# 1.0 INTRODUCTION

---

## 1.1 OVERVIEW

This document includes an Initial Study (IS) and Proposed Negative Declaration (ND), prepared pursuant to the California Environmental Quality Act (CEQA) for the Magnolia Science Academy Project (Project). In accordance with Section 15070(a) of the CEQA Guidelines, a proposed ND may be prepared for a project when an IS shows that there is no substantial evidence, in light of the whole record before the agency conducting the environmental review, that the project may have a significant effect on the environment. This ND has been prepared in accordance with CEQA, (Public Resources Code [PRC] §21000 et seq.), and the CEQA Guidelines (Title 14, California Code of Regulations, §15000 et seq.).

Magnolia Educational & Research Foundation dba Magnolia Public Schools (MPS) uses the Environmental Checklist Form in Appendix G of the CEQA Guidelines. Based on the information and analysis provided in the Initial Study, MPS has determined the Project will not have a significant effect on the environment.

## 1.2 LEAD AGENCY

The Lead Agency is the public agency with primary responsibility over a proposed project. In accordance with CEQA Guidelines Section 15051(b)(1), “the Lead Agency will normally be the agency with general governmental powers, such as a city or county, rather than an agency with a single or limited purpose.” Based on these criteria, MPS is the Lead Agency.

## 1.3 ORGANIZATION OF THE INITIAL STUDY AND PROPOSED NEGATIVE DECLARATION

This Initial Study and ND document contains the following sections and supporting studies:

- **Section 1.0: Introduction** identifies the purpose and scope of the IS/ND and the terminology used in the report.
- **Section 2.0: Project Information** provides an overview of the Project and the environmental determination.
- **Section 3.0: Project Description** identifies the location, background, and planning objectives of the proposed Project in detail.
- **Section 4.0: Environmental Checklist and Evaluation** presents information, analysis, and evaluation for each topic in the environmental checklist form.
- **Section 5.0: References** identifies all printed references and individuals cited in this IS/ND.

## 2.0 PROJECT INFORMATION

<b>1. PROJECT TITLE</b>	Magnolia Science Academy 5 Project
<b>2. PROJECT LOCATION</b>	7111 Winnetka Avenue
<b>3. PROJECT SPONSOR’S NAME AND ADDRESS</b>	Manolia Public Schools 250 E. 1 <sup>st</sup> Street, Suite 1500 Los Angeles, CA 90012
<b>4. GENERAL PLAN DESIGNATION</b>	Community Commercial
<b>5. ZONING</b>	ZI-2358 River Implementation Overlay District (RIO)
<b>6. DESCRIPTION OF PROJECT</b>	The proposed development includes removal of the existing single story office building to construct the Magnolia Science Academy (School) consisting of a total of 457 students (297 students middle school, 100 students 6 <sup>th</sup> grade, and 160 students high school) up to 17 classrooms within a 2-story building, a playfield, gymnasium and 54 parking spaces.
<b>7. SURROUNDING LAND USES AND SETTING:</b>	The Project site is bounded by Winnetka Avenue to the east and Gault Street to the south. The parcels to the south and west along Gault Street are zoned RS-1-RIO “Suburban Zone” and contain single-family residential uses. The parcels to the east across Winnetka Avenue are zoned RA-1-RIO “Suburban Zone” and contain the Valor Montessori Prep School. The parcels to the southeast across Winnetka Avenue are zoned R1-1-RIO “One-Family Zone” and contain single-family residential uses. The parcels to the north are zoned C2-1VL-RIO “Commercial Zone” and contain commercial uses.
<b>8. OTHER PUBLIC AGENCIES WHOSE APPROVAL MAY BE REQUIRED (E.G., PERMITS, FINANCING APPROVAL, OR PARTICIPATION AGREEMENT):</b>	N/A
<b>9. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:</b>	The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a “potentially significant impact” or “Less than Significant with Mitigation Incorporated” as indicated by the checklist on the following pages:

10. DETERMINATION

(TO BE COMPLETED BY THE LEAD AGENCY)

|---|--|---|
| <input type="checkbox"/> Aesthetics                       | <input type="checkbox"/> Greenhouse Gas Emissions      | <input type="checkbox"/> Public Services                    |
| <input type="checkbox"/> Agriculture & Forestry Resources | <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Recreation                         |
| <input type="checkbox"/> Air Quality                      | <input type="checkbox"/> Hydrology / Water Quality     | <input type="checkbox"/> Transportation                     |
| <input type="checkbox"/> Biological Resources             | <input type="checkbox"/> Land Use / Planning           | <input type="checkbox"/> Tribal Cultural Resources          |
| <input type="checkbox"/> Cultural Resources               | <input type="checkbox"/> Mineral Resources             | <input type="checkbox"/> Utilities / Service Systems        |
| <input type="checkbox"/> Energy                           | <input type="checkbox"/> Noise                         | <input type="checkbox"/> Wildfire                           |
| <input type="checkbox"/> Geology / Soils                  | <input type="checkbox"/> Population / Housing          | <input type="checkbox"/> Mandatory Findings of Significance |

On the basis of this initial evaluation:

- I find that the proposed Project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- I find that although the proposed Project could have a significant effect on the environment, there will not be a significant effect in this case because revisions on the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- I find the proposed Project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- I find the proposed Project MAY have a “potentially significant impact” or “potentially significant unless mitigated” impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed Project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed Project, nothing further is required.

## 3.0 PROJECT DESCRIPTION

---

### 3.1 Project Overview

The Project site is located at 7111 Winnetka Avenue within the Canoga Park neighborhood in the City of Los Angeles, as shown in **Figure 3.1: Project Site Location**. The 1.74-acre parcel (APN: 2135-038-016) is currently developed with a vacant single-story office building occupied by various medical offices including dental and orthodontics, magnetic resonance imaging (MRI), acupuncture, and an ambulance company. The Project site is bounded by Winnetka Avenue to the east and Gault Street to the south. The proposed development includes removal of the existing single story office building to construct the Magnolia Science Academy (School) consisting of a total of 457 students (297 students middle school, 100 students 6<sup>th</sup> grade, and 160 students high school) up to 17 classrooms within a 2-story building, a playfield, gymnasium, and 54 parking spaces.

### 3.2 Project Features

The Project consists of a new two-story charter school with 457 students (297 students middle school, 100 students 6<sup>th</sup> grade, and 160 students high school) up to 17 classrooms, a playfield on the northern portion of the site, gymnasium on the southern portion of the site adjacent to Gault Street, and 54 parking spaces on the western portion of the site.

The Project proposes 54 parking spaces of which 4 electric vehicle (EV) ready stalls (two of which are accessible) and 6 EV capable would be provided. Access to the Project site would be provided via a one-way entry from the north side of Gault Street and one way exit from the west side of Winnetka Avenue, as seen in **Figure 3.2: Site Plan**. An 8-foot-wide drive aisle with barrier on-site drop-off/pick-up zone is proposed along the exit driveway. By positioning the driveways near the outer boundary of the site, traffic and pedestrian movement at the Winnetka Avenue and Gault Street intersection would be facilitated with fewer driveway interactions. The Project would also provide 10 bicycle parking spaces in accordance to Division of State Architect (DSA) requirements.

### 3.3 General Plan and Zoning

Based on the City's General Plan, the Project site is designated as Community Commercial and zoned ZI-2358 River Implementation Overlay District (RIO). The Community Commercial designation is intended to provide pedestrian-oriented, high activity, multi- and mixed-use centers that support and provide identity to communities. More specifically, Policy 3.9.2 encourages the integration of school classrooms, libraries, and similar educational and cultural facilities within commercial, office and mixed commercial-residential structures.

### 3.4 Construction and Phasing

Project construction is assumed to occur over an approximately 19-month period between January 2024 through July 2025. Construction activities involve five (5) phases, including: (1) demolition of

approximately 21,000 square feet of existing uses; (2) grading (balanced site); (3) building construction; (4) paving; and (5) architectural coating.

### **3.5 Operational Characteristics**

Access to the Project site would be provided via a one-way entry from the north side of Gault Street and one way exit from the west side of Winnetka Avenue. An 8-foot-wide drive aisle with barrier on-site drop-off/pick-up zone is proposed along the exit driveway.

## 4.0 ENVIRONMENTAL CHECKLIST AND EVALUATION

### 4.1 AESTHETICS

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>AESTHETICS - Would the project:</b>				
a. Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a State scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. In non-urbanized areas, substantially degrade the site's existing visual character or quality of public views and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Discussion

#### a. Have a substantial adverse effect on a scenic vista?

**No Impact.** A significant impact regarding a scenic vista could occur if the Project were to introduce incompatible visual elements within a field of view containing a scenic vista or substantially blocked views of a scenic vista.

Under CEQA, a scenic vista is defined as a viewpoint that provides expansive views of a highly valued landscape for the benefit of the general public. The Project site is located in the Canoga Park-Winnetka-Woodland Hills-West Hills Community Plan Area in the southwest portion of the San Fernando Valley in the City of Los Angeles.<sup>1</sup> The valley is framed by the Santa Susana Mountains to the northwest, San Gabriel Mountains to the northeast, Verdugo Mountains to the east, the Santa Monica Mountains to the

1 City of Los Angeles. "Canoga Park-Winnetka-Woodland Hills-West Hills Community Plan." *City of Los Angeles General Plan*. [https://planning.lacity.org/odocument/c2a26cca-955f-42ee-8eeb-332f05286c78/Canoga\\_Park-Winnetka-Woodland\\_Hills-West\\_Hills\\_Community\\_Plan.pdf](https://planning.lacity.org/odocument/c2a26cca-955f-42ee-8eeb-332f05286c78/Canoga_Park-Winnetka-Woodland_Hills-West_Hills_Community_Plan.pdf). Accessed November 2023.

south, and the Simi Hills to the west. Areas that could benefit from sensitive treatment of the land include: the Santa Monica Mountains and the open space portion of Pierce College.<sup>2</sup>

The existing visual character of the surrounding area is highly urban and the Project site is not located on or near any scenic vistas that would be impeded. Development of the Project would not affect existing views as the construction of the school would comply with current zoning requirements.<sup>3</sup> No impacts would occur and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a State scenic highway?**

**No Impact.** A significant impact would occur only if scenic resources would be damaged or removed by a project, such as a tree, rock outcropping, or historic building within a designated scenic highway. California Department of Transportation (Caltrans) identifies two roadways in the San Fernando Valley with portions that are designated as Eligible Scenic Highways.<sup>4</sup> The portions of U.S. Route 101 designated as Eligible are located approximately 2.7 miles southwest of the Project site, and the portions of California State Route 118 designated as Eligible are located approximately 5.2 miles north of the Project site. These scenic highways are not located within the immediate vicinity of the Project site. Additionally, there are no identified scenic resources such as rock outcroppings or historic buildings located on-site. The building has not been identified as requiring Historic Preservation Review. No impacts would occur and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**c. In non-urbanized areas, substantially degrade the site's existing visual character or quality of public views and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?**

**No Impact.** A significant impact would occur if the proposed Project would substantially degrade the existing visual character or quality of the site and its surroundings. Significant impacts to the visual character of the site and its surroundings are generally based on the removal of features with aesthetic value, the introduction of contrasting urban features into a local area, and the degree to which the

Accessed November 2023.

4 California Department of Transportation. "Scenic Highways." <https://dot.ca.gov/programs/design/lap-landscape-architecture-and-community-livability/lap-liv-i-scenic-highways>. Accessed November 2023.

elements of the proposed project detract from the visual character of an area. The Project will not change the visual character of its surroundings.

The Project site is located in a highly urbanized area surrounded by a mix of multi-family residential uses and community commercial uses to the north, including 3- and 4-story buildings, single family residential to the west and south, and community commercial and single family residential to the east. The Project site is zoned RAS4-1VL-RIO and permits “Community Commercial” land uses, including schools as proposed by the Project. The proposed Project would include a 2-story school building with up to 17 classrooms, a playfield, gymnasium, and 54 parking spaces. Additionally, the RAS4-1VL-RIO zone has development standards, including required yards for the front, side, and rear of the building, as well as a minimum area, which would also be adhered to by the Project design. The RAS4-1VL-RIO does not contain a maximum height limit.<sup>5</sup> Therefore, the proposed Project would not conflict with applicable zoning or regulations governing scenic quality. No impacts would occur, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**d. Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?**

**Less than Significant Impact.** A significant impact would occur if light and glare substantially altered the character of off-site areas surrounding the site or interfered with the performance of an off-site activity. Light impacts are typically associated with the use of artificial light during the evening and night-time hours. Glare may be a daytime occurrence caused by the reflection of sunlight or artificial light from highly polished surfaces, such as window glass and reflective cladding materials, and may interfere with the safe operation of a motor vehicle on adjacent streets. Daytime glare is common in urban areas and is typically associated with mid- to high-rise buildings with exterior façades largely or entirely comprised of highly reflective glass or mirror-like materials. Nighttime glare is primarily associated with bright point-source lighting that contrasts with existing low ambient light conditions. Due to the urbanized nature of the area, a moderate level of ambient nighttime light already exists. Nighttime lighting sources include streetlights, vehicle headlights, and interior and exterior building illumination. Currently, the Project site consists of a single story office building surrounded by associated parking. The existing approximately 21,000 square foot building would be demolished and removed from the Project site.

The Project site is located in the City’s River Improvement Overlay District (RIO), which contains regulations for exterior site lighting.<sup>6</sup> Ordinance Number 183145 amends Los Angeles Municipal Code

#### 4.0 Environmental Checklist and Evaluation

(LAMC) sections 12.03, 12.04, 12.32, and 13.17. The ordinance establishes lighting standards for the design, placement, and operation of outdoor lighting.<sup>7</sup> Adherence to the development regulations within the Ordinance requires that building mounted lighting shall be designed such that it produces a maximum initial luminance value greater than 0.20 horizontal and vertical foot candles at the boundary, and no greater than 0.01 horizontal foot candles 15 feet beyond the Project site. The proposed Project would be constructed to meet development regulations and guidelines per the City's Ordinance 183145. As such, impacts would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

## 4.2 AGRICULTURE AND FORESTRY RESOURCES

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>AGRICULTURE AND FORESTRY RESOURCES - Would the project:</b>				
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Result in the loss of forestland or conversion of forestland to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Involve other changes in the existing environment which, due to their location or nature could result in conversion of Farmland, to nonagricultural use or conversion of forestland to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

### Discussion

#### a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?

**No Impact.** A significant impact would occur if the proposed Project would convert valued farmland to non-agricultural uses. The Project site is currently developed as a single-story office building occupied by various medical offices. No agricultural uses or operations occur on-site or in the vicinity of the Project site. The Project site is currently designated as Community-Commercial and zoned as Multiple Family Residential (RAS4).<sup>8</sup>

According to the Department of Conservation, the Project site and surrounding area designated as “Urban and Built-Up Land,” and are not located within an area designated as Prime Farmland, Unique Farmland,

<sup>8</sup> City of Los Angeles, Department of City Planning. “Informational Maps.” *Canoga Park - Winnetka - Woodland Hills - West Hills Community Plan*.

or Farmland of Statewide Importance.<sup>9</sup> The Project would not convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance to another use. No impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

**b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?**

**No Impact.** A significant impact would occur if the proposed Project conflicted with existing agricultural zoning or agricultural parcels enrolled under the Williamson Act. As mentioned previously, the Project site is currently designated as Community-Commercial and zoned as Multiple Family Residential (RAS4). No portion of the Project site and surrounding uses includes any agricultural zoning or uses, nor are any proposed for the site. Additionally, the Project site is currently not under a Williamson Act contract. The Project would therefore not conflict with any existing agricultural zoning designations, nor affect any existing Williamson Act Contracts. No impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

**c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?**

**No Impact.** A significant impact would occur if the proposed Project conflicted with existing zoning or caused rezoning of forest land or timberland, or resulted in the loss of forest land, or in the conversion of forest land to non-forest use. As mentioned previously, the Project site is located on a previously developed parcel currently designated as Community-Commercial and zoned as Multiple Family Residential (RAS4). The Project site does not include any forest land or timberland. Therefore, the Project would not conflict with the existing zoning of the site for forestland, nor would it cause the rezoning of forest land, timberland, or timberland zoned “Timberland Production.” No impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

**d. Result in the loss of forestland or conversion of forestland to non-forest use?**

**No Impact.** A significant impact would occur if the proposed Project resulted in the loss of forest land or in the conversion of forest land to non-forest use. The Project site is located on a previously developed parcel and does not include any forest land or timberland. Therefore, the Project would not result in the loss or conversion of forest land to non-forest use. No impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

---

9 California Department of Conservation (DOC). “California Important Farmland Finder.” <https://maps.conservation.ca.gov/DLRP/CIFF/>. Accessed November 2023.

**e. Involve other changes in the existing environment which, due to their location or nature could result in conversion of Farmland, to nonagricultural use or conversion of forestland to non-forest use?**

**No Impact.** A significant impact would occur if the proposed Project caused the conversion of farmland to non-agricultural use. The Project site is located on a previously developed parcel and no identified agricultural uses, designated Farmland, or forest land uses occur at the Project site or within the surrounding area. As such, the Project would not result in the conversion of farmland to nonagricultural uses. No impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

### 4.3 AIR QUALITY

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>AIR QUALITY - Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:</b>				
a. Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under an applicable federal or State ambient air quality standard?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

The following section summarizes and incorporates by reference information from the Air Quality/Greenhouse Gas study prepared by Meridian Consultants dated November 2023 on behalf of the Applicant. The Air Quality/Greenhouse Gas Study is included as **Appendix A** of this IS/ND.

### Discussion

#### a. Conflict with or obstruct implementation of the applicable air quality plan?

**Less than Significant Impact.** A significant impact would occur if the proposed Project is deemed inconsistent with air quality plans such as if it would result in population and/or employment growth that exceeds growth estimates in the Air Quality Management Plan (AQMP).

The Project site is located within the South Coast Air Basin (SCAB) and is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SCAQMD and the Southern California Association of Governments (SCAG) are responsible for preparing the AQMP, which addresses federal and State Clean Air Act (CAA) requirements.

The SCAQMD CEQA Air Quality Handbook describes two criteria indicators used for purposes of analyzing consistency with the AQMP. Consistency Criterion No. 1 states if a proposed project would result in growth that is substantially greater than what was anticipated, then the proposed project would conflict with the AQMP. On the other hand, if a project’s density is within the anticipated growth of a jurisdiction, its emissions would be consistent with the assumptions in the AQMP, and the project would not conflict with SCAQMD’s attainment plans. Consistency Criterion No. 2 states that a project is consistent with the

## 4.0 Environmental Checklist and Evaluation

AQMP if the project would not result in an increase in the frequency or severity of existing air quality violations or cause a new violation.

The SCAB is currently designated as nonattainment for federal ozone standards and State and federal particulate matter standards. SCAQMD developed regional emissions thresholds to determine whether a project would contribute to air pollutant violations. If a project exceeds the regional air pollutant thresholds, then it would significantly contribute to air quality violations in the Air Basin. As discussed further in **Table 4.3-1** below, temporary emissions associated with construction of the Project would not exceed regional construction thresholds. Additionally, as discussed further in **Table 4.3-2** below, long-term emissions associated with operation would not exceed regional operational thresholds. As such, the Project is consistent with the growth assumptions in the regional air plan, would not contribute to air quality violations in the Air Basin and would be consistent with the AQMP for the first criterion.

SCAG has the responsibility for preparing and approving the portion of the AQMP relating to regional demographic projections and integrated regional land use, housing, employment, and transportation programs, measures, and strategies. With respect to determination of consistency with AQMP growth assumptions, the projections in the AQMP for achieving air quality goals are based on assumptions in SCAG's Connect SoCal RTP/SCS regarding population, housing, and growth trends. With regard to air quality planning, SCAG has prepared and adopted Connect SoCal 2020-2045 RTP/SCS. Determining whether or not a project exceeds SCAG's growth forecasts involves the evaluation of the following: (1) consistency with applicable population, housing, and employment growth projections; (2) project mitigation measures; and (3) appropriate incorporation of AQMP land use planning strategies. As discussed in **Section 4.11: Land Use and Planning**, the Project would conform to objectives outlined in the City of Los Angeles General Plan. The 2020 - 2045 RTP/SCS provides socioeconomic forecast projections of regional population growth. These growth forecasts are based on local plans and policies applicable to the specific area. As discussed in **Section 4.14: Population and Housing**, the City had an estimated employment population of 1,848,300 in 2016 and is projected to have an employment population of 2,135,900 in 2045.<sup>10</sup> The addition of approximately 60 faculty and staff would be less than 0.01 percent of SCAG's employment forecast for the City.<sup>11</sup> While the proposed use would provide new employment opportunities, the proposed use is not considered a unique use that would draw substantial new residents to the area to fulfill jobs. The Project would be consistent with the AQMP for the second criterion and would not exceed the growth assumptions in the AQMP. As such, impacts would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

**b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under an applicable federal or State ambient air quality standard?**

**Less than Significant Impact.** A significant impact could occur if the Project would add a considerable cumulative contribution to federal or State nonattainment pollutants. As discussed previously, the Basin is currently designated as nonattainment for federal ozone standards and State and federal particulate matter standards.

In regard to determining the significance of the Project contribution, the SCAQMD neither recommends quantified analyses of construction and/or operational emissions from multiple related projects nor provides methodologies or thresholds of significance to be used to assess the cumulative emissions generated by multiple cumulative projects. Instead, the SCAQMD recommends that a project's potential contribution to cumulative impacts be assessed utilizing the same significance criteria as those for project-specific impacts. Furthermore, SCAQMD states that "projects that do not exceed the project-specific thresholds are generally not considered to be cumulatively significant."<sup>12</sup> Therefore, if a project generates less than significant construction or operational emissions, then the project would not generate a cumulatively considerable increase in emissions for those pollutants for which the Basin is in nonattainment.

## Construction

With respect to the Project's construction-period air quality emissions and cumulative Basin-wide conditions, the SCAQMD has developed strategies (e.g., SCAQMD Rule 403) to reduce criteria pollutant emissions outlined in the AQMP pursuant to National Ambient Air Quality Standards (NAAQS). As such, the Project would comply with SCAQMD Rule 403 requirements and implement all feasible mitigation measures to reduce potential impacts related to particulate matter and fugitive dust. In addition, the Project would comply with adopted AQMP emissions control measures as described below. Per SCAQMD rules and mandates, as well as the CEQA requirement that significant impacts be mitigated to the extent feasible, these same requirements (i.e., SCAQMD Rule 403 compliance, the implementation of all feasible mitigation measures, and compliance with adopted AQMP emissions control measures) would also be imposed on construction projects Basin-wide, where applicable.

According to the SCAQMD, individual construction projects that exceed the SCAQMD's recommended daily thresholds for project-specific impacts would cause a cumulatively considerable increase in emissions for those pollutants for which the Basin is in nonattainment. Construction of the Project has the potential to create air quality impacts through the use of heavy-duty construction equipment and through vehicle trips generated from construction workers to and from the Project site. In addition, fugitive dust emissions would result from construction activities. NO<sub>x</sub> emissions would result from the use of offroad

---

12 South Coast Air Quality Management District (SCAQMD). "Appendix A." *White Paper on Potential Control Strategies to Address Cumulative Impacts from Air Pollution*. 2003.

## 4.0 Environmental Checklist and Evaluation

construction equipment. Paving and the application of architectural coatings (e.g. paints) would potentially release VOCs.

Construction emissions were estimated according to the SCAQMD CEQA Air Quality Handbook and construction emission factors contained in the California Emissions Estimator Model (CalEEMod version 2022.1.1.13). This model takes into account the latest Title 24 building and energy standards. The emission calculations assume the use of standard construction practices, such as compliance with SCAQMD Rule 403—Fugitive Dust, which requires all unpaved demolition and construction areas to be wetted at least three times a day during excavation and construction to minimize the generation of fugitive dust. In addition, SCAQMD Rule 1403 - Asbestos emissions from demolition/renovation activities, specifies work practice requirements to limit asbestos emissions from building demolition and renovation activities.

Construction would occur over five (5) phases: (1) demolition, (2) grading, (3) building construction, (4) paving, and (5) architectural coating. Each phase of construction would result in varying levels of intensity and a number of construction personnel. The construction workforce would consist of approximately 13 worker trips per day and 12 hauling trips per day during demolition, 10 worker trips per day during grading, 24 worker trips per day and 9 vendor trips per day during building construction, 13 worker trips per day during paving, and 5 worker trips per day during architectural coating. **Table 4.3-1: Maximum Construction Emissions** identifies maximum daily emissions that are estimated for peak construction days for each construction year. As shown, construction emissions associated with the Project would not exceed SCAQMD regional thresholds. As such, impacts related construction would be less than significant.

TABLE 4.3-1 MAXIMUM CONSTRUCTION EMISSIONS						
Source	VOC	NO <sub>x</sub>	CO	SO <sub>x</sub>	PM <sub>10</sub>	PM <sub>2.5</sub>
	pounds/day

Source: CalEEMod.

Refer to **Appendix A** for the Air Quality/Greenhouse Gas Study

### Operation

Operational activities associated with the Project would result in long-term emissions from area, energy, and mobile sources. Area-source emissions are based on natural gas (building heating and water heaters), landscaping equipment, and consumer product (including paint) usage rates provided in CalEEMod. Natural gas usage factors in CalEEMod are based on the California Energy Commission (CEC)'s California Commercial End Use Survey data set, which provides energy demand by building type and climate zone. Mobile source emissions are derived primarily from vehicle trips generated by the Project, such as student

drop-off/pickup and staff vehicles to and from the Project site. Vehicles traveling on paved roads would be a source of fugitive emissions due to the generation of road dust inclusive of tire wear particulates. The emission estimates for travel on paved roads were calculated using the CalEEMod model. The results presented in **Table 4.3-2: Maximum Operational Emissions** are compared to the SCAQMD-established operational significance thresholds. As shown, the operational emissions would not exceed SCAQMD's regional thresholds and would therefore not result in a cumulatively considerable net increase of any criteria pollutant. As such, operational impacts would be less than significant.

Source	VOC	NO <sub>x</sub>	CO	SO <sub>x</sub>	PM10	PM2.5

Source: CalEEMod.

Refer to Appendix A for the Air Quality/Greenhouse Gas Study

**Mitigation Measures:** No mitigation measures are required.

### **c. Expose sensitive receptors to substantial pollutant concentrations?**

**Less than Significant Impact.** The SCAQMD devised the Localized Significance Threshold (LST) methodology<sup>13</sup> to assess the potential air quality impacts would result in the vicinity of the Project. Receptors sensitive to air pollution include, but are not limited to, residences, schools, hospitals, and convalescent facilities. The nearest sensitive receptors in the vicinity of the Project site include the following:

- Single-family residential uses to south along Gault Street
- Single-family residential uses to the southeast across Winnetka Avenue
- School uses to the east across Winnetka Avenue

The LST methodology considers emissions generated from on-site sources and excludes emissions from off-site vehicular traffic. The SCAQMD provides mass rate lookup tables as a screening tool to determine the likelihood of localized impacts from Project construction and operation. Ambient conditions for West

13 SCAQMD. *Final Localized Threshold Methodology*. July 2008. <http://www.aqmd.gov/docs/default-source/ceqa/handbook/localized-significance-thresholds/final-lst-methodology-document.pdf>. Accessed July 2022.

#### 4.0 Environmental Checklist and Evaluation

San Fernando Valley, as recorded in SRA 6 by the SCAQMD, were used for ambient conditions in determining appropriate threshold levels.

The results of the construction LST analysis is provided in **Table 4.3-3: Localized Construction and Operational Emissions**. It is important to note, construction would be required to comply with the SCAQMD's Rule 403 (Fugitive Dust), which requires watering of the Project Site during dust-generating construction activities, stabilizing disturbed areas with water or chemical stabilizers, and preventing track-out dust from construction vehicles, thus further reducing construction-related emissions. Additionally, these estimates assume the maximum area that would be disturbed during construction on any given day during Project buildout. Local emissions from Project operation would include area and energy sources. Area-source emissions are based on natural gas (building heating and water heaters), landscaping equipment, and consumer product (including paint) usage rates provided in CalEEMod. Natural gas usage factors in CalEEMod are based on the CEC's California Commercial End Use Survey data set, which provides energy demand by building type and climate zone. As shown in **Table 4.3-3**, emissions would not exceed localized significance thresholds for construction and operation.

The City follows SCAQMD's guidance for air quality analysis and relies on SCAQMD thresholds. SCAQMD's CEQA guidelines for evaluating construction impacts do not specify a requirement for a Health Risk Assessment (HRA) to evaluate construction impacts. For construction, SCAQMD provides daily mass emissions thresholds and localized significance thresholds. As shown in **Table 4.3-1**, daily mass emissions would not exceed SCAQMD's thresholds for construction. Additionally, as shown in **Table 4.3-3**, localized daily emissions would not exceed SCAQMD thresholds for construction. Therefore, the Project would have a less than significant impact based on methodologies derived by SCAQMD for the project type.

SCAQMD requires HRA's for compliance with AB2588, SCAQMD Rule 1401 and Rule 1402, which regulate stationary emission sources. SCAQMD has also adopted guidance on the use of HRA's for analyzing mobile source emissions. However, this guidance refers to emissions associated with facilities such as truck stops and distribution centers that feature long term presence of diesel emission sources. The Project would not consist of the land use type that would emit substantial diesel particulate matter; therefore, no cancer risk assessment is required under the SCAQMD guidance.

As such, impacts related to localized emissions would be less than significant.

**TABLE 4.3-3  
LOCALIZED CONSTRUCTION AND OPERATIONAL EMISSIONS**

Source	NO <sub>x</sub>	CO	PM <sub>10</sub>	PM <sub>2.5</sub>
On-Site Emissions (pounds/day)				
<b>Construction</b>				
Total maximum emissions	16	16	3	2
LST threshold	131	576	5	4
<b>Threshold Exceeded?</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>
<b>Operational</b>				
Project area/energy emissions	<1	3	<1	<1
LST threshold	131	576	2	1
<b>Threshold Exceeded?</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>

**Notes:**

Totals in table may not appear to add exactly due to rounding in the computer model calculations.

Refer to Appendix A for Air Quality/Greenhouse Gas Study.

**Mitigation Measures:** No mitigation measures are required.

**d. Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?**

**Less than Significant Impact.** According to the SCAQMD, “while almost any source may emit objectionable odors, some land uses will be more likely to produce odors... because of their operation.”<sup>14</sup> Land uses that are more likely to produce objectionable odors, including agriculture, chemical plants, composting operations, dairies, fiberglass molding, landfills, refineries, rendering plants, rail yards, and wastewater treatment plants.

During construction, activities associated with the operation of construction equipment, the application of asphalt, and the application of architectural coatings and other interior and exterior finishes, may produce discernible odors typical of most construction sites. Although these odors could be a source of nuisance to adjacent residences, they are temporary and intermittent in nature. As construction-related emissions dissipate, the odors associated with these emissions would also decrease, dilute, and become unnoticeable. Operation of the Project includes educational use and would not contain any active manufacturing activities. Good housekeeping practices, such as the use of trash receptacles, would be sufficient to prevent nuisance odors. As such, impacts related to construction and operation would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

### 4.4 BIOLOGICAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>BIOLOGICAL RESOURCES - Would the project:</b>				
a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Have a substantial adverse effect on State or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

### Discussion

**a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?**

**Less than Significant with Mitigation Incorporated.** A project would have a significant biological impact through the loss or destruction of individuals of a species or through the degradation of sensitive habitat. “Special Animals” or “special status species” is a broad term used to refer to all the animal taxa tracked

#### 4.0 Environmental Checklist and Evaluation

by the CDFW California Natural Diversity Database (CNDDDB), regardless of their legal or protection status.<sup>15</sup> Special-status species include those listed as endangered or threatened under the federal ESA or CESA, species otherwise given certain designations by the CDFW, and plant species listed as rare by the CNPS.

The City of Los Angeles General Plan describes the local habitat rich in biodiversity, particularly within the mountain habitats.<sup>16</sup> Large mammals such as cougars, bobcats, and coyotes existing within the Santa Monica Mountain National Recreation area. Wildlife corridors have been identified in the mountains along corridors between the Simi Hills and Santa Monica Mountains and the Santa Monica Mountains and the Verdugo and San Gabriel Mountains.<sup>17</sup> Given the urbanized nature of the Project area and the existing medical office building and previously disturbed land within the Project site, the likelihood of the presence of any sensitive biological resources is considered low. Also, the Project site is not located within an area designated as “Significant Ecological Area.”<sup>18</sup>

A California Natural Diversity Database(CNDDDB) search was conducted to determine if sensitive species have been identified within the Project site. The Project Site is located in the Canoga Park Quadrangle. The search identified sightings of 3 federally listed endangered species, 2 additional state listed endangered species, 2 state listed threatened species, and 1 state listed candidate endangered species as listed in **Appendix B: California Natural Diversity Database Search**. A RareFind search was performed and found that the nearest sighting of any species to the Project site is 2.8 miles to the northeast.<sup>19</sup> Therefore, the Project would not have any adverse effect, either directly or through habitat modification, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations by the CDFW or USFWS. No impacts would occur and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?**

**No Impact.** A significant impact would occur if any riparian habitat or natural community would be lost or destroyed as a result of urban development. Riparian habitats line the banks of rivers, streams, creeks, and ponds and consist of a variety of vegetation types. These habitats preserve water quality by filtering

sediment and some pollutants from runoff before it enters the water body, protect stream banks from erosion, provide food and habitat for fish and wildlife, and preserve open space and aesthetic values.

The location of the Project site is within the City boundaries where mainly developed areas exist and there are no natural lakes or river. There are no riparian habitats or corridors within the Project site or within the vicinity.<sup>20</sup> Additionally, the Project site has not been identified as a location within the extent of any species listed as candidate, sensitive, or special status by a local or regional plan, policy, or regulation.<sup>21</sup> As such, no impacts would occur to any riparian habitat or other sensitive natural community.

**Mitigation Measures:** No mitigation measures are required.

**c. Have a substantial adverse effect on State or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?**

**No Impact.** A significant impact would occur if federally protected wetlands would be modified or removed by a Project. There are three key agencies that regulate activities within inland streams, wetlands, and riparian areas in California. The Corps Regulatory Branch regulates discharge of dredge or fill materials into “waters of the United States” pursuant to Section 404 of the Clean Water Act (CWA) and Section 10 of the Rivers and Harbors Act. Of the State agencies, the CDFW regulates alterations to streambed and bank under Fish and Wildlife Code Sections 1600 et seq., and the Regional Board regulates discharges into surface waters pursuant to Section 401 of the CWA and the California Porter-Cologne Water Quality Control Act.

The USFWS National Wetlands Mapper was reviewed to determine if any blueline streams or riverine resources have been documented within or immediately surrounding the Project site. The Project site is located approximately 0.5 miles north from the nearest riverine (Los Angeles River), separated by existing development and roadways.<sup>22</sup> However, the riverine resource identified does not show any seasonally wet areas, federally protected streams or wetlands or other water bodies adjacent to the Project location. Furthermore, no drainages, stream courses, or other natural water features occur on the Project Site. As such, no impacts would occur, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or**

---

20 City of Los Angeles. “Conservation Element.” *City of Los Angeles General Plan*.

22 United States Fish and Wildlife Service (USFWS). “National Wetlands Inventory.” <https://www.fws.gov/wetlands/data/mapper.html>. Accessed November 2023.

**migratory wildlife corridors, or impede the use of native wildlife nursery sites?**

**No Impact.** A significant impact would occur if the proposed Project would interfere with, or remove access to, a migratory wildlife corridor or impede use of native wildlife nursery sites. No surface water bodies, streams or waterways occur on the Project site.

Habitat linkages provide connections between larger habitat areas that are separated by development. Wildlife corridors are similar to linkages but provide specific opportunities for animals to disperse or migrate between areas. A corridor can be defined as a linear landscape feature of sufficient width to allow animal movement between two comparatively undisturbed habitat fragments. Adequate cover is essential for a corridor to function as a wildlife movement area. It is possible for a habitat corridor to be adequate for one species yet still inadequate for others. Wildlife corridors are features that allow for the dispersal, seasonal migration, breeding, and foraging of a variety of wildlife species. Additionally, open space can provide a buffer against both human disturbance and natural fluctuations in resources. The California Essential Habitat Connectivity Project identifies remaining intact habitat or natural landscape linkages that must be maintained as wildlife corridors.

The Project site consists of a 1.74 acre parcel developed with an existing medical office building. According to the CNDDDB Bios Viewer, the Project site is not located within a California Essential Connectivity Area.<sup>23</sup> Therefore, the proposed Project would not interfere with the movement of any native wildlife species. As such, no impacts would occur, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**e. Conflict with any local policies or ordinances protecting biological resources, such as tree preservation policy or ordinance?**

**Less Than Significant Impact.** A significant impact would occur if the proposed Project would be inconsistent with local regulations pertaining to biological resources. The City's Municipal Code Section 62.171 requires a tree removal permit for anyone who wants to remove or cut any tree in or upon any street or parkway in the City. The Ordinance may require, as a condition to any permit to remove or destroy a tree, that the replacement of removed trees occur within 40 days from the issuance of the permit. The Project site contains various trees throughout the site and would obtain a tree removal permit pursuant to Section 62.171. As such, there would be no conflict with local policies or ordinances regarding tree preservation or the protection of biological resources. No impacts would occur, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

---

23 CDFW. "BIOS Viewer." <https://apps.wildlife.ca.gov/bios/>. Accessed November 2023.

**f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan?**

**No Impact.** The Project site does not support any habitat or natural community.<sup>24</sup> No Conservation Plan, Natural Community Conservation Plan, or other approved habitat conservation plans apply to the Project site.<sup>25</sup> The Project site and surrounding vicinity does not lie within the boundaries of any adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan.<sup>26</sup> No impacts would occur, and no mitigation measures required.

**Mitigation Measures:** No mitigation measures are required.

### 4.5 CULTURAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>CULTURAL RESOURCES - Would the project:</b>				
a. Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Disturb any human remains, including those interred outside of formal cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Discussion

**a. Cause a substantial adverse change in the significance of a historical resource as defined in section 15064.5?**

**No Impact.** A “historical resource” under CEQA, as defined by PRC Part 5020.1(j) is any object, building, site, area, place, record, or manuscript that is historically or archaeologically significant, or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California. Guidelines for CEQA further define a “historical resource” as any resource listed in or determined eligible for listing in the California Register of Historical Resources, included in a local register of historical resources, or determined to be historically significant by the Lead Agency. Additionally, a resource would be automatically listed in the California Register if it is listed in the National Register of Historic Places or formally determined eligible by an agency for listing in the National Register. CEQA Guidelines section 15064.5(a) defines a “historical resource” as a resource that meets one or more of the following criteria:

- Listed in, or eligible for listing in, the California Register of Historical Resources (California Register)
- Listed in a local register of historical resources (as defined at Cal. Public Res. Code § 5020.1(k))
- Identified as significant in a historical resource survey meeting the requirements of § 5024.1(g) of the Cal. Public Res. Code
- Determined to be a historical resource by a project's Lead Agency (Cal. Code Regs. tit. 14(3), § 15064.5(a))

The eligibility criteria for the California Register are similar to those of the National Register of Historic Places (National Register), and a resource that meets one of more of the eligibility criteria of the National Register will be eligible for the California Register. Criteria for Designation:

- Associated with events that have made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the U.S.

#### 4.0 Environmental Checklist and Evaluation

- Associated with the lives of persons important to local, California or national history.
- Embodies the distinctive characteristics of a type, period, region, or method of construction or represents the work of a master or possesses high artistic values.
- Has yielded or has the potential to yield, information important to the prehistory or history of the local area, California, or the nation.

The existing Project site includes a 1.74-acre parcel that has been previously developed with one existing single-story structure. There are no identified State historic resources<sup>27</sup> or federal resources<sup>28</sup> within its boundaries nor the surrounding vicinity of the Project site and has not been determined to be eligible for listing in the National Register of Historic Places. As such, there would be no potential for unearthing any unknown cultural or historic resources. No impacts would occur and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

#### **b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to section 15064.5?**

**Less Than Significant Impact.** A significant impact would occur if a known or unknown archaeological resource would be removed, altered, or destroyed as a result of the Project. Section 15064.5 of the CEQA Guidelines defines significant archaeological resources as resources that meet the criteria for historical resources or resources that constitute unique archaeological resources. CEQA Guidelines Section 15064.5(a)(3)(D) generally defines archaeological resources as any resource that “has yielded, or may be likely to yield, information important in prehistory or history.” Archaeological resources are features, such as tools, utensils, carvings, fabric, building foundations, etc., that document evidence of past human endeavors and that may be historically or culturally important to a significant earlier community.

The Project site is located within an urbanized area of the City and has been subject to grading and development in the past. Therefore, surficial archaeological resources that may have existed at one time have likely been previously disturbed. The depth and extent of grading and excavation would be minimal as construction would not include any import or export. Although no excavation activities are expected, if an archaeological resource were to be discovered during construction of the Project, work in the area would cease, and deposits would first be evaluated for historic significance in accordance with CEQA Guidelines Section 15064.5. As set forth in CEQA Guidelines Section 15064.5, if the City determines that the archaeological resource is an historical resource, it shall refer to the provisions of Section 21084.1 of the PRC. If an archaeological resource does not meet the criteria for historical resources but does

---

27 Office of Historic Preservation. “California Historical Landmarks by County.” [https://ohp.parks.ca.gov/?page\\_id=21387](https://ohp.parks.ca.gov/?page_id=21387). Accessed November 2023.

28 National Park Service (NPS). “National Register of Historic Places.” <https://www.nps.gov/maps/full.html?mapId=7ad17cc9-b808-4ff8-a2f9-a99909164466>. Accessed November 2023.

meet the definition of a unique archaeological resource, construction work in the area would cease and the resource would be treated in accordance with the provisions of Section 21083.2 of the PRC.

Therefore, given that there are no identified archaeological sites within the Project site and the available regulations governing the treatment of any uncovered archaeological resources, the Project would not cause a substantial adverse change in the significance of an archaeological resource. With the implementation of regulatory requirements, impacts to archaeological resources would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**c. Disturb any human remains, including those interred outside of formal cemeteries?**

**Less than Significant Impact.** A significant impact would occur if previously interred human remains would be disturbed during excavation of the Project site. As discussed above, the Project site is located within an urbanized area and has been subject to previous grading and development. No excavation activities are expected to occur; thus, the finding of human remains would be minimal. While no formal cemeteries, other places of human interment, or burial grounds or sites are known to occur within the Project area, there is always a possibility that human remains can be encountered during construction. In addition, if human remains were discovered during construction, work in the immediate vicinity would be halted, the County Coroner, construction manager, and other entities would be notified per California Health and Safety Code Section 7050.5, and disposition of the human remains, and any associated grave goods would occur in accordance with PRC Section 5097.91 and 5097.98. With the implementation of regulatory requirements, the Project would not disturb any human remains. Impacts related to human remains would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

## 4.6 ENERGY

Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with or obstruct a State or local plan for renewable energy or energy efficiency?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

This section analyzes the proposed Project’s potential impacts on energy resources, focusing on three energy resources: electricity, natural gas, and transportation-related energy (petroleum-based fuels). This analysis addresses both construction and operational impacts associated with the consumption of energy resources. This section evaluates the demand for energy resources attributable to the Project and determines whether the current and planned electrical, natural gas, and petroleum-based fuel supplies and distribution systems are adequate to meet the Project’s forecasted energy consumption. The information presented herein is based, in part, on the California Emissions Estimator Model (CalEEMod) outputs as calculated for **Section 4.3: Air Quality**, and **Section 4.8: Greenhouse Gas Emissions**, and on the calculations for this section as presented in **Appendix C: Energy Calculations**.

### Discussion

#### a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

**Less than Significant Impact.** A significant impact would occur if the project would substantially increase demand for energy resources, which exceeds the available supply. The Project would be constructed in accordance with all applicable laws and regulations, including applicable State and federal laws, and building regulations that are intended to promote efficient utilization of resources and minimize environmental impacts.

### Construction

During construction, energy would be consumed in the form of electricity associated with the conveyance of water used for dust control, and on a limited basis, powering lights, electronic equipment, or other construction activities necessitating electrical power. Construction activities typically do not involve the consumption of natural gas. Construction would also consume energy in the form of petroleum-based fuels associated with the use of off-road construction vehicles and equipment within the Project site, construction worker travel, haul trips, and delivery trips.

As shown in **Table 4.6-1: Summary of Energy Use During Construction** and additionally discussed below, a total of approximately 51.1 kilowatt-hours (kWh) of electricity, 51,495 gallons of diesel fuel, and 6,336 gallons of gasoline is estimated to be consumed during construction.

<b>TABLE 4.6-1 SUMMARY OF ENERGY USE DURING CONSTRUCTION</b>	
<b>Fuel Type</b>	<b>Quantity</b>
<b>Electricity</b>	
Water Conveyance	51.1 kWh
<b>Diesel</b>	
Off-Road Construction Equipment	31,072 gallons
On-Road Motor Vehicles	20,423 gallons
<b>Total</b>	<b>51,495 gallons</b>
<b>Gasoline</b>	
Off-Road Construction Equipment	0 gallons
On-Road Motor Vehicles	6,336 gallons
<b>Total</b>	<b>6,336 gallons</b>

*Refer to Appendix C: Energy Calculations*

## Electricity

Southern California Edison (SCE) provides electricity to the Project area, including residential, commercial, and industrial uses. As shown in **Table 4.6-1**, a total of approximately 51.1 kWh of electricity is anticipated to be consumed during construction. The electricity demand at any given time would vary throughout the construction period based on the construction activities being performed and would cease upon completion of construction. In 2022, the County consumed 68,485 GWh and SCE consumed 107,876 Gigawatt hours (GWh).<sup>29</sup> The Project's increased demand will be adequately served by the existing SCE electrical facilities. Total electricity demand in SCE's service areas is forecast to increase by approximately 23,000 GWh between 2019 and 2035.<sup>30</sup> The increase in electricity demand from the Project would represent an insignificant percent increase (i.e., less than a fraction of one percent) compared to overall demand in SCE's service area. Additionally, Title 24 requirements would apply to construction lighting if duration were to exceed 120 days, which includes limits on the wattage allowed per specified area for energy conservation. As such, the demand for electricity during construction would not cause wasteful, inefficient, or unnecessary use of electricity. As a result, the Project would not result in inefficient, or unnecessary consumption of electricity during construction. Accordingly, electricity demand during construction would be less than significant.

29 California Energy Commission (CEC). "California Energy Consumption Database." Accessed November 2023. <https://ecdms.energy.ca.gov/>

30 CEC. "Figure 49: Historical and Projected Baseline Consumption. SCE Planning Area." *California Energy Demand 2018 – 2030 Revised Forecast*. Accessed November 2023. <https://ecdms.energy.ca.gov/>

## Transportation Energy

Project construction would consume energy in the form of petroleum-based fuels associated with use of off-road construction vehicles and equipment on the Project site, construction worker travel to and from the Project site, and delivery and haul truck trips (e.g., for deliveries of construction supplies and materials).

The petroleum-based fuel use summary provided in **Table 4.6-1** represents the amount of transportation energy that could potentially be consumed during construction based on a conservative set of assumptions. As shown, on- and off-road vehicles would consume an estimated 57,831 gallons of petroleum (51,495 gallons of diesel and 6,336 gallons of gasoline fuel) throughout the Project's construction period. For purposes of comparison, the Energy Information Administration (EIA) forecasts a national oil supply of 17.7 million barrels (mb) per day in 2024, which is the first year of construction for the Project.<sup>31</sup> This equates to approximately 271,648 million gallons (mg) per year. Construction of the Project would account for less than 0.01 percent of the projected annual oil supply in 2024.

Due to the relatively short duration of the construction process, and the fact that the extent of fuel consumption is inherent to construction projects of this size and nature, fuel consumption impacts would not be considered excessive or substantial with respect to regional fuel supplies. The energy demands during construction would be typical of construction projects of this size and would not necessitate additional energy facilities or distribution infrastructure. The Project will also comply with Sections 2485 in Title 13 of the California Code of Regulations, which requires the idling of all diesel fueled commercial vehicles be limited to five minutes at any location. As a result, the Project would not result in inefficient, or unnecessary consumption of transportation resources during construction. Accordingly, transportation resource demands during construction would be less than significant.

## Operation

During operation of the Project, energy would be consumed for multiple purposes associated with the proposed uses, including, but not limited to, heating/ventilating/air conditioning (HVAC); refrigeration; lighting; and the use of electronics, equipment, and machinery. Energy would also be consumed during operation of the Project in the form of water usage, solid waste disposal, and vehicle trips, among others. As shown in **Table 4.6-2: Summary of Annual Energy Use During Operation**, the Project's energy demand would be approximately 434,847 kWh of electricity per year, 1,141,236 kBtu of natural gas per year, and 105,044 gallons of transportation fuel per year.

---

31 United States Energy Information Administration (USEIA). "Annual Energy Outlook 2020: Table 11. Petroleum and Other Liquids Supply and Disposition." <https://www.eia.gov/outlooks/aeo/data/browser/#/?id=11-AEO2020&cases=ref2020&sourcekey=0>. Accessed November 2023.

**TABLE 4.6-2  
SUMMARY OF ANNUAL ENERGY USE DURING OPERATION**

Source	Units	Quantity
<b>Electricity</b>		
High School	kWh/yr	150,071
Junior High School	kWh/yr	246,862
Parking Lot	kWh/yr	18,545
Water Conveyance	kWh/yr	19,369
<b>Total Electricity</b>	<b>kWh/yr</b>	<b>434,847</b>
<b>Natural Gas</b>		
High School	kBTU/yr	431,475
Junior High School	kBTU/yr	709,761
Parking Lot	kBTU/yr	0
<b>Total Natural gas</b>	<b>kBTU/yr</b>	<b>1,141,236</b>
<b>Transportation Energy</b>		
Diesel	Gallons/yr	15,185
Gasoline	Gallons/yr	89,860
<b>Total Fuel</b>	<b>Gallons/yr</b>	<b>105,044</b>

*Notes: kWh/yr = kilowatt-hours per year; kBTU/yr = thousand British Thermal Units per year.*

*Electricity and Natural Gas for the Project is total yearly operational usage. Mobile gasoline and diesel usage were calculated using CalEEMod output data*

*Refer to Appendix C: Energy Calculations.*

## Electricity

As shown in **Table 4.6-2**, the Project would result in a demand for electricity totaling 434,847 kWh (0.4 GWh) per year. SCE estimates that electricity consumption within its planning area will be approximately 122,000 GWh annually by 2026, when the Project would be fully built out.<sup>32</sup> The Project would account for less than 0.01 percent of the 2026 annual consumption in SCE's planning area. As such, the Project would account for a negligible portion of the projected annual consumption in SCE's planning area.

## Natural Gas

Natural gas service would be provided to the Project site by Southern California Gas Company (SoCalGas). As shown in **Table 4.6-2** above, buildout of the Project is projected to generate an on-site demand for natural gas totaling 1,141,236 kBTU or 1.1 million cubic feet (MMcf) per year. Based on the 2022 California Gas Report, the California Energy and Electric Utilities estimates natural gas supply within SoCalGas' planning area will be approximately 1,253,775 million cubic feet (MMcf) per year in 2026.<sup>33</sup> The proposed

32 CEC. Demand Analysis Office. *California Energy Demand 2018-2030 Revised Forecast*. <https://efiling.energy.ca.gov/getdocument.aspx?tn=223244>. Accessed November 2023.

33 California Gas and Electric Utilities. *2022 California Gas Report*. [https://www.socalgas.com/sites/default/files/Joint\\_Utility\\_Biennial\\_Comprehensive\\_California\\_Gas\\_Report\\_2022.pdf](https://www.socalgas.com/sites/default/files/Joint_Utility_Biennial_Comprehensive_California_Gas_Report_2022.pdf). Accessed November 2023.

Project would account for less than 0.01 percent of the 2026 annual forecasted supply in SoCalGas' planning area. Accordingly, natural gas demand during operation would be less than significant.

