EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

**Search Results:****Coordinates:**

<b>P.O.#</b>	336488	<b>Latitude:</b>	34.06793 34° 4' 5" North
<b>Project:</b>	479224	<b>Longitude:</b>	-118.249773 -118° 14' 59" West
		<b>UTM Zone:</b>	Zone 11 North

## REGULATORY AGENCY RECORDS

**The Assessor's Office is currently experiencing significant delays on Prop. 58 and Prop. 19 claims.**

We are committed to the fair and equitable treatment for all taxpayers and are proactively contacting applicants before any determinative deadline approaches. Prop. 19 and the corresponding implementation deadlines provided significant operational and administrative challenges leading to processing delays. We apologize for the inconvenience many homeowners are facing. As we work to streamline Prop. 19 claims, many questions can be answered [here](#) or by [email](#).

Assessor Offices will be open to the public from 8:00am - 5:00pm, except for the West District which remains closed until further notice. Public services for the West District are temporarily moved to the Hall of Administration, Room 225. *Room 183-19 (mailing address)*

Online services remain available to the public via our [contact form](#) or by phone at (213) 974-3211. [Stay Safe, Stay Healthy & Get Vaccinated!](#)

Aragon (Sunset/Everett) Properties Corporation  
1185 Sunset Boulevard  
Los Angeles, California

Dear Mr. Beilfuss:

The Los Angeles Fire Department (LAFD) has reviewed the "Soils Report", dated September 28, 2022 as submitted by Citadel EHS. In accordance with the California Health and Safety Code, Chapter 6.7, Section 25298(c), the California Code of Regulations Title 23, Chapter 16, Section 2672 and the information provided, this Department has determined that no further action is required at the site for the removal of five underground storage tanks under permit No. 34881.

Please note, this correspondence does not exempt you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at this site. Additionally, you maintain responsibility to correct additional or previously unidentified conditions at the site, which cause, or may thereafter cause, pollution or nuisance, or otherwise pose a threat to water quality or public health.

If you require additional information regarding this matter, please contact Eloy Luna of the Underground Storage Tanks – Plan Check Unit, at (213) 238-3484.

Very truly yours,

KRISTIN M. CROWLEY  
Fire Chief

Royce Long, CUPA Manager  
Environmental Unit

WINTNER, STEVE  
 1229 W SUNSET BLVD  
 LOS ANGELES, CA 90026

Date last business plan submitted: \_\_\_\_\_

**Annual Inventory Update (choose one method):**

- Modify existing business information and inventory** (see reverse side of this form) **OR**  
 BUSINESS HAS BELOW MIN QUANTITIES REQUIRED FOR REPORTING
- Submit new inventory** (must complete business information and chemical inventory forms) **OR**
- Complete Certification Statement 9** (below) stating that the inventory submitted within the last year is complete, accurate and current.

**The Certification Statement can only be used if all of the following conditions apply:**

1. Business has previously filed the hazardous materials inventory report
2. Company official signs **Certification Statement** and attests to:
  - a. Most recently submitted inventory is complete, accurate and up to date
  - b. No change in quantity of reportable hazardous materials is accurate and up to date
  - c. All hazardous materials are listed in that inventory
3. Business is not subject to EPCRA (Emergency Planning and Community Right to Know Act) reporting requirements

PLEASE DELETE FROM PROGRAM

**CERTIFICATION STATEMENT:**

I certify that I am the business owner or officially designated representative of the business listed at the top of this form.  
 I certify that the information contained in the hazardous materials inventory most recently submitted to the Los Angeles Fire Department CUPA is complete, accurate, and up to date.  
 There has been no change in the quantity of hazardous materials reported in the most recently submitted inventory.  
 No hazardous materials subject to inventory requirements are being handled that are not listed on the most recently submitted inventory.

 Date

**By MARCH 1, 2012, please return to:**

OWNER  
 Title

City of Los Angeles Fire Department  
 Fire Prevention Bureau - Technical Section  
 200 N. Main Street, Room 1780  
 Los Angeles, CA 90012

Rec'd by JE 2-29-12

*California Health and Safety Code, Chapter 6.95 requires all handlers of hazardous materials to annually update their hazardous material inventory with the local administering agency on or before March 1. The City of Los Angeles Fire Department, as that agency, processes and maintains business emergency response plans and inventories for businesses within the City.*

**Only list changes to your existing inventory here (you may attach additional pages if necessary)**

Chemical Name/CAS #	Maximum daily amount	Storage Container	Physical State: gal, lbs, cubic ft.	Storage Location	Inactive Y or N	Effective date

**Please list any Business/ Owner changes. (If you have further information to submit, you may attach additional pages)  
A copy of your business license is required when reporting a change of ownership.**

Owner Name	Business name	Mailing address	Other	Effective Date

For more information on the CUPA Program, please visit our website:

FACILITY ADDRESS: 1229 SUNSET

**HAZARDOUS MATERIALS INSPECTION GUIDELINES:**

**OFFICE:**

- Pull file, check history
- Check Envision to review notes, history or special instructions
- Print Inspection Packet, which includes:
  1. BP 1
  2. BP 8
  3. UP Forms for updating chemical inventory
  4. Business Plan Review
  5. Packet should accompany you on the inspection, if inspection requires a phone call to gain entry, contact responsible party
  6. Invoice, to see if facilities fees are current

**INSPECTION: Upon Arrival**

- Check address on facility, does the business name match what's listed on the BP1
- Check for visual hazards, placards, blocked egress, etc
- Make contact with responsible party
- Check to see if CUPA Permit is posted and current
- Update BP 1 and have responsible party sign verifying the information is correct
- Perform inspection to update chemical inventory on BP 8, for each updated chemical, **completely** fill out a (UP) Chemical Description Form
- Ensure the responsible party signs and dates BP 8
- Check for signs of illegal processes and illegal dumping, check dumpsters outside and drains
- If violations are found, Take photos of violations found
- Write a notice sighting violations and leave a copy with the responsible party
- Thank the responsible party for their time and exit the facility

**RETURN TO OFFICE:**

- Place a copy of completed notice in notice book on Capt Gatewood's desk
- Enter completed inspection into Envision with notes of who you met with and if a notices was written
- Any chemical inventory or processes not understood, check with RMPPS  
SPECIALIST OR THE INDUSTRIAL HYGENIST
- Prepare an F-290 packet if necessary
- Place completed inspection in the appropriate box for processing

Attention: Captain F. Gordon

Gentlemen:

We wish to advise you that six tanks consisting of four (4) 550 gallon and two (2) 3,000 gallon tanks have been removed from 1185 Sunset Boulevard, Los Angeles, California.

These tanks were degassed by dry ice and are presently located at our storage yard at Cherry and Market Streets, Long Beach, California.

Very truly yours,

J. W. MARSHALL & SONS

Re: Installation of 4  
Atmospheric Tank(s) for  
Name Richfield Oil Corporation  
Address 1185 Sunset Blvd.

Gentlemen:

Enclosed find one copy of your drawing stamped with our approval, together with Permit # 804. This authorizes you to make the installation referred to above, subject to the following conditions:

1. Field inspection by a member of this Department prior to covering of tanks and piping.
2. Pressure test of piping prior to covering. This must be done in the presence of the field inspector.
3. Final approval in writing shall be obtained from the field inspector before the installation may be placed in operation.

Section 57.04.03 requires that all auto fueling stations have a permit, which shall be secured from the City Clerk's Office, Room 1, City Hall.

Please contact Captain P. Gordon of our North Unit, telephone MA 8-6161 (68), to make necessary arrangements for inspection.

Very truly yours,

WILLIAM L. MILLER, CHIEF ENGINEER

### Renewal Confirmation

*This is a confirmation receipt for your submitted renewal. Please print and keep this receipt for your records.*

#### Transaction Information:

Your Renewal was submitted and received on 01/28/2022.

The confirmation number for this transaction is **F0002921760000162022**

Your on-line payment for \$399.40 was submitted and received.

The payment reference number is 2226575200

Based on the information that you have submitted thus far, the following are your identified taxable business activities.

*Note: The issuance of a Tax Registration Certificate and the payment of the business tax do not authorize the conduct or continuance of any illegal business or of a legal business in an illegal manner within the City of Los Angeles. The City has enacted regulatory ordinances in areas such as zoning, building safety, police, fire, hazardous material disclosure, sanitation, health, etc., which must be complied with in order to lawfully conduct a business within the City. Failure to comply with these regulatory ordinances may result in legal action being taken against the taxpayer.*

Six (6) digit Primary/Principal Business or Professional Activity Code for any secondary business activity that comprises at least \$1,000,000 and 40% of your gross receipts:	None

**Please provide us with additional information below:**

Is this business Female Owned?  Yes  No

- A Female-Owned Business is defined as a business with at least 51% owned by one or more women.

Is this business Minority Owned?  Yes  No

- A business is minority owned if it is at least 51% or more owned by an ethnic minority. An ethnic minority is an individual of African-American, Hispanic American, Native American, Asian American, Pacific Islander, Asian Indian American origin or heritage.

Is the aggregate cost of your business personal property \$100,000 or more?  Yes  No

- Each year the Los Angeles County Assessor is responsible for the assessment of business personal property for property tax purposes. Examples of business personal property are machinery, equipment, furniture, computers, tools and supplies, etc. Business inventory is exempt and not subject to property tax. A business property statement, Form 571-L, is required to be filed if the aggregate cost of your taxable personal property is \$100,000 or more on January 1 of each year, or if the Assessor requests you to file a statement. To learn more about Los Angeles County business personal property tax, visit the [Assessor's website \(https://assessor.lacounty.gov/\)](https://assessor.lacounty.gov/)

## 2022 City of Los Angeles Business Tax Renewal

Thank you for filing your 2021 Business Tax Renewal online! We encourage you to continue using our **E-Filing System for your 2022 renewal**. Please note that this postcard is your only official reminder concerning your 2022 renewal requirement for the account shown on the front of this card.

Visit [finance.lacity.org/renewal](https://finance.lacity.org/renewal), enter a few details and the system automatically calculates your business tax liability, if any. To access E-Filing, you can use either your **account number, your Social Security Number, or your Federal Employer Identification Number**. If a tax liability is due you can pay online via e-check, credit card (a service fee will apply), or by ACH (required if your tax liability is \$50,000 or more).

