1.0 - EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) has been requested as part of the due diligence investigation for a potential real estate transaction or development of the Subject Property and was prepared in accord with generally accepted industry standards and ASTM Standard E-1527-13.

A Phase I ESA identifies, to the extent feasible, Recognized Environmental Conditions in connection with the Subject Property, via records review, site reconnaissance, interviews and through evaluation and report preparation. The scope of this inquiry is to perform the research and reporting tasks appropriate to support the user's ability to qualify for the innocent landowner defense under CERCLA. No subsurface site investigation was performed or is implied.

No existing Recognized Environmental Conditions were identified on the Subject Property. However, we were made aware the Department of the Air Force is exploring the possibility of groundwater contamination having migrated south from the former March Air Force Base.

Legal Description and Location

APNs 302-090-021 and 302-090-022 sit along the south side of Harley Knox Blvd west of North Perris Blvd in the City of Perris, Riverside County, California.

Site Description

The 7.62-acre, rectangular Subject Property is undeveloped, disturbed open space (having been disced). Underground and above ground infrastructure was observed adjacent to Harley Knox Road (a fire hydrant and water district infrastructure). The property is covered with low vegetation consisting of indigenous grasses. There are no other improvements on the Site.

Records Search

Environmental Data Resources, Inc. (EDR) searched available environmental records to locate properties reported as possibly having Recognized Environmental Conditions that might impact the Subject Property. The California WQCB GeoTracker website was also searched. Upon examination, none of the reports found raised an environmental concern on or under the Subject Property. However, it is possible that groundwater contamination from the former March Air Force Base could have migrated in low concentrations to under the Subject Property or may arrive in the future.

Historical Aerial Photographs

The 1938 aerial photo shows the area as plowed agricultural land. This use has gradually been replaced with commercial/industrial/warehouse uses.

Other Sources

Historic topographic maps, phone directories and other sources are consistent with the history gleaned from aerial photos, records searches and the site visit.

Site Reconnaissance

David Tanner performed a Site Reconnaissance on March 9, 2021. No evidence of Recognized Environmental Conditions was observed during the Site Visit.

Interviews

None of the persons interviewed had knowledge of hazardous materials or Recognized Environmental Conditions having existed on the Subject Property.

Vapor Encroachment

No nearby sites appear likely to contribute a vapor encroachment concern.

Findings, Opinion, Conclusion

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM E-1527-13 for the Subject Property. Based on records searches, interviews, aerial photos and Site Reconnaissance, this assessment revealed no evidence of Recognized Environmental Conditions on the Subject Property.

Data Gaps

Historic aerial photographs and other sources establish a consistent history of the evolution of the Subject Property from 1938 until the present. All data that was requested has been received. There are no “data gaps.”

Additional Issues

No soil testing, subsurface testing or radon testing was performed as part of this Phase I ESA.

2.0 - INTRODUCTION

2.1 - Objective

The purpose of this ESA is to identify, to the extent feasible, recognized environmental conditions in connection with the Property, via records review, Site Reconnaissance, interviews and through evaluation and report preparation.

2.2 - Scope of Services

The scope of this inquiry was to perform those research and reporting requirements that may support the user's ability to qualify for the innocent landowner defense under CERCLA. No subsurface site investigation was performed or is implied.

2.3 - Significant Assumptions

Significant among the assumptions are that the records accessed herein are sufficiently accurate to reasonably ascertain the current condition of the Property with respect to presence of hazardous substances. This inquiry is not exhaustive; that is, it does not identify, obtain or review every possible record that might exist with respect to a property. However, all reasonably ascertainable records were reviewed by the EDR report.

2.4 - Limitations and Exceptions

The conclusions and opinions developed herein were based in part on interviews, records and reports provided by others and on our professional judgment. Thus, the assessment contained herein is only valid as of the date of this report's investigations and may require an update to reflect additional sampling, testing or other information. No guarantee of the results of this study is made or implied. Our professional services were performed in accordance with the prevailing standard of care as practiced by other environmental professionals in this area of California. We make no other warranty, either expressed or implied.

2.5 - Special Terms and Conditions

No special terms or conditions were included in this Phase I ESA.

3.0 - SITE DESCRIPTION

3.1 - Legal Description and Location

The Subject Property includes two flat, rectangular parcels (APNs 302-090-021 & 302-090-022) totaling 7.62 acres located along the south side of Harley Knox Blvd west of North Perris Blvd in the City of Perris CA. A street address has not been assigned. Figure 1 shows the two APNs on the Assessor Map from the Riverside County Map My County website. Figures 2 and 3 show regional and vicinity maps. Figure 4 shows a USGS topographic map. Figure 5 shows satellite photos. Figure 6 shows a photo location map. Site Photos appear on Figures 7 to 16.

3.2 - Current Use of the Subject Property

The Property is undeveloped, disturbed open space (having been disced). Underground and above ground infrastructure was observed adjacent to Harley Knox Road (a fire hydrant and water district infrastructure). The property is covered with low vegetation consisting of indigenous grasses. There were no other improvements on the Site.

3.3 - Past Uses of the Subject Property

Starting with the 1938 aerial photo, the Subject Property had been disced agricultural with a farmhouse at the east end. The 1978 aerial shows the farmhouse and other structures removed. The Subject Property since then has remained as disturbed open space.

3.4 - Current Uses of Adjoining Properties

The Subject Property is bordered to the north by Harley Knox Blvd, a warehouse/distribution building and open space, to the east by North Perris Blvd and open space, to the south by a warehouse distribution building (existing and new expansion under construction) and to the west by undeveloped open space.

3.5 - Past Uses of Adjoining Properties

Starting with the 1938 aerial photo, the area was disced agriculture and rural residential that has recently been converted to commercial uses.

3.6 - Current or Past Uses in the Surrounding Area

Starting with the 1938 aerial photo, the surrounding area was disced agricultural and open space. Large commercial buildings have recently replaced these uses.

3.7 - Geologic, Hydrogeological, Hydrologic, and Topographic Conditions

The Subject Property is flat. Groundwater in the area flows toward the southeast.

4.0 - USER PROVIDED INFORMATION

4.1 - Title Records

Fee title is held by JBL Investments, Inc., a California corporation, as to an undivided 50% interest and Dalmacio Ngoboc and Corazon Ngoboc, husband and wife as joint tenant and as to an undivided 50% interest as tenants in common. The owners contact address is JBL Inv Inc, PO Box 3668 Gaithersburg, MD.

Ms. Corinne Berge, Realty One Group Southwest of Temecula, is the listing broker and agent for the owners. Her address is 41463 Margarita Rd #100, Temecula, CA 92591. Ms. Berge completed an email questionnaire on behalf of herself and the owners on May 25, 2021. Further information from Ms. Berge appears in Section 7.0 of this report.

4.2 - Liens or Activity and Use Limitations

According to Ms. Berge, there are no Liens or Activity and Use Limitations due to environmental conditions on the Subject Property.

4.3 - Specialized Knowledge

Ms. Berge stated she had no specialized knowledge of recognized environmental conditions or concerns existing on the Subject Property.

4.4 - Valuation Reduction for Environmental Issues

According to Ms. Berge, there has been no valuation reduction for the Subject Property due to environmental issues and the value of the Subject Property is approximately the same as for comparable parcels in the general area.

4.5 - Owner, Occupant Information

There are no residents on the Subject Property. Owner information is given above.

4.6 - Reasons for Performing Phase I ESA

The reason for performing this Phase I ESA is to provide the user (property owner, buyer, lender or other concerned groups) with an assessment of the potential for recognized environmental conditions or hazardous materials to exist at or above de minimus quantities on the Subject Property.

