RE: Phase I Environmental Site Assessment
Citrus & Boyle
Parcels 9, 10, & 11
Fontana, California 92337
VERTEX Project No. 77695

Dear Ms. Connolly:

The Vertex Companies, Inc. (VERTEX) is pleased to submit this Phase I Environmental Site Assessment (ESA) report for the above-referenced property (the site). The purpose of this assessment was to identify Recognized Environmental Conditions (RECs) in connection with the site. A REC is defined as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.” It does not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Our work was conducted in general conformance with proposal P.0795.22, executed by yourself on March 10, 2022, and in accordance with the general provisions of the E 1527-13 and E 1527-21 American Society for Testing and Materials (ASTM) document entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" for commercial real estate, as well as the U.S. Environmental Protection Agency's (USEPA) All Appropriate Inquiries (AAI) Final Rule of November 1, 2005, as amended December 30, 2013. To the best of our knowledge, this Phase I ESA report is true and accurate.

VERTEX also assessed the site for the potential presence of asbestos-containing materials (ACMs), lead-based paint (LBP), threatened and endangered species, and wetlands.

We declare that, to the best of our professional knowledge and belief, we meet the definition of an Environmental Professional as defined in 40 C.F.R. Part 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Please do not hesitate to contact us at your convenience should you have any questions or comments regarding this report or our recommendations. It has been a pleasure working with you on this project.

Sincerely,

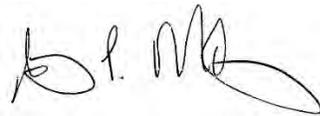

The Vertex Companies, Inc.

Ryan O'Sullivan
Environmental Scientist I

Mark Jirgal, P.G.
Division Manager

Stephen P. McCarthy
Vice President – National Technical Lead

PHASE I ENVIRONMENTAL SITE ASSESSMENT

**Citrus & Boyle
Parcels 9, 10, & 11
Fontana, California 92337
VERTEX Project No. 77695**

1.0 SUMMARY

On March 10, 2022, The Vertex Companies, Inc. (VERTEX) was contracted by Ms. Annemargaret Connolly representing CHIPT Acquisitions, L.L.C. to conduct a Phase I Environmental Site Assessment (ESA) of three parcels of land located at 16205 Boyle Avenue, 16256 Slover Avenue, and 16264 Slover Avenue in Fontana, San Bernardino County, California (the site). The site currently is developed with multiple single-family residential buildings that are occupied by various residential tenants. According to the San Bernardino County Assessor, the site consists of three parcels of land identified as Parcel Numbers 0251-115-118, 0251-115-104, and 0251-115-103 totaling approximately 3.30 acres (per site plans). According to the San Bernardino County Recorder, the site is owned by Dahdouh Trust (0251-151-03), Leonel Rivas (0251-151-04), and Rosalva Ecalia Hernandez (0251-151-18).

The purpose of this assessment was to identify Recognized Environmental Conditions (RECs), Controlled RECs (CRECs), and Historical RECs (HRECS) in connection with the site.

ASTM Findings

- Based on our review of readily available historical information, it appears that a small building was located on-site near the southern boundary of the site as early as 1896. Agricultural use of the site, particularly orchards, was first documented across the site as early as 1938, when the central portion of the site was developed with orchards. Various small, likely residential, buildings were constructed on the site near Boyle Avenue and Slover Avenue from the 1940s. Portions of the site were used for agriculture up until at

least 1990. Following the removal of the orchards, the land surrounding the single-family homes has remained undeveloped and used for automotive and equipment storage. The site was previously utilized as agricultural land and orchards, residual levels of agricultural chemicals, including fertilizers, pesticides, and herbicides, may be present in shallow soil on-site. No information was encountered in the course of this assessment to indicate agricultural-related chemicals, if utilized on-site, were applied in any other manner other than for their intended use. In the event soil export is required during redevelopment, soil testing may be required for disposal or reuse. No RECs in connection with past operations were identified.

- VERTEX conducted a regulatory review that included a search of state and federal regulatory databases to identify environmental concerns for the site and surrounding properties. The site was not listed on any state and federal regulatory databases.
- The site is located in an area comprised of residential and commercial development. A review of readily available historical information reveals that the surrounding properties were undeveloped land before 1896 until, by the late 1930s, the south, east, and north adjoining properties were developed with orchards. By the late 1940s, all the surrounding properties were developed with agricultural land and residences until the mid-1960s, when the adjoining property to the west was developed with a larger light industrial building. Single-family homes continued to be built in the area while agricultural use decreased until the early 2000s when the adjoining property to the north removed the last of its orchards. Many of the original residential homes from the 1930s and 1940s remain. Areas previously used for agriculture are now used for automotive and equipment storage. No environmental concerns were identified concerning current or past use of adjoining properties.
- Several facilities in the vicinity of the site were identified on the regulatory databases searched within the ASTM search distances of the site. The identified database listings are not considered an environmental concern to the site based on distance, regulatory status, and/or apparent groundwater gradient.

Non-ASTM Additional Services

VERTEX conducted additional services as discussed in Section 9.0 of this report, including the assessment of asbestos-containing materials (ACMs), lead-based paint (LBP), threatened and endangered species, and wetlands, which revealed the following:

- Based on the date of construction of the on-site structures (prior to 1975), it is possible that ACMs are present in these site buildings. Prior to demolishing the on-site buildings, they should be sampled for ACMs and if present, they should be managed in accordance with the National Emission Standard for Hazardous Air Pollutants (NESHAP) and other applicable local, state, and federal regulations.
- Based on the date of construction of the on-site structures (prior to 1975), LBP may be present in these site buildings. Prior to demolition, suspect painted surfaces to be impacted should be sampled and analyzed for lead content or managed as lead-containing in accordance with the EPA Lead Renovation, Repair and Painting Rule and other applicable local, state, and federal regulations.

Assessment of the additional services did not identify any additional Business Environmental Risks associated with the site.

Conclusions

VERTEX has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13 and 1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process of the parcels located 16205 Boyle Avenue, 16256 Slover Avenue, and 16264 Slover Avenue in the city of Fontana, San Bernardino County, California. Any exceptions to, or deletions from, this practice are described in Section 8.0 of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the site.

2.0 SITE AND VICINITY CHARACTERISTICS

2.1 Site Description

The site occupies three separate properties listed as 16205 Boyle Avenue, 16256 Slover Avenue, and 16264 Fontana, California. According to the San Bernardino County Assessor, these three parcels are identified as Parcel Numbers: 0251-151-18, 0251-151-04, and 0251-151-03 and total approximately 3.30 acres (per site plans). According to the San Bernardino County Recorder, the site is owned by Dahdouh Trust (0251-151-03), Leonel Rivas (0251-151-04), and Rosalva Ecalia Hernandez (0251-151-18). The site location is shown in Figure 1 - Site Locus Map.

2.2 Site Improvements

The site currently is developed with three single-family residential buildings and associated garages/storage areas. Some of the buildings located on the site are dilapidated and in disrepair. The oldest buildings are the larger buildings located at 16205 Boyle Avenue and 16256 Slover Avenue. These homes originally were built in 1928. The home located at 16264 Slover Avenue was built in 1975. The site buildings are constructed of wood frames and masonry with pitched roofs. Interior finishes within the residential buildings consist of stucco and drywall walls. Drywall ceilings, and tile, luminant, and hardwood floors.

There are multiple accessory dwelling units (ADUs), consisting of a partially converted garage and sheds, located behind the home located at 16256 Slover. Conversion of the garage was never completed, but half of the building has been partially converted into a residential space. There are two abandoned structures located at 16264 Slover Avenue. One of the structures appears to be an old mobile home in disrepair and the other is a small masonry structure that has deteriorated beyond use.

Exterior areas are generally vacant land. The residents use the northern portion of 16256 Slover Avenue and 16205 Boyle Avenue to store various automotive parts.

For a layout of the site, please refer to Figure 2 - Site Schematic. Photographic documentation of the site and surrounding areas is presented in Appendix A.

2.3 Tenant Operations

The site currently is occupied by several private residents that live in small wood frame and masonry single-family homes. Occupants of the residences store various automotive equipment on-site. VERTEX observed petroleum products and hazardous materials in household-sized containers. VERTEX also observed two empty 55-gallon oil drums and two approximately 150-gallon plastic water tanks in the backyard of 16205 Boyle Avenue. VERTEX also observed janitorial and retail-sized household cleaners inside the homes, sheds, and garages. No evidence of stressed vegetation or soil staining was observed near any of the vehicles, automotive equipment, gas cans, and drums. No concerns were identified, and the current on-site operations do not represent an environmental concern.

2.4 Current Uses of Adjoining Properties

The site is located in a mix-use area with residential and commercial properties. Adjoining properties were observed (from the site or public access areas) for signs of RECs and their potential to pose an environmental concern to the site. The uses and features of adjoining properties are described in the following table. The locations of these properties relative to the site are depicted in Figure 2 – Site Schematic.

NEARBY/ADJOINING PROPERTY SUMMARY		
DIRECTION	PROPERTY USE	CONCERNS
North	The area north of the eastern portion of the property is made up of residential properties. The area to the north-northeast beyond Boyle Avenue is currently being developed into what appears to be a warehouse.	None.
East	Various residential properties.	None.
West	Rancho Nursery (16228 Slover Avenue), on the southern portion of the property, and the northern portions a vacant industrial property (16191 Boyle Ave), along with residential property (16197 Boyle Avenue).	None.
South	Slover Avenue followed by vacant land that is currently being developed into a large warehouse.	None.