### Transportation Energy

As shown in **Table 4.6-2** above, buildout of the Project is projected to generate a demand of 105,044 gallons of transportation fuel. Based on fuel consumption obtained from CARB's California Emissions Factor Model, Version 2021 (EMFAC2021), approximately 621.4 million gallons of diesel and approximately 3,638,555 million gallons of gasoline will be consumed from vehicle trips in Los Angeles County in 2026. Operation of the Project would account for less than 0.01 percent of the projected annual oil supply in 2026. The Project would not result in inefficient, or unnecessary consumption of energy resources for transportation during operation and the impact of the Project would be less than significant.

Based on the analysis presented above and the calculations provided in **Appendix C** of this Initial Study, the Project would not result in the wasteful, inefficient, or unnecessary consumption of energy and thus would not generate significant impacts with regard to energy use and consumption.

**Mitigation Measures:** No mitigation measures are required.

#### **b. Conflict with or obstruct a State or local plan for renewable energy or energy efficiency?**

**Less than Significant Impact.** The California Title 24 Building Energy Efficiency Standards are designed to ensure new and existing buildings achieve energy efficiency and preserve outdoor and indoor environmental quality. These measures (Title 24, Part 6) are listed in California Code of Regulations. The California Energy Commission is responsible for adopting, implementing, and updating building energy efficiency. Local city and county enforcement agencies have the authority to verify compliance with applicable building codes, including energy efficiency. The Project must comply with the California Title 24 Building Energy Efficiency Standards. As such, the Project will not conflict with or obstruct a state or local plan for renewable energy or energy efficiency.

**Mitigation Measures:** No mitigation measures are required.

### 4.7 GEOLOGY AND SOILS

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>GEOLOGY AND SOILS - Would the project:</b>				
a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning map, issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ii. Strong seismic ground shaking?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iii. Seismic-related ground failure, including liquefaction?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iv. Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Directly or indirectly destroy a unique paleontological resource or site unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

## Discussion

a. Would the project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

**Less than Significant Impact.** A significant impact would occur if the proposed Project would cause personal injury or death or result in property damage as a result of a fault rupture occurring on the Project site and if the Project site is located within a State-designated Alquist-Priolo Zone or other designated fault zone. Fault rupture occurs when movement on a fault deep within the earth breaks through to the surface. Based on criteria established by the California Geological Survey (CGS), faults can be classified as active, potentially active, or inactive. Active faults are those having historically produced earthquakes or shown evidence of movement within the past 11,000 years (during the Holocene Epoch). Potentially active faults have demonstrated displacement within the last 1.6 million years (during the Pleistocene Epoch) while not displacing Holocene Strata. Inactive faults do not exhibit displacement younger than 1.6 million years before the present. In addition, there are buried thrust faults, which are faults with no surface exposure. Due to their buried nature, the existence of buried thrust faults is usually not known until they produce an earthquake.

The CGS establishes regulatory zones around active faults, called Alquist-Priolo Earthquake Fault Zones (previously called Special Study Zones). These zones, which extend from 200 to 500 feet on each side of the known fault, identify areas where a potential surface fault rupture could prove hazardous for buildings used for human occupancy. Development projects located within an Alquist-Priolo Earthquake Fault Zone are required to prepare special geotechnical studies to characterize hazards from any potential surface ruptures.

Earthquakes are a common occurrence within the City as with the rest of the State. According to the California Earthquake Hazards Zone Map and the City's Local Hazard Mitigation Plan, the Santa Susana Fault is located approximately 7.0 miles northeast of the proposed Project site, the San Fernando Fault is located approximately 7.1 miles northeast of the Project site, and the Simi Fault is located approximately 10.6 miles northwest of the Project site.<sup>34,35</sup> The Project site is not located within an Alquist-Priolo Earthquake Fault Rupture Zone, as delineated by the California Geological Survey. Additionally, the Project would not exacerbate or increase the likelihood or rupture of existing faults. As such, impacts would be less than significant, and no mitigation measures are required.

34 California Geological Survey (CGS). "Earthquake Zones of Required Investigation." <https://maps.conservation.ca.gov/cgs/EQZApp/app/>. Accessed November 2023.

35 City of Los Angeles. "Figure 9-2 Earthquake Fault Locations." *Local Hazard Mitigation Plan*. [https://emergency.lacity.gov/sites/g/files/wph1791/files/2021-10/2018\\_LA\\_HMP\\_Final\\_with\\_maps\\_2018-02-09.pdf](https://emergency.lacity.gov/sites/g/files/wph1791/files/2021-10/2018_LA_HMP_Final_with_maps_2018-02-09.pdf). Accessed November 2023.

**Mitigation Measures:** No mitigation measures are required.

**ii. Strong seismic ground shaking?**

**Less than Significant Impact.** A significant impact would occur if the proposed Project would cause personal injury or death or resulted in property damage as a result of seismic ground shaking. The Project site is located in an area of high regional seismic activity and may experience horizontal ground acceleration during an earthquake along the Santa Susana Fault, San Fernando Fault, Simi Fault or other fault zones throughout the region. The existing area and Project site has and would continue to be exposed to the potential for strong seismic ground shaking and associate hazards as this is common in Southern California.

The Project would not involve mining operations, deep excavation into the earth, or boring of large areas, which could create unstable seismic conditions like strong seismic ground shaking. Furthermore, structures built in the City are required to be built in compliance with the provisions of the latest California Building Code and Los Angeles Building Code and will mitigate the potential effects of strong ground shaking. The design and construction of the Project is required to comply with the most current codes regulating seismic risk, including the California Building Code and the LAMC, which incorporates the International Building Code (IBC). Compliance with the CBC would include the incorporation of: 1) seismic safety features to minimize the potential for significant effects as a result of earthquakes; 2) proper building footings and foundations; and 3) construction of the building structures so that it would withstand the effects of strong ground shaking. Therefore, with CBC compliance, the proposed Project would not expose people or structures to potentially substantial adverse effects, including the risk of loss, injury, or death involving strong seismic ground shaking more than other developments in Southern California. Impacts would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

**iii. Seismic-related ground failure, including liquefaction?**

**Less than Significant Impact.** A significant impact may occur if a proposed Project site is located within a liquefaction zone. Liquefaction refers to loose, saturated sand or gravel deposits that lose their load-supporting capability when subjected to intense shaking. Liquefaction usually occurs during or shortly after a large earthquake. The movement of saturated soils during seismic events from ground shaking can result in soil instability and possible structural damage.

According to the City's Local Habitat Conservation Plan, the Project site is within a liquefaction zone.<sup>36</sup> The proposed project would undergo appropriate site specific, design-level geotechnical evaluations prior to final design and construction as required to comply with the California Building Code (CBC). All geotechnical recommendations provided by the project geotechnical engineer and the City would be incorporated into project designs in areas where liquefiable soils are identified. Solutions to rectify liquefaction are modern engineering approaches used throughout California and are considered standard

---

36 City of Los Angeles. *Local Hazard Mitigation Plan*.

industry practice. Methods to correct liquefiable soils include removal and replacement of problematic soils, the use of pile foundations, and drainage columns to reduce saturated conditions. The geotechnical investigation and corrective actions for potential liquefiable soils, where needed, would be based on the CGS Special Publication 117A. The Project structures would be subject to the CBC which controls the design and location of buildings and structures in order to safeguard the public and reduce potential impacts related to liquefaction to less than significant.

**Mitigation Measures:** No mitigation measures are required.

#### iv. Landslides?

**No Impact.** Landslides are the downslope movement of geologic materials that occur when the underlying geological support on a hillside can no longer maintain the load of material above it, causing a slope failure. General slope stability is determined by a number of factors including slope, vegetative cover, wildfire, bedrock, soil, precipitation, and human alteration. Slopes may be in temporary equilibrium until one of the above factors is modified resulting in an unstable condition and potential failure.

The location of the Project site is relatively flat and is not located within an identified landslide area.<sup>37,38</sup> Although the Project site is located in an area of high seismic activity, due to the relatively level terrain of the site and the surrounding area, the Project is not at risk for landslide, collapse, or rockfall hazards. Impacts would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

#### b. Would the project result in substantial soil erosion or the loss of topsoil?

**Less than Significant Impact.** A significant impact would occur if construction activities or future uses would result in substantial soil erosion or loss of topsoil. Construction of the proposed Project would not result in ground surface disturbance as construction does not include any excavations activities to occur as the project would not result in the import or export of any soil. As such, there would be no open spaces with exposed topsoil. Additionally, as required by the City's Municipal Code Section 64.72, all construction projects which could potentially have an adverse impact on the City's storm water drainage system or waters of the state shall install and/or implement appropriate construction and post-construction BMPs, as listed in their *Development Best Management Practices Handbook* or the *California Storm Water Best Management Practice Handbook* to reduce pollutants to the maximum extent practicable or the extent required by law. Through adherence of the City's Municipal Code, impacts related to erosion and loss of topsoil would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

---

37 CGS. "Earthquake Zones of Required Investigation." <https://maps.conservation.ca.gov/cgs/EQZApp/app/>. Accessed November 2023.

38 City of Los Angeles. *Local Hazard Mitigation Plan*.

**c. Would the project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?**

**Less than Significant Impact.** A significant impact may occur if a project is built in an unstable area without proper site preparation or design features to provide adequate foundations, thus posing a hazard to life and property. Construction activities associated with the Project must comply with the CBC, which is designed to assure safe construction including building foundation requirements appropriate to site conditions.

As previously discussed, the Project site is located in an area that is seismically active, and is located in an identified liquefaction zone. The Project site is not at risk for landslide, collapse, or rockfall due to the relatively flat terrain of the site and surrounding developed properties. The Project site is not located near slopes or geologic features that would result in on- or off-site land sliding or lateral spreading. As such, the Project would not exacerbate existing conditions, such as unstable geologic units or unstable soil.

Furthermore, there is no evidence of natural or manmade voids or low-density soils that could lead to ground subsidence or collapse. As such, impacts would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**d. Would the project be located on expansive soil, as defined in Table 18 1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?**

**Less than Significant Impact.** A significant impact would occur if the proposed Project would be built on expansive soils without proper site preparation or design features to provide adequate foundations for project buildings, thus, posing a hazard to life and property. Expansive soils contain significant amounts of clay particles that have the ability to give up water (shrink) or take on water (swell). When these soils swell, the change in volume can exert pressures that are placed on them, and structural distress and damage to buildings could occur.

Soils within the Project site consist of mocho soils and urban land soils, which are less susceptible to expansion.<sup>39</sup> The Project site does not consist of a majority of clay soil which has the potential to expand and contract substantially. Standard procedures used in the construction of concrete footings as required by the CBC to reduce the potential impacts associated with unstable or expansive soils. Therefore, implementation of the proposed Project would have a less than significant impact on the creation of

---

39 United States Department of Agriculture (USDA). "WebSoil Survey."  
<https://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx>. Accessed November 2023.

substantial direct or indirect risks to life or property due to construction located on expansive soils and no mitigation measures would be required.

**Mitigation Measures:** No mitigation measures are required.

**e. Would the project have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?**

**Less Than Significant Impact.** A Project would cause a significant impact if adequate wastewater disposal is not available. The Project site is located within a community served by existing wastewater infrastructure. The Project's wastewater demand would be accommodated by connections to the existing wastewater infrastructure. The Project would not require the use of septic tanks or alternative wastewater disposal systems. Therefore, the Project would have no impact related to the ability of soils to support septic tanks or alternative wastewater disposal systems, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**f. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?**

**Less Than Significant Impact.** A significant impact would occur if excavation or construction activities associated with the proposed Project would disturb paleontological or unique geological features. Paleontological resources are the fossilized remains of organisms that have lived in a region in the geologic past and whose remains are found in the accompanying geologic strata. This type of fossil record represents the primary source of information on ancient life forms since the majority of species that have existed on earth from this era are extinct. PRC Section 5097.5 specifies that any unauthorized removal of paleontological remains is a misdemeanor. Furthermore, California Penal Code Section 622.5 includes penalties for damage or removal of paleontological resources.

The site is underlain by Alluvial Fan Deposits that date back to the Holocene age.<sup>40</sup> Considering the Project site as a whole has been previously disturbed, the potential for finding paleontological resources would be low. Therefore, surficial paleontological resources that may have existed at one time have likely been previously disturbed. Nonetheless, the possibility exists that paleontological artifacts that were not recovered during prior construction or other human activity may be present. In the event that any prehistoric subsurface cultural resources are encountered at the Project site during construction or the course of any ground disturbance activities, all such activities shall halt immediately, at which time the Applicant shall notify the City and consult with a qualified paleontologist to assess the significance of the find. In the case of discovery of paleontological resources, the assessment shall be done in accordance with the Society of Vertebrate Paleontology standards. If any find is determined to be significant, appropriate avoidance measures recommended by the consultant and approved by the City

---

40 DOC. "Compilation of Quaternary Surficial Deposits." <https://maps.conservation.ca.gov/cgs/QSD/>. Accessed November 2023.

#### **4.0 Environmental Checklist and Evaluation**

will be followed unless avoidance is determined to be unnecessary or infeasible by the City. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery, excavation) shall be instituted.

Therefore, with complying with the aforementioned measures with regard to paleontological resources, the Project's impact on paleontological resources would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

## 4.8 GREENHOUSE GAS EMISSIONS

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>GREENHOUSE GAS EMISSIONS - Would the project:</b>				
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Discussion

The Scoping Plan is a greenhouse gas emission (GHG) reduction roadmap developed and updated by the California Air Resources Board (CARB) at least once every five years, as required by Assembly Bill (AB) 32. It lays out the transformations needed across various sectors to reduce GHG emissions and reach the State's climate targets. CARB published the Final 2022 Scoping Plan for Achieving Carbon Neutrality (2022 Scoping Plan Update) in November 2022, as the third update to the initial plan that was adopted in 2008. The initial 2008 Scoping Plan laid out a path to achieve the AB 32 target of returning to 1990 levels of GHG emissions by 2020, a reduction of approximately 15 percent below business as usual activities (CARB 2008, Climate Change Scoping Plan.) The 2008 Scoping Plan included a mix of incentives, regulations, and carbon pricing, laying out the portfolio approach to addressing climate change and clearly making the case for using multiple tools to meet California's GHG targets. The 2013 Scoping Plan Update (adopted in 2014) assessed progress toward achieving the 2020 target and made the case for addressing short-lived climate pollutants (SLCPs) (CARB 2014, First Update to the Climate Change Scoping Plan). The 2017 Scoping Plan Update (CARB 2017, California's 2017 Climate Change Scoping Plan), shifted focus to the newer Senate Bill (SB) 32 goal of a 40 percent reduction below 1990 levels by 2030 by laying out a detailed cost-effective and technologically feasible path to this target, and also assessed progress towards achieving the AB 32 goal of returning to 1990 GHG levels by 2020. The 2020 goal was ultimately reached in 2016, four years ahead of the schedule called for under AB 32.

The 2022 Scoping Plan Update is the most comprehensive and far-reaching Scoping Plan developed to date. It identifies a technologically feasible, cost-effective, and equity-focused path to achieve new targets for carbon neutrality by 2045 and to reduce anthropogenic GHG emissions to at least 85 percent below 1990 levels, while also assessing the progress California is making toward reducing its GHG emissions by at least 40 percent below 1990 levels by 2030, as called for in SB 32 and laid out in the 2017 Scoping Plan.<sup>41</sup> The 2030 target is an interim but important stepping stone along the critical path to the

41 CARB. *California's 2017 Climate Change Scoping Plan*. 2017. [ww2.arb.ca.gov/sites/default/files/classic/cc/scopingplan/scoping\\_plan\\_2017.pdf](http://ww2.arb.ca.gov/sites/default/files/classic/cc/scopingplan/scoping_plan_2017.pdf). Accessed November 2023.

broader goal of deep decarbonization by 2045. The relatively longer path assessed in the 2022 Scoping Plan Update incorporates, coordinates, and leverages many existing and ongoing efforts to reduce GHGs and air pollution, while identifying new clean technologies and energy. Given the focus on carbon neutrality, the 2022 Scoping Plan Update also includes discussion for the first time of the natural and working lands sectors as sources for both sequestration and carbon storage, and as sources of emissions as a result of wildfires.

The 2022 Scoping Plan Update reflects existing and recent direction in the Governor’s Executive Orders and State Statutes, which identify policies, strategies, and regulations in support of and implementation of the Scoping Plan. Among these include Executive Order B-55-18 and AB 1279 (The California Climate Crisis Act), which identify the 2045 carbon neutrality and GHG reduction targets required for the Scoping Plan.

Aligning local jurisdiction action with state-level priorities to tackle climate change and the outcomes called for in the 2022 Scoping Plan Update is identified as critical to achieving the statutory targets for 2030 and 2045. The 2022 Scoping Plan Update discusses the role of local governments in meeting the State’s GHG reductions goals. Local governments have the primary authority to plan, zone, approve, and permit how and where land is developed to accommodate population growth, economic growth, and the changing needs of their jurisdictions. They also make critical decisions on how and when to deploy transportation infrastructure, and can choose to support transit, walking, bicycling, and neighborhoods that do not force people into cars. Local governments also have the option to adopt building ordinances that exceed statewide building code requirements, and play a critical role in facilitating the rollout of Electric Vehicle (EV) infrastructure. As a result, local government decisions play a critical role in supporting state-level measures to contain the growth of GHG emissions associated with the transportation system and the built environment—the two largest GHG emissions sectors over which local governments have authority. The City has taken the initiative in combating climate change by developing programs in the General Plan (Housing Element, Mobility Plan 2035) and regulations such as requirements for All-Electric Buildings, the Green New Deal Green Building Code, converting the City’s fleet to zero emission vehicles, and energy emissions retrofits.

**a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?**

**Less Than Significant Impact.** The analysis of the Project’s GHG emissions consists of a quantitative analysis of the GHG emissions generated by the construction and operation activities and a qualitative analysis of the Project’s consistency with adopted GHG-related legislation, plans, and policies. This approach is in accordance with CEQA Guidelines Section 15064.4(a), which affirms the discretion of a lead agency to determine, in the context of a particular project, whether to use quantitative and/or qualitative methodologies to determine the significance of a project’s impacts.

The total GHG emissions from the Proposed Project were quantified to determine the level of the Project’s estimated annual GHG emissions. As with the Air Quality section calculations, construction

#### 4.0 Environmental Checklist and Evaluation

emissions were estimated using CalEEMod by assuming a conservative estimate of construction activities (i.e., assuming all construction occurs at the earliest feasible date) and applying the mobile-source emissions factors. The modeling used the same input values as previously discussed under the methodology section for air quality. SCAQMD's *Draft Guidance Document—Interim CEQA Greenhouse Gas (GHG) Significance Threshold*<sup>42</sup> recognizes that construction-related GHG emissions from projects occur over a relatively short-term period of time and contributes a relatively small portion of a project's overall lifetime GHG emissions. The guidance recommends that a project's construction-related GHG emissions be amortized over a 30-year project lifetime so that GHG reduction measures will address construction GHG emissions as part of the operation GHG reduction strategies.

CalEEMod was also used to estimate operational GHG emissions from electricity, natural gas, solid waste, water and wastewater, fireplaces, and landscaping equipment. CalEEMod calculates energy use from systems covered by Title 24 (e.g., heating, ventilation, and air conditioning [HVAC] system, water heating system, and lighting system); energy use from lighting; and energy use from office equipment, appliances, plug-ins, and other sources not covered by Title 24 or lighting. Mobile-source emissions were estimated based on the CARB EMFAC model. For mobile sources, CalEEMod was used to generate the vehicle miles traveled from the Proposed Project uses based on the Project trip generation rate.

With regard to energy demand, the consumption of fossil fuels to generate electricity and to provide heating and hot water generates GHG emissions. Energy demand rates were estimated based on square footage as well as predicted water supply needs for this use. Energy demand (off-site electricity generation and on-site natural gas consumption) for the Project was calculated within CalEEMod using the CEC's CEUS data set, which provides energy demand by building type and climate zone.

Emissions of GHGs from solid waste disposal were also calculated using CalEEMod software. The emissions are based on the waste disposal rate for the land uses, the waste diversion rate, and the GHG emission factors for solid waste decomposition. The GHG emission factors, particularly for methane, depend on characteristics of the landfill, such as the presence of a landfill gas capture system and subsequent flaring or energy recovery. The default values, as provided in CalEEMod, for landfill gas capture (e.g., no capture, flaring, energy recovery), which are Statewide averages, were used in this assessment.

Emissions of GHGs from water and wastewater result from the required energy to supply and distribute the water and treat the wastewater. Wastewater also results in emissions of GHGs from wastewater treatment systems. Emissions are calculated using CalEEMod and are based on the water usage rate for the restaurant use; the electrical intensity factors for water supply, treatment, and distribution and for wastewater treatment; the GHG emission factors for the electricity utility provider; and the emission factors for the wastewater treatment process.

---

42 SCAQMD. *Draft Guidance Document—Interim CEQA Greenhouse Gas (GHG) Significance Threshold*. October 2008.

## 4.0 Environmental Checklist and Evaluation

The forecasting of construction-related GHG emissions requires assumptions regarding the timing of construction as the emission factors for some of the Proposed Project’s construction-related GHG emission sources decline over time. As shown in **Table 4.8-1: Construction GHG Emissions**, total construction emissions would be 446 metric tons of CO<sub>2</sub>e (MTCO<sub>2</sub>e). One-time, short-term emissions are converted to average annual emissions by amortizing them over the service life of a building. For buildings in general, it is reasonable to look at a 30-year time frame because this is a typical interval before a new building requires its first major renovation.<sup>43</sup> As shown in **Table 4.8-1**, when amortized over an average 30-year Project lifetime, average annual construction emissions from the Proposed Project would be 15 MTCO<sub>2</sub>e per year.

Construction Phase	MTCO <sub>2</sub> e/Year
2024	297
2025	149
<b>Overall Total</b>	<b>446</b>
<b>30-Year Annual Amortized Rate</b>	<b>15</b>

Refer to **Appendix A: Air Quality/Greenhouse Gas Study**.

Notes: GHG = greenhouse gas; MTCO<sub>2</sub>e = metric tons of carbon dioxide equivalent.

Operation of the Proposed Project has the potential to generate GHG emissions through vehicle trips traveling to and from the Project site. In addition, emissions would result from area sources on site, such as natural gas combustion, landscaping equipment, and use of consumer products. Emissions from mobile and area sources and indirect emissions from energy and water use, wastewater, as well as waste management would occur every year after full development of the uses allowed by the Proposed Project. Operational Project emissions from area sources, energy sources, mobile sources, solid waste, and water and wastewater conveyance are shown in **Table 4.8-2: Operational GHG Emissions** below. As shown in **Table 4.8-2**, annual operational emissions from the Proposed Project would be 1,125 MTCO<sub>2</sub>e per year.

43 (USEIA). *Energy Efficiency Requirements in Building Codes. Energy Efficiency Policies for New Buildings. IEA Information Paper*. 2008.

**TABLE 4.8-2  
OPERATIONAL GHG EMISSIONS**

Source	Unmitigated MTCO <sub>2</sub> e per year
Construction (amortized)	15
Mobile	901
Energy	131
Natural Gas	61
Area	1
Water	5
Waste	26
<b>Total</b>	<b>1,125</b>

Refer to **Appendix A: Air Quality/Greenhouse Gas Study**

Abbreviation: MTCO<sub>2</sub>e = metric tons of carbon dioxide emissions.

The City has not adopted a numerical significance threshold for assessing impacts related to GHG emissions. Nor have SCAQMD, OPR, CARB, CAPCOA, or any other state or regional agency adopted a numerical significance threshold for assessing GHG emissions that is applicable to the Project. Assessing the significance of a project's contribution to cumulative global climate change involves: (1) developing pertinent inventories of GHG emissions, and (2) considering project consistency with applicable emission reduction strategies and goals. This evaluation of consistency with such plans is the sole basis for determining the significance of the Project's GHG-related impacts on the environment. As discussed below, the Project would not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases. As such, impacts would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

**b. Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?**

**Less than Significant Impact.** A significant impact would occur if the proposed Project conflicted with an applicable plan, policy, or regulation adopted for the purpose of reducing emissions of GHGs.

The proposed Project is required to comply with Title 13-Section 2449 of the CCR and the CalRecycle Sustainable (Green) Building Program regulations, which include implementation of standard control measures for equipment emissions. Adherence to these regulations, including the implementation of Best Available Control Measures (BACMs) is a standard requirement for any construction or ground-disturbance activity occurring within the Basin.

BACMs include, but are not limited to, requirements that the project proponent utilize only low sulfur fuel (i.e., having a sulfur content of 15 ppm by weight or less); ensure off-road vehicles (i.e., self-propelled diesel fueled vehicles 25 horsepower and up that were not designed to be driven on road) limit

vehicle idling to five minutes or less; register and label vehicles in accordance with the ARB Diesel Off-Road Online Reporting System; restrict the inclusion of older vehicles into fleets; and retire, replace, or repower older engines or install Verified Diesel Emission Control Strategies (i.e. exhaust retrofits). Additionally, the construction contractor will recycle/reuse at least 50 percent of the construction material (including, but not limited to, proposed aggregate base, soil, mulch, vegetation, concrete, lumber, metal, and cardboard) and use “Green Building Materials,” such as those materials that are rapidly renewable or resource efficient, and recycled and manufactured in an environmentally friendly way, for at least 10 percent of the project, in accordance with CalRecycle regulations.

Long-term operational emissions typically include emissions from use of consumer products, energy and water usage, vehicles and land use emissions.

The Project is committed to meeting the requirements of the CALGreen Code by incorporating strategies such as low-flow toilets, low-flow faucets and other energy and resource conservation measures. The Project would comply with applicable energy, water, and waste efficiency measures specified in the Title 24 Building Energy Efficiency Standards and CALGreen standards.

### 2020-2045 RTP/SCS

The SCAG’s 2020-2045 RTP/SCS is forecast to help California reach its GHG reduction goals. According to the 2020-2045 RTP/SCS, the updated target for the SCAG region is 19 percent below 2005 per capita emissions levels by 2035. The revised 2035 target is higher than the previous CARB target of 13 percent for the SCAG region. The 2020-2045 RTP/SCS includes implementation strategies for focusing growth near destinations and mobility options, promoting diverse housing choices, leveraging technology innovations, supporting implementation of sustainability policies, and promoting a green region. **Table 4.8-3: Project Consistency with Applicable SCAG RTP/SCS GHG Emission Reduction Strategies** summarize the Project’s consistency with applicable strategies and actions. As shown therein, the Proposed Project would be consistent with the GHG emission reduction strategies contained in the 2020-2045 RTP/SCS.

TABLE 4.8-3 PROJECT CONSISTENCY WITH APPLICABLE SCAG RTP/SCS GHG EMISSION REDUCTION STRATEGIES	
Action	Project Consistency
<b>Focus Growth Near Destinations &amp; Mobility Options</b>	
<ul style="list-style-type: none"> <li>Emphasize land use patterns that facilitate multimodal access to work, educational and other destinations</li> <li>Focus on a regional jobs/housing balance to reduce commute times and distances and expand job opportunities near transit and along center-focused main street</li> <li>Plan for growth near transit investments and support implementation of first/last mile strategies</li> </ul>	<p><b>Consistent.</b> The Proposed Project is an infill development that would involve construction of a new school. The Project site is located within walking distance of existing residential and commercial uses. Additionally, the Project is within 0.5-mile of bus stops for Metro bus routes including the Winnetka/Sherman, Sherman/Oakdale stations. Therefore, the Project would focus growth near destinations and mobility options.</p>

**TABLE 4.8-3  
PROJECT CONSISTENCY WITH APPLICABLE SCAG RTP/SCS GHG EMISSION REDUCTION STRATEGIES**

Action	Project Consistency
<ul style="list-style-type: none"> <li>Promote the redevelopment of underperforming retail developments and other outmoded nonresidential uses</li> <li>Prioritize infill and redevelopment of underutilized land to accommodate new growth, increase amenities and connectivity in existing neighborhoods</li> <li>Encourage design and transportation options that reduce the reliance on and number of solo car trips (this could include mixed uses or locating and orienting close to existing destinations)</li> <li>Identify ways to “right size” parking requirements and promote alternative parking strategies (e.g., shared parking or smart parking)</li> </ul>	
<b>Leverage Technology Innovations</b>	
<ul style="list-style-type: none"> <li>Promote low emission technologies such as neighborhood electric vehicles, shared rides hailing, car sharing, bike sharing and scooters by providing supporting and safe infrastructure such as dedicated lanes, charging and parking/drop-off space</li> <li>Improve access to services through technology - such as telework and telemedicine as well as other incentives such as a “mobility wallet,” an app-based system for storing transit and other multi-modal payments</li> <li>Identify ways to incorporate “micro-power grids” in communities, for example solar energy, hydrogen fuel cell power storage and power generation</li> </ul>	<p><b>Consistent.</b> Related to energy production and usage, the Project would exceed the required standard of 10 percent of the total number of on-site parking spaces with EV charging stations by designating 2 accessible stalls (EV ready) and 6 EV capable for EV parking, in accordance with LAMC Sections 99.05.106.5.3.3 and 99.05.106.5.3.6.</p>
<b>Support Implementation of Sustainability Policies</b>	
<ul style="list-style-type: none"> <li>Pursue funding opportunities to support local sustainable development implementation projects that reduce GHG emissions</li> <li>Support statewide legislation that reduces barriers to new construction and that incentivizes</li> </ul>	<p><b>Consistent.</b> The Project would be designed and operated to meet the applicable requirements of CALGreen and the City’s Green Building Code. The Project’s indoor water use would be minimized by 20 percent. Furthermore, energy use would be reduced by implementing the requirements of current Title 24 standards, including energy-efficient lighting and appliances. Therefore, the Project would support implementation of sustainability policies.</p>
<b>Promote a Green Region</b>	
<ul style="list-style-type: none"> <li>Support development of local climate adaptation and hazard mitigation plans, as well as project implementation that improves community resiliency to climate change and natural hazards</li> <li>Support local policies for renewable energy production, reduction of urban heat islands and carbon sequestration</li> </ul>	<p><b>Consistent.</b> The Project is an infill development that would involve construction of a new school. Because the project is an infill development, it would not interfere with regional wildlife connectivity or convert agricultural land. The Project would comply with Sustainable City pLAn, Green New Deal, Title 24, and CALGreen. Therefore, the Project would support development of a green region.</p>

**TABLE 4.8-3  
PROJECT CONSISTENCY WITH APPLICABLE SCAG RTP/SCS GHG EMISSION REDUCTION STRATEGIES**

Action	Project Consistency
<ul style="list-style-type: none"> <li>• Integrate local food production into the regional landscape</li> <li>• Promote more resource efficient development focused on conservation, recycling and reclamation</li> <li>• Preserve, enhance and restore regional wildlife connectivity</li> <li>• Reduce consumption of resource areas, including agricultural land</li> <li>• Identify ways to improve access to public park space</li> </ul>	

### Green LA Actions

The City of Los Angeles adopted *Green LA: An Action Plan to Lead the Nation in Fighting Global Warming (Green LA)*, in May 2007. Green LA set the goal of reducing the City’s greenhouse gas emissions to 35 percent below 1990 levels by 2030. **Table 4.8-4: Project Consistency With Applicable Green LA Actions** summarizes the Project’s consistency with applicable Green LA actions. As discussed herein, the Project would be consistent with the actions and measures contained in these local GHG reduction plans.

**TABLE 4.8-4  
PROJECT CONSISTENCY WITH APPLICABLE GREEN LA ACTIONS**

Action	Project Consistency
<b>Energy</b>	
Present a comprehensive set of green building policies to guide and support private sector development.	<b>Consistent.</b> The Project would be designed and operated to meet the applicable requirements of CALGreen and the City’s Green Building Code.
<b>Water</b>	
Meet all additional demand for water resulting from growth through water conservation and recycling. Reduce per capita water consumption by 20 percent	<b>Consistent.</b> While this action primarily applies to the City and LADWP, the Project would incorporate water conservation features, such as low-flow fixtures, required pursuant to the current California Plumbing Code, CALGreen, and Los Angeles Plumbing Code, and Los Angeles Green Building Code. Furthermore, current CALGreen requirements require a 20 percent increase in indoor water use efficiency relative to previous building requirements.
<b>Transportation</b>	
Promote walking and biking to work, within neighborhoods, and to large events and venues	<b>Consistent.</b> The Proposed Project is an infill development that would involve construction of a new school. The Project site is located within walking distance of existing residential and commercial uses. Additionally, the Project is within 0.5-mile of bus stops for Metro bus routes including the Winnetka/Sherman, Sherman/Oakdale stations. Therefore, the Project would focus growth near destinations and mobility options.

**TABLE 4.8-4  
PROJECT CONSISTENCY WITH APPLICABLE GREEN LA ACTIONS**

Action	Project Consistency
<b>Waste</b>	
Recycle 70 percent trash by 2015	<b>Consistent.</b> The City of Los Angeles has achieved a landfill diversion rate of 76 percent. The Project would be subject to the requirements of the statewide commercial recycling program, which established a statewide goal of diverting at least 75 percent of solid waste from landfills by 2020. Compliance with existing City and State programs would achieve consistency with this measure.

### Sustainable City pLAn/Green New Deal

Assembly Bill (AB) 32, the California Global Warming Solutions Act of 2006, focuses on reducing GHG. On April 8, 2015, Los Angeles released the Sustainable City pLAn, which covers a multitude of environmental, social, and economic sustainability issues related to GHG emission reduction either specifically or by association. In 2019, the City of Los Angeles prepared the 2019 Green New Deal, which provided an expanded vision of the pLAn, focusing on securing clean air and water and a stable climate, improving community resilience, expanding access to healthy food and open space, and promoting environmental justice for all. **Table 4.8-5: Project Consistency With Applicable Sustainable City Plan/Green New Deal Measures** summarizes the Project's consistency with applicable Sustainable City pLAn/Green New Deal measures. As discussed, the Project would be consistent with the actions and measures contained in these local GHG reduction plans.

**TABLE 4.8-5  
PROJECT CONSISTENCY WITH APPLICABLE SUSTAINABLE CITY PLAN/GREEN NEW DEAL MEASURES**

Action	Project Consistency
<b>Renewable Energy</b>	
<ul style="list-style-type: none"> <li>• LADWP will supply 55% renewable energy by 2025; 80% by 2036; and 100% by 2045.               <ul style="list-style-type: none"> <li>– Increase cumulative megawatts by 2025; 2035; and 2050 of                   <ul style="list-style-type: none"> <li>• Local solar to 900-1,500 MW; 1,500-1,800 MW; and 1,950 MW</li> <li>• Energy storage capacity to 1,654-1,750 MW; 3,000 MW; and 4,000 MW</li> <li>• Demand response (DR) programs to 234 MW (2025) and 600 MW (2035)</li> </ul> </li> </ul> </li> </ul>	<b>Consistent.</b> While this action primarily applies to the City and LADWP, LADWP is required to generate electricity that would increase renewable energy resources to 44 percent by 2024, 60 percent by 2030, and 100 percent by 2045 under SB 100. Because LADWP would provide electricity service to the Project Site, the Project would use electricity consistent with the requirements of SB 100 and City goals.
<b>Local Water</b>	
<ul style="list-style-type: none"> <li>• Source 70% of L.A.'s water locally and capture 150,000 acre-feet per year of stormwater by 2035.</li> <li>• Recycle 100% of all wastewater for beneficial reuse by 2035.</li> <li>• Build at least 10 new multi-benefit stormwater</li> </ul>	<b>Consistent.</b> While this action primarily applies to the City and LADWP, the Project would incorporate water conservation features to reduce water use. The Project would be required to comply with the City's water use restrictions on timing, area, frequency, and

**TABLE 4.8-5  
PROJECT CONSISTENCY WITH APPLICABLE SUSTAINABLE CITY PLAN/GREEN NEW DEAL MEASURES**

Action	Project Consistency
<p>capture projects by 2025; 100 by 2035; and 200 by 2050.</p> <ul style="list-style-type: none"> <li>• Reduce potable water use per capita by 22.5% by 2025; and 25% by 2035; and maintain reduce 2035 per capita water use through 2050.</li> <li>• Install or refurbish hydration stations at 200 sites, prioritizing municipally owned buildings and public properties such as parks, by 2035.</li> </ul>	<p>duration of specified allowable water usage. The Project would also be required to comply with the Title 24 standards for Water Efficiency and Conservation that are in effect at the time of development. These standards include actions such as separate water submeters for subsystems, prescriptive reduced flow rates for water and fixtures, wall-mounted urinals, and plumbing fixtures and fittings.</p>
<b>Clean and Healthy Buildings</b>	
<ul style="list-style-type: none"> <li>• All new buildings will be net zero carbon by 2030; and 100% of buildings will be net zero carbon by 2050.</li> <li>• Reduce building energy use per sf for all building types 22% by 2025; 34% by 2035; and 44% by 2050.</li> </ul>	<p><b>Consistent.</b> The Project would be constructed in accordance with the applicable requirements of CALGreen and the City's Green Building Code.</p>
<b>Mobility &amp; Public Transit</b>	
<ul style="list-style-type: none"> <li>• Increase the percentage of all trips made by walking, biking, micro-mobility/matched rides or transit to at least 35% by 2025; 50% by 2035; and maintain at least 50% by 2050.</li> <li>• Reduce vehicle miles traveled per capita by at least 13% by 2025; 39% by 2035; and 45% by 2050.</li> <li>• Ensure Los Angeles is prepared for Autonomous Vehicles (AV) by the 2028 Olympic and Paralympic Games.</li> </ul>	<p><b>Consistent.</b> The Proposed Project is an infill development that would involve construction of a new school. The Project site is located within walking distance of existing residential and commercial uses. Additionally, the Project is within 0.5-mile of bus stops for Metro bus routes including the Winnetka/Sherman, Sherman/Oakdale stations. Therefore, the Project would focus growth near destinations and mobility options.</p>
<b>Zero Emissions Vehicles</b>	
<ul style="list-style-type: none"> <li>• Increase the percentage of electric and zero emission vehicles in the city by 25% by 2025; 80% by 2035; and 100% by 2050.</li> <li>• Electrify 100% of LA Metro and LADOT buses by 2030.</li> <li>• Reduce port-related GHG emissions by 80% by 2050.</li> </ul>	<p><b>Consistent.</b> In accordance with LAMC Sections 99.05.106.5.3.3 and 99.05.106.5.3.6, the Project would designate 2 accessible stalls (EV ready) and 6 EV capable for EV parking.</p>
<b>Waste and Resource Recovery</b>	
<ul style="list-style-type: none"> <li>• Increase landfill diversion rate to 90% by 2025; 95% by 2035; and 100% by 2050</li> <li>• Reduce municipal solid waste generation per capita by at least 15% by 2030, including phasing out single-use plastics by 2028</li> <li>• Eliminate organic waste going to landfill by 2028 increase proportion of waste products and recyclables productively reused and/or repurposed within Los Angeles County to at least 25% by 2025; and 50% by 2035.</li> </ul>	<p><b>Consistent.</b> The City of Los Angeles has achieved a landfill diversion rate of 76 percent (Los Angeles Sanitation and Environment 2022). The Project would be subject to the requirements of the statewide commercial recycling program, which establishes a statewide goal of diverting at least 75 percent of solid waste from landfills by 2020. Compliance with existing City and State programs would achieve consistency with this measure.</p>

**TABLE 4.8-5  
PROJECT CONSISTENCY WITH APPLICABLE SUSTAINABLE CITY PLAN/GREEN NEW DEAL MEASURES**

Action	Project Consistency
<b>Urban Ecosystems and Resilience</b>	
<ul style="list-style-type: none"> <li>• Increase tree canopy in areas of greatest need by at least 50% by 2028.</li> <li>• Complete or initiate restoration identified in the 'ARBOR' Plan by 2035.</li> <li>• Create a fully connected LARiverWay public access system that includes 32 miles of bike paths and trails by 2028.</li> <li>• Reduce urban/rural temperature differential by at least 1.7 degrees by 2025; and 3 degrees by 2035.</li> <li>• Ensure proportion of Angelenos living within ½ mile of a park or open space is at least 65% by 2025; 75% by 2035; and 100% by 2050.</li> <li>• Achieve and maintain 'no-net-loss' of native biodiversity by 2035.</li> </ul>	<p><b>Consistent.</b> The Project would be an infill development in an urbanized area and thus would not adversely impact native biodiversity.</p>

As mentioned previously, a project is consistent with the AQMP, in part, if it is consistent with the population, housing and employment assumptions that were used in the development of the AQMP. As discussed in **Section 4.11: Land Use and Planning**, the Project would conform to objectives outlined in the City of Los Angeles General Plan. Additionally, the 2020 - 2045 RTP/SCS provides socioeconomic forecast projections of regional population growth. These growth forecasts are based on local plans and policies applicable to the specific area. As discussed in **Section 4.14: Population and Housing**, the Project would not generate population growth as no residential uses are proposed as part of the Project. Additionally, the number of teachers and faculty would not exceed the estimated employment growth between 2016 and 2045. The Project would be consistent with the AQMP for the second criterion and would not exceed the growth assumptions in the AQMP.

For the reasons described above, the Proposed Project would not conflict with State-applicable plans, policies, and regulations adopted for the purpose of reducing GHG emissions, impacts would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

### 4.9 HAZARDS AND HAZARDOUS MATERIALS

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>HAZARDS AND HAZARDOUS MATERIALS - Would the project:</b>

The following section summarizes and incorporates by reference information from the Environmental Site Assessment (ESA) prepared by NV5 dated March 7, 2022, on behalf of the Applicant. The ESA is included as **Appendix D** of this IS/ND.

## Discussion

### a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

**Less than Significant Impact.** A significant impact would occur if the proposed Project would create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials. The types and amounts of hazardous materials to be used for the Project would be typical of those used during construction activities and those typically used in the operation of commercial and retail facilities, as discussed in the following analysis.

## Construction

The Project would not involve the routine transport of hazardous materials to and from the Project site during construction. Additionally, hazardous materials such as fuel and oils associated with construction equipment, as well as coatings, paints, adhesives, and caustic or acidic cleaners could be routinely used on the Project site through the duration of construction. While some hazardous materials used during construction could require disposal, such activity would occur only for the duration of construction and would cease upon completion of the Project. As such, construction of the Project would not involve the routine disposal of hazardous materials. Notwithstanding, all potentially hazardous materials used during construction of the Project would be used and disposed of in accordance with manufacturers' specifications and instructions, thereby reducing the risk of hazardous materials use. In addition, existing regulations are aimed at establishing specific guidelines regarding risk planning and accident prevention, protection from exposure to specific chemicals, and the proper storage of hazardous materials. The Project would comply with all applicable federal, State, and local requirements concerning the use, storage, and management of hazardous materials. Consequently, Project construction activities would not create a significant hazard to the public or the environment through the use of hazardous materials during construction, and development of the Project on the Project site would not exacerbate the current environmental conditions so as to create a significant hazard to the public or the environment. Therefore, impacts related to the routine transport, use, or disposal of hazardous materials during construction would be less than significant, and no mitigation measures are required.

## Operation

Operations of the Project would involve the routine use of small quantities of potentially hazardous materials typical of those used for school uses, including cleaning products, paints, and those used for maintenance of landscaping. Accidents may occur during the transport, storage, use, or disposal of hazardous materials, including spills or leaks.

These hazardous materials would be used, stored, and disposed of in accordance with applicable regulations and standards (such as CFR, Title 49, Chapter I; CCR, Title 8; CFR, Title 40, Part 263) that are enforced by the USEPA, USDOT, CalEPA, CalOSHA, DTSC, and County Los Angeles Department of Public Health. As such, the Project would not create a significant hazard to the public or the environment

through the routine transport, use, or disposal of hazardous materials. Therefore, significant impacts would not occur during the operation of the proposed Project.

**Mitigation Measures:** No mitigation measures are required.

**b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?**

**Less than Significant Impact.** A project would normally have a significant impact from hazards and hazardous materials if: (a) the project involved a risk of accidental explosion or release of hazardous substances (including, but not limited to oil, pesticides, chemicals, or radiation); or (b) the project is involved in the creation of any health hazard or potential health hazard.

### Construction

Accidental conditions during construction of the project could occur as a result of any of the following: direct dermal contact with hazardous materials; incidental ingestion of hazardous materials, or inhalation of airborne dust released from dried hazardous materials. The transportation of hazardous materials could result in accidental spills, leaks, toxic releases, fire, or explosion.

Compliance with federal, state, and local laws, regulations, and Cal/OSHA training programs would minimize or avoid potential impacts associated with the routine transport, use, or disposal of hazardous materials during construction. Appropriate documentation for all hazardous waste that is transported, stored, or used in connection with specific project-site activities would be provided as required for compliance with existing hazardous materials regulations codified in the CCR.

Construction activities on the project site would be required to comply with federal and state laws to eliminate or reduce the consequence of hazardous materials accidents. For example, employees who would work around hazardous materials would be required to wear appropriate protective equipment, and safety equipment is routinely available in all areas where hazardous materials are used. Adherence to the federal, state, and local regulations governing the transportation, use, and disposal of hazardous waste would reduce impacts associated with reasonably foreseeable upset and accident conditions during construction to less than significant.

### Operation

As stated previously, maintenance and upkeep of the proposed facilities on the Project site, including landscaping and parking areas would occasionally require the use of various solvents, cleaners, paints, oils/fuels, and pesticides/herbicides. The hazardous materials would be used, stored, and disposed of in accordance with applicable regulations and standards (such as CFR, Title 49, Chapter I; CCR, Title 8; CFR, Title 40, Part 263) that are enforced by the USEPA, USDOT, CalEPA, CalOSHA, DTSC, and County of Los Angeles Department of Public Health. As such, the Project would not create a significant hazard to the public or the environment through the reasonably foreseeable upset and accident conditions involving

the release of hazardous materials into the environment. Therefore, impacts related to hazardous materials being released into the environment would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

**c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?**

**Less than Significant Impact.** The Project site is within one quarter mile of three schools. The nearest schools to the Project site include Valor Montessori Prep (7136 Winnetka Avenue), located 0.02 miles to east of the Project site, Ingenium Charter Middle School (7330 Winnetka Avenue), located approximately 0.09 miles to the northeast of the Project site, and Fullbright Avenue Elementary School (6940 Fullbright Avenue), located approximately 0.23 miles southwest of the Project site.

As mentioned previously, the Project site is currently developed with a single-story office building and will be demolished as part of the proposed Project. The removal of any asbestos-containing materials would be required to comply with all applicable existing rules and regulations, including SCAQMD Rule 1403 (Asbestos Demolition and Renovation Activities) and Cal/OSHA regulations regarding lead-based paint. Construction of the Project would involve the temporary use of hazardous substances in the form of paint, adhesives, surface coatings and other finishing materials, and cleaning agents, fuels, and oils typically used in construction. As such, the transport, use, and disposal of construction-related hazardous materials would occur in conformance with all applicable local, State, and federal regulations governing such activities.

Thus, with compliance with applicable laws, regulations, and manufacturers' instructions, construction activities associated with the Project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing school. As such, impacts would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?**

**Less than Significant Impact.** A significant impact would occur if the Project site is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and would create a significant hazard to the public or the environment.

California Government Code Section 65962.5 requires the California Environmental Protection Agency (CalEPA) to develop and update annually the Cortese List, which is a "list" of hazardous waste sites and other contaminated sites. While California Government Code Section 65962.5 makes reference to the preparation of a "list," many changes have occurred related to web-based information access since 1992

and information regarding the Cortese List is now compiled on the websites of the DTSC, the State Water Board, and CalEPA. Based on a review of these databases, the Project site is not located on a list of hazardous material sites compiled pursuant to Section 65962.5.

A geographical search for hazardous materials sites, as defined in Government Code Section 65962.5, utilizing the online environmental database GeoTracker was performed and no records were identified on the Project site. A record for a leaking underground storage tank (LUST) was found at the northern adjoining property, 20112 Sherman Way, and received regulatory closure in 2019.

Additionally, a Phase I Environmental Site Assessment Report was prepared for the Project site, included as **Appendix D: Environmental Site Assessment**. The report found no evidence of conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or adjacent to the Project site. As such, the Project site is not located within an area with existing hazardous materials sites and existing sites in the vicinity would not be affected by the implementation of the Project. Therefore, the Project would not create a significant hazard to the public or environment. Impacts would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

**e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?**

**No Impact.** A significant impact may occur if a project is located within a public airport land use plan area, or within two miles of a public airport, and subject to a safety hazard. The closest airport to the Project site is the Van Nuys Airport that is located approximately 4.5 miles to the east. Given the distance between the Project site and the Airport, the Project would not have the potential to exacerbate current environmental conditions that would result in a safety hazard or excessive noise. Therefore, no impacts would not occur.

**Mitigation Measures:** No mitigation measures are required.

**f. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?**

**No Impact.** A significant impact may occur if a project were to interfere with roadway operations used in conjunction with an emergency response plan or emergency evacuation plan or would generate traffic congestion that would interfere with the execution of such a plan. The nearest disaster route is Sherman Way, located approximately 300 feet north of the Project site.<sup>44</sup> The proposed Project would not require the closure of any public or private streets and would not impede emergency vehicle access to the project

---

44 County of Los Angeles, Department of Public Works. "Disaster Route Maps."  
<https://pw.lacounty.gov/dsg/DisasterRoutes/city.cfm>. Accessed November 2023.

#### 4.0 Environmental Checklist and Evaluation

site or surrounding area. Additionally, emergency access to and from the project site would be provided in accordance with requirements of the Los Angeles Fire Department (LAFD). In the event of an unusual emergency situations, highways and arterial streets that connect to the major freeways would serve as potential evacuation routes. The Project would not interfere with either any emergency response plan or evacuation plan. No impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

**g. Expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?**

**Less than Significant.** A significant impact would occur if the proposed Project exposed people and structures to high risk of wildfire. According to the City's General Plan Safety Element, the Project site is not located within a high, moderate or extreme fire hazard area. Additionally, the Project site is also not located in a State Responsibility Area of land.<sup>45</sup> The Project site is not in or near an SRA or LRA or lands classified as high fire hazard severity zones. Therefore, implementation of the proposed Project would not expose people or structures to a significant risk of loss, injury, or death involving wildland fires and impacts would be less than significant.

### 4.10 HYDROLOGY AND WATER QUALITY

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>HYDROLOGY AND WATER QUALITY - Would the project:</b>				
a. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces, in a manner which would:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
i. Result in substantial erosion or siltation on or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iv. Impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Discussion

**a. Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?**

**Less than Significant Impact.**

A significant impact would occur if the proposed Project discharges water that does not meet the quality standards of agencies which regulate surface water quality and water discharge into storm water

drainage systems, or does not comply with all applicable regulations as governed by the Los Angeles Regional Water Quality Control Board (LARWQCB).

## Construction

During Project construction activities, stormwater runoff from the Project site could cause erosion and/or transport sediment off site and into municipal storm drain systems. Thus, pollutant discharges associated with storage, handling, use, and disposal of chemicals, adhesives, coatings, lubricants, and fuel could result in adverse impacts to water quality. The Project would be required to implement a Stormwater Pollution Prevention Plan (SWPPP) under the National Pollutant Discharge Elimination System (NPDES) Construction General Permit (Order No. 2009-0009-DWQ, as well as its subsequent amendments 2010-0014-DWQ and 2012-0006-DWQ). The SWPPP would set forth Best Management Practices (BMPs) for stormwater and non-stormwater discharges, including, but not limited to, sandbags, storm drain inlets protection, stabilized construction entrance/exit, wind erosion control, and stockpile management, to minimize the discharge of pollutants in stormwater runoff during construction. The SWPPP would be carried out in compliance with State Water Resources Control Board requirements and would also be subject to review by the City for compliance.

With compliance with these existing regulatory requirements, impacts to water quality and waste discharge requirements during construction would be less than significant, and no mitigation measures would be required.

## Operation

Operation of the Project would introduce sources of potential water pollution that are typical of educational developments (e.g., cleaning solvents, pesticides for landscaping, and petroleum products associated with circulation areas). Stormwater runoff from precipitation events could also potentially carry urban pollutants into municipal storm drains. However, in accordance with Section 64.70.2 of the City's Municipal Code, best management practices (BMPs) would be implemented on-site adhering to NPDES and MS4 stormwater runoff requirements to address City and State water quality requirements. Therefore, impacts to surface water quality would be less than significant and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

### **b. Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede substantial groundwater management of the basin?**

**Less than Significant Impact.** A significant impact would occur if the proposed Project would substantially deplete groundwater or interferes with groundwater recharge. Implementation of the proposed Project would not result in a substantial change in the amount of pervious and impervious surface across the Project site nor would it impede sustainable groundwater management of the basin.