5.0 - RECORDS REVIEW

5.1 - Objective

The purpose of the records review is to obtain and examine records that will help identify recognized environmental conditions in connection with the Subject Property.

5.2 - Standard Environmental Record Sources

Regulatory Agency Record Search

A computer search of regulatory agency databases was performed by Environmental Data Resources (EDR) to locate properties reported as hazardous material generators, known sites with above or below ground storage tanks, sites having leaking storage tanks, sites where hazardous material spills have occurred or for other criteria in accord with ASTM Standard Practices for Environmental Site Assessments, E-1527-13.

Regulatory records contain considerable information about various environmental concerns. In some instances, there may be no Recognized Environmental Condition or impairment regarding the Subject Property arising from these listings because A) the flagged sites are sufficiently distant from the Subject Property, B) the flagged sites are down-gradient from the Subject Property so groundwater contamination below these locations would be carried away from the Subject Property given the direction of groundwater flow, C) the concern has been remediated to “case closed” status as determined by relevant governmental review agencies indicating minimal remaining contamination or D) for other reasons. In this section, all reports discovered by the EDR search are reviewed.

Information such as depth and gradient of groundwater, direction and distance from the Subject Property and current status of the listed property are considered when determining potential environmental impacts to the Subject Property. The complete EDR database search document is reproduced as Appendix I for further review and interpretation. The 1-Mile and 1/4-Mile Radius Maps from the Subject Property boundary generated during the regulatory database search are shown as Figures 17 and 18.

Some potentially environmentally impacted locations identified by the database search are counted on more than one list. Some databases searched are indexes into other databases. This inflates the number of reports flagged. In addition, some listed properties appear under different names or ownerships or the addresses were specified differently making the searching software unable to determine that an entry was for an already found location. The same location is often listed multiple times for the same concern. Thus, the actual number of distinct physical locations with potentially environmentally impacted soils or groundwater is less than initially indicated. As the first step in this analysis, the reports are scanned to develop a list of unique locations. Specifically, we are concerned whether hazardous materials, present, in use or potentially spilled at these nearby sites might migrate onto or otherwise impact the use of the Subject Property.

Figure 17 - Radius Map

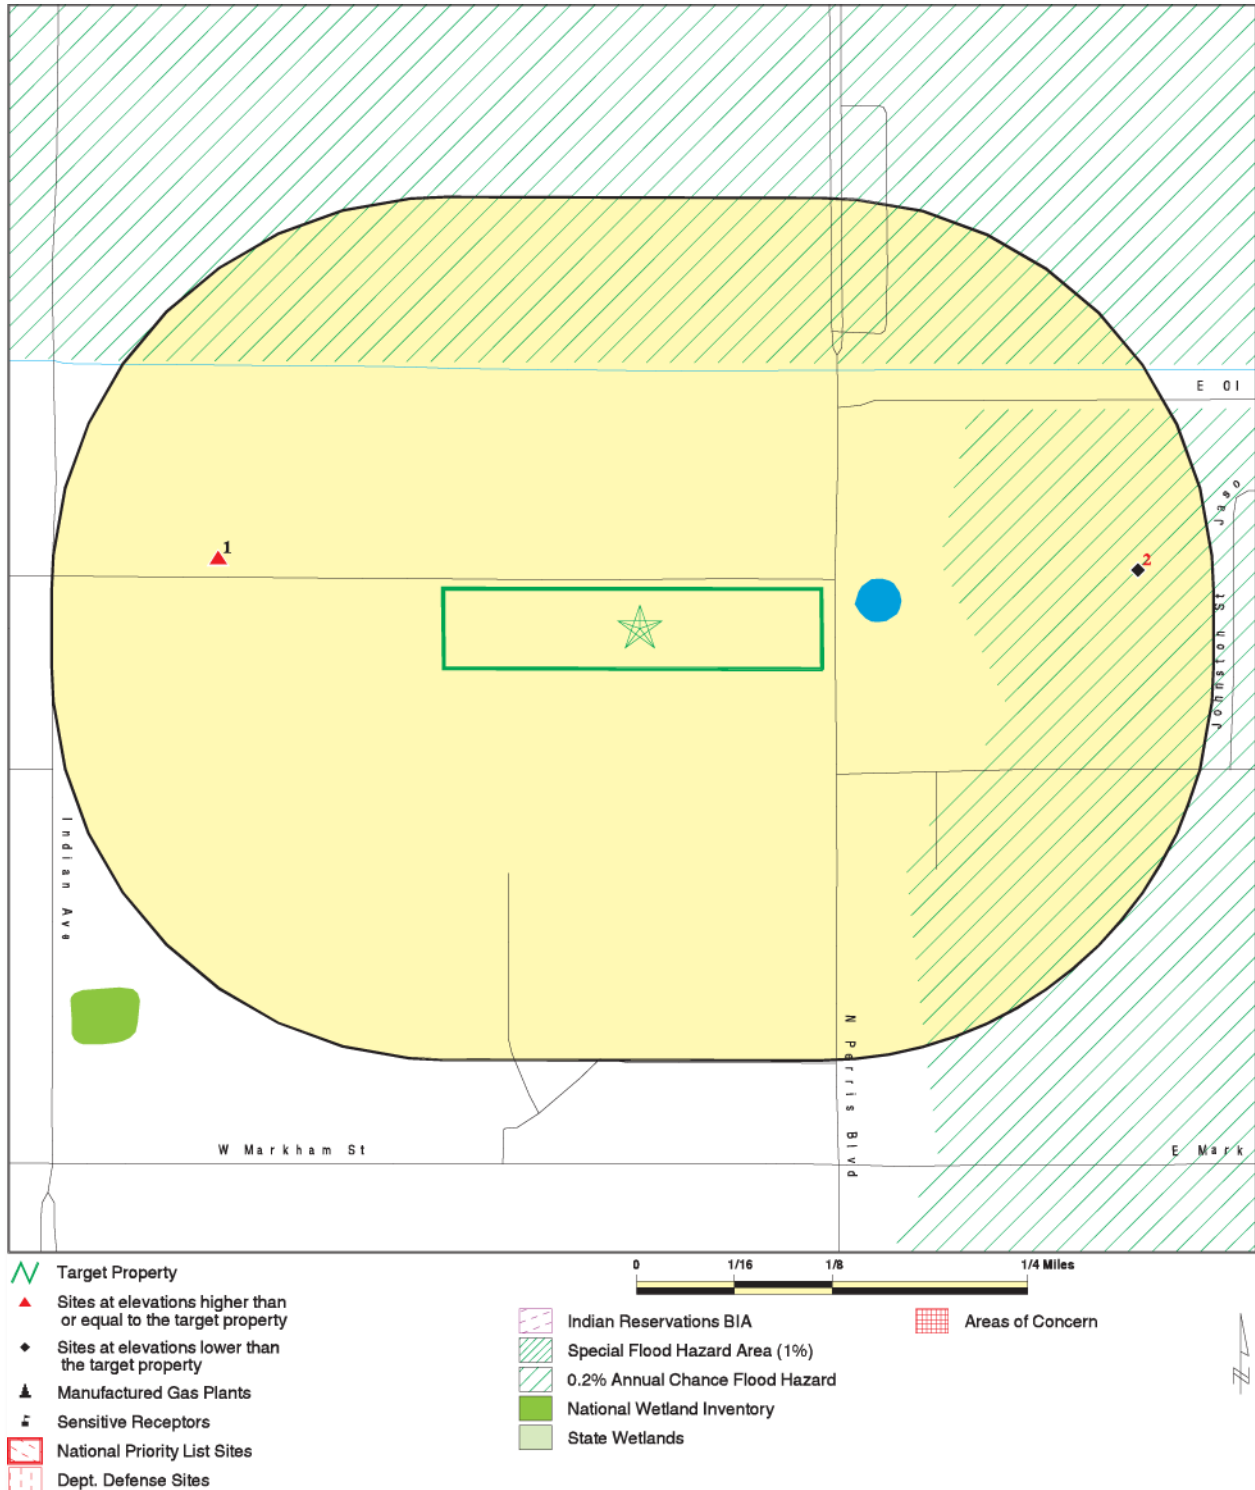

Figure 18 - Radius Map, Finer Scale

Subject Property Search Results

No reports were flagged by the EDR search for the current Subject Property

Surrounding Sites Search Results

The EDR search found six reports for nearby "sites" within the standard search distances. No "orphan" sites were identified. Orphan reports do not contain sufficient information to map the location and are not considered during this analysis. The six reports map to three unique addresses as shown in the table below.