See Section 6.2 for discussion on the regulatory listings associated with the north and west adjoining properties. No RECs were identified in connection with the current use of adjoining properties.

2.5 Physical Setting Source(s)

Physical setting sources specified in the following sections of this report were reviewed to provide information about the geology and hydrogeology of the site.

2.5.1 Topography

A review of the 2018 U.S. Geological Survey (USGS) Topographic Quadrangle Map of Fontana, California indicates that the surface elevation of the site is approximately 1,079 feet above mean sea level (amsl). The topography of the site and surrounding area is relatively level. The surrounding topography generally slopes downward to the south-southwest.

2.5.2 Surface Water

During the site inspection, VERTEX did not observe naturally occurring surface water bodies on-site. The nearest naturally occurring body of water is the Santa Ana River located approximately 5.65 miles east-southeast of the site. Based on the Federal Emergency Management Agency

(FEMA) Flood Insurance Rate Map (FIRM), Community-Panel Number 06071C8654H, the site is not in the 100- or 500-year flood zones.

2.5.3 Geologic Conditions

According to the U. S. Department of Agriculture (USDA) Web Soil Survey, soils at the site consist primarily of Tujunga gravelly loamy sand. The Tujunga soil series is characterized as well-drained to excessively drained sands and gravels with high infiltration rates. Bedrock outcrops were not observed during the site reconnaissance.

2.5.4 Groundwater

According to a 2004 Remedial Action Completion Certification for a Leaking Underground Storage Tank (LUST) case at 16081 Valley Boulevard, located approximately 2,200 feet north-northwest of the site, groundwater is anticipated to be at a depth greater than 300 feet below ground surface (bgs). Based on local topography at the site, groundwater is assumed to flow to the south. Actual local groundwater flow direction can be influenced by factors such as local surface topography, underground structures, seasonal fluctuations, soil and bedrock geology, and production wells, none of which were considered during this study.

3.0 USER-PROVIDED INFORMATION

VERTEX requested the following information about the site from Weil Gotshal & Manges LLP (User):

- An evaluation of the presence of environmental cleanup liens for the site;
- Activity and use limitations (AULs) such as engineering controls (e.g., slurry walls, caps) and land-use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place for the site;
- Specialized knowledge that includes personal knowledge or experience related to the site or nearby properties based on professional experience or knowledge of the site;
- Fair market value (FMV) to evaluate whether the purchase price of any parcel was significantly below FMV;
- Obvious indicators that involve past or present spills, stains, releases, cleanups on or near the site;
- Common knowledge about the use of specific chemicals, possible contamination, or past use of the site and surrounding area; and
- Reason for performing the ESA.

VERTEX was provided with a User Questionnaire included in Appendix B completed by Mr. Chase Furr, Vice President with CHIPT Acquisitions, L.L.C. Mr. Furr was unaware of any environmental cleanup liens, AULs, specialized knowledge, obvious indicators or common knowledge of the site and surrounding area. Mr. Furr indicated the purchase price reflected FMV. The User stated that the work was being conducted in support of a potential real estate transaction. VERTEX did not receive land title records from the User. No other additional information was provided by the User.

4.0 INTERVIEWS

VERTEX conducted interviews regarding site history and the current on-site operations with the following individuals:

INTERVIEWS		
NAME/COMPANY	TITLE/POSITION	INFORMATION PROVIDED
Ivan Rivas	Site Contact	Provided information and access to 16256 Slover Avenue
Edgar Castor	Site Contact	Provided information and access to 16264 Slover Avenue
Eric Prieto	Site Contact	Provided information and access to 16205 Boyle Avenue
Various Municipal Officials	Various	Provided municipal information.

Information obtained from these interviews is discussed in relevant sections of this report. Please refer to Section 6.3 for a summary of information obtained from municipal inquiries.

5.0 HISTORICAL RECORDS REVIEW

Past land uses for the site and adjoining properties were assessed to identify historical practices or conditions that may have impacted the site. This was accomplished by reviewing historical information from several sources including but not limited to an interview with a site representative, a review of available previous environmental reports and ownership records, and a review of historical information obtained from regulatory sources, aerial photographs, city directories, and historical maps.

5.1 Historical Site Use Summary

Based on our review of readily available historical information, it appears that a small building was located on-site near the southern boundary of the site as early as 1896. Agricultural use of the site, particularly orchards, was first documented across the site as early as 1938, when the central portion of the site was developed with orchards. Various small, likely residential, buildings were constructed on the site near Boyle Avenue and Slover Avenue from the 1940s. Portions of the site were used for agriculture up until at least 1990. Following the removal of the orchards, the land surrounding the single-family homes has remained undeveloped and used for automotive and equipment storage.

The site was previously utilized as agricultural land and orchards, residual levels of agricultural chemicals, including fertilizers, pesticides, and herbicides, may be present in shallow soil on-site. No information was encountered in the course of this assessment to indicate agricultural-related chemicals, if utilized on-site, were applied in any other manner other than for their intended use. In the event soil export is required during redevelopment, soil testing may be required for disposal or reuse. No RECs in connection with past operations were identified.

5.2 Historical Adjoining Properties Use Summary

The site is located in an area comprised of residential and commercial development. A review of readily available historical information reveals that the surrounding properties were undeveloped land before 1896 until, by the late 1930s, the south, east, and north adjoining properties were developed with orchards. By the late 1940s, all the surrounding properties were developed with agricultural land and residences until the mid-1960s, when the adjoining property to the west was developed with a larger light industrial building. Single-family homes continued to be built in the area while agricultural use decreased until the early 2000s when the adjoining property to the north removed the last of its orchards. Many of the original residences dating from the 1930s and 1940s remain. Areas previously used for agriculture are now used for automotive and equipment storage. No environmental concerns were identified concerning current or past use of adjoining properties. See Section 6.2 for discussion on the regulatory listings for the adjoining properties.

5.3 Previous Environmental Reports

VERTEX was not provided with previous environmental reports for the site.

5.4 Prior Ownership

VERTEX obtained site ownership information from San Bernardino County Recorder's Office. According to the San Bernardino County Recorder, each of the parcels that make up the site are owned by different private individuals. Available ownership information for this property is summarized below.

DEED RECORDS REVIEW					
PROPERTY	GRANTOR	GRANTEE	DOCUMENT TYPE	DOCUMENT NUMBER	DATE
16256 Slover Avenue	Ray Newton, Diana Newton	Leonel Rivas	Deed	2003-0199555	3/27/2003
16264 Slover Avenue	Land Parcel Liquidators Inc.	Dahdouh Tony P & Maria D	Deed	1990-0105763	03/21/1990
16205 Boyle Avenue	Simon Hernandez, Eduardo Hernandez, and Moises Jr. Hernandez	Cecilia Hernandez	Deed	1994-0238527	05/25/1994

Deed records dated before 1990 were unavailable for review. No environmental liens or AULs were noted through a review of ownership records. Prior owners of the site were not available to be interviewed.

5.5 City Directories

VERTEX reviewed historical city directory information for the site and adjoining properties as provided by Environmental Data Resources, Inc. (EDR). Copies of select city directories are included in Appendix C. A summary of listings is presented below.

CITY DIRECTORY REVIEW			
YEAR	SUMMARY (ON-SITE)	SUMMARY (OFF-SITE)	CONCERNS
1955, 1960, 1965, 1970, 1975, 1990	16205 Boyle Ave: Private Residence 16256 Slover Ave: Private Residence 16264 Slover Ave: Private Residence	Private residences 16191 Boyle Ave: General Laminations Inc & Ross and Brown Paper Box Company	None.
1999	16205 Boyle Ave: Private Residence 16256 Slover Ave: Private Residence 16264 Slover Ave: No Listings	Private residences 16191 Boyle Ave: No listings	None.
2003, 2004	16205 Boyle Ave: Private Residence 16256 Slover Ave: Private Residence 16264 Slover Ave: Private Residence	Private residences 16191 Boyle Ave: Private Resident	None.
2009	16205 Boyle Ave: Private Residence 16256 Slover Ave: No Listings 16264 Slover Ave: Private Residence	Private residences 16191 Boyle Ave: No listings	None.
2010, 2014, 2017	16205 Boyle Ave: Private Residence 16256 Slover Ave: Private Residence 16264 Slover Ave: Private Residence	Private residences 16191 Boyle Ave: No listings	None.

See Section 6.2 for a discussion of the regulatory listings associated with the adjoining properties. Concerns were not identified during the review of historical city directories.

5.6 Aerial Photography

VERTEX reviewed aerial photographs including the site and adjoining properties. Copies of the aerial photographs are included in Appendix D. A summary of information obtained from the review is provided in the table below.