The Project site would be served with potable water by the Los Angeles Department of Water and Power (LADWP) which obtains a majority of its water from the Los Angeles Aqueducts (LAA), local groundwater, State Water Project (supplied by the Metropolitan Water district of Southern California (MWD)), and the Colorado River Aqueduct (supplied by MWD).<sup>46</sup> Similar to existing conditions, redevelopment of the Project site would result in a negligible amount of on-site groundwater recharge opportunities and would not impact groundwater wells, change the rate or direction of flow of groundwater, impact groundwater recharge areas, or impede sustainable groundwater management of the basin. As explained above, no excavation activities are expected to occur, therefore activities are not likely to interfere with the groundwater table. In addition, the Project includes required landscaping that would infiltrate stormwater onsite. As a result, the proposed Project would not decrease groundwater supplies or interfere substantially with groundwater recharge; and the Project would not impede sustainable groundwater management of the basin. Thus, the proposed Project would have a less than significant impact. As such, impacts would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**c. Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces, in a manner which would:**

**i. Result in substantial erosion or siltation on or off site;**

**Less than Significant Impact.** A significant impact would occur if the proposed Project would substantially alter the drainage pattern of an existing stream or river such that flooding would result. The Project site is located in a highly urbanized area. There are no natural watercourses on the Project site or in the vicinity. As discussed above, the Project is developed with paved surfaces, and current stormwater runoff flows to the local storm drain system. Additionally, according to Section 64.70 of the City of Los Angeles Municipal Code, compliance with requirements outlined in the Watershed Protection Program, which sets forth uniform requirements and prohibitions for discharges and places of discharge into the storm drain system and receiving waters, are enforced by the Bureau of Sanitation and the City Flood Protection and Pollution abatement Programs.<sup>47</sup> Objectives of the Watershed Protection Program include prohibiting any discharge that may interfere with the operation of, or cause any damage to the storm drain system, or impair the beneficial use of the receiving waters. As such, the proposed Project would not result in a substantial alteration to the existing drainage pattern or to any drainage course; no erosion or siltation impacts related to such alteration would occur. Impacts would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

---

46 Los Angeles Department of Water and Power (LADWP). *Urban Water Management Plan*. 2015. <https://planning.lacity.org/eir/CrossroadsHwd/deir/files/references/M217.pdf> . Accessed November 2023.

47 City of Los Angeles. *Municipal Code*. Section 64.70 Stormwater and Urban Runoff Pollution Control.

***ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;***

**Less than Significant Impact.** A significant impact would occur if the Project would substantially alter the drainage pattern of an existing stream or river such that flooding would result. There are no streams or rivers within or immediately surrounding the Project site. However, the Project would alter site drainage through the addition of impervious surfaces, which can increase stormwater runoff volume and flow. Compliance with the City's Low Impact Development (LID) ordinance and the Los Angeles County Water Quality control Board MS4 permit requires capture and treatment of the 85th percentile, 24-hour storm event. As part of the project's final design review, the project would be required to submit design plans demonstrating locations and detailed drawings of all BMPs. Such BMPs would slow the velocity of water and allow sediment and debris to settle out of the water column, thereby minimizing the potential for downstream flooding, erosion/siltation, or exceedances of stormwater drainage system capacity. Given that the project would implement BMPs to capture and retain stormwater on-site, as described above for compliance with the County's LID ordinance and MS4 permit requirements, potential impacts related to the alteration of the site's drainage pattern would not substantially increase the rate or amount of surface runoff. Impacts would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

***iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff;***

**Less than Significant Impact.** A significant impact would occur if runoff water would exceed the capacity of existing or planned storm drain systems serving the Project site, or if the proposed Project would substantially add sources of polluted runoff. As described previously, the Project would be required to implement a SWPPP which provides BMPs that will be implemented and maintained throughout the life of a project to prevent and minimize water pollution that can be caused by storm water or urban runoff. The City's Stormwater and Urban Runoff Pollution Control Regulations contain requirements for construction activities and operation of development to integrate low impact development practices and standards for stormwater and other related requirements. Such regulations and practices are designed in consideration of existing and planned stormwater drainage systems. Conformance would be ensured during the permitting process with the Department of Building & Safety and impacts would remain less than significant and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

***iv. impede or redirect flood flows?***

**No Impact.** A significant impact would occur if the Project would be located within a 100-year or 500-year floodplain or would impede or redirect flows. The Project site is not located within a 100-year or

500-year flood hazard area as mapped by the Federal Emergency Management Agency (FEMA).<sup>48</sup> As such, the Project would not impede or redirect floodwater flows. No impacts would occur, and no mitigation measures would be required.

**Mitigation Measures:** No mitigation measures are required.

**d. In flood hazard, tsunami, or seiche zones, would the project risk release of pollutants due to project inundation?**

**No Impact.** A significant impact would occur if the Project would be located within an area susceptible to inundation by seiche, tsunami, or mudflow. As discussed above, the Project is not located within a 100-year flood hazard areas as mapped by FEMA. The Project Site is not located near the ocean or any large enclosed or semi-enclosed bodies of water, the Project would not be located within designated tsunami or seiche zones. Debris and mudflows are typically a hazard experienced in the floodplains of streams that drain very steep hillsides within the watershed. Since the Project site is located on relatively flat terrain and the surrounding vicinity has a similar grade, debris and mudflows would not be expected. Therefore, no risk of loss, injury, or death involving inundation by flood, tsunami, or seiche would occur. No impacts would occur, and no mitigation measures would be required.

**Mitigation Measures:** No mitigation measures are required.

**e. Would the project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?**

**Less than Significant Impact.** Under the California Water Code, the State of California is divided into nine regional water quality control boards (RWQCBs), which govern the implementation and enforcement of the California Water Code and the Clean Water Act. As previously stated, the Project site is located within LARWQCB region. The Water Quality Control Plan (Basin Plan) for the Coastal Watershed of Los Angeles and Ventura Counties describes the goals and policies, descriptions of conditions, discussion of solutions as well as regulatory programs to maintain standards for the basin.<sup>49</sup> Specifically, the Basin Plan (i) designates beneficial uses for surface and ground waters, (ii) sets narrative and numerical objectives that must be attained or maintained to protect the designated beneficial uses and conform to the State's antidegradation policy, and (iii) describes implementation programs to protect all waters

Accessed November 2023.

#### **4.0 Environmental Checklist and Evaluation**

in the Region. In addition, the Basin Plan incorporates all applicable State and Regional Board plans and policies and other pertinent water quality policies and regulations.

Under the NPDES permit enforced by the LARWQCB, all existing and future municipal and industrial discharges to surface waters within the City are subject to applicable local, State and/or federal regulations. The Project would comply with all provisions of the NPDES program and other applicable waste discharge requirements (WDRs), as enforced by the SARWQCB. The Project would comply with and not obstruct implementation of the LARWQCB's Basin Plan. As such, impacts would be less than significant, and no mitigation measures would be required.

**Mitigation Measures:** No mitigation measures are required.

### 4.11 LAND USE AND PLANNING

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>LAND USE AND PLANNING - Would the project:</b>				
a. Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to, the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

#### Discussion

##### a. Physically divide an established community?

**Less than Significant Impact.** A significant impact would occur if the proposed Project would be sufficiently large or configured in such a way so as to create a physical barrier within an established community. The Project site consists of a previously developed parcel with a single-story office building occupied by various medical offices. The Project site is located in a highly urbanized area surrounded by a mix of multi-family residential uses and community commercial uses to the north, low and very low density residential to the west, community commercial and low density residential to the east, and low density residential uses to the south. There is no existing residential use on the Project site or a residential use that would be physically separated or otherwise disrupted by the Project because the proposed development would remain within the boundary of the existing Project site. There are no vacant or undeveloped areas around the Project site, such that development of the Project could possibly divide an established community or result in a separation of uses or disruption of access between land uses around the Project site. Implementation of the Project would result in further infill of an already developed community. The Project would not disrupt, divide, or isolate an existing neighborhood or community directly or indirectly, as all proposed improvements would occur within the limits of the Project site. Lastly, the Project does not propose a freeway or other large infrastructure or barrier that would divide a community. Therefore, the Project would not physically divide, disrupt, or isolate an established community. Therefore, the impact would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

**b. Conflict with applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to, the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?**

**Less than Significant Impact.** A significant impact may occur if a project is inconsistent with the General Plan or zoning designations currently applicable to the Project site, and would cause adverse environmental effects, which the General Plan and zoning ordinance are designed to avoid or mitigate. Based on the City’s General Plan, the Project site is designated as Community Commercial and zoned Multiple Family Residential (RAS4-1VL-RIO). RAS4-1VL-RIO designation is intended to increase housing opportunities, enhance neighborhoods, and revitalize older commercial corridors. Schools are permitted by right within the Multiple Family Residential (RAS4-1VL-RIO) designation in accordance with the City of Los Angeles Zoning Regulations.<sup>50</sup>

**Canoga Park-Winnetka-Woodland Hills-West Hills Community Plan Consistency**

A detailed analysis of the Project’s consistency with the policies of the various elements of Canoga Park-Winnetka-Woodland Hills-West Hills Community Plan and related to topics of environmental concern is provided in **Table 4.11-1: Community Plan Consistency Analysis**. The analysis contained in **Table 4.11-1** concludes that the proposed Project would be consistent with the Community Plan because the Project is located in the a RAS4-1VL-RIO zone, which permits school uses by right without any entitlements. Therefore, implementation of the proposed Project would not result in significant land use impacts due to inconsistency with the City’s General Plan. Accordingly, impacts would be less than significant.

TABLE 4.11-1 COMMUNITY PLAN CONSISTENCY ANALYSIS	
Applicable General Plan Goal	Project Consistency
5 A community with sufficient open space in balance with new development to serve the recreational, environmental and health needs of the community.	<b>Consistent.</b> The Project site is located approximately 0.24 miles south of Runnymede Park and 0.88 miles east of Blair Park.
6 Public schools that provide a quality education for all of the city’s children, including those with special needs, and adequate school facilities to serve every neighborhood in the city.	<b>Consistent.</b> The Project include the construction of a new 2-story public school with up to 17 classrooms, a playfield, gymnasium and 54 parking spaces in the Canoga Park - Winnetka - Woodland hills - West Hills Community Plan area.

COMMUNITY PLAN CONSISTENCY ANALYSIS

Applicable General Plan Goal	Project Consistency
safety, a system of freeways and streets that provides adequate circulation to support existing, approved, and planned land uses and maintains a desired level of service at intersections.	the regional highway system.
16 Preservation and restoration of cultural resources, neighborhoods, and landmarks which have historical and/or cultural significance.	<b>Consistent.</b> There are no identified no identified State historic resources or federal resources within its boundaries nor the surrounding vicinity of the Project site and has not been determined to be eligible for listing in the National Register of Historic Places. There would be no potential for unearthing any unknown cultural or historic resources.

### Regional Transportation Plan/Sustainable Communities Strategy Consistency

The Project would be required to comply with the goals and policies of SCAG’s Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). As shown in Table 4.11-2: SCAG RTP/SCS Consistency Analysis, the proposed Project would be consistent with the goals and policies of the plan. As such, no impacts related to regional plan inconsistency would occur.

TABLE 4.11-2  
SCAG RTP/SCS CONSISTENCY ANALYSIS

RTP/SCS Policy	Project Consistency
G1 Encourage regional economic prosperity and global competitiveness.	<b>Consistent.</b> The Project would include construction of a school that would benefit regional economics by providing increased employment and education to the surrounding community.
G2 Improve mobility, accessibility, reliability, and travel safety for people and goods.	<b>Consistent.</b> As an individual development, the project is limited in its ability to maximize mobility and access for people and goods in the SCAG region. However, the Project would not increase substantial traffic impediments that would affect the accessibility of goods in the region.
G3 Ensure the preservation, security, and resilience of the regional transportation system.	<b>Not Applicable.</b> As an individual development, the Project is limited in its ability to ensure security and resilience of the regional transportation system. There are no components of the Project that would result in the deterioration of the transportation system.
G4 Increase person and goods movement and travel choices within the transportation system.	<b>Not Applicable.</b> As an individual development, the Project is limited in its ability to maximize the goods movement and travel choices within the SCAG region. However, the Project would not create substantial traffic impediments and would not affect the accessibility of goods to the surrounding area.
G5 Reduce greenhouse gas emissions and improve air quality.	<b>Consistent.</b> While the Project would not improve air quality or reduce greenhouse gas emissions, it would not prevent SCAG from implementing actions that would improve air quality within the region and the Project would incorporate various measures related to building design, landscaping, and energy systems to promote the efficient use of energy, pursuant to Title 24 CALGreen Code and Building Energy Efficiency Standards and Consistent with Policy NR-1.9.

TABLE 4.11-2  
SCAG RTP/SCS CONSISTENCY ANALYSIS

RTP/SCS Policy	Project Consistency
G6 <i>Support healthy and equitable communities</i>	<b>Consistent.</b> The Project would comply with Citywide goals and policies to support healthy and equitable communities.
G7 <i>Adapt to a changing climate and support an integrated regional development pattern and transportation network.</i>	<b>Consistent.</b> This policy would be implemented by cities and the counties within the SCAG region as part of their overall planning efforts; the Project however is consistent with commercial use planned for the area.
G8 <i>Leverage new transportation technologies and data-driven solutions that result in more efficient travel.</i>	<b>Not Applicable.</b> This policy would be implemented by cities and the counties within the SCAG region as part of the overall planning and maintenance of the regional transportation system. The Project would not conflict with this goal.
G9 <i>Encourage development of diverse housing types in areas that are supported by multiple transportation options.</i>	<b>Not Applicable.</b> The proposed Project would develop a truck terminal in an area that is designated and zoned for industrial development.
G10 <i>Promote conservation of natural and agricultural lands and restoration habitats.</i>	<b>Consistent.</b> The proposed Project would be consistent with goals and policies of the City's General Plan and would not cause significant environmental impacts to agricultural lands (refer to discussion in Section 4.2) or biological resources (refer to discussion Section 4.4).

### Municipal Code Consistency

The following provisions in **Table 4.11-3: Municipal Code Development Standards Consistency Analysis** are relevant to the proposed Project. As shown, the proposed Project would be consistent with the Development Regulations for River Improvement Overlay Districts as stated in Section 13.17. As such, the proposed Project is consistent with the applicable regulation governing development standards and impacts would be less than significant.

TABLE 4.11-3  
MUNICIPAL CODE DEVELOPMENT REGULATIONS CONSISTENCY ANALYSIS

RIO Development Regulations	Project Consistency
Landscaping 75 percent of any Project's newly landscaped area shall be planted with any combination of the following: native trees, plants and shrubs, or species defined as Watershed Wise, or species listed in the Los Angeles County River Master Plan Landscaping Guidelines and Plant Palettes	<b>Consistent.</b> The Project would adhere to these Development Standards Section 13.17.
Screening/Fencing Loading areas and off-street parking facilities of three spaces or more, either on a surface lot or in a structure, shall be screened from the abutting public right-of-way and the River. Electrical transformers, mechanical equipment, water meters and other equipment shall be screened from public view. Exterior trash enclosures shall be designed to complement the primary building with a wall height that exceeds the disposal unit it is designed to contain by at least 18 inches, have a solid roof to deter birds and block views from adjacent properties, have solid metal doors that accommodate a lock and remain closed when not in use, and not be constructed of chain link or wood.	<b>Consistent.</b> The Project would adhere to these Development Standards Section 13.17.

TABLE 4.11-3  
MUNICIPAL CODE DEVELOPMENT REGULATIONS CONSISTENCY ANALYSIS

	RIO Development Regulations	Project Consistency
Exterior Site Lighting	All site and building mounted lighting shall be designed such that it produces a maximum initial luminance value no greater than 0.20 horizontal and vertical foot candles at the site boundary, and no greater than 0.01 horizontal foot candles 15 feet beyond the site. No more than 5.0 percent of the total initial designed lumens shall be emitted at an angle of 90 degrees or higher from nadir (straight down).	<b>Consistent.</b> The Project would adhere to these Development Standards Section 13.17.

**Mitigation Measures:** No mitigation measures are required.

### 4.12 MINERAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>MINERAL RESOURCES - Would the project:</b>				
a. Result in the loss of availability of a known mineral resource that would be of future value to the region and the residents of the State?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

#### Discussion

#### a. Result in the loss of availability of a known mineral resource that would be of future value to the region and the residents of the State?

**No Impact.** A significant impact would occur if the Project would result in the loss of availability of known mineral resources of regional value or locally-imported mineral resource recovery site. The Project site is located in an urbanized portion of the City and is not used for mineral resource extraction.

The Surface Mining and Reclamation Act of 1975 was enacted in order to identify mineral resources and classify them in order to avoid premature loss of minerals and protection of sites threatened by development. Much of Los Angeles was developed prior to the designation of mineral resources zones and is considered urbanized, deeming these areas as exempt from the SMARA.<sup>51</sup> Additionally, the Project site is not located within an area of the City that is classified as Mineral Resource Zone (MRZ). The Project site has a classification of Multiple Family Residential and is located in the River Improvement Overlay District (RAS4-1VL-RIO) and is planned for community commercial uses. Furthermore, the Project site is was previously developed for commercial use and has not been used for mineral extractions. Therefore, the proposed Project would not result in the loss of availability of a known mineral resource of value to the region and State. No impacts would occur and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

#### b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?

**No Impact.** A significant impact would occur if the Project would result in the loss of availability of known mineral resources of regional value or locally-imported mineral resource recovery site. No mineral

51 City of Los Angeles. "Conservation Element." *City of Los Angeles General Plan*.

#### **4.0 Environmental Checklist and Evaluation**

extraction operations occur on the Project site. There are no known locally important mineral resource recovery sites identified on the Project site in the City's General Plan or in a specific plan or other land use plan. Therefore, the Project would not result in the loss of availability of a mineral resource or a mineral resource recovery site. No impacts would occur, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

### 4.13 NOISE

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>NOISE - Would the project:</b>				
a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

The following section summarizes and incorporates by reference information from the Noise Study report prepared by Meridian Consultants dated November 2023 on behalf of the Applicant. The Noise Study is included as **Appendix E** of this IS/ND.

### Discussion

**a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?**

**Less than Significant Impact.** A significant impact would occur if exposure of persons to or generation of noise levels are in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.

Short-term noise monitoring was conducted at five (5) locations to measure the ambient sound environment in the Project vicinity on May 23, 2023. Measurements were taken over 15-minute intervals at each location and provided in **Table 4.13-1: Ambient Noise Measurements** (refer to **Appendix E** for Noise Monitoring Locations [Figures 2 through 6]). As shown in **Table 4.13-1**, ambient noise levels ranged from a low of 58.1 dBA (Leq-15minute) southwest of the Project site along Gault Street (Site 2) to a high of 71.6 dBA (Leq-15minute) southeast of the Project site at Gault Street and Winnetka Avenue (Site 4).

**TABLE 4.13-1  
AMBIENT NOISE MEASUREMENTS**

Location Number/Description	Nearest Use	Time Period	Noise Source	dBA Leq-15- minute
1 At the Project site along Winnetka Avenue	Vacant	9:37 AM- 9:52 AM	Vehicle and pedestrian traffic along W. Beverly Boulevard	70.1
2 Southwest of the Project along Gault Street	Residential	10:15 AM- 10:30 AM	Vehicle and pedestrian traffic along N. Hoover Street	58.1
3 East of the Project site along Winnetka Avenue	School	9:21 AM- 9:36 AM	Vehicle and pedestrian traffic at N. Hoover Street and Council Street	70.7
4 Southeast of the Project site at Winnetka Avenue and Gault Street	Residential/Place of Worship	9:04 AM- 9:19 AM	Vehicle and pedestrian traffic at S. Commonwealth Avenue and W. 1 <sup>st</sup> Street	71.6
5 South of the Project site at Gault Street and Winnetka Avenue	Residential	9:54 AM- 10:09 AM	Vehicle and pedestrian traffic at N. Commonwealth Avenue and W. Beverly Boulevard	64.4

Source: Refer to Appendix E: Noise Study

Notes: dBA = A-weighted decibels; Leq = average equivalent sound level.

## Construction

Section 112.05 of the City's Municipal Code sets a maximum noise level for construction equipment of 75 dBA at a distance of 50 feet when operated within 500 feet of a residential zone. Construction equipment includes crawler-tractors, dozers, rotary drills and augers, loaders, power shovels, cranes, derricks, motor graders, paving machines, off-highway trucks, ditchers, trenchers, compactors, scrapers, wagons, pavement breakers, compressors, and pneumatic or other powered equipment. Compliance with this standard is only required where "technically feasible."<sup>52</sup> Section 41.40 of the City's Municipal Code prohibits construction between the hours of 9:00 PM and 7:00 AM Monday through Friday, 6:00 PM and 8:00 AM on Saturday, and at any time on Sunday (i.e., construction is allowed Monday through Friday between 7:00 AM to 9:00 PM; and Saturdays and National Holidays between 8:00 AM to 6:00 PM). In general, the City's Department of Building and Safety enforces noise ordinance provisions relative to equipment and the Los Angeles Police Department enforces provisions relative to noise generated by people.

Noise from Project construction activities would be affected by the amount of construction equipment, the location of this equipment, the timing and duration of construction activities, and the relative distance to noise-sensitive receptors. Construction activities that would occur during the construction

52 In accordance with the City's Noise Ordinances. "technically feasible" means that the established noise limitations can be complied with at a project site. with the use of mufflers. shields. sound barriers. and/or other noise reduction devices or techniques employed during the operation of equipment.

#### 4.0 Environmental Checklist and Evaluation

phases would generate both steady-state and episodic noise that would be heard both on and off the Project site. Each construction phase involves the use of different types of construction equipment and, therefore, has its own distinct noise characteristics. The Project would be constructed using typical construction techniques; no blasting or impact pile driving would be required.

In order to calculate construction noise levels, hourly activity or utilization factors (i.e., the percentage of normal construction activity that would occur, or construction equipment that would be active, during each hour of the day) are estimated based on the temporal characteristics of other previous and current construction projects. The hourly activity factors express the percentage of time that construction activities would emit average noise levels. Typical noise levels for each type of construction equipment were obtained from the FHWA Roadway Construction Noise Model.<sup>53</sup>

An inventory of construction equipment, including the number and types of equipment, which would be operating simultaneously within the Project Site was identified for each phase/component of construction and are provided in **Appendix E**. It is highly unlikely that all pieces of construction equipment identified would operate simultaneously in any specific location during construction because equipment is generally operated only when needed and space constraints limit the equipment that can be used at any one time in a specific location. Therefore, this modeling is considered a conservative approach to calculate the maximum noise levels that would be generated.

**Table 4.13-2: Construction Maximum Noise Estimates** presents the maximum noise impacts that are forecasted to occur at each of the noise monitoring sites. As shown in **Table 4.13-2**, average noise levels during construction would result in a maximum increase of 17.7 dBA (Leq-1hour) above the significance threshold of 5 dBA over ambient noise levels during the grading phase west of the Project at the single-family residential uses (Site 2) without implementation of noise control measures.

<sup>1</sup> Site 1 located at the Project site thus excluded from this analysis.

<sup>2</sup> Ambient noise level plus 5 dBA.

#### 4.0 Environmental Checklist and Evaluation

In devising construction noise control strategies, important options include controlling the noise at the source. Source control requirements include added benefits in promoting technological advances in the development of quieter equipment. Source control techniques can include: (1) muffler requirements, (2) maintenance and operational requirements, and (3) equipment emission level requirements. These control techniques can be used separately or in combination in order to achieve the desired results. Most control noise originates from equipment powered by either gasoline or diesel engines. A large part of the noise emitted is due to the intake and exhaust portions of the engine cycle. A remedy for controlling much of the engine noise is the specification and use of optimal muffler systems. This noise control strategy would lead to replacement of worn mufflers and to retrofitting where mufflers are not in use. Using optimal muffler systems on all equipment would reduce construction noise levels by 10 dBA or more.<sup>54</sup> A noise barrier can achieve a 5 dBA noise level reduction, when it is tall enough to break the line-of-sight to the sensitive receiver. It can achieve approximately 1.5 dBA of additional noise level reduction for each meter of barrier height. Additionally, limiting the number of noise-generating, heavy-duty construction equipment to two (2) pieces operating simultaneously would reduce construction noise levels by approximately 1.5 dBA.

Other effective methods of diminishing the noise impacts associated with individual pieces of construction equipment is to employ less noisy machinery. This is accomplished by specifying the quietest available equipment. Modifications such as dampening of metal surfaces or a redesign of a particular piece of equipment is effective in reduction noise due to vibration. These modifications are typically conducted by the manufacturer or with factory assistance. The reduction is controlled by the imposed limits on the technical capabilities of the manufacturer or the equipment user. Noise reductions of up to 5 dBA can be achieved using dampening materials.<sup>55</sup> Additionally, shields such as sound skins may achieve reductions of 20 dBA at high frequencies and 10 dBA in the middle frequency range. Sound aprons may achieve noise reductions of up to 10 dBA.<sup>56</sup> Sound aprons are typically designed from absorptive mats and are draped on the frames attached to the equipment. This material can be constructed from polyvinyl chloride (PVC) layers, lead-filled fabric, or rubber. These aprons are most useful when equipment only needs partial shielding or has to be regularly moved.

Implementation of these regulatory compliance noise control practices would result in a minimum reduction of 18 dBA (Leq-1hour). Therefore, construction noise levels would not result in a 5 dBA increase or more over ambient noise levels with implementation of basic noise control measures. Moreover, the Project would comply with Section 112.04 of the LAMC by ensuring that the operation of construction equipment would only occur between the hours of 7:00 AM and 10:00 PM on weekdays and Saturday.

---

54 FHWA. *Special Report—Measurement, Prediction, and Mitigation*. Updated June 2017. [https://www.fhwa.dot.gov/Environment/noise/construction\\_noise/special\\_report/hcn04.cfm](https://www.fhwa.dot.gov/Environment/noise/construction_noise/special_report/hcn04.cfm). Accessed November 2023.

55 FHWA. *Special Report—Measurement, Prediction, and Mitigation*.

56 FHWA. *Special Report—Measurement, Prediction, and Mitigation*.

Compliance with the above practices would ensure construction noise levels would be below the significance threshold; thus, construction noise levels would not be considered significant.

### Operation

The significance criterion used in the noise analysis for the on-site operations presented below is an increase in the ambient noise level of 5 dBA (hourly Leq) at the noise-sensitive uses, in accordance with the City’s Noise Regulations (LAMC Chapter XI). The Noise Regulations do not apply to off-site traffic (i.e., vehicles traveling on public roadways). Therefore, the significance criteria for off-site traffic noise associated with Project operations is an increase in the ambient noise level by 3 dBA or 5 dBA in CNEL (depending on the land use category) at noise-sensitive uses. In addition, the significance for composite noise levels (on-site and off-site sources) is an increase in the ambient noise level of 3 dBA or 5 dBA in CNEL (depending on the land use category) for the Project’s composite noise (both Project-related on-site and off-site sources) at noise-sensitive uses.

### Playground Noise

Noise levels within the parking areas would fluctuate with the amount of automobile and human activity, similar to the current conditions that exist along Winnetka Avenue. Sources of noise would mostly emanate within the playground area during breaks between classes and during lunchtime located at the southern portion of the site (refer to Figure 1). It is important to note, the School does not include any outdoor athletic events that would draw large spectator events. However, for purposes of this analysis and a worst-case assessment, it was assumed the playground area would be fully operational between the hours of 7:00 AM - 7:00 PM. As shown in Table 4.13-3: Operational Noise Levels (Playground), noise levels generated from the playground area would not result in any increase above ambient noise levels. For illustrative purposes, noise levels generated from the field area are shown graphically in Appendix E (refer to Figure 8: Operational Noise Level Contour Map). As such, operational impacts would not be considered significant.

Monitoring Site	Ambient Noise Levels	Modeled Operational Noise Levels (dBA, Leq)	Increase above Ambient	Significant Impact?
2	58.1	25.6	0	No
3	70.7	12.2	0	No
4	71.6	4.1	0	No
5	64.4	6.9	0	No

Source: Refer to Appendix E: Noise Study

### Fixed Mechanical Equipment Noise

The Project would introduce various stationary noise sources, including heating, ventilation, and air conditioning systems, which would be located either on the roof, the side of a structure, or on the

ground. All Project mechanical equipment would be required to be designed with appropriate noise-control devices—such as sound attenuators, acoustics louvers, or sound screens/parapet walls—to comply with noise-limitation requirements provided in Section 112.02 of the LAMC, which prohibits equipment from causing more than a 5 dBA increase in the ambient noise level. Therefore, operation of mechanical equipment on the Project building would not exceed the City’s threshold of significance.

**Mitigation Measures:** No mitigation measures are required.

**b. Generation of excessive groundborne vibration or groundborne noise levels?**

**Less than Significant Impact.** The City has not adopted a significance threshold to assess vibration impacts during construction. Thus, the Caltrans *Transportation and Construction Vibration Guidance Manual*<sup>57</sup> is used as a screening tool to assess the potential for adverse vibration effects related to structural damage and human annoyance. As such, impacts related to vibration would be considered significant if construction activities cause ground-borne vibration levels related to building damage to exceed 0.5 PPV at the nearest off-site sensitive use and related to human annoyance exceed 78 VdB at the nearest off-site sensitive use.

**Table 4.13-4: On-Site Construction Vibration Impacts—Building Damage** presents the construction vibration impacts associated with on-site construction in terms of building damage. As shown in **Table 4.13-4**, the forecasted vibration levels due to on-site construction activities would not exceed the building damage significance threshold of 0.5 PPV ips for all sites surrounding the Project area during construction.

Monitoring Site	Nearest Off-Site Building Structures	Estimated Vibration Velocity Levels at the Nearest Off-Site Structures from the Project Construction Equipment			Significance Threshold (PPV ips)	Exceeds threshold?
		Loaded Trucks	Jackhammer	Small bulldozer		
2	Residential	0.076	0.035	0.003	0.5	No
3	School	0.010	0.004	0.000	0.5	No
4	Residential/Place of Worship	0.008	0.004	0.000	0.5	No
5	Residential	0.031	0.014	0.001	0.5	No

57 Caltrans. *Transportation and Construction Vibration Guidance Manual*. September 2018. [http://www.dot.ca.gov/hq/env/noise/pub/TCVGM\\_Sep13\\_FINAL.pdf](http://www.dot.ca.gov/hq/env/noise/pub/TCVGM_Sep13_FINAL.pdf). Accessed July 2022.

**Table 4.13-5: On-Site Construction Vibration Impacts—Human Annoyance** presents the construction vibration impacts associated with on-site construction in terms of human annoyance. As shown in **Table 4.13-5**, the forecasted vibration levels due to on-site construction activities would not exceed the human annoyance significance threshold of 78 VdB for all sites surrounding the Project area during construction. Due to the distance of the Project-identified sensitive receptors, changes in elevations, and intervening structures, such as buildings and walls, on-site construction vibration would not result in a significant vibration impact with regard to building damage. Impacts related to building damage and human annoyance from on-site construction vibration would be less than significant.

TABLE 4.13-5 ON-SITE CONSTRUCTION VIBRATION IMPACTS—HUMAN ANNOYANCE					
Monitoring Site	Estimated Vibration Velocity Levels at the Nearest Off-Site Structures from the Project Construction Equipment			Significance Threshold (VdB)	Exceeds threshold?

4	66	60	38	78	No
5	78	71	50	78	No

Source: US Department of Transportation, Federal Transportation Authority, Transit Noise and Vibration Impact Assessment.

Note: Site 1 located at the Project site thus excluded from this analysis.

Refer to Appendix E: Noise Study

**Mitigation Measures:** No mitigation measures are required.

**c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?**

**No Impact.** The nearest airport is the Van Nuys Airport that is located approximately 4.5 miles to the east. The Project site is located outside of the 60 dBA CNEL noise contours of Van Nuys Airport. Therefore, the proposed Project would not expose people residing or working in the Project area to excessive noise levels from airports. No impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

### 4.14 POPULATION AND HOUSING

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>POPULATION AND HOUSING - Would the project:</b>				
a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

#### Discussion

**a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?**

**No Impact.** A significant impact may occur if a project would locate new development such as homes, businesses, or infrastructure, with the effect of substantially inducing growth in the proposed area that would otherwise not have occurred as rapidly or in as great a magnitude. The proposed Project involves construction of a school and related improvements on a previously developed parcel.

The State of California requires that cities plan for changes in population and attend to housing and employment needs; if growth is projected, each city must accommodate a share of the region’s anticipated growth. These projections are provided to the City by SCAG. The City must then demonstrate that it has accommodated, or created the “capacity” for, these projected levels of population, housing, and employment through its Community Plans. SCAG forecasts population and job growth of the cities and counties in the six county Southern California Region. SCAG estimates an employment growth of 287,600 between the years 2016 and 2045 in the City of Los Angeles.<sup>58</sup>

The Project would include a two-story building consisting of up to 17 classrooms of educational space generating on-site employment. The Project would generate the need for approximately 60 employees which represents less than 0.1 percent of the estimated employment growth between 2016 and 2045. In addition, the employees that would fill the jobs generated by the Project are anticipated to come from the region, as the unemployment rate of the City of Los Angeles in September 2023 was 5.3 percent.<sup>59</sup>

58 SCAG. “Table 14 – Jurisdiction-Level Growth Forecast.” *Connect SoCal Demographics and Growth Forecast*. [https://scag.ca.gov/sites/main/files/file-attachments/0903fconnectsocial\\_demographics-and-growth-forecast.pdf](https://scag.ca.gov/sites/main/files/file-attachments/0903fconnectsocial_demographics-and-growth-forecast.pdf). Accessed November 2023.

59 United States Bureau of Labor Statistics (BLS). “Western Information Office.” Los Angeles, CA. [https://www.bls.gov/regions/west/ca\\_losangeles\\_msa.htm](https://www.bls.gov/regions/west/ca_losangeles_msa.htm). Accessed November 2023.

Due to these levels of unemployment, it is anticipated that new employees at the Project site would already reside within commuting distance and would not generate needs for any housing. As such, no additional housing would be required as a result of the proposed Project. No impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

**b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?**

**No Impact.** A significant impact would occur if the Project would displace a substantial quantity of existing residences or a substantial number of people. The proposed Project involves construction of a commercial retail center and related improvements on a previously developed parcel. Therefore, the proposed Project would not displace any existing housing, necessitating the construction or replacement housing elsewhere. No impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

### 4.15 PUBLIC SERVICES

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>PUBLIC SERVICES</b>				
Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a. Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

#### Discussion

Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

##### a. Fire Protection?

**Less than Significant Impact.** A significant impact would occur if the local fire department could not adequately serve the proposed Project, necessitating a new or physically altered station. Los Angeles Fire Department (LAFD) is designated within the City and would be the first responder in the event of an emergency to the Project site. The nearest fire station to the Project site is Fire Station No. 72 located approximately 1.0 mile southwest 6811 De Soto Avenue. Development of the Project would impact fire protection services by placing additional demand on existing fire protection resources should its resources not be augmented. To offset the increased demand for fire protection services, the Project would be conditioned by the City to provide a minimum of fire safety and support fire suppression activities, including compliance with State and local fire codes, a fire hydrant system, and paved access.

As part of the permitting process, the Project plans would be reviewed by the Los Angeles Department of Building and Safety, as well as the Los Angeles Fire Department ensure the Project meets the fire protection requirements. Additionally, the proposed facility would be required to comply with City fire suppression standards including current CBC and would provide adequate fire access. The increase in fire service demands from the Project would not require construction of a new or physically altered fire station that could cause environmental impacts. Furthermore, the City of Los Angeles Municipal Code,

Section 57.408., requires a fee payment that the City applies to funding of public facilities, including law enforcement facilities, vehicles, and equipment to offset the incremental increase in demand for fire protection services that the Project would create.<sup>60</sup> As such, the development of the Project site would not increase demand on the existing fire protection services. Therefore, impacts would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

#### **b. Police Protection?**

**Less than Significant Impact.** A significant impact would occur if the local police department could not adequately serve the proposed Project, necessitating a new or physically altered station. The Project site is serviced by the Los Angeles Police Department (LAPD) and is within the Topanga Division service area and their office is located at 21501 Schoenborn Street, approximately 2.1 miles northwest of the Project site.<sup>61</sup> Construction sites, if not properly managed, have the potential to attract criminal activity (such as trespassing, theft, and vandalism) and can become a distraction for local law enforcement from more pressing matters that require their attention. Consistent with existing operations, the Project site would be gated and locked when not in use during both construction and operation of the proposed Project. Thus, the proposed Project would not need permanent security or additional measures to minimize local law enforcement services to the Project site. Additionally, the City of Los Angeles Municipal Code, Section 57.408. requires a fee payment that the City applies to the funding of public facilities, including law enforcement facilities, vehicles, and equipment, to offset the incremental increase in the demand for police protection services that the Project would create. The Project is not expected to result in the need for new or physically altered police facilities to maintain acceptable service ratios, response times, or other performance objectives. Impacts would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

#### **c. Schools?**

**No Impact.** A significant impact would occur if the proposed Project would include substantial employment or population growth, which could generate a demand for school facilities that would exceed the capacity of the school district. The Project does not propose construction of new residential uses. As such, no housing would be constructed or replaced due to the Project. The Project would not directly or indirectly induce population which would also directly or indirectly induce school enrollment. The Project does include the construction of the School consisting of a total of 457 students, up to 17 classrooms

---

60 City of Los Angeles. *Municipal Code*. Chapter 5. Article 7. Section 57.408.

61 City of Los Angeles Police Department. "Topanga Community Police Station." <https://www.lapdonline.org/lapd-contact/valley-bureau/topanga-community-police-station/?zip=7111%20winnetka%20ave%20los%20angeles%20>. Accessed November 2023.

within a 2-story building, a playfield, gymnasium and 54 parking spaces. The students that would enroll in the school constructed by the Project are anticipated to come from the region. As such, no impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

#### d. Parks?

**No Impact.** A significant impact would occur if the proposed Project would exceed the capacity or capability of the local park system to serve the proposed Project. The Project site does not include a park or any recreational facility such as a trail. Implementation of the Project would not impact parks within the vicinity of the Project, as construction and operation would occur within the Project site. As such, no impacts would occur.

**Mitigation Measures:** No mitigation measures are required.

#### e. Other Public Facilities?

**No Impact.** A significant impact would occur if the proposed Project would result in substantial employment or population growth that could generate a demand for other public facilities, including libraries, which exceed the capacity available to serve the Project site, necessitating new or physically altered public facilities. As previously discussed, development of the Project would not result in a direct increase in the population of the Project area and would not increase the demand for public services, including public health services and library services which would require the construction of new or expanded public facilities. Employees needed to operate the proposed Project are anticipated to come from the Project region and substantial usage of other public facilities is not anticipated to occur. Therefore, impacts related to other public services would be less than significant. No impacts would occur and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

### 4.16 RECREATION

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>RECREATION - Would the project:</b>				
a. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

#### Discussion

**a. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?**

**No Impact.** A significant impact may occur if a project would include substantial employment or population growth which could generate an increased demand for public park facilities that exceeds the capacities of existing parks and causes premature deterioration of the park facilities. The Project proposes construction of a school facility and does not propose development of residential uses which could create a demand on nearby parks and/or recreational facilities. Additionally, the employees needed to operate the Project are anticipated to come from the existing labor force in the region. The closest park to the Project site is the Runnymede Park located approximately 0.24 miles to the north. Additionally, Blair Park is located approximately 0.88 miles to the west. Project employees may use the park for breaks or recreation; however, the use of the park by Project employees would not lead to a physical deterioration of the park. As such, the Project would not substantially increase the demand for off-site public parks and recreational facilities, such that substantial physical deterioration of those facilities would occur or be accelerated. No impacts to parks and recreational facilities would occur.

**Mitigation Measures:** No mitigation measures are required.

**b. Include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?**

**No Impact.** The Project would not include the development of public recreational facilities or require the expansion of recreational facilities. As mentioned previously, the Project includes construction of a school facility on a previously developed parcel. The implementation of the proposed Project would not directly or indirectly result in growth in the proposed Project area, and therefore would not require the

#### **4.0 Environmental Checklist and Evaluation**

construction or expansion of recreational facilities. Therefore, no growth-related impacts to recreational resources would occur.

**Mitigation Measures:** No mitigation measures are required.

## 4.17 TRANSPORTATION AND TRAFFIC

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>TRANSPORTATION/TRAFFIC - Would the project:</b>				
a. Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

The following section summarizes and incorporates by reference information from the *Transportation Assessment* prepared by Overland Traffic Consultants, Inc. dated July 2023 on behalf of the Applicant. The *Transportation Assessment* is included as **Appendix F** of this MND.

**a. Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities?**

**Less than Significant Impact.** A significant impact may occur if the Project conflicts with an applicable plan, ordinance, or policy establishing measures of effectiveness for the performance of the circulation system. The Project proposes the development of the School consisting of a total of 457 students, up to 17 classrooms within a 2-story building, a playfield, gymnasium and 54 parking spaces. As discussed in **Appendix F: Transportation Assessment**, the Project would generate approximately 618 daily vehicle trips.

According to the City's General Plan, Winnetka Avenue and Sherman Way are classified as "Boulevard II" and "Boulevard II Divided Scenic," respectively.<sup>62</sup> Boulevard II is considered the City's widest streets and provide regional access to major destinations, and they can accommodate four to six travel lanes and may have raised medians.<sup>63</sup> These roadways can carry high traffic volumes and are the primary thoroughfares linking the City with adjacent cities and the regional highway system.

62 City of Los Angeles. "Canoga Park-Winnetka-Woodland Hills-West Hills Community Plan." *City of Los Angeles General Plan*.

63 City of Los Angeles. *Complete Streets Design Guide*. [https://planning.lacity.org/odocument/c9596f05-0f3a-4ada-93aa-e70bbde68b0b/Complete\\_Street\\_Design\\_Guide.pdf](https://planning.lacity.org/odocument/c9596f05-0f3a-4ada-93aa-e70bbde68b0b/Complete_Street_Design_Guide.pdf). Accessed November 2023.

An accessible path of travel would be provided from the public way to the building entrance. All pathways would be paved. Access to the Project site would be provided via a full access driveway located along Gault Street. The Gault Street driveway would be used for means of ingress during the school day for drop off and pick up purposes. All egress would happen via the driveway along Winnetka Ave. The drop-off and pick-up lane is sufficiently long to mitigate any spill over onto surrounding streets.

The Project does not anticipate any change in ridership for buses or other forms of public transportation as no bus stops are located on Winnetka Avenue or within the immediate Project site area. Additionally, the Project does not plan to construct any additional bike or pedestrian facilities. Likewise, the Project would not remove or obstruct any bicycle or pedestrian facilities. As such, the Project would not conflict with a program, plan, ordinance, or policy addressing the circulation system. The Project does not anticipate any operation-related transportation impacts seeing as the Project would not induce substantial population growth. Therefore, impacts would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

#### **b. Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivisions (b)?**

**Less than Significant Impact.** CEQA Guidelines Section 15064.3, subdivision (b), focuses on newly adopted criteria (VMT) adopted pursuant to SB 743 for determining the significance of transportation impacts. Pursuant to SB743, the focus of transportation analysis changes from vehicle delay to VMT.

The Los Angeles Department of Transportation (LADOT) adopted the *Transportation Assessment Guidelines* (TAG) in August 2019. The TAG identified significant VMT impact thresholds for each of seven Area Planning Commission (APC) sub-areas in the City of Los Angeles. The Project is in the South Valley APC sub - area that limits daily household VMT per capita to a threshold value of 9.4 and a daily work VMT per employee to a threshold value of 11.6 (15 percent below the existing VMT for the South Valley APC). The household VMT per capita is not applicable because no residential use is proposed. The Project's work VMT per employee is 10.7 per the LADOT VMT calculator tool, which is below the VMT 11.6 threshold for the South Valley APC.<sup>64</sup> Based on the City's guidelines, no VMT Project impacts are created by the development of the Project for the South Valley APC and impacts would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

---

64 See **Appendix F:** Transportation Assessment.

**b. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?**

**Less Than Significant Impact.** A significant impact could occur if a project includes a new roadway design or introduces a new land use or features into an area with specific transportation requirements and characteristics that have not been previously experienced in that area, or if Project site access or other features were designed in such a way as to create hazard conditions. The Project would not include unusual or hazardous design features and the proposed Project is compatible with existing uses. The Project proposes a land use that complements the surrounding urban development and utilizes the existing roadway network. As mentioned previously, an accessible path of travel would be provided from the public way to the building entrance. All pathways would be paved and access to the Project site would be provided via a full access driveway located along Gault Street.

The Project's driveways would conform to the City's design standards and would provide adequate sight distance, sidewalks, and pedestrian movement controls meeting the City's requirements to protect pedestrian safety. As such, impacts would be less than significant, and no mitigation would be required.

**Mitigation Measures:** No mitigation measures are required.

**d. Result in inadequate emergency access?**

**Less than Significant Impact.** A significant impact could occur if the Project design would not provide emergency access meeting the requirements of the local fire department, or in any other way threatened the ability of emergency vehicles to access and serve the Project site or adjacent uses. Access to the Project site would be provided via a full access driveway located along Gault Street and a fire lane is designated on the north end of the Project site.

A secondary disaster route is located north of the Project Site along Sherman Way.<sup>65</sup> However, all construction of the Project would be conducted on-site and would be temporary in nature. Although unknown at this time, any potential temporary closures of lanes would be required to ensure emergency access in accordance with Section 503 of the California Fire Code (Title 24, California Code of Regulations, Part 9), which would be ensured through the City's permitting process. The operation of the Project would not result in inadequate emergency access because the site would not alter existing roadway alignments nor does the operation take place in existing roadways. Therefore, operation-related impacts would be less than significant, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

---

### 4.18 TRIBAL CULTURAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>Tribal Cultural Resources - Would the project:</b>				
<i>Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:</i>				
i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ii. A resource determined by the Lead Agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision © of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivisi©(c) of Public Resource Code Section 5024.1, the Lead Agency shall consider the significance of the resource to a California Native American tribe.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Discussion

**a. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:**

**i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or**

**Less than Significant Impact.** As discussed in **Section 4.5: Cultural Resources**, the Project site does not include any identified State historic resources within its boundaries nor does the surrounding vicinity of the Project site. There are also no identified TCRs on or within one mile of the Project site as delineated by the National Register of Historic Places.<sup>66</sup>

<sup>66</sup> NPS. "National Register of Historic Places."

#### 4.0 Environmental Checklist and Evaluation

In addition, the City conducted a Historic Resources Survey Report in 2013, on behalf of the City of Los Angeles Department of City Planning's Office of Historic Resources.<sup>67</sup> The Historic Resources Survey Report provides for the most complete overview of historically significant properties and neighborhoods within the City that were considered historically sensitive at the time of its adoption. It forms the single most important resource to the City for historic preservation planning. The property is not identified as a historic resource based on the survey.

However, there is the possibility that sub-surface tribal cultural resources listed or eligible for listing in the California Register of Historical Resources or in a local register of historical resources as defined in Public Resources Code section 5020.1(k) may be encountered at deeper levels during grading. If such sub-surface tribal cultural resources are encountered during the project's earthmoving operations, work shall cease in the area of the find until a qualified archaeologist has evaluated the find in accordance with federal, State, and local guidelines, including those set forth in California Public Resources Code Section 21083.2. Per regulatory compliance measures, personnel of the proposed project shall not collect or move any archaeological materials and associated materials. The found deposits would be treated in accordance with federal, State, and local guidelines. Therefore, no impacts would occur to TCRs during the implementation of the proposed Project.

**Mitigation Measures:** No mitigation measures are required.

**ii. A resource determined by the Lead Agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subsection (c) of Public Resource Code Section 5024.1, the Lead Agency shall consider the significance of the resource to a California Native American tribe.**

**Less Than Significant Impact.** Public Resource Code Section 5024.1(c) includes criteria to be used for listing a resource in the California Register. As discussed above, the Project Sites are not listed or not eligible for listing as a historic resource.

As the proposed Project's construction and demolition activities would involve limited earthmoving work, and the site is previously graded and developed, it is unlikely that subsurface items would be discovered during construction. However, there is the possibility that sub-surface tribal cultural resources listed or eligible for listing in the California Register of Historical Resources or in a local register of historical resources as defined in Public Resources Code section 5020.1(k) may be encountered at deeper levels during grading. As discussed above, if such sub-surface tribal cultural resources are encountered during the project's earthmoving operations, work shall cease in the area of the find until a qualified archaeologist has evaluated the find in accordance with federal, State, and local guidelines, including

Accessed November 2023.

#### **4.0 Environmental Checklist and Evaluation**

those set forth in California Public Resources Code Section 21083.2. Per regulatory compliance measures, personnel of the proposed project shall not collect or move any archaeological materials and associated materials. The found deposits would be treated in accordance with federal, State, and local guidelines. No impacts would occur to TCRs during the implementation of the proposed Project.

**Mitigation Measures:** No mitigation measures are required.

### 4.19 UTILITIES AND SERVICE SYSTEMS

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>UTILITIES AND SERVICE SYSTEMS - Would the project:</b>				
a. Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water, drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Have sufficient water supplies available to serve the project and reasonable foreseeable future development during normal, dry and multiple dry years?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Comply with federal, State, and local management and reduction statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Discussion

**a. Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water, drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?**

**Less Than Significant Impact.** A significant impact may occur if a project would increase water consumption or wastewater generation to such a degree that the capacity of facilities currently serving the Project site would be exceeded. The Project applicant would redevelop the Project site, which is currently served by LADWP's water infrastructure and would install new water infrastructure at the Project site that would connect to existing water infrastructure on the Project site. The new onsite water system would convey water supplies to the proposed 2-story school building and landscaping through plumbing/landscaping fixtures that are compliant with the CalGreen Plumbing Code for efficient use of water. The proposed Project would continue to receive water supplies through the existing water lines

## 4.0 Environmental Checklist and Evaluation

on the Project site. This connection would have the capacity to provide the increased water supplies needed to serve the proposed Project, and no expansions of the water pipelines that convey water to the Project site would be required.

The Project includes installation of onsite sewer lines that would connect to the existing sewer lines on the Project site. The existing sewer lines would accommodate development of the Project site and would not require expansion to serve the proposed Project. The necessary onsite installation of wastewater infrastructure is included as part of the proposed Project and would not result in any significant impacts to wastewater.

The proposed Project would require additional drainage on-site to navigate stormwater away from the Project area towards existing City storm drains. According to the City's Sewer Master Plan, the existing sewer system capacity within the vicinity of the Project site would be able to withstand dry and wet weather events with no flooding.<sup>68</sup> Therefore, implementation of the proposed Project would not require the relocation or construction of new or expanded storm drain facilities.

Electricity for the Project site would be supplied by LADWP. The Project would not require the construction of new electrical facilities.

The Project would connect to the existing Southern California Gas natural gas distribution facilities that are adjacent to the Project site.<sup>69</sup> No new or expanded natural gas facilities would be required.

The Project would connect to existing telecommunications facilities within the Project area. Therefore, implementation of the proposed Project would not require the relocation or construction of new or expanded telecommunications facilities.

As such, impacts would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

### **b. Have sufficient water supplies available to serve the project and reasonable foreseeable future development during normal, dry and multiple dry years?**

**Less Than Significant Impact.** LADWP obtains a majority of its water from the Los Angeles Aqueducts (LAA), local groundwater, State Water Project (supplied by the Metropolitan Water district of Southern California (MWD)), and the Colorado River Aqueduct (supplied by MWD).<sup>70</sup> In order to ensure sufficient

---

68 City of Los Angeles Sanitation and Environment. *Sewer System Management Plan*. 2019. <https://www.lacitysan.org/cs/groups/public/documents/document/y250/mdm1/~edisp/cnt035427.pdf>. Accessed November 2023.

69 Southern California Gas Company. "Gas Transmission Pipeline Map." Accessed November 2023. <https://socialgas.maps.arcgis.com/apps/webappviewer/index.html?id=c85ced1227af4c8aae9b19d677969335>.

