agency Carrying Out Project: City of Moreno Valley

This is to advise that the City of Moreno Valley has approved the above-described projects on January 31, 2024, and has made the determination that the project is exempt because:

Exempt Status (check one):

- Ministerial (§ 21080 (b) (1); § 15268)
- Declared Emergency (§ 21080 (b) (3); § 15269(a))
- Emergency Project (§ 21080 (B) (4); § 15269(b) (c))
- Categorical Exemption: Class 1: Minor Alteration of Existing Public Structures; addition of safety or health protection devices for use in conjunction with existing facilities (CEQA Guidelines § 15301(f))**
- Statutory Exemption (§ _____)

Reason(s) why the project is exempt: The project would install additional intersection lighting, new traffic signal vehicle heads with retroreflective backplates, and advance stop bars with upgraded high visibility crosswalk markings at 15 signalized intersections throughout the City. These safety enhancements will be implemented at intersections on high-speed roads that have a history of nighttime collisions. No ground disturbance, new traffic lanes, or construction of new structures would be required to implement the project.

Lead Agency Contact Person: Guadalupe Cortes, EIT, MSEM, Associate Engineer

Signature: 

Date: 02/01/2024

Project Description:

Description: The purpose of this project is to improve traffic safety throughout the City by implementing traffic signal upgrades including installation of additional intersection lighting, new traffic signal vehicle heads with retroreflective backplates, and advance stop bars with upgraded high visibility crosswalk markings at 15 signalized intersections throughout the City. These safety enhancements will be implemented at intersections on high-speed roads that have a history of nighttime collisions. All of the traffic signal upgrades will increase traffic signal safety and reduce broadside and rear-end collisions, and reduce pedestrian and bicyclist involved collisions.

Project plans and specifications are available for review at the City of Moreno Valley, Public Works Department, 14177 Frederick St., Moreno Valley, CA 92552. See Vicinity Map below.

Setting: The project locations are urban intersections in a developed area. There is no natural habitat within or immediately adjacent to the project locations.

Beneficiaries: Residents and visitors to the City will benefit from improved intersection safety associated with enhanced intersection, crosswalk, and signal visibility.