AERIAL PHOTOGRAPHY REVIEW			
YEAR	SUMMARY (ON-SITE)	SUMMARY (OFF-SITE)	CONCERNS
1938, 1948	The site has one site small building that appears to be residential. The site is utilized for both orchard and field crop-style agriculture.	The adjoining properties are for orchard and field crop-style agriculture.	None, see below.
1953	The majority of the site remains relatively unchanged. There is one very small building developed behind the existing residential building on the southern portion of the site.	Several small structures that appear to be residential areas developed on adjoining properties to the north, east, and west of the site. A larger building also appears to the west of the site. Agricultural use of the adjoining properties has been reduced but it is still prominent.	None, see below.
1959, 1966, 1975	The site remains relatively unchanged.	The adjoining properties to the north, south, east, and west all undergo some development of small buildings that appear to be residential. Orchards still exist to the north and east of the site.	None, see below.
1985	Orchards are no longer located on the site. The site appears to have multiple residential buildings near Boyle Avenue and Slover Avenue.	Relatively unchanged, except the west and south adjoining properties appear to be undeveloped land and residences, and the north and east adjoining properties are developed with residences and agricultural fields.	None, see below.
1990	Orchards appear to be present on the northern portion of the site. The southern portions remain relatively unchanged.	The adjoining properties remain relatively unchanged.	None, see below.
1994, 2002, 2006, 2009, 2012, 2016	The orchards on the northernmost portion of the site are no longer present. Multiple small buildings are located across all three of the properties. The site is developed with all of its current improvements.	The adjoining properties are developed with all current improvements.	None.

The site previously was utilized as agricultural land and orchards, residual levels of agricultural chemicals, including fertilizers, pesticides, and herbicides, may be present in shallow soil on-site. No information was encountered in the course of this assessment to indicate agricultural-related chemicals, if utilized on-site, were applied in any other manner other than for their intended use. In the event soil export is required during redevelopment, soil testing may be required for disposal or reuse. No RECs in connection with past operations were identified.

5.7 Topographic Maps

VERTEX reviewed historical topographic maps including the site and surrounding areas. Copies of the topographic maps are included in Appendix E. A summary of information obtained from the review is provided in the table below.

TOPOGRAPHIC MAP REVIEW			
YEAR	SUMMARY (ON-SITE)	SUMMARY (OFF-SITE)	CONCERNS
1896, 1898, 1901	The site is depicted with one small building near the southern boundary of the site.	The adjoining properties are depicted as undeveloped land with railroad tracks to the north.	None.
1942	One additional building is depicted to the east of the original building. The entire site is designated as an orchard-style agricultural area.	The adjoining properties to the north, south, east, and west are designated as being used for orchard-style agriculture. There are several new buildings to the north, east, and west.	None, see below.
1943	Land use is not depicted on the map, the buildings that were previously depicted are still present on the site.	Land use is not depicted on the map, the buildings that were previously depicted are still present on the adjoining properties.	None, see below.
1953, 1954	The on-site buildings remain relatively unchanged, however, now only the northernmost portion of the site is designated for agricultural use.	The adjoining properties remain relatively unchanged with significantly less land designated for orchards. The adjoining property to the south is developed with several small buildings.	None, see below.
1967	The southernmost area of the site is now depicted as only having one building on the site. The other parts of the site remain relatively unchanged.	The adjoining properties to the north, south, and east remain relatively unchanged. The adjoining property to the west is now depicted as having one very large building.	None, see below.
1973	The site remains relatively unchanged.	The adjoining properties to the south, east, and west remain relatively unchanged. The adjoining property to the north appears to have a large building under construction.	None, see below.

TOPOGRAPHIC MAP REVIEW			
YEAR	SUMMARY (ON-SITE)	SUMMARY (OFF-SITE)	CONCERNS
1975	None of the buildings previously depicted on the site appear on the map.	The buildings to the north, east, and west no longer have buildings depicted on the map. The adjoining property to the south remains relatively unchanged.	None.
1980	The site is depicted with several small buildings along Slover Avenue and a single building to the north along Boyle Avenue. The northwest portion of the site is depicted as being used for orchard-style agricultural use.	The adjoining properties to the south remain relatively unchanged. The adjoining property to the north is now depicted as having two small buildings and two large buildings with most of the land in between being used for orchards. The areas to the east and west are depicted as having several small buildings each.	None, see below.
2012, 2015, 2018	The map only depicts topographic lines and roads.	The map only depicts topographic lines and roads.	None.

The site previously was utilized as agricultural land and orchards, which means that there is a chance of residual levels of agricultural chemicals, including fertilizers, pesticides, and herbicides, may be present in shallow soil on-site. No information was encountered in the course of this assessment to indicate agricultural-related chemicals, if utilized on-site, were applied in any other manner other than for their intended use. In the event soil export is required during redevelopment, soil testing may be required for disposal or reuse. No RECs in connection with past operations were identified.

5.8 Sanborn Fire Insurance Maps

A search of Sanborn Fire Insurance Maps was requested by VERTEX. According to EDR Sanborn, Inc., maps depicting the site were not available (Appendix F).

6.0 REGULATORY RECORDS REVIEW

VERTEX obtained a regulatory database report as specified in Section 12.0. A review of databases and files from federal, state, and local environmental regulatory agencies was used to identify the use, generation, storage, treatment, or disposal of hazardous materials and chemicals, or release incidents of such materials that might have impacted the site. The databases discussed in the following sections address ASTM requirements. Additional federal and state databases may have also been reviewed, and if so, are listed in the table below. A copy of the database report is included in Appendix G.

VERTEX's review of these listings assessed the potential for soil, groundwater, and/or soil vapor impacts to the site from on-site listings or listings at surrounding facilities, taking into account such factors as the assumed groundwater depth and flow direction, regulatory status, distance from the site, and other information reported by the regulatory database(s) and/or other sources of information.

A summary of the database information is provided in the following table.

REGULATORY DATABASE SUMMARY			
DATABASE	ASTM RADIUS	TARGET PROPERTY	SURROUNDING FACILITIES
National Priorities List (NPL)/Proposed NPL/De-listed NPL	1 Mile	-	-
Superfund Enterprise Management System (SEMS)	½ Mile	-	-

“-“ - No listings found.

In addition to the listed databases, EDR maintains proprietary databases of historical auto stations, dry cleaners, and manufactured gas plants. These databases are based on an aggregation of historical resource data and are not produced by local, state or federal agencies.

As such, VERTEX reviews these databases as a part of the historical resource review and includes information from these listings where appropriate.

The database report includes an orphan summary. This summary identifies facilities that are listed in one of the above-referenced databases or lists but do not include complete or accurate geographic data. Consequently, EDR was unable to map the facilities in relation to the site. VERTEX reviewed the orphan summary prior to inspecting the site and surrounding properties. Orphan properties located within ASTM search distances of the site (if any) were incorporated into VERTEX’s review.

6.1 On-Site Listings

The site was not listed on any of the environmental regulatory databases searched.

6.2 Off-Site Listings

A review of state and federal regulatory records revealed several facilities within ASTM-specified search radii of the site. Of these facilities, eight were reportedly located within 500 feet of the site and are discussed below. The remaining database listings are not considered environmental concerns to the site based on distance, regulatory status, and/or apparent groundwater depth and gradient and are not further discussed.

OFF-SITE STATE AND FEDERAL LISTINGS			
FACILITY	DISTANCE AND DIRECTION/ GRADIENT	REGULATORY STATUS	CONCERNS
Drunk Elephant Aquarius Pool Servicest 16257 Slover Avenue	Adjoining south / downgradient	San Bernardino County Permit: A permit was issued to the business entity occupying the parcel by the County of San Bernardino. The permit expired on October 31, 2005. Based on the regulatory status and lack of reported violations or releases, this listing is not a REC in connection with the site.	None.

OFF-SITE STATE AND FEDERAL LISTINGS			
FACILITY	DISTANCE AND DIRECTION/ GRADIENT	REGULATORY STATUS	CONCERNS
AT&T Corporation 16255 Slover Avenue	Adjoining south/ downgradient	San Bernardino County Permit: A permit was issued to the business entity occupying the parcel by the County of San Bernardino. The permit expired on December 31, 2021. Based on the regulatory status and lack of reported violations or releases, this listing is not a REC in connection with the site.	None.
DX Graphics 10424 Oleander Avenue	~170 feet northeast/ Upgradient	EDR Hist Auto: DX Graphix was listed as being a gasoline service station between 1996 and 1999. No other information including releases or violations was included in the listing. Based on the business name and lack of other listings typical of a service station, this facility was likely not a gasoline service station.	None.
On Point Truck Sales 16310 Slover Avenue	~275 feet east/ crossgradient	RCRA NonGen/NLR: Listed as a non-generator or no longer regulated generator of hazardous waste in 2021. No violations found. Based on the nature of the listing, lack of reported violations or releases and distance and direction, this listing is not a REC in connection with the site.	None.
CIVF-VI-CA1W02, LLC 16262 Boyle Avenue	~285 feet east- northeast/ crossgradient	RCRA NonGen/NLR: Listed as a non-generator or no longer regulated generator of hazardous waste in 2021. No violations found. Based on the nature of the listing, lack of reported violations or releases and distance and direction, this listing is not a REC in connection with the site.	None.
EIP Road Services 16144 Boyle Avenue	~345 feet north- northwest/ upgradient	RCRA NonGen/NLR: Listed as a non-generator or no longer regulated generator of hazardous waste in 2009. No violations found. Based on the nature of the listing, lack of reported violations or releases and distance, this listing is not a REC in connection with the site.	None.
Alvarez Construction Clean-up 16296 Boyle Avenue	~360 feet north- northeast/ upgradient	HAZNET, HWTS, San Bernardino County Permit: Listed as handler of hazardous materials in 2013. Waste oil was removed from the property. A permit was issued to the business entity occupying the parcel by the County of San Bernardino. The permit expired on February 28, 2011. Based on the nature of the listing, lack of reported violations or releases and distance, this listing is not a REC in connection with the site.	None.