70 LADWP. *Urban Water Management Plan*.

water supplies, LADWP has diversified its water supply portfolio by making significant investments in local groundwater, recycled water, stormwater capture, and water conservation.

According to the City's Urban Water Management Plan, the estimated water demand in the LADWP service area the fiscal year ending in 2025 is estimated to be 644,706 acre feet.<sup>71</sup> The water demand of the proposed Project is estimated to be 4.6 acre feet per year or 4,104 gallons per day (gpd).<sup>72</sup> Total water demand in 2025 is expected to be 644,700 acre feet.<sup>73</sup> The Project would account for less than one (1) percent of the LADWP's capacity for providing water. The Service Area Reliability Assessment within the City's Urban Water Management Plan concludes that the LADWP, in conjunction with the MWD, has adequate supplies to meet projected demands under multiple dry year scenarios.<sup>74</sup> LADWP's demands in single dry and multiple dry years are assumed to increase by approximately 5% above normal year demands. MWD has a much larger storage capacity than the Los Angeles Aqueducts which allows for a water supply less susceptible to hydrological conditions and the ability to provide LADWP the volume of water needed to meet 100 percent of demands in single dry years. As such, LADWP's supplies would be 100% reliable during normal, single dry, and multiple dry years. Therefore, the proposed Project would have sufficient water supplies available to serve the Project site. Impacts to water supplies would be less than significant.

**Mitigation Measures:** No mitigation measures are required.

**c. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?**

**Less Than Significant.** Wastewater flows from the Project site would be conveyed to the City's Donald C. Tillman Water Reclamation Plant (DCTWRP) through existing sewer lines. The permitted treatment capacity of the DCTWRP is currently 80 million gallons per day (mgd). As of 2016, the Facility received an average of 47 mgd. As such, the WRP has an excess capacity of 33 mgd.<sup>75</sup> As stated above, the estimated water demand for the Project would be 4,104 gpd, yielding to less than one (1) percent of the excess capacity. Therefore, the Project would not exceed the wastewater capacity of the WRP. Impacts would be less than significant.

---

71 LADWP. *Urban Water Management Plan*.

72 See **Appendix A:** Air Quality/Greenhouse Gas Study.

73 LADWP. *Urban Water Management Plan*.

74 LADWP. *Urban Water Management Plan*.

75 City of Los Angeles. "Wastewater Facilities Plan." *One Water LA 2040 Plan*. 2018. [https://www.lacitysan.org/cs/groups/sg\\_owla/documents/document/y250/mdi2/~edisp/cnt026205.pdf](https://www.lacitysan.org/cs/groups/sg_owla/documents/document/y250/mdi2/~edisp/cnt026205.pdf). Accessed November 2023.

**Mitigation Measures:** No mitigation measures are required.

**d. Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?**

Less Than Significant.

## Construction

Waste generated during the project's construction phase would primarily consist of discarded materials from the the demolition of existing uses and construction of the school building, infrastructure installation, and other Project-related construction activities. The California Green Building Standards Code ("CALGreen") requires all newly constructed buildings to prepare a Waste Management Plan and divert construction waste through recycling and source reduction methods. Additionally, the City adopted the Citywide C&D Waste Recycling Ordinance (Ordinance No. 181519). The ordinance requires that all haulers of construction and demolition waste obtain a Private Solid Waste Hauler Permit from the Bureau of Sanitation. It requires that all C&D waste generated within City limits be taken to City-certified construction and demolition waste processors, where the waste would be recycled to the extent feasible. Mandatory compliance with CALGreen solid waste requirements and Ordinance 181519 will ensure that construction waste impacts are less than significant.

## Operation

The nearest landfill to the Project site is the Calabasas Landfill, located approximately 8.9 miles southwest. The Calabasas Landfill has a permitted throughput of 3,500 tons per day and a maximum capacity of 69,300,000 cubic yards with an anticipated closure date of 2029.<sup>76</sup> The Project would generate approximately 310.2 pounds of solid waste per day (lb/day) or 67.2 cubic yards per year<sup>77</sup> yielding to less than one (1) percent of the maximum capacity for the Calabasas. Therefore, the Calabasas Landfill would be able to accommodate solid waste from operation of the proposed Project, and impacts related to landfill capacity would be less than significant.

**Mitigation Measures:** No mitigation measures required.

---

76 CalRecycle. "SWIS Facility/Site Activity Details." <https://www2.calrecycle.ca.gov/SolidWaste/SiteActivity/Details/3579?siteID=1041>. Accessed November 2023.

77 CalRecycle. "Estimated Solid Waste Generation Rates." <https://www2.calrecycle.ca.gov/wastecharacterization/general/rates>. Accessed November 2023.

School rate of 0.6 per lb/person/day used to estimate Project solid waste generation.

**e. Comply with federal, State, and local management and reduction statutes and regulations related to solid waste?**

**Less Than Significant Impact.** As under current conditions, solid waste generated on site would be disposed of in accordance with all applicable federal, State, and local regulations related to solid waste. In addition, the Project would be required to comply with the California Integrated Waste Management Act of 1989 (AB 939) which was enacted to reduce, recycle, and reuse solid waste generated in the state to the maximum amount feasible. The proposed Project would result in new development that would generate an increased amount of solid waste. All solid waste-generating activities within the City are subject to the requirements set forth in Section 5.408.1 of the 2019 California Green Building Standards Code that requires demolition and construction activities to recycle or reuse a minimum of 65 percent of the nonhazardous construction and demolition waste, and AB 341 that requires diversion of a minimum of 75 percent of operational solid waste.

In addition, the proposed Project would be required comply with the City's Municipal Code Section 20.87.010, Construction and Demolition Debris Recycling and Reuse, which requires that developments must meet the minimum diversion requirement of 70 percent. In addition, the proposed Project would be required to comply with all federal, State, and local regulations related to solid waste. Therefore, the proposed Project is anticipated to result in less than significant impacts related to potential conflicts with federal, State, and local management and reduction statutes and regulations pertaining to solid waste.

**Mitigation Measures:** No mitigation measures are required.

## 4.20 WILDFIRE

If located in or near State responsibility areas or lands classified as very high fire hazard zones, would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a. Substantially impair an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Due to slope, prevailing winds, and other factors, exacerbate wildlife risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

### Discussion

#### a. Substantially impair an adopted emergency response plan or emergency evacuation plan?

**No Impact.** Wildland fire protection in California is the responsibility of either the local government, State, or the federal government. State Responsibility Areas (SRA) are the areas in the State where the State of California has the primary financial responsibility for the prevention and suppression of wildland fires. The SRA forms one large area over 31 million acres to which the California Department of Forestry and Fire Protection (CAL FIRE) provides a basic level of wildland fire prevention and protection services. Local responsibility areas (LRA) include incorporated cities, cultivated agriculture lands, and portions of the desert. LRA fire protection is typically provided by city fire departments, fire protection districts, counties, and by CAL FIRE under contract to local government.

According to the City’s General Plan Safety Element, the Project site is not located within a high, moderate or extreme fire hazard area.<sup>78</sup> Additionally, the Project site is also not located in a State Responsibility Area of land.<sup>79</sup> The Project site is not in or near an SRA or LRA or lands classified as FHSZ. The Project site is not in or near an SRA or LRA or lands classified as high fire hazard severity zones. Therefore, no impact would occur, and no mitigation measures are required.

<sup>78</sup> City of Los Angeles. *Local Hazard Mitigation Plan*.

<sup>79</sup> CalFire. “SRA Viewer.”

**Mitigation Measures:** No mitigation measures required.

**b. Due to slope, prevailing winds, and other factors, exacerbate wildlife risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?**

**No Impact.** As previously stated, the Project site is not or near an SRA or LRA or lands classified as high fire hazard severity zone. The Project is located on relatively flat land and would not change or exacerbate current risks of wildlife or pollutant concentrations from a wildfire to protect occupants. Therefore, no impacts would occur, and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?**

**No Impact.** As previously stated, the Project site is not in or near an SRA or LRA or lands classified as high fire hazard severity zone. The Project would not require the installation or maintenance of any infrastructure or utility improvements or additions. As such, impacts related to infrastructure modifications increasing fire risk would not result in any impacts and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

**d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?**

**No Impact.** As demonstrated above, the Project site is not in or near an SRA or LRA or lands classified as high fire hazard severity zones. Development of the Project site would not exacerbate wildfire hazards on site. The Project is not located near a potential flooding, landslide area, or would result in potential drainage changes. No impacts would occur and no mitigation measures are required.

**Mitigation Measures:** No mitigation measures are required.

### 4.21 MANDATORY FINDINGS OF SIGNIFICANCE

	Potentially Significant Impact	Less Than Significant with Project Mitigation	Less Than Significant Impact	No Impact
<b>MANDATORY FINDINGS OF SIGNIFICANCE - Does the project:</b>				
a. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Does the project have environmental effects which would cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Discussion

**a. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?**

**Less than Significant Impact.** A significant impact could occur only if the Project would have an identified potentially significant impact for any of the environmental topics addressed in this Initial Study. However, as described above, the Project would not result in any significant impacts. The Project is located in a densely populated urban area and would have no significant impacts with respect to biological and cultural resources. The proposed Project does not have the potential to significantly degrade the quality of the environment, substantially reduce the habitat of fish or wildlife species, or threaten to eliminate a plant animal community. The Project is located in a developed, urbanized area and will not disrupt or hinder any known habitats. Impacts would be less than significant and no mitigation measures are required.

**b. Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?**

**Less than Significant Impact.** A significant impact may occur if the proposed Project, in conjunction with the related projects, would result in impacts that are less than significant when viewed separately but significant when viewed together. There are no other related projects within the vicinity of the Project site. However, based on the preceding analysis, given the potential Project-related impacts would be mitigated to a less than significant level, implementation of the proposed Project would not result in impacts that are cumulatively considerable when evaluated with impacts of other current projects, or the effects of probable future projects. Therefore, impacts would be less than significant with mitigation incorporated.

**c. Does the project have environmental effects which would cause substantial adverse effects on human beings, either directly or indirectly?**

**Less than Significant Impact.** A significant impact may occur if the proposed Project has the potential to result in significant impacts, as discussed in the preceding sections. Based on the preceding environmental analysis, the Project would not have significant environmental effects on human beings, either directly or indirectly. Upon implementation of the Regulatory Compliance Measures applicable, compliance with existing regulations and mitigation measures, any potentially significant impacts would be reduced to less than significant levels.

# EXECUTIVE SUMMARY

---

The purposes of this air quality and greenhouse gas analysis is to provide an assessment of the impacts resulting from the Magnolia Science Academy Project (Project) and to identify any measures that may be necessary to reduce potentially significant impacts.

## **Standard Air Quality, Energy and GHG Regulatory Conditions**

The proposed project would be required to comply with the following regulatory conditions from the South Coast Air Quality Management District (SCAQMD) and State of California (State):

### ***South Coast Air Quality Management District Rules***

The following lists the SCAQMD rules that are applicable, but not limited to, the proposed project:

- Rule 402 (Nuisance): Controls the emissions of odors and other air contaminants;
- Rule 403 (Fugitive Dust): Controls the emissions of fugitive dust;
- Rule 1186 (Paved Road and Public Unpaved Roads): Controls the emissions of fugitive dust generators;
- Rule 1113 (Architectural Coating): Establishes VOC content limits

### ***State of California Rules***

The following lists the State of California Code of Regulations (CCR) air quality emission rules that are applicable, but not limited to, the proposed project.

- CCR Title 13, Article 4.8, Chapter 9, Section 2449: In use Off-Road Diesel Vehicles
- CCR Title 13, Section 2025: On-Road Diesel Truck Fleets;
- CCR Title 24 Part 6: California Building Energy Standards; and
- CCR Title 24 Part 11: California Green Building Standards.

### ***Construction Source Emissions***

Construction emissions would not contribute to short- or long-term emissions that would increase the carcinogenic effects on sensitive receptors. Construction-source odor emissions would be temporary, short-term, and intermittent in nature and would not result in persistent impacts that would affect substantial numbers of people. Potential construction-source odor impacts are therefore not considered significant.

### ***Operational Source Emissions***

Operational emissions would not contribute to short- or long-term emissions that would increase the carcinogenic effects on sensitive receptors. Emissions associated with operation would not exceed the SCAQMD-recommended thresholds. Thus, the Project would not result in a regional violation of applicable air quality standards or jeopardize the timely attainment of such standards in the South Coast Air Basin.

## ***Greenhouse Gases***

There are no federal, State, or local quantitative adopted thresholds of significance for addressing a project's GHG emissions. In the absence of any adopted numeric threshold, this analysis evaluates the significance of a project by considering whether the project conflicts with applicable regulations or requirements adopted to implement a Statewide, regional, or local plan. The Project is committed to meeting the requirements of the CALGreen Code by incorporating strategies such as low-flow toilets, low-flow faucets and other energy and resource conservation measures. The Project would comply with applicable energy, water, and waste efficiency measures specified in the Title 24 Building Energy Efficiency Standards and CALGreen standards. The Project would comply with applicable goals and policies in the Scoping Plan, 2020-2045 RTP/SCS and the Green New Deal.

## PROJECT DESCRIPTION

---

The Project site is located at 7111 Winnetka Avenue within the Canoga Park neighborhood in the City of Los Angeles, as shown in **Figure 1: Project Site Location**. The 1.74-acre (APN: 2135-038-016) is currently developed with a vacant single-story office building occupied by various medical offices including dental and orthodontics, magnetic resonance imaging (MRI), acupuncture, and an ambulance company. The Project site is bounded by Winnetka Avenue to the east and Gault Street to the south. The proposed development includes removal of the existing single story office building to construct the Magnolia Science Academy (School) consisting of a total of 457 students (297 students middle school, 100 students 6<sup>th</sup> grade, and 160 students high school) up to 17 classrooms within a 2-story building, a playfield, gymnasium and 54 parking spaces.

SOURCE: Google Earth - 2023

FIGURE 1

### AIR QUALITY

In California, jurisdiction over air quality management, enforcement, and planning is divided among 35 geographic regions. Within each region, a local air district is responsible for oversight of air quality monitoring, modeling, permitting, and enforcement to ensure that regulatory violations are avoided wherever possible.

#### *South Coast Air Quality Management District*

The South Coast Air Quality Management District (SCAQMD) shares responsibility with California Air Resource Board (CARB) for ensuring that all State and federal Ambient Air Quality Standards (AAQS) are achieved and maintained over an area of approximately 10,743 square miles. This area includes the South Coast and Salton Sea Air Basins, all of Orange County, and the nondesert portions of Los Angeles, Riverside, and San Bernardino Counties. It does not include the Antelope Valley or the nondesert portion of western San Bernardino County.

SCAQMD is responsible for controlling emissions, primarily from stationary sources. SCAQMD maintains air quality monitoring stations throughout the air basins. SCAQMD, in coordination with the Southern California Association of Governments (SCAG), is also responsible for developing, updating, and implementing the Air Quality Management Plan (AQMP) for the air basins. An AQMP is a plan prepared and implemented by an air pollution district for a county or region designated as being in nonattainment of the NAAQS or CAAQS. The term “nonattainment area” is used to refer to an air basin in which one or more AAQS are exceeded. SCAQMD also prepares the State Implementation Plan (SIP) for its jurisdiction and promulgates rules and regulations. The SIP includes strategies and tactics to be used to attain the federal ozone standards in the South Coast Air Basin. The SIP elements are taken from the most recent AQMP. SCAQMD adopted the 2022 AQMP on December 2, 2022.<sup>1</sup> The AQMP includes transportation control measures developed by SCAG from its 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy, as well as the integrated strategies and measures needed to meet the NAAQS. The AQMP demonstrates attainment of the 1-hour and 8-hour ozone NAAQS, as well as the latest 24-hour and annual PM<sub>2.5</sub> standards.

SCAQMD is responsible for limiting the number of emissions generated throughout the air basins by various stationary, area, and mobile sources. Specific rules and regulations have been adopted by the SCAQMD Governing Board that identify specific pollution-reduction measures that must be implemented in association with various uses and activities. These rules regulate not only the emissions of the federal and State criteria pollutants, but also toxic air contaminants (TACs) and acutely hazardous materials.

---

<sup>1</sup> SCAQMD, Final 2022 Air Quality Management Plan, adopted December 2, 2022, <http://www.aqmd.gov/docs/default-source/clean-air-plans/air-quality-management-plans/2022-air-quality-management-plan/final-2022-aqmp/final-2022-aqmp.pdf?sfvrsn=10>. Accessed May 2023.

The rules are also subject to ongoing refinement by SCAQMD. Among the SCAQMD rules applicable to the Project are Rule 403 (Fugitive Dust) and Rule 1113 (Architectural Coatings). Rule 403 requires the use of stringent best available control measures (BACMs) to minimize PM10 emissions during grading and construction activities. Rule 1113 limits the VOC content of coatings, with a VOC content limit for flat coatings of 50 grams per liter (g/L).<sup>2</sup> Additional details regarding these rules and other potentially applicable rules are presented as follows.

**Rule 402 (Nuisance).** This rule states that a “person shall not discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health or safety of any such persons or to the public, or which cause, or have a natural tendency to cause, injury or damage to business or property.”<sup>3</sup>

**Rule 403 (Fugitive Dust).** This rule requires fugitive dust sources to implement BACMs for all sources and prohibits all forms of visible particulate matter from crossing any property line. BACMs may include application of water or chemical stabilizers to disturbed soils covering haul vehicles; restricting vehicle speeds on unpaved roads to 15 miles per hour (mph); sweeping loose dirt from paved site-access roadways; cessation of construction activity when winds exceed 25 mph; and establishing a permanent ground cover on finished sites. SCAQMD Rule 403 is intended to reduce PM10 emissions from any transportation, handling, construction, or storage activity that has the potential to generate fugitive dust (see also Rule 1186).

**Rule 1113 (Architectural Coatings).** This rule requires manufacturers, distributors, and end users of architectural and industrial maintenance coatings to reduce VOC emissions from the use of these coatings, primarily by placing limits on the VOC content of various coating categories.

**Rule 1146.2 (Emissions of Oxides of Nitrogen from Large Water Heaters and Small Boilers and Process Heaters).** This rule requires manufacturers, distributors, retailers, refurbishers, installers, and operators of new and existing units to reduce NOx emissions from natural-gas-fired water heaters, boilers, and process heaters as defined in this rule.

**Rule 1186 (PM10 Emissions from Paved and Unpaved Roads, and Livestock Operations).** This rule applies to owners and operators of paved and unpaved roads and livestock operations. The rule is intended to reduce PM10 emissions by requiring the cleanup of material deposited onto paved roads, use of certified street sweeping equipment, and treatment of high-use unpaved roads (see also Rule 403). Stationary emissions sources subject to these rules are regulated through SCAQMD’s permitting process.

---

<sup>2</sup> SCAQMD, Rule 1113 Architectural Coating (amended September 6, 2013), <http://www.aqmd.gov/docs/default-source/rule-book/reg-xi/r1113.pdf>. Accessed May 2023.

<sup>3</sup> SCAQMD, Rule 402—Nuisance, <http://www.aqmd.gov/docs/default-source/rule-book/rule-iv/rule-402.pdf>. Accessed May 2023.

Through this permitting process, SCAQMD also monitors the number of stationary emissions being generated and uses this information in developing AQMPs.

## **GREENHOUSE GAS**

### **2020-2045 Regional Transportation Plan/Sustainable Communities Strategy**

On May 7, 2020, SCAG's Regional Council adopted the 2020-2045 RTP/SCS (Connect SoCal) for federal transportation conformity purposes and considered approval of the full plan and for all other purposes within 120 days of this date. Following initial adoption, SCAG formally adopted the 2020-2045 RTP/SCS on September 3, 2020 to provide a roadmap for sensible ways to expand transportation options, improve air quality and bolster Southern California's long-term economic viability. The 2020-2045 RTP/SCS builds upon the progress made through implementation of the 2016-2040 RTP/SCS and includes ten goals focused on promoting economic prosperity, improving mobility, protecting the environment, and supporting healthy/complete communities. The SCS implementation strategies include focusing growth near destinations and mobility options, promoting diverse housing choices, leveraging technology innovations, and supporting implementation of sustainability policies. The SCS establishes a land use vision of center-focused placemaking, concentrating growth in and near Priority Growth Areas, transferring of development rights, urban greening, creating greenbelts and community separators, and implementing regional advance mitigation.

### **Green LA/Climate LA Plans**

The City of Los Angeles adopted *Green LA: An Action Plan to Lead the Nation in Fighting Global Warming (Green LA)*, in May 2007. Green LA set the goal of reducing the City's greenhouse gas emissions to 35 percent below 1990 levels by 2030. The emphasis of Green LA is on municipal facilities and operations followed by programs to reduce emissions in the community. To facilitate implementation of Green LA, the City adopted the Los Angeles Green Building Code. In addition, the Los Angeles Department of Water and Power (LADWP) will continue to implement programs to emphasize water conservation and will also pursue securing alternative water supplies, including recycled water and storm water capture. Furthermore, the City implemented the Recovering Energy, Natural Resources and Economic Benefit from Waste for Los Angeles (RENEW LA) plan to meet solid waste reduction goals by expanding recycling to multifamily dwellings, commercial establishments, and restaurants. Under the RENEW LA plan, the City is also developing facilities that will convert solid waste to energy without incineration. These measures would serve to reduce overall emissions from the City. Green LA is being implemented through Climate LA, which provides detailed information about each action item discussed in the Green LA framework. Action items range from harnessing wind power for electricity production and energy efficiency retrofits in City buildings to converting the City's fleet vehicles to cleaner and more efficient models and reducing water consumption.

## City of Los Angeles Sustainable City pLAN and Green New Deal

On April 8, 2015, Los Angeles released the Sustainable City pLAN, which covers a multitude of environmental, social, and economic sustainability issues related to GHG emission reduction either specifically or by association. Actionable goals include increasing the green building standard for new construction, creating a benchmarking policy for building energy use, developing “blue, green, and black” waste bin infrastructure, reducing water use by 20 percent, and possibly requiring LEED Silver or better certification for new construction. In 2019, the City of Los Angeles prepared the 2019 Green New Deal, which provided an expanded vision of the pLAN, focusing on securing clean air and water and a stable climate, improving community resilience, expanding access to healthy food and open space, and promoting environmental justice for all. Through the Green New Deal, the City would reduce an additional 30 percent in GHG emissions above and beyond the 2015 pLAN and ensure that the City stays within its carbon budget between 2020 and 2050.

## City of Los Angeles Green Building Code

Per Ordinance 186,488, the Los Angeles City Council amended Chapter IX, Article 9 of the LAMC to incorporate by reference the California Green Building Standards (CALGreen) Code with certain changes and modifications. Mandatory requirements and elective measures are provided for three categories: (1) low-rise residential buildings; (2) non-residential and high-rise residential buildings; and (3) additions and alterations to non-residential and high-rise residential buildings. Specific requirements under the Los Angeles Green Building Code for new non-residential projects include:

- 30 percent of the total number of parking spaces must be EV spaces.
- For new non-residential buildings, 10 percent of the total number of parking spaces must be equipped with EV charging stations.
- Provide permanently anchored bicycle racks conveniently accessed with a minimum of four two-bike capacity racks per new building.
- Provide permanent, secure bicycle parking conveniently accessed with a minimum of two staff bicycle parking spaces per new building. Acceptable bicycle parking facilities shall be convenient from the street or staff parking area and shall meet one of the following:
  - Covered, lockable enclosures with permanently anchored racks for bicycles.
  - Lockable bicycle rooms with permanently anchored racks.
  - Lockable, permanently anchored bicycle lockers.
- Minimum standards for three-year aged solar reflectance, thermal emittance, and Solar Reflectance Index values for roofs must be met.

## City of Los Angeles General Plan

The City of Los Angeles General Plan does not have a specific element aimed at reducing GHG emissions and does not include any goals, objectives, or policies specific to reducing GHG emissions. However, five goals and their respective objectives from the Air Quality Element of the General Plan would also serve to reduce GHG emissions.

- **Goal 2:** Less reliance on single-occupancy vehicle from fewer commute and non-work trips.
  - Objective 2.1: Reduce work trips as a step towards attaining trip reduction objectives necessary to achieve regional air quality goals.
- **Goal 3:** Efficient management of transportation facilities and system infrastructure using cost-effective system management and innovative demand-management techniques.
  - Objective 3.2: Reduce vehicular traffic during peak periods.
- **Goal 4:** Minimal impacts of existing land use pattern and future land use development on air quality by addressing the relationship between land use, transportation, and air quality.
  - Objective 4.2: Reduce vehicle trips and VMT associated with land use patterns.
- **Goal 5:** Energy efficiency through land use and transportation planning, the use of renewable resources and less-polluting fuels, and the implementation of conservation measures, including passive measures, such as site orientation and tree planting.
  - Objective 5.1: Increase energy efficiency of City facilities and private developments.
  - Objective 5.2: Have a portion of the City’s service fleet be comprised of alternative fuel powered vehicles, subject to availability of funding and practical feasibility.
  - Objective 5.3: Reduce the use of polluting fuels in stationary sources.
- **Goal 6:** Citizen awareness of the linkages between personal behavior and air pollution and participation in efforts to reduce air pollution.
  - Objective 6.1: Make air quality education and citizen participation a priority in the City’s effort to achieve clean air standards.

# ENVIRONMENTAL SETTING

---

## AIR QUALITY

Ambient air quality emissions present complex environmental issues that require regulatory attention on both large and small scales. The cumulative nature of project-level and localized emissions contributing to greater regional conditions warrants that regulatory policies be instituted on national, State, and regional levels to address air quality concerns. The following sections outline the applicable regulatory framework that exists at the national, State, and regional levels for air quality.

### Regional Air Quality

USEPA is the federal agency responsible for overseeing the country's air quality and setting the NAAQS for the CAPs. The NAAQS were devised based on extensive modeling and monitoring of air pollution across the country; they are designed to protect public health and prevent the formation of atmospheric ozone. Air quality of a region is considered to be in attainment of the NAAQS if the measured ambient air pollutant levels do not exceed the applicable concentration threshold.

As noted previously, CARB is the State agency responsible for setting the CAAQS. Air quality of a region is considered to be in attainment of the CAAQS if the measured ambient air pollutant levels for O<sub>3</sub>, CO, NO<sub>2</sub>, SO<sub>2</sub>, PM<sub>10</sub>, PM<sub>2.5</sub>, and Pb are not exceeded, and all other standards are not equaled or exceeded at any time in any consecutive 3-year period.

For evaluation purposes, the SCAQMD territory is divided into 38 source receptor areas (SRAs). These SRAs are designated to provide a general representation of the local meteorological, terrain, and air quality conditions within the particular geographical area. The Project site is within SRA 6, West San Fernando Valley.<sup>4</sup> The nearest air monitoring station SCAQMD operates is located at 18330 Gault Street within the Reseda neighborhood. This station monitors O<sub>3</sub>, NO<sub>2</sub> and PM<sub>2.5</sub>. **Table 1: Air Quality Monitoring Summary** summarizes published monitoring data from 2019 through 2021, the most recent 3-year period available. The data shows that during the past few years, the region has exceeded the O<sub>3</sub> and PM<sub>2.5</sub> standards.

4 SCAQMD, General Forecast Areas and Air Monitoring Areas, map, <http://www.aqmd.gov/docs/default-source/default-document-library/map-of-monitoring-areas.pdf>. Accessed May 2023.

**TABLE 1  
AIR QUALITY MONITORING SUMMARY**

Air Pollutant	Average Time (Units)	2019	2020	2021
Ozone (O3)	State Max 1 hour (ppm)	0.122	0.142	0.110
	Days > CAAQS threshold (0.09 ppm)	14	33	4
	National Max 8 hour (ppm)	0.094	0.115	0.083
	Days > NAAQS threshold (0.075 ppm)	34	62	31
	State Max 8 hour (ppm)	0.094	0.116	0.083
	Days > CAAQS threshold (0.07 ppm)	37	65	33
Carbon monoxide (CO)		–	–	–
Nitrogen dioxide (NO2)	National Max 1 hour (ppm)	0.064	0.049	0.054
	Days > NAAQS threshold (0.100 ppm)	0	0	0
	State Max 1 hour (ppm)	0.064	0.049	0.054
	Days > CAAQS threshold (0.18 ppm)	0	0	0
Respirable particulate matter (PM10)	National Max (µg/m3)	–	–	–
	National Annual Average (µg/m3)	–	–	–
	Days > NAAQS threshold (35 µg/m3)	–	–	–
	State Max (µg/m3)	–	–	–
	State Annual Average (µg/m3)	–	–	–
Fine particulate matter (PM2.5)	National Max (µg/m3)	30.0	73.8	55.5
	National Annual Average (µg/m3)	9.1	11.0	10.0
	Days > NAAQS threshold (35 µg/m3)	0	3	3
	State Max (µg/m3)	120.9	80.1	55.5
	State Annual Average (µg/m3)	11.9	111.0	11.6

Source: CARB, iADAM: Air Quality Data Statistics.

Note: (–) = Data not available.

USEPA and the CARB designate air basins where AAQS are exceeded as “nonattainment” areas. If standards are met, the area is designated as an “attainment” area. If there is inadequate or inconclusive data to make a definitive attainment designation, they are considered “unclassified.” Federal nonattainment areas are further designated as marginal, moderate, serious, severe, or extreme as a function of deviation from standards. The current attainment designations for the Basin are shown in **Table 2: South Coast Air Basin Attainment Status**. The Basin is currently designated as being in nonattainment at the federal level for O3 and PM2.5; and at the State level for O3, PM10, and PM2.5.

**TABLE 2  
SOUTH COAST AIR BASIN ATTAINMENT STATUS**

Pollutant	State Status	National Status
Ozone (O3)	Nonattainment	Nonattainment
Carbon monoxide (CO)	Attainment	Unclassified/Attainment
Nitrogen dioxide (NO2)	Attainment	Unclassified/Attainment
Sulfur dioxide (SO2)	Attainment	Unclassified/Attainment
Respirable particulate matter (PM10)	Nonattainment	Attainment
Fine particulate matter (PM2.5)	Nonattainment	Nonattainment

## Existing Operational Air Quality Emissions

As mentioned previously, the Project Site is currently developed with commercial use comprised of a single-story office building totaling 21,000 square feet. The building is occupied by various medical offices including dental and orthodontics, MRI center, acupuncture and an ambulance company. The current operational emissions on site. **Table 3: Existing Operational Air Quality Emissions** identifies the emissions from the existing commercial use. The most current CARB-approved, SCAQMD-recommended air quality modeling software, the California Emissions Estimator Model (CalEEMod version 2022 1.1.13), was used to estimate existing air quality operational emissions.

**TABLE 3  
EXISTING OPERATIONAL AIR QUALITY EMISSIONS**

Source	VOC	NOx	CO	SOx	PM10	PM2.5
	pounds/day					
Mobile	2.9	2.8	27.8	<0.1	2.1	0.4
Area	0.7	<0.1	0.9	<0.1	<0.1	<0.1
Energy	<0.1	0.1	0.1	<0.1	<0.1	<0.1
<b>Total</b>	<b>3.6</b>	<b>2.9</b>	<b>28.8</b>	<b>&lt;0.1</b>	<b>2.1</b>	<b>0.4</b>
SCAQMD Mass Daily Threshold	55	55	550	150	150	55
<b>Threshold exceeded?</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>

Notes: Totals in table may not appear to add exactly due to rounding in the computer model calculations. CO = carbon monoxide; Nox = nitrogen oxides; PM10 = particulate matter less than 10 microns; PM2.5 = particulate matter less than 2.5 microns; Sox = sulfur oxides; VOC = volatile organic compounds.

Refer to Appendix A.1: CalEEMod Air Quality Emission Output Files - Existing.

# GREENHOUSE GAS SETTING

## Regional Greenhouse Gas

California is the second largest contributor of GHGs in the United States and the 16<sup>th</sup> largest in the world.<sup>5</sup> In 2020, California produced 418.2 million metric tons of carbon dioxide equivalents (MMTCO<sub>2</sub>e), including imported electricity, and excluding combustion of international fuels and carbon sinks or storage. The major source of GHGs in California is transportation, contributing to 40 percent of the State’s total GHG emissions. The Statewide inventory of GHGs by sector is shown in **Table 4: California GHG Inventory 2012-2020**.

Main Sector	Emissions (MMTCO <sub>2</sub> e)								
	2012	2013	2014	2015	2016	2017	2018	2019	2020
Transportation	156.9	157.0	157.7	161.5	165.2	166.6	165.3	162.4	135.8
Industrial <sup>a,b</sup>	80.7	83.0	85.2	83.2	81.6	81.7	81.9	80.4	73.3
Electric Power	98.9	93.4	89.8	86.0	70.4	64.2	65.0	60.2	59.5
Commercial and Residential	39.2	39.1	35.6	36.3	37.2	37.6	37.4	40.5	38.7
Agriculture	35.2	33.9	33.9	32.6	32.2	31.7	32.2	31.4	31.6
High GWP <sup>c,d</sup>	15.5	16.8	17.7	18.6	19.4	20.1	20.5	20.7	21.3
Recycled and waste	8.2	8.3	8.3	8.4	8.5	8.6	8.7	8.8	8.9
<b>Total Emissions</b>	<b>434.7</b>	<b>431.5</b>	<b>428.2</b>	<b>426.6</b>	<b>414.4</b>	<b>410.6</b>	<b>411.0</b>	<b>404.5</b>	<b>369.2</b>

Source: CARB, GHG Current California Emission Inventory Data, [https://ww2.arb.ca.gov/sites/default/files/classic/cc/inventory/ghg\\_inventory\\_scopingplan\\_sum\\_2000-20.pdf](https://ww2.arb.ca.gov/sites/default/files/classic/cc/inventory/ghg_inventory_scopingplan_sum_2000-20.pdf). Accessed May 2023.

<sup>a</sup> Includes equipment used in construction, mining, oil drilling, industrial and airport ground operations.

<sup>b</sup> Reflects emissions from combustion of natural gas, diesel, and lease fuel plus fugitive emissions.

<sup>c</sup> These categories are listed in the Industrial sector of CARB’s GHG Emission Inventory sectors.

<sup>d</sup> This category is listed in the Electric Power sector of CARB’s GHG Emission Inventory sectors.

<sup>e</sup> The exceptional Aliso Canyon natural gas leak event released 1.96 MMTCO<sub>2</sub>e of unanticipated emissions in calendar year 2015 and an additional 0.53 MMTCO<sub>2</sub>e in 2016. These emissions will be mitigated in the future according to legal settlement and are presented alongside but tracked separately from routine inventory emissions.

Note: MMTCO<sub>2</sub>e - million metric tons of carbon dioxide equivalent emissions

5 California Energy Commission, Inventory of California Greenhouse Gas Emissions and Sinks: 1990 to 2004, Staff Final Report, CEC-600-2006-013-SF (December 2006).

## Existing Greenhouse Gas Emissions

The existing building is occupied by various medical offices including dental and orthodontics, MRI center, acupuncture and an ambulance company. The current operational emissions on site. **Table 5: Existing GHG Emissions** identifies the existing emissions from the existing commercial use. As shown, average existing operational annual emissions are 961 MTCO<sub>2</sub>e per year.

TABLE 5 EXISTING OPERATIONAL GHG EMISSIONS	
Source	Unmitigated MTCO <sub>2</sub> e per year
Mobile	754
Area	<1
Energy	126
Water	9
Waste	71
Refrigerant	<1
<b>Total</b>	<b>961</b>

Refer to *Appendix A for CalEEMod Output Sheets.*

Abbreviation: MTCO<sub>2</sub>e = metric tons of carbon dioxide emissions.

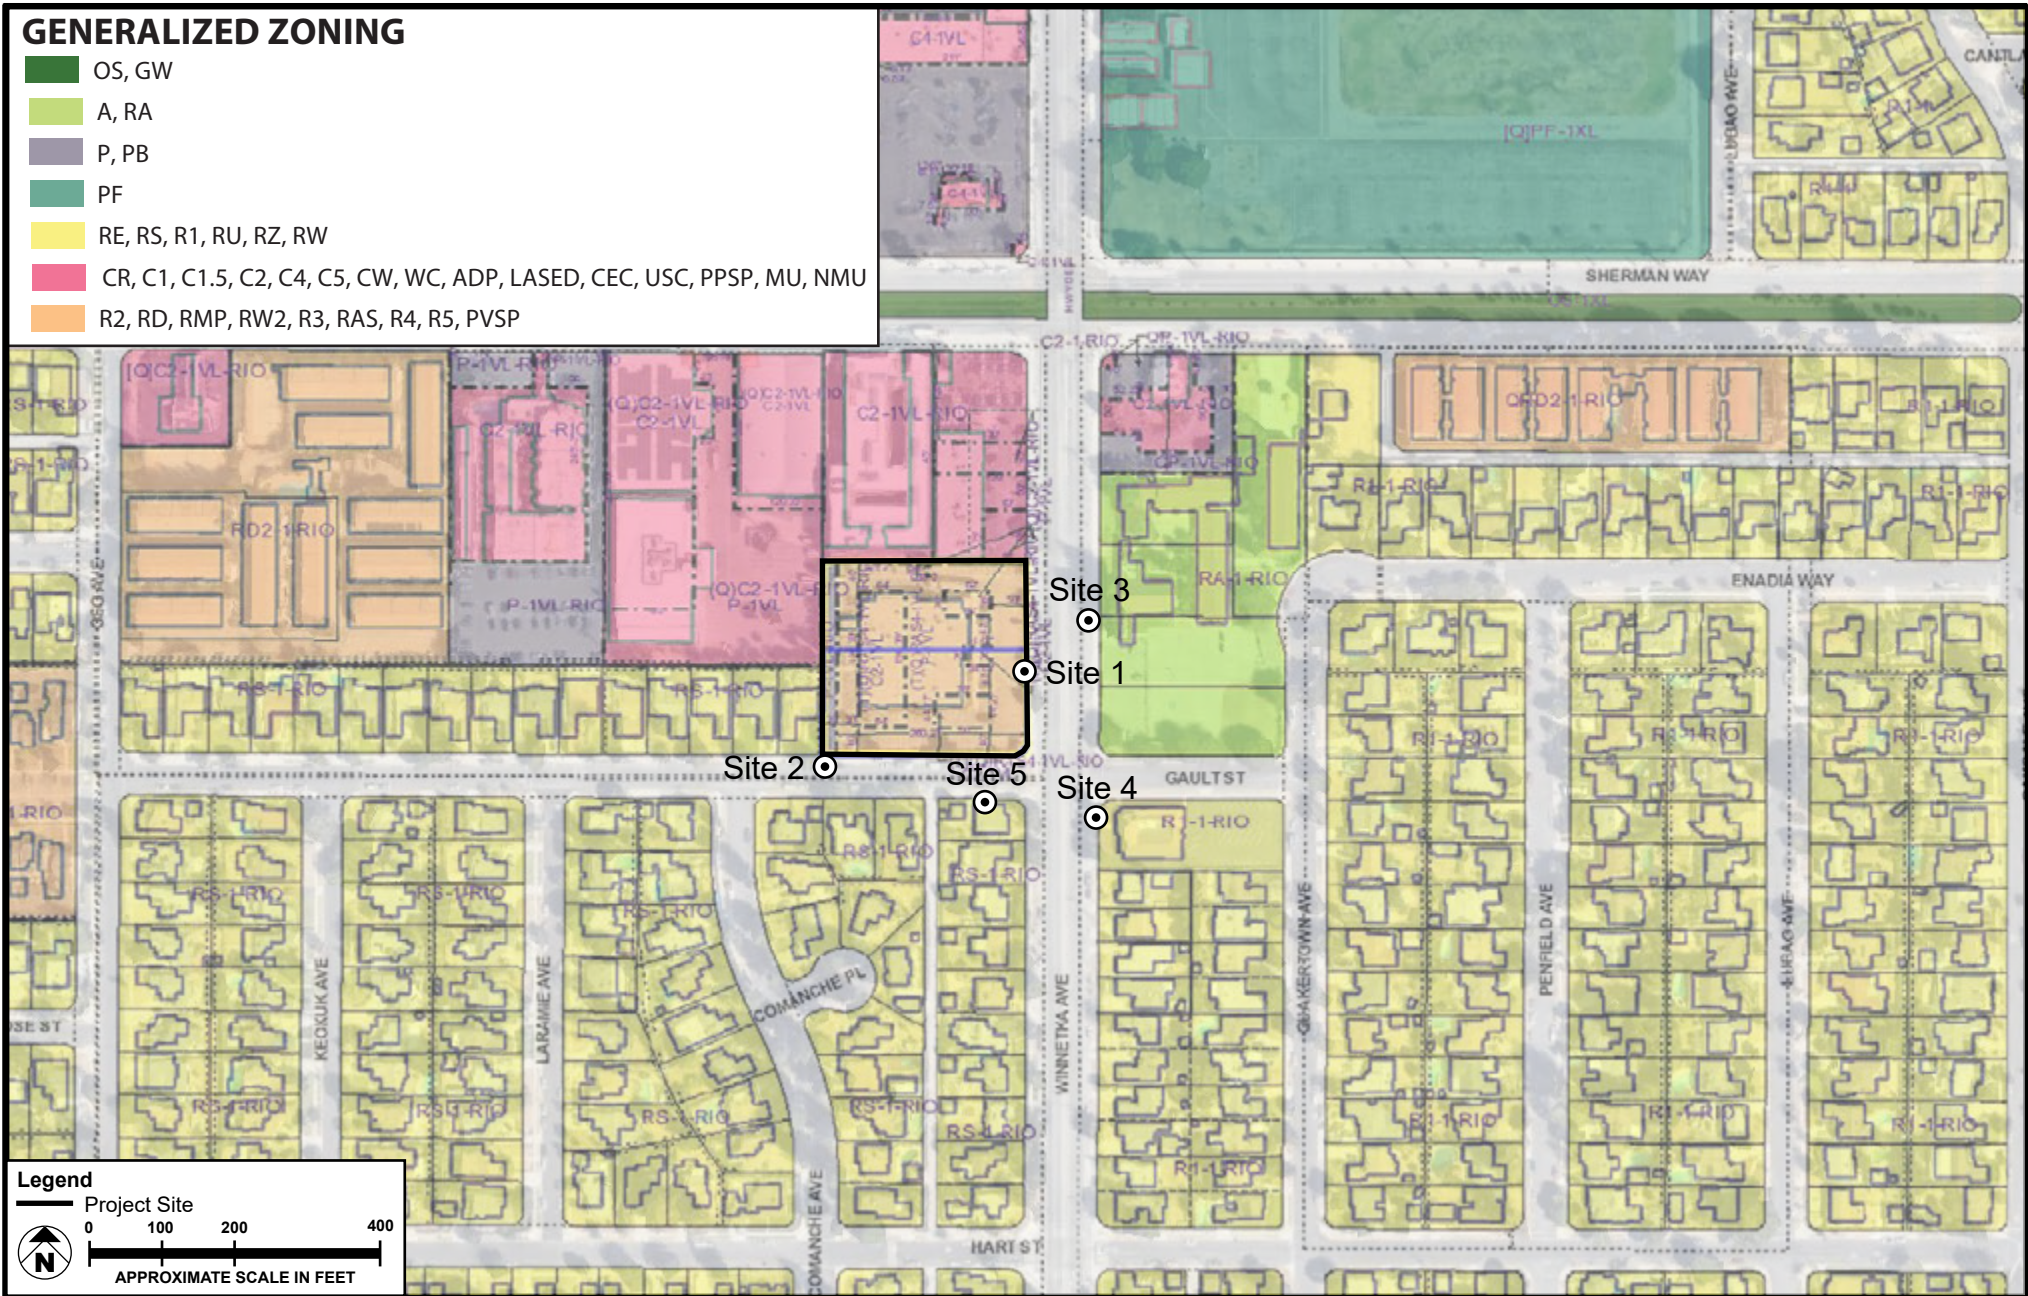

## Sensitive Receptors

SCAQMD considers a sensitive receptor to be a person in the population who is particularly susceptible to health effects due to exposure to an air contaminant. Sensitive receptors are identified near sources of air pollution to determine the potential for health hazards. Locations evaluated for exposure to air pollution include but are not limited to residences, schools, hospitals, and convalescent facilities. As shown in **Figure 2: Sensitive Receptor Map**, the parcels to the south and west along Gault Street are zoned RS-1-RIO “Suburban Zone” and contain single-family residential uses. The parcels to the east across Winnetka Avenue are zoned RA-1-RIO “Suburban Zone” and contain the Valor Montessori Prep School. The parcels to the southeast across Winnetka Avenue are zoned R1-1-RIO “One-Family Zone” and contain single-family residential uses. The parcels to the north are zoned C2-1VL-RIO “Commercial Zone” and contain commercial uses.

FIGURE 2

## AIR QUALITY

### Construction

Construction of the Project has the potential to generate temporary criteria pollutant emissions through the use of heavy-duty construction equipment and through vehicle trips generated from workers and haul trucks traveling to and from the Project site. Mobile-source emissions, primarily NO<sub>x</sub>, would result from the use of construction equipment. Construction emissions can vary substantially from day to day, depending on the level of activity, the specific type of construction activity, and prevailing weather conditions. The assessment of construction air quality impacts considers each of these potential sources.

Daily regional emissions during construction are forecasted by assuming a conservative estimate of construction activities (i.e., all construction occurs at the earliest feasible date) and applying the mobile source and fugitive dust emissions factors. The Project would be required to comply with SCAQMD Rule 403, which identifies measures to reduce fugitive dust and is required to be implemented at all construction sites located with SCAB. Therefore, the following condition—required to reduce fugitive dust in compliance with SCAQMD Rule 403—was included in CalEEMod as a regulatory compliance measure:

- **Control Efficiency of PM<sub>10</sub>.** During construction, methods and techniques should be applied to various operations or equipment when appropriate to reduce estimated emissions related to particulate matter. This includes replacing ground cover in disturbed areas as quick as possible, yielding to emission reduction efficiency of 15 - 49 percent.<sup>6</sup>

In addition, SCAQMD Staff recommends that the Lead Agency require the use of Tier 4 construction equipment of 50 horsepower or greater during construction. Alternative, applicable strategies include equipment outfitted with Best Available Control Technology (BACT) devices and CARB certified Level 3 Diesel Particulate Filters (DPF). Level 3 DPFs are capable of achieving at least an 85 percent reduction in particulate matter emissions.<sup>7</sup> Therefore, the following condition would be considered a regulatory compliance measure:

- **Construction Equipment Controls.** During construction, all off-road construction equipment greater than 50 horsepower shall meet USEPA Tier 3 emission standards with Level 3 DPF to minimize emissions of NO<sub>x</sub> associated with diesel construction equipment.

---

6 SCAQMD, CEQA Handbook, Tables 11-4, p. 11-15 and A11-9-A, page A11-77, <http://www.aqmd.gov/docs/default-source/ceqa/handbook/localized-significance-thresholds/final-sample-construction-scenario-report.pdf>. Accessed May 2023.

7 California Air Resources Board, Verification Procedure: Stationary, <https://ww2.arb.ca.gov/our-work/programs/verification-procedure-warranty-and-use-compliance-requirements-use-strategies-4>. Accessed May 2023.

The emissions are estimated using the CalEEMod software, an emissions inventory software program recommended by SCAQMD. CalEEMod is based on outputs from the CARB off-road emissions model (OFFROAD) and the CARB on-road vehicle emissions model (EMFAC), which are emissions estimation models developed by CARB and used to calculate emissions from construction activities, including on- and off-road vehicles. The input values used in this analysis are based on conservative assumptions in CalEEMod, with appropriate, Project-specific adjustments based on equipment types and expected construction activities. These values were then applied to the construction phasing assumptions used in the criteria pollutant analysis to generate criteria pollutant emissions values for each construction activity. Detailed construction equipment lists, construction scheduling, and emissions calculations are provided in **Appendix A**.

## **Operation**

Operation of the Project has the potential to generate criteria pollutant emissions through vehicle trips traveling to and from the Project site. In addition, emissions would result from area sources on site, such as natural gas combustion, landscaping equipment, and use of consumer products.

Operational emissions were estimated using the CalEEMod software, which was used to forecast the daily regional emissions from area sources that would occur during long-term Project operations. In calculating mobile-source emissions, trip-length values were based on the distances provided in CalEEMod.

Area-source emissions are based on natural gas (building heating and water heaters), landscaping equipment, and consumer product (including paint) usage rates provided in CalEEMod. Natural gas usage factors in CalEEMod are based on the California Energy Commission's California Commercial End Use Survey data set, which provides energy demand by building type and climate zone.

## **GREENHOUSE GAS**

The analysis of the Project's GHG emissions consists of a quantitative analysis of the GHG emissions generated by the construction and operation activities and a qualitative analysis of the proposed Project's consistency with adopted GHG-related legislation, plans, and policies. This approach is in accordance with CEQA Guidelines Section 15064.4(a), which affirms the discretion of a lead agency to determine, in the context of a particular project, whether to use quantitative and/or qualitative methodologies to determine the significance of a project's impacts.

## **Emissions Inventory Modeling**

The total GHG emissions from the Project were quantified to determine the level of the Project's estimated annual GHG emissions. As with the Air Quality section calculations, construction emissions were estimated using CalEEMod by assuming a conservative estimate of construction activities (i.e., assuming all construction occurs at the earliest feasible date) and applying the mobile-source emissions factors. The modeling used the same input values as previously discussed under the methodology section for air quality. SCAQMD's *Draft Guidance Document—Interim CEQA Greenhouse Gas (GHG) Significance*

*Threshold*<sup>8</sup> recognizes that construction-related GHG emissions from projects occur over a relatively short-term period of time and contributes a relatively small portion of a project’s overall lifetime GHG emissions. The guidance recommends that a project’s construction-related GHG emissions be amortized over a 30-year project lifetime so that GHG reduction measures will address construction GHG emissions as part of the operation GHG reduction strategies. Detailed construction equipment lists, construction scheduling, and emissions calculations are provided in **Appendix A**.

CalEEMod was also used to estimate operational GHG emissions from electricity, natural gas, solid waste, water and wastewater, and landscaping equipment. CalEEMod calculates energy use from systems covered by Title 24 (e.g., heating, ventilation, and air conditioning [HVAC] system, water heating system, and lighting system); energy use from lighting; and energy use from office equipment, appliances, plug-ins, and other sources not covered by Title 24 or lighting. Mobile-source emissions were estimated based on the CARB EMFAC model. For mobile sources, CalEEMod was used to generate the vehicle miles traveled from Project operation.

With regard to energy demand, the consumption of fossil fuels to generate electricity and to provide heating and hot water generates GHG emissions. Energy demand rates were estimated based on square footage as well as predicted water supply needs for this use. Energy demand (off-site electricity generation and on-site natural gas consumption) for the Project was calculated within CalEEMod using the CEC’s CEUS data set, which provides energy demand by building type and climate zone.

Emissions of GHGs from solid waste disposal were also calculated using CalEEMod software. The emissions are based on the waste disposal rate for the land uses, the waste diversion rate, and the GHG emission factors for solid waste decomposition. The GHG emission factors, particularly for methane, depend on characteristics of the landfill, such as the presence of a landfill gas capture system and subsequent flaring or energy recovery. The default values, as provided in CalEEMod, for landfill gas capture (e.g., no capture, flaring, energy recovery), which are Statewide averages, were used in this assessment.

Emissions of GHGs from water and wastewater result from the required energy to supply and distribute the water and treat the wastewater. Wastewater also results in emissions of GHGs from wastewater treatment systems. Emissions are calculated using CalEEMod and are based on the water usage rate for the proposed use; the electrical intensity factors for water supply, treatment, and distribution and for wastewater treatment; the GHG emission factors for the electricity utility provider; and the emission factors for the wastewater treatment process.

---

8 SCAQMD, Draft Guidance Document—Interim CEQA Greenhouse Gas (GHG) Significance Threshold (October 2008).

# SIGNIFICANCE THRESHOLDS

## AIR QUALITY

### Significance Criteria

The determination of a project’s significance on air quality shall be made considering the factors provided in the SCAQMD *CEQA Air Quality Handbook* (Handbook). The City has not adopted specific Citywide significance thresholds for air quality impacts; rather, the thresholds and methodologies contained in the SCAQMD Handbook for both construction and operational emissions are utilized for evaluating projects in the City. These thresholds are described below.