| Site Address | Map ID # | Databases where the site was flagged |
|----------------------|----------|---|
| March Air Force Base | Reg | DOD, NPL (Superfund), ROD, SEMS, RCRA-LQG, US ENG CONTROLS, US INST CONTROLS, PRP |
| 420 Harley Knox Blvd | 1 | RCRA NonGen/NLR |
| 21-100 Oleander Ave | 2 | Envirostor, SCH |

Review of the Three Sites Identified

The appearance of a site in many of the databases searched by EDR is routine. For example, HAZNET lists deliveries of hazardous materials to registered collection and processing facilities. While a HAZNET listing indicates hazardous materials are used or produced at the given location, it also indicates the businesses at these sites dispose of these materials in a responsible manner, thus indicating this location is likely not a concern for the Subject Property. So, for these types of databases, only those reports for which a violation or enforcement action is indicated (and the site has not returned to compliance) are of concern. To reduce the amount of repetitive text, sites found in the following databases will be discussed further in this document only if an uncorrected violation or other concern has been indicated.

RCRA NONGEN/NLR, RCRA-LQG, RCRA-SQG - These are the Resource Conservation and Recovery Act designations for Non-Generators, Large Quantity Generators and Small Quantity Generators. Businesses registered and lawfully disposing of hazardous materials are not likely to be of concern.

HWTS, CERS HAZ Waste, CERS RCRA-SQG - These are the State of California equivalent of the Federal RCRA listings described above. Businesses properly registered and lawfully disposing of hazardous materials are not likely to be of concern. Without an indication of problems or violations, these reports are not likely to be of concern.

HAZNET - Lists deliveries of hazardous materials to registered collection and processing facilities. Absent violations, these reports are not of concern.

SWRCY, PROC - Registration for recycling facilities in California.

CHMIRS - Emergency Response Notification System - These are reports of accidental spills or releases of hazardous materials. Once reported, an emergency cleanup team is dispatched and cleanup is undertaken immediately. If cleanup cannot be quickly completed, a case would be opened in other databases that were also searched, thus these listings (by themselves without corresponding case files) are not of concern.

CIWQS - These are permits for water runoff required for construction and/or operation. Businesses complying with the permit terms are not of concern.

FINDS, ECHO, NAICS - Indicates the business has registered with the EPA as required. Absent violations, these listings are not of concern.

HIST UST, AST, CA FID UST, SWEEPS UST, UST, CERS Tanks, Riverside County UST - These databases indicate the presence of above or underground storage tanks. Absent a violation or leak (a LUST report), these listings do not raise a concern. In the past, leaks were common. Today, tanks are closely monitored to avoid leaks or spills.

EDR Hist Auto - This is a database maintained by EDR indicating that at some point in the past, the site was used for an automotive related purpose. Absent another indication of a problem or violation, these sites are not likely to be of concern.

SCH - The School Property Evaluation Program. A list of reports by DTSC regarding environmental inspections at K-12 schools.

NPDES - A listing of National Pollutant Discharge Elimination System permits, including stormwater. Absent an indication of a problem or violation, these sites are not likely to be of concern.

WDS - Waste Discharge System Sites having been issued waste discharge requirements. Absent an indication of a problem or violation, these sites are not likely to be of concern.

EMI - Emissions Inventory Data, Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies. Absent an indication of a problem or violation, these sites are not likely to be of concern.

The EDR reports from the above databases by Map ID are summarized in the table below.

| Map ID # | Status |
|----------|--|
| 1 | non-generator, no violations found |
| 2 | no contamination found, no action required |

The **420 Harley Knox Blvd** site (EDR map ID 1) is listed as a business not generating hazardous waste. This report does not raise an environmental concern for the Subject Property.

The **21-100 Oleander Ave** site (EDR map ID 2) report is for an environmental inspection of an elementary school in 2000. No contamination was detected. This report does not raise an environmental concern for the Subject Property.

This leaves one EDR site for further consideration: **the former March Air Force Base**. Before being reduced to a regional airport, March Air Force Base covered 12 square miles with the southeastern corner of the runway sitting roughly a mile northwest of the Subject Property. Substantial cleanup was necessary prior to returning the land to civilian uses. The topography in the area funnels groundwater flow from nearly the entire March AFB basin under the Subject Property as it drains southward. This Phase I ESA report has found no direct evidence for contamination of groundwater under the Subject Property. In addition, the area has low rainfall and is very flat indicating a slow rate of groundwater migration. However, the possibility remains that contamination from March AFB has, over its century long history, reached or in the future could reach the groundwater under the Subject Property, likely in low concentration. This possibility does raise a concern for the use of groundwater taken from under Subject Property.

GeoTracker Results

EDR searches the California Water Boards GeoTracker database. Figure 19 shows the Subject Property at the center of a 5,820-foot radius circle on the GeoTracker map, far enough to extend one mile from the boundary of the Subject Property and well beyond the required search distance for a Phase I ESA. Go to "GeoTracker.waterboards.ca.gov." Enter "33.856856, -117.228238," the coordinates for the approximate center of the Subject Property. In the legend, click "Choose More Sites" to search for reports in all categories. You can then click on the markers on the map to read the detailed case reports. GeoTracker found seven records for five unique addresses.

Three GeoTracker reports are for Permitted Underground Storage Tanks. Given no indication of leaks, these reports do not raise an environmental concern for the Subject Property.

GeoTracker also lists the school inspection (SCH) report flagged by EDR. Given the status "no further action required," this site does not raise an environmental concern for the Subject Property.

This leaves the three LUST (leaking underground storage tank) sites listed below requiring further examination. Note that all these sites are well beyond the required Phase I ESA search distances.

| Site Address | GeoTracker ID | Case Type & Status |
|-----------------------------|---------------|---|
| 3995 N Perris Blvd | T0606505176 | Lust Cleanup Site - Completed - Case Closed |
| 3411 N Perris Blvd (ID D15) | T0606592251 | Lust Cleanup Site - Completed - Case Closed |
| 4039 N Perris Blvd | T0606524504 | Lust Cleanup Site - Completed - Case Closed |

Figure 19 - GeoTracker Map

| SITE NAME | GLOBAL ID | FAC ID | SITE_TYPE | STATUS | ADDRESS |
|---|-------------|-----------|-------------------|-------------------------|------------------------|
| CIRCLE K STORES INC. SITE #2709429 | | FA0036723 | | | 3995 N PERRIS BLVD |

| MEADE VALLEY ELEMENTARY SCHOOL ADDITION | 33820011 | 33820011 | SCHOOL | NO ACTION REQUIRED | 21-100 OLEANDER AVENUE |
| MOBIL #18-BLN | T0606505176 | | LUST CLEANUP SITE | COMPLETED - CASE CLOSED | 3995 N PERRIS BLVD. |
| SAFAR & SAFAR BROTHERS', INC | | | | | 4040 N PERRIS BLVD |
| SHELL PERRIS #121222 | T0606524504 | | LUST CLEANUP SITE | COMPLETED - CASE CLOSED | 4039 N PERRIS BLVD |
| TESORO (SHELL) 68585 (WRR 6367) | | FA0019645 | | | 4039 N PERRIS BLVD |

The **First Fidelity Thrift & Loan** site (17111 Perris Blvd) has a GeoTracker ID of T0606500286 and is nearly a mile north of the Subject Property. This was a soil only leak of "waste oil/motor/hydraulic/lubricating" discovered 5/26/1992 and marked as "completed - case closed as of 12/28/1992." The tank was removed. The contaminated soil was excavated and transported away from the site. Given soil only contamination, the distance to this site and satisfactory cleanup, this report does not raise an environmental concern for the Subject Property.