OFF-SITE STATE AND FEDERAL LISTINGS			
FACILITY	DISTANCE AND DIRECTION/ GRADIENT	REGULATORY STATUS	CONCERNS
Caliber Collision Center 16320 Slover Avenue	~375 feet east/ crossgradient	RCRA NonGen/NLR, CERS, CERS HAZ WASTE, HWTS, San Bernardino County Permit: Listed as a non-generator or no longer regulated generator of hazardous waste in 2020. No violations found. San Bernardino County issued a hazardous waste generator permit that is set to expire on September 30, 2022. Based on the nature of the listing, lack of reported violations or releases and distance and direction, this listing is not a REC in connection with the site.	None.

Based on distance, apparent gradient relationship, regulatory status, and/or other facility-specific characteristics, no additional RECs in connection with the site were identified with respect to the above-referenced facility.

6.3 Additional Environmental Record Sources

VERTEX contacted local agencies to request information relevant to the site and vicinity. A summary of the agencies contacted, and the information obtained is included in the following table.

LOCAL RESEARCH SUMMARY		
OFFICE	INFORMATION OBTAINED	CONCERNS
San Bernardino County Assessor	VERTEX obtained detailed property and ownership information for the subject site.	None.
San Bernardino County Recorder	VERTEX obtained ownership information for the site. See Section 5.4.	None.
San Bernardino County Building Permits	VERTEX reviewed building permits dated from 2017 to 2021 for grading, building construction and tenant improvements. No records of environmental concern were identified.	None.
California EPA (CalEPA) Regulated Site Portal	VERTEX searched for the site address on the CalEPA Regulated Site Portal. No records were found.	None.
South Coast Air Quality Management District (SCAQMD) FINDS website	VERTEX searched for the site address on the FINDS website. No records were found.	None.

LOCAL RESEARCH SUMMARY		
OFFICE	INFORMATION OBTAINED	CONCERNS
SWRCB Storm Water Multiple Applications & Report Tracking System (SMARTS) website	VERTEX searched for the site address on the SMARTS website. No records were found.	None.
Santa Ana Region Regional Water Quality Control Board (RWQCB) and State Water Resources Control Board (SWRCB) GeoTracker website	VERTEX searched the RWQCB's GeoTracker database for the site and surrounding properties. No records were found for the site. No concerns were identified.	None.
Department of Toxic Substances Control (DTSC) EnviroStor website	VERTEX searched for the site address on the EnviroStor website. No records were found.	None.
California Department of Conservation Geological Energy Management Division (CalGem) Well Finder website	Oil or gas wells were not identified on the site or adjoining properties.	None.

7.0 SITE RECONNAISSANCE

A site visit was conducted by VERTEX representative Ryan O’Sullivan, Environmental Scientist I, on March 17, 2022, between 9:00 a.m. and 11:45 p.m. VERTEX was escorted by Ivan Rivas and Eric Prieto, Tenants and owners of separate properties that make up the site.

During the site visit, the weather was sunny and clear with a temperature of approximately 69° Fahrenheit. The site visit consisted of a walk-through of the site and visual reconnaissance of neighboring properties from curbside. Photographic documentation of the site visit is included in Appendix A.

7.1 Access Restrictions

During the site visit, VERTEX observed the following structures on-site:

- 16205 Boyle Avenue: One story single-story family home, garage and several sheds;
- 16256 Slover Avenue: One story single-story family home, a partially converted garage and sheds;
- 16264 Slover Avenue: One story single-story family home, garage, mobile home and several sheds.

VERTEX notes that the subject property is developed with multiple residential structures comprised of numerous residential units. Therefore, the entire subject property was not reasonably accessible at the time of VERTEX’s site reconnaissance. At the time of our site subject property reconnaissance, the site contact was interviewed to identify areas of potential environmental concern historically and/or currently present at the subject property. Those identified (if any) were observed at the time of the site reconnaissance to the best of our ability.

7.2 Site Observations

Observations of site conditions were made during the site reconnaissance and are summarized in the table below. Issues of concern are discussed in greater detail following the table.

SITE OBSERVATIONS		
DESCRIPTION	REPORTED/ OBSERVED ON-SITE Y/N	COMMENTS
Hazardous Substances and Petroleum Products	Y	Significant quantities of hazardous substances and petroleum products were not observed. VERTEX observed janitorial and retail-sized household cleaners inside and in the backyards of the residential properties. No concerns were identified, and the current on-site operations do not represent an environmental concern.
UST(s)	Y	Not identified during the site visit.
AST(s)	Y	Not identified during the site visit.
Strong, Pungent, or Noxious Odors	N	Not identified during the site visit.
Pools of Liquid	N	Not identified during the site visit.
Drums	Y	One 55-gallon plastic drums filled with water for plants was observed in the front yard of 16205 Boyle Avenue. Two 55-gallon empty drums that once contained oil were located in the back yard of 16205 Boyle Avenue. Two more empty 16-gallon drums were located in behind the home located at 16256 Slover Avenue. These drums were used as recycling and garbage bins and never contained oil at the site. No concerns were identified.
Unidentified Substance Containers	N	Not identified during the site visit.
Polychlorinated Biphenyls (PCB)-containing Equipment	N	One pole-mounted transformer was observed south of 16264 Slover Ave. The transformer did not have "Non-PCB" labelling. The unit is currently owned and maintained by the Southern California Edison (SCE), who would be responsible in the events of leaks.
Utilities (Electricity/ Natural Gas)	Y	Electricity – SCE Natural gas – Southern California Gas Company
Hydraulic Equipment	N	Not identified during the site visit.
Water Supply	Y	Water is supplied to the site by the San Bernardino Valley Municipal Water District. The site was connected at the time of construction.
Wells	N	Not identified during the site visit.
Wastewater	Y	Wastewater discharges from the site are limited to domestic discharges with no indicated process/industrial type discharges. Sewer service is provided by the San Bernardino Valley Municipal Water District. The site was connected at the time of construction. No associated concerns were identified.

SITE OBSERVATIONS		
DESCRIPTION	REPORTED/ OBSERVED ON-SITE Y/N	COMMENTS
Septic	Y	16205 Boyle Avenue has a septic tank that was installed approximately four years ago. The other two properties have sewer service provided by the San Bernardino Valley Municipal Water District.
Stormwater	N	Not identified during the site visit.
Flood Plain	N	Based on the FEMA FIRM Community-Panel Number 06071C8654H, the site is not in the 100- or 500-year flood zones
Pits, Ponds, Lagoons	N	Not observed during the site visit.
Stained Soil, Stained Pavement, Corrosion to Pavement	N	Not observed during the site visit.
Stressed Vegetation	N	Areas of stressed vegetation were not observed on the site.
Solid Waste	Y	Solid waste was limited to residential type waste on both 16256 Slover Avenue and 16264 Slover Avenue. Various automotive, automotive parts and materials were located at 16205 Boyle Avenue. No evidence of release was observed in the area of the stored automotive, automotive parts and materials.
Hazardous Waste Management	N	Not identified during the site visit.
Heating/Cooling	Y	The residential homes were cooled by walled mounted air conditioning units.
Drains, Sumps, Oil/Water Separators/Sand Traps	N	Not identified during the site visit.
Vapor Intrusion	N	As part of this assessment, VERTEX assessed the potential for impacts to the site from potential on- and off-site sources of vapor intrusion. The potential for impacts from off-site properties included a review of current off-site operations (see Section 2.4), a review of historical operations (see Section 5.2), and a review of regulatory database records (see Section 6.2). On- or off-site sources of vapor intrusion were not identified during this assessment.

8.0 DATA GAPS

Significant data gaps that would affect VERTEX's ability to identify RECs at the site were not encountered during this assessment. Deviations or deletions from the scope of work defined by ASTM E 1527-13 were not intentionally made.

Our conclusions regarding the potential environmental impact of nearby, off-site facilities on the site are based on readily available information from the environmental databases and the groundwater flow direction base on local topography. A detailed file review of each facility was beyond the scope of work. VERTEX reviewed regulatory files for the nearby properties available from the GeoTracker website.

9.0 ADDITIONAL SERVICES

The following additional (non-ASTM) services were performed as part of this assessment.

9.1 Asbestos-Containing Materials (ACMs)

Based on the date of construction of the on-site structures (prior to 1975), it is possible that ACMs are present in these site buildings. Accessible suspect ACMs noted included roofing materials, drywall systems, floor coverings and associated mastic. Suspected ACMs were observed to be in poor to good condition.

A comprehensive survey has not been completed. Prior to the planned demolition activities, sampling and analysis of suspect ACMs must be performed. All identified ACMs must be managed in accordance with applicable local, state, and federal regulations.

9.2 Lead-Based Paint (LBP)

Based on the date of construction of the on-site structures (prior to 1975), LBP may be present in these site buildings. Prior to demolition, suspect painted surfaces to be impacted should be sampled and analyzed for lead content or managed as lead-containing in accordance with the EPA Lead Renovation, Repair and Painting Rule and other applicable local, state, and federal regulations.

9.3 Threatened and Endangered Species and Wetlands

According to the United States Department of Fish and Wildlife Services (USFWS) Information for Planning and Consultation (IPaC), there are 13 endangered and threatened species listed (see attached reports Included in Appendix B for more details) potentially located in the vicinity of the site, including the San Bernardino Kangaroo Rat, Coastal California Gnatcatcher, Least Bell's Vireo,

Southwestern Willow Flycatcher, Monarch Butterfly, Santa Ana Sucker, San Diego Ambrosia, and, Santa Ana River Woolly-Star. According to the USFWS Critical Habitat Mapper and the IPaC report, there are no critical habitats located in the site vicinity. Based on the current conditions of the property, it is unlikely any threatened and endangered species are located on the property.

