Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Lead Agency:	County of Fresno	
Contact Name	Ejaz Ahmad	
Email: eahmad	d@fresnocountyca.gov	Phone Number: (559) 600-4204
Project Location	n: Fresno	Fresno
	City	County

Project Description (Proposed actions, location, and/or consequences).

Allow the construction and operation of a landfill gas conditioning system with two 1,980 kW power generators for treating raw landfill gas to a pipeline quality gas on an approximately 43,264 square-foot portion of a 39.55-acre Fresno County landfill site in the AE-20 (Exclusive Agricultural; 20-acre minimum parcel size) Zone District (APN: 020-052-9ST) (18950 W. American Avenue) allow connecting the system to the proposed 8-mile subsurface biomethane feeder pipeline to run through American Avenue road right-of-way (utility easement) via a franchise agreement and through State Route 145 (S. Madera Avenue) right-of-way and to terminate at a PG&E transmission pipeline interconnection Receipt Point metering facility to be constructed on an approximately 10,000 square feet portion of a 313.6-acre parcel (APN 030-070-25S) in the AE-20 (Exclusive Agricultural; 20-acre minimum parcel size) Zone District. The landfill site is located on the north side of American Avenue approximately 1,925 feet west of its intersection with Humboldt Avenue and 3.8 miles southwest of the City of Kerman. The Receipt Point facility site is located on the northwest corner of Manning Avenue and State Route 145 (S. Madera Avenue) approximately seven miles south of the City of Kerman (Sup. Dist. 1) (APNs: 020-052-9ST, 030-070-25S).

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

AESTHETICS, D. The proposed project may result in the creation of new sources of light and glare in the area. The proposed mitigation requiring all lighting to be hooded and directed away from adjacent properties and Public right-of-ways would result in a less than significant impact.

CULTURAL RESOURCES, A. B. C. The project may have an impact on cultural resources. The proposed mitigation measure requiring all work to be halted and an archeologist be called in to evaluate the findings and make any necessary mitigation recommendations, would result in a less than significant impact.
