Summary Form for Electronic Document Submittal

SCH #: _____

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Bradley-San Ardo Capital Preventive Maintenance		
Lead Agency: Caltrans		
Contact Name: Matt Fowler		
matt.c.fowler@dot.ca.gov Email:		
Project Location: Bradley and San Ardo City	Monterey	
City	County	
Project Description (Proposed actions, location, and/or consequences).		
The California Department of Transportation (Caltrans) proposes to rehabilitate the pavement wear course and 16 drainage culverts on the four-lane divided expressway within a 12.8-mile-long section of U.S. 101 in Monterey County from just south of the Jolon Road intersection near Bradley to the intersection with Paris Valley Road/Cattlemen Road near San Ardo. Improvements would be made through various ways, including diamond grinding, concrete panel replacement, cold planing, asphalt overlay, dig outs, cut and cover, and pipe jacking. Within the project limits, the project would also replace non-standard metal beam guardrail and end treatments, replace sign panels that do not use the Type XI reflective backing, install 14 traffic count stations, install one vehicular detection system, place vegetation-control crushed shale, and construct shoulder backing, where possible.		

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project would have potentially significant effects to biological resources. However, with the following mitigation measures incorporated, the project would have less than significant effects to biological resources:

- Restoration (reestablishment) of impacted jurisdictional waters is proposed at a 1-to-1 ratio (acreage) for temporary impacts.
- · Preconstruction surveys, and if present, capture, relocation, and documentation efforts for the coast horned lizard and San Joaquin coachwhip would be required. Final project plans would delineate Environmentally Sensitive Areas to minimize impacts to sensitive areas and species by limiting access to the minimum required for construction within the Area of Potential Impacts. No vehicle access within the Environmentally Sensitive Areas would be permitted.
- In accordance with the Federal Endangered Species Act and the project's Biological Opinion issued to protect the San Joaquin kit fox, the project would incorporate preconstruction surveys, employee awareness training, speed limitations for work vehicles, litter control, pet and firearm restrictions, pipe inspection and capping, excavation barriers, restoration and revegetation guidelines, and reporting to the U.S. Fish and Wildlife Service.
- In accordance with the Federal Endangered Species Act and the project's Biological Opinion issued to protect the bald eagle, work activities between February 1 and September 1 would be restricted in the area of the known bald eagle nest until a qualified biologist conducts a survey to determine nest activity. Work limitations would be adjusted based upon nest activity and coordination with the U.S. Fish and Wildlife Service. In addition, the measures applicable to all other nesting a