9.4 Wetlands

VERTEX reviewed historical aerial photographs, topographic maps, and the USFWS National Wetlands Inventory (NWI) Map. According to the NWI Map, the site does not have any wetlands classified by NWI. Based on this review, it does not appear wetlands will be impacted by the planned development.

10.0 EP CERTIFICATION AND VIABILITY DATES

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 C.F.R. 312. I, have the specific qualifications based on education, training, and experience to assess a property of the nature, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

The VERTEX Companies, Inc.

Mark Jirgal, PG
Division Manager

This Phase I ESA is assumed to be viable within 180 days of the components noted below:

COMPONENT	DATE
Interview with owner, operator, and/or occupant	03/17/2022
Search for environmental liens and AULs	VERTEX notes that the search for environmental liens and AULs is a User responsibility.
Date of regulatory database report	03/17/2022
Site reconnaissance	03/17/2022
EP Declaration	3/28/2022

11.0 SCOPE AND LIMITATIONS

11.1 Purpose

The primary purpose of this assessment is to identify, to the extent feasible pursuant to the processes prescribed in ASTM E 1527-13 and E 1527-21, RECs in connection with the site. As defined in ASTM E 1527-13, a REC is “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.” It does not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A “historical REC” is defined in ASTM E 1527-13 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” ASTM E 1527-13 defines the term “controlled REC” as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

In conducting this assessment, VERTEX followed ASTM E 1527-13, as well as the U.S. Environmental Protection Agency’s All Appropriate Inquiries (AAI) Final Rule of November 1, 2005 as amended December 30, 2013. There were no exceptions to or deletions from this

practice, as described in Section 8.0 of the report. ASTM defines good commercial and customary practice for conducting an ESA of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601) and petroleum products. This practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. The practice constitutes “all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices” as defined at 42 U.S.C. 9601(35)(B).

As part of ASTM E 1527-13, Phase I ESAs must be conducted by or under the supervision of a qualified Environmental Professional. The AAI Final Rule defines an Environmental Professional as someone who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors of the rule. We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 C.F.R. 312.10. We have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the site. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

11.2 Detailed Scope-of-Services

As part of this Phase I ESA, and in accordance with the provisions of ASTM E 1527-13, VERTEX performed a visual reconnaissance of the site, noted use of adjoining properties, and conducted historical and regulatory records research. The following provides a more detailed description of the scope of services:

- Visual assessment of the site building(s), if present, and grounds to identify potential for on-site petroleum or hazardous material release(s).
- Visual assessment and categorization of the use of abutting and adjoining properties as potential off-site sources of petroleum or hazardous material contamination to the site.
- Review of readily available state and federal regulatory records related to on-site activities and to potential off-site activities to identify sources of petroleum or hazardous material contamination to the site.
- Review of readily available historical information to assess for potential on-site and off-site sources of petroleum or hazardous material contamination to the site.
- Review of readily available local records related to historical site ownership, usage, and development. This includes obtaining information from local environmental authorities to identify complaints, violations, citations, inspections, environmental liens, AULs, or institutional and engineering controls related to the site.
- Review of readily available documents and other resources for the site and site vicinity to evaluate current and historical development and renovation activities.
- Visual assessment for suspect Polychlorinated Biphenyl (PCB) containing equipment, e.g., transformers, elevators. Please note, this scope of work does not include an evaluation for or testing of suspect PCBs in building materials such as caulking, mastic/adhesives, oil-based paints, coatings and sealants. Currently, there are no regulatory requirements to test in-place building materials for the presence of PCBs. Although testing is not required for in place materials, owners are required to know the content of the waste streams that they generate and potentially sign waste profiles prior to disposal facility acceptance. Therefore, if

renovation or demolition activities are to be conducted at the site that will result in the generation of demolition debris, a contractor or waste disposal facility may request certification of knowledge of the waste stream or testing to determine if the material(s) contain PCBs for proper handling and disposal purposes.

- Visual assessment of the accessible areas of the site and review of readily available public records to assess the presence or absence of the following ASTM E 1527-13 non-scope considerations: ACMs, LBP, threatened and endangered species, and wetlands.
- Preparation of a Phase I ESA report.

11.3 Significant Assumptions

Information obtained from the Client, the Client's representative, site representatives, individuals interviewed, and prior environmental reports is considered to be accurate unless VERTEX's reasonable inquiries clearly revealed otherwise.

Conditions observed were considered to be representative of areas that were not observed unless otherwise indicated.

The primary direction of groundwater flow was assumed based on reported groundwater flow at adjoining properties.

VERTEX reviewed reasonably ascertainable public records with respect to past operations and ownership of the site in an attempt to determine past site usage. VERTEX is not a professional title insurance firm and makes no guarantee, express or implied, that the listing reviewed represented a comprehensive delineation of past site ownership or tenancy for legal purposes. The accuracy and completeness of information maintained in public records by public agencies

or other entities is assumed to be sufficient for the purposes of this Phase I ESA, and independent verification of its validity is beyond the scope of this investigation.

11.4 Limitations and Exceptions

Our professional services have been performed, our findings obtained, and our recommendations prepared in accordance with customary principles and practices in the fields of environmental science and engineering. The findings within this ESA utilized information that was practically reviewable per ASTM Practice E 1527-13, meaning that only relevant data relating to the subject site has been incorporated into the findings, disregarding extraordinary analysis of irrelevant data. The investigation conducted for this ESA was limited to data that were reasonably ascertainable, meaning that the information was publicly available, obtainable within the cost and time constraints under the scope of services for this project, and practically available. VERTEX is not responsible for the independent conclusions, opinions, or recommendations made by others based on the records review, site inspection, field exploration, and laboratory test data presented in this report.

It should be noted that all surficial environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. Subsurface conditions were not field-investigated as part of this study and may differ from the conditions implied by the surficial observations. Additionally, the passage of time may result in a change in the environmental characteristics at this site and surrounding properties. VERTEX does not warrant against future operations or conditions, or against operations or conditions present of a type or at a location not investigated. VERTEX does not assume responsibility for other environmental issues that may be associated with the subject site.

This study is not intended to assess or otherwise determine if soil contamination, waste emplacement, or groundwater contamination exists. These data are accessible only by sampling

of subsurface material and groundwater through the completion of soil borings and the installation of monitoring wells and the chemical analyses of soil and groundwater samples. The scope of work, determined by the client, did not include these activities.

In view of the rapidly changing status of environmental laws, regulations and guidelines, VERTEX cannot be responsible for changes in laws, regulations, or guidelines that occur after the study has been completed and that may affect the subject site.

It must be noted that no investigation can absolutely rule out the existence of hazardous materials at a given site. This assessment has been based upon prior site history and observable conditions. Existing hazardous materials and contaminants can escape detection using these methods.

There were no significant data gaps or accessibility limitations that would affect VERTEX's ability to identify RECs at the sites, as discussed in Section 8.0.

While VERTEX may comment on environmental compliance matters that fall under the scope of this assessment, this study does not constitute a regulatory compliance audit, and does not document compliance with applicable state, federal, or local regulations.

11.5 Special Terms and Conditions

No special Terms and Conditions were agreed upon between the User and the Environmental Professional.

11.6 User Reliance

This report is for the exclusive use of CHIPT Acquisitions, L.L.C. and its affiliates, successors and assigns, as well as its lenders. No other party shall have the right to rely on any service provided by VERTEX without prior written consent. Use of this report by any other party shall be at such party's sole risk.

APPENDIX B:
RELEVANT DOCUMENTS

User Questionnaire

As "User" of the Phase I Environmental Site Assessment, VERTEX requests you complete this "User Questionnaire." The "User" should provide responses to all of the questions to the extent feasible; however, the "User" is not required to find out information that is not known before returning the questionnaire to VERTEX.

Date: 3/10/22

Site Name: Citrus / Boyle

Site Location: Citrus + Boyle Ave, Fontana, CA

Your Name: Chance Furr

Your Title: Vice President

Relationship to Site (Owner, Occupant, Purchaser, Other): Purchaser

Length of Time Associated with Site: 6 months

Please review and complete this questionnaire which will assist VERTEX in completing our site assessment. If sufficient space is not provided, please complete your response on a separate sheet of paper and attach it to this questionnaire.

Are there any previous environmental reports that were prepared for the subject property? (If yes, please provide).