The **Mobil #18-BLN** site (3995 N Perris Blvd) has a GeoTracker ID of T0606505176 and is located 3/4 of a mile south of the Subject Property. This was a soil only leak of gasoline discovered in 2001 and marked as "completed - case closed as of 6/20/2003." The Case Closure Summary dated 12/2/2002 lists the depth to groundwater at 106 feet below the surface. The report states eight tons of contaminated soil was removed. Groundwater flow toward the southeast under the Subject Property indicates contamination, should it exist, would be carried diagonally away from the Subject Property. Given soil only contamination, the distance to this site, groundwater flow direction and satisfactory cleanup, this report does not raise an environmental concern for the Subject Property.

The **Shell Perris #121222** site (4039 N Perris Blvd) has a GeoTracker ID of T0606524504 and is located 3/4 miles south of the Subject Property. This was for a soil only leak of gasoline and diesel discovered 5/1/2007 and marked as "completed - case closed as of 3/22/2010." The Case Closure Summary indicates the three existing tanks remain in place and active. Depth to groundwater is indicated as 80 to 83 feet below surface grade. From June 2008 to January 2009, 44 pounds of TPHg and 37 pounds of MTBE were removed via Soil Vapor Extraction. Sampling following this remediation indicated minimal residual contamination. Groundwater flow toward the southeast at the Subject Property indicates contamination, should it exist, would be carried diagonally away from the Subject Property. Given soil only contamination, the distance to this site, groundwater flow direction and satisfactory cleanup, this report does not raise an environmental concern for the Subject Property.

March AFB

Note that none of the March AFB clean-up sites were flagged by the GeoTracker search as being within one mile from this Subject Property. The March AFB cleanup sites are in the GeoTracker database. Many have been examined for other Phase I ESAs done by EARSi for properties in the vicinity. However, as part of this current Phase I investigation, the owner's agent forwarded a letter to EARSi that was sent by the Air Force in 2020 to landowners requesting to test the water under their property using existing wells. While there is no direct evidence for groundwater contamination under the Subject Property coming from the operation of March AFB (or other sources), this letter adds credence to the possibility that groundwater contamination in small concentrations may have migrated from March AFB and may exist under the Subject Property. Groundwater flow from nearly all of March AFB would be funneled by the terrain to pass southward in the vicinity of the Subject Property. While low probability, the possibility of this contamination existing now, or in the future, under the Subject Property cannot be ruled out.

Summary

With the exception of possible groundwater contamination at low concentration from March AFB, none of the other reports found by the EDR or GeoTracker searches raise an environmental concern for the Subject Property. None of the nearby sites identified, except under extreme conditions, would be a likely vapor encroachment source.

5.3 - Historic Use Information on the Property and Surrounding Areas

The objective of consulting historical sources is to develop a history of the previous uses of the Subject Property and surrounding area to help identify the likelihood of past uses that might have led to recognized environmental conditions in connection with the Subject Property.

Historic Aerial Photographs: Changes observed from historic aerial photos are listed below. Appendix IV contains the 15 Historic Aerial Photos used.

1938 - Dirt roads. The area is divided into rectangles that are disced farmland or open space.

1949 - More agricultural use. Farm buildings appear at the east end of the Subject Property.

1953 - Perris Blvd is paved, otherwise no significant change

1959 - More rural homes appear

1961 - No significant change.

1967 - No significant change.

1978 - The buildings on the Subject Property have been removed.

1985 - No significant change.

1989 - No significant change.

1997 - Commercial/industrial development has begun. Subject Property remains open space.

2002 - No significant change.

2006 - Harley Knox Blvd is now in place

2009 - No significant change.

2012 - More large buildings appear in the area.

2016 - Buildings appear immediately north and south of the Subject Property.

Date Unknown - More recent satellite images from Google Earth and Google Maps (date unknown) show additional large buildings filling the nearby area.

Historic USGS Topographical Maps: Historic USGS Topographic Maps are examined below. Appendix V shows the Historical USGS Topographic Maps used.

1901 - The area is open space (possibly agricultural). The major road grid is in place.

1942 - There are scattered buildings in the area. A house marker appears at the east end of the Subject Property.

1943 - No significant change.

1953 - No significant change.

1967 - More roads are marked. The canal to the east is in place. The March AFB runway has reached its full size to the northwest of the Subject Property.

1973, 1978 - No significant change.

1979, 1980 - No significant change.

2012 - Building markers have been removed. The road system is more extensive.

Historic City Directories: No phone listings were found for the Subject Property. The increase in phone numbers in the area is consistent with the development shown by the topo maps and aerial photos. The EDR-City Directory Abstract is reproduced as Appendix III.

Sanborn Fire Insurance Maps: See EDR report Appendix II. (An unmapped property)

Building Department Records: See EDR report Appendix I. (No records found)

5.4 - Historical Use on Subject Property

The Subject Property has been disced agricultural with a house at the east end. The house was gone from the 1978 aerial photo. Since then, the Subject Property has been disturbed open space.

5.5 - Historical Use on Adjacent and Surrounding Properties

Beginning with the 1938 aerial photo, the area was disced agricultural and open space uses. Recently, large commercial, warehouse and industrial uses have filled in the area.

5.6 - Physical Setting Sources

The Subject Property is located at North Latitude 33.856856 and West Longitude - 117.228238 and sits 1463 ft. above sea level elevation. It appears on the United States Geological Survey Perris, CA (5641330) Quadrangle. Additional information can be found in the EDR report reproduced as Appendix I. The Physical Settings Source Map from the EDR report is shown on Figure 20. Topographic Profiles are shown as Figure 21.

