PROJECT DESCRIPTION:

The proposed project is for the construction of a new seven-story, 77-foot 4 3/4-inch tall multi-family residential building with 89 dwelling units, consisting of 18 Moderate-Income units, 70 Low-Income units, and 1 market rate manager's unit. The project will have a total floor area of approximately 90,447 square feet and a Floor Area Ratio of 4.95:1. There are no protected tree or shrub species. There is one (1) existing Street Tree on the site that will be removed. The project is proposing the planting of 19 trees on-site and four (4) Street Trees for a total of 23 new trees. The project assumes a worst-case scenario of removing all street trees, in the event of changes to the right-of-way improvement plans after approval of the environmental clearance. However, this environmental analysis does not authorize the removal of any street trees without prior approval of Urban Forestry, in compliance with LAMC Sections 62.169 and 62.170 and their applicable findings.