Business tax renewals are due on January 1, 2022 and delinquent if submitted after **February 28, 2022**. **Even if no tax is due, you must submit a completed renewal!** For more information, please visit our website at [finance.lacity.org](https://finance.lacity.org) or contact us at (844) 663-4411.

California Assembly Bill 1379 – As required by State Law, a \$4.00 fee must be paid for each year that you report a tax liability to the City. The \$4.00 fee will **not** apply to any year in which you are exempt from a tax liability. For more information visit: [finance.lacity.org/AB1379](https://finance.lacity.org/AB1379)

As many business owners have been affected as a result of the COVID-19 pandemic, the City of Los Angeles along with other entities have enacted programs that may assist businesses during this time. Please visit our website at <https://finance.lacity.org/blog/covid-19-business-resources> for a list of organizations and websites that provide information regarding assistance. For updates from the Mayor's office please visit [corona-virus.la](https://corona-virus.la).

**PLEASE DO NOT REPORT TO OUR PUBLIC COUNTERS**

## Contractor's License Detail for License # 1003504

**DISCLAIMER: A license status check provides information taken from the CSLB license database. Before relying on this information, you should be aware of the following limitations.**

- ▶ CSLB complaint disclosure is restricted by law (B&P 7124.6) If this entity is subject to public complaint disclosure click on link that will appear below for more information. Click [here](#) for a definition of disclosable actions.
- ▶ Only construction related civil judgments reported to CSLB are disclosed (B&P 7071.17).
- ▶ Arbitrations are not listed unless the contractor fails to comply with the terms.
- ▶ Due to workload, there may be relevant information that has not yet been entered into the board's license database.

## Site Plan and Vicinity Map

Map Source: Google (2022)

- - - Site Boundary
- UST

**Scope of Work:** Abandon by removal five (5) underground storage tanks (UST). A Site Plan and Vicinity Map is provided at left. A detailed Scope of Work for the abandonment by removal is outlined below:

1. Four 500-gallon capacity fuel USTs and one 150-gallon capacity waste oil UST from historical gasoline station operations are buried at the site. Access to the fuel USTs is via a surface access port that is presently sealed with asphalt. An access port for the waste oil UST is not observable due to the presence of trash and debris. Citadel believes the USTs to be buried approximately two to four feet underground and are of single-walled steel construction. The fuel USTs are assumed to be of approximately 6 feet in length and 48 inches in diameter. The waste oil UST is assumed to be approximately 4 feet in length and 30 inches in diameter. The contents of each UST is unknown.
2. Prior to beginning work, a Health and Safety Plan (HASP) will be prepared and implemented.
3. All tank identifications shall remain on the tank. Do not remove the Underwriter's Laboratory tag or any other identification from the tank. The Division 5 Permit number and "LAFD" will be painted on the side of the UST.
4. A combustible gas indicator (properly calibrated) will be on the job site during the entire operation.
5. During soil disturbance and removal processes, Citadel will monitor air emissions at 15-minute intervals using a direct reading portable photo-ionizing detector (PID), or equivalent, and record the measurements.
6. Prior to excavation, place a minimum of 20 pounds of dry ice per 1,000 gallons capacity into each tank at least TWO HOURS PRIOR to any further work being performed. All excavated soil (from the unearthing of the UST) must be retained on site and covered until determination of contamination and disposal has been made. Soil may be removed only with approval from the LAFD Inspector.
7. No cutting torch, open flame, or spark-producing equipment shall be used on the tank or piping. Electric lines, piping, and other tank apparatus shall be isolated or disconnected. All piping shall be left intact until the tank is exposed and ready to be removed.
8. Check the tank for an explosive atmosphere utilizing a combustible gas indicator. Air purging of the tank shall be initiated whenever the atmosphere inside the tank is above 20 percent of the lower explosive limit (LEL).
9. If the tank is not empty, remove residual product with a vacuum truck using a high-pressure water rinse with a minimum 2,000 psi, and detergent (if necessary). All interior rinse water and sludge shall be manifested and transported to a licensed hazardous waste disposal site or licensed TSD by a licensed hazardous waste transporter and a copy of the manifest will be supplied to the LAFD inspector.
10. A certified Industrial Hygienist or Marine Chemist will certify that the tank is clean and supply a copy of the certification to the LAFD Inspector.
11. Lift the tank from the excavation and inspect for signs of leakage then secure it on an appropriate transport vehicle with its openings at the top. The UST shall be removed intact and not punctured or crushed on-site. The licensed transporter shall transport the tank to a licensed recycler or waste disposal site, subject to all applicable government regulations.
12. The LAFD Inspector witnessing the abandonment shall be given a copy of the transport manifest, and shall be given the address as to where the tank will be transported.
13. Soil samples shall be obtained from beneath the tank, piping, and spoils pile at the direction of the LAFD Inspector. Soil sampling shall be performed by a Professional Geologist, or a trained technician deemed qualified to take soil samples if they have a letter in their possession certifying their training and experience in taking soil samples and are under the supervision of the Professional Geologist.
14. Soil samples will be analyzed for the full range of total petroleum hydrocarbons as gasoline (TPHg) by EPA method 8015M, benzene, toluene, ethylbenzene, and xylene (BTEX), oxygenates and naphthalene by EPA Method 8260B. Additional analyses may be required per the LAFD inspector.

For Division 5 Permits:  
Plan Check and Inspection services are calculated on a fee for service basis.  
Each type of transaction has been assigned a charge based on the estimated time  
required for the service.  
If Plan Check/Inspection services exceeded the assigned hours, additional charges  
will accrue in 1 hour increments. These additional charges will be billed to the  
Responsible Party.

## Annual Business Taxes

### Renewal Confirmation

*This is a confirmation receipt for your submitted renewal. Please print and keep this receipt for your records.*

#### Transaction Information:

Your Renewal was submitted and received on 01/28/2022.

The confirmation number for this transaction is **F0002921760000162022**

Your on-line payment for \$399.40 was submitted and received.

The payment reference number is 2226575200

Based on the information that you have submitted thus far, the following are your identified taxable business activities.

*Note: The issuance of a Tax Registration Certificate and the payment of the business tax do not authorize the conduct or continuance of any illegal business or of a legal business in an illegal manner within the City of Los Angeles. The City has enacted regulatory ordinances in areas such as zoning, building safety, police, fire, hazardous material disclosure, sanitation, health, etc., which must be complied with in order to lawfully conduct a business within the City. Failure to comply with these regulatory ordinances may result in legal action being taken against the taxpayer.*

**Legal Name:** INTEGRATED DEMOLITION AND REMEDIATION INC.

**Account Number:** 000292176000016

**Business Location:** 4938 E LA PALMA AVENUE  
ANAHEIM, CA 92807-1912

#### **Taxable Activities:**

Business Activity

Basis for Tax

Contractor(L188)

300000

CA STATE FEE (SB 1186)	\$4.00
<b>Total Amount Due:</b> (Total tax due, including any interest and penalties for late payment. If total amount due is zero then no tax is due.)	▶ \$399.40
Six (6) digit Primary/Principal Business or Professional Activity Code Number as reported on your Federal tax return: Refer to the instructions with your Federal tax return to determine this code. (Copies of Form 1040 Schedule C instructions are available on-line at <a href="http://www.irs.ustreas.gov">www.irs.ustreas.gov</a> ( <a href="http://www.irs.ustreas.gov">http://www.irs.ustreas.gov</a> ) under Forms and Publications.)  Note: If your business was newly established in 2021 and you have not yet filed a Federal Tax Return, you may leave this line blank.	None
Six (6) digit Primary/Principal Business or Professional Activity Code for any secondary business activity that comprises at least \$1,000,000 and 40% of your gross receipts:	None

**Please provide us with additional information below:**

Is this business Female Owned?  Yes  No

- A Female-Owned Business is defined as a business with at least 51% owned by one or more women.

Is this business Minority Owned?  Yes  No

- A business is minority owned if it is at least 51% or more owned by an ethnic minority. An ethnic minority is an individual of African-American, Hispanic American, Native American, Asian American, Pacific Islander, Asian Indian American origin or heritage.

Is the aggregate cost of your business personal property \$100,000 or more?  Yes  No

- Each year the Los Angeles County Assessor is responsible for the assessment of business personal property for property tax purposes. Examples of business personal property are machinery, equipment, furniture, computers, tools and supplies, etc. Business inventory is exempt and not subject to property tax. A business property statement, Form 571-L, is required to be filed if the aggregate cost of your taxable personal property is \$100,000 or more on January 1 of each year, or if the Assessor requests you to file a statement. To learn more about Los Angeles County business personal property tax, visit the [Assessor's website \(https://assessor.lacounty.gov/\)](https://assessor.lacounty.gov/)

## 2022 City of Los Angeles Business Tax Renewal

Thank you for filing your 2021 Business Tax Renewal online! We encourage you to continue using our **E-Filing System for your 2022 renewal**. Please note that this postcard is your only official reminder concerning your 2022 renewal requirement for the account shown on the front of this card.

Visit [finance.lacity.org/renewal](https://finance.lacity.org/renewal), enter a few details and the system automatically calculates your business tax liability, if any. To access E-Filing, you can use either your **account number, your Social Security Number, or your Federal Employer Identification Number**. If a tax liability is due you can pay online via e-check, credit card (a service fee will apply), or by ACH (required if your tax liability is \$50,000 or more).

Business tax renewals are due on January 1, 2022 and delinquent if submitted after **February 28, 2022**. **Even if no tax is due, you must submit a completed renewal!** For more information, please visit our website at [finance.lacity.org](https://finance.lacity.org) or contact us at (844) 663-4411.

California Assembly Bill 1379 – As required by State Law, a \$4.00 fee must be paid for each year that you report a tax liability to the City. The \$4.00 fee will **not** apply to any year in which you are exempt from a tax liability. For more information visit: [finance.lacity.org/AB1379](https://finance.lacity.org/AB1379)

As many business owners have been affected as a result of the COVID-19 pandemic, the City of Los Angeles along with other entities have enacted programs that may assist businesses during this time. Please visit our website at <https://finance.lacity.org/blog/covid-19-business-resources> for a list of organizations and websites that provide information regarding assistance. For updates from the Mayor's office please visit [corona-virus.la](https://corona-virus.la).