Figure 20 - Physical Settings Source Map

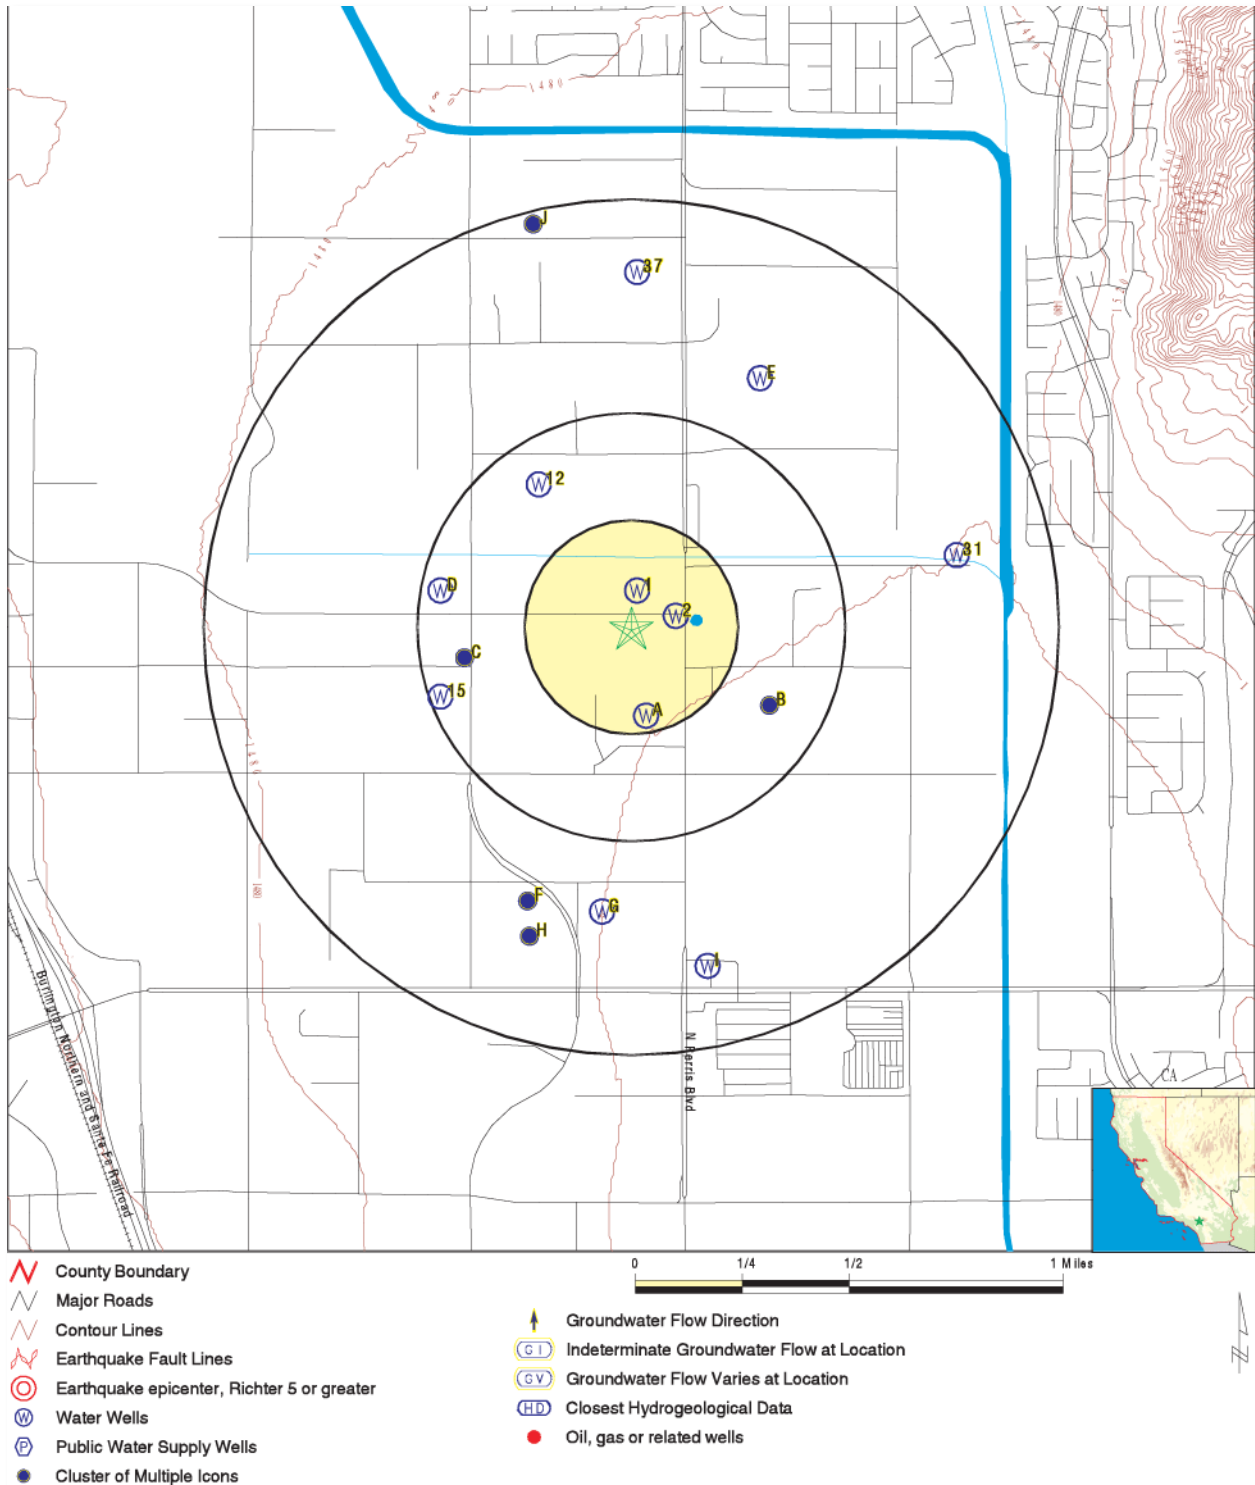

Figure 21 - Surrounding Topography: Elevation Profiles

Water Wells and Groundwater

Thirty-nine water wells were mapped in the vicinity of the Subject Property (see Figure 20). The Subject Property is very flat. From the topographic profiles, surface water, and likely groundwater, flows southeast toward the canal east of the Property.

Oil and Gas Well Records: No oil wells were mapped by the EDR Search.

Soils

Eight soil types were mapped in the vicinity of the Subject Property. These vary regarding infiltration rates and how well drained they are. Detailed information on the area soil map and soil types appears in the EDR Radius Map report reproduced as Appendix I.

Radon Records

The EDR search listed one Radon tests for Zip Code 92571. The Federal Area Radon Information Riverside County lists 12 sites. All readings were less than 4 pCi/L. The EPA maps Riverside County as Zone 2 with indoor average level between 2 and 4 pCi/L.

5.7 - Vapor Encroachment

ASTM Standard Practices for Phase I Environmental Site Assessments, E-1527-13 includes a requirement to review records for possible Vapor Encroachment onto the Subject Property from off-site sources. Environmental Data Resources, Inc. (EDR) can perform a computer search of regulatory agency databases to help locate properties that may emit hazardous vapors. Only sources within 1/3-mile up gradient and 100 feet down gradient are flagged for this evaluation.

After going through the sites flagged by the EDR and GeoTracker searches in Section 5 of this document, none of the sites mapped are likely to present a potential vapor sources within the required search distances.

The EDR VEC App with the sites mapped has been run. The results are included as Appendix VI. Maps from the VEC application for identifying potential vapor encroachment sources are shown as Figures 22 and 23. The areas in gray on Figure 23 are up gradient (higher elevation) from the approximate center of the Subject Property.

In summary, a Vapor Encroachment problem is not likely on the Subject Property.