### *Construction Emission Thresholds*

The Project will have a significant impact if it exceeds the construction thresholds listed in **Table 6: Construction Thresholds**.

TABLE 6 CONSTRUCTION THRESHOLDS	
Pollutant	Construction Emissions (pounds/day)
Volatile organic compounds (VOCs)	75
Nitrogen dioxide (NO <sub>2</sub> )	100
Carbon monoxide (CO)	550
Sulfur dioxide (SO <sub>2</sub> )	150
Respirable particulate matter (PM <sub>10</sub> )	150
Fine particulate matter (PM <sub>2.5</sub> )	55

### *Construction and Operational Localized Significance Thresholds*

The local significance thresholds are based on the SCAQMD’s Final *Localized Significance Threshold (LST) Methodology* (LST Methodology)<sup>9</sup> guidance document for short-duration construction activities. The SCAQMD recommends the evaluation of localized air quality impacts to sensitive receptors in the immediate vicinity of the Project site because of construction activities. The SCAQMD provides voluntary guidance on the evaluation of localized air quality impacts to public agencies conducting environmental review of projects located within its jurisdiction. Localized air quality impacts are evaluated by examining the on-site generation of pollutants and their resulting downwind concentrations. For construction, pollutant concentrations are compared to significance thresholds for particulates (PM<sub>10</sub>

9 South Coast Air Quality Management District, Final Localized Significance Threshold (LST) Methodology, (June 2003, rev. July 2008).

and PM2.5), CO, and NO2. The significance threshold for PM10 represents compliance with SCAQMD Rule 403 (Fugitive Dust). The threshold for PM2.5 is designed to limit emissions and to allow progress toward attainment of the AAQS. Thresholds for CO and NO2 represent the allowable increase in concentrations above background levels that would not cause or contribute to an exceedance of their respective AAQS.

The LST Methodology provides lookup tables of emissions that are based on construction projects of up to 5 acres in size. These LST lookup tables were developed to assist lead agencies with a simple tool for evaluating the impacts from small typical projects. Ambient conditions for West San Fernando Valley, as recorded in SRA 6 by the SCAQMD, were used for ambient conditions in determining appropriate threshold levels. Thresholds for each criteria pollutant (1.74 acres) for construction activity and Project are listed in **Table 7: Localized Significance Thresholds**.

Pollutant	Construction	Operational
	pounds/day	
Nitrogen dioxide (NO2)	131	131
Carbon monoxide (CO)	576	576
Respirable particulate matter (PM10)	5	2
Fine particulate matter (PM2.5)	4	1

*Notes: Based on a distance to sensitive receptors of 25 meters. SCAQMD's Localized Significance Threshold (LST) Methodology for CEQA Evaluations guidance document provides that projects with boundaries located closer than 25 meters to the nearest receptor should use the LSTs for receptors located at 25 meters.*

Based on the SCAQMD Handbook, thresholds for each criteria pollutant for the operations of the Project are provided in **Table 8: Operational Thresholds**.

TABLE 8 OPERATIONAL THRESHOLDS	
Pollutant	Operational Emissions (pounds/day)
Volatile organic compounds (VOCs)	55
Nitrogen dioxide (NO <sub>2</sub> )	55
Carbon monoxide (CO)	550
Sulfur dioxide (SO <sub>2</sub> )	150
Respirable particulate matter (PM <sub>10</sub> )	150
Fine particulate matter (PM <sub>2.5</sub> )	55

### ***Toxic Air Contaminants***

As set forth in the SCAQMD Handbook, the determination of significance of a project with respect TACs shall be made on a case-by-case basis, considering the following factors:

- Regulatory framework for toxic materials and process involved;
- Proximity of TACs to sensitive receptors;
- Quantity, volume, and toxicity of the contaminants expected to be emitted;
- Likelihood and potential level of exposure; and
- Degree to which project design will reduce risk of exposure.

### ***Consistency with Applicable Air Quality Plans***

Section 15125 of the State CEQA Guidelines requires an analysis of project consistency with applicable governmental plans and policies. In accordance with the SCAQMD Handbook, the following criteria were used to evaluate the Project’s consistency with SCAQMD and SCAG regional plans and policies:

- Will the Project result in any of the following:
  - Increase the frequency or severity of existing air quality violations?
  - Cause or contribute to new air quality violations?
  - Delay the timely attainment of the air quality standards or the interim emission reductions specified in the AQMP?
- Will the Project exceed the assumptions utilized in preparing the AQMP?
  - Is the Project consistent with the population and employment growth projections upon which AQMP forecasted emission levels are based?
  - Does the Project include air quality mitigation measures?
  - To what extent is Project development consistent with the AQMP land use policies?

## ***Cumulative Threshold***

SCAQMD recommends that a project be considered to result in a cumulatively considerable impact to air quality if any construction-related emissions and operational emissions from individual development projects exceed the mass daily emissions thresholds for individual projects.<sup>10</sup> The SCAQMD neither recommends quantified analyses of the emissions generated by a set of cumulative development projects nor provides thresholds of significance to be used to assess the impacts associated with these emissions. A project is also considered to result in a cumulatively considerable contribution to significant impacts if the population and employment projections for the project exceed the rate of growth defined in SCAQMD's AQMP.

## **GREENHOUSE GAS**

The majority of individual projects do not generate sufficient GHG emissions to create significant project-specific environmental effects. However, the environmental effects of a project's GHG emission can contribute incrementally to cumulative environmental effects that are significant, contributing to climate change, even if an individual project's environmental effects are limited. The issue of a project's environmental effects and contribution towards climate change typically involves an analysis of whether or not a project's contribution towards climate change is cumulatively considerable. Cumulative considerable means that the incremental effects of an individual project are significant when viewed in connection with the effects of past projects, other current projects, and probable future projects.

The City has not adopted a numerical significance threshold for assessing impacts related to GHG emissions and has not formally adopted a local plan for reducing GHG emissions. Neither the SCAQMD, the California Office of Planning and Research, CARB, CAPCOA, or any other state or relevant regional agency has adopted a numerical significance threshold for assessing GHG emissions that is applicable to the Project. Therefore, in recent environmental impact reports certified by the City of Los Angeles, the City has evaluated the significance of projects' potential impacts with regard to GHG emissions and climate change solely on consistency with plans and policies adopted for the purposes of reducing GHG emissions and mitigating the effects of climate change. The City has also quantified the project's GHG emissions for informational purposes but does not compare the quantified GHG emissions to a numeric threshold. In the absence of any adopted numeric threshold, the significance of the Project's GHG emissions is evaluated consistent with CEQA Guidelines Section 15064.4(b) by considering whether the Project complies with applicable plans, policies, regulations and requirements adopted to implement a statewide, regional, or local plan for the reduction or mitigation of GHG emissions. For this Project, the most directly applicable adopted regulatory plans to reduce GHG emissions are the 2017 Scoping Plan, the 2020-2045 RTP/SCS, the City's LA Green Plan, and the Sustainable City pLAN/Green New Deal.

---

<sup>10</sup> SCAQMD, White Paper on Regulatory Options for Addressing Cumulative Impacts from Air Pollution Emissions, board meeting, Agenda No. 29 (September 5, 2003), Appendix D, p. D-3.

# IMPACT ANALYSIS

Emissions of air pollutants were estimated for construction and operation of the Project. In California, the California Air Pollution Control Officer’s Association recommends the use CalEEMod to calculate and organize emissions data for new development projects. CalEEMod is a program that relies on project-specific information pertaining to geographic setting, utility service provision, construction scheduling and equipment inventory, and operational design features to generate estimates of air pollutant and GHG emissions.

**Table 9: Project Construction Schedule** provides the dates and durations of each of the activities that will take place during construction, as well as a brief description of the scope of work. Future dates represent approximations based on the general Project timeline and are subject to change pending unpredictable circumstances that may arise.

TABLE 9 PROJECT CONSTRUCTION SCHEDULE				
Construction Activity	Approximate Start Date	Approximate End Date	Duration (Days)	Description
Demolition	1/3/2024	1/31/2024	20	Demolition of approximately 21,000 square feet of building
Grading	2/1/2024	2/6/2024	4	Grading (balanced site) of the Project site
Building Construction	2/7/2024	7/1/2025	365	Construction of Proposed Project
Paving	6/18/2025	7/1/2025	10	Paving of asphalt surfaces
Architectural Coating	6/18/2025	7/1/2025	10	Application of architectural coatings to building materials

*Note: Refer to Appendix A.2 for CalEEMod Output Sheet.*

An assessment of air pollutant emissions was prepared utilizing the construction schedule in **Table 9**. **Table 10: Project Construction Diesel Equipment Inventory** displays the construction equipment required for each activity described in **Table 9**. Under regulatory compliance measures in CalEEMod, it was assumed that all construction activities would adhere to SCAQMD Rule 403 (Fugitive Dust) and Rule 1113 (Architectural Coatings). Additionally, regulatory compliance measures not modeled would require all heavy-duty diesel equipment engines meet minimum Tier 3 standards in accordance with CARB fleet requirements.

**TABLE 10  
PROJECT CONSTRUCTION DIESEL EQUIPMENT INVENTORY**

Phase	Off-Road Equipment Type	Amount	Daily Hours	Horsepower [HP] (Load Factor)
Demolition	Concrete/Industrial Saws	1	8	33 (0.73)
	Rubber Tired Dozers	1	8	367 (0.40)
	Tractors/Loaders/Backhoes	3	8	84 (0.37)
Grading	Graders	1	8	148 (0.41)
	Rubber Tired Dozers	1	8	367 (0.40)
	Tractors/Loaders/Backhoes	2	7	84 (0.37)
Building Construction	Cranes	1	6	367 (0.29)
	Forklifts	1	6	82 (0.20)
	Generator Sets	1	8	14 (0.74)
	Tractors/Loaders/Backhoes	1	6	84 (0.37)
	Welders	3	8	46 (0.45)
Paving	Cement and Mortar Mixers	1	6	10 (0.56)
	Pavers	1	6	81 (0.42)
	Rollers	1	7	36 (0.38)
	Tractors/Loaders/Backhoes	1	8	84 (0.37)
	Paving Equipment	1	8	89 (0.36)
Architectural Coating	Air Compressors	1	6	37 (0.48)

*Refer to Appendix A.2 for CalEEMod Output Sheets.*

# AIR QUALITY

## Construction

Maximum daily emissions of air pollutants during construction of the Project were calculated using CalEEMod. **Table 11: Maximum Construction Emissions** identifies daily emissions that are estimated for peak construction days for each construction year. Based on the modeling, construction of the Project would not exceed regional VOC, NO<sub>x</sub>, CO, SO<sub>x</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub> concentration thresholds. All criteria air pollutants would be below SCAQMD construction thresholds. As such, construction of the Project would not generate any significant environmental impacts associated with air quality compliance.

Source	VOC	NO <sub>x</sub>	CO	SO <sub>x</sub>	PM <sub>10</sub>	PM <sub>2.5</sub>
	pounds/day					
2024	1.7	16.8	17.2	<0.1	2.7	1.6
2025	54.6	15.0	20.7	<0.1	1.2	0.7
Maximum	54.6	16.8	20.7	<0.1	2.7	1.6
SCAQMD Mass Daily Threshold	75	100	550	150	150	55
<b>Threshold exceeded?</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>

Notes: CO = carbon monoxide; NO<sub>x</sub> = nitrogen oxides; PM<sub>10</sub> = particulate matter less than 10 microns; PM<sub>2.5</sub> = particulate matter less than 2.5 microns; SO<sub>x</sub> = sulfur oxides; VOC = volatile organic compounds.

Refer to Appendix A.2 for CalEEMod Output Sheets.

## Operation

Operational emissions would result primarily from passenger vehicles traveling to and from the Project site. The results presented in **Table 12 Maximum Operational Emissions** are compared to the SCAQMD-established operational significance thresholds. As shown in **Table 12**, the operational emissions would not exceed the regional VOC, NO<sub>x</sub>, CO, SO<sub>x</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub> concentration thresholds. Additionally, the operational emissions provided below would be further reduced when taking into account trip reductions from these public transit options located within the Project vicinity. As such, operation of the Project would not generate any significant environmental impacts associated with air quality compliance.

Source	VOC	NO <sub>x</sub>	CO	SO <sub>x</sub>	PM <sub>10</sub>	PM <sub>2.5</sub>
	pounds/day					
Mobile	3.2	2.9	30.4	<0.1	2.7	0.5
Area	1.8	<0.1	2.4	<0.1	<0.1	<0.1
Energy	<0.1	0.3	0.3	<0.1	<0.1	<0.1
<b>Total</b>	<b>5.0</b>	<b>3.2</b>	<b>33.1</b>	<b>&lt;0.1</b>	<b>2.7</b>	<b>0.5</b>
SCAQMD Mass Daily Threshold	55	55	550	150	150	55
<b>Threshold exceeded?</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>

Notes: Totals in table may not appear to add exactly due to rounding in the computer model calculations.

CO = carbon monoxide; NO<sub>x</sub> = nitrogen oxides; PM<sub>10</sub> = particulate matter less than 10 microns; PM<sub>2.5</sub> = particulate matter less than 2.5 microns; SO<sub>x</sub> = sulfur oxides; VOC = volatile organic compounds.

Refer to Appendix A.2 for CalEEMod Output Sheets.

## Localized Significance Thresholds

The results of the LST analysis are provided in **Table 13: Localized Construction and Operational Emissions**. These estimates assume the maximum area that would be disturbed during construction on any given day during Project buildout. It is important to note, emissions presented in **Table 13** include regulatory compliance measures such as control efficiency of PM10 (dust control measures). As shown in **Table 13**, emissions would not exceed the localized significance construction and operational thresholds.

TABLE 12 LOCALIZED CONSTRUCTION AND OPERATIONAL EMISSIONS				
Source	NOx	CO	PM10	PM2.5
	On-Site Emissions (pounds/day)			
<b>Construction</b>				
Total maximum emissions	15.9	16.0	2.6	1.6
LST threshold	131	576	5	4
<b>Threshold Exceeded?</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>
<b>Operational</b>				
Project area/energy emissions	0.3	2.6	<0.1	<0.1
LST threshold	131	576	2	1
<b>Threshold Exceeded?</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>

*Notes: Totals in table may not appear to add exactly due to rounding in the computer model calculations.*

*CO = carbon monoxide; NOx = nitrogen oxide; PM10 = particulate matter less than 10 microns; PM2.5 = particulate matter less than 2.5 microns.*

*Refer to Appendix A.2 for CalEEMod Output Sheets.*

## Toxic Air Contaminants

Project construction would result in short-term emissions of diesel particulate matter, which is a TAC. Off-road heavy-duty diesel equipment would emit diesel particulate matter over the course of the construction period. As mentioned previously, single- and multi-family residential uses are located adjacent to the site. Localized diesel particulate emissions (strongly correlated with PM2.5 emissions) would be minimal and would be substantially below localized thresholds, as shown in **Table 13**. Project compliance with the CARB anti-idling measure, which limits idling to no more than 5 minutes at any location for diesel-fueled commercial vehicles, would further minimize diesel particulate matter emissions in the Project area.

Project operations would generate only minor amounts of diesel emissions from delivery trucks and incidental maintenance activities. Trucks would comply with the applicable provisions of the CARB Truck and Bus regulation to minimize and reduce emission from existing diesel trucks. In addition, Project operations would only result in minimal emissions of air toxics from maintenance or other ongoing activities, such as from the use of architectural coatings or household cleaning products. As a result, toxic or carcinogenic air pollutants are not expected to occur in any meaningful amounts in conjunction with operation of the proposed uses within the Project site. Based on the uses expected on the Project site, potential long-term operational impacts associated with the release of TACs would be minimal and would not be expected to exceed the SCAQMD thresholds of significance.

## Odors

As shown in **Table 13**, the construction of the Project would result in emissions below the localized significance thresholds. Mandatory compliance with SCAQMD Rule 1113 would limit the number of VOCs in architectural coatings and solvents. According to SCAQMD, while almost any source may emit objectionable odors, some land uses are more likely to produce odors because of their operation. Land uses more likely to produce odors include agriculture, chemical plants, composting operations, dairies, fiberglass molding manufacturing, landfills, refineries, rendering plants, rail yards, and wastewater treatment plants. The Project does not contain any active manufacturing activities and would not convert current agricultural land to residential land uses. Therefore, objectionable odors would not be emitted by the proposed uses.

Any unforeseen odors generated by the Project will be controlled in accordance with SCAQMD Rule 402. As previously noted, Rule 402 prohibits the discharge of air contaminants that harm, endanger, or annoy individuals or the public; endanger the comfort, health or safety of individuals or the public; or cause injury or damage to business or property. Failure to comply with Rule 402 could subject the offending facility to possible fines and/or operational limitations in an approved odor control or odor abatement plan.

## Consistency with AQMP

The Basin is designated nonattainment at the federal level for O<sub>3</sub> and PM<sub>2.5</sub> and State level for O<sub>3</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub>. SCAQMD developed regional emissions thresholds, as shown in **Table 6** and **Table 8** to determine whether a project would contribute to air pollutant violations. If a project exceeds the regional air pollutant thresholds, then it would significantly contribute to air quality violations in the Basin.

As shown in **Table 11**, temporary emissions associated with construction of the Project would fall below SCAQMD thresholds for VOCs, NO<sub>x</sub>, CO, SO<sub>x</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub>. As shown in **Table 12**, long-term emissions associated with operation of the Project would not exceed SCAQMD thresholds for VOCs, NO<sub>x</sub>, CO, SO<sub>x</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub>. The Project's maximum potential NO<sub>x</sub>, CO, PM<sub>10</sub>, and PM<sub>2.5</sub> daily emissions during construction and operation were analyzed to determine potential effects on localized concentrations and to determine if the potential exists for such emissions to cause or affect a violation of an applicable AAQS. As shown in **Table 13**, NO<sub>x</sub>, CO, PM<sub>10</sub>, and PM<sub>2.5</sub> emissions would not exceed the SCAQMD localized significance thresholds.

The Project is also located in an urban area, which would reduce vehicle trips and vehicle miles traveled due to the Project's urban infill characteristic and proximity to public transit stops. These measures and features are consistent with existing recommendations to reduce air emissions.

## GREENHOUSE GAS

The forecasting of construction-related GHG emissions requires assumptions regarding the timing of construction as the emission factors for some of the Project’s construction-related GHG emission sources decline over time. As shown in **Table 14: Construction GHG Emissions**, total construction emissions would be 446 metric tons of CO<sub>2</sub>e (MTCO<sub>2</sub>e). One-time, short-term emissions are converted to average annual emissions by amortizing them over the service life of a building. For buildings in general, it is reasonable to look at a 30-year time frame because this is a typical interval before a new building requires its first major renovation.<sup>11</sup> As shown in **Table 14**, when amortized over an average 30-year Project lifetime, average annual construction emissions from the Project would be 15 MTCO<sub>2</sub>e per year.

TABLE 14 CONSTRUCTION GHG EMISSIONS	
Construction Phase	MTCO <sub>2</sub> e/Year
2024	297
2025	149
<b>Total Construction Emissions</b>	<b>446</b>
<b>30-Year Annual Amortized Rate</b>	<b>15</b>

*Refer to Appendix A.2 for CalEEMod Output Sheets.*

*Notes: GHG = greenhouse gas; MTCO<sub>2</sub>e = metric tons of carbon dioxide equivalent.*

Operation of the Project has the potential to generate GHG emissions through vehicle trips traveling to and from the Project site. In addition, emissions would result from area sources on site, such as natural gas combustion, landscaping equipment, and use of consumer products. Emissions from mobile and area sources and indirect emissions from energy and water use, wastewater, as well as waste management would occur every year after full development of the uses allowed by the Project. Operational Project emissions from area sources, energy sources, mobile sources, solid waste, and water and wastewater conveyance are shown in **Table 15: Operational GHG Emissions** below. As shown in **Table 14**, annual operational emissions from the Project would be 1,125 MTCO<sub>2</sub>e per year.

## Consistency With Applicable Plans and Policies

The proposed Project is required to comply with Title 13-Section 2449 of the CCR and the CalRecycle Sustainable (Green) Building Program regulations, which include implementation of standard control measures for equipment emissions. Adherence to these regulations, including the implementation of Best Available Control Measures (BACMs) is a standard requirement for any construction or ground-disturbance activity occurring within the Basin.

BACMs include, but are not limited to, requirements that the project proponent utilize only low sulfur fuel (i.e., having a sulfur content of 15 ppm by weight or less); ensure off-road vehicles (i.e., self-propelled diesel fueled vehicles 25 horsepower and up that were not designed to be driven on road) limit vehicle idling to five minutes or less; register and label vehicles in accordance with the ARB Diesel Off-Road Online Reporting System; restrict the inclusion of older vehicles into fleets; and retire, replace, or repower older engines or install Verified Diesel Emission Control Strategies (i.e. exhaust retrofits). Additionally, the construction contractor will recycle/reuse at least 50 percent of the construction material (including, but not limited to, proposed aggregate base, soil, mulch, vegetation, concrete, lumber, metal, and cardboard) and use “Green Building Materials,” such as those materials that are rapidly renewable or resource efficient, and recycled and manufactured in an environmentally friendly way, for at least 10 percent of the project, in accordance with CalRecycle regulations.

Long-term operational emissions typically include emissions from use of consumer products, energy and water usage, vehicles and land use emissions.

The Project is committed to meeting the requirements of the CALGreen Code by incorporating strategies such as low-flow toilets, low-flow faucets and other energy and resource conservation measures. The Project would comply with applicable energy, water, and waste efficiency measures specified in the Title 24 Building Energy Efficiency Standards and CALGreen standards.

## Senate Bill 32 and 2017 Scoping Plan

There are numerous State plans, policies, and regulations adopted for the purpose of reducing GHG emissions. The principal overall State plan is SB 32, the follow up to AB 32, the California Global Warming Solutions Act of 2006. The goal of SB 32 is to reduce GHG emissions to 40 percent below 1990 levels by 2030. CARB's 2017 Scoping Plan, which outlines a framework to achieve SB 32's 2030 target, emphasizes innovation, adoption of existing technology, and strategic investment to support its strategies for GHG emissions reductions. Statewide plans and regulations in support of these strategies, such as GHG emissions standards for vehicles (AB 1493), the Low Carbon Fuel Standard, and regulations requiring an increasing fraction of electricity to be generated from renewable sources, are being implemented at the statewide level; as such, compliance at a project-level would occur as implementation continues statewide. Therefore, the Project would be consistent with SB 32 and the 2017 Scoping Plan.

## 2020 - 2045 Regional Transportation Plan/Sustainable Communities Strategy

The SCAG's 2020-2045 RTP/SCS is forecast to help California reach its GHG reduction goals. According to the 2020-2045 RTP/SCS, the updated target for the SCAG region is 19 percent below 2005 per capita emissions levels by 2035. The revised 2035 target is higher than the previous CARB target of 13 percent for the SCAG region. The 2020-2045 RTP/SCS includes implementation strategies for focusing growth near destinations and mobility options, promoting diverse housing choices, leveraging technology innovations, supporting implementation of sustainability policies, and promoting a green region. **Table 16: Project Consistency with Applicable SCAG RTP/SCS GHG Emission Reduction Strategies** summarize the Project's consistency with applicable strategies and actions. As shown therein, the Proposed Project would be consistent with the GHG emission reduction strategies contained in the 2020-2045 RTP/SCS.

**TABLE 16**  
**PROJECT CONSISTENCY WITH APPLICABLE SCAG RTP/SCS GHG EMISSION REDUCTION STRATEGIES**

Action	Project Consistency
<b>Focus Growth Near Destinations &amp; Mobility Options</b>	
<ul style="list-style-type: none"> <li>• Emphasize land use patterns that facilitate multimodal access to work, educational and other destinations</li> <li>• Focus on a regional jobs/housing balance to reduce commute times and distances and expand job opportunities near transit and along center-focused main street</li> <li>• Plan for growth near transit investments and support implementation of first/last mile strategies</li> <li>• Promote the redevelopment of underperforming retail developments and other outmoded nonresidential uses</li> <li>• Prioritize infill and redevelopment of underutilized land to accommodate new growth, increase amenities and connectivity in existing neighborhoods</li> <li>• Encourage design and transportation options that reduce the reliance on and number of solo car trips (this could include mixed uses or locating and orienting close to existing destinations)</li> <li>• Identify ways to “right size” parking requirements and promote alternative parking strategies (e.g., shared parking or smart parking)</li> </ul>	<p><b>Consistent.</b> The Proposed Project is an infill development that would involve construction of a new school. The Project site is located within walking distance of existing residential and commercial uses. Additionally, the Project is within 0.5-mile of bus stops for Metro bus routes including the Winnetka/Sherman, Sherman/Oakdale stations. Therefore, the Project would focus growth near destinations and mobility options.</p>
<b>Leverage Technology Innovations</b>	
<ul style="list-style-type: none"> <li>• Promote low emission technologies such as neighborhood electric vehicles, shared rides hailing, car sharing, bike sharing and scooters by providing supporting and safe infrastructure such as dedicated lanes, charging and parking/drop-off space</li> <li>• Improve access to services through technology - such as telework and telemedicine as well as other incentives such as a “mobility wallet,” an app-based system for storing transit and other multi-modal payments</li> <li>• Identify ways to incorporate “micro-power grids” in communities, for example solar energy, hydrogen fuel cell power storage and power generation</li> </ul>	<p><b>Consistent.</b> Related to energy production and usage, the Project would exceed the required standard of 10 percent of the total number of on-site parking spaces with EV charging stations by designating 2 accessible stalls (EV ready) and 6 EV capable for EV parking, in accordance with LAMC Sections 99.05.106.5.3.3 and 99.05.106.5.3.6.</p>
<b>Support Implementation of Sustainability Policies</b>	
<ul style="list-style-type: none"> <li>• Pursue funding opportunities to support local sustainable development implementation projects that reduce GHG emissions</li> <li>• Support statewide legislation that reduces barriers to new construction and that incentivizes</li> </ul>	<p><b>Consistent.</b> The Project would be designed and operated to meet the applicable requirements of CALGreen and the City’s Green Building Code. The Project’s indoor water use would be minimized by 20 percent. Furthermore, energy use would be reduced by implementing the requirements of current Title 24 standards, including energy-efficient lighting and appliances. Therefore, the Project would support implementation of sustainability policies.</p>
<b>Promote a Green Region</b>	

**TABLE 16  
PROJECT CONSISTENCY WITH APPLICABLE SCAG RTP/SCS GHG EMISSION REDUCTION STRATEGIES**

Action	Project Consistency
<ul style="list-style-type: none"> <li>• Support development of local climate adaptation and hazard mitigation plans, as well as project implementation that improves community resiliency to climate change and natural hazards</li> <li>• Support local policies for renewable energy production, reduction of urban heat islands and carbon sequestration</li> <li>• Integrate local food production into the regional landscape</li> <li>• Promote more resource efficient development focused on conservation, recycling and reclamation</li> <li>• Preserve, enhance and restore regional wildlife connectivity</li> <li>• Reduce consumption of resource areas, including agricultural land</li> <li>• Identify ways to improve access to public park space</li> </ul>	<p><b>Consistent.</b> The Project is an infill development that would involve construction of a new school. Because the project is an infill development, it would not interfere with regional wildlife connectivity or convert agricultural land. The Project would comply with Sustainable City pLAn, Green New Deal, Title 24, and CALGreen. Therefore, the Project would support development of a green region.</p>

## Green LA Actions

**Table 17: Project Consistency with Applicable Green LA Actions** summarize the Project’s consistency with applicable Green LA actions. As discussed herein, the Project would be consistent with the actions and measures contained in these local GHG reduction plans.

TABLE 17 PROJECT CONSISTENCY WITH APPLICABLE GREEN LA ACTIONS	
Action	Project Consistency
<b>Energy</b>	
Present a comprehensive set of green building policies to guide and support private sector development.	<b>Consistent.</b> The Project would be designed and operated to meet the applicable requirements of CALGreen and the City’s Green Building Code.
<b>Water</b>	
Meet all additional demand for water resulting from growth through water conservation and recycling. Reduce per capita water consumption by 20 percent	<b>Consistent.</b> While this action primarily applies to the City and LADWP, the Project would incorporate water conservation features, such as low-flow fixtures, required pursuant to the current California Plumbing Code, CALGreen, and Los Angeles Plumbing Code, and Los Angeles Green Building Code. Furthermore, current CALGreen requirements require a 20 percent increase in indoor water use efficiency relative to previous building requirements.
<b>Transportation</b>	
Promote walking and biking to work, within neighborhoods, and to large events and venues	<b>Consistent.</b> The Proposed Project is an infill development that would involve construction of a new school. The Project site is located within walking distance of existing residential and commercial uses. Additionally, the Project is within 0.5-mile of bus stops for Metro bus routes including the Winnetka/Sherman, Sherman/Oakdale stations. Therefore, the Project would focus growth near destinations and mobility options.
<b>Waste</b>	
Recycle 70 percent trash by 2015	<b>Consistent.</b> The City of Los Angeles has achieved a landfill diversion rate of 76 percent. The Project would be subject to the requirements of the statewide commercial recycling program, which established a statewide goal of diverting at least 75 percent of solid waste from landfills by 2020. Compliance with existing City and State programs would achieve consistency with this measure.

# Sustainable City pLAn/Green New Deal

**Table 18: Project Consistency with Applicable Sustainable City pLAn/Green New Deal Measures** summarize the Project’s consistency with applicable Sustainable City pLAn/Green New Deal measures. As discussed, the Project would be consistent with the actions and measures contained in these local GHG reduction plans.

TABLE 18 PROJECT CONSISTENCY WITH APPLICABLE SUSTAINABLE CITY PLAN/GREEN NEW DEAL MEASURES	
Action	Project Consistency
<b>Renewable Energy</b>	
<ul style="list-style-type: none"> <li>LADWP will supply 55% renewable energy by 2025; 80% by 2036; and 100% by 2045.</li> <li>Increase cumulative megawatts by 2025; 2035; and 2050 of               <ul style="list-style-type: none"> <li>Local solar to 900-1,500 MW; 1,500-1,800 MW; and 1,950 MW</li> <li>Energy storage capacity to 1,654-1,750 MW; 3,000 MW; and 4,000 MW</li> <li>Demand response (DR) programs to 234 MW (2025) and 600 MW (2035)</li> </ul> </li> </ul>	<p><b>Consistent.</b> While this action primarily applies to the City and LADWP, LADWP is required to generate electricity that would increase renewable energy resources to 44 percent by 2024, 60 percent by 2030, and 100 percent by 2045 under SB 100. Because LADWP would provide electricity service to the Project Site, the Project would use electricity consistent with the requirements of SB 100 and City goals.</p>
<b>Local Water</b>	
<ul style="list-style-type: none"> <li>Source 70% of L.A.’s water locally and capture 150,000 acre-feet per year of stormwater by 2035.</li> <li>Recycle 100% of all wastewater for beneficial reuse by 2035.</li> <li>Build at least 10 new multi-benefit stormwater capture projects by 2025; 100 by 2035; and 200 by 2050.</li> <li>Reduce potable water use per capita by 22.5% by 2025; and 25% by 2035; and maintain reduce 2035 per capita water use through 2050.</li> <li>Install or refurbish hydration stations at 200 sites, prioritizing municipally-owned buildings and public properties such as parks, by 2035.</li> </ul>	<p><b>Consistent.</b> While this action primarily applies to the City and LADWP, the Project would incorporate water conservation features to reduce water use. The Project would be required to comply with the City’s water use restrictions on timing, area, frequency, and duration of specified allowable water usage. The Project would also be required to comply with the Title 24 standards for Water Efficiency and Conservation that are in effect at the time of development. These standards include actions such as separate water submeters for subsystems, prescriptive reduced flow rates for water and fixtures, wall-mounted urinals, and plumbing fixtures and fittings.</p>
<b>Clean and Healthy Buildings</b>	
<ul style="list-style-type: none"> <li>All new buildings will be net zero carbon by 2030; and 100% of buildings will be net zero carbon by 2050.</li> <li>Reduce building energy use per sf for all building types 22% by 2025; 34% by 2035; and 44% by 2050.</li> </ul>	<p><b>Consistent.</b> The Project would be constructed in accordance with the applicable requirements of CALGreen and the City’s Green Building Code.</p>
<b>Mobility &amp; Public Transit</b>	

**TABLE 18  
PROJECT CONSISTENCY WITH APPLICABLE SUSTAINABLE CITY PLAN/GREEN NEW DEAL MEASURES**

Action	Project Consistency
<ul style="list-style-type: none"> <li>• Increase the percentage of all trips made by walking, biking, micro-mobility/matched rides or transit to at least 35% by 2025; 50% by 2035; and maintain at least 50% by 2050.</li> <li>• Reduce vehicle miles traveled per capita by at least 13% by 2025; 39% by 2035; and 45% by 2050.</li> <li>• Ensure Los Angeles is prepared for Autonomous Vehicles (AV) by the 2028 Olympic and Paralympic Games.</li> </ul>	<p><b>Consistent.</b> The Proposed Project is an infill development that would involve construction of a new school. The Project site is located within walking distance of existing residential and commercial uses. Additionally, the Project is within 0.5-mile of bus stops for Metro bus routes including the Winnetka/Sherman, Sherman/Oakdale stations. Therefore, the Project would focus growth near destinations and mobility options.</p>
<b>Zero Emissions Vehicles</b>	
<ul style="list-style-type: none"> <li>• Increase the percentage of electric and zero emission vehicles in the city by 25% by 2025; 80% by 2035; and 100% by 2050.</li> <li>• Electrify 100% of LA Metro and LADOT buses by 2030.</li> <li>• Reduce port-related GHG emissions by 80% by 2050.</li> </ul>	<p><b>Consistent.</b> In accordance with LAMC Sections 99.05.106.5.3.3 and 99.05.106.5.3.6, the Project would designate 2 accessible stalls (EV ready) and 6 EV capable for EV parking.</p>
<b>Waste and Resource Recovery</b>	
<ul style="list-style-type: none"> <li>• Increase landfill diversion rate to 90% by 2025; 95% by 2035; and 100% by 2050</li> <li>• Reduce municipal solid waste generation per capita by at least 15% by 2030, including phasing out single-use plastics by 2028</li> <li>• Eliminate organic waste going to landfill by 2028 increase proportion of waste products and recyclables productively reused and/or repurposed within Los Angeles County to at least 25% by 2025; and 50% by 2035.</li> </ul>	<p><b>Consistent.</b> The City of Los Angeles has achieved a landfill diversion rate of 76 percent (Los Angeles Sanitation and Environment 2022). The Project would be subject to the requirements of the statewide commercial recycling program, which establishes a statewide goal of diverting at least 75 percent of solid waste from landfills by 2020. Compliance with existing City and State programs would achieve consistency with this measure.</p>
<b>Urban Ecosystems and Resilience</b>	
<ul style="list-style-type: none"> <li>• Increase tree canopy in areas of greatest need by at least 50% by 2028.</li> <li>• Complete or initiate restoration identified in the ‘ARBOR’ Plan by 2035.</li> <li>• Create a fully connected LARiverWay public access system that includes 32 miles of bike paths and trails by 2028.</li> <li>• Reduce urban/rural temperature differential by at least 1.7 degrees by 2025; and 3 degrees by 2035.</li> <li>• Ensure proportion of Angelenos living within ½ mile of a park or open space is at least 65% by 2025; 75% by 2035; and 100% by 2050.</li> <li>• Achieve and maintain ‘no-net-loss’ of native biodiversity by 2035.</li> </ul>	<p><b>Consistent.</b> The Project would be an infill development in an urbanized area and thus would not adversely impact native biodiversity.</p>

## Cumulative Impacts

Development of the Project in conjunction with the related projects near the Project site would result in an increase in construction and operational emissions in an already urbanized area of the City. However, cumulative air quality impacts from construction, based on SCAQMD guidelines, are not analyzed in a manner similar to project-specific air quality impacts. Instead, SCAQMD recommends that

a project's potential contribution to cumulative impacts should be assessed utilizing the same significance criteria as those for project-specific impacts. According to SCAQMD, individual development projects that generate construction or operational emissions that exceed SCAQMD recommended daily regional or localized thresholds for project-specific impacts, would also cause a cumulatively considerable increase in emissions for those pollutants for which the Basin is in nonattainment.

With the implementation of regulatory compliance measures such as Rule 403 (Fugitive Dust) and Rule 1113 (Architectural Coating), the Project's construction and operational emissions are not expected to significantly contribute to cumulative emissions for CO, NO<sub>x</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub>. As such, the Project's contribution to cumulative air quality emissions in combination with the related projects would not be cumulatively considerable.

As discussed previously, the Project would not jeopardize the attainment of air quality standards in the AQMP for the South Coast Air Basin and the Los Angeles County portion of the South Coast Air Basin. As such, the Project would not have a cumulatively considerable contribution to a potential conflict with or obstruction of the implementation of the AQMP regional reduction plans.

## CERTIFICATION

---

The contents of this Air Quality and Greenhouse Gas Study represent an accurate depiction of the air quality environment and impacts associated with the proposed Magnolia Science Academy Project. The information contained in this study is based on the best available information at the time of preparation. If you have any questions, please contact me directly at (818) 415-7274.

# 1. Basic Project Information

## 1.1. Basic Project Information

Data Field	Value
Project Name	Magnolia Science Academy (Existing)
Operational Year	2023
Lead Agency	—
Land Use Scale	Project/site
Analysis Level for Defaults	County
Windspeed (m/s)	2.50
Precipitation (days)	19.2
Location	7111 Winnetka Ave, Winnetka, CA 91306, USA
County	Los Angeles-South Coast
City	Los Angeles
Air District	South Coast AQMD
Air Basin	South Coast
TAZ	3854
EDFZ	17
Electric Utility	Los Angeles Department of Water & Power
Gas Utility	Southern California Gas
App Version	2022.1.1.13

## 1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description
Medical Office Building	21.0	1000sqft	0.48	21,000	0.00	—	—	—

## 4.2. Energy

### 4.2.1. Electricity Emissions By Land Use - Unmitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Land Use	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	—	623	623	0.04	0.01	—	626
Total	—	—	—	—	—	—	—	—	—	—	—	—	623	623	0.04	0.01	—	626
Daily, Winter (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	—	623	623	0.04	0.01	—	626

Total	—	—	—	—	—	—	—	—	—	—	—	—	623	623	0.04	0.01	—	626
Annual	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	—	103	103	0.01	< 0.005	—	104
Total	—	—	—	—	—	—	—	—	—	—	—	—	103	103	0.01	< 0.005	—	104

#### 4.2.3. Natural Gas Emissions By Land Use - Unmitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Land Use	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	0.01	0.01	0.11	0.10	< 0.005	0.01	—	0.01	0.01	—	0.01	—	136	136	0.01	< 0.005	—	137
Total	0.01	0.01	0.11	0.10	< 0.005	0.01	—	0.01	0.01	—	0.01	—	136	136	0.01	< 0.005	—	137
Daily, Winter (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	0.01	0.01	0.11	0.10	< 0.005	0.01	—	0.01	0.01	—	0.01	—	136	136	0.01	< 0.005	—	137
Total	0.01	0.01	0.11	0.10	< 0.005	0.01	—	0.01	0.01	—	0.01	—	136	136	0.01	< 0.005	—	137
Annual	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	< 0.005	< 0.005	0.02	0.02	< 0.005	< 0.005	—	< 0.005	< 0.005	—	< 0.005	—	22.6	22.6	< 0.005	< 0.005	—	22.6
Total	< 0.005	< 0.005	0.02	0.02	< 0.005	< 0.005	—	< 0.005	< 0.005	—	< 0.005	—	22.6	22.6	< 0.005	< 0.005	—	22.6

#### 4.3. Area Emissions by Source

## 4.3.2. Unmitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Source	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—

#### 4.4. Water Emissions by Land Use

##### 4.4.2. Unmitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Land Use	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	5.05	33.9	39.0	0.52	0.01	—	55.8
Total	—	—	—	—	—	—	—	—	—	—	—	5.05	33.9	39.0	0.52	0.01	—	55.8
Daily, Winter (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	5.05	33.9	39.0	0.52	0.01	—	55.8
Total	—	—	—	—	—	—	—	—	—	—	—	5.05	33.9	39.0	0.52	0.01	—	55.8
Annual	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	0.84	5.62	6.45	0.09	< 0.005	—	9.23
Total	—	—	—	—	—	—	—	—	—	—	—	0.84	5.62	6.45	0.09	< 0.005	—	9.23

#### 4.5. Waste Emissions by Land Use

## 4.5.2. Unmitigated

## Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Land Use	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	122	0.00	122	12.2	0.00	—	428
Total	—	—	—	—	—	—	—	—	—	—	—	122	0.00	122	12.2	0.00	—	428
Daily, Winter (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	122	0.00	122	12.2	0.00	—	428
Total	—	—	—	—	—	—	—	—	—	—	—	122	0.00	122	12.2	0.00	—	428
Annual	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	20.2	0.00	20.2	2.02	0.00	—	70.8
Total	—	—	—	—	—	—	—	—	—	—	—	20.2	0.00	20.2	2.02	0.00	—	70.8

## 4.6. Refrigerant Emissions by Land Use

## 4.6.1. Unmitigated

## Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Land Use	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
----------	-----	-----	-----	----	-----	-------	-------	-------	--------	--------	--------	------	-------	------	-----	-----	---	------

Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	0.54	0.54
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	0.54	0.54
Daily, Winter (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	0.54	0.54
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	0.54	0.54
Annual	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Medical Office Building	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	0.09	0.09
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	0.09	0.09

### 4.7. Offroad Emissions By Equipment Type

#### 4.7.1. Unmitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Equipment Type	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—

Daily, Winter (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Annual	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—

### 4.8. Stationary Emissions By Equipment Type

#### 4.8.1. Unmitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Equipment Type	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Daily, Winter (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Annual	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—

### 4.9. User Defined Emissions By Equipment Type

#### 4.9.1. Unmitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Equipment Type	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Daily, Winter (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Annual	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—

#### 4.10. Soil Carbon Accumulation By Vegetation Type

##### 4.10.1. Soil Carbon Accumulation By Vegetation Type - Unmitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Vegetation	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Total	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Daily, Winter (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—

## 5.10. Operational Area Sources

### 5.10.1. Hearths

#### 5.10.1.1. Unmitigated

### 5.10.2. Architectural Coatings

Residential Interior Area Coated (sq ft)	Residential Exterior Area Coated (sq ft)	Non-Residential Interior Area Coated (sq ft)	Non-Residential Exterior Area Coated (sq ft)	Parking Area Coated (sq ft)
0	0.00	31,500	10,500	—

### 5.10.3. Landscape Equipment

Season	Unit	Value
Snow Days	day/yr	0.00
Summer Days	day/yr	250

## 5.11. Operational Energy Consumption

### 5.11.1. Unmitigated

#### Electricity (kWh/yr) and CO<sub>2</sub> and CH<sub>4</sub> and N<sub>2</sub>O and Natural Gas (kBTU/yr)

Land Use	Electricity (kWh/yr)	CO <sub>2</sub>	CH <sub>4</sub>	N <sub>2</sub> O	Natural Gas (kBTU/yr)
Medical Office Building	329,355	690	0.0489	0.0069	425,626

## 5.12. Operational Water and Wastewater Consumption

## 5.12.1. Unmitigated

Land Use	Indoor Water (gal/year)	Outdoor Water (gal/year)
Medical Office Building	2,635,091	0.00

## 5.13. Operational Waste Generation

## 5.13.1. Unmitigated

Land Use	Waste (ton/year)	Cogeneration (kWh/year)
Medical Office Building	227	—

## 5.14. Operational Refrigeration and Air Conditioning Equipment

## 5.14.1. Unmitigated

Land Use Type	Equipment Type	Refrigerant	GWP	Quantity (kg)	Operations Leak Rate	Service Leak Rate	Times Serviced
Medical Office Building	Household refrigerators and/or freezers	R-134a	1,430	0.45	0.60	0.00	1.00
Medical Office Building	Other commercial A/C and heat pumps	R-410A	2,088	< 0.005	4.00	4.00	18.0

## 5.15. Operational Off-Road Equipment

## 5.15.1. Unmitigated

Equipment Type	Fuel Type	Engine Tier	Number per Day	Hours Per Day	Horsepower	Load Factor
----------------	-----------	-------------	----------------	---------------	------------	-------------

## 5.16. Stationary Sources

## 5.16.1. Emergency Generators and Fire Pumps

Equipment Type	Fuel Type	Number per Day	Hours per Day	Hours per Year	Horsepower	Load Factor
----------------	-----------	----------------	---------------	----------------	------------	-------------

### 5.16.2. Process Boilers

Equipment Type	Fuel Type	Number	Boiler Rating (MMBtu/hr)	Daily Heat Input (MMBtu/day)	Annual Heat Input (MMBtu/yr)
----------------	-----------	--------	--------------------------	------------------------------	------------------------------

### 5.17. User Defined

Equipment Type	Fuel Type
—	—

### 5.18. Vegetation

#### 5.18.1. Land Use Change

##### 5.18.1.1. Unmitigated

Vegetation Land Use Type	Vegetation Soil Type	Initial Acres	Final Acres
--------------------------	----------------------	---------------	-------------

#### 5.18.1. Biomass Cover Type

##### 5.18.1.1. Unmitigated

Biomass Cover Type	Initial Acres	Final Acres
--------------------	---------------	-------------

#### 5.18.2. Sequestration

##### 5.18.2.1. Unmitigated

Tree Type	Number	Electricity Saved (kWh/year)	Natural Gas Saved (btu/year)
-----------	--------	------------------------------	------------------------------

## 8. User Changes to Default Data

**APPENDIX A.2**

Proposed

# Magnolia Science Academy Custom Report

## Table of Contents

1. Basic Project Information
  - 1.1. Basic Project Information
  - 1.2. Land Use Types
  - 1.3. User-Selected Emission Reduction Measures by Emissions Sector
2. Emissions Summary
  - 2.1. Construction Emissions Compared Against Thresholds
  - 2.2. Construction Emissions by Year, Unmitigated
  - 2.4. Operations Emissions Compared Against Thresholds
  - 2.5. Operations Emissions by Sector, Unmitigated
3. Construction Emissions Details
  - 3.1. Demolition (2024) - Unmitigated
  - 3.3. Grading (2024) - Unmitigated
  - 3.5. Building Construction (2024) - Unmitigated
  - 3.7. Building Construction (2025) - Unmitigated

3.9. Paving (2025) - Unmitigated

3.11. Architectural Coating (2025) - Unmitigated

#### 4. Operations Emissions Details

4.1. Mobile Emissions by Land Use

4.1.1. Unmitigated

4.2. Energy

4.2.1. Electricity Emissions By Land Use - Unmitigated

4.2.3. Natural Gas Emissions By Land Use - Unmitigated

4.3. Area Emissions by Source

4.3.2. Unmitigated

4.4. Water Emissions by Land Use

4.4.2. Unmitigated

4.5. Waste Emissions by Land Use

4.5.2. Unmitigated

4.6. Refrigerant Emissions by Land Use

4.6.1. Unmitigated

4.7. Offroad Emissions By Equipment Type

4.7.1. Unmitigated

4.8. Stationary Emissions By Equipment Type

4.8.1. Unmitigated

4.9. User Defined Emissions By Equipment Type

4.9.1. Unmitigated

4.10. Soil Carbon Accumulation By Vegetation Type

4.10.1. Soil Carbon Accumulation By Vegetation Type - Unmitigated

4.10.2. Above and Belowground Carbon Accumulation by Land Use Type - Unmitigated

4.10.3. Avoided and Sequestered Emissions by Species - Unmitigated

5. Activity Data

5.1. Construction Schedule

5.2. Off-Road Equipment

5.2.1. Unmitigated

5.3. Construction Vehicles

5.3.1. Unmitigated

5.4. Vehicles

5.4.1. Construction Vehicle Control Strategies

5.5. Architectural Coatings

5.6. Dust Mitigation

5.6.1. Construction Earthmoving Activities

5.6.2. Construction Earthmoving Control Strategies

5.7. Construction Paving

5.8. Construction Electricity Consumption and Emissions Factors

5.9. Operational Mobile Sources

5.9.1. Unmitigated

5.10. Operational Area Sources

5.10.1. Hearths

5.10.1.1. Unmitigated

5.10.2. Architectural Coatings

5.10.3. Landscape Equipment

5.11. Operational Energy Consumption

5.11.1. Unmitigated

5.12. Operational Water and Wastewater Consumption

5.12.1. Unmitigated

5.13. Operational Waste Generation

5.13.1. Unmitigated

5.14. Operational Refrigeration and Air Conditioning Equipment

5.14.1. Unmitigated

5.15. Operational Off-Road Equipment

5.15.1. Unmitigated

5.16. Stationary Sources

5.16.1. Emergency Generators and Fire Pumps

5.16.2. Process Boilers

5.17. User Defined

5.18.1. Land Use Change

5.18.1.1. Unmitigated

5.18.1. Biomass Cover Type

5.18.1.1. Unmitigated

5.18.2. Sequestration

5.18.2.1. Unmitigated

## 8. User Changes to Default Data

# 1. Basic Project Information

## 1.1. Basic Project Information

Data Field	Value
Project Name	Magnolia Science Academy
Construction Start Date	1/3/2024
Operational Year	2026
Lead Agency	—
Land Use Scale	Project/site
Analysis Level for Defaults	County
Windspeed (m/s)	2.50
Precipitation (days)	19.2
Location	7111 Winnetka Ave, Winnetka, CA 91306, USA
County	Los Angeles-South Coast
City	Los Angeles
Air District	South Coast AQMD
Air Basin	South Coast
TAZ	3854
EDFZ	17
Electric Utility	Los Angeles Department of Water & Power
Gas Utility	Southern California Gas
App Version	2022.1.1.13

## 1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description
------------------	------	------	-------------	-----------------------	------------------------	--------------------------------	------------	-------------

High School	160	Student	0.49	21,226	5,242	0.00	—	—
Junior High School	297	Student	0.80	34,916	0.00	0.00	—	—
Parking Lot	54.0	Space	0.49	0.00	0.00	—	—	—

### 1.3. User-Selected Emission Reduction Measures by Emissions Sector

No measures selected

## 2. Emissions Summary

### 2.1. Construction Emissions Compared Against Thresholds

## 5.4. Vehicles

### 5.4.1. Construction Vehicle Control Strategies

Control Strategies Applied	PM10 Reduction	PM2.5 Reduction
Water unpaved roads twice daily	55%	55%
Limit vehicle speeds on unpaved roads to 25 mph	44%	44%
Sweep paved roads once per month	9%	9%

### 5.5. Architectural Coatings

Phase Name	Residential Interior Area Coated (sq ft)	Residential Exterior Area Coated (sq ft)	Non-Residential Interior Area Coated (sq ft)	Non-Residential Exterior Area Coated (sq ft)	Parking Area Coated (sq ft)
Architectural Coating	0.00	0.00	84,213	28,071	1,270

### 5.6. Dust Mitigation

#### 5.6.1. Construction Earthmoving Activities

Phase Name	Material Imported (cy)	Material Exported (cy)	Acres Graded (acres)	Material Demolished (Building Square Footage)	Acres Paved (acres)
Demolition	0.00	0.00	0.00	21,000	—
Grading	—	—	4.00	0.00	—
Paving	0.00	0.00	0.00	0.00	0.49

#### 5.6.2. Construction Earthmoving Control Strategies

Control Strategies Applied	Frequency (per day)	PM10 Reduction	PM2.5 Reduction
Water Exposed Area	3	74%	74%
Water Demolished Area	2	36%	36%

### 5.7. Construction Paving

Land Use	Area Paved (acres)	% Asphalt
High School	0.00	0%
Junior High School	0.00	0%
Parking Lot	0.49	100%

## 5.8. Construction Electricity Consumption and Emissions Factors

### kWh per Year and Emission Factor (lb/MWh)

Year	kWh per Year	CO2	CH4	N2O
2024	0.00	690	0.05	0.01
2025	0.00	690	0.05	0.01

## 5.9. Operational Mobile Sources

### 5.9.1. Unmitigated

Land Use Type	Trips/Weekday	Trips/Saturday	Trips/Sunday	Trips/Year	VMT/Weekday	VMT/Saturday	VMT/Sunday	VMT/Year
High School	325	92.8	40.0	91,605	3,257	931	401	918,612
Junior High School	633	0.00	0.00	164,930	6,344	0.00	0.00	1,653,925
Parking Lot	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

## 5.10. Operational Area Sources

### 5.10.1. Hearths

#### 5.10.1.1. Unmitigated

### 5.10.2. Architectural Coatings

Residential Interior Area Coated (sq ft)	Residential Exterior Area Coated (sq ft)	Non-Residential Interior Area Coated (sq ft)	Non-Residential Exterior Area Coated (sq ft)	Parking Area Coated (sq ft)
--	--	--	--	-----------------------------

0	0.00	84,213	28,071	1,270
---	------	--------	--------	-------

### 5.10.3. Landscape Equipment

Season	Unit	Value
Snow Days	day/yr	0.00
Summer Days	day/yr	250

## 5.11. Operational Energy Consumption

### 5.11.1. Unmitigated

#### Electricity (kWh/yr) and CO2 and CH4 and N2O and Natural Gas (kBTU/yr)

Land Use	Electricity (kWh/yr)	CO2	CH4	N2O	Natural Gas (kBTU/yr)
High School	150,071	690	0.0489	0.0069	431,475
Junior High School	246,862	690	0.0489	0.0069	709,761
Parking Lot	18,545	690	0.0489	0.0069	0.00

## 5.12. Operational Water and Wastewater Consumption

### 5.12.1. Unmitigated

Land Use	Indoor Water (gal/year)	Outdoor Water (gal/year)
High School	704,794	73,517
Junior High School	719,999	0.00
Parking Lot	0.00	0.00

## 5.13. Operational Waste Generation

### 5.13.1. Unmitigated

Land Use	Waste (ton/year)	Cogeneration (kWh/year)
High School	29.2	—
Junior High School	54.2	—
Parking Lot	0.00	—

## 5.14. Operational Refrigeration and Air Conditioning Equipment

### 5.14.1. Unmitigated

Land Use Type	Equipment Type	Refrigerant	GWP	Quantity (kg)	Operations Leak Rate	Service Leak Rate	Times Serviced
High School	Household refrigerators and/or freezers	R-134a	1,430	0.02	0.60	0.00	1.00
High School	Other commercial A/C and heat pumps	R-410A	2,088	< 0.005	4.00	4.00	18.0
High School	Stand-alone retail refrigerators and freezers	R-134a	1,430	< 0.005	1.00	0.00	1.00
High School	Walk-in refrigerators and freezers	R-404A	3,922	< 0.005	7.50	7.50	20.0
Junior High School	Household refrigerators and/or freezers	R-134a	1,430	0.02	0.60	0.00	1.00
Junior High School	Other commercial A/C and heat pumps	R-410A	2,088	< 0.005	4.00	4.00	18.0

Junior High School	Walk-in refrigerators and freezers	R-404A	3,922	< 0.005	7.50	7.50	20.0

## 5.15. Operational Off-Road Equipment

### 5.15.1. Unmitigated

Equipment Type	Fuel Type	Engine Tier	Number per Day	Hours Per Day	Horsepower	Load Factor
----------------	-----------	-------------	----------------	---------------	------------	-------------

### 5.16. Stationary Sources

#### 5.16.1. Emergency Generators and Fire Pumps

Equipment Type	Fuel Type	Number per Day	Hours per Day	Hours per Year	Horsepower	Load Factor
----------------	-----------	----------------	---------------	----------------	------------	-------------

#### 5.16.2. Process Boilers

Equipment Type	Fuel Type	Number	Boiler Rating (MMBtu/hr)	Daily Heat Input (MMBtu/day)	Annual Heat Input (MMBtu/yr)
----------------	-----------	--------	--------------------------	------------------------------	------------------------------

### 5.17. User Defined

Equipment Type	Fuel Type
—	—

### 5.18. Vegetation

#### 5.18.1. Land Use Change

##### 5.18.1.1. Unmitigated

Vegetation Land Use Type	Vegetation Soil Type	Initial Acres	Final Acres
--------------------------	----------------------	---------------	-------------

#### 5.18.1. Biomass Cover Type

##### 5.18.1.1. Unmitigated

Biomass Cover Type	Initial Acres	Final Acres
--------------------	---------------	-------------

## 5.18.2. Sequestration

## 5.18.2.1. Unmitigated

Tree Type	Number	Electricity Saved (kWh/year)	Natural Gas Saved (btu/year)
-----------	--------	------------------------------	------------------------------

## 8. User Changes to Default Data

Screen	Justification
Land Use	Total of 457 students and approximately 5,242 square feet of playfield area.
Construction: Construction Phases	Construction expected to start January 2024 and completed by July 2025. Construction would include demolition of the existing building and minor grading (balanced site).