No Yes

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

No Yes (If yes, please describe)

Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

No Yes (If yes, please describe)

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No Yes (If yes, please describe)

Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property? If you conclude [or believe] that there is a difference [or that it may not reflect fair market value] have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

No Yes (If yes, please describe)

Purchase Price is fair market value

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- **Do you know** [or have any information regarding] **the past uses of the subject property?**

No Yes (If yes, describe)

- **Do you know of** [or have any information regarding any] **specific chemicals that are present or once were present at the subject property?** No Yes (If yes, describe)

- **Do you know of** [or have information regarding] **spills or other chemical releases that have** [or may have] **taken place at the subject property?** No Yes (If yes, describe)

- **Do you know of** [or have any information regarding] **any environmental cleanups that have taken place at the subject property?** No Yes (If yes, describe)

- [Do you know of or have any information regarding any fill material that has been brought to the property?] No Yes (If yes, describe)

- [Are there any wastewater treatment operations conducted at the site?] No Yes (If yes, describe)

As the user of this ESA, based on your knowledge and experience related to the subject property, are there obvious indicators that point to the presence or likely presence of contamination at the subject property? No Yes (If yes, please describe)

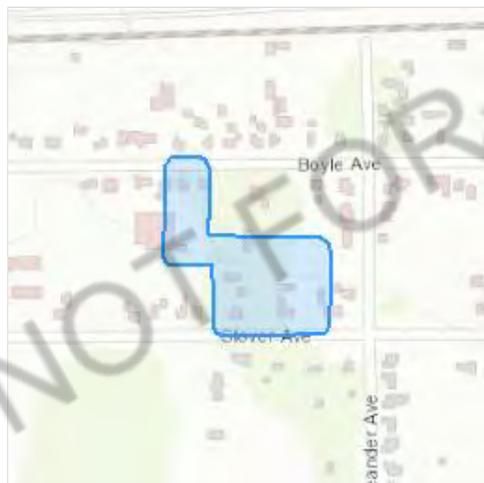

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

Location

San Bernardino County, California

Local office

Carlsbad Fish And Wildlife Office

☎ (760) 431-9440

📅 (760) 431-5901

2177 Salk Avenue - Suite 250

Carlsbad, CA 92008-7385

<http://www.fws.gov/carlsbad/>

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species¹ and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries²).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

1. Species listed under the [Endangered Species Act](#) are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information. IPaC only shows species that are regulated by USFWS (see FAQ).
2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Mammals

NAME	STATUS
<p>San Bernardino Merriam's Kangaroo Rat <i>Dipodomys merriami parvus</i></p> <p>Wherever found</p> <p>There is final critical habitat for this species. The location of the critical habitat is not available.</p> <p>https://ecos.fws.gov/ecp/species/2060</p>	Endangered

Birds

NAME	STATUS
<p>Coastal California Gnatcatcher <i>Polioptila californica californica</i></p> <p>Wherever found</p> <p>There is final critical habitat for this species. The location of the critical habitat is not available.</p> <p>https://ecos.fws.gov/ecp/species/8178</p>	Threatened
<p>Least Bell's Vireo <i>Vireo bellii pusillus</i></p> <p>Wherever found</p> <p>There is final critical habitat for this species. The location of the critical habitat is not available.</p> <p>https://ecos.fws.gov/ecp/species/5945</p>	Endangered
<p>Southwestern Willow Flycatcher <i>Empidonax traillii extimus</i></p> <p>Wherever found</p> <p>There is final critical habitat for this species. The location of the critical habitat is not available.</p> <p>https://ecos.fws.gov/ecp/species/6749</p>	Endangered

Fishes

NAME	STATUS
<p>Santa Ana Sucker <i>Catostomus santaanae</i></p> <p>There is final critical habitat for this species. The location of the critical habitat is not available.</p> <p>https://ecos.fws.gov/ecp/species/3785</p>	Threatened

Insects

NAME	STATUS
<p>Monarch Butterfly <i>Danaus plexippus</i></p> <p>Wherever found</p> <p>No critical habitat has been designated for this species.</p> <p>https://ecos.fws.gov/ecp/species/9743</p>	Candidate

Flowering Plants

NAME	STATUS
<p>San Diego Ambrosia <i>Ambrosia pumila</i> Wherever found There is final critical habitat for this species. The location of the critical habitat is not available. https://ecos.fws.gov/ecp/species/8287</p>	Endangered
<p>Santa Ana River Woolly-star <i>Eriastrum densifolium</i> ssp. <i>sanctorum</i> Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/6575</p>	Endangered

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

THERE ARE NO CRITICAL HABITATS AT THIS LOCATION.

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act¹ and the Bald and Golden Eagle Protection Act².

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described [below](#).

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern <http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php>
- Measures for avoiding and minimizing impacts to birds <http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php>
- Nationwide conservation measures for birds <http://www.fws.gov/migratorybirds/pdf/management/nationwidestandardconservationmeasures.pdf>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern](#) (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the [FAQ below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the [E-bird data mapping tool](#) (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NAME

BREEDING SEASON (IF A BREEDING SEASON IS INDICATED FOR A BIRD ON YOUR LIST, THE BIRD MAY BREED IN YOUR PROJECT AREA SOMETIME WITHIN THE TIMEFRAME SPECIFIED, WHICH IS A VERY LIBERAL ESTIMATE OF THE DATES INSIDE WHICH THE BIRD BREEDS ACROSS ITS ENTIRE RANGE. "BREEDS ELSEWHERE" INDICATES THAT THE BIRD DOES NOT LIKELY BREED IN YOUR PROJECT AREA.)

Allen's Hummingbird *Selasphorus sasin*

Breeds Feb 1 to Jul 15

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/9637>

Common Yellowthroat *Geothlypis trichas sinuosa*

Breeds May 20 to Jul 31

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

<https://ecos.fws.gov/ecp/species/2084>

Nuttall's Woodpecker *Picoides nuttallii*

Breeds Apr 1 to Jul 20

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

<https://ecos.fws.gov/ecp/species/9410>

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

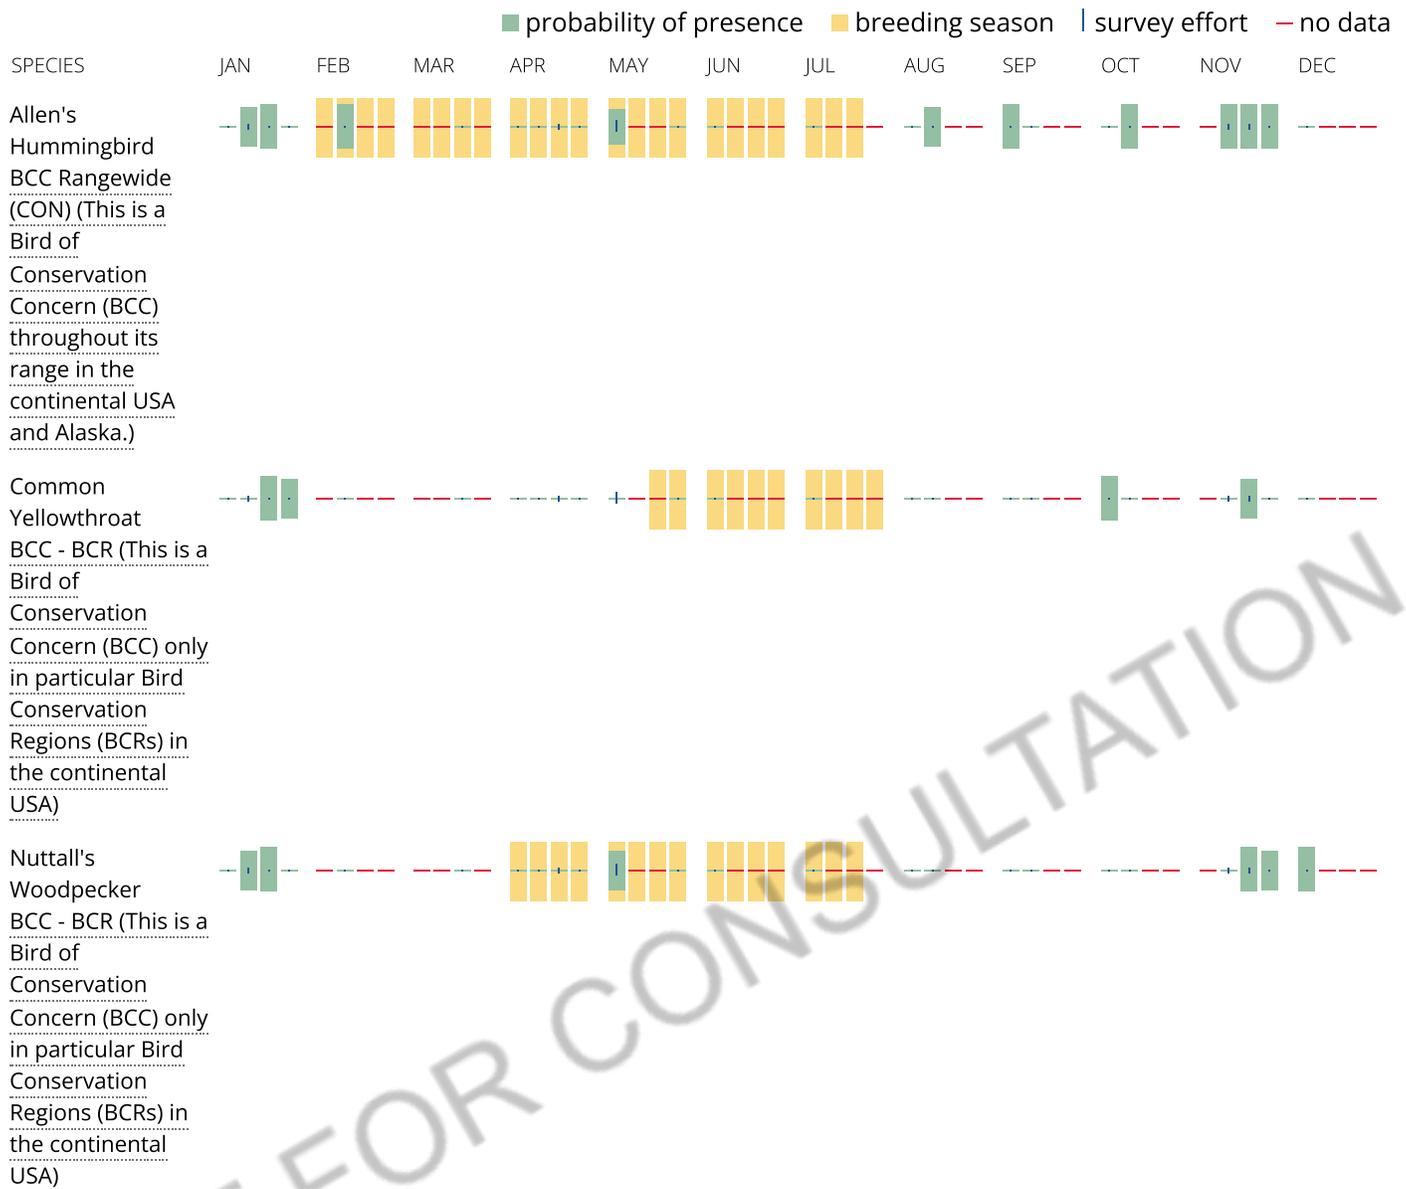

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (—)

A week is marked as having no data if there were no survey events for that week.