**PLEASE DO NOT REPORT TO OUR PUBLIC COUNTERS**

## Contractor's License Detail for License # 1003504

**DISCLAIMER: A license status check provides information taken from the CSLB license database. Before relying on this information, you should be aware of the following limitations.**

- ▶ CSLB complaint disclosure is restricted by law (B&P 7124.6) If this entity is subject to public complaint disclosure click on link that will appear below for more information. Click [here](#) for a definition of disclosable actions.
- ▶ Only construction related civil judgments reported to CSLB are disclosed (B&P 7071.17).
- ▶ Arbitrations are not listed unless the contractor fails to comply with the terms.
- ▶ Due to workload, there may be relevant information that has not yet been entered into the board's license database.

# CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)

5/21/2023

5/20/2022

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

**IMPORTANT:** If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

<b>PRODUCER</b> Lockton Insurance Brokers, LLC CA License #0F15767 777 S. Figueroa Street, 52nd fl. Los Angeles CA 90017 213-689-0065	<b>CONTACT NAME:</b> <b>PHONE (A/C. No. Ext):</b>		<b>FAX (A/C. No):</b>

## Site Plan and Vicinity Map

Map Source: Google (2022)

-  Site Boundary
-  UST

**Scope of Work:** Abandon by removal five (5) underground storage tanks (UST). A Site Plan and Vicinity Map is provided at left. A detailed Scope of Work for the abandonment by removal is outlined below:

1. Four 500-gallon capacity fuel USTs and one 150-gallon capacity waste oil UST from historical gasoline station operations are buried at the site. Access to the fuel USTs is via a surface access port that is presently sealed with asphalt. An access port for the waste oil UST is not observable due to the presence of trash and debris. Citadel believes the USTs to be buried approximately two to four feet underground and are of single-walled steel construction. The fuel USTs are assumed to be of approximately 6 feet in length and 48 inches in diameter. The waste oil UST is assumed to be approximately 4 feet in length and 30 inches in diameter. The contents of each UST is unknown.
2. Prior to beginning work, a Health and Safety Plan (HASP) will be prepared and implemented.
3. All tank identifications shall remain on the tank. Do not remove the Underwriter's Laboratory tag or any other identification from the tank. The Division 5 Permit number and "LAFD" will be painted on the side of the UST.
4. A combustible gas indicator (properly calibrated) will be on the job site during the entire operation.
5. During soil disturbance and removal processes, Citadel will monitor air emissions at 15-minute intervals using a direct reading portable photo-ionizing detector (PID), or equivalent, and record the measurements.
6. Prior to excavation, place a minimum of 20 pounds of dry ice per 1,000 gallons capacity into each tank at least TWO HOURS PRIOR to any further work being performed. All excavated soil (from the unearthing of the UST) must be retained on site and covered until determination of contamination and disposal has been made. Soil may be removed only with approval from the LAFD Inspector.
7. No cutting torch, open flame, or spark-producing equipment shall be used on the tank or piping. Electric lines, piping, and other tank apparatus shall be isolated or disconnected. All piping shall be left intact until the tank is exposed and ready to be removed.
8. Check the tank for an explosive atmosphere utilizing a combustible gas indicator. Air purging of the tank shall be initiated whenever the atmosphere inside the tank is above 20 percent of the lower explosive limit (LEL).
9. If the tank is not empty, remove residual product with a vacuum truck using a high-pressure water rinse with a minimum 2,000 psi, and detergent (if necessary). All interior rinse water and sludge shall be manifested and transported to a licensed hazardous waste disposal site or licensed TSD by a licensed hazardous waste transporter and a copy of the manifest will be supplied to the LAFD inspector.
10. A certified Industrial Hygienist or Marine Chemist will certify that the tank is clean and supply a copy of the certification to the LAFD Inspector.
11. Lift the tank from the excavation and inspect for signs of leakage then secure it on an appropriate transport vehicle with its openings at the top. The UST shall be removed intact and not punctured or crushed on-site. The licensed transporter shall transport the tank to a licensed recycler or waste disposal site, subject to all applicable government regulations.
12. The LAFD Inspector witnessing the abandonment shall be given a copy of the transport manifest, and shall be given the address as to where the tank will be transported.
13. Soil samples shall be obtained from beneath the tank, piping, and spoils pile at the direction of the LAFD Inspector. Soil sampling shall be performed by a Professional Geologist, or a trained technician deemed qualified to take soil samples if they have a letter in their possession certifying their training and experience in taking soil samples and are under the supervision of the Professional Geologist.
14. Soil samples will be analyzed for the full range of total petroleum hydrocarbons as gasoline (TPHg) by EPA method 8015M, benzene, toluene, ethylbenzene, and xylene (BTEX), oxygenates and naphthalene by EPA Method 8260B. Additional analyses may be required per the LAFD inspector.

The soil report should follow the Los Angeles Fire Department's General Report's optional guidelines. To assist you the guidelines are available at [http://www.lafd.org/sites/default/files/pdf\\_files/fpb41\\_tank\\_aband.pdf](http://www.lafd.org/sites/default/files/pdf_files/fpb41_tank_aband.pdf).

**The following documentation shall be included as part of your report:**

- A copy of the Los Angeles Fire Department Division 5-Permit
- Marine Custodian Certificate
- Copy of the Hazardous Waste Manifest for Disposal or Tank's Rinsate
- Certificate of Tank Disposal/Destruction and associated piping
- Soil manifest for soil removed from the site
- Scaled plot plan clearly illustrating the location and depth of all the samples collected
- All analytical results should be presented in milligrams per kilogram (mg/kg)
- All names in the chain of custody must be legible
- A copy of this page
- **If soil analysis results exceed the LAFD Minimum Action Levels, include an Unauthorized Release Report (URR) with your soil report**

RE:Permit 34881

Araon Sunset/Everett Properties Corporation  
1185 Sunset Boulevard  
Los Angeles California

Dear Mr. Beiliss:

The Los Angeles Fire Department (LAFD) has reviewed the Soils Report dated September 28, 2022 as submitted by Citadel EHS. In accordance with the California Health and Safety Code Chapter 6.7 Section 25298 and the California Code of Regulations Title 23 Chapter 16 Section 2672 and the information provided to this Department has determined that no further action is required at the site for the removal of five underground storage tanks under permit No. 34881.

Please note this correspondence does not exempt you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at this site. Additionally, you must maintain responsibility to correct additional or previously unidentified conditions at the site which cause or may thereafter cause pollution or nuisance or otherwise pose a threat to water quality or public health.

If you require additional information regarding this matter please contact Eloy Luna of the Underground Storage Tanks Plan Check Unit at 213-238-3484.

Very truly yours,

KRISTIN M. CROWLEY  
Fire Chief

## **1.0 INTRODUCTION**

Citadel EHS (Citadel) is pleased to provide this Soils Report for the removal of five single-wall steel underground storage tanks (USTs) located at 1185 Sunset Boulevard, in the City of Los Angeles, California (Site). Refer to Figure 1 for a Site Location Map.

On May 27, 2022, the Los Angeles City Fire Department (LAFD) approved the Division 5 permit application and issued permit number SR0034881. A copy of the LAFD Division 5 permit is included in Appendix A. A copy of the LAFD UST Soil Report Requirements is included in Appendix B.

## **2.0 SITE IDENTIFICATION**

### **2.1 Current Owner**

The Site is owned by Aragon (Sunset/Everett) Properties Corp (Owner) and is currently being redeveloped with a multi-level apartment building. The Assessor's Parcel Number (APN) associated with the Site is 5406-016-028.

### **2.2 Current Business Activities**

The Site is a graded lot. Demolition of historical buildings occurred in June 2022. The Site will be redeveloped with a multi-level apartment building.

### **2.2 Spill, Leak, and Accident History**

The Site is not listed on the LAFD active, inactive, or historical UST lists, and no historical spills have been reported.

### **2.3 Number, Capacity, and Contents of Tanks and Other Components**

The Site had five USTs described as follows<sup>1</sup>. Refer to Figure 2 for a Site Map showing the locations of the USTs.

- UST-2: 6,000 gallon capacity single-wall steel UST that contained approximately 100 gallons of gasoline.
- UST-3: 6,000 gallon capacity single-wall steel UST that contained approximately 100 gallons of gasoline.
- UST-4: 2,000 gallon capacity single-wall steel UST that contained approximately 100 gallons of gasoline.
- UST-5: 2,000 gallon capacity single-wall steel UST that was empty of contents.
- UST-6: 150 gallon capacity single-wall steel UST that contained approximately 2 gallons of waste oil.

---

<sup>1</sup> Numbering sequence was chosen to begin with "2"; the five USTs are therefore numbered UST-2 through UST-6.

## **3.0 BACKGROUND AND SUMMARY**

### **3.1 Site Description**

A review of a Phase I Environmental Site Assessment (Phase I) prepared by AEI Consultants (AEI) on February 26, 2013 showed the following:

- From at least 1906, the Site consisted of single-family residences. From at least 1927 to at least 1961, the Site was developed with a gas station and auto repair facility. Gas station operations were conducted until at least 1970 and were subsequently phased out. At the time of AEI's Phase I, the Site was operated as an auto repair facility and car wash.
- During AEI's site reconnaissance, AEI observed patched areas of asphalt on the southern portion of the Site. The patched areas appeared to be the locations of USTs associated with the historical gas station. According to the property owner at the time, four USTs were located at the Site.
- AEI observed two clarifiers at the Site. One clarifier was located in the auto repair garage and the other clarifier was located in the car washing area. Based on the presumed use of a the clarifier for auto repair operations and the on-site historical use of hazardous materials, AEI identified the clarifier located in the garage as a recognized environmental condition (REC).

### **3.2 Previous Investigations**

As part of the Phase I, AEI reviewed a portion of a Phase I and Limited Subsurface Investigation (Phase II) for the Site, prepared by Petra Geotechnical, Inc. (Petra) in 2005. According to AEI's review, a subsurface geophysical survey conducted at the Site delineated the location of four USTs and one waste oil UST in the rear of the car wash. Petra conducted soil sampling in the vicinities of the USTs. The results of the soil sample analyses were that trace amounts of total petroleum hydrocarbons (TPH) were encountered in one sample collected at 22 feet below ground surface (bgs) from the vicinity of the waste oil UST. Petra was unable to find evidence that the site had been impacted from petroleum hydrocarbons and/or volatile organic compounds (VOCs) related to the former site use. However, borings could only be collected from the vicinity of the USTs and not directly below them, and soil vapor testing was not conducted. AEI identified the presence of the USTs as a REC.