Phase Name	Total Acres	Gallons for Project	Electricity (kWh)
Project	1.7	5,255	51.1

**Notes:**

*Total acres graded based on CalEEMod output sheets.*

**Water Usage**

3,020 gallons per acre per day

*Source: Air & Waste Management Association, Air Pollution Engineering Manual, 1992 Edition*

**Supply Water Electricity Intensity**

0.009727 kWh/gallons (CalEEMod default)

<b>Table 8. On road Vehicles - Operational</b>										
<b>Scenario</b>	<b>Annual VMT</b>	<b>Fuel Efficiency (miles/gal)</b>			<b>Fleet Percentage</b>			<b>Fuel Consumption (gallons)</b>		<b>Total Fuel Consumption</b>

## **EXECUTIVE SUMMARY**

Alta Environmental DBA NV5 (NV5) has completed a Phase I Environmental Site Assessment (ESA) of the property located at 7111 Winnetka Avenue, Los Angeles County, California (Site). The ESA was performed in conformance with the scope and limitations of ASTM E1527-13 standards. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. The assessment was performed to identify conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or adjacent to the Site. These issues are considered recognized environmental conditions (RECs).

### **Site Location and Use**

The Site is located at 7111 Winnetka Avenue, Canoga Park, in Los Angeles County, California. The property consists of one parcel of land that totals approximately 1.74 acres in size. The Site can be identified by Los Angeles County Tax Assessor Parcel Number (APN): 2135-038-016.

At the time of our site reconnaissance, the property was developed with a single-story office building occupied by various medical offices including dental and orthodontics, magnetic resonance imaging (MRI), acupuncture, an ambulance company.

The Site is located within an area primarily mixed for residential and commercial use. Current uses of adjoining properties include an active construction site and a multi-tenant commercial building (restaurants, salon, tattoo artists) to the north, A church and school to the east, single-family residences to the south, and a storage facility and single-family residence to the west.

The Site was originally cultivated for agricultural use as early as 1928 to as late as 1938. By 1947, the Site had been developed with a residential home. By 1964, the residential home had been removed from the Site and a large structure or paved area of unknown use constructed. By 1967, all structure on the Site had been removed and the Site left vacant and used for vehicle parking. In 1980, the present-day structure was constructed and has historically been occupied by various medical offices.

### **Data Gaps**

The ASTM Standard defines a data gap as “a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information.” A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps. NV5 did not identify any data gaps.

### **Vapor Encroachment Conditions (VEC)**

A Tier 1 vapor encroachment screen (VES) for potential chemicals of concern (COC) was completed for the Site. The assessment was based on the ASTM published Standard Guide E 2600-15. The purpose of the VES was to evaluate for the potential for a vapor encroachment condition (VEC) which is the presence or likely presence of COC vapors in subsurface soils at the Site caused by the release of vapors from contaminated soil or groundwater on or near the Site. The results of the VES did not identify evidence of a potential VEC in connection with the Site.

**Phase I Environmental Site Assessment**  
7111 Winnetka Avenue, Canoga Park, California

PCCD-22-10745  
March 7, 2022

**Conclusions and Recommendations**

No evidence of a REC, Controlled REC, or historic REC in connection with the Site was identified during this assessment.

## **1 INTRODUCTION**

The purpose of this assessment was to evaluate the environmental condition of the site and to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner, or bona fide prospective purchaser under the federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined in:

1. 42 U.S.C § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13;
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312); and
3. 42 U.S.C. 9601(40) and 42 U.S.C. 9607(q).

This report was prepared exclusively for use by Pacific Charter School Development. This report may not be relied upon by any other person or entity without NV5's express written permission. The information, conclusions and recommendations described in this report apply to conditions existing at certain locations when services were performed and are intended only for the specific purposes, locations, time frames and project parameters indicated. NV5 cannot be responsible for the impact of any changes in environmental standards, practices or regulations after performance of services.

### **1.1 Objectives**

NV5's objective for this environmental assessment was to identify conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the Site. The assessment was done to meet ASTM Standard Practice E1527-13.

The assessment provided herein was determined based on the following:

1. Current and past property uses and occupancies;
2. Current and past uses of hazardous substances;
3. Waste management and disposal activities that could have caused releases or threatened releases of hazardous substances;
4. Current and past corrective actions and response activities undertaken to address past and on-going releases of hazardous substances;
5. Engineering controls;
6. Institutional controls; and
7. Evaluation of properties adjoining or located nearby the Site that have environmental conditions that could have resulted in conditions indicative of releases or threatened releases of hazardous substances to the Site.

### **1.2 Services**

NV5 performed the following services to assess the property:

1. Reviewed historical sources of information;
2. Searched for recorded environmental clean-up liens;
3. Reviewed Federal, State, Tribal, and local government records;
4. Visually inspected the site and the adjoining sites;

5. Evaluated any specialized knowledge or experience on the part of the purchaser;
6. Determined commonly known or reasonably ascertainable information about the property; and
7. Evaluated properties adjoining or located nearby the Site that have environmental conditions that could have resulted in conditions indicative of releases or threatened releases of hazardous substances to the Site.

### **1.3 Assumptions**

NV5 has assumed the following for the purposes of this assessment:

1. Information provided during any interview (written or oral) was accurate and correct;
2. Database information reviewed was accurate and correct;
3. Historical information reviewed was accurate and correct;
4. Information reviewed at any governmental agency was accurate and correct;
5. Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data or well data from adjacent sites, are assumed based on contours depicted on the United States Geological Survey (USGS) Topographic Maps; and
6. The property has been correctly and accurately identified by the client, client representatives, property contact, property owner, and/or property representatives.

### **1.4 Limitations**

This assessment is limited to the standards set forth in ASTM Standard Practice E1527-13. This assessment specifically excludes assessment of the following:

1. Asbestos and asbestos-containing building materials;
2. Biological agents;
3. Cultural and historic resources;
4. Ecological resources;
5. Endangered species;
6. Health and safety;
7. Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment;
8. Industrial hygiene;
9. Lead-Based Paint;
10. Lead in Drinking Water;
11. Mold;
12. Radon;
13. Regulatory compliance; and
14. Wetlands.

Considerations identified by ASTM as beyond the scope of a Phase I Environmental Site Assessment (ESA) may affect business environmental risk at a given property. These environmental issues or conditions may warrant assessment based on the type of property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13; and therefore, not addressed during this assessment.

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluation. The conclusions presented in this report are based solely on the services described herein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No subsurface exploratory drilling or sampling of any kind was

done under the scope of this work. Unless specifically stated otherwise in the report, no chemical or physical analyses have been performed during the course of this Phase I ESA.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This is subject to the limitations of historical documentation, availability, and accuracy of pertinent records and the personal recollections of those persons contacted. As applicable, NV5 has relied in good faith upon representations and information furnished by individuals with respect to operations and existing property conditions, to the extent that they have not been contradicted by data obtained from other sources. Accordingly, NV5 accepts no responsibility for any deficiencies, omissions, misrepresentations, or fraudulent acts of persons interviewed.

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. NV5 makes no warranty, express or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

This Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. The assessment is not intended to assure clear title to the property in question. The sole purpose of investigation into property title records is to ascertain a historical basis of prior land use and environmental liens. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property visit. Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

## **1.5 Terms**

The following terms are used in this report:

- “Site” refers to the property within the approximate boundaries described in Section 2;
- “Immediate site vicinity” refers to properties adjacent to the Site that share a common boundary with the Site; and
- “Site vicinity” refers to the area within an approximate 1-mile radius of the property.
- “Recognized Environmental Conditions” (RECs) – The presence or likely presence of any *hazardous substances* or *petroleum products in, on, at or to a property*. (1) due to release to the environment; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*.

- “Controlled Recognized Environmental Condition” (CREC) – A recognized environmental condition resulting from a past *release of hazardous substances or petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances or petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property use restrictions, activity and use limitations, institutional controls, or engineering controls*). A condition identified as a *controlled recognized environmental condition* does not imply that the *environmental professional* has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.
- “Historical Recognized Environmental Condition” (HREC) – A past *release of any hazardous substances or petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property use restrictions, activity and use limitations, institutional controls, or engineering controls*).
- “Migrate/migration” – For the purposes of this practice, “migrate” and “migration” refers to the movement of *hazardous substances or petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.
- “Hazardous Substances” – The term “hazardous substance” is used here in general accordance with its use as defined in the following regulations:
  - Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended; and
  - Superfund Amendment and Reauthorization Act (SARA) of 1986, as amended.

The terms “material,” “waste,” and “substances” are used interchangeably, and no legal distinction is implied between the terms as used herein. The words “impact” or “impacted” are used to mean the effect or result of a release of a hazardous substance that could result in a hazardous waste being present at the property. Search distances for government agency lists were those designated by the ASTM Standard E 1527-13.

## 1.6 Environmental Professionals

This document has been prepared by an Environmental Professional as defined by the EPA, 40 CFR Part 312.10. All work performed for this assessment was performed by or under the direct supervision of an Environmental Professional.

## 2 SITE DESCRIPTION

Mr. Eric Dunham, under the supervision of Mr. Reid Shigeno of NV5, conducted a site reconnaissance on February 11, 2022. The descriptions provided herein are based on information provided by the current site representatives and on observations made during that visit. Representative site photographs are included in Appendix A. Site Location and Site Layout maps depicting the areas and features described in the following sections are also provided in Figures 1 and 2.

### 2.1 Property Location and Use

#### Location and Size

The Site is located at 7111 Winnetka Avenue, Canoga Park (Los Angeles), in Los Angeles County, California. The property consists of one parcel of land that totals approximately 1.74 acres in size. The Site can be identified by Los Angeles County Tax Assessor Parcel Number (APN): 2135-038-016.

### **Use**

At the time of our site reconnaissance, the property was developed with a single-story office building occupied by various medical offices including dental and orthodontics, magnetic resonance imaging (MRI), acupuncture, an ambulance company.

## **2.2 Utility Service Providers**

The utilities servicing the Site are:

Electricity	Los Angeles Department of Water and Power
Water	Los Angeles Department of Water and Power
Gas	Southern California Gas Company
Sewer	Los Angeles Department of Sanitation
Municipal Waste	Unknown
Hazardous Waste	N/A

No water wells or septic systems were observed or reported to be present at the Site during the site reconnaissance.

## **2.3 Hazardous Materials and Chemical Storage Areas**

Small quantities of household cleaning products were observed and reported to be present at the Site in janitorial closet and warehouse area. No evidence of spills, leaks, or releases of these materials was observed during the site reconnaissance. Their presence is not considered to represent a REC.

### **Drums**

No evidence of hazardous materials in drums on the Site was observed.

## **2.4 Storage Tanks**

### **Aboveground Storage Tanks (ASTs)**

No evidence of ASTs at the Site was observed or reported during the site reconnaissance.

### **Underground Storage Tanks (USTs)**

No evidence of USTs at the Site was observed or reported during the site reconnaissance.

### **Septic Tanks**

No evidence of septic tanks was observed onsite or reported during the site reconnaissance.

## **2.5 Polychlorinated Biphenyls**

No electrical or mechanical equipment suspected of containing polychlorinated biphenyls (PCBs) were identified on the Site during the Site reconnaissance.

## **2.6 Floor Drains, Sumps, and Clarifiers**

No sumps or clarifiers were observed or reported to be on the Site. No floor drains were observed during the site reconnaissance.

## 2.7 Back-Up Power Generators

No fixed back-up power generators were observed or reported to be on the Site.

## 2.8 Cooling Towers

No cooling towers were observed or reported to be on the Site.

## 2.9 Elevators, Lifts and Compactors

No elevators were observed during the Site reconnaissance. No lifts or compactors were observed or reported to be on the Site.

## 2.10 Odors

No strong, pungent, or noxious odors indicative of a past release of hazardous substances or petroleum products were identified during this assessment.

## 2.11 Pools of Liquid

No standing surface water or other pits, ponds, or lagoons potentially containing hazardous substances or petroleum products were identified within the Site.

## 2.12 Surface Staining

No surface staining indicative of a past release of hazardous substances or petroleum products was identified within the Site.

## 2.13 Stressed Vegetation

No stressed vegetation or other indications of potential release of hazardous substances or petroleum products were observed during the site reconnaissance.

## 2.14 Solid Waste

No indications of unauthorized dumping of trash, construction or demolition debris, or other solid waste disposal were identified during the site reconnaissance.

## 2.15 Adjacent Sites

The Site is located within an area of mixed commercial and residential use. The following land use in the near vicinity of the property was observed:

Direction	Property Name	Property Address	Business Operation
North	Collectors Paradise	7131-7133 Winnetka Ave	Comic Books
	Select Smoke Shop	7135 Winnetka Ave	Smoke Shop
	D'amores Famous Pizza	7137 Winnetka Ave	Restaurant
	Nutricion Sin Limites	7139 Winnetka Ave	Exercise Studio
	Magic Foot Spa	7141 Winnetka Ave	Massage Therapy

Direction	Property Name	Property Address	Business Operation
	Hair Fashion and Nails	7143 Winnetka Ave	Hair & Nail Salon
	Acupuncture	7145 Winnetka Ave	Acupuncture
	The Kosher Buffet	7147 Winnetka Ave	Restaurant
	Wildlife Tattoo	7149 Winnetka Ave	Tattoo Artists
	Vacant Land	20116-20128 Sherman Way	N/A
<b>East</b>	St. Martin in the Fields	7136 Winnetka Ave	Church
<b>South</b>	N/A	7055 Winnetka Ave	Single-Family Residential
	N/A	20116 Gault St	Single-Family Residential
	N/A	20122 Gault St	Single-Family Residential
<b>West</b>	Sherman Public Way Storage	20140 Sherman Way	Storage Facility

### 3 SITE SETTING

#### 3.1 Topographic

The 2012 United States Geological Survey (USGS), [Canoga Park] 7.5 Minute Topographic Quadrangle map of the Site and surrounding vicinity was reviewed. The elevation of the property is approximately 768 feet above mean sea level. The Site and surrounding topography slope to the south-southwest. A copy of the USGS 7.5 Minute Topographic Quadrangle Map is included in Appendix B.

#### 3.2 Regional Geology and Hydrology

The following description of regional geology and hydrology was developed based on regional information presented on the EDR GeoCheck report (2021) and Regional Water Quality Control Board's online *Geotracker* database.

According to United States Department of Agriculture (USDA) soil data published in the EDR GeoCheck report, soils underlying the Site are classified as Mocho. Soils of this type are fine grained loams with very slow infiltration rates (Appendix B).

NV5 reviewed groundwater data on the *Geotracker* database for a previous groundwater investigation/cleanup at the property located at 20112 Sherman Way in Winnetka, California (located approximately 200 feet north of the Site). Based on the most recent groundwater monitoring event conducted at the facility in May of 2018, depth to groundwater in the vicinity of the Site ranged from approximately 13 to 15 feet below ground surface. Groundwater flow direction was reported to be in a southerly direction.

### 3.3 Flood Plain

According to Federal Emergency Management Agency flood plain data presented in the site-specific Environmental Data Resources (EDR) Geotcheck Report, the Site is not located within a 100-year or 500-year flood zone (EDR, 2021). The EDR Report is presented as Appendix B.

### 3.4 Wetlands

According to map data published on the United States Department of Fish and Wildlife (USFW) National Wetlands Inventory (<https://www.fws.gov/wetlands/data/mapper.html>), No wetlands are mapped on the subject or adjoining properties (Appendix C).

### 3.5 Water Bodies

No water bodies were observed on the subject or adjoining properties.

### 3.6 Oil and Gas Wells

According to the State of California, Department of Conservation, Geologic Energy Management Division (CalGEM) oil and gas well finder map (WellSTAR), no oil/gas wells were identified on the Site.

### 3.7 Methane

According to the Zone Information and Map Access System (ZIMAS), the Site is not located within a City of Los Angeles Methane Hazard Zone.

## 4 USER-PROVIDED INFORMATION

Information obtained during the interview process is presented in the following sections.

### 4.1 Title Records

Title records were not provided by the site user representative. However, the EDR Lien and AUL Search report presented a copy of one Deed associated with the Site. The Deed identified the title vested in Rainbow Investments LLC Winnetka Life Partners LLC and the title received from Rainbow Investments LLC. The Deed is dated December 27, 2016, and recorded January 9, 2017. Appendix D presents the EDR Lien and AUL report.

### 4.2 Clean-Up Liens

No knowledge of any clean-up liens against the Site was reported by those interviewed. Furthermore, the EDR Environmental Lien and AUL Search report did not identify any environmental liens for the Site (Appendix D).

### 4.3 Activities and Use Limitations

No knowledge of site-specific activities or use limitations recorded against the Site were reported by those interviewed. Furthermore, according to the EDR Lien and AUL Search report, no Activity and Use Limitations are identified for the Site (Appendix D).

### 4.4 Specialized Knowledge

No specialized knowledge identifying evidence of a recognized environmental condition was disclosed by those interviewed during the course of this Phase I investigation.

#### 4.5 Commonly Known Information

No commonly known information identifying evidence of a recognized environmental condition was disclosed by those interviewed during the course of this Phase I investigation.

#### 4.6 Previous Environmental Assessments

No previous environmental assessments were provided by the Client.

### 5 RECORDS REVIEW

#### 5.1 Governmental Databases

NV5 contracted EDR to perform a radius search of governmental databases for this project. The distribution of listed sites with respect to the Site is tabulated and mapped in EDR's Radius Map Report, which can be found in Appendix B. The reader is referred to the table, which can be found near the front of EDR's report.

NV5 conducted a review of the above-referenced database reports and provides the following findings based on sites that have the potential to impact the Site, with respect to the inferred southerly groundwater flow direction. Our findings are based on the assumption that a hazardous material released to the subsurface generally does not migrate laterally within unsaturated soil for a significant distance. Although a hazardous material can migrate in groundwater in a generally down-gradient direction, there are limitations to this interpretation such as groundwater depth, soil lithology and other subsurface barriers.

##### Site Database Findings

EDR's report did identify the Site address, as summarized below:

Facility Name & Address	Cigna Health Plan/Cigna Health Plans of California/Friendly Hills Healthcare Network 7111 Winnetka Avenue Canoga Park, California	Site
Database(s) Listed: SWEEPS UST, CA FID UST, HAZMAT, HWTS		
This facility is listed on the SWEEPS UST and CA UST databases indicating the presence of a UST at the Site. However, the no knowledge of a UST at the Site was reported by the Site contact or observed during the Site reconnaissance. Additionally, the Site address is not listed on the CA UST database or City of Los Angeles Fire Department UST database as the location of a UST. Therefore, it is likely that this is an erroneous listing.		
This facility was listed on the HAZMAT and HWTS databases as an inactive facility. The types of wastes generated at this facility were not reported but site contact information listed on the database referenced a medical radiology lab.		
No evidence of a release, leak, or spill of hazardous materials or petroleum products was reported. Therefore, these listings are not considered to represent an REC.		

### Adjoining Property Database Findings

EDR's report identified multiple adjoining properties. The details of these listings are presented below.

<b>Facility Name &amp; Address</b>	<b>Master Dry Cleaners 7135 Winnetka Avenue Canoga Park, California</b>	<b>Northern Adjoining Property</b>
------------------------------------	---	------------------------------------

Database(s) Listed: EDR HIST CLEANER

According to the EDR HIST CLEANER database listing, the property was occupied by a dry cleaner from 1996 through 2007. No records of hazardous material usage, storage, or generation at this facility was reported. Additionally, this property address was not identified on the City of Los Angeles Fire Department active or inactive Hazardous Material Site databases.

No evidence of a release, leak, or spill of hazardous materials or petroleum products was reported. Therefore, these listings are not considered to represent an REC.

<b>Facility Name &amp; Address</b>	<b>GTM Holding, LLC 20116 Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
------------------------------------	--	------------------------------------

Database(s) Listed: RCRA NONGEN/NLR

As of May 14, 2021, this facility was reported to not be a generator of hazardous waste.

<b>Facility Name &amp; Address</b>	<b>Phil's Texaco SVC/Phil's Texaco Service 20112 Sherman Avenue Canoga Park, California</b>	<b>Northern Adjoining Property</b>
------------------------------------	---	------------------------------------

Database(s) Listed: EDR HIST AUTO, HIST UST

According to the EDR HIST AUTO database listing, this facility operated as a gasoline service station from 1969 to 1994. The HIST UST listing indicates that four USTs were at the gasoline station as indicated on a State Water Resources Control Board Hazardous Substance Storage Container Information Sheet (dated 06/01/1988). Three of the USTs were 6000-gallon capacity tanks (two with gasoline and one with diesel) and one of the USTs was a 10,000-gallon capacity gasoline tank.

<b>Facility Name &amp; Address</b>	<b>Phil's Texaco SVC/Phil's Texaco Service Phil's Car &amp; Truck Rental/Phil J Palma, Felip J. Palma, Phio's Car Rental/AMLAP Inc DBA Point Car Rental 20112 Sherman Avenue Canoga Park, California</b>	<b>Northern Adjoining Property</b>
------------------------------------	--	------------------------------------

Database(s) Listed: UST, LUST, CORTESE, RCRA NONGEN/NLR, CA FID UST, HWTS, HAZNET, HAZMAT, CERS, HIST CORTESE, SWEEPS UST

According to the EDR HIST AUTO database listing, this facility operated as a gasoline service station from 1969 to 1994.

The HIST UST and SWEEPS UST database indicated that four USTs were registered at this property address. Three of the USTs were 6000-gallon capacity tanks (two with gasoline and one with diesel) and one of the USTs was a 10,000-gallon capacity gasoline tank.

<b>Facility Name &amp; Address</b>	<b>Phil's Texaco SVC/Phil's Texaco Service Phil's Car &amp; Truck Rental/Phil J Palma, Felip J. Palma, Phio's Car Rental/AMLAP Inc DBA Point Car Rental 20112 Sherman Avenue Canoga Park, California</b>	<b>Northern Adjoining Property</b>
<p>The UST and CA FID UST databases identified this facility as "inactive".</p> <p>According to the LUST database, a release of gasoline into groundwater was identified at this facility on October 27, 1998, during a UST removal. This release was granted case closure status on July 23, 2019. A review of groundwater monitoring data published on the Geotracker website indicated that impacted groundwater had not migrated beneath the Site and that the area of identified soil and groundwater impact was located over 150 feet north of the northern Site boundary, closer to Sherman Way.</p> <p>The RCRA NONGEN/NLR listings shows that the property was not verified as a generator on January 15, 2019.</p> <p>The HAZNET and HAZMAT database indicated that this facility disposed of tank bottom wastes in 2001.</p> <p>Based on the closure status of the LUST incident and published regulatory information, these listings are not considered to represent an REC with respect to the Site.</p>		
<b>Facility Name &amp; Address</b>	<b>Super Tech Auto Service 20118 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
<p>Database(s) Listed: CERS HAZ WASTE, HAZMAT, CERS</p> <p>The CERS HAZ WASTE listing indicates that this facility generators hazardous waste The CERS listing indicated several violations were issued to this facility between 2018 and 2019 related to the facility; failing to electronically submit and certify that the business plan is complete and in compliance with EPCRA, failing to establish an adequate emergency response plan for a release or threatened release of hazardous material, failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material, and 55-gallon drums storing hazardous waste without labels.</p> <p>No evidence of a release, leak, or spill of hazardous materials or petroleum products was reported. Therefore, these listings are not considered to represent an REC.</p>		
<b>Facility Name &amp; Address</b>	<b>Excellence Auto Repair 20118 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
<p>Database(s) Listed: HAZMAT, RCRA NONGEN/NLR, HWTS</p> <p>The HAZMAT listing indicates that this facility was inactive as of April of 2021. The NONGEN/NLR listing indicates that this facility is not a generator of hazardous waste.</p>		
<b>Facility Name &amp; Address</b>	<b>Le Auto Service Smog Repair 20118 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
<p>Database(s) Listed: RCRA NONGEN/NLR</p>		

<b>Facility Name &amp; Address</b>	<b>Le Auto Service Smog Repair 20118 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
The NONGEN/NLR listing indicates that this facility is not a generator of hazardous waste.		

<b>Facility Name &amp; Address</b>	<b>Magic Auto Center 20120 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
Database(s) Listed: RCRA NONGEN/NLR		
The NONGEN/NLR listing indicates that this facility is not a generator of hazardous waste.		

<b>Facility Name &amp; Address</b>	<b>C &amp; B Radiator 20120 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
Database(s) Listed: HAZMAT		
The HAZMAT listing indicates that this facility is inactive as of April of 2021.		

<b>Facility Name &amp; Address</b>	<b>Steve's Transmission Service 20122 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
Database(s) Listed: HAZMAT, UST, EDR HIST AUTO, RCRA-SQG, FINDS, ECHO		
<p>The HAZMAT database indicated that this facility is inactive as of April of 2021.</p> <p>The UST database indicated that this facility was the location of an inactive UST.</p> <p>THE EDR HIST AUTO shows that this facility operated as an automotive repair shop from 1969 to 2014.</p> <p>The RCRA-SQG listing shows that the facility is a small quantity generator of hazardous wastes in 2000. The business was previously identified as a large quantity generator of hazardous wastes. The type of hazardous waste generated at this facility was reported at Tetrachlorethylene. The FINDS and ECHO listings do not list any violations at this facility. However, a violation issued during a State compliance inspection in 1998.</p> <p>No spills, leaks, releases, or cleanups are reported at this property address. As of the time of this report, the property is in the process of significant redevelopment with all structures being removed. City of Los Angeles Building Department records indicate that in 2020 a permit was issued for the construction of a new 91 residential unit apartment complex with 2 levels of subterranean parking. It is therefore likely, that had any impact or contamination been present at this property, it would have been identified and removed during soil excavation activities associated with the proposed development. Therefore, based on the lack of evidence suggesting a release has occurred at this property, this listing is not considered to represent an REC with respect to the Site.</p>		

<b>Facility Name &amp; Address</b>	<b>Dos Amigos Properties Inc DBA Hectors Auto &amp; Mobil 20124 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
Database(s) Listed: RCRA NONGEN/NLR		

<b>Facility Name &amp; Address</b>	<b>Dos Amigos Properties Inc DBA Hectors Auto &amp; Mobil 20124 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
The NONGEN/NLR listing indicates that this facility is not a generator of hazardous waste.		

<b>Facility Name &amp; Address</b>	<b>Hector's Auto Repair &amp; Mobile Service 20124 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
Database(s) Listed: HAZMAT		
The HAZMAT listing indicates that this facility is inactive as of April of 2021.		

<b>Facility Name &amp; Address</b>	<b>The California Auto Body Shop 20124 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
Database(s) Listed: RCRA NONGEN/NLR		
The NONGEN/NLR listing indicates that this facility is not a generator of hazardous waste.		

<b>Facility Name &amp; Address</b>	<b>Chinoz Auto Body 20126 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
Database(s) Listed: CERS HAZ WASTE		
The CERS HAZ WASTE listings indicates that this facility is a hazardous waste generator and has faced violations from failing to submit the hazardous waste notification electronically to CERS.		

<b>Facility Name &amp; Address</b>	<b>MIZUNO's Auto Repair 20128 West Sherman Way Winnetka, California</b>	<b>Northern Adjoining Property</b>
Database(s) Listed: HWTS, CERS HAZ WASTE, HAZMAT, RCRA NONGEN/NLR		
The CERS HAZ WATSTE listing indicated a violation was issued in April 2018 for a failure to obtain an identification number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste. In April of 2018, another violation at this facility was issued for failure to properly manage used oil and/or fuel filters in accordance with the requirements. THE RCRA NONGEN/NLR listings indicates that this facility is not a generator of federal waste.		
No evidence of a release, leak, or spill of hazardous materials or petroleum products was reported. Therefore, these listings are not considered to represent an REC.		

### General Vicinity Database Findings

EDR's report identified multiple off-site facilities within applicable ASTM search radii. NV5 considered all of the listed sites unlikely to impact the subject site, based upon factors including (but not limited to):

- The nature of the listing;
- The use of the site;
- When the site was listed and its current listed status;

- The developmental density of the setting;
- The distance between the listed and subject sites as related to the distance that releases are likely to migrate based on local surface and subsurface drainage conditions;
- The presence of intervening drainage divides; and/or
- The inferred groundwater movement.

## 5.2 Regional Agency Offices

NV5 submitted information requests to the various county and regional agencies that may have records with regard to environmentally-oriented concerns affecting the Site, in accordance with ASTM E1527-13 requirements. Should significant records be identified at a later date, an addendum to this report will be issued. Documentation obtained from regulatory agency requests is presented in Appendix C.

Agency	Records Summary
California Division of Geologic Energy Management (CalGEM)	No oil or gas wells were identified on the Site or adjoining properties.
Regional Water Quality Control Board – GEOTRACKER	<p><u>Site</u>                      No records identified.</p> <p><u>Adjoining Property</u>                      The northern adjoining property (20112 Sherman Way) was the previous location of a leaking underground storage tank incident that received regulatory closure in 2019.</p> <p><a href="https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0603702121">https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0603702121</a>.</p> <p>This facility is discussed in Section 5.1.2.</p>
Department of Toxic Substances Control – ENVIROSTOR	<p><u>Site</u>                      No records identified.</p> <p><u>Adjoining Property</u>                      No records identified.</p>
Los Angeles County Fire Department	No records identified.
Los Angeles City Fire Department	No records identified.
Los Angeles City Building and Safety Department	Records identified included electrical permits in 2008 and 2021, an HVAC permit in 2008, plumbing permit in 2008, building alteration/repair (non-bearing construction and interior demolition) in 2008, and a sign permit (pole sign) in 2000.
Los Angeles County Public Health Investigation	No response as of date of this report.

Agency	Records Summary
Los Angeles County Department of Public Works	No records identified.
South Coast Air Quality Management District (AQMD) FINDS	The Site address was not identified in the database.

### 5.3 Historical Records

NV5 used USGS Topo maps, aerial photographs, fire insurance maps, and historical street directories to provide information about the history of the Site and its surroundings. The resources NV5 reviewed are tabulated below and presented in Appendix E.

Historical Resources		
Source Type	Years Reviewed	Source
USGS Topo Maps	1903, 1928, 1929, 1932, 1941, 1944, 1947, 1952, 1967, 1976, 2012, 2015, 2018	USGS/EDR
Aerial Photograph(s)	1928, 1938, 1947, 1952, 1964, 1967, 1970, 1977, 1983, 1989, 2002, 2005, 2009, 2012, 2016	EDR
Fire Insurance (Sanborn) Maps	None found	EDR
Street Directories	1920-2015	EDR

### 5.4 Past Uses – Site

Our interpretation of past uses of the property, based on the historical data sources listed above, are tabulated below.

Date	Interpreted Property Use
1928 to 1938	USGS Topo maps and aerial photographs depict the Site to be cultivated for agricultural use.
1947 to 1952	Aerial photographs depict the Site to be developed with a residential home. Historic city directories identified the tenant of the property as: <u>7111 Winnetka Avenue</u> • Grundish Frank J Licensed Surveyor (1950)
1964	An aerial photograph depicts the northern portion of the Site to be developed with a square shaped structure or lot of unknown use. The remainder of the property

Date	Interpreted Property Use
	appears to be undeveloped vacant land.
1967 to 1977	Aerial photographs depict the Site to be a vacant graded lot used for vehicle parking. No structures are observed on the Site.
1980 to 2016	<p>Tax Assessor records indicate the current Site structure was constructed in 1980.</p> <p>Aerial photographs depict the Site to be developed with the present-day building.</p> <p>Historic city directories identified the tenant of the property as:</p> <p><u>7111 Winnetka Avenue</u></p> <ul style="list-style-type: none"> <li>• California Medical Group Health Plan Inc West Valley Center (1980)</li> <li>• Foley Howard Electrical Construction (1980)</li> <li>• Valley West Medical Center (1980)</li> <li>• Canoga Park (1981 through 1995)</li> <li>• Mental Health Department (1985)</li> <li>• Pharmacy (1985)</li> <li>• Cigna Health Plans of California Health Care Centers Canoga Park (1986 through 1994)</li> <li>• Friendly Hills Medical Group Conga Park Healthcare Center (1999)</li> <li>• Medisco Medical/Health/Medical Supplies (2004 through 2009)</li> <li>• Ca Medical Nursing (2004)</li> <li>• Care Pharmacy (2004)</li> <li>• Advanced Chiropractic Clinic (2004)</li> <li>• Woman Healthcare Connection (2004 through 2015)</li> <li>• Various medical doctors (2004 through 2009)</li> <li>• Sarajev Art and Music School (2009)</li> <li>• Star Business Services (2009)</li> <li>• Winnetka Dental Office (2004 through 2015)</li> <li>• Arrow Med Pharmacy (2015)</li> <li>• Luxor Property Management (2015)</li> <li>• XU H Norman MD (2015)</li> </ul>

### 5.5 Past Uses – Adjoining Properties

Our interpretation of past uses of the adjoining properties, based on the historical data sources listed previously, are tabulated below.

Date	Description
<b>Northern Adjoining Property</b>	
1928 to 1952	<p>Aerial photographs depict the property to be developed with residential homes and structures associated with farming/agriculture.</p> <p>Historic city directories identified the tenant of the property as:</p> <p><u>20112 Sherman Way</u></p> <ul style="list-style-type: none"> <li>• Mead Chas a Rancher (1921)</li> </ul>

Date	Description
1956 to 1983	<p>Aerial photographs depict the eastern portion of the property to be developed with a gasoline station and small commercial structures. Date	Description
<b>Western Adjoining Property</b>	
1928 to 1952	Aerial photographs depict most of the property to be undeveloped vacant land, except for several small structures associated with the residential homes located further to the north.
1964	An aerial photograph depicts the property to be undeveloped vacant land.
1967 to 1980	Aerial photographs depict the northern portion of the property to be undeveloped vacant land. The southern portion of the property is developed with residential homes.  Historic city directories identified the tenant of the property as:  <u>20140 Sherman Way</u> <ul style="list-style-type: none"> <li>Bekins Van &amp; Storage Co San Fernando Valley District Offices (1962 through 1980)</li> </ul>
1983 to 2005	Aerial photographs depict the southern portion of the property to be developed with residential homes. The northern portion of the property is developed with a paved parking lot for semi-trucks and trailers and a large warehouse building.  Historic city directories identified the tenant of the property as:  <u>20140 Sherman Way</u> <ul style="list-style-type: none"> <li>Public Storage (1985 through 2005)</li> <li>Ray Stanley (1985)</li> <li>Ray Sherburne &amp; Lilian (1985)</li> <li>Lori Gibson (2004)</li> </ul>
2009 to 2016	Aerial photographs depict the southern portion of the property to be developed with residential homes. The northern portion of the property is developed with a paved parking lot for semi-trucks and trailers and a larger warehouse building consistent with present-day improvements.  Historic city directories identified the tenant of the property as:  <u>20140 Sherman Way</u> <ul style="list-style-type: none"> <li>Public Storage (2009 through 2015)</li> </ul>

## 5.6 Interviews

NV5 interviewed parties potentially having information about current and/or former conditions at the Site. The parties and their affiliation are tabulated on the following page.

Interviews		
Name	Affiliation	Role
Adam Peterson	CBRE	Property Owner Realtor

No evidence of a REC in connection with the Site was disclosed during the abovementioned interviews. Pertinent information collected during these interviews has been incorporated throughout the report where appropriate. Interview records are presented in Appendix F.

## **6 NON-SCOPE CONSIDERATIONS**

Per the authorized scope of work, items beyond the scope of ASTM E-1527-13 were not addressed as part of this assessment.

## **7 VAPOR ENCROACHMENT SCREENING**

ASTM E1527-13 requires the Environmental Professional to evaluate the potential for vapor encroachment of chemicals of concern (COC) onto the Site, and to determine if such vapor encroachment constitutes evidence of a REC on the Site. The E1527-13 Standard Practice does not specifically state the methods that must be used to screen for potential vapor encroachment issues. However, ASTM has developed a separate Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E2600-15), which outlines an ASTM E1527-13-compliant methodology to conduct vapor encroachment screening.

### **7.1 VES Methodology**

The goal of conducting Vapor Encroachment Screening (VES) is to identify a vapor encroachment condition (VEC), which is defined as the presence or likely presence of chemicals of concern (COC) vapors in the vadose zone of the Site caused by the release of vapors from contaminated soil and/or groundwater either on or near the Site. If a VEC is identified, the environmental professional must determine whether the VEC represents evidence of a REC on the Site under the context of the Phase I ESA Standard Practice. It should be noted that the identification of a VEC on the Site does not necessarily indicate that a potential for migration of vapors into existing or proposed structures on the Site is likely. The environmental professional will identify the VEC as a REC where the potential for vapor migration into structures is considered likely, or where the contaminant concentrations in the soil, groundwater, or soil vapors on the Site are significant and likely to result in enforcement against on-site or off-site responsible parties.

The VES utilizes information regarding the potential presence of releases on or near the Site that were collected as a normal part of the Phase I ESA process, such as governmental database records, review of governmental files, historical data sources, etc. The VES Standard Guide requires the environmental professional to search for potential sites of concern within specific search radii. The area of concern search radius is 1,760 feet (1/3 mile) for non-petroleum contaminated sites and 528 feet (1/10 miles) for petroleum contaminated sites. The default search distances may be expanded or reduced in the upgradient, downgradient, or cross-gradient directions by the environmental professional based on experience in the local area and applying professional judgment to factors such as where a well-defined regional groundwater flow direction is identified, or whether other geologic features such as low permeability soils or hydrogeologic boundaries such as rivers or streams exist which would tend to limit the potential for migration of groundwater or vapors in a particular direction.

### **7.2 VES Search Results**

NV5 identified several sites of potential concern within the VES search radii, based on our review of governmental database records, regulatory agency files, and historical resources referenced in Section 5.3. However, based on our review of available information, none of these sites appear to represent a VEC in connection with the Site.

## **8 FINDINGS**

Based on the site reconnaissance, review of historical and available documents, and interviews, NV5 finds the following:

### **8.1 Current Site Activities**

At the time of our site reconnaissance, the property was developed with a single-story office building occupied by various medical offices including dental and orthodontics, magnetic resonance imaging (MRI), acupuncture, an ambulance company.

### **8.2 Historical Site Activities**

The Site was originally cultivated for agricultural use as early as 1928 to as late as 1938. By 1947, the Site had been developed with a residential home. By 1964, the residential home had been removed from the Site and a large structure or paved area of unknown use constructed. By 1967, all structure on the Site had been removed and the Site left vacant and used for vehicle parking. In 1980, the present-day structure was constructed and has historically been occupied by various medical offices.

### **8.3 Off-Site Activities**

The Site is located within an area primarily mixed for residential and commercial use. Current uses of adjoining properties include an active construction site and a multi-tenant commercial building (restaurants, salon, tattoo artists) to the north, A church and school to the east, single-family residences to the south, and a storage facility and single-family residence to the west.

### **8.4 Data-Gaps**

The ASTM Standard defines a data gap as “a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information.” A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps. NV5 not did identify any data gaps.

## **9 CONCLUSIONS AND RECOMMENDATIONS**

NV5 completed a Phase I ESA of the Site located at 7111 Winnetka Avenue in Canoga Park, California. The ESA was performed in conformance with the scope and limitations of ASTM E1527-13 standards. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. The assessment was performed to identify conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the Site.

**Phase I Environmental Site Assessment**  
7111 Winnetka Avenue, Canoga Park, California

PCCD-22-10745  
March 7, 2022

No evidence of a REC, Controlled REC, or historic REC in connection with the Site was identified during this assessment.

## 10 QUALIFICATIONS AND SIGNATURE

Mr. Eric Dunham gathered the information presented in this report and conducted the Site reconnaissance under the supervision of the Environmental Professionals listed below.

ERIC DUNHAM, GIT  
STAFF GEOLOGIST

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in 40 CFR 312.10. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

REID SHIGENO, EIT  
PROJECT MANAGER  
STAFF I

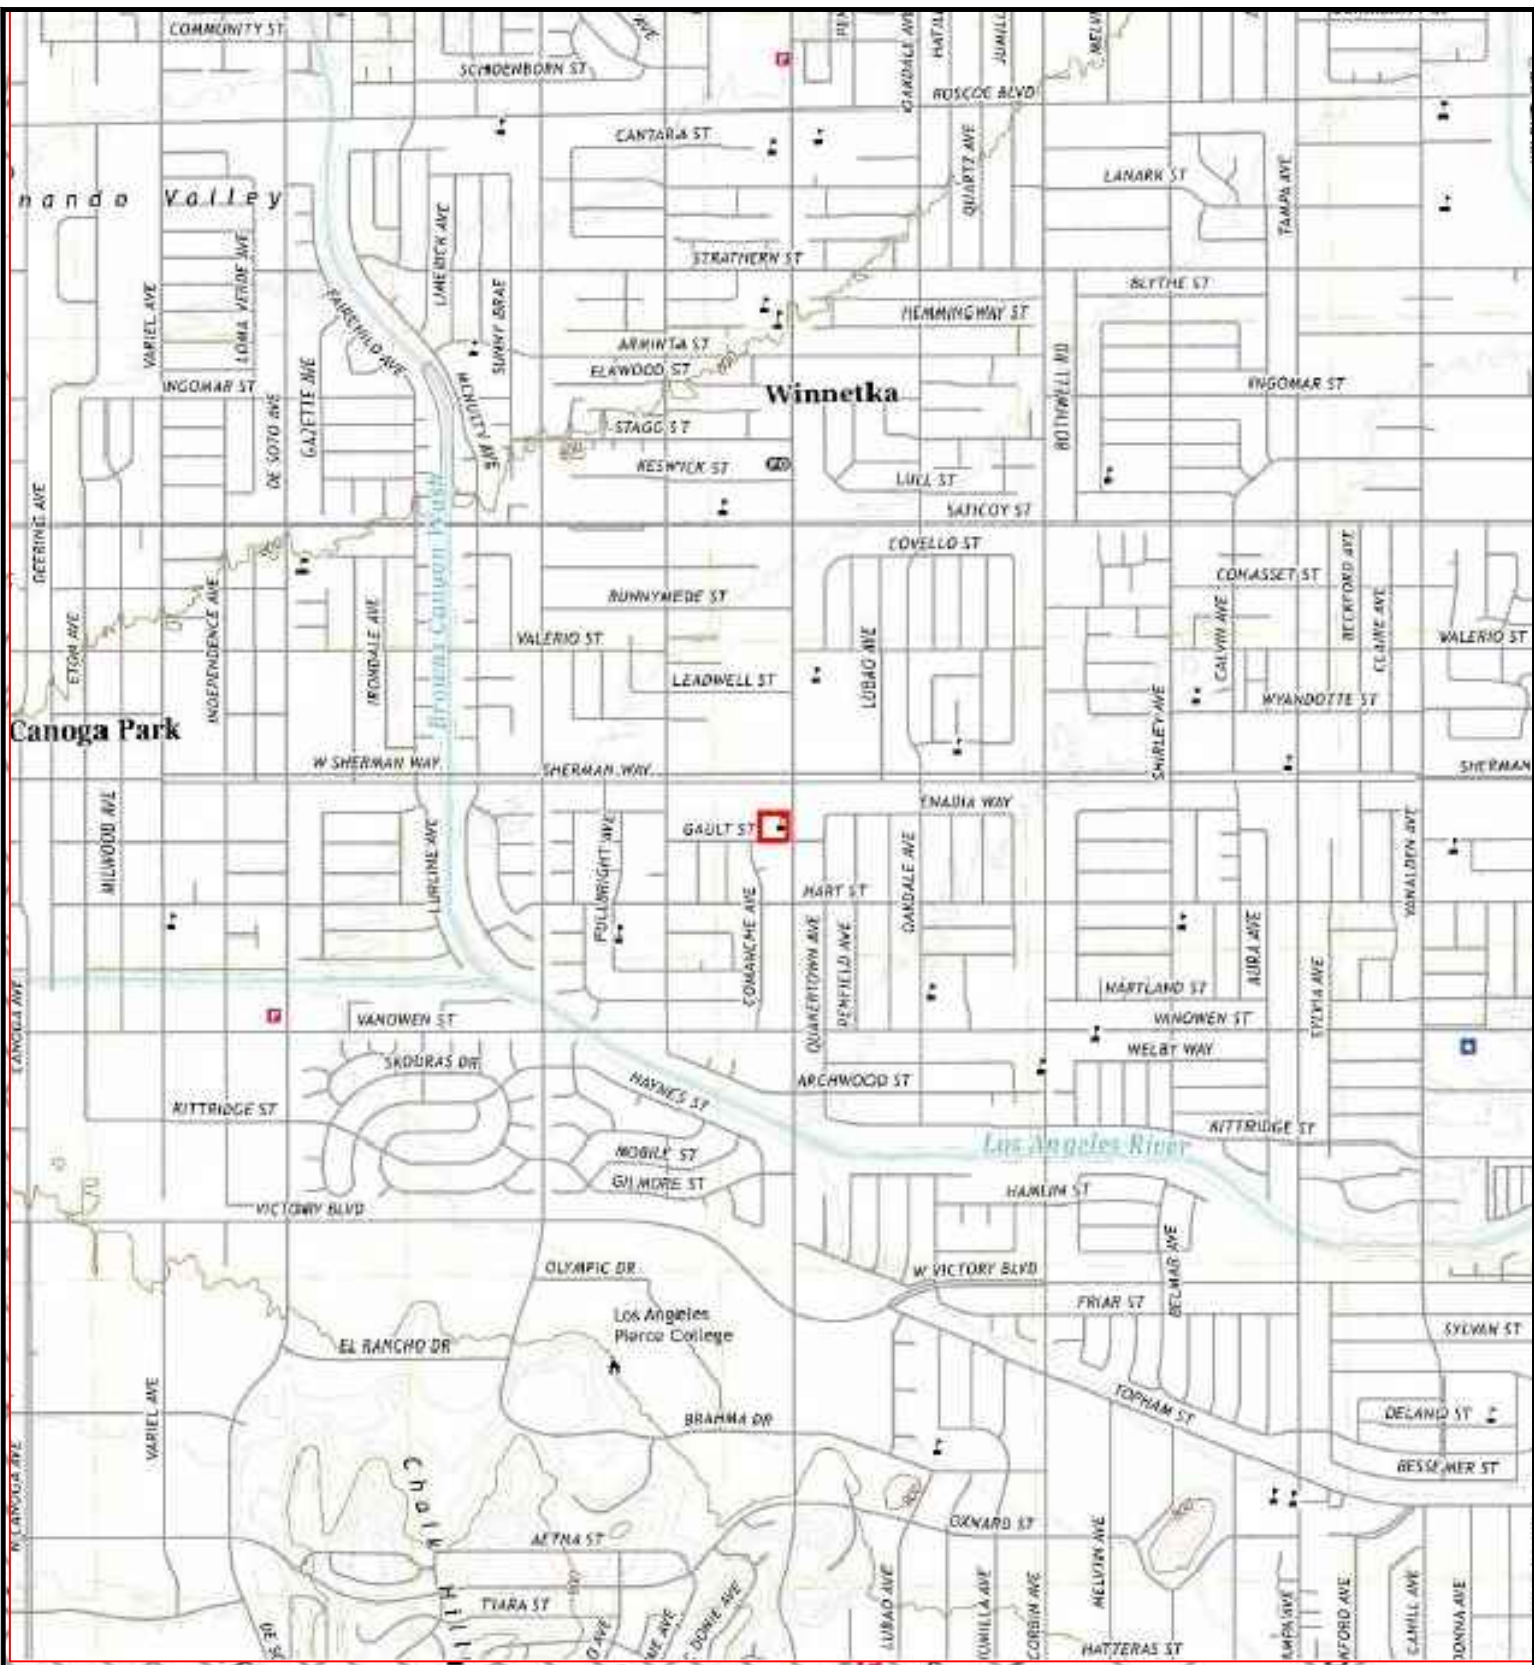

ERIC FRASKE, PE  
SENIOR TECHNICAL REVIEWER  
SENIOR ENGINEER

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal RCRA generators***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b><i>STEVES TRANSMISSION</i></b> EPA ID:: CAD981687734	<b><i>20122 SHERMAN WAY</i></b>	<b><i>NNW 0 - 1/8 (0.056 mi.)</i></b>	<b><i>C25</i></b>	<b><i>62</i></b>
<b><i>LA USD SUTTER JUNIOR</i></b> EPA ID:: CAD981625833	<b><i>7330 WINNETKA AVE</i></b>	<b><i>NNE 1/8 - 1/4 (0.181 mi.)</i></b>	<b><i>F66</i></b>	<b><i>234</i></b>

RCRA-VSQQ: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQQ list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1

## EXECUTIVE SUMMARY

RCRA-VSQG site within approximately 0.25 miles of the target property.