Survey Timeframe

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project

intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [AKN Phenology Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: [The Cornell Lab of Ornithology All About Birds Bird Guide](#), or (if you are unsuccessful in locating the bird of interest there), the [Cornell Lab of Ornithology Neotropical Birds guide](#). If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS AT THIS LOCATION.

Fish hatcheries

THERE ARE NO FISH HATCHERIES AT THIS LOCATION.

Wetlands in the National Wetlands Inventory

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

WETLAND INFORMATION IS NOT AVAILABLE AT THIS TIME

This can happen when the National Wetlands Inventory (NWI) map service is unavailable, or for very large projects that intersect many wetland areas. Try again, or visit the [NWI map](#) to view wetlands at this location.

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by The Vertex Companies, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # C95B-450C-A0E2

Project 77695

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: C95B-450C-A0E2

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

The Vertex Companies, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

METAL RESOURCES INC EPA ID:: CAR000256115	16477 SLOVER AVE	E 1/8 - 1/4 (0.249 mi.)	J44	160

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 12 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 93153
Site Name: HARSIMRAN, INC. (dba: ARCO AM PM)
Violation Date: 04-18-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 04/16/2020. OBSERVATION: The spill bucket for the 87 tank could not hold 5 gallons of liquid for 1 hour when tested on-site. CORRECTIVE ACTION: Repair or replace the spill bucket and submit a work order and passing test results to this agency within 30 days.

Violation Date: 04-26-2018
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees

Site ID: 383878
Site Name: 7-ELEVEN INC #33245
Violation Date: 01-22-2019
Citation: 23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)

Violation Description: Failure to have an approved UST Monitoring Plan.
Violation Notes: Returned to compliance on 01/31/2019. CERS elements for Inventory and Plans last updated 1/18/18, requires annual update.

Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 383878
Site Name: 7-ELEVEN INC #33245
Violation Date: 01-11-2018
Citation: HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286

Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 01/24/2018. FACILITY MADE CORRECTIONS TO 01/24/18 CERS SUBMITTAL, CLOSE OUT VIOLATION PER CHARLES BANTUM-PREYES UST INSTALLATION DATE OF 11/1/2001 IS INCORRECT; UPDATE THE DATE OF INSTALLATION FOR THE FOUR UST'S TO 10/16/1995.

Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 383878
Site Name: 7-ELEVEN INC #33245
Violation Date: 01-12-2016
Citation: HSC 6.7 25299 - California Health and Safety Code, Chapter 6.7, Section(s) 25299

Violation Description: Failure to comply with one or more of the operating permit conditions.
Violation Notes: Returned to compliance on 01/25/2016. A TANK VOLUME DISCREPANCY WITHIN THE VEEDER ROOT PROGRAMMING WAS NOTICED WHILE REVIEWING THE SET-UP. THE TANK PROFILE IDENTIFIES EACH OF THE 10,000-GALLON TANKS AS HAVING A CAPACITY OF 9,971-GALLONS; HOWEVER, THE "MAX OR LABEL VOLUME" WITHIN THE SAME SET-UP SHOWS THE TANKS TO HAVE A TOTAL CAPACITY OF 10,081-GALLONS. THE 110-GALLON INCREASE IN THE MAX VOLUME WILL ALLOW THE TANKS TO BE OVERFILLED BY APPROXIMATELY 98-GALLONS BEFORE ACTIVATING THE 90% OVERFILL LEVEL (ASSUMING THE 9,971-GALLON NUMBER IS ACCURATE). REQUIREMENT: IMMEDIATELY DETERMINE THE ACTUAL LISTED CAPACITY OF THE FOUR JOOR TANKS AND MAKE THE PROPER PROGRAMMING ADJUSTMENTS AS NECESSARY. THE OVERFILL DETECTION EQUIPMENT MUST BE ABLE TO NOTIFY THE RESPONSIBLE PARTIES IN THE EVENT OF AN OVERFILL AT THE ACTUAL OVERFILL LIMITS. SUBMIT A COPY OF THE CORRECTED PROGRAMMING TO JKOOYMAN@SBCFIRE.ORG UPON COMPLETION.

Violation Date: 01-14-2014
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure of the overflow prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes: Returned to compliance on 02/04/2014. VISUAL ALARM (LIGHT) ON EXTERNAL ANNUCIATOR NOT FUNCTIONAL - CORRECT. NO PERMIT OR RE-INPSECTION REQUIRED.

Violation Description: Failure of sensor to be located in the proper position/location.
Violation Notes: Returned to compliance on 01/12/2016. THE 208 SENSOR LOCATED WITHIN THE 91 FILL SUMP (L8) WAS LIFTED FROM IT'S SLEEVE HOUSING AND POSITIONED WELL ABOVE THE FLOOR OF THE SUMP (PHOTOS TAKEN) AT THE TIME OF INSPECTION. ALTHOUGH THE ALARM HISTORY DID NOT IDENTIFY ANY RECENT ALARMS FOR THIS LOCATION, THE SUMP DID CONTAIN APPROXIMATELY 2-3 INCHES OF LIQUID ON THE SENSOR SIDE. TAMPERING WITH THE MONITORING EQUIPMENT TO AVOID ALARMS AND TURBINE SHUTDOWN IS PROHIBITED. ALL ALARM CONDITIONS MUST BE ADDRESSED AND LOGGED APPROPRIATELY. ANY CONTINUED EVIDENCE OF SENSOR TAMPERING (FACILITY DOES UTILIZE A VEEDER ROOT MAINTENANCE TRACKER TO PREVENT UNAUTHORIZED MANIPULATION OF PROGRAMMING, I.E., "X-ING OUT SENSORS"), WILL SUBJECT THE OWNER/OPERATOR TO FORMAL ENFORCEMENT. REQUIREMENT: THE LIQUID WAS REMOVED AND THE SENSOR WAS REPOSITIONED INTO THE LOW POINT OF THE SUMP BY THE TECHNICIAN. VIOLATION CORRECTED WHILE ON-SITE.
Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 383878
Site Name: 7-ELEVEN INC #33245
Violation Date: 01-11-2018
Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 01/31/2019. CERTIFICATE OF FINANCIAL RESPONSIBILITY (CFR) STATEMENT HAS AN EXPIRED DATE. SUBMIT AN UPDATE "CFR" TO THE CERS WEB SITE.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: The RP's have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. DHS will undertake appropriate cost recovery actions. This site has not been identified as an NPL site, nor does it appear to be likely NPL candidate in the future. However, federal funds were made available for the interim measures completed in 1986.

Site Description: This facility formerly recovered precious metals from photographic film using a cyanide and acid leaching process.

Hazardous Waste Desc: Hazardous substances were stored in various decomposing containers and tanks that resulted in soil contamination. The contaminants include cyanide solids and liquids, acids, metallic materials and volatile organic compounds.

Threat To Public Health & Env: There is threat of human exposure to toxic air emissions and contact with surface water runoff. There is a potential for contamination of the ground water which is used extensively as a domestic supply in the area. There is no known exposure at thistime.

Site Activity Status: Extensive soil contamination at the facility was discovered in 1985. In 1986, DHS and EPA initiated interim remedial measures consisting of drum repacking and provision of guard service. DHS directed Western States Refining to mitigate the contamination in an October, 1987 order. The company refused and filed for bankruptcy. DHS found Western States Refining in noncompliance with the order in December, 1987. DHS initiated RI/FS activities in October, 1988.

Completed Date: 06/30/1993
Comments: Approximately 65k gal of cyanide solution treated. Removed approximately 14 110-barrel vacuum trucks of cyanide rinsate. Western States Refining (WSR) was a former precious metals recovery facility in Fontana, San Bernardino, CA. A two story warehouse exists in the northwest quadrant of the site. The warehouse included several tanks and vats which formerly contained cyanide, several storage sheds and a former drum staging area. Currently the site is abandoned. The Veta Grande Companies, filed for bankruptcy and have reorganized under the name "Forum Regroup. WSR began a silver and gold recovery operation primarily from x-ray film, with a small recovery percentage coming from electronic circuit boards. In the process, cyanide solution was used to strip gold and silver from x-ray film. Hazardous substances previously stored, handled and disposed at the site include cyanide, oxidizers, heavy metals, flammable liquids, ammonium hydroxide and organic solvents.

