Project Title: Tahoe City Public Utility District Madden Creek Water System Infrastructure Improvement Project

Project Location – Specific: 39° 5'10.93"N and 120° 9'38.64"W

Project Location - City: Homewood, CA

Project Location - County: Placer County

Description of Nature, Purpose, and Beneficiaries of Project:

Tahoe City Public Utility District is proposing the Madden Creek Water System Infrastructure Improvement Project to update the recently acquired Madden Creek Water System, which serves the community of Homewood along the west shore of Lake Tahoe. The system provides 175 service connections for residential, commercial, and landscape irrigation customers as well as fire protection services. Project work includes new and replacement water mains, new fire hydrants, new service meters, and water service lateral replacements. The existing water system consists of a supply source (one groundwater well), approximately 3.5 miles of water distribution mains, water storage (one tank), and approximately 175 service connections, most of which are unmetered. The project improvements include water main replacement and water service improvements that would help to mitigate deficiencies, increase system reliability, and address condition related issues. The Madden Creek Water Master Plan identified individual components to improve the state and condition of the current system, as follows: water meter installations to decrease per connection water demand, replacing pipelines with diameters less than 6 inches with 8-inch pipelines to increase capacity and reliability, replacing existing transmission mains with 12-inch diameter pipes to reduce head loss through the system during a fire flow event and directly increase the capacity, and installing new 8-inch pipelines to loop dead-end water mains and reduce system losses.

Name of Public Agency Approving Project: Tahoe City Public Utility District

Name of Person or Agency Carrying Out Project: Tahoe City Public Utility District

Exempt Status: Categorical Exemption. State CEQA Guidelines Section 15304 (Class 4)

Reasons why project is exempt:

Based on independent review of the proposed project and the evidence summarized below, the TCPUD Madden Creek Water System Infrastructure Improvement Project is categorically exempt from the provisions of CEQA pursuant to Class 4–Minor Alterations to Land categorical exemption as set forth in State CEQA Guidelines Section 15304. Class 4 consists of minor public or private alterations in the condition of land, water, and/or vegetation. The project would involve minor trenching and backfilling in roads where the surface would be restored and would involve minimal, if any, removal of vegetation, and would not remove healthy, mature, scenic trees. Further, none of the exceptions to the Class 4 categorical exemption apply to the project.

Lead Agency

Contact Person: Charley Miller

Area Code/Telephone/Extension: (530) 580-6323

If filed by applicant: **N/A**

1. Attach certified document of exemption finding.
2. Has a Notice of Exemption been filed by the public agency approving the project: Yes No

Signature:  Date: 2-16-24 Title: Grants Program Administrator
District Engineer

Signed by Lead Agency: Yes

Signed by Applicant: No