Citadel reviewed a Phase II Subsurface Investigation (Phase II) Report prepared on March 22, 2013, by AEI. AEI advanced eight borings across the Site to depths between 16 and 20 feet bgs and collected soil and groundwater samples. The samples were analyzed for VOCs and TPH. No VOCs or TPH were detected in the samples.

## **4.0 GEOLOGY AND HYDROLOGY**

### **4.1 Geology**

The Site is at an elevation of approximately 404 feet above mean sea level (AMSL). The Site is identified on the geologic map of the Hollywood and south half Burbank quadrangles (Dibblee and Ehrenspeck, 1991) as being Miocene age bedrock consisting of gray to light brown thin-bedded silty clay shale, that is soft and crumbly, locally contains scattered hard calcareous nodules, and in places contains laminae of fine grained soft sandstone.

## 4.2 Hydrology

The Site is underlain by bedrock and not located within a groundwater basin. According to AEI's review of Petra's Phase II, soil borings were advanced across the Site to 30 feet bgs and groundwater was not encountered. According to the State Water Resources Control Board (SWRCB) Geotracker online database, groundwater was encountered in 2011 at approximately 12 to 20 feet bgs and flowing to the southwest at the G.H. Palmer and Associates leaking UST (LUST) cleanup site, located at 867 Cesar Chavez Avenue, approximately 0.42 mile southeast of the Site. Groundwater was not encountered during this investigation.

## **5.0 TANK REMOVAL ACTIVITIES, PROCEDURES, ON-SITE INSPECTION**

### 5.1 Tank and Clarifier Contents Sampling

On June 27, 2022, Citadel visited the Site to collect samples of the contents from the USTs and clarifiers. A sample could not be collected from UST No. 5 due to inaccessible ports. Access to the clarifier in the auto repair garage was not accessible due to the presence of trash and other debris. Citadel observed an uncovered concrete drainage sump with dimensions of approximately two feet wide and long, and one foot deep, and containing a dark sludgy material. Samples were collected from UST Nos. 2, 3, 4 and 6, the clarifier located in the car wash area, and the sump.

The samples were analyzed for TPH by EPA Method 8015B, VOCs including fuel oxygenates and naphthalene by EPA Method 8260B, and Title 22 Metals by EPA Method 6010B/7471. Due to the historical usage of UST No. 6 as a waste oil UST and lack of historical information regarding the use of the clarifier and sump, the samples from UST No. 6, the clarifier and sump were also analyzed for polychlorinated biphenyls (PCBs) by EPA Method 8082.

The results are presented in Tables 1 and 2. The laboratory reports are included in Appendix C. Based on the analytical results, Citadel finds the following.

- The contents of USTs No. 2 through 4 consisted of gasoline and diesel range hydrocarbons, hydrocarbon-related volatile organic compounds, and lead. The contents of UST No. 6 consisted of diesel range hydrocarbons, hydrocarbon related VOCs, and lead.
- TPH as diesel (TPHd) and TPH as oil (TPHo) were reported in the clarifier and sump samples, at concentrations above construction worker exposure screening levels in the sump sample.
- Copper and lead in the clarifier sample, and chromium, copper and lead in the sump sample were reported at concentrations that were above their respective Soluble Threshold Limit Concentration (STLC) thresholds<sup>2</sup>. The samples were therefore analyzed for these constituents by the STLC procedure. Results of the analyses were STLC concentrations below their respective STLC regulatory limits, and therefore are not classified as hazardous waste.

## 5.2 Tank Removal Activities

A site-specific health and safety plan (HASP) was prepared prior to on-site activities. This HASP identified existing and potential hazards for workers at the Site during excavation, UST removal, and sample collection activities. Refer to Appendix D for a copy of the HASP, Appendix E for Citadel's Field Notes, and Appendix F for a Photographic Log.

On July 12, 2022, Citadel, Integrated Demolition and Remediation, Inc. (IDR), located in Anaheim, California, and North State Environmental (North State), located in Rialto, California, mobilized to the Site to begin the process of exposing and cleaning the USTs. Approximately 285 cubic yards (cy) of soil was removed and stockpiled adjacent to the USTs. Citadel performed air monitoring during all excavation activities using a photoionization detector (PID) calibrated to hexane gas, in accordance with SCAQMD Rule 1166 requirements. During excavation activities, VOCs were detected from some of the excavated spoils, at concentrations between 4 and 162 ppmv. Upon measuring VOCs of 50 ppmv or greater, the soil was segregated into a separate stockpile. Refer to Appendix G for Rule 1166 air monitoring log records.

The top of each UST was located at approximately four feet bgs. Following exposure of the top of the UST, North State remove residual fluids from the USTs and cleaned the USTs. During the UST cleaning process, 1,575 gallons of residual fluids and rinsate were produced. North State placed the fluids into 50-gallon totes and 55-gallon steel drums. The totes and drums were removed from the Site on July 12, 2022, by North State, and transported to US Ecology Inc. (US Ecology) in Beatty, Nevada. The fluids disposal manifest is included in Appendix H.

On July 14, 2022, Citadel and IDR mobilized to the site to begin the process of removing the USTs. The USTs were certified clean by Ms. Nancy G. Carraway, a Certified Industrial Hygienist (CIH), prior to removal. Ms. Carraway labeled each UST with white paint. The USTs were then placed on a flatbed truck by IDR for transportation to Advanced Steel Recovery, in Fontana, California for recycling. A copy of the Hazardous Waste Tank Closure Certification Report processed by Ms. Carraway is included as Appendix I. The UST Certificate of Destruction is included as Appendix J.

The soil directly beneath the west end of UST No. 3 was stained and emitted a strong gasoline odor. VOC concentrations when measured with the PID exceeded the instrument upper limit of 10,000 ppmv. No other evidence of contamination of the USTs was observed. The integrity of the USTs did not appear compromised after being pulled out of the excavation area.

## 5.3 Soil Sampling

On July 14, 2022, and at the direction of LAFD Inspector Belknap, soil samples were collected from approximately two feet beneath the east and west ends of each UST. Samples are identified by the sample date, UST number, and cardinal direction relative to the tank ends. For example, 0714-5-EAST was collected from beneath the east end of UST No. 5 on July 14, 2022. Inspector Belknap directed the collection of stockpile samples from the north and south ends of the excavated soil stockpile, identified as samples SP-UST-North and SP-UST-South, and from the segregated VOC-impacted soil, identified as SP-1166. Soil samples were collected by State Professional Geologist Mr. Scott Grasse under EPA 5035 protocol using the TerraCore sampling system.

## 5.4 Excavation and Removal of Impacted Soil

On August 11, 2022, Citadel and IDR mobilized to the Site to excavate and remove the gasoline-impacted soil beneath the west end of UST No. 3. Under the direction of Inspector Belknap, the impacted soil was removed, and a soil sample collected at the base of the excavated area,

identified as UST-SOIL-081122. A total of 21.36 tons (approximately 14 cy) of gasoline-impacted soil was segregated and removed from the Site to Waste Management Simi Valley under waste tracking number 2022-336. A total of 25.84 tons (approximately 17 cy) of stockpiled VOC-impacted soil was segregated and removed from the Site to Waste Management Simi Valley under waste tracking number 2022-337. Refer to Appendix K for the Hauling Manifests.

## 5.5 Clarifier and Sump Removal

On August 11, 2022, following removal of the gasoline-impacted soil, IDR removed the clarifier located in the car wash area, and the sump. Citadel was not present during these removal activities.

## 5.6 Laboratory Analyses

Based on the historical usage of each UST and under the direction of Inspector Belknap, the soil samples were analyzed per LAFD analytical group requirements as follows.

- UST Nos. 2 through 4: Group A requirement to include TPH as gasoline (TPHg), benzene, toluene, ethylbenzene and xylene (BTEX), fuel oxygenates, and naphthalene.
- UST Nos. 5 and 6: Group C requirement to include TPH full carbon chain and VOCs including fuel oxygenates and naphthalene.

Soil samples collected from beneath the USTs and the stockpiles were analyzed for TPH by EPA Method 8015B and VOCs by EPA Method 8260B. To profile the stockpiled soil for potential removal, SP-UST-North, SP-UST-South and SP-1166 were also analyzed for Title 22 metals by EPA Method 6010B/7471.

Laboratory results are presented in Tables 1 and 2. Refer to Appendix C for the Laboratory Reports. Results of the analyses are the following.

- TPHg was reported in 0714-2-EAST, at a concentration of 2.4 mg/kg, below the LAFD minimum action level (MAL) of 100 mg/kg.
- TPH as diesel (TPHd) and TPH as oil (TPHo) were reported in 0714-5-WEST, at concentrations of 6.1 and 4.5, mg/kg, respectively, below the LAFD minimum action level (MAL) for TPHg of 100 mg/kg.
- TPHg was reported in 0714-3-WEST, at a concentration of 740 mg/kg, above the LAFD minimum action level (MAL) of 100 mg/kg. However, the soil represented by this sample was removed from the Site as described in Section 5.3, and is no longer present at the Site. No TPHg was reported in the confirmation sample UST-SOIL-081122 that was collected subsequent to excavation of the impacted soil.
- TPHg, TPHd and TPHo, and a total of six VOCs were reported in SP-1166, at concentrations that are below their respective residential and construction worker exposure screening levels.
- TPH and TPHo were reported in SP-UST-North and SP-UST-South, at concentrations that are below their respective residential and construction worker exposure screening levels.
- TPH and VOCs were not reported at concentrations above the laboratory method detection limit (MDL) in any of the other soil samples.
- Concentrations of reported heavy metals in soil were reported below respective residential and construction worker exposure screening levels, Total Threshold Limit Concentration (TTL) regulatory limits, and Soluble Threshold Concentration Limit (STLC) thresholds. The exception is arsenic reported in all samples at concentrations

that are above the residential screening level of 0.11 mg/kg, but below the DTSC background arsenic level of 12 mg/kg.

## 5.7 Statement of Responsibility

The tasks and activities associated with this project were conducted under the supervision of Mr. Scott Grasse, PG#9878. Mr. Grasse is a Professional Geologist as defined in the Geologist and Geophysicists Act.