Figure 22 - Vapor Source Location Map

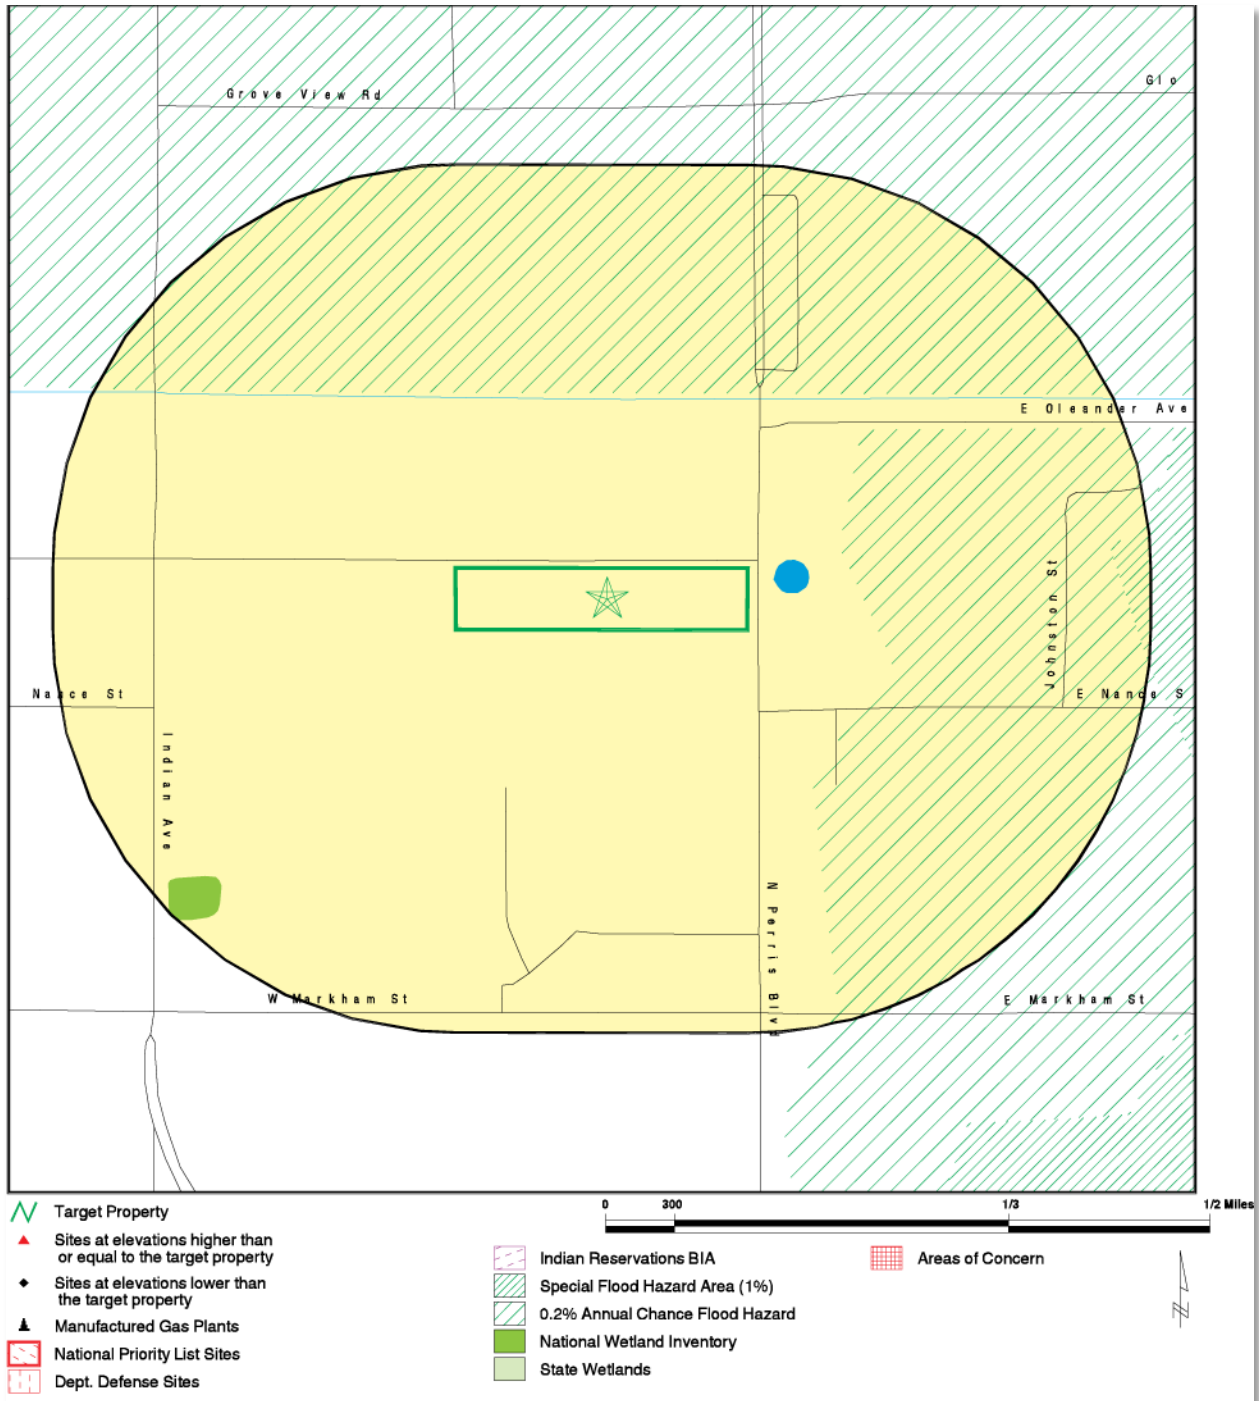

Figure 23 - Vapor App Secondary Map

Areas in gray are up gradient (higher elevation) from the (center of the) Subject Property

6.0 - SITE RECONNAISSANCE

6.1 - Objectives

The objective of a site reconnaissance is to obtain information indicating the likelihood of identifying Recognized Environmental Conditions in connection with the Subject Property.

6.2 - Observations

David J. Tanner performed a Site Reconnaissance on May 21, 2021 beginning at 8:15 am. Weather was clear. Temperature was 65° F. Winds were calm. The Subject Property was traversed on foot searching for signs of recognized environmental conditions. Photographs were taken to document the observed conditions (see Figures 7 through 16). There were no signs of recognized environmental conditions observed on the property at the time of the Site Inspection.

Description: The very flat Subject Property is undeveloped, disturbed open space. There are no buildings on the Site. Improved vehicular access has not been provided. Dumped trash including a plastic truck bumper, clay roofing tiles and car/truck tires were observed.

Utilities: All utilities have been constructed underground on the adjacent roadways. Underground and above ground infrastructure was observed adjacent to Harley Knox Road (a fire hydrant and water district infrastructure).

Endangered Species: No federally or State listed endangered species or other signs of wildlife were observed on the Property during the Property inspection. The entire site had been disced.

Vegetation: The Property was covered with sparse indigenous grasses and shrubs (0-12" tall).

Groundwater: No groundwater wells were observed on the Subject Property.

Odors: No odors were detected.

Soils: No sign of stressed vegetation or soil staining was observed on the Subject Property.

Staining: No soil staining, debris, dead vegetation, dead animals or other signs of recognized environmental conditions were observed on or adjacent to the Subject Property.

Other Indicators: No visual evidence of above or below ground tanks or other signs of commercial or industrial activity was noted. No potential hazardous substances or industrial hazardous waste impacts were seen on the Subject Property. There was no visual indication that hazardous substances or petroleum products ever existed on the Subject Property.

6.3 - Interior Observations

There are no buildings on the Subject Property.

7.0 - INTERVIEWS

7.1 - Objective

The objective of interviews is to obtain information indicating recognized environmental conditions in connection with the Subject Property.

7.2 - Owner

Title to the property is held by JBL Investments, Inc., a California corporation as to an undivided 50% interest and Dalmacio Ngoboc and Corazon Ngoboc, husband and wife as joint tenant as to an undivided 50% interest as tenants in common. The owners contact address is JBL Inv Inc, PO Box 3668 Gaithersburg, MD.

Ms. Corinne Berge with Realty One Group Southwest of Temecula Ms. Berge is the listing broker and agent for the owners. Her address is 41463 Margarita Rd #100, Temecula, CA 92591. Ms. Berge completed an email questionnaire on behalf of herself and the owners on May 25, 2021. In summary, Ms. Berge had no knowledge of hazardous materials or recognized environmental conditions having existed on the Property.