<b>MIDWEST CLEANERS</b> EPA ID:: CAD981399447	<b>20121 SHERMAN WAY</b>	<b>N 0 - 1/8 (0.082 mi.)</b>	<b>C35</b>	<b>85</b>

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

### ***Lists of state and tribal leaking storage tanks***

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 13 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

### ***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 5 UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Hazardous waste / Contaminated Sites**

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 10/25/2021 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 23 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 5 DRYCLEANERS sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

**Violations:**

Site ID: 29048  
Site Name: EXCELLENCE AUTO REPAIR  
Violation Date: 01-10-2019  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date. \*\* Mr. Abarca, just a friendly reminder that CERS submissions are due every year between January 1 and March 1. Please resubmit/submit your Hazardous Materials Business Plan for 2019. This consists of the Owner/Operator Section, Business Activities, Inventory, Site Map, Emergency Response Plans, Employee Training and Employee Training Records. Thank you. \*\*

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date. \*\* Mr. Abarca, just a friendly reminder that CERS submissions are due every year between January 1 and March 1. Please resubmit/submit your Hazardous Materials Business Plan for 2019. This consists of the Owner/Operator Section, Business Activities, Inventory, Site Map, Emergency Response Plans, Employee Training and Employee Training Records. Thank you. \*\*

response equipment. CORRECTIVE ACTION: Complete and electronically submit a site map with all required content. \*\* Mr. Barca, can you please submit a site map to your Hazardous Materials Business Plan for 2019. There are 10 elements to a site map which shall be included if they apply to your facility. Site maps may be hand drawn. Please see the email attachment titled, Site Map Instructions for the state requirements, template and corresponding symbols to use. Thank you. \*\*

Violation Division: Los Angeles City Fire Department  
Violation Program: HMRRP  
Violation Source: CERS,

Site ID: 29048  
Site Name: EXCELLENCE AUTO REPAIR  
Violation Date: 03-08-2019  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 03/08/2019. OBSERVATION: The following hazardous wastes, stored in the hazardous waste storage area was observed without a hazardous waste label - 1 x 55 gallon drum containing used antifreeze. 2 x 55 gallon drums containing used oil. CORRECTIVE ACTION: All drums containing hazardous wastes was properly labeled by end of inspection. Violation corrected on-site.

Violation Division: Los Angeles County Fire Department  
Violation Program: HW  
Violation Source: CERS,

Site ID: 29048

Click Here:

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Section(s) Multiple  
Violation Notes: Haz Waste Generator Program - Administration/Documentation - General Returned to compliance on 12/11/2017. OBSERVATION: Owner/Operator failed to submit the hazardous waste notification electronically to CERS. CORRECTIVE ACTION: Owner/Operator shall submit a notification of hazardous waste generated by the facility in accordance with HSC 25128 electronically to CERS. HSC 25404(e)(4) No later than three years after the statewide information management system is established, each CUPA, PA, and regulated business shall report program data electronically. The secretary shall work with the CUPAs to develop a phased in schedule for the electronic collection and submittal of information to be included in the statewide information management system, giving first priority to information relating to those chemicals determined by the secretary to be of greatest concern. The secretary, in making this determination shall consult with the CUPAs, the California Emergency Management Agency, the State Fire Marshal, and the boards, departments, and offices within the California [Truncated]

Evaluation:  
Eval General Type: Compliance Evaluation Inspection  
Eval Date: 07-15-2021  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: A Remote Facility Inspection Application was submitted to the LAFD CUPA by: Boris Blank The Remote Facility Inspection Application was reviewed. The Business Activities, Owner/Operator Identification, Hazardous Materials Inventory, Site Map, Emergency Response/Contingency Plan and Employee Training Plan sections were reviewed in CERS. Employee Training records were reviewed as well. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation. NOTE: Due to the COVID-19 pandemic and in an effort to minimize transmission risk this inspection was completed remotely. The accuracy of the inventory, site map and spill release history was verified through the Remote Facility Inspection Application submitted by the facility. Please note that future inspections may not be eligible for remote facility inspections. The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS ID: 10560871  
CERS Description: Chemical Storage Facilities

Violations:  
Site ID: 110570  
Site Name: dd's Discounts #5242  
Violation Date: 05-17-2019  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 05/17/2019. OBSERVATION: Hazardous waste containers (Flammable, toxic, Corrosive) were observed without the accumulation start date. - Store Manager entered the accumulation start on the hazardous waste labels as the date from the last hazardous waste removal; violation has been abated. CORRECTIVE ACTION: Submit photos to the PA demonstrating that the container listed above has been properly labeled.  
Violation Division: Los Angeles County Fire Department  
Violation Program: HW  
Violation Source: CERS,

Evaluation:  
Eval General Type: Compliance Evaluation Inspection  
Eval Date: 10-21-2020  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: Consent to enter, inspect and take photographs was given by: Andrea Herskovits, Store Manager Observed that site has no hazardous waste or other chemicals at threshold quantity. Remove from HM Program 4500. The Business Activities, Owner/Operator Identification, Hazardous Materials Inventory, Site Map, Emergency Response/Contingency Plan and Employee Training Plan sections were reviewed in CERS and field verified. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation. NOTE: The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Date: 09/08/2014  
Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Annual Oversight Cost Estimate  
Completed Date: 09/22/2015  
Comments: Annual Cost Estimate emailed and mailed to LAUSD.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 03/10/2016  
Comments: Via email on March 10, 2016, DTSC provided notification of the DTSC project manager change for the Site, effective immediately.

Completed Area Name: Parcel 1  
Completed Sub Area Name: Not reported  
Completed Document Type: Annual Oversight Cost Estimate  
Completed Date: 09/15/2016  
Comments: Annual Cost Estimates Letter, dated 09/15/16, sent to LAUSD.

Completed Area Name: Parcel 1  
Completed Sub Area Name: Not reported  
Completed Document Type: \* Land Use Restriction Monitoring Report  
Completed Date: 02/29/2012  
Comments: On February 29, 2012, DTSC acknowledged the LUC annual inspection report satisfactorily addressed the LUC annual inspection requirements. However, DTSC made three comments and noted that such should be addressed in future activities/submittals.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 11/13/2008  
Comments: Map of the proposed LUC areas Parcel 1 & Parcel 2.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Certification  
Completed Date: 12/13/2011  
Comments: DTSC certified that all response actions according to the DTSC-approved Removal Action Workplan have been completed; however, annual inspections will be conducted to ensure compliance with the LUC for Parcel 1 (located on Sutter Middle School).

Completed Area Name: Parcel 1  
Completed Sub Area Name: Not reported  
Completed Document Type: \* Land Use Restriction Monitoring Report  
Completed Date: 01/30/2013  
Comments: On January 30, 2013, DTSC requested the cracks in the asphalt be cleaned and filled to prevent potential exposure to arsenic contamination in the soil beneath the asphalt. DTSC also requested a follow-up report providing the details of such completed activities be submitted by March 1, 2013.

Site Name: HASHEMYAR'S SERVICE & OIL INC  
Violation Date: 09-17-2019  
Citation: 23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)  
Violation Description: Failure to have an approved UST Monitoring Plan.  
Violation Notes: Returned to compliance on 11/04/2019. OBSERVATION: Failure to maintain an approved monitoring plan. This is the second notice for this violation. CORRECTIVE ACTION: The following corrections are required: 1. Update the tank install date for all 3 tanks to a more accurate time. 2. For the waste oil tank, update the tank construction section and enter fiberglass for the secondary containment because the waste oil tank is double wall. 3. For waste oil tank, enter sensor model number 420 for the annular. 4. For the waste oil tank pipe monitoring, enter Veeder Root TLS350 and sensor model number 208. 5. For tanks #1 and #2 select 'no' for "Continuous Electronic Tank Monitoring" because tank 1 and 2 are single wall. 6. For tanks #1 and #2 in the "Under Dispenser Containment (UDC) Monitoring" section, only state the UDCs are float and chain assembly; leave the other areas in that section blank.

Eval Notes: Inspector Wilson LAFD, on site this date to conduct routine inspection of underground storage tank. Consent to enter, inspect and take photographs was given on this date by Owner Ahad Hashemyar Monitoring system certification was conducted at this time. Monitoring certification was performed by technician Jimmy Quintanilla from JQ Engineering. Tester provided the following certifications: ICC: 5268636 Veeder-Root: b34505 The UST monitoring history showed all functions normal. The monitoring set up and alarm history were provided for review. The sumps and UDCs were opened for inspection and the sensors were observed positioned to detect a leak at the earliest opportunity. The spill buckets were also visually inspected. The Monitoring Plan was compared to the equipment onsite. The operation of the UST system was compared to the conditions of the operating permit.

Potential Contaminants of Concern: Tetrachloroethylene (PCE)  
Site History: The Regional Board has been providing regulatory oversight for the characterization, cleanup and monitoring of the contaminants of concern (COCs) in soil and groundwater at the Site since May 2004. The 1926-square foot Site is located within the Sherman Way Station strip mall. The strip mall has a parking lot north of the building that accesses Sherman Way. A separate paved parking lot is present to the south of the strip mall and separated from it by a 20-foot-wide alley. The Site was occupied by Smart Cleaners from 1987 to 2002. Swiss Cleaners has occupied the Site since 2002. The dry-cleaning machine currently in use at the Site is reportedly a Lindus Model ML45.2001 closed-loop solvent-based machine. The Site is underlain by alluvial gravel, sand and clay of valley and floodplain areas. Ground water was encountered during the previous investigations at a depth of 18 feet below ground surface (bgs). However, depth to water table following completion of the wells ranged from 12 to 14 feet bgs. The measured groundwater gradient is to the southeast. Between 2003 and 2006, Leymaster and HVN, conducted a Phase I environmental investigation, several rounds of the Phase II environmental investigations, groundwater monitoring events, and remedial actions at the Site. Investigation results indicate that the soil, soil gas, and groundwater beneath the Site have been impacted with volatile organic compounds (VOCs) consisting primarily of tetrachloroethylene (PCE), which is the main chemical used in dry cleaning machine operated at the Site. The highest concentration of PCE at 870 microgram per kilogram (a%g/Kg) was found in a soil sample collected at 15 feet bgs at the vicinity of former dry cleaning machine. The maximum concentration of PCE at 261 microgram per liter (a%g/L) was found in a soil vapor collected at 7 feet bgs at the vicinity of former dry cleaning machine. Historical groundwater analytical results also indicated that PCE was detected at maximum concentration of 207 a%g/L in down-gradient well MW-5. In May and June 2006, HVN, submitted two documents including remediation progress and quarterly groundwater monitoring reports and requested a Site closure providing some justifications described in the remedial action report. Upon the preliminary review of the Site closure report, Regional Board staff discussed requirements for considering Site closure in a project meeting on August 10, 2006. In response to the Regional Board's comments, on November 1, 2006, HVN developed and submitted the Soil

and Soil Gas Confirmation Sampling Plan (SCSP) addressing Regional Board concerns. The SCSP was reviewed by Regional Board staff and conditionally approved via email on February 13, 2007 (copy attached). The results of SCSP were discussed with CSWP and CSC during the project meeting on March 18, 2008, concluding the following: Adequate, field and laboratory data are collected for soil matrix beneath the Site; PCE concentrations in groundwater monitoring wells are near the acceptable limit; however, vertical extent of the impacted groundwater has not been fully defined. Additional investigation and groundwater monitoring program are still required. We concurred with CSCs recommendation for additional soil gas survey, focusing on lateral extent of the PCE vapor plume, and a human health risk assessment to evaluate subsurface vapor intrusion to the indoor air. Follow up project meeting on March 18, 2008, and to address the Regional Boards comments the Work Plan was prepared by CSC and submitted to the Regional Board on July 22, 2008. Currently the Site is under supplemental investigation to evaluate of the risk to human health for intrusion of subsurface VOCs vapors into indoor air. A soil vapor extraction system operated from January 2005 to June 2006 and from May 2013 to October 2014 at the site. The results of the latest soil vapor and interior sub-slab vapor sampling were used to determine risk to human health from subsurface vapor intrusion into indoor air. The evaluation indicated that the site does not pose a significant threat to the users for a commercial and/or industrial use of the site. based on the results of the investigation and human health risk assessment, the regional Board issued a no further action determination for the site in July 2016. a Covenant and Environmental Restriction was executed and recorded in the Office of the County Recorder of Los Angeles County, State of California on June 29, 2016 to restrict future site use to commercial and/or industrial uses

Completed Info:

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1  
Completed Date: 12/20/1995  
Comments: Pursuant to the MOU, DTSC has reviewed a Phase I Site Assessment for El Proyecto del Barrio (EPB). The subject property currently contains a vacant one-story hospital building. EPB is proposing to demolish the building in order to construct a new comprehensive health services center on the site to be owned and operated by EPB. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property; there is no contamination on the property.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 02/03/2022
Number of Days to Update: 24	Next Scheduled EDR Contact: 04/11/2022
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 02/03/2022
Number of Days to Update: 24	Next Scheduled EDR Contact: 04/11/2022
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Telephone: 703-603-8704  
Last EDR Contact: 12/29/2021  
Next Scheduled EDR Contact: 04/11/2022  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/20/2021

Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: 800-424-9346
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 02/03/2022
Number of Days to Update: 24	Next Scheduled EDR Contact: 04/25/2022
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/13/2021	Source: EPA
Date Data Arrived at EDR: 09/15/2021	Telephone: 800-424-9346
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 12/17/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/04/2022
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 12/17/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/04/2022

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 12/17/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/04/2022
	Data Release Frequency: Quarterly

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 12/17/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/04/2022
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 12/17/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/04/2022
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 07/12/2021	Source: Department of the Navy
Date Data Arrived at EDR: 08/06/2021	Telephone: 843-820-7326
Date Made Active in Reports: 10/22/2021	Last EDR Contact: 11/08/2021
Number of Days to Update: 77	Next Scheduled EDR Contact: 02/21/2022
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/23/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/23/2021	Telephone: 703-603-0695
Date Made Active in Reports: 11/12/2021	Last EDR Contact: 11/18/2021
Number of Days to Update: 81	Next Scheduled EDR Contact: 03/07/2022
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/23/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/23/2021	Telephone: 703-603-0695
Date Made Active in Reports: 11/12/2021	Last EDR Contact: 11/19/2021
Number of Days to Update: 81	Next Scheduled EDR Contact: 03/07/2022
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/13/2021

Source: National Response Center, United States Coast Guard

Date Data Arrived at EDR: 09/21/2021

Telephone: 202-267-2180

Date Made Active in Reports: 12/15/2021

Last EDR Contact: 12/16/2021

Number of Days to Update: 85

Next Scheduled EDR Contact: 04/04/2022

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 10/25/2021

Source: Department of Toxic Substances Control

Date Data Arrived at EDR: 10/26/2021

Telephone: 916-323-3400

Date Made Active in Reports: 01/14/2022

Last EDR Contact: 01/25/2022

Number of Days to Update: 80

Next Scheduled EDR Contact: 05/09/2022

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/25/2021

Source: Department of Toxic Substances Control

Date Data Arrived at EDR: 10/26/2021

Telephone: 916-323-3400

Date Made Active in Reports: 01/14/2022

Last EDR Contact: 01/25/2022

Number of Days to Update: 80

Next Scheduled EDR Contact: 05/09/2022

Data Release Frequency: Quarterly

## ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 11/08/2021

Source: Department of Resources Recycling and Recovery

Date Data Arrived at EDR: 11/09/2021

Telephone: 916-341-6320

Date Made Active in Reports: 01/28/2022

Last EDR Contact: 11/09/2021

Number of Days to Update: 80

Next Scheduled EDR Contact: 02/21/2022

Data Release Frequency: Quarterly

## ***Lists of state and tribal leaking storage tanks***

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LUST: Leaking Underground Fuel Tank Report (GEOTRACKER)

Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 09/07/2021	Source: State Water Resources Control Board
Date Data Arrived at EDR: 09/07/2021	Telephone: see region list
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 12/07/2021
Number of Days to Update: 83	Next Scheduled EDR Contact: 03/21/2022
	Data Release Frequency: Quarterly

## LUST REG 6L: Leaking Underground Storage Tank Case Listing

For more current information, please refer to the State Water Resources Control Board's LUST database.

Date of Government Version: 09/09/2003	Source: California Regional Water Quality Control Board Lahontan Region (6)
Date Data Arrived at EDR: 09/10/2003	Telephone: 530-542-5572
Date Made Active in Reports: 10/07/2003	Last EDR Contact: 09/12/2011
Number of Days to Update: 27	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: No Update Planned

## LUST REG 1: Active Toxic Site Investigation

Del Norte, Humboldt, Lake, Mendocino, Modoc, Siskiyou, Sonoma, Trinity counties. For more current information, please refer to the State Water Resources Control Board's LUST database.

Date of Government Version: 02/01/2001	Source: California Regional Water Quality Control Board North Coast (1)
Date Data Arrived at EDR: 02/28/2001	Telephone: 707-570-3769

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/10/2021

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/18/2021

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Number of Days to Update: 574	Next Scheduled EDR Contact: 04/18/2022
	Data Release Frequency: N/A

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A	Source: EDR, Inc.
Date Data Arrived at EDR: N/A	Telephone: N/A
Date Made Active in Reports: N/A	Last EDR Contact: N/A
Number of Days to Update: N/A	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A	Source: EDR, Inc.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/11/2021	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 11/12/2021	Telephone: 860-424-3375

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Longitude (West):	118.57163 - 118° 34' 17.87"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	355193.9
UTM Y (Meters):	3785220.2
Elevation:	768 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	11998254 CANOGA PARK, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1280F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1285F	FEMA FIRM Flood data
06037C1290F	FEMA FIRM Flood data
06037C1295F	FEMA FIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
CANOGA PARK	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Q106	1/2 - 1 Mile NNW	Not Reported
Q107	1/2 - 1 Mile NNW	Not Reported
143	1/2 - 1 Mile WSW	Not Reported
1G	1/2 - 1 Mile NNW	Not Reported
2G	1/2 - 1 Mile NNW	Not Reported
3G	1/2 - 1 Mile WSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Mocho  
 Soil Surface Texture: loam  
 Hydrologic Group: Not reported  
 Soil Drainage Class:  
 Hydric Status: Partially hydric  
 Corrosion Potential - Uncoated Steel: High  
 Depth to Bedrock Min: > 0 inches  
 Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	16 inches	75 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 8.4 Min: 7.9

### Soil Map ID: 2

Soil Component Name: San Emigdio  
 Soil Surface Texture: sandy loam  
 Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.  
 Soil Drainage Class: Well drained

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	18 inches	77 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## WELL SEARCH DISTANCE INFORMATION

<u>DATABASE</u>	<u>SEARCH DISTANCE (miles)</u>
Federal USGS	1.000
Federal FRDS PWS	Nearest PWS within 1 mile
State Database	1.000

## **FEDERAL USGS WELL INFORMATION**

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

# EDR Environmental Lien and AUL Search

## EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by NV5 were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

### Certified Sanborn Results:

**Certification #** 3857-44D8-8749  
**PO #** PCCD-22-10745  
**Project** Magnolia Science Academy 5

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 3857-44D8-8749

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

NV5 (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

# EXECUTIVE SUMMARY

---

The purpose of this noise analysis is to provide an assessment of the impacts resulting from the Magnolia Science Academy Project (Project) and to identify any measures that may be necessary to reduce potentially significant impacts.

## On-Site Construction Noise

Construction noise levels would be reduced via Regulatory Compliance Measures (RCMs), which are existing requirements and reasonably anticipated standard conditions based on local, State, or federal regulations and laws that are frequently required independently of CEQA review and serve to offset or prevent specific impacts. RCMs are not included as mitigation measures in the environmental clearance document because the Project is required to comply with RCMs through State and local regulations. Construction noise sources are regulated within the City of Los Angeles Municipal Code Section 41.40, which prohibits construction between the hours of 9:00 PM and 7:00 AM Monday through Friday, 6:00 PM and 8:00 AM on Saturday, and at any time on Sunday (i.e., construction is allowed Monday through Friday between 7:00 AM to 9:00 PM; and Saturdays and National Holidays between 8:00 AM to 6:00 PM). Modeled construction noise levels with RCMs would reduce noise levels to within acceptable limits. Noise reduction measures include but are not limited to optimal muffler systems, dampening materials, sound aprons and limiting simultaneous operations.

## Off-Site Construction Noise

Construction of the Project would require worker, haul, and vendor truck trips to and from the site to work on the site, export soil, and deliver supplies to the site. Trucks traveling to and from the Project site would be required to travel along a haul route approved by the City. At the maximum, approximately 12 hauling trips per day would take place during the demolition phase. Haul truck traffic would take the most direct route to the freeway ramp along Winnetka Avenue. The noise level increases from truck trips would be below the significance threshold of 5 dBA above ambient. As such, off-site construction noise impacts would not be considered significant.

## Operational Noise

All Project mechanical equipment would be required to be designed with appropriate noise-control devices—such as sound attenuators, acoustics louvers, or sound screens/parapet walls—to comply with noise-limitation requirements provided in Section 112.02 of the LAMC, which prohibits equipment from causing more than a 5 dBA increase in the ambient noise level.

## Construction Vibration

The forecasted vibration levels due to on-site construction activities would not exceed the building damage significance threshold of 0.5 PPV for reinforced-concrete, steel, or timber building at the adjacent multi-family residential and commercial hotel uses.

## PROJECT DESCRIPTION

---

The Project site is located at 7111 Winnetka Avenue within the Canoga Park neighborhood in the City of Los Angeles, as shown in **Figure 1: Project Site Location**. The 1.74-acre parcel (APN: 2135-038-016) is currently developed with a vacant single-story office building occupied by various medical offices including dental and orthodontics, magnetic resonance imaging (MRI), acupuncture, and an ambulance company. The Project site is bounded by Winnetka Avenue to the east and Gault Street to the south. The proposed development includes removal of the existing single story office building to construct the Magnolia Science Academy (School) consisting of a total of 457 students (297 students middle school, 100 students 6<sup>th</sup> grade, and 160 students high school) up to 17 classrooms within a 2-story building, a playfield, gymnasium and 54 parking spaces.

FIGURE 1

# EXISTING CONDITIONS

## Ambient Noise Levels

Short-term sound monitoring was conducted at five (5) locations to measure the ambient sound environment in the Project vicinity. Measurements were taken over 15-minute intervals at each location between the hours of 9:04 AM and 10:30 AM on May 23, 2023, and provided in **Table 1: Ambient Noise Measurements**. **Figures 2-6: Noise Monitoring Locations** depicts locations where ambient noise measurements were conducted. As shown in **Table 2**, ambient noise levels ranged from a low of 58.1 dBA (Leq-15minute) southwest of the Project site along Gault Street (Site 2) to a high of 71.6 dBA (Leq-15minute) southeast of the Project site at Gault Street and Winnetka Avenue (Site 4).

Location Number/Description	Nearest Use	Time Period	Noise Source	dBA Leq-15-minute
1 At the Project site along Winnetka Avenue	Vacant	9:37 AM-9:52 AM	Vehicle and pedestrian traffic along W. Beverly Boulevard	70.1
2 Southwest of the Project along Gault Street	Residential	10:15 AM-10:30 AM	Vehicle and pedestrian traffic along N. Hoover Street	58.1
3 East of the Project site along Winnetka Avenue	School	9:21 AM-9:36 AM	Vehicle and pedestrian traffic at N. Hoover Street and Council Street	70.7
4 Southeast of the Project site at Winnetka Avenue and Gault Street	Residential/Place of Worship	9:04 AM-9:19 AM	Vehicle and pedestrian traffic at S. Commonwealth Avenue and W. 1 <sup>st</sup> Street	71.6
5 South of the Project site at Gault Street and Winnetka Avenue	Residential	9:54 AM-10:09 AM	Vehicle and pedestrian traffic at N. Commonwealth Avenue and W. Beverly Boulevard	64.4

*Source: Refer to Appendix A for noise monitoring data sheets.  
Notes: dBA = A-weighted decibels; Leq = average equivalent sound level.*

## Sensitive Uses

The Project site is predominantly surrounded by single-family residential uses. As shown in **Figure 7: Sensitive Receptor Map**, the parcels to the south and west along Gault Street are zoned RS-1-RIO “Suburban Zone” and contain single-family residential uses. The parcels to the east across Winnetka Avenue are zoned RA-1-RIO “Suburban Zone” and contain the Valor Montessori Prep School. The parcels to the southeast across Winnetka Avenue are zoned R1-1-RIO “One-Family Zone” and contain single-family residential uses. The parcels to the north are zoned C2-1VL-RIO “Commercial Zone” and contain commercial uses. An overview of the surrounding land uses relative to the noise monitoring location in **Table 1** above is provided below.

- **Noise Monitoring Site 1**: Located at the Project site along Winnetka Avenue, uses include the existing commercial use.
- **Noise Monitoring Site 2**: Located to the southwest of the Project site along Gault Street, sensitive uses include single-family residential uses.
- **Noise Monitoring Site 3**: Located to the east of the Project site along Winnetka Avenue, sensitive uses include the Valor Montessori Prep.
- **Noise Monitoring Site 4**: Located to the southeast of the Project site across Winnetka Avenue, sensitive uses include single family residential and the Winnetka Avenue Church of Christ.
- **Noise Monitoring Site 5**: Located to the south of the Project site at Winnetka Avenue and Gault Street, sensitive uses include single-family residential.

## Vibration Conditions

Based on field observations, the primary source of existing ground-borne vibration in the vicinity of the Project site is vehicle traffic on local roadways. According to the Federal Transit Administration,<sup>1</sup> typical road traffic-induced vibration levels are unlikely to be perceptible by people. Trucks and buses typically generate ground-borne vibration velocity levels of approximately 63 VdB (at a 50-foot distance), and these levels could reach 72 VdB when trucks and buses pass over bumps in the road. A vibration level of 72 VdB is above the 60 VdB level of perceptibility.

## Ambient Noise Measurements

Noise-level monitoring was conducted by Meridian Consultants on May 23, 2023, at five (5) locations within the Project area vicinity, as shown in **Figure 2** through **6**. Noise-level monitoring was conducted for 15-minute intervals at each location using a Larson Davis Model 831 sound-level meter. This meter satisfies the American National Standards Institute (ANSI) standard for general environmental noise measurement instrumentation. The ANSI specifies several types of sound-level meters according to their precision. Types 1, 2, and 3 are referred to as “precision,” “general-purpose,” and “survey” meters, respectively. Most measurements carefully taken with a Type 1 sound-level meter will have a margin of error not exceeding 1 dB.

The Larson Davis Model 831 is a Type 1 precision sound-level meter. This meter meets all requirements of ANSI S1.4-1983 and ANSI S1.43-1997 Type 1 standards, as well as International Electrotechnical Commission (IEC) IEC61672-1 Ed. 1.0, IEC60651 Ed 1.2, and IEC60804 Type 1, Group X standards. The sound-level meter was located approximately 5 feet above ground and was covered with a Larson Davis windscreen. The sound-level meter was field calibrated with an external calibrator prior to operation.

## Construction

Future dates represent approximations based on the general Project timeline and are subject to change pending unpredictable circumstances that may arise. As such, for purposes of this analysis, project construction is assumed to begin January 2024 and is expected to last until July 2025. Construction would occur over five phases: (1) demolition; (2) grading, (3) building construction, (4) paving; and (5) architectural coating.

Each phase of construction would result in varying levels of intensity and a number of construction personnel. Based on default assumptions derived from CalEEMod, the construction workforce would consist of approximately 13 worker trips per day and approximately 12 hauling trips per day during demolition; approximately 10 worker trips per day during grading; approximately 24 worker trips per day and 9 vendor trips per day during building construction; approximately 13 worker trips per day during paving; and approximately 5 worker trips per day during architectural coating.

## *On-Site Construction Equipment*

Construction activities typically generate noise from the operation of equipment within the Project Site that is required for the construction of various facilities. Noise impacts from on-site construction equipment as well as the on-site staging of construction trucks were evaluated by determining the noise levels generated by different types of construction activity and calculating the construction-related noise level at nearby noise-sensitive receptor locations. Actual construction noise levels would vary, depending upon the equipment type, model, the type of work activity being performed, and the condition of the equipment.

In order to calculate construction noise levels, hourly activity or utilization factors (i.e., the percentage of normal construction activity that would occur, or construction equipment that would be active, during each hour of the day) are estimated based on the temporal characteristics of other previous and current construction projects. The hourly activity factors express the percentage of time that construction activities would emit average noise levels. Typical noise levels for each type of construction equipment were obtained from the FHWA Roadway Construction Noise Model.<sup>2</sup>

Over the course of a construction day, the highest noise levels would be generated when multiple pieces of construction equipment are operated concurrently. As such, an inventory of construction equipment, including the number and types of equipment, which is analytically assumed to be operating simultaneously within the Project Site conservatively was identified for each phase/component of construction and shown in **Table 2: Construction Equipment by Phase**. Practically, it is highly unlikely that all pieces of construction equipment identified in **Table 2** would operate simultaneously in any specific location during construction. For example, crawler tractors, graders and dozers can disturb 0.5 acres per day and scraper can disturb 1 acre per day.<sup>3</sup> Therefore, equipment is generally operated only when needed and space constraints limit the equipment that can be used at any one time in a specific location. Consequently, this modeling is considered a conservative approach to calculate the maximum noise levels that would be generated.

Source: FHWA Roadway Construction Noise Model (RCNM) version 1.1  
Refer to Appendix B for construction noise worksheets.

The calculated average noise levels provided in **Table 2** were inputted into the noise model SoundPLAN,<sup>4</sup> which generates computer simulations of noise propagation from sources such as construction noise. SoundPLAN forecasts noise levels at specific receptors using sound power data and three-dimensional topographical data.

Construction noise levels have been calculated at each of the analyzed sensitive receptors during each of the construction phases. As detailed in the FHWA Construction Noise Handbook, noise levels generated by on-site construction equipment can be reduced via specific noise control measures including the following: (1) muffler requirements; (2) equipment modifications that reduce noise levels; and (3) maintenance and operational requirements. These noise control measures can be used separately or in combination in order to reduce the noise levels generated by on-site construction equipment.

Most on-site construction-related noise originates from equipment powered by either gasoline or diesel engines. A large part of the noise emitted is due to the intake and exhaust portions of the engine cycle.

<sup>4</sup> SoundPLAN model is in compliance with ISO 9613-2 standards for assessing attenuation of sound propagating outdoors and general calculation method.

Reducing noise from this source can be achieved via muffler systems. This noise control strategy would include the replacement of worn mufflers and retrofitting on-site construction equipment where mufflers are not in use. Using muffler systems on on-site construction equipment reduces construction noise levels by 10 dBA or more.<sup>5</sup>

Another effective method of diminishing noise levels associated with individual pieces of construction equipment is by modifying the equipment. Modifications such as the dampening of metal surfaces is effective in reducing on-site construction equipment noise levels. These modifications are typically done by the manufacturer or with factory assistance. Noise reductions of up to 5 dBA are achieved using dampening materials.<sup>6</sup>

Other temporary abatement techniques include the use of temporary and/or moveable shielding for both specific and nonspecific operations. Some mobile shielding is capable of being moved intact or being repeatedly erected and dismantled to shield a moving operation. An example of such a barrier utilizes noise curtains in conjunction with trailers to create an easily moveable, temporary noise barrier system. To be effective, the length of a barrier should be greater than its height, the noise source should not be visible, and any barrier should be located as close as possible to either the noise source or the receiver. In addition, providing increased distance between a noise source and a noise receiver can also be considered a form of abatement.

Additionally, faulty or damaged mufflers, loose engine parts, rattling screws, bolts, or metal plates all contribute to increasing the noise level of on-site construction equipment. By regularly inspecting on-site construction equipment for these conditions and making adjustments to the equipment as necessary can also reduce noise levels generated by on-site construction equipment.

---

5 FHWA, Special Report—Measurement, Prediction, and Mitigation, updated June 2017, [https://www.fhwa.dot.gov/Environment/noise/construction\\_noise/special\\_report/hcn04.cfm](https://www.fhwa.dot.gov/Environment/noise/construction_noise/special_report/hcn04.cfm), Accessed May 2023.

6 FHWA, Special Report—Measurement, Prediction, and Mitigation, updated June 2017, accessed May 2023, [https://www.fhwa.dot.gov/Environment/noise/construction\\_noise/special\\_report/hcn04.cfm](https://www.fhwa.dot.gov/Environment/noise/construction_noise/special_report/hcn04.cfm).

## **Construction Traffic Noise**

The analysis of off-site construction traffic noise impacts focuses on: (1) identifying major roadways that may be used for construction worker commute routes or truck haul routes; (2) identifying the nature and location of noise-sensitive receptors along those routes; and (3) evaluating the traffic characteristics along those routes, specifically as related to existing traffic volumes.

## **Construction Equipment Vibration**

Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods employed. Operation of construction equipment causes ground vibrations that spread through the ground and diminish in strength with distance. While ground vibrations from construction activities do not often reach the levels that can damage structures, fragile buildings must receive special consideration.

Impacts due to construction activities were evaluated by identifying vibration sources (i.e., construction equipment), measuring the distance between vibration sources and surrounding structure locations, and making a significance determination.

For quantitative construction vibration assessments related to building damage and human annoyance, vibration source levels for construction equipment are taken from the FTA *Transit Noise and Vibration Impact Assessment Manual*.<sup>7</sup> Building damage would be assessed for each piece of equipment individually and assessed in terms of peak particle velocity.

The vibration source levels for various types of equipment are based on data provided by the FTA.

## **Playground Noise**

Noise-level calculations at the location of noise-sensitive land uses in the Project vicinity were assessed using the SoundPLAN noise model. The SoundPLAN model depicts noise contours at varying distances and accounts for various inputs to analyze topography, vegetation, propagation from buildings, and existing- and proposed-noise sources and barriers.

To quantify events related to playground activities, an area sources was modeled with a sound power level<sup>8</sup> (LWA) of 70 dB/m, m<sup>2</sup>, as referenced in the SoundPLAN noise library for big play and sports areas with spectators. Assumed hours of operation were between 7:00 AM - 7:00 PM.

---

<sup>7</sup> FTA, *Transit Noise and Vibration Impact Assessment Manual*, September 2018, accessed May 2023, [https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/research-innovation/118131/transit-noise-and-vibration-impact-assessment-manual-fta-report-no-0123\\_0.pdf](https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/research-innovation/118131/transit-noise-and-vibration-impact-assessment-manual-fta-report-no-0123_0.pdf)

<sup>8</sup> The Sound Power Level represents the total sound energy produced by the source under the specified operating conditions. Sound Power Levels cannot be measured directly; instead they are computed from reference sound pressure level measurements

## REGULATORY COMPLIANCE MEASURES

---

Noise levels generated by on-site construction equipment can be reduced via Regulatory Compliance Measures (RCMs), which are existing requirements and reasonably anticipated standard conditions based on local, State, or federal regulations and laws that are frequently required independently of CEQA review and serve to offset or prevent specific impacts. RCMs are not included as mitigation measures in the environmental clearance document because the Project is required to comply with RCMs through State and local regulations.

RCMs are specific noise control measures which include the following: (1) muffler requirements; (2) equipment modifications that reduce noise levels; and (3) maintenance and operational requirements. These noise control measures can be used separately or in combination in order to reduce the noise levels generated by on-site construction equipment.

Most on-site construction-related noise originates from equipment powered by either gasoline or diesel engines. A large part of the noise emitted is due to the intake and exhaust portions of the engine cycle. Reducing noise from this source can be achieved via muffler systems. This noise control strategy would include the replacement of worn mufflers and retrofitting on-site construction equipment where mufflers are not in use. Using muffler systems on on-site construction equipment reduces construction noise levels by 10 dBA or more.<sup>9</sup>

Another effective method of diminishing noise levels associated with individual pieces of construction equipment is by modifying the equipment. Modifications such as the dampening of metal surfaces is effective in reducing on-site construction equipment noise levels. These modifications are typically done by the manufacturer or with factory assistance. Noise reductions of up to 5 dBA are achieved using dampening materials.<sup>10</sup>

Additionally, faulty or damaged mufflers, loose engine parts, rattling screws, bolts, or metal plates all contribute to increasing the noise level of on-site construction equipment. Regularly inspecting on-site construction equipment for these conditions and making adjustments to the equipment as necessary can also reduce noise levels generated by on-site construction equipment.

10 FHWA, Special Report—Measurement, Prediction, and Mitigation, updated June 2017, accessed March 2022, [https://www.fhwa.dot.gov/Environment/noise/construction\\_noise/special\\_report/hcn04.cfm](https://www.fhwa.dot.gov/Environment/noise/construction_noise/special_report/hcn04.cfm).

### **RCM-1 Adherence to Existing Noise Standards**

The Proposed Project shall comply with the City of Los Angeles General Plan Noise Element, the City of Los Angeles Noise Ordinance, and any subsequent ordinances that prohibit the emission or creation of noise beyond certain levels at adjacent uses.

To implement RCM-1 and reduce construction noise, the Contractor would be required to implement reduction measures, which may include but are not limited to:

- Schedule construction activities to avoid operating similar pieces of equipment simultaneously, to achieve a minimum noise reduction of 1.5 dBA.
- Retrofit mobile equipment with optimal muffler systems capable of reducing construction noise levels by 10 dBA or more.
- Dampen mobile equipment capable of reducing construction noise levels by a minimum of 5 dBA.
- Enclose stationary equipment with shields such as sound skins that are capable of achieving reduction of 20 dBA at high frequencies and 10 dBA in the middle frequency range or sound aprons capable of achieve noise reductions of up to 10 dBA.
- Locate all construction areas for staging and warming up as far as possible from adjacent residential buildings and sensitive receivers.

### **RCM-2 Construction Hours**

The Proposed Project shall comply with LAMC Section 41.40, which restricts construction activities to the hours of 7:00 AM to 9:00 PM Monday through Friday, and 8:00 AM to 6:00 PM on Saturday and national holidays with no construction permitted on Sunday.

### **RCM-3 Construction Site Noticing**

The Proposed Project shall comply with the City's Building Regulations Ordinance No. 178,048 (LAMC Section 91.106.4.8), which requires a construction site notice to be provided that includes the following information: job site address, permit number, name and phone number of the contractor or owner or owner's agent, hours of construction allowed by code or any discretionary approval for the site, and the Applicant's telephone number where violations can be reported. The notice shall be posted and maintained at the construction site prior to the start of construction and displayed in a location that is readily visible to the public.

# THRESHOLDS OF SIGNIFICANCE

---

In accordance with Appendix G of the State CEQA Guidelines, a project would have a potentially significant impact related to noise and groundborne vibration if it would result in:

- Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?
- Generation of excessive groundborne vibration or groundborne noise levels?

Appendix G of the State CEQA Guidelines also includes:

- For a project located within the vicinity of a private airstrip or an airport land use plan or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise?

The Project site is not located within an airport land use plan and is not located within two miles of public airport or public use airport, nor is it within the vicinity of private airstrips. As such, the Project would result in no impacts to this screening criteria and no further analyses of this topic is necessary.

## Construction Noise

A Project would normally have a significant impact on noise levels from construction if:

- Construction activities lasting more than one day would exceed existing ambient exterior sound levels by 10 dBA (hourly Leq) or more at a noise-sensitive use;
- Construction activities lasting more than 10 days in a three-month period would exceed existing ambient exterior noise levels by 5 dBA (hourly Leq) or more at a noise-sensitive use; or
- Construction activities of any duration would exceed the ambient noise level by 5 dBA (hourly Leq) at a noise sensitive use between the hours of 9:00 PM and 7:00 AM Monday through Friday, before 8:00 AM or after 6:00 PM on Saturday, or at any time on Sunday.

Section 112.05 of the City's Municipal Code sets a maximum noise level for construction equipment of 75 dBA at a distance of 50 feet when operated within 500 feet of a residential zone. Construction equipment includes crawler-tractors, dozers, rotary drills and augers, loaders, power shovels, cranes, derricks, motor graders, paving machines, off-highway trucks, ditchers, trenchers, compactors, scrapers, wagons, pavement breakers, compressors, and pneumatic or other powered equipment. Compliance with this standard is only required where "technically feasible."<sup>11</sup> Section 41.40 of the City's Municipal Code

---

11 In accordance with the City's Noise Ordinances, "technically feasible" means that the established noise limitations can be compiled with at a project site, with the use of mufflers, shields, sound barriers, and/or other noise reduction devices or techniques employed during the operation of equipment.

prohibits construction between the hours of 9:00 PM and 7:00 AM Monday through Friday, 6:00 PM and 8:00 AM on Saturday, and at any time on Sunday (i.e., construction is allowed Monday through Friday between 7:00 AM to 9:00 PM; and Saturdays and National Holidays between 8:00 AM to 6:00 PM). In general, the City’s Department of Building and Safety enforces noise ordinance provisions relative to equipment and the Los Angeles Police Department enforces provisions relative to noise generated by people.

## Operational Noise

Operational noise impacts are evaluated for Project-related off-site roadway traffic noise impacts and on-site stationary source noise from on-site activities and equipment.

- The Project would cause any ambient noise levels to increase by 3 dBA CNEL to or within the “normally unacceptable” or “clearly unacceptable” category; or
- The Project causes the ambient noise levels measured at the property line of affected noise-sensitive uses to increase by 5 dBA CNEL or greater; or
- Project-related operational (i.e., nonroadway) noise sources, such as outdoor activities, building mechanical/electrical equipment, outdoor activities, loading, trash compactor, or parking facilities, increase ambient noise level (hourly Leq) at noise sensitive uses by 5 dBA.

The significance criterion used in the noise analysis for the on-site operations presented below is an increase in the ambient noise level of 5 dBA (hourly Leq) at the noise-sensitive uses, in accordance with the City’s Noise Regulations (LAMC Chapter XI). The Noise Regulations do not apply to off-site traffic (i.e., vehicles traveling on public roadways). Therefore, the significance criteria for off-site traffic noise associated with Project operations is an increase in the ambient noise level by 3 dBA or 5 dBA in CNEL (depending on the land use category) at noise-sensitive uses. In addition, the significance for composite noise levels (on-site and off-site sources) is an increase in the ambient noise level of 3 dBA or 5 dBA in CNEL (depending on the land use category) for the Project’s composite noise (both Project-related on-site and off-site sources) at noise-sensitive uses.

## Groundborne Vibration

The City has not adopted a significance threshold to assess vibration impacts during construction. Thus, the Caltrans *Transportation and Construction Vibration Guidance Manual*<sup>12</sup> is used as a screening tool to assess the potential for adverse vibration effects related to structural damage. Impacts related to vibration would be considered significant if it exceeds the following standards:

---

12 Caltrans, *Transportation and Construction Vibration Guidance Manual* (September 2013), <https://cityofdavis.org/home/showdocument?id=4521>. Accessed May 2023.

- Project construction activities cause ground-borne vibration levels to exceed 0.5 PPV at the nearest off-site reinforced-concrete, steel, or timber building.
- Project construction activities cause ground-borne vibration levels to exceed 0.3 PPV at the nearest off-site engineered concrete and masonry building.
- Project construction activities cause ground-borne vibration levels to exceed 0.2 PPV at the nearest off-site non-engineered timber and masonry building.
- Project construction activities cause ground-borne vibration levels to exceed 0.12 PPV at buildings extremely susceptible to vibration damage, such as historic buildings.

## Construction

Noise from construction activities would be affected by the amount of construction equipment, the location of this equipment, the timing and duration of construction activities, and the relative distance to noise-sensitive receptors. Construction activities that would occur during the construction phases would generate both steady-state and episodic noise that would be heard both on and off the Project site. Each construction phase involves the use of different types of construction equipment and, therefore, has its own distinct noise characteristics. The Project would be constructed using typical construction techniques; no blasting or impact pile driving would be required. The construction equipment reference noise levels provided in **Table 2** above, are based on measured noise data compiled by the FHWA and would occur when equipment is operating under full power conditions. The acoustical usage factor is the percentage of time that each type of construction equipment is anticipated to be in full power operation during a typical construction day. These values are estimates and will vary based on the actual construction process and schedule.

Construction equipment operates at its noisiest levels for certain percentages of time during operation. As such, equipment would operate at different percentages over the course of an hour.<sup>13</sup> During a construction day, the highest noise levels would be generated when multiple pieces of construction equipment are operated concurrently. To characterize construction-period noise levels, the average (hourly Leq) noise level associated with each construction stage was calculated based on equipment operating simultaneously within each phase. These noise levels are typically associated with multiple pieces of equipment operating simultaneously. The estimated construction noise levels were calculated for each of the analyzed receptors (refer to **Figure 7**) during each of the construction phases. As mentioned previously, given the physical size of the Project site and logistical limitations, and with the noise equipment located at the construction area nearest to the affected receptors to present a conservative impact analysis. This is considered a worst-case evaluation because construction of the Project would typically use fewer pieces of equipment simultaneously at any given time as well as operating throughout the construction site (i.e., most of the time construction equipment would be operating at distances further away from the off-site receptors than that assumed in the forecasting of Project construction noise levels). As such, Project construction would often generate lower noise levels than reported herein.

**Table 3: Maximum Noise Impacts Associated With On-Site Construction Activities** presents the maximum noise impacts that are forecasted to occur at each of the receptor sites. As shown, average noise levels during construction would result in a maximum increase of 17.7 dBA (Leq-1hour) above the significance threshold of 5 dBA over ambient noise levels during the grading phase west of the Project at

---

13 Federal Highway Administration, Traffic Noise Model (2006).

the single-family residential uses (Site 2) without implementation of technically feasible noise reduction measure as mentioned in Section 112.05 of the City’s Municipal Code.

**TABLE 3  
CONSTRUCTION MAXIMUM NOISE ESTIMATES**

Monitoring Site <sup>1</sup>	Ambient Noise Levels	Calculated Noise Level (Leq-1hour) by Construction Phase					Significance Threshold	Maximum Increase Above Significance Threshold

Note:

<sup>1</sup> Site 1 located at the Project site thus excluded from this analysis.

<sup>2</sup> Ambient noise level plus 5 dBA.

As mentioned previously, in devising construction noise control strategies, important options include controlling the noise at the source. Source control requirements include added benefits in promoting technological advances in the development of quieter equipment. Source control techniques can include: (1) muffler requirements, (2) maintenance and operational requirements, and (3) equipment emission level requirements. These control techniques can be used separately or in combination in order to achieve the desired results. Most control noise originates from equipment powered by either gasoline or diesel engines. A large part of the noise emitted is due to the intake and exhaust portions of the engine cycle. A remedy for controlling much of the engine noise is by adhering to **RCM-NOISE-1** which requires the use of optimal muffler systems. **RCM-NOISE-1** would lead to replacement of worn mufflers and to retrofitting where mufflers are not in use. Using optimal muffler systems on all equipment would reduce construction noise levels by 10 dBA or more.<sup>14</sup>

Other effective methods of diminishing the noise impacts associated with individual pieces of construction equipment is to employ less noisy machinery. This is accomplished by specifying the quietest available equipment. Modifications such as dampening of metal surfaces or a redesign of a particular piece of equipment is effective in reduction noise due to vibration. These modifications are typically conducted by the manufacturer or with factory assistance. The reduction is controlled by the imposed limits on the technical capabilities of the manufacturer or the equipment user. Noise reductions of up to 5 dBA can be achieved using dampening materials.<sup>15</sup> Additionally, shields such as sound skins may achieve reductions of 20 dBA at high frequencies and 10 dBA in the middle frequency range. Sound aprons may

14 FHWA, Special Report—Measurement, Prediction, and Mitigation, updated June 2017, [https://www.fhwa.dot.gov/Environment/noise/construction\\_noise/special\\_report/hcn04.cfm](https://www.fhwa.dot.gov/Environment/noise/construction_noise/special_report/hcn04.cfm). Accessed June 2022.

15 FHWA, Special Report—Measurement, Prediction, and Mitigation, updated June 2017, [https://www.fhwa.dot.gov/Environment/noise/construction\\_noise/special\\_report/hcn04.cfm](https://www.fhwa.dot.gov/Environment/noise/construction_noise/special_report/hcn04.cfm). Accessed June 2022.

achieve noise reductions of up to 10 dBA.<sup>16</sup> Sound aprons are typically designed from absorptive mats and are draped on the frames attached to the equipment. This material can be constructed from polyvinyl chloride (PVC) layers, lead-filled fabric, or rubber. These aprons are most useful when equipment only needs partial shielding or has to be regularly moved.

Additionally, limiting the number of noise-generating, heavy-duty construction equipment to two (2) pieces operating simultaneously would reduce construction noise levels by approximately 1.5 dBA

Implementation of **RCM-NOISE-1**, construction noise levels resulting in a maximum increase of 17.7 dBA (Leq-1hour) above the significance threshold would be reduced to levels below significance. Moreover, with implementation of **RCM-NOISE-2**, the Project would be required to comply with Section 41.40 of the LAMC by ensuring construction activities would only occur between the hours of 7:00 AM and 9:00 PM Monday through Friday, and 8:00 AM to 6:00 PM on Saturday and national holidays with no construction permitted on Sunday. Additionally, implementation of **RCM-NOISE-3** would require construction site notices to be provided that includes the following information: job site address, permit number, name and phone number of the contractor or owner or owner's agent, hours of construction allowed by code or any discretionary approval for the site, and the Applicant's telephone number where violations can be reported. Compliance with the above practices would ensure construction noise levels would be below the significance threshold; thus, construction noise levels would not be considered significant.

### ***Off-Site Construction Noise***

Construction of the Project would require worker, haul, and vendor truck trips to and from the site to work on the site, export soil, and deliver supplies to the site. Trucks traveling to and from the Project site would be required to travel along a haul route approved by the City. At the maximum, approximately 12 hauling trips per day would take place during the demolition phase. Haul truck traffic would take the most direct route to the freeway ramp along Winnetka Avenue.

Noise associated with construction truck trips were estimated using the Caltrans FHWA Traffic Noise Model based on the maximum number of worker and truck trips in a day. Project haul truck trips, which includes medium- and heavy-duty trucks, would generate noise levels of approximately 48.0 to 52.9 dBA, respectively, measured at a distance of 25 feet from the adjacent sensitive receptor. As shown in **Table 1**, existing noise levels ranged from 58.1 dBA to 70.7 dBA at the vicinity of the Project site. The noise level increases from truck trips would be below the significance threshold of 5 dBA. As such, off-site construction noise impacts would not be considered significant.

---

16 FHWA, Special Report—Measurement, Prediction, and Mitigation, updated June 2017, [https://www.fhwa.dot.gov/Environment/noise/construction\\_noise/special\\_report/hcn04.cfm](https://www.fhwa.dot.gov/Environment/noise/construction_noise/special_report/hcn04.cfm). Accessed June 2022.

## Construction Vibration

**Table 4: On-Site Construction Vibration Impacts-Building Damage** It is important to note pile driving would not be required during construction. As shown in **Table 4**, the forecasted vibration levels due to on-site construction activities would not exceed the building damage significance threshold of 0.5 PPV for reinforced-concrete, steel, or timber building at the adjacent residential uses. Impacts related to building damage from on-site construction vibration would not be considered significant.