## **6.0 FINDINGS AND RECOMMENDATIONS**

Based on the laboratory analytical results, Citadel finds the following:

- Five USTs, one clarifier, and one sump were removed from the Site.
- Samples from the UST contents, the sump and clarifier were collected and analyzed.
  - The contents of USTs No. 2 through 4 consisted of gasoline and diesel range hydrocarbons, hydrocarbon-related volatile organic compounds, and lead. The contents of UST No. 6 consisted of diesel range hydrocarbons, hydrocarbon related VOCs, and lead.
  - TPH as diesel (TPHd) and TPH as oil (TPHo) were reported in the clarifier and sump samples, at concentrations above construction worker exposure screening levels in the sump sample.
  - Copper and lead in the clarifier sample, and chromium, copper and lead in the sump sample were reported at concentrations that were above their respective Soluble Threshold Limit Concentration (STLC) thresholds, and below their respective STLC regulatory limits, and therefore are not classified as hazardous waste.
- Gasoline-impacted soil with reported TPHg above the LAFD MAL was excavated and removed from the Site.
  - A total of 21.36 tons (approximately 14 cy) of gasoline-impacted soil was segregated and removed from the Site.
  - A total of 25.84 tons (approximately 17 cy) of VOC-impacted soil was segregated and removed from the Site under AQMD Rule 1166 protocol.
  - Under LAFD oversight, a confirmation soil sample identified as UST-SOIL-081122 was collected following the removal of impacted soil.
- Under LAFD oversight, soil samples were collected from beneath each UST.
  - TPH was reported in soil samples collected from beneath UST Nos. 2 and 5, at concentrations that are below the LAFD MAL.
  - TPHg was reported in 0714-3-WEST, at a concentration that was above the LAFD MAL. However, the soil was removed from the Site and the area was resampled. No TPHg was reported in the confirmation sample.
  - TPH and VOCs were not reported at concentrations above the MDL in any of the other soil samples,
  - Reported concentrations of heavy metals were below exposure screening levels, TLC regulatory limits and STLC thresholds.
- Under LAFD oversight, soil samples were collected from two stockpiles of soil.
  - TPH and VOCs were reported in stockpile soil samples at concentrations that are below exposure screening levels.
  - Reported concentrations of heavy metals were below exposure screening levels, TLC regulatory limits and STLC thresholds.

Due to the absence VOCs and TPH above LAFD MALs, Citadel recommends no further action with respect to the USTs removal. Citadel respectfully requests that LAFD grant a closure letter for the USTs.

## Renewal Confirmation

*This is a confirmation receipt for your submitted renewal. Please print and keep this receipt for your records.*

### Transaction Information:

Your Renewal was submitted and received on 01/28/2022.

The confirmation number for this transaction is **F0002921760000162022**

Your on-line payment for \$399.40 was submitted and received.

The payment reference number is 2226575200

Based on the information that you have submitted thus far, the following are your identified taxable business activities.

*Note: The issuance of a Tax Registration Certificate and the payment of the business tax do not authorize the conduct or continuance of any illegal business or of a legal business in an illegal manner within the City of Los Angeles. The City has enacted regulatory ordinances in areas such as zoning, building safety, police, fire, hazardous material disclosure, sanitation, health, etc., which must be complied with in order to lawfully conduct a business within the City. Failure to comply with these regulatory ordinances may result in legal action being taken against the taxpayer.*

**Legal Name:** INTEGRATED DEMOLITION AND REMEDIATION INC.

**Account Number:** 000292176000016

**Business Location:** 4938 E LA PALMA AVENUE  
ANAHEIM, CA 92807-1912

### **Taxable Activities:**

<u>Business Activity</u>	<u>Basis for Tax</u>
Contractor(L188)	300000

CA STATE FEE (SB 1186)	\$4.00
<b>Total Amount Due:</b> (Total tax due, including any interest and penalties for late payment. If total amount due is zero then no tax is due.)	▶ \$399.40
Six (6) digit Primary/Principal Business or Professional Activity Code Number as reported on your Federal tax return: Refer to the instructions with your Federal tax return to determine this code. (Copies of Form 1040 Schedule C instructions are available on-line at <a href="http://www.irs.ustreas.gov">www.irs.ustreas.gov</a> ( <a href="http://www.irs.ustreas.gov">http://www.irs.ustreas.gov</a> ) under Forms and Publications.)  Note: If your business was newly established in 2021 and you have not yet filed a Federal Tax Return, you may leave this line blank.	None
Six (6) digit Primary/Principal Business or Professional Activity Code for any secondary business activity that comprises at least \$1,000,000 and 40% of your gross receipts:	None

**Please provide us with additional information below:**

Is this business Female Owned?  Yes  No

- A Female-Owned Business is defined as a business with at least 51% owned by one or more women.

Is this business Minority Owned?  Yes  No

- A business is minority owned if it is at least 51% or more owned by an ethnic minority. An ethnic minority is an individual of African-American, Hispanic American, Native American, Asian American, Pacific Islander, Asian Indian American origin or heritage.

Is the aggregate cost of your business personal property \$100,000 or more?  Yes  No

- Each year the Los Angeles County Assessor is responsible for the assessment of business personal property for property tax purposes. Examples of business personal property are machinery, equipment, furniture, computers, tools and supplies, etc. Business inventory is exempt and not subject to property tax. A business property statement, Form 571-L, is required to be filed if the aggregate cost of your taxable personal property is \$100,000 or more on January 1 of each year, or if the Assessor requests you to file a statement. To learn more about Los Angeles County business personal property tax, visit the [Assessor's website \(https://assessor.lacounty.gov/\)](https://assessor.lacounty.gov/)

## 2022 City of Los Angeles Business Tax Renewal

Thank you for filing your 2021 Business Tax Renewal online! We encourage you to continue using our **E-Filing System for your 2022 renewal**. Please note that this postcard is your only official reminder concerning your 2022 renewal requirement for the account shown on the front of this card.

Visit [finance.lacity.org/renewal](https://finance.lacity.org/renewal), enter a few details and the system automatically calculates your business tax liability, if any. To access E-Filing, you can use either your **account number, your Social Security Number, or your Federal Employer Identification Number**. If a tax liability is due you can pay online via e-check, credit card (a service fee will apply), or by ACH (required if your tax liability is \$50,000 or more).

Business tax renewals are due on January 1, 2022 and delinquent if submitted after **February 28, 2022**. **Even if no tax is due, you must submit a completed renewal!** For more information, please visit our website at [finance.lacity.org](https://finance.lacity.org) or contact us at (844) 663-4411.

California Assembly Bill 1379 – As required by State Law, a \$4.00 fee must be paid for each year that you report a tax liability to the City. The \$4.00 fee will **not** apply to any year in which you are exempt from a tax liability. For more information visit: [finance.lacity.org/AB1379](https://finance.lacity.org/AB1379)

As many business owners have been affected as a result of the COVID-19 pandemic, the City of Los Angeles along with other entities have enacted programs that may assist businesses during this time. Please visit our website at <https://finance.lacity.org/blog/covid-19-business-resources> for a list of organizations and websites that provide information regarding assistance. For updates from the Mayor's office please visit [corona-virus.la](https://corona-virus.la).

**PLEASE DO NOT REPORT TO OUR PUBLIC COUNTERS**

## Contractor's License Detail for License # 1003504

**DISCLAIMER: A license status check provides information taken from the CSLB license database. Before relying on this information, you should be aware of the following limitations.**

- ▶ CSLB complaint disclosure is restricted by law (B&P 7124.6) If this entity is subject to public complaint disclosure click on link that will appear below for more information. Click [here](#) for a definition of disclosable actions.
- ▶ Only construction related civil judgments reported to CSLB are disclosed (B&P 7071.17).
- ▶ Arbitrations are not listed unless the contractor fails to comply with the terms.
- ▶ Due to workload, there may be relevant information that has not yet been entered into the board's license database.

# CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)

5/21/2023

5/20/2022

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

**IMPORTANT:** If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

<b>PRODUCER</b> Lockton Insurance Brokers, LLC CA License #0F15767 777 S. Figueroa Street, 52nd fl. Los Angeles CA 90017 213-689-0065	<b>CONTACT NAME:</b> <b>PHONE (A/C. No. Ext):</b>		<b>FAX (A/C. No):</b>

## Site Plan and Vicinity Map

**Scope of Work:** Abandon by removal five (5) underground storage tanks (UST). A Site Plan and Vicinity Map is provided at left. A detailed Scope of Work for the abandonment by removal is outlined below:

- Four 500-gallon capacity fuel USTs and one 150-gallon capacity waste oil UST from historical gasoline station operations are buried at the site. Access to the fuel USTs is via a surface access port that is presently sealed with asphalt. An access port for the waste oil UST is not observable due to the presence of trash and debris. Citadel believes the USTs to be buried approximately two to four feet underground and are of single-walled steel construction. The fuel USTs are assumed to be of approximately 6 feet in length and 48 inches in diameter. The waste oil UST is assumed to be approximately 4 feet in length and 30 inches in diameter. The contents of each UST is unknown.
- Prior to beginning work, a Health and Safety Plan (HASP) will be prepared and implemented.
- All tank identifications shall remain on the tank. Do not remove the Underwriter's Laboratory tag or any other identification from the tank. The Division 5 Permit number and "LAFD" will be painted on the side of the UST.
- A combustible gas indicator (properly calibrated) will be on the job site during the entire operation.
- During soil disturbance and removal processes, Citadel will monitor air emissions at 15-minute intervals using a direct reading portable photo-ionizing detector (PID), or equivalent, and record the measurements.
- Prior to excavation, place a minimum of 20 pounds of dry ice per 1,000 gallons capacity into each tank at least TWO HOURS PRIOR to any further work being performed. All excavated soil (from the unearthing of the UST) must be retained on site and covered until determination of contamination and disposal has been made. Soil may be removed only with approval from the LAFD Inspector.
- No cutting torch, open flame, or spark-producing equipment shall be used on the tank or piping. Electric lines, piping, and other tank apparatus shall be isolated or disconnected. All piping shall be left intact until the tank is exposed and ready to be removed.
- Check the tank for an explosive atmosphere utilizing a combustible gas indicator. Air purging of the tank shall be initiated whenever the atmosphere inside the tank is above 20 percent of the lower explosive limit (LEL).
- If the tank is not empty, remove residual product with a vacuum truck using a high-pressure water rinse with a minimum 2,000 psi, and detergent (if necessary). All interior rinse water and sludge shall be manifested and transported to a licensed hazardous waste disposal site or licensed TSD by a licensed hazardous waste transporter and a copy of the manifest will be supplied to the LAFD inspector.
- A certified Industrial Hygienist or Marine Chemist will certify that the tank is clean and supply a copy of the certification to the LAFD Inspector.
- Lift the tank from the excavation and inspect for signs of leakage then secure it on an appropriate transport vehicle with its openings at the top. The UST shall be removed intact and not punctured or crushed on-site. The licensed transporter shall transport the tank to a licensed recycler or waste disposal site, subject to all applicable government regulations.
- The LAFD Inspector witnessing the abandonment shall be given a copy of the transport manifest, and shall be given the address as to where the tank will be transported.
- Soil samples shall be obtained from beneath the tank, piping, and spoils pile at the direction of the LAFD Inspector. Soil sampling shall be performed by a Professional Geologist, or a trained technician deemed qualified to take soil samples if they have a letter in their possession certifying their training and experience in taking soil samples and are under the supervision of the Professional Geologist.
- Soil samples will be analyzed for the full range of total petroleum hydrocarbons as gasoline (TPHg) by EPA method 8015M, benzene, toluene, ethylbenzene, and xylene (BTEX), oxygenates and naphthalene by EPA Method 8260B. Additional analyses may be required per the LAFD inspector.