Ms. Berge attached an undated communication from the Department of the Air Force asking if APN 302-090-022 had an existing private drinking water well on the Subject Property. The letter stated, "The Air force Civil Engineering Center is conducting an expanded site inspection at March Air Reserve Base to determine if perfluorooctane sulfonate (PFOS) and perfluorooctanoic acid (PFOA) that may have resulted from Air Force mission activities is present in drinking water at levels above the Environmental Protection Agency's Lifetime Health Advisory (HA) of 70 parts per trillion." (Note: The Site Inspection and EDR search did not identify a private drinking water well on the Subject Property, though given the existence of a residence at the east end of the Property, now removed, a well likely existed.) The letter goes on to state "Residents who are on municipal water or other public water supply are not the focus of this inquiry".

Ms. Berge was contacted by phone on May 26, 2021 to answer follow-up questions about the Subject Property. Ms. Berge was not aware of a private drinking water well on the Subject Property and stated that the current landowners had owned the property for more than 20 years and that the property has been regularly maintained and mowed.

7.3 - Site Manager

There is no site manager.

7.4 - Occupant Interviews

There are no residents.

7.5 - Local Governments

EDR and GeoTracker searched available public records regarding the Subject Property.

7.6 - Others

Brian Green, Superintendent with Oltmans Construction Co., 10005 Mission Mill Rd., Whittier CA. 90601. Oltmans is the contractor building the expansion of the warehouse adjacent to the southeast portion of the Subject Property. Mr. Green was interviewed in person on May 21, 2021. He has been working on the adjacent property for six months and had no knowledge of hazardous materials or recognized environmental conditions having existed on the Property.

Leo Garcia, Nursery and Rock Supply (NRS), 4765 Perris Blvd., Perris, CA 92571. NRS is located northeast of the Property. Mr. Garcia was interviewed in person on May 21, 2021. He had no knowledge of hazardous materials or recognized environmental conditions on the Property.

Ms. Taylor, Security Supervisor, SMCL Private Security, San Pedro California 90734. SMCL provides security services for National Retail Transport company located at 400 Harley Knox Blvd, Perris, CA 92571, which is immediately north of the Subject Property. Ms. Taylor was interviewed by in person on May 21, 2021. She had no knowledge of hazardous materials or recognized environmental conditions having existed on the Property.

Real Estate Agent/Buyer Statements

Joe McKay, JM Realty Group, Inc., 3535 Inland Empire Blvd. Ontario, CA 91764. Mr. McKay is the buyer of the Property. Mr. McKay completed an emailed questionnaire on May 24, 2021. He had no knowledge of hazardous materials or recognized environmental conditions having existed on the Property.

Mr. Mike Wolfe, Senior Vice President/Principal, Lee & Associates Ontario, 3535 Inland Empire Blvd., Ontario, California 91764. Mr. Wolfe is the procuring broker and the buyer of the Property. Mr. Wolfe completed an emailed questionnaire on May 24, 2021. Mr. Wolfe had no knowledge of hazardous materials or recognized environmental conditions having existed on the Property.

Mr. Michael Fine, Marketing & Sales Coordinator, Lee & Associates, Ontario, 3535 Inland Empire Blvd., Ontario, California 91764. Mr. Fine is the coordinator for the procuring broker and the buyer of the Property. Mr. Fine completed an emailed questionnaire on May 24, 2021. He had no knowledge of hazardous materials or recognized environmental conditions having existed on the Property.

8.0 - FINDINGS

The EDR and GeoTracker database searches found environmental reports for nearby properties. Upon review of these documents, no Recognized Environmental Conditions were identified on the Subject Property or nearby properties.

Based on the Site Reconnaissance and review of government agency records, historic aerial photos and other information sources, there is no evidence that hazardous substances or petroleum products existed on (or have migrated under) the Subject Property.

9.0 - OPINION

Based on a Site Reconnaissance, review of government agency records, historic aerial photos and other information, there is no evidence that hazardous substances or petroleum products exist above de minimus levels on the surface of Subject Property or that groundwater under the Subject Property has been contaminated from on or off-site sources.

10.0 - CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E-1527-13 for the Subject Property described herein. Any exceptions to or deletions from, this practice are described in Section 11.0 of this report.

Based on records searches, interviews, aerial photos and Site Reconnaissance, this assessment revealed there is no evidence of Recognized Environmental Conditions on the surface or in the groundwater below the Subject Property.

11.0 - DEVIATIONS

This Environmental Site Assessment was performed in accordance with industry standards of care and practice and in general conformity with ASTM E-1527-13 standards. We do not believe that we deviated from the ASTM standards in preparing this Phase I ESA report.

12.0 - DATA GAPS

Consistent with 40 CFR 312.21(c)(2), this Environmental Site Assessment was performed in accord with ASTM E-1527-13 standards. Historic aerial photographs and other sources establish a history for the Subject Property and surrounding area from 1938 until the recent satellite photo used by Google Earth. All data that was requested has been received. There are no “data gaps.”

13.0 - ADDITIONAL ISSUES

No soil or radon testing was performed as a part of this Phase I ESA. None of the tests found by the EDR search yielded a reading above 4 pCi/L. The Subject Property is in an area considered to have a low occurrence of radon. However, radon levels are site-specific and only testing can determine the actual radon level.

14.0 - SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The conclusions and opinions developed herein were based in part on test data and reports provided by others and our professional judgment. Thus, the assessment contained herein is only valid as of the data of this report and may require an update to reflect additional sampling, testing or other information. No guarantee of the results of this study is made or implied. Our professional services were performed in accordance with the prevailing standard of care as practiced by other environmental professionals in this area of California. We make no other warranty, either expressed or implied.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312.10.

I have qualifications based on education, training and experience to assess a property based on the nature, history and setting of the property. I have developed and performed the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Professional

David J. Tanner, President
Environmental & Regulatory Specialists, Inc.

15.0 - QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

The following persons were involved in the preparation of this ESA.

- **Project Director: Mr. David Tanner, Environmental Professional**

Mr. Tanner has served as consultant to the Building Industry since 1974 providing project management, entitlement processing and environmental services. He has extensive experience in the development of large-scale multi-use land-based projects. In addition to Project Management services, Mr. Tanner has prepared over 500 Environmental documents including Phase I Environmental Site Assessments, Program, Environmental Impact Reports, Environmental Impact Statements, Specific Plans, Planned Community Zoning Regulations, as well as specialized studies typically required as a part of the entitlements process. Mr. Tanner has been involved in the entitlement phase of more than 350 projects in the southern California area alone.

Mr. Tanner was awarded the degree of Bachelor of Arts with a major in Environmental Studies, from the University of California, Santa Barbara on December 14, 1974

Mr. Tanner was awarded registration as a Registered Environmental Assessor by the State of California Environmental Protection Agency in September 1992 (REA #04440). Mr. Tanner remained a REA until the program was discontinued by the State.

Mr. Tanner was awarded a Certification in Environmental Site Assessment and Remediation from the University of California, Irvine on September 14, 1994

Mr. Tanner has been a long-standing member of the Association of Environmental Professionals.

