SUBJECT: GLENOAKS ROAD WINERY VEHICLE MILES TRAVELED (VMT) SCREENING EVALUATION

Dear Joseph and Jasmine Wiens:

The following Vehicle Miles Traveled (VMT) Screening Evaluation has been prepared for the proposed Glenoaks Road Winery development (**Project**), which is located on the southeast corner of Glen Oaks Road and Rancho California Road in the County of Riverside.

PROJECT OVERVIEW

The proposed project is to consist of the development of a 3,600 square foot wine tasting room and patio (See Attachment A).

BACKGROUND

Changes to California Environmental Quality Act (CEQA) Guidelines were adopted in December 2018, which requires all lead agencies to adopt VMT as a replacement for automobile delay-based level of service (LOS) as the new measure for identifying transportation impacts for land use projects. This statewide mandate went into effect July 1, 2020. To aid in this transition, the Governor's Office of Planning and Research (OPR) released a Technical Advisory on Evaluating Transportation Impacts in CEQA (December 2018) (**Technical Advisory**) (1). Based on the Technical Advisory, the County of Riverside has adopted its own Riverside County's Transportation Analysis Guidelines for Level of Service Vehicle Miles Traveled (December 2020) (**County Guidelines**) (2). The adopted County Guidelines have been utilized to prepare this VMT analysis.

PROJECT LEVEL SCREENING

Consistent with County Guidelines, projects should evaluate available screening criteria based on their location and project type to determine if a presumption of a less than significant transportation impact can be made. The following screening thresholds are listed in the County Guidelines, and those applicable to the proposed Project (highlighted in **bold**) have been selected for further review:

- **Small Projects**
- **High Quality Transit Areas (HQTA)**

- **Local Serving Retail**
- Affordable Housing (not applicable)
- Local Essential Service (not applicable)
- Map-Based Screening (not applicable)

SMALL PROJECTS SCREENING

The County Guidelines list two types of screening criteria that may apply to “small projects.” The first is a vehicle trip threshold of 110 trips per day. Trips anticipated to be generated by the Project are estimated based on trip generation rates collected by the Institute of Transportation Engineers (ITE) Trip Generation Manual, 11th Edition, 2021(3). The Project is anticipated to generate 146 weekday and 338 weekend vehicle trip-ends (i.e., includes both inbound and outbound trips) per day that would exceed the 110 daily trip threshold (See Attachment B).

Additionally, the County Guidelines also identifies land use projects that are forecasted to generate greenhouse gas (GHG) emissions below 3,000 Metric Tons of Carbon Dioxide Equivalent (MTCO₂e) per year, which are also estimated to cause a less than significant VMT impact.¹ The County Guidelines provides a table for several different land use development types and their CO₂e per year emission rates. Based on the GHG Analysis (Urban Crossroads, January 2022) performed for the Project, the analysis found the annual GHG emissions associated with the proposed Project would generate a net total of approximately 399.60 MTCO₂e/yr. Therefore, the Project with its intended development 3,600 square feet wine tasting room and patio would not exceed the 3,000 MTCO₂e threshold (See Attachment C).

Small Projects screening criteria is met.

HIGH QUALITY TRANSIT AREAS (HQTA) SCREENING

Projects located within a Transit Priority Area (TPA) (i.e., within ½ mile of an existing “major transit stop”² or an existing stop along a “high-quality transit corridor”³) may be presumed to have a less than significant impact, absent substantial evidence to the contrary. However, the presumption may not be appropriate if a project:

- Has a Floor Area Ratio (FAR) of less than 0.75.
- Includes more parking for use by residents, customers, or employees of the project than required by the jurisdiction (if the jurisdiction requires the project to supply parking).

¹ County Guidelines; Page 19.

² Pub. Resources Code, § 21064.3 (“‘Major transit stop’ means a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.”).

³ Pub. Resources Code, § 21155 (“For purposes of this section, a high-quality transit corridor means a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.”).

- Is inconsistent with the applicable Sustainable Communities Strategy (as determined by the lead agency, with input from the Metropolitan Planning Organization); or
- Replaces affordable residential units with a smaller number of moderate- or high-income residential units.

The Project is not located within ½ mile of an existing major transit stop, or along a high-quality transit corridor.

HQTA screening criteria is not met.

LOCAL SERVING RETAIL SCREENING

The County Guidelines identifies that local serving retail projects less than 50,000 square feet may be presumed to have a less than significant impact without substantial evidence to the contrary. In addition to local serving retail, other types of local serving uses (e.g., day care centers, non-destination hotels, affordable housing, places of worship, etc.) may also be presumed to have a less than significant impact as their uses are local serving in nature and tend to have shorter vehicle trips. The Project does not intend to develop any local serving retail land uses.

Local Serving Retail screening criteria is not met.

CONCLUSION

In summary, the Project was evaluated consistent with the screening criteria outlined in the County Guidelines. The Project was found to meet the 3,000 MTCO₂e small project screening criteria and is therefore presumed to result in a less than significant VMT impact; no additional VMT analysis is required.

If you have any questions, please contact me directly at aso@urbanxroads.com.

Respectfully submitted,