**Facility Owner:**  
Aragon (Sunset/Everett) Properties Corporation

COMMENTS

The soil report should follow the Los Angeles Fire Department's General Report's initial guidelines. To assist you the guidelines are available at [http://www.lafd.org/sites/default/files/pdf\\_files/fpb41\\_tank\\_aband.pdf](http://www.lafd.org/sites/default/files/pdf_files/fpb41_tank_aband.pdf).

**The following documentation shall be included as part of your report:**

- A copy of the Los Angeles Fire Department Division 5-Permit
- Marine Custodian Certificate
- Copy of the Hazardous Waste Manifest for Disposal or Tank's Rinsate
- Certificate of Tank Disposal/Destruction and associated piping
- Soil manifest for soil removed from the site
- Scaled plot plan clearly illustrating the location and depth of all the samples collected
- All analytical results should be presented in milligrams per kilogram (mg/kg)
- All names in the chain of custody must be legible
- A copy of this page
- **If soil analysis results exceed the LAFD Minimum Action Levels, include an Unauthorized Release Report (URR) with your soil report**

### ANALYTICAL REQUIREMENTS

Group A Gasoline	Group-B Diesel	Analytical Method	Required MDL's (ug/kg)	LAFD Minimum Action Levels mg/kg
Analyte	Analyte

# UST SOIL REPORT REQUIREMENTS

## 1.0 Cover Letter/Introduction/Table of Contents

## 2.0 Site Identification

- 2.1 Current owner/s
- 2.2 Current business activities
- 2.3 Spill, leak, and accident history
- 2.4 Number, capacity, and contents of tanks and other components

## 3.0 Background and Summary

- 3.1 Site description
- 3.2 Previous investigation
- 3.3 Wet ink signature
- 3.4 Geologist Seal with I.D number and expire date (stamp)
- 3.5 Name and address of individual that produced the report

**NOTE:** All reports must include the wet-ink signature and seal of one of the following licensed professionals: Professional Civil Engineer (PE), Professional Geologist (PG), Certified Engineering Geologist (CEG), Certified Hydrogeologist (CHG), Professional Petroleum Engineer (PPE)

## 4.0 Geology and Hydrology

- 4.1 Geology
- 4.2 Hydrology

## 5.0 Tank Removal Activities, Procedures, On-site Inspection

- 5.1 Tank Removal/or abandonment in place activities
- 5.2 Clarifier Removal/associated with a UST **only**
- 5.3 Dispenser Replacement/Upgrade activities
- 5.4 Piping Replacement/Upgrade activities
- 5.5 Laboratory Analyses and Chain-of –Custody
- 5.6 Condition of tanks and pit upon removal
- 5.7 Date of removal activities & sampling protocols
- 5.8 Name & address of Removal Company

## 6.0 Soil Disposal Operations/Contaminated soil

## 7.0 AQMD Rule 1166 Air Monitoring

## 8.0 Recommendations/Conclusion

## 9.0 List of Figures/Maps

- 9.1 Site Location Map with cross streets
- 9.2 Site Plan (soil sample locations)

## 10.0 List of Tables

- 10.1 Soil analytical Laboratory Results per LAFD guidelines
- 10.2 Indicate which analytical method and detection limit used
- 10.3 Report all “non-detect” (ND) with < numerical MDL value (not just the ND without the detection limit value)

## 11.0 List of Appendices

- 11.1 Copy of the LAFD Div-5 Permit
- 11.2 UST Certification for Removal
- 11.3 Tank Rinsate Disposal Manifest
- 11.4 Analytical Results with chain of custody
- 11.5 Soil Disposal Manifest
- 11.6 AQMD Rule 1166 Field Monitoring Data Sheets
- 11.7 Tank disposal manifest/with facility address
- 11.8 UST Soil Report Requirements

Citadel EHS

Lab Job Number: 464925

2 Peters Canyon Road

Location: UST Sampling, 1185 Sunset Blvd., Los Angeles, CA

Irvine, CA 92606

Date Received: 06/27/22

Scott Grasse

---

This data package contains sample and QC results for one oily sludge sample, requested for the above referenced project on 06/27/22. The sample was received intact.

### **TPH-Extractables by GC (EPA 8015M):**

- ORO C28-C44 was detected between the MDL and the RL in the method blank for batch 292101; this analyte was detected in the sample at a level at least 10 times that of the blank.
- No other analytical problems were encountered.

### **Volatile Organics by GC/MS (EPA 8260B):**

- CLARIFIER1 (lab # 464925-001) was diluted due to foaming.
- No other analytical problems were encountered.

### **PCBs (EPA 8082):**

- CLARIFIER1 (lab # 464925-001) was diluted due to the viscous nature of the sample extract.
- No other analytical problems were encountered.

### **Metals (EPA 6010B and EPA 7471A):**

- Low recoveries were observed for antimony in the MS/MSD for batch 292010; the parent sample was not a project sample. High recoveries were observed for vanadium; the associated RPD was within limits. High RPD was observed for antimony.
- No other analytical problems were encountered.

Location: UST Sampling, 1185 Sunset Blvd., Los Angeles, CA

Irvine, CA 92606

Date Received: 06/27/22

Scott Grasse

---

This data package contains sample and QC results for one oily sludge sample, requested for the above referenced project on 06/27/22. The sample was received intact.

### **TPH-Extractables by GC (EPA 8015M):**

- ORO C28-C44 was detected between the MDL and the RL in the method blank for batch 292101; this analyte was detected in the sample at a level at least 10 times that of the blank.
- No other analytical problems were encountered.

### **Volatile Organics by GC/MS (EPA 8260B):**

- SUMP 1 (lab # 464924-001) was diluted due to foaming.
- No other analytical problems were encountered.

### **PCBs (EPA 8082):**

- SUMP 1 (lab # 464924-001) was diluted due to the viscous nature of the sample extract.
- No other analytical problems were encountered.

### **Metals (EPA 6010B and EPA 7471A):**

- Low recoveries were observed for antimony in the MS/MSD for batch 292010; the parent sample was not a project sample. High recoveries were observed for vanadium; the associated RPD was within limits. High RPD was observed for antimony.
- No other analytical problems were encountered.

Are the containers labeled with the correct preservatives?			✓
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			✓
Was a sufficient amount of sample submitted for the requested tests?	✓

Date Received: 06/27/22

Scott Grasse

---

This data package contains sample and QC results for four oil samples, requested for the above referenced project on 06/27/22. The samples were received intact.

### **TPH-Extractables by GC (EPA 8015M):**

- ORO C28-C44 was detected between the MDL and the RL in the method blank for batch 292101; this analyte was not detected in samples at or above the RL.
- No other analytical problems were encountered.

### **Volatile Organics by GC/MS (EPA 8260B):**

- Response exceeding the instrument's linear range was observed for 1,2,4-trimethylbenzene in UST3 (lab # 464923-003); affected data was qualified with "E".
- No other analytical problems were encountered.

### **PCBs (EPA 8082):**

- A number of samples were diluted due to the dark and viscous nature of the sample extracts.
- No other analytical problems were encountered.

### **Metals (EPA 6010B and EPA 7471A):**

- Low recoveries were observed for antimony in the MS/MSD for batch 292010; the parent sample was not a project sample. High recoveries were observed for vanadium; the associated RPD was within limits, and this analyte was not detected at or above the RL in the associated samples. High RPD was observed for antimony; this analyte was not detected at or above the RL in the associated samples.
- No other analytical problems were encountered.

## SAMPLE ACCEPTANCE CHECKLIST

**Section 1**  
 Client: Citadel EHS Project: Limited Phase II SI  
 Date Received: 6/27/22 Sampler's Name Present:  Yes  No

**Section 2**  
 Sample(s) received in a cooler?  Yes, How many? 1  No (skip section 2) Sample Temp (°C) (No Cooler) : \_\_\_\_\_  
 Sample Temp (°C), One from each cooler: #1: 24.4 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_  
*(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)*  
 Shipping Information: \_\_\_\_\_

**Section 3**  
 Was the cooler packed with:  Ice  Ice Packs  Bubble Wrap  Styrofoam  
 Paper  None  Other \_\_\_\_\_  
 Cooler Temp (°C): #1: 23.0 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

Section 4	YES	NO	N/A
Was a COC received?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are sample IDs present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are sampling dates & times present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is a relinquished signature present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the tests required clearly indicated on the COC?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are custody seals present?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
If custody seals are present, were they intact?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Did all samples arrive intact? If no, indicate in Section 4 below.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Did all bottle labels agree with COC? (ID, dates and times)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Were the samples collected in the correct containers for the required tests?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the containers labeled with the correct preservatives?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Is there headspace in the VOA vials greater than 5-6 mm in diameter?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Was a sufficient amount of sample submitted for the requested tests?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Section 5 Explanations/Comments**  
 \_\_\_\_\_  
 \_\_\_\_\_

**Section 6**  
 For discrepancies, how was the Project Manager notified?  Verbal PM Initials: \_\_\_\_\_ Date/Time \_\_\_\_\_  
 Email (email sent to/on): \_\_\_\_\_ / \_\_\_\_\_  
 Project Manager's response:  
 \_\_\_\_\_

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

## Qualifiers

### GC/MS VOA

Qualifier	Qualifier Description
*1	LCS/LCSD RPD exceeds control limits.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

## Job ID: 570-103103-1

### Laboratory: Eurofins Calscience

#### Narrative

#### Job Narrative 570-103103-1

#### Comments

No additional comments.