- **Technical Support, Graphics and Editing: Mr. Joe Tyndall**

Mr. Tyndall holds an engineering degree from MIT and an MBA from UC Irvine. Since 1998 when he began working with EARSIS, under supervision of David Tanner and other REA certified professionals, Joe has contributed to the preparation of over 200 environmental documents including more than 50 Phase I Environmental Site Assessments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 01/25/2021 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Summary Details:

Conditions at proposal July 14, 1989): March Air Force Base (MAFB) covers approximately 7,000 acres near Riverside in the Moreno Valley in Riverside County, California. MAFB is adjacent to light industrial, agricultural, and residential areas. Established in 1918 as the Alessandro Aviation Field, MAFB has served as a training base and refueling operations base. Industrial operations including aircraft maintenance and repair) involved use of solvents and disposal of solvent wastes. MAFB is participating in the Installation Restoration Program (IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from hazardous materials. As part of IRP, the Air Force investigated 28 potentially contaminated disposal areas. MAFB Well No. 1 on-base was found to be contaminated with trichloroethylene, tetrachloroethylene, and cis-1,2-dichloroethylene at levels that exceed State drinking water standards. It was taken out of service. Soils on the base are contaminated with toluene and benzene. An estimated 11,600 people obtain drinking water from municipal wells within 3 miles of hazardous substances on MAFB. The Air Force is conducting a remedial investigation/ feasibility study (RI/FS) to determine the type and extent of contamination at the base and identify alternatives for remedial action. Status November 21, 1989): Field work continues on the RI/FS.

SCH:

Name: MEADE VALLEY ELEMENTARY SCHOOL ADDITION
Address: 21-100 OLEANDER AVENUE
City,State,Zip: PERRIS, CA 92570
Facility ID: 33820011
Site Type: School Investigation
Site Type Detail: School
Site Mgmt. Req.: NONE SPECIFIED
Acres: Not reported
National Priorities List: NO
Cleanup Oversight Agencies: DTSC
Lead Agency: DTSC
Lead Agency Description: * DTSC
Project Manager: Not reported
Supervisor: Javier Hinojosa
Division Branch: Southern California Schools & Brownfields Outreach
Site Code: 404133
Assembly: 61
Senate: 31
Special Program Status: Not reported
Status: No Action Required
Status Date: 10/13/2000
Restricted Use: NO
Funding: School District
Latitude: 33.85737
Longitude: -117.2227
APN: NONE SPECIFIED
Past Use: * EDUCATIONAL SERVICES
Potential COC: NONE SPECIFIED, No Contaminants found
Confirmed COC: NONE SPECIFIED
Potential Description: NMA
Alias Name: MEADE VALLEY ELEMENTARY SCHOOL ADDITION
Alias Type: Alternate Name
Alias Name: VAL VERDE UNIFIED SCHOOL DISTRICT
Alias Type: Alternate Name
Alias Name: VAL VERDE USD-MEADE VALLEY ELEM
Alias Type: Alternate Name
Alias Name: 404133
Alias Type: Project Code (Site Code)
Alias Name: 33820011
Alias Type: Envirostor ID Number

Completed Info:

Completed Area Name: PROJECT WIDE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

USGS TOPOGRAPHIC MAP

| | |
|----------------------|--------------------|
| Target Property Map: | 5641330 PERRIS, CA |
| Version Date: | 2012 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
| 06065C1430H | FEMA FIRM Flood data |
| <u>Additional Panels in search area:</u> | <u>FEMA Source Type</u> |

NATIONAL WETLAND INVENTORY

| | |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
| NOT AVAILABLE | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

| | |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status: | Not found |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| Not Reported | | |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: EXETER

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|------------------------------------|---|---|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 16 inches | very fine sandy loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt. | Max: 4 Min: 1.4 | Max: 8.4 Min: 7.4 |
| 2 | 16 inches | 37 inches | sandy clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt. | Max: 4 Min: 1.4 | Max: 8.4 Min: 7.4 |
| 3 | 37 inches | 50 inches | indurated | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt. | Max: 4 Min: 1.4 | Max: 8.4 Min: 7.4 |
| 4 | 50 inches | 59 inches | stratified sandy loam to silt loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt. | Max: 4 Min: 1.4 | Max: 8.4 Min: 7.4 |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: HANFORD

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--|---|--|---|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 7 inches | fine sandy loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 141 Min: 42 | Max: 7.8 Min: 5.6 |
| 2 | 7 inches | 40 inches | fine sandy loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 141 Min: 42 | Max: 7.8 Min: 5.6 |
| 3 | 40 inches | 59 inches | stratified loamy sand to coarse sandy loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 141 Min: 42 | Max: 7.8 Min: 5.6 |

Soil Map ID: 3

Soil Component Name: EXETER

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Environmental & Regulatory Specialists, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Environmental & Regulatory Specialists, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Summary Details:

Conditions at proposal July 14, 1989): March Air Force Base (MAFB) covers approximately 7,000 acres near Riverside in the Moreno Valley in Riverside County, California. MAFB is adjacent to light industrial, agricultural, and residential areas. Established in 1918 as the Alessandro Aviation Field, MAFB has served as a training base and refueling operations base. Industrial operations including aircraft maintenance and repair) involved use of solvents and disposal of solvent wastes. MAFB is participating in the Installation Restoration Program (IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from hazardous materials. As part of IRP, the Air Force investigated 28 potentially contaminated disposal areas. MAFB Well No. 1 on-base was found to be contaminated with trichloroethylene, tetrachloroethylene, and cis-1,2-dichloroethylene at levels that exceed State drinking water standards. It was taken out of service. Soils on the base are contaminated with toluene and benzene. An estimated 11,600 people obtain drinking water from municipal wells within 3 miles of hazardous substances on MAFB. The Air Force is conducting a remedial investigation/ feasibility study (RI/FS) to determine the type and extent of contamination at the base and identify alternatives for remedial action. Status November 21, 1989): Field work continues on the RI/FS.

RCRA-LQG: Federal RCRA generators list

Date Form Received by Agency: 2020-07-08 00:00:00.0
 Handler Name: MARCH AIR RESERVE BASE
 Handler Address: 610 MEYER DR
 Handler City,State,Zip: MARCH ARB, CA 92518
 EPA ID: CA4570024527
 Contact Name: SEAN LEE
 Contact Address: MEYER DR
 Contact City,State,Zip: MARCH ARB, CA 92518
 Contact Telephone: 951-655-5082
 Contact Fax: Not Reported
 Contact Email: SEAN.LEE.19@US.AF.MIL
 Contact Title: HAZARDOUS MATERIALS / WASTE MANAGER
 EPA Region: 09
 Land Type: Federal
 Federal Waste Generator Description: Large Quantity Generator
 Non-Notifier: Not Reported
 Biennial Report Cycle: 2019
 Accessibility: Not Reported
 Active Site Indicator: Handler Activities
 State District Owner: Not Reported
 State District: Not Reported
 Mailing Address: MEYER DR
 Mailing City,State,Zip: MARCH ARB, CA 92518
 Owner Name: US AIR FORCE
 Owner Type: Federal
 Operator Name: BRIG. GEN MELISSA COBURN
 Operator Type: Federal
 Short-Term Generator Activity: No
 Importer Activity: No
 Mixed Waste Generator: No
 Transporter Activity: No
 Transfer Facility Activity: No
 Recycler Activity with Storage: No
 Small Quantity On-Site Burner Exemption: No
 Smelting Melting and Refining Furnace Exemption: No
 Underground Injection Control: No
 Off-Site Waste Receipt: No
 Universal Waste Indicator: No
 Universal Waste Destination Facility: No
 Federal Universal Waste: No
 Active Site Fed-Reg Treatment Storage and Disposal Facility: Not Reported
 Active Site Converter Treatment storage and Disposal Facility: Not Reported
 Active Site State-Reg Treatment Storage and Disposal Facility: Not Reported
 Active Site State-Reg Handler: ---
 Federal Facility Indicator: The land is federally-owned