Completed Date: 06/30/1993
Comments: Approximately 65k gal of cyanide solution treated. Removed approximately 14 110-barrel vacuum trucks of cyanide rinsate. Western States Refining (WSR) was a former precious metals recovery facility in Fontana, San Bernardino, CA. A two story warehouse exists in the northwest quadrant of the site. The warehouse included several tanks and vats which formerly contained cyanide, several storage sheds and a former drum staging area. Currently the site is abandoned. The Veta Grande Companies, filed for bankruptcy and have reorganized under the name "Forum Regroup. WSR began a silver and gold recovery operation primarily from x-ray film, with a small recovery percentage coming from electronic circuit boards. In the process, cyanide solution was used to strip gold and silver from x-ray film. Hazardous substances previously stored, handled and disposed at the site include cyanide, oxidizers, heavy metals, flammable liquids, ammonium hydroxide and organic solvents.

Background Info: Western States Refining (WSR) was a metal recovery facility that operated from 1979 to 1984. Historical information concerning previous operations at the site are incomplete. WSR recovered precious metals from x-ray film and electronic circuit boards. A cyanide solution, among other chemicals, was used to strip the metals.

In 1985, the Department and the San Bernardino County Department of Health conducted a joint inspection of the site and identified hundreds of drums and containers in deteriorated condition. These drums and containers contained cyanide, sulfides, heavy metals, caustics, and acids. Six large storage tanks containing cyanides and heavy metals were observed leaking onto the cracked berm area and into a nearby trench. Extensive soil contamination was also discovered.

In 1986, EPA and the U.S. Coast Guard completed an emergency removal of the containers and residual cyanide contamination. Approximately 600 drums and containers were removed. The six leaking storage tanks were removed and two other 35,000 gallon storage tanks were emptied but not removed.

In 1987, DHS issued a remedial action order to WSR directing them to cleanup the facility. The company refused and filed for bankruptcy. DHS found WSR in noncompliance with the order and initiated legal action. A settlement agreement was reached in 1989. Under the settlement, the RPs will pay up to \$750,000 towards cleanup costs. Any other costs incurred by the Department will be recovered from the proceeds of the sale of the property once the property is certified.

Phase I and Phase II RIs have been completed. Phase I confirm cyanide, asbestos, and low level heavy metal contamination.

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2022	Source: EPA
Date Data Arrived at EDR: 02/03/2022	Telephone: N/A

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021
Date Data Arrived at EDR: 06/24/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Next Scheduled EDR Contact: 05/09/2022

Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation: 1079 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 12015969 FONTANA, CA
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

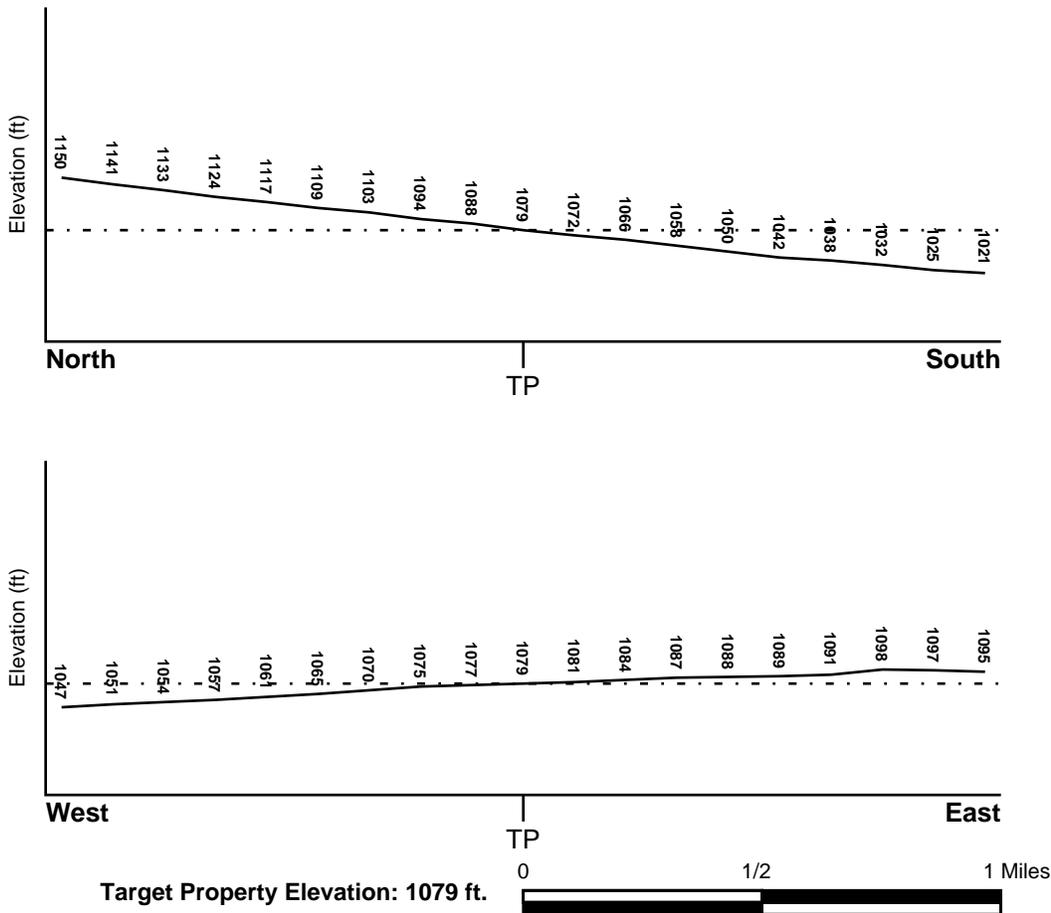

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
FONTANA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Mark Jirgal, PG | Division Manager

EMAIL mjirgal@vertexeng.com | **PHONE** 949.407.8459

BIOGRAPHY

Mr. Jirgal is a Division Manager for VERTEX located in Irvine, California. Mr. Jirgal has 30 years of experience in the Environmental Consulting industry conducting and directing thousands of Phase I ESAs, Phase II site investigations, and remediation projects throughout the United States. Mr. Jirgal has performed or directed assessment activities on a wide variety of properties including vacant land, agricultural land, residential and commercial developments, and industrial facilities. Mr. Jirgal has provided litigation support for both local and international law firms including cases involving co-mingled plumes, Potentially Responsible Party (PRP) identification and remediation cost allocation. Mr. Jirgal's litigation support experience includes gasoline service stations, commercial office properties, aerospace facilities, waste oil re-refining and oil packaging facilities.

Prior to joining VERTEX, Mr. Jirgal held positions ranging from Staff Geologist to Project Manager and Technical Coordinator at environmental consulting firms located in Southern California. Mr. Jirgal was employed as a Senior Consultant by KPMG, LLP in their Forensic and Litigation Services department providing litigation support for international law firms. Mr. Jirgal's clients have included financial and insurance institutions, real estate developers, real estate investment trusts, integrated oil companies, oil field service companies, energy providers, plating facilities and various additional commercial and industrial clients.

Mr. Jirgal has proven project management experience and has overseen hundreds of hydrogeological investigations utilizing a wide variety of investigative techniques including hollow-stem auger, dual-tube percussion, mud-rotary, direct-push, cone-penetrometer and sonic drilling techniques to investigate properties impacted by petroleum hydrocarbons, chlorinated solvents and perfluoroalkyl substances. In addition to subsurface hydrogeological investigations, Mr. Jirgal has also designed and conducted indoor air and soil gas surveys.

Ryan O'Sullivan | Environmental Scientist I

EMAIL rosullivan@vertexeng.com | **PHONE** 949.407.8459

BIOGRAPHY

Ryan O'Sullivan joined The Vertex Companies in November 2021 as an Environmental Scientist working primarily in the southwestern United States. He is involved in a variety of different projects including environmental remediation field work and report writing and environmental due diligence.

As an Environmental Science and Resource Management B.S. graduate from California State University, Channel Islands. With over a combined 5 years of educational and field experience in both environmental and biological backgrounds. Experience includes working on projects surrounding land management, GIS, endangered species monitoring, construction monitoring, and coastal management practices. Ryan is an Environmental Scientist conducting Phase 1 Site Assessments (ESAs) including the review of regulatory database reports, site inspections and recognizing environmental conditions.

Stephen McCarthy | Vice President, National Technical Lead

EMAIL smccarthy@vertexeng.com | **PHONE** 781.952.6000

BIOGRAPHY

Mr. McCarthy has over 33 years of experience in Environmental Consulting. As the National Technical Lead for the environmental due diligence practice at VERTEX, Mr. McCarthy is responsible for the development and implementation of environmental due diligence practices for the company. He has routinely managed several hundred environmental assessment due diligence projects per year for financial, commercial, institutional and industrial clients. These projects included Phase I and Phase II Environmental Site Assessments, asbestos surveys and abatement, mold assessments, removal of underground storage tanks and site investigations.

As the National Technical Lead, Mr. McCarthy is responsible for document review, quality control and client management for environmental due diligence investigations conducted throughout the United States. Mr. McCarthy is also responsible for managing the set up and timely completion of due diligence services including Phase I ESAs, planning and management of Phase II subsurface investigations and remediation projects. Specifically, this work includes observation of properties and operations, historic site research, delineation of contaminated media, coordinating UST removals, oversight of excavation activities, development of remediation strategies, risk evaluations and serving as the liaison for clients.