#### Receipt

The samples were received on 7/14/2022 4:56 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 4.9° C.

#### GC/MS VOA

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-249502. The laboratory control sample (LCS) was performed in duplicate (LCSD) to provide precision data for this batch.

Method 8260B: The initial calibration curve analyzed in batch 570-249502 was outside method criteria for the following analyte(s): Bromomethane. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte(s) is considered an estimated concentration.

Method 8260B: The following samples were diluted due to the nature of the sample matrix / hydrocarbons: 0714-3-WEST (570-103103-7) and 0714-2-EAST (570-103103-10). Elevated reporting limits (RLs) are provided.

Method 8260B: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for analytical batch 570-249628 recovered outside control limits for the following analyte: Acetone. The Laboratory control sample / laboratory control sample duplicate (LCS/LCSD) percent recovery is in control for affected analytes.

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-249628.

Method 8260B: The initial calibration curve analyzed in batch 570-249628 was outside method criteria for the following analyte: Bromomethane. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered an estimated concentration.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC VOA

Method 8015B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-249519. The laboratory control sample (LCS) was performed in duplicate (LCSD) to provide precision data for this batch.

Method 8015B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with batch 250244.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC Semi VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### Metals

Method 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries of Antimony and Barium for preparation batch 570-249451 and analytical batch 570-249591 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.(570-103076-H-1-B MS ^5) and (570-103076-H-1-C MSD ^5)

Method 6010B: The post digestion spike % recovery for Antimony associated with batch 570-249591 was outside of control limits. The

## Patel, Virendra

---

**From:** Scott Grasse <SGrasse@citadelehs.com>  
**Sent:** Friday, July 15, 2022 6:59 AM  
**To:** Patel, Virendra  
**Subject:** RE: analyses modifications for ECI Project#57011761 - 1185 Sunset

EXTERNAL EMAIL\*

To clarify, remove the independent analysis for ethanol since ethanol will come be reported with oxygenates.

Virendra,

Please cancel the request for ethanol analyses for all samples on this project. Also, please add TPH full carbon chain and T22 metals 6010B/7471A for sample 0714-3-WEST.

Thank you, Scott

# Login Sample Receipt Checklist

Client: Citadel Environmental Services Inc

Job Number: 570-103103-1

**Login Number: 103103**

**List Number: 1**

**Creator: Vitente, Precy**

**List Source: Eurofins Calscience**

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

**Project Name: UST Soil Sampling**

**Project ID: 0942.1020.0**

**Site Address: 1185 Sunset Blvd. Los Angeles**

Enclosed are the results of analyses for samples received by the laboratory on August 11, 2022. If you have any questions concerning this report, please feel free to contact us.

**Molky Brar**

**Laboratory Director**

American Scientific Laboratories, LLC (ASL) accepts sample materials from clients for analysis with the assumption that all of the information provided to ASL verbally or in writing by our clients (and/or their agents), regarding samples being submitted to ASL, is complete and accurate. ASL accepts all samples subject to the following conditions:

- 1) ASL is not responsible for verifying any client-provided information regarding any samples submitted to the laboratory.
- 2) ASL is not responsible for any consequences resulting from any inaccuracies, omissions, or misrepresentations contained in client-provided information regarding samples submitted to the laboratory.

### ASL Sample Receipt Form

Client: Citadel Environmental Services, Inc.

Date: 8-11-2022

#### Sample Information:

Temperature: 5.4°C IR Gun # 1

Blank  Sample

Custody Seal:

Yes  No  Not Available

Received Within Holding Time:

Yes  No

#### Container:

Proper Containers and Sufficient Volume:

Yes  No

Soil: 1  4oz  8oz  Sleeve 5  VOA (4 Sodium Bisulfate + 1 Methanol)

Water:  500AG  1AG  125PB  250PB  500PB  VOA  Other

Air:  Tedlar®

Sample Containers Intact:

Yes  No

Trip Blank:

Yes  No

#### Chain-of-Custody (COC):

Received:

Yes  No

Samplers Name:

Yes  No

Container Labels match COC:

Yes  No

COC documents received complete:

Yes  No

Proper Preservation Noted:

Yes  No

Completed By: Janet Chin

## **1.0 SITE DESCRIPTION**

Citadel EHS (Citadel) has prepared this Health and Safety Plan (HASP) for use during soil and soil vapor sampling activities conducted at 1185 Sunset Boulevard, in the City of Los Angeles, California (Site). The Site consists of approximately 0.34 acres of vacant land.

Activities conducted under Citadel's direction at the Site will be in compliance with applicable Occupational Safety and Health Administration (OSHA) regulations, particularly those in Title 8 California Code of Regulations (CCR) 5192, and other applicable federal, state, and local laws, regulations, and statutes. A copy of this HASP will be kept onsite during scheduled field activities.

## **2.0 BACKGROUND**

Citadel EHS (Citadel) was contacted by Integrated Demolition and Remediation, Inc. (IDR) to provide a soil sampling and underground storage tank (UST) services for the Site. Citadel understands from the Client that four steel 500-gallon, single-wall fuel USTs and one waste oil UST of unknown size are believed to be present at the Site. The Client has also requested sampling services for one hydraulic hoist and three 3-stage clarifiers that are present at the Site.

## **3.0 SAFETY POLICY**

Safety will be given primary importance in the planning and operation of this project. The safety policy shall strictly adhere to current EPA and OSHA standards, and local government agency requirements having authority over the project as regards to Client employees, as well as to public safety. Some of the applicable health and safety standards are listed below:

- 40 Code of Federal Regulations Part 261, Identification and Listing of Hazardous Waste;
- Health and Safety Code, Division 20, Chapter 6.5, California Hazardous Waste Control Act;
- Title 8, California Code of Regulations, Section 1510, Safety Instruction for Employees;
- Title 8, California Code of Regulations, Section 3380, Personal Protective Equipment;
- Title 8, California Code of Regulations, Section 5144, Respiratory Protection;
- Title 8, California Code of Regulations, Section 5194, Hazard Communication; and
- Title 22, California Code of Regulations, Division 4.5, Environmental Health Standards for the Management of Hazardous Waste.

Each subcontracting firm will assume primary responsibility for the safety of their own work in regard to their employees and other persons. Subcontractors will assume the duty to comply with OSHA, and all other federal, state and local regulations.

The subcontractors work will be monitored by Citadel project managers for implementation of this HASP, while adhering to their own safety program. Citadel will retain the authority and power to enforce this HASP during the progress of the work. Any deficiencies in safe work practices will be brought to the attention of the subcontractor firm's supervisor for immediate corrective action. If the subcontractor fails or refuses to take corrective action promptly, a stop work order shall be issued and the subcontractor or the subcontractor employee may be removed from the Site.

## **4.0 WORK DESCRIPTION**

To profile the vessel contents, liquid samples will be collected from each UST and the hydraulic hoist and analyzed for VOCs including oxygenates and naphthalene by EPA Method 8260B, total petroleum hydrocarbons (TPH) full range by EPA Method 8015B, and polychlorinated biphenyls (PCBs) by EPA method 8082. A sample from each clarifier will be collected and analyzed for VOCs, TPH full range and Title 22 Metals.

Citadel will coordinate with LAFD and the Client to schedule LAFD oversight for the removal of the USTs. Citadel personnel will be present on site during any UST removal activity that disturbs soil including excavation to expose the USTs and associated piping and lifting, moving or removing the USTs and associated piping, to continuously monitor air emissions for volatile organic compounds (VOCs) and record measurements using a direct reading organic vapor analyzer (OVA), or equivalent such as a photoionization detector (PID). Monitoring will be in accordance with South Coast Air Quality Management District (SCAQMD) Rule 1166. The Client is responsible for submitting the required Rule 1166 notification to SCAQMD prior to the commencement of soil disturbance activities.

Following removal of the USTs confirmation soil samples will be collected from the vicinity of the USTs as directed by an LAFD inspector and analyzed per LAFD requirements. At a minimum, two soil samples will be collected beneath each UST, one sample collected beneath each fitting, one sample collected from beneath every 20 feet of piping, one from each spoils pile of up to 250 cubic yards (CY), and any additional sampling at the LAFD inspector's direction. The soil samples will be collected in 40-milliliter glass vials by EPA Method 5035 for analysis of VOCs, oxygenates and naphthalene by EPA Method 8260B and total petroleum hydrocarbons as gasoline (TPHg) by EPA Method 8015B. A soil sample from each sampling location will also be collected in laboratory supplied glass jars and analyzed for TPH full carbon chain by EPA Method 8015B. To pre-profile the excavated soil for disposal, samples collected from the spoils pile(s) will also be analyzed for Title 22 Metals by EPA methods 6010B/7471A. Soil samples will be placed in a cooler packed with ice prior to transport to an Environmental Laboratory Accreditation Program (ELAP) state-certified laboratory under standard Chain-of-Custody (COC) procedures.

## **5.0 KEY PROJECT PERSONNEL AND RESPONSIBILITIES**

Project Manager	Scott Grasse (Citadel)
Site Safety Officer (SSO)/Project Monitor	Scott Grasse (Citadel)
Subcontractor Personnel	IDR

### **PROJECT MANAGER**

The Project Manager has the ultimate responsibility for the health and safety of personnel at the Site. The Project Manager is responsible for:

- Ensuring that project personnel review and understand the requirements of this HASP;
- Keeping on-site personnel informed of the expected hazards and appropriate protective measures at the Site; and
- Providing resources necessary for maintaining a safe and health work environment.

## **SITE SAFETY OFFICER/PROJECT MONITOR**

The SSO is responsible for enforcing the requirements of this HASP once site work begins. The SSO has the authority to immediately correct situations where noncompliance with this HASP is noted and to immediately stop work in cases where an immediate danger to site workers or the environment is perceived. Responsibilities of the SSO also include:

- Obtaining and distributing PPE and air monitoring equipment necessary for this project;
- Limiting access at the Site to authorized personnel;
- Communicating unusual or unforeseen conditions at the Site to the Project Manager;
- Supervising and monitoring the safety performance of site personnel to evaluate the effectiveness of health and safety procedures and correct deficiencies;
- Conducting daily tailgate safety meetings before each day's activities begin; and
- Conducting a site safety inspection prior to the commencement of each day's field activities.