TABLE 4 ON-SITE CONSTRUCTION VIBRATION IMPACTS - BUILDING DAMAGE					
Monitoring Site	Nearest Off-Site Building Structures	Estimated Vibration Velocity Levels at the Nearest Off-Site Structures from the Project Construction Equipment			Significance Threshold (PPV ips)
		Loaded Trucks	Jackhammer	Small bulldozer

## Operation

### Playground Noise

Noise levels within the parking areas would fluctuate with the amount of automobile and human activity, similar to the current conditions that exist along Winnetka Avenue. Sources of noise would mostly emanate within the playground area during breaks between classes and during lunchtime located at the southern portion of the site (refer to **Figure 1**). It is important to note, the School does not include any outdoor athletic events that would draw large spectator events. However, for purposes of this analysis and a worst-case assessment, it was assumed the playground area would be fully operational between the hours of 7:00 AM - 7:00 PM. As shown in **Table 5: Operational Noise Levels (Playground)**, noise levels generated from the playground area would not result in any increase above ambient noise levels. For illustrative purposes, noise levels generated from the field area are shown graphically in **Figure 8: Operational Noise Level Contour Map**. As such, operational impacts would not be considered significant.

**TABLE 5  
OPERATIONAL NOISE LEVELS (PLAYGROUND)**

Monitoring Site	Ambient Noise Levels	Modeled Operational Noise Levels (dBA, Leq)	Increase above Ambient	Significant Impact?
2	58.1	25.6	0	No
3	70.7	12.2	0	No
4	71.6	4.1	0	No
5	64.4	6.9	0	No

Source: Refer to **Appendix D** for SoundPLAN Output Sheets.

### ***Fixed Mechanical Equipment Noise***

The Project would introduce various stationary noise sources, including heating, ventilation, and air conditioning systems, which would be located either on the roof, the side of a structure, or on the ground. All Project mechanical equipment would be required to be designed with appropriate noise-control devices—such as sound attenuators, acoustics louvers, or sound screens/parapet walls—to comply with noise-limitation requirements provided in Section 112.02 of the LAMC, which prohibits equipment from causing more than a 5 dBA increase in the ambient noise level. Therefore, operation of mechanical equipment on the Project building would not exceed the City’s threshold of significance.

FIGURE 8

## CUMULATIVE

---

Noise from construction of the Project plus related projects would be localized, thereby potentially affecting areas immediately within 500 feet from each projects' construction site. Due to distance attenuation (more than 500 feet away) and intervening structures, construction noise from one site would not result in noticeable increase in noise at sensitive receptors near another site, precluding a cumulative noise impact. It is expected that, as with the Project, related projects would implement noise reduction techniques such as mufflers, shields, sound barriers, which would minimize any noise-related nuisances during construction. Therefore, the combined construction-noise impacts of related projects within 500 feet and the Project's contribution would not cause a significant cumulative impact.

With regard to stationary sources, cumulative significant noise impacts may result from cumulative development. Stationary sources of noise that could be introduced in the area by cumulative projects could include mechanical equipment, loading docks, and parking lots. Given that these projects would be required to adhere to the City's noise standards, all stationary sources would be required to have shielding or other noise-abatement measures so as not to cause a substantial increase in ambient noise levels. Moreover, due to distance, it is unlikely that noise from multiple cumulative projects would interact to create a significant combined noise impact. As such, it is not anticipated that a significant cumulative increase in permanent ambient noise levels would occur.

## CERTIFICATION

---

The contents of this noise study represent an accurate depiction of the noise environment and impacts associated with the proposed Magnolia Science Academy Project. The information contained in this noise study is based on the best available information at the time of preparation. If you have any questions, please contact me directly at (818) 415-7274.

July 2023

## **EXECUTIVE SUMMARY**

---

Overland Traffic Consultants has prepared this assessment of the transportation impacts for a proposed new Charter School at 7111 Winnetka Avenue (northwest corner of Winnetka Avenue and Gault Street) in the City of Los Angeles, see Project’s location on Figure 1. The school is located in the City of Los Angeles but is under the jurisdiction of the Division of State Architect (DSA).

The purpose of this Transportation Assessment (TA) is to document potential transportation impacts associated with the Project using the local City of Los Angeles Department of Transportation’s (LADOT) Transportation Assessment Guidelines (TAG), August 2022. The TAG establishes procedures and methods for review of development projects following the California Environmental Quality Act (CEQA) guidelines. According to the TAG a CEQA TA report is required for the Project.

### Project Description

The Project Site is located at 7111 Winnetka Avenue (Project Site) in the Winnetka community of the Canoga Park - Winnetka – Woodland Hills – West Hills Community Plan area. The Project Site is approximately 28,999 square feet (0.666 acres) and occupied by one commercial building and surface parking lot that will be removed as part of the Project.

The Project consists of a new 2-story Charter School with 457 students including 297 Middle School and 160 High School Students. The school will include 17 classrooms, offices, multipurpose building, and ancillary services such as restrooms, outdoor congregating areas, a playfield and gym.

### Project Parking and Access

The Project proposes 50 vehicle parking spaces and 10 bicycle parking spaces. One-Way vehicular entry is proposed from Gault Street and one way exit is proposed to Winnetka Avenue. The Gault Street driveway is proposed near the western boundary of the site and the Winnetka Avenue driveway is proposed near the northern boundary of the site. An 8-foot wide with barrier on-site drop-off/pick-up zone is proposed along the exit driveway lane. This zone does not impede parking or exiting traffic.

## Transportation Assessment (CEQA)

As the local jurisdiction, the City of Los Angeles transportation analysis processes were followed to evaluate potential transportation impacts. On July 30, 2019, the City of Los Angeles adopted the vehicle miles traveled (VMT) metric as its criterion for determining transportation impacts under the California Environmental Quality Act (CEQA). These changes follow the requirements of the State of California Senate Bill 743 (SB 743) and the State's CEQA Guidelines.

The CEQA guidelines for evaluating transportation impacts no longer focus on measuring automobile delay and level of service (LOS). Instead, SB 743 directed lead agencies to revise transportation assessment guidelines to include a transportation performance metric which promotes: the reduction of greenhouse gas emissions, the development of multimodal networks, and access to diverse land uses.

The LADOT TAG is the City of Los Angeles' document providing guidance for conducting CEQA transportation analyses for land development projects. The TAG identifies three CEQA threshold questions for evaluating potential significant transportation impacts in accordance with SB 743.

- 1) Does the Project conflict with Plans, Programs, Ordinances, or Policies?
- 2) Does the Project cause substantial vehicle miles traveled (VMT)?
- 3) Does the Project substantially increase hazards due to a geometric design feature or incompatible use?

The City's adopted review process may also include an additional non-CEQA traffic flow qualitative analysis for large land development projects that generate 500 or more daily trips. The purpose of this review is to evaluate how large projects affect vehicular access, circulation, and safety for all users of the transportation system. A non-CEQA qualitative traffic flow analysis is not required for this Project because the net daily traffic flow is 395 daily trips as calculated by the LADOT VMT calculator tool.

## Findings

Based on this evaluation of the CEQA thresholds, the Project does not create a significant transportation impact. While not compliant with all City Plans and Policies, including:

- No dedication on Winnetka Avenue, where 5 feet would be required, the properties south of the proposed school site are primarily residential with multiple owners. Connective improvements are not likely within the future year of the city's mobility plan (2035).
- The Project will follow the DSA jurisdiction requirements and provide 10 bicycle parking spaces. This is fewer than the 4 per classroom short term spaces and 1 per 10 classroom spaces that would have been required by the City of Los Angeles Municipal Code. If greater than 10 bicycle parking spaces are in demand daily, the school can manage the deficiency by evaluating and providing additional spaces.

These elements will not create a significant transportation impact on the community or surrounding area.

No VMT significant impact has been identified as the LADOT VMT calculator shows the Project being below local thresholds for Work VMT employee. Note that the Household VMT per Capita is not applicable because there are no residential units.

The proposed access with one-way entry from Gault Street and one-way exit to Winnetka Avenue does not substantially increase hazards on the roadway system to vehicles, pedestrians or cyclists.

Cumulative VMT impacts have also been evaluated through a consistency check with the Southern California Association of Governments' (SCAG) Regional Transportation Plan/Sustainable Communities Strategy (2016-2040 RTP/SCS) plan. The RTP/SCS is the regional plan that demonstrates compliance with air quality conformity requirements and greenhouse gas (GHG) reduction targets.

Per the LADOT TAG, projects consistent with the RTSCS plan in terms of development location and density are part of the regional solution for meeting air pollution and GHG goals. Projects that have less than a significant VMT impact are deemed to be consistent with the SCAG's 2016-2040 RTP/SCS and would have a less-than-significant cumulative impact on VMT. The Project is consistent with the RTP/SCS plan.

Therefore, no cumulative land development impacts have been identified that would preclude the City's ability to provide transportation mobility in the area. As such, the

Project will not create any cumulative operational impacts, emergency access impacts, and/or hazardous geometric design features.

---------	--	---------

The Project Site is located at 7111 Winnetka Avenue (Project Site) in the Canoga Park – Winnetka – Woodland Hills – West Hills Community Plan area. The Project Site is also located in Los Angeles Council District 3, in the Winnetka Neighborhood Council area and near (approximately 600 feet) the intersection of Winnetka Avenue and Sherman Way. Figure 2 shows the Project’s map location.

Project Description

A two-story Charter School with up to 457 students including 297 Middle School and 160 High School Students. The school will include classrooms, offices, multipurpose building, and ancillary services such as restrooms, outdoor congregating areas, a playfield and gym.

Project Parking and Access

The Project proposes 50 vehicle parking spaces of which 4 electric vehicle (EV) ready stalls (2 of which are accessible) and 6 EV capable will be provided. One-Way vehicular entry is proposed from the north side of Gault Street and one way exit is proposed from the west side of Winnetka Avenue. The Gault Street driveway is proposed near the western boundary of the site and the Winnetka Avenue driveway is proposed near the northern boundary of the site. By positioning the driveways near the outer boundary of the site, traffic and pedestrian movement at the Winnetka Avenue and Gault Street intersection will be facilitated with fewer driveway interactions. The Project will provide 10 bicycle parking spaces in accordance to DSA requirements. An 8-foot wide drive aisle with barrier on-site drop-off/pick-up zone is proposed along the exit driveway. This zone does not impede parking or exiting through traffic. Figure 3 contains the Project site plan.

## ENVIRONMENTAL SETTING

### Land Use

The Community Plan is approximately 17,887 acres in size and is bounded by the Chatsworth-Porter Ranch Community Plan Area, the Reseda-West Van Nuys Community Plan Area, the Encino-Tarzana Community Plan Area, the Cities of Hidden Hills and Calabasas and portion of the Los Angeles and Ventura counties. It is about 25 miles northwest of downtown Los Angeles.

The Project Site is bounded by a shopping center property to the north, Winnetka Avenue to the east, a single-family home and public storage to the west, and Gault Street to the south. There are primarily residential properties south of Gault Street.

The Canoga Park – Winnetka – Woodland Hills – West Hills Community Plan currently in effect was adopted in 1999 and a new community plan update is actively underway. Appendix A contains the adopted Reseda - West Van Nuys Community Plan land use map.

### Transportation Facilities

The City of Los Angeles has adopted the Mobility Plan 2035 as an update to the City's General Plan Transportation Element to incorporate the complete streets principles for integrating multi-mode transportation networks. The Mobility Plan 2035 dictates the street standards and designations for all users. Appendix B provides the community circulation plan map of the area roadway designations and roadway design standards.

Regional access to the project area is serviced by the Ventura Freeway (US-101) to the south and Sepulveda Boulevard (Hwy -27) to the west. The Ventura Freeway is approximately 3,100 south of the Project Site and accessible from DeSoto Avenue to the west or Corbin Avenue to the east.

The north-south Sepulveda Boulevard (Hwy-27) is located approximately 3,600 feet west of the Project Site. Sepulveda Boulevard operates as a highway with cross traffic

and traffic signals at many intersections though the west San Fernando Valley. Sepulveda Boulevard is accessible from Sherman Way.

The Ventura Freeway carries approximately 262,000 vehicles per day (VPD) with 24,900 vehicles per hour (VPH) at De Soto Avenue. Freeway traffic volumes are provided by Caltrans website [dot.ca.gov/programs/traffic-operations/census/traffic-volumes](http://dot.ca.gov/programs/traffic-operations/census/traffic-volumes).

Highway 27 (Sepulveda Boulevard) carries approximately 40,000 VPD with 3,400 VPH at Sherman Way. Highway traffic volumes are provided by Caltrans website [dot.ca.gov/programs/traffic-operations/census/traffic-volumes](http://dot.ca.gov/programs/traffic-operations/census/traffic-volumes).

Pursuant to the City of Los Angeles Mobility Element, arterial roadways are designated Boulevards and Avenues. Boulevards represent the City's widest streets, which typically provide regional access to major destinations; the roadway standard for a Boulevard II roadway is a right-of-way width of 110 feet and a roadway width of 80 feet.

Non - arterial roadways connect arterial roadways to local residential neighborhoods or industrial areas. Non - arterial roadways are designated Collector or Local streets. the standard for a Local Street is a right-of-way width of 60 feet and a roadway width of 36 feet.

Descriptions of the streets serving the Project Site are presented below.

Winnetka Avenue is a north - south roadway designated a Boulevard II Street that provides two lanes in each direction with a median left turn lane, bike lane and curbside parking with 2-hour restrictions on the east side of the street between Sherman Way and Gault Street and predominately unrestricted on the west side of the street.

Sherman Way is an east – west roadway designated a Boulevard II Street that provides two lanes in each direction, and a raised center median. Left turns are accommodated at major intersections, including Sherman Way and Winnetka Avenue. On-street parking is generally permitted except from 8AM to 10PM street cleaning days

(Wednesday on the south side of the street and Thursday on the north side of the street).

Gault Street is an east – west roadway designated a Local Street that provides one lane in each direction. The west leg of the intersection with Winnetka Avenue is striped with a continental crosswalk. There is stop-sign control on Gault Street at Winnetka Avenue.

### Transit Information

Public transportation in the study area is provided by the Metropolitan Transportation Authority (Metro) and LADOT. The Project Site is located near a Major Transit Stop at Winnetka Avenue and Sherman Way, less than 600 feet to the north. The transit service available to the Project is briefly described below with a map and routes provided in Appendix C.

### Regional Transit Service

The Metro G line (formerly the Orange Line) is a bus rapid transit line operating on dedicated bus lanes between the North Hollywood Red line rail station to the Chatsworth Bus Station. The G line is an 18-mile route with 17 stations spaced approximately 1 mile apart. The nearest stations are at Winnetka Avenue north of Victory Boulevard approximately 4,600 feet south of the site and at Sherman Way east of Canoga Avenue approximately 1.5 miles to the west. A separated Class I bicycle path shares the right-of-way with the G Line buses.

### Local Transit Service

Metro is implementing The NextGen Bus Plan approved by the Metro Board of Directors and is being implemented with a 3-phased roll-out that began in December 2020 and continues. The approved Bus Plan is a reimagined bus system that focuses on providing fast, frequent, dependable, and accessible service to meet the needs of today's riders. Metro lines serving the Project Site include:

Metro Route 162 runs primarily along Fallbrook Avenue, Sherman Way and Vineland Avenue. Services are provided to/from Woodland Hills, West Hills, Canoga Park, Winnetka, Reseda, Van Nuys and North Hollywood. Near the Project site, the Metro line 162 travels along Sherman Way providing 15-minute headways during the morning and afternoon peak hours. Key stops include the West Hills Medical Center, Fallbrook Center, Hollywood Burbank Airport, North Hollywood B & G Lines. A transit stop for this line is located on the northeast and southeast corners of Sherman Way at Winnetka Avenue, less than 600 feet from the Project Site.

Metro Route 242/243 runs primarily along Ventura Boulevard, Winnetka Avenue, Plummer Street, Mason Avenue and Devonshire Street. Metro route 243 partners with Metro route 242 to provide a circuitous route that continues east on Devonshire Street to Tampa Avenue and back to Ventura Boulevard. Combined, the two routes provide service to/from Woodland Hills, Warner Center, Canoga Park, Chatsworth, Northridge, and Winnetka. Near the Project site, the Metro line 242/243 travels along Winnetka Avenue providing 40-minute headways during the morning and afternoon peak hours. Key stops include the Northridge Fashion Center, Los Angeles Pierce College, Kaiser Permanente Hospital and Taft High School. The transit stop for this line is located on the northwest and southeast corners of Winnetka Avenue at Sherman Way, less than 600 feet from the Project Site.

#### Complete Streets Mobility Networks (Vehicle, Bicycle, Transit and Neighborhood)

The Mobility Plan Element establishes a layered network of street standards designed to emphasize mobility modes within the larger system. This approach maintains the primary function of the streets but identifies streets for potential alternative transportation modes providing a range of options available when selecting the appropriate design elements. Maps of these mobility streets in the area is provided in Appendix B.

Network layers have been created that will prioritize a certain mode within each layer with the goal of providing better connectivity. The network layers are Vehicle Enhanced Network, Transit Enhanced Network, Bicycle Enhanced Network, Neighborhood Enhanced Network, and Pedestrian Enhanced District. Streets may be listed in several networks with the goal of selecting a variety of mobility enhancements. Definitions of these networks per the Complete Street Design Guidelines are provided below.

Vehicle Enhanced Network (VEN) - The VEN includes a select number of arterials that carry high volume of traffic for long distance travel on corridors with freeway access. Moderate enhancements typically include technology upgrades and peak-hour restrictions for parking and turning movements. Comprehensive enhancements can include improvements to access management, all-day lane conversions of parking, and all-day turning movement restrictions or permanent access control. There are no nearby VEN roadways. The closest is Victory Boulevard approximately 5,000 feet south of the Project site.

Transit Enhanced Network (TEN) - The TEN is comprised of streets that prioritize travel for transit riders. Moderate enhancements typically include bus stop improvements and increased service, with transit vehicles continuing to operate in mixed traffic. Moderate plus enhancement would include an exclusive bus lane during the peak travel period only. Comprehensive enhancements typically include transit vehicles operating in an all-day exclusive bus lane.

- Sherman Way is designated a Moderate Transit Enhanced Street.

Bicycle Enhanced Network (BEN) – The BEN is comprised of a network of low – stressed protected bike lanes (Tier 1) and bike paths prioritize bicycle travel by providing specific bicycle facilities and improvements. The BEN proposes bike facilities on arterial roadways with a striped separation. Tier 1 corresponding to protected bicycle lanes, and Tier 2 and Tier 3 bicycle lanes on arterial roads with a striped separation - The difference between Tier 2 and Tier 3 implies probability that some bike lanes are not expected to be implemented by 2035.

The City of Los Angeles adopted a 2010 Bicycle Master Plan to encourage alternative modes of transportation and provide a network system that is safe and efficient to use in coordination with the vehicle and pedestrian traffic on the city street systems. A brief definition of the bicycle facilities is provided below:

Bicycle Path – A bicycle path is a facility separated from vehicular traffic for the exclusive use of the cyclist (although sometimes combined with a pedestrian lane). The designated path can be completely separated from vehicular traffic or cross the vehicular traffic with right-of-way assigned through signals or stop signs.

- Metro G Line Rapid Bus Path - A separated Class I bicycle path shares the right-of-way with the G Line buses.
- The Metrolink Ventura County Line Bike and Aliso Creek Canyon Paths are included on the future Green Network along river channels and transit right-of-way.

Bicycle Lane – A bicycle lane is typically provided on-street with a designated lane striped on the street for the exclusive use of the cyclist. The bicycle lanes are occasionally curbside, outside the parking lane, or along a right turn lane at intersections. Protected bike lanes are located next to the curb and separate from moving vehicles by bollard posts or parked vehicles "parking-protected".

- Sherman Way is listed as a Tier 1 bicycle lane street.

Bicycle Route – A bicycle route is a designated route in a cycling system where the cyclist shares the lane with the vehicle. Cyclists would follow the route and share the right-of-way with the vehicle.

- No study area streets are identified as a bike route in the City of Los Angeles Bicycle Master Plan.

Neighborhood Enhanced Network (NEN) - NEN is comprised of local streets intended to benefit from pedestrian and bicycle related safety enhancements for more localized travel of slower means of travel while preserving the connectivity of local

streets to other enhanced networks. These enhancements encourage lower vehicle speeds, providing added safety for pedestrians and bicyclists.

➤ Hart Street is part of the NEN.

Pedestrian Enhanced District (PEDs) - In addition to these street networks, many arterial streets could benefit from additional pedestrian features to provide better walking connections are identified as Pedestrian Enhanced Districts. The PED segments provided in the mobility map identify streets where pedestrian improvements on arterial streets could be prioritized to provide better walking connections to and from the major destinations within communities.

Several streets within the study area have been identified in the pedestrian enhanced district maps with the goal of providing a more attractive environment to promote walking for shorter trips. Adding pedestrian design features and street trees encourages people to take trips on foot instead of by car.

The Pedestrian Enhanced Districts (PEDs) call out portions along the Orange Line Busway and Mason Avenue where pedestrian improvements could be prioritized to provide better walking connections to and from the major destinations.

The Project is located in the City of Los Angeles. Although not required to follow the jurisdiction’s requirements, the City of Los Angeles Transportation Assessment Guidelines, July 2020 (TAG) is the City document that was used to establish procedures and methods for conducting transportation analyses for the proposed Charter School land development projects. Note that this public school is not subject to the City of Los Angeles requirements. The TAG identifies three CEQA threshold questions for identifying significant transportation impacts in accordance with SB 743 applicable to the Project.

- 1) Threshold T-1: Conflicting with Plans, Programs, Ordinances, or Policies
- 2) Threshold T-2.1: Causing Substantial Vehicle Miles Traveled (VMT)
- 3) Threshold T-3: Substantially Increasing Hazards Due to a Geometric Design Feature or Incompatible Use

**I. Conflicts with Plans, Programs, Ordinances or Policies (Threshold T-1)**

To guide the City’s Mobility Plan 2035 (Transportation Element of the General Plan), the City adopted programs, plans, ordinances, and policies to establish the transportation planning framework for all travel modes, including vehicular, transit, bicycle, and pedestrian facilities. Land development projects are evaluated for conformance with these City adopted transportation plans, programs, and policies.

The Threshold T-1 impact criteria applies if the project conflicts with a program, plan, ordinance(s), or policy addressing the transportation circulation system. Please note however, a project would not result in an impact merely based on whether a project would not implement a program, policy, or plan. Rather, it is the intention of this threshold test to ensure proposed development does not conflict with nor preclude the City from implementing adopted programs, plans, and policies.

Screening Criteria for Policy Analysis

If the development project requires a discretionary action, and the answer is yes to any of the following screening threshold questions, further analysis may be needed to

assess whether the proposed project would conflict with plans, programs, ordinances, or policies.

1. Does the project require a discretionary action that requires the decision maker to find that the decision substantially conforms to the purpose, intent, and provisions of the General Plan?

**No**, this Project is not subject to the City of Los Angeles requirements and does not require discretionary action from the city. The TAG provides a list of key city plans, policies, programs, and ordinances for consistency review. This review has been conducted and the Project does substantially conform to the purpose, intent, and provisions of the General Plan, as shown in Table 1 and Appendix D.

2. Is the Project known to directly conflict with a transportation plan, policy or program adopted to support multi-modal transportation options or public safety?

**Yes**, the Project would conflict with two City planning documents. However, as described in Table 1, Consistency Check, potential impacts would be less than significant.

3. Is the Project proposing to, or required to, make any voluntary or required, modifications to the public right-of-way (i.e., street dedications, reconfigurations of curb lines, etc.)?

**Yes**, Pursuant to the following Mobility Element Street Standards, a 5-foot dedication on Winnetka Avenue would be required to satisfy the Boulevard II standard.

Winnetka Avenue is a Boulevard II roadway with a street standard of 110-foot right-of-way (55-foot half width) with an 80-foot roadway (40-foot half roadway) per the NavigateLA website. Winnetka Avenue is currently dedicated to 100-foot right-of-way (50-foot south half width) adjacent to the Project Site. An additional 5-foot of right-of way would be required per the City's Mobility Element standards. However, the Project will not be providing the additional right-of-way at this time to maximize on-site school amenities. Properties to the south of the school on Winnetka Avenue are primarily residential with multiple owners. It is not likely that dedication would be provided along these properties negating connectivity in the area.

The TAG provides a list of key City plans, policies, programs, and ordinances for consistency review as shown in Table 1. As summarized below and in more detail in Appendix D, Projects that conform with and do not conflict with these City's development standards will be considered consistent and impacts would be less than significant.

**Table 1**  
**Consistency Check with Key City Plans, Programs, Ordinances or Policies**

<b>TAG Table 2.1-1: City Documents that Establish the Regulatory Framework</b>				
	Plan or Policy	Consistent?	Notes	Preclude City Implementation?
1.	LA Mobility Plan 2035	No	The Project will not follow the LA Mobility Plan 2035 street standards as required by the City of Los Angeles Bureau of Engineering Department. A 5' dedication would be required on Winnetka Avenue based on the roadway designation. However, this dedication will not be provided. This is a school project not under the jurisdiction of the City of Los Angeles. The land uses south of the Project site are primarily residential with multiple owners. The dedication connectivity along this stretch of Winnetka Avenue is not likely within the future timeline of the mobility timeline (2035).	Yes
2.	Plan for Healthy LA	Yes	The Project would support Policy 5.7, Land Use Planning for Public Health, and Greenhouse Gas (GHG) Emission Reduction by reducing single-occupant vehicle trips by its proximity to high quality and high frequency transit service. The Project will include both electric charging stations and pre-wiring spaces for potential future electric vehicle charging (Ord. 186485). The Project would not conflict with policies in the Plan for Healthy LA that promote active transportation, safe communities, and healthy neighborhoods.	No
3.	Land Use Element of the General Plan (35 Community Plans)	Yes	The Project is in the Canoga Park – Winnetka – West Hills Community Plan area, which is currently going through a Plan update. The Project will be in substantial conformance with the purposes, intent, and provisions of the General Plan and the Community Plan.	No
4.	Specific Plans	Yes	None.	No
5.	LAMC Section 12.21A.16 (Bicycle Parking)	No	The Project will provide fewer than required by LAMC section 12.21A.16. This Project is a public charter school project and will follow DSA requirements for 10 bicycle spaces.	No
6.	LAMC Section 12.26J (TDM Ordinance)	Yes	LAMC Section 12.26J for Transportation Demand Management and Trip Reduction Measures applies only to the construction of new non-residential floor area greater than 25,000 s.f.	The school will provide trip reduction measures in accordance with DSA requirements.

	Plan or Policy	Consistent?	Notes	Preclude City Implementation?
7.	LAMC Section 12.37 (Waivers of Dedications and Improvement)	Not Required	No waivers for street dedications or improvements are requested. The Project is a public Charter School and is exempt from these requirements.	Yes
8.	Vision Zero Action Plan	Yes	Vision Zero is a strategy to eliminate all traffic fatalities and severe injuries, while increasing safe, healthy, equitable mobility for all. The Project would not preclude or conflict with the implementation of any current or future Vision Zero projects in the public right-of-way.	No
9.	Vision Zero Corridor Plan	Yes		No
10.	Citywide Design guidelines	Yes		No
	Guideline 1: Promote a safe, comfortable, and accessible pedestrian experience for all.	Yes	The Project will create a continuous and straight sidewalk clear of obstructions for pedestrian travel. The Project will provide adequate sidewalk width and right-of-way to accommodate pedestrian flow and activity. Pedestrian access will be at street level with direct access to the surrounding neighborhood and amenities.	No
	Guideline 2: Carefully incorporate vehicular access such that it does not degrade the pedestrian experience.	Yes	The Project complies with the Citywide Design Guidelines incorporating vehicle access locations and does not discourage and/or inhibit the pedestrian experience. Vehicular access is provided with a one-way entry from Gault Street and one-way exit to Winnetka Avenue.	No
	Guideline 3: Design projects to actively engage with streets and public space and maintain human scale.	Yes	The building design uses attractive architectural elements. The Project would not preclude or conflict with the implementation of future streetscape projects in the public right-of-way.	No

### Cumulative Consistency Check

Pursuant to the TAG, each of the plans, programs, ordinances, and policies to assess potential conflicts with proposed projects are reviewed to assess cumulative impacts that may result from the Project in combination with other nearby development projects.

A cumulative impact could occur if the Project, with other future development projects located on the same block were to cumulatively preclude the City's ability to serve transportation user needs as defined by the City's transportation policy framework. A listing and map of other known planned development projects is provided in Appendix E. No other development projects have been identified on the same block of Gault Street or Winnetka Avenue. Note that any other land development projects would be individually responsible for complying with the City's transportation plans, programs ordinances and policies.

The Project does not have a significant transportation impact under CEQA Threshold T-1 (Conflicting with Plans, Programs, Ordinances, or Policies).

### Criteria for Transportation Projects

A Transportation Project includes the addition of through traffic lanes on existing or new highways, including general purpose lanes, high-occupancy vehicle (HOV) lanes, peak period lanes, auxiliary lanes, and lanes through grade-separated interchanges (except managed lanes, transit lanes, and auxiliary lanes of less than one mile in length designed to improve roadway safety).

Not Applicable - This analysis for Transportation Projects is not applicable to land development projects and the Project is not a transportation project because the Project is a land development project. Therefore, the Transportation Project analysis is not part of the Project's CEQA review.

**II. Causing Substantial Vehicle Miles Traveled (Threshold T - 2.1)**

The intent of this threshold question is to assess whether a land development project causes a substantial VMT impact. CEQA Guidelines Section 15064.3(b) requires the use of VMT as the new metric for analyzing transportation impacts.

To address this question, LADOT’s TAG identified significant VMT impact thresholds for each of seven Area Planning Commission (APC) sub-areas in the City of Los Angeles. A project’s VMT is compared against its APC threshold goal for household VMT per capita and work VMT per employee to evaluate the significance of the project’s VMT.

A development project will have a potential impact if the development project would generate VMT exceeding 15% below the existing average VMT for the Area Planning Commission (APC) area in that the project is located per TAG’s Table 2.2-1.

The Project is in the South Valley APC sub - area that limits daily household VMT per capita to a threshold value of 9.4 and a daily work VMT per employee to a threshold value of 11.6 (15% below the existing VMT for the South Valley APC), see table below.

**Table 2.2-1: VMT Impact Criteria (15% Below APC Average)**

<i>AREA PLANNING COMMISSION</i>	<i>DAILY HOUSEHOLD VMT PER CAPITA</i>	<i>DAILY WORK VMT PER EMPLOYEE</i>
Central	6.0	7.6
East LA	7.2	12.7
Harbor	9.2	12.3
North Valley	9.2	15.0
South LA	6.0	11.6
South Valley	9.4	11.6
West LA	7.4	11.1

The household VMT per capita is not applicable because no residential use is proposed. The Project’s work VMT per employee is 10.7 per the LADOT VMT calculator tool, below the VMT 11.6 threshold for the South Valley APC.

### CITY OF LOS ANGELES VMT CALCULATOR Version 1.3

#### Analysis Results

Proposed Project	With Mitigation
<b>618</b> Daily Vehicle Trips	<b>618</b> Daily Vehicle Trips
<b>3,781</b> Daily VMT	<b>3,781</b> Daily VMT
<b>0.0</b> Household VMT per Capita	<b>0.0</b> Household VMT per Capita
<b>10.7</b> Work VMT per Employee	<b>10.7</b> Work VMT per Employee

**Significant VMT Impact?**

Household: No	Household: No
Threshold = 9.4 15% Below APC	Threshold = 9.4 15% Below APC
<b>Work: No</b> Threshold = 11.6 15% Below APC	<b>Work: No</b> Threshold = 11.6 15% Below APC

7/13/2023

No VMT Project impacts are created by the development of the Project for the South Valley APC. No TDM measures would be required. The Project’s full VMT calculation report is provided in Appendix F.

Cumulative VMT Consistency Check

Cumulative VMT impacts are evaluated through a consistency check with the Southern California Association of Governments’ (SCAG) Regional Transportation Plan/Sustainable Communities Strategy (2016-2040 RTP/SCS) plan. The RTP/SCS is the regional plan that demonstrates compliance with air quality conformity requirements and greenhouse gas (GHG) reduction targets.

Per the City’s TAG, projects that are consistent with the RTP/SCS plan in terms of development location and density are part of the regional solution for meeting air pollution and GHG goals.

Projects that have less than a significant VMT impact are deemed to be consistent with the SCAG's 2016-2040 RTP/SCS and would have a less-than-significant cumulative impact on VMT.

As shown, the Project VMT impact would not exceed the City's South Valley APC VMT impact thresholds and as such, the Project's contribution to the cumulative VMT impact is adequate to demonstrate there is no cumulative VMT impact that would preclude the City's ability to provide transportation mobility in the area.

### **III. Substantially Increasing Hazards Due to a Geometric Design Feature or Incompatible Use (Threshold T- 3.1)**

The third CEQA question is answered by an evaluation of the potential increase in hazards due to a geometric design feature associated with the Project Site access, and may include safety, operational, or capacity impacts related to vehicle conflicts with pedestrians, bikes, or other vehicles.

Project size, location and access design are considered in the review to evaluate any access deficiencies that may be considered significant. Below are the findings of the access review.

1. Project vehicle access points are located on Gault Street (a Local street) with a one-way entry driveway and Winnetka Avenue (a Boulevard II roadway) with a one-way exit driveway. One way operation will reduce on-site conflicts between vehicles and ensure orderly entry and exit.
2. All parking spaces will be visible upon entry from Gault Street negating the need to circulate off site and reenter to find available parking.
3. An on-site student loading/unloading zone will be provided along the southerly portion of the drive aisle exiting to Winnetka Avenue. The zone will be separated from the drive aisle with a raised median to separate it from the through traffic using the exit.
4. The Gault Street driveway will be located near the western boundary of the site approximately 270 feet west of Winnetka Avenue. The driveway location will reduce pedestrian and vehicle conflicts at Winnetka Avenue and Gault Street.
5. The proposed Gault Street driveway is located beyond the 75-foot required separation from the Winnetka Boulevard curb line, which is consistent with LADOT driveway width and

placement per LADOT Manual of Policies and Procedures, Section 321, Driveway Design.

5. The Winnetka Avenue driveway will be located near the northern boundary of the site approximately 240 feet north of Gault Street and 340 feet south of Sherman Way. There is currently a driveway at or very near this location. The location will reduce pedestrian and vehicle conflicts at Gault Street and Winnetka Avenue and at Sherman Way and Winnetka Avenue.
6. The proposed Winnetka Avenue driveway will be located beyond the 150-foot required separation from Sherman Way, which is consistent with LADOT driveway width and placement per LADOT Manual of Policies and Procedures, Section 321, Driveway Design.
7. Winnetka Avenue provides a center median left-turn lane for vehicle storage space for Project left-turn egress.
6. The pedestrian entries to the site are separated from the vehicle entries and do not cross the interior parking lot or drive aisles. There is a pedestrian entry gate immediately south of the Winnetka Avenue driveway and east of the Gault Street driveway.
7. Protected pedestrian crossings with yellow continental crosswalks are provided on the west leg of the adjacent intersection of Gault Street at Winnetka Avenue and on all legs of the nearby intersection of Sherman Way and Winnetka Avenue.
8. There is an existing striped bike lane on the east and west sides of Winnetka Avenue.
9. Access impacts are typically evaluated for permanent conditions after project completion but can also be evaluated for temporary conditions during project construction. Pursuant to LADOT construction criteria, three areas to be considered when evaluating project construction activities are discussed below.

a. Temporary Transportation Constraints

Project construction may require temporary loss of the curb travel lane for delivery of materials and construction equipment, if necessary, a request for temporary lane closures will be made to the city to utilize the sidewalk and traffic lane (no parking lane is present on Winnetka Avenue and Gault Street adjacent to the Project Site).

As part of the Project's construction, the City of Los Angeles will require a Construction Traffic Management Plan (Plan) to be implemented during the construction phase to minimize potential conflicts with vehicles and pedestrians associated with the Project's construction. The Plan would include a construction schedule, the location of any traffic lane or sidewalk closures, any traffic detours, haul routes, hours of operation, access plans to abutting properties, and contact information.

Construction workers are typically expected to arrive at the Project Site before 7:00 AM and depart before or after the weekday peak hours of 4:00 to 6:00 PM. Deliveries of construction materials will be coordinated to non-peak travel periods, to the extent possible and occur on-site or from Vanowen Street.

No detours around the construction site are expected; however, flaggers would be used to control traffic movement during the ingress and egress of construction trucks/equipment.

b. Temporary Loss of Access

Vehicular access to the adjacent properties will be maintained. Safe pedestrian circulation paths adjacent to or around the work areas will be provided by covered pedestrian walkways if necessary and will be maintained as required by City-approved Work Area Traffic Control Plan.

c. Temporary Loss of Bus Stops or Rerouting of Bus Lines

No bus stops are located on Winnetka Avenue or Gault Street within the immediate Project Site work zone that would need to be temporarily relocated. There will be no loss of pedestrian access to transit stops and no rerouting of bus lines is necessary.

Therefore, the Project does not have a significant transportation impact under CEQA Threshold T-3.1 (Substantially Increasing Hazards Due to a Geometric Design Feature).

Since Project construction would be temporary and not result in loss of vehicular, pedestrian access, and transit access, the construction impacts would be less than significant.

### Temporary Loss of Bus Stops or Rerouting of Bus Lines

No bus stops are located on Vanowen Street within the immediate Project Site work zone that would need to be temporarily relocated. There will be no loss of pedestrian access to transit stops and no rerouting of bus lines is necessary.

Therefore, the Project does not have a significant transportation impact under CEQA Threshold T-3.1 (Substantially Increasing Hazards Due to a Geometric Design Feature).

Since Project construction would be temporary and not result in loss of vehicular, pedestrian access, and transit access, the construction impacts would be less than significant.

**APPENDIX A**  
**Community Plan Land Use Map**

1.000 FEET

1. **Residential Height Limits - Woodland Hills**  
 a. Single-family housing located along Topanga Canyon Boulevard north of Ventura Boulevard and north of Woodland Hills Blvd shall be limited to the maximum residential height of 35 feet. Residential height shall also be limited to the maximum.

2. **Commercial Development Limitations - Topanga Canyon Boulevard**  
 a. All future uses along a commercial zone is approved as a use permitted in the commercial zone shall be subject to the current designated General Commercial in a 100-foot Area Right-of-Way and the maximum height of the building shall be limited to the maximum height of the building. The maximum height of the building shall be limited to the maximum height of the building. The maximum height of the building shall be limited to the maximum height of the building.

3. **Multi-Family Housing - Group Park**  
 Development for low and medium density housing may exceed the density permitted in the plan zone provided that the maximum density is not exceeded. The maximum density shall be limited to the maximum density permitted in the plan zone and that the project meet the density of low and medium density housing along the City's Housing Element Book Program.

4. **Open Space - Group Park**  
 All commercial center for properties located on Devonshire Avenue between Skidway Way and Laguna Street shall include a minimum of 10% open space. The minimum open space shall be 10%.

5. **Public Facility (PF) Planning**  
 All development shall be consistent with the PF planning as provided in the schedule and map of the project as a general agency. The development of the project as a general agency shall be based on the same project. The plan shall be consistent with the PF planning as provided in the schedule and map of the project as a general agency. The development of the project as a general agency shall be based on the same project.

6. **Local Streets and Transitways**  
 All local streets and transitways shall be consistent with the schedule and map of the project as a general agency. The development of the project as a general agency shall be based on the same project.

7. **Public Facility (PF) Planning**  
 All development shall be consistent with the PF planning as provided in the schedule and map of the project as a general agency. The development of the project as a general agency shall be based on the same project.

8. **Public Facility (PF) Planning**  
 All development shall be consistent with the PF planning as provided in the schedule and map of the project as a general agency. The development of the project as a general agency shall be based on the same project.

9. **Public Facility (PF) Planning**  
 All development shall be consistent with the PF planning as provided in the schedule and map of the project as a general agency. The development of the project as a general agency shall be based on the same project.

10. **Public Facility (PF) Planning**  
 All development shall be consistent with the PF planning as provided in the schedule and map of the project as a general agency. The development of the project as a general agency shall be based on the same project.

11. **Public Facility (PF) Planning**  
 All development shall be consistent with the PF planning as provided in the schedule and map of the project as a general agency. The development of the project as a general agency shall be based on the same project.

12. **Public Facility (PF) Planning**  
 All development shall be consistent with the PF planning as provided in the schedule and map of the project as a general agency. The development of the project as a general agency shall be based on the same project.

**Notes:**

**APPENDIX D**

**CITY PLANS, POLICIES, PROGRAMS AND ORDINANCES**

## OVERVIEW LOS ANGELES CITY PLAN, POLICIES AND PROGRAMS

Mobility Plan 2035 - The Transportation Element of the City's General Plan, Mobility Plan 2035, established the "Complete Streets Design Guide" as the City's document to guide the operations and design of streets and other public rights-of-way. The Mobility Plan 2035 includes goals that are equal in weight and define the City's high-level mobility priorities. Each of the goals contains objectives and policies that guide the City's achievement of the Plan's five goals. Below are the 5 goals for the Mobility Plan 2035.:

1. Design and operate streets that enables safe access for all users and transportation modes. Safety is a key issue when deciding whether to walk, bike, drive, or take transit.
2. Design a connected network of individual roads enhanced for a particular mode (pedestrians, bicycles, transit, vehicles, and trucks).
3. Develop an accessible, convenient, well connected, and affordable transportation system for all users.
4. Improve mobility through communication, collaboration, distribution of mobility information (MaaS) and educate transit users how to gain access to multi-modal transportation information and services.
5. Promote and develop active transportation modes (bicycling and walking) to improve personal fitness while lessening impacts on the environment.

The Plan for A Healthy Los Angeles - Includes policies directing several City departments to develop plans that promote quality-of-life issues: safe neighborhoods, a clean environment, access to health services, affordable housing, healthy and sustainably produced food, and active transportation. The Plan acknowledges the relationship between public health and issues such as transportation, housing, environmental justice, and open space, among others, by reviewing the relevant policies in the General Plan and identifying where further policy direction is needed to achieve the goal of creating a healthy and sustainable City.

Community Plans - The City of Los Angeles Community Plans, which make up the Land Use

Element of the City's General Plan, guide the physical development of neighborhoods by establishing the goals and policies for land use. The 35 Community Plans provide specific, neighborhood-level detail for land uses and the transportation network, relevant policies, and implementation strategies necessary to achieve General Plan and community-specific goals and objectives.

Vision Zero Action Plan - The stated goal of Vision Zero is to eliminate traffic-related deaths in Los Angeles by 2025 through several strategies, including modifying the design of streets to increase the safety of vulnerable road users. Fundamental to the Vision Zero strategy is the design of a safe system where vehicles move at reasonable speeds. Vision Zero is a road safety policy that promotes smart behaviors and roadway design, which anticipate mistakes to the extent that collisions do not result in severe injury or death. The City designs and deploys Vision Zero Corridor Plans as part of the implementation of Vision Zero.

Citywide Design Guidelines are intended for development projects where improvements are proposed to promote a pedestrian-first design. Guidelines include promoting a safe, comfortable, and accessible pedestrian experience for all; incorporating vehicular access such that it does not discourage and/ or inhibit the pedestrian experience; design projects to actively engage with streets and public space and maintain human scale addresses sidewalks, crosswalks, and on-street parking design projects.

The City's Transportation Demand Management (TDM) Ordinance (LA Municipal Code 12.26.J) requires certain projects to incorporate strategies that reduce drive-alone vehicle trips and improve access to destinations and services. The ordinance is revised and updated periodically and should be reviewed for application to specific projects as they are reviewed.

The City's LAMC Section 12.37 (Waivers of Dedication and Improvement) requires certain projects to dedicate and/or implement improvements within the public right-of-way to meet the street designation standards of the Mobility Plan 2035.

Mobility Plan 2035		
1.	Does the Project include additions or new construction along a street designated as a Boulevard I, II and/or Avenue I, II or III on property zoned for R3 or less restrictive zone?	Yes, the Project Site is located on Winnetka Avenue, a Boulevard II roadway. The Project Site Zoning is not R3 or a less restrictive zone. Currently zoned (T)(Q)RAS4-1VL-ROO & P-1VL-RIO with Community Commercial Land use per the City of LA Parcel Profile Report - ZIMAS
2.	Are dedications or improvements needed to serve long-term mobility needs identified in the Mobility Plan 2035?	A 5 foot dedication would be required of the site if it was not being constructed as a public Charter School. There is commercial property immediate north of the Project Site. However, Winnetka Avenue, in the project area, is heavily developed with single family homes to the south. Future connected improvements would not likely be realized within the next 25 years.
3.	Is Project Site along any network identified in the City's Mobility Plan?	Yes, Winnetka Avenue is part of the existing bikeways network. The Project will not interfere with this existing amenity.
4.	Is Project Site in an identified Transit Oriented Community (TOC)?	Yes, the Project Site is in a TOC Tier 3 (LAMC 12.22 A,31) with the intersection of a Rapid Bus on Sherman Way and regular bus on Winnetka Avenue within less than 750 feet
5.	Is Project Site on a roadway identified in City's High Injury Network?	No
Driveway Access		
6.	Does Project site introduce a new driveway or loading access along an arterial (Avenue or Boulevard)?	No, the Project will replace one existing driveway on Winnetka Avenue, designated a Boulevard II roadway and one new driveway on Gault Street, designated a Local Street. Passenger loading will occur on site.
7.	Would the physical modifications or new driveways conflict with LADOT's Driveway Design Guidelines preclude the City from advancing the safety of vulnerable roadway users?	No
8..	Would the physical changes in the public right of way or new driveways that conflict with LADOT's Driveway Design Guidelines degrade the experience of vulnerable roadway users such as modify, remove, or otherwise negatively impact existing bicycle, transit, and/or pedestrian infrastructure?	No. There is an existing driveway on Winnetka Avenue for the site and the school exit driveway will be in approximately the same location. This will not be a new driveway degrading existing facilities.
9.	Does Project propose repurposing existing curb space? (Bike corral, car-sharing, parklet, electric vehicle charging, loading zone, curb extension)	No
10.	Does Project propose narrowing or shifting existing sidewalk placement?	No
11.	Does Project propose modifying, removing or otherwise affect existing bicycle infrastructure? (ex: driveway proposed along street with bicycle facility)	No
12.	Are loading zones proposed as part of the Project?	Yes, an on-site passenger loading lane/zone will be provided for student drop off and pick up.

Network Access		
13.	Does the Project propose to vacate or otherwise restrict public access to a street, alley, or public stairway?	No
14.	Is Project Site adjacent to an alley? If yes, will Project make use of, modify, or restrict alley access?	No, not applicable
15.	Does Project create a cul-de-sac or is project site located adjacent to existing cul-de-sac? If yes, does the cul-de-sac maintain convenient and direct public access to people walking and biking to the adjoining street network?	No, not applicable
16.	Does Project Site include a corner lot? (Avoid driveways too close to intersections)	Yes. Project is on the northwest corner of Gault Street and Winnetka Avenue. The driveways are off sufficient distance from the intersection to comply with City of Los Angeles code requirements.
17.	Does Project include "drop-off" zones or areas? If yes, are such areas located to the side or rear of the buildings?	Yes. A drop-off zone will be located on-site separated but within the parking drive aisle exit.
Parking Supply and TDM Plans		
18.	Would the Project propose a supply of onsite parking that exceeds the baseline amount required in the LAMC or a Specific Plan?	No
19.	Would the Project propose to actively manage the demand of parking by independently pricing the supply to all users (e.g. parking cash-out), or for residential properties, unbundle the supply from the lease or sale of residential units?	No
20.	Would the Project provide the minimum on and off-site bicycle parking spaces as required by the Section 12.21A.16 of the LAMC?	No. The Project will follow DSA requirements.
21.	Does the Project comply with City's TDM ordinance Section 12.26.J of the LAMC?	Not applicable
Regional Plans		
23.	Does the Project apply one of the City's efficient-based impact thresholds (i.e., VMT per capita, VMT per employee, or VMT per service population)	No. The Project is below the VMT per Capital and VMT per employee thresholds.
24.	Does the Project result in a significant VMT impact?	No
25.	Does the Project align with the long-term VMT and GHG reduction goals of SCAG's RTP/SCS?	Yes

<i>Total Work Based VMT Per Employee</i>	<b>10.7</b>	<b>10.7</b>

## VMT Calculator User Agreement

The Los Angeles Department of Transportation (LADOT), in partnership with the Department of City Planning and Fehr & Peers, has developed the City of Los Angeles Vehicle Miles Traveled (VMT) Calculator to estimate project-specific daily household VMT per capita and daily work VMT per employee for land use development projects. This application, the VMT Calculator, has been provided to You, the User, to assess vehicle miles traveled (VMT) outcomes of land use projects within the City of Los Angeles. The term "City" as used below shall refer to the City of Los Angeles. The terms "City" and "Fehr & Peers" as used below shall include their respective affiliates, subconsultants, employees, and representatives.

The City is pleased to be able to provide this information to the public. The City believes that the public is most effectively served when they are provided access to the technical tools that inform the public review process of private and public land use investments. However, in using the VMT Calculator, You agree to be bound by this VMT Calculator User Agreement (this Agreement).

**VMT Calculator Application for the City of Los Angeles.** The City's consultant calibrated the VMT Calculator's parameters in 2018 to estimate travel patterns of locations in the City, and validated those outcomes against empirical data. However, this calibration process is limited to locations within the City, and practitioners applying the VMT Calculator outside of the City boundaries should not apply these estimates without further calibration and validation of travel patterns to verify the VMT Calculator's accuracy in estimating VMT in such other locations.

**Limited License to Use.** This Agreement gives You a limited, non-transferrable, non-assignable, and non-exclusive license to use and execute a copy of the VMT Calculator on a computer system owned, leased or otherwise controlled by You in Your own facilities, as set out below, provided You do not use the VMT Calculator in an unauthorized manner, and that You do not republish, copy, distribute, reverse-engineer, modify, decompile, disassemble, transfer, or sell any part of the VMT Calculator, and provided that You know and follow the terms of this Agreement. Your failure to follow the terms of this Agreement shall automatically terminate this license and Your right to use the VMT Calculator.

**Ownership.** You understand and acknowledge that the City owns the VMT Calculator, and shall continue to own it through Your use of it, and that no transfer of ownership of any kind is intended in allowing You to use the VMT Calculator.

**Warranty Disclaimer.** In spite of the efforts of the City and Fehr & Peers, some information on the VMT Calculator may not be accurate. The VMT Calculator, OUTPUTS AND ASSOCIATED DATA ARE PROVIDED "as is" WITHOUT WARRANTY OF ANY KIND, whether expressed, implied, statutory, or otherwise including but not limited to, the implied warranties of merchantability and fitness for a particular purpose.

**Limitation of Liability.** It is understood that the VMT Calculator is provided without charge. Neither the City nor Fehr & Peers can be responsible or liable for any information derived from its use, or for any delays, inaccuracies, incompleteness, errors or omissions arising out of your use of the VMT Calculator or with respect to the material contained in the VMT Calculator. You understand and agree that Your sole remedy against the City or Fehr & Peers for loss or damage caused by any defect or failure of the

VMT Calculator, regardless of the form of action, whether in contract, tort, including negligence, strict liability or otherwise, shall be the repair or replacement of the VMT Calculator to the extent feasible as determined solely by the City. In no event shall the City or Fehr & Peers be responsible to You or anyone else for, or have liability for any special, indirect, incidental or consequential damages (including, without limitation, damages for loss of business profits or changes to businesses costs) or lost data or downtime, however caused, and on any theory of liability from the use of, or the inability to use, the VMT Calculator, whether the data, and/or formulas contained in the VMT Calculator are provided by the City or Fehr & Peers, or another third party, even if the City or Fehr & Peers have been advised of the possibility of such damages.

This Agreement and License shall be governed by the laws of the State of California without regard to their conflicts of law provisions, and shall be effective as of the date set forth below and, unless terminated in accordance with the above or extended by written amendment to this Agreement, shall terminate on the earlier of the date that You are not making use of the VMT Calculator or one year after the beginning of Your use of the VMT Calculator.

By using the VMT Calculator, You hereby waive and release all claims, responsibilities, liabilities, actions, damages, costs, and losses, known and unknown, against the City and Fehr & Peers for Your use of the VMT Calculator.

Before making decisions using the information provided in this application, contact City LADOT staff to confirm the validity of the data provided.

Print and sign below, and submit to LADOT along with the transportation assessment Memorandum of Understanding (MOU).