## **SUBCONTRACTOR PERSONNEL**

Subcontractor personnel are expected to comply with the minimum requirements specified in this HASP. Failure to do so may result in the dismissal of the subcontractor or any of the subcontractor's workers from the job site. Subcontractors may employ health and safety procedures that afford them a greater measure of personal protection than those specified in this plan as long as they do not pose additional hazards to themselves, the environment, or others working in the area.

## **6.0 SITE CONTROL MEASURES**

The SSO or Project Manager has been designated to coordinate access and security on site. The Client is responsible for general Site safety and each on-Site contractor must comply with their site-specific safety plan.

## **7.0 STANDARD OPERATING PROCEDURES**

### **GENERAL SAFETY**

- Maintain good housekeeping at all times in all project work areas.
- Check the work area to determine what problems or hazards may exist.
- Designate specific areas for the proper storage of materials.
- Store tools, equipment, materials, and supplies in an orderly manner.
- Provide containers for collecting trash and other debris.
- Clean up all spills quickly.
- Report unsafe conditions or unsafe acts to your supervisor immediately.
- Report all occupational illnesses, injuries, and vehicle accidents.
- Do not wear loose clothing, wristwatches, and other loose accessories when within arm's reach of moving machinery.
- Emergency exits and evacuation areas should be clearly marked during work activities.
- Personnel fall protection is required when climbing to perform maintenance six feet or higher above ground.
- Inspect hand tools and use proper PPE.
- Ensure proper grounding and guarding of equipment.
- Keep hands and fingers out of pinch points.
- Use good ergonomic posturing when working with heavy items and when using the Hammer

Drill.

## COMMUNICATION PROCEDURES

Due to the close proximity of all field crew members, the necessity for radio communication is not necessary.

The following standard hand signals will be used:

Hand drawn across throat .....Cease operation immediately  
 Hand gripping throat ..... Out of air, cannot breathe  
 Grip partner's wrist or both hands around waist ..... Leave area immediately  
 Hands on top of head .....Need assistance  
 Thumbs up ..... OK, I am alright, understood  
 Thumbs down.....No, negative

## FIELD VEHICLES

- Equip vehicles with emergency supplies and equipment.
- Maintain both a first aid kit and fire extinguisher in the field vehicle at all times.
- Utilize a rotary beacon on vehicle if working adjacent to active roadway.
- Always wear seatbelt while operating vehicle.
- Tie down loose items.

## MANUAL LIFTING

- Personnel shall seek assistance when performing manual lifting tasks that appear beyond their physical capabilities.
- Assess the situation before lifting, ensure good lifting and body positioning practices, and ensure good carrying and setting down practices.

## HEAT EXPOSURE

- Limit exposure to the sun or take extra precautions when the UV index rating is high.
- Take lunch and breaks in shaded areas.
- Create shade by using umbrellas, tents, and canopies.
- Wear proper clothing: long sleeved shirts with collars, long pants, and UV-protective sunglasses or safety glasses.
- Apply sunscreen generously to all exposed skin surfaces at least 20 minutes before exposure. Re-apply sunscreen at least every 2 hours, and more frequently when sweating or performing activities where sunscreen may be wiped off.
- Communicate any concerns regarding heat stress to a supervisor.
- Keep hydrated throughout the day (about 4 cups per hour).
- OSHA's Heat Index:

Heat Index	Risk Level	Protective Measures
Less than 91°F	Lower (Caution)	Basic heat safety and planning
91°F to 103°F	Moderate	Implement precautions and heighten awareness

103°F to 115°F	High	Additional precautions to protect workers
Greater than 115°F	Very High to Extreme	Triggers even more aggressive protective measures

**Utilities (Under Ground and Above Ground):** Low Hazard. All boring locations will be hand drilled and stop work will be enforced if any utilities are encountered.

**Biological Hazards:** Low to Medium Hazard. Beware of spiders, insects and other possible animals.

**Site Instability:** Low to Medium Hazard. The Site will be inspected prior to equipment placement and closely monitored. Any settling of the equipment will cause the work to stop immediately.

**Equipment Refueling:** Low Hazard. Equipment shall not be refueled with the engine running. Cigarettes, open flames, or other ignition sources are not allowed within 50 feet of the fueling location.

**Personnel Injury:** Upon notification of an injury, the Project Field Leader should evaluate the nature of the injury, and the affected person should be decontaminated to the extent possible prior to movement. The Project Field Leader shall initiate the appropriate first aid, and contact should be made for an ambulance and with the designated medical facility (if required).

**Fire/Explosion:** The fire department shall be alerted, and all personnel moved to a safe distance from the involved area.

**Other Equipment Failure:** If any other equipment on site fails to operate properly, the Project Team Leader shall be notified and then determine the effect of this failure on continuing operations on site. If the failure affects the safety of personnel or prevents completion of the Work Plan tasks, work will cease until the situation is evaluated and appropriate actions taken.

## COVID-19 FIELD WORK PREVENTION GUIDELINES

The following guidelines were prepared to prevent COVID-19 transmission while performing essential field work activities at the Site:

1. **Stay at least 6 feet from others** whenever possible. Avoid, or at least **minimize close contact with others**. Close contact means being within 6 feet of someone else for more than 15 minutes. By CDC guidelines, it doesn't matter if you are wearing face covering or not to be consider as being in close contact. Even with face covering, being close for extended periods of time, can greatly increase your risk of exposure. *Keep your distance even when wearing face covering or PPE.*
2. **Wear face covering in public and anytime you will interface with others**, regardless of time. *Distance and face covering are likely the two best methods available to minimize exposures.*
3. **Wash your hands frequently and avoid touching your face, nose and mouth with unwashed hands**. Also, don't be fooled into a false sense of security, believing gloves will fully protect you from COVID-19. Even when you wear gloves for protection against chemicals, you still need to wash your hands to minimize exposure.

Be careful when putting on and taking off PPE to be sure we do not contaminate our hands in the process and then touch our face, nose or mouth with unwashed hands. In doing so, we defeat the purpose of wearing PPE. *Also, don't overdo the hand sanitizer – choose to use soap and water as much as possible.*

4. **Clean and disinfect surfaces you come into contact and minimize touching commonly used surfaces whenever possible**. Cleaning and disinfecting surfaces would not be as important if everyone were wearing face covering and washing their hands more regularly. But because individual behaviors vary quite a bit, we need to do what we can

to protect ourselves and others by routinely cleaning and disinfecting the things we touch. How often will depend on how often you touch a surface or object and whether others are likely to come into contact with it as well. *Cleaning and disinfecting helps reduce exposure, but don't rely on it as a replacement for distancing, face covering and hand washing.*

5. **Monitor your own health** for COVID-19 symptoms and **stay at home**, away from others, if symptoms develop. The sooner you self-isolate, the more you lessen the chance of spreading it to others, regardless of whether it is COVID-19, the flu or some other contagion.

## **8.0 EXPOSURE MONITORING**

The following substances may be encountered on site. The primary hazards of each are identified as follow:

<u>Substances</u>	<u>Concentration</u>	<u>Primary Hazards</u>
Lead	Various	Ingestion, inhalation, skin, eye contact
Heavy Metals	Various	Ingestion, inhalation, skin, eye contact
Polychlorinated Biphenyls	Various	Ingestion, inhalation, skin
Total Petroleum Hydrocarbons	Various	Ingestion, inhalation, skin
Volatile Organic Compounds	Various	Ingestion, inhalation, skin

Lead: Acute exposure to lead via ingestion or inhalation can cause impaired kidney function, high blood pressure, nervous system and neurobehavioral effects, cognitive dysfunction later in life, and subtle cognitive effects attributed to prenatal exposure. Pregnant women need to be especially concerned since exposure can have serious impact on the developing fetus. Even low levels of lead in the blood of children can result in behavior and learning problems, lower IQ and hyperactivity, slowed growth, hearing problems and anemia. In rare cases, ingestion of lead can cause seizures, coma and even death.

Heavy Metals: The main threats to human health from heavy metals are associated with exposure to lead, cadmium, mercury and arsenic. Cadmium compounds are currently mainly used in rechargeable nickel-cadmium batteries. Recent data indicate that adverse health effects of cadmium exposure is primarily in the form of kidney damage but possibly also bone effects and fractures. The general population is primarily exposed to mercury via food, fish being a major source of methyl mercury exposure, and dental amalgam. The general population does not face a significant health risk from methyl mercury, although certain groups with high fish consumption may attain blood levels associated with a low risk of neurological damage to adults and a risk to the fetus in pregnant women. The general population is exposed to lead from air and food in roughly equal proportions. Children are particularly susceptible to lead exposure due to high gastrointestinal uptake and the permeable blood-brain barrier. Recent data indicating that there may be neurotoxic effects of lead at lower levels of exposure than previously anticipated. Exposure to arsenic is mainly via intake of food and drinking water, food being the most important source in most populations. Long-term exposure to arsenic in drinking-water is mainly related to increased risks of skin cancer, but also some other cancers, as well as other skin lesions such as hyperkeratosis and pigmentation changes. Occupational exposure to arsenic, primarily by inhalation, is causally associated with lung cancer.

Polychlorinated Biphenyls (PCBs): PCBs are a group of man-made organic chemicals consisting of carbon, hydrogen and chlorine atoms. They belong to a broad family of organic chemicals known as chlorinated hydrocarbons. They have been demonstrated to cause a variety of adverse health

effects. They have been shown to cause cancer in animals as well as a number of serious non-cancer health effects in animals, including: effects on the immune system, reproductive system, nervous system, endocrine system and other health effects. The different health effects of PCBs may be interrelated. Alterations in one system may have significant implications for the other systems of the body.

Total Petroleum Hydrocarbons (TPH): TPH is a term used to describe a large family of several hundred chemical compounds that originally come from crude oil. A complex blend of petroleum-derived normal and branched-chain alkane, cycloalkane, alkene, and aromatic hydrocarbons. May include benzene and its derivatives, sulfur, and naphthalene. Danger of serious damage to health by prolonged exposure in contact with skin. Possible risk of harm to the unborn child. Repeated exposure may cause skin dryness or cracking. Breathing of high vapor concentrations may cause dizziness, light-headedness, headache, nausea, and loss of co-ordination. Continued inhalation may result in unconsciousness. Prolonged or repeated contact with skin may cause redness, itching, irritation, eczema/chapping and oil acne. Components of the product may be absorbed into the body through the skin. Prolonged and repeated contact with the product may cause skin cancer. May cause damage to the liver.

Volatile Organic Compounds (VOC): VOCs include a variety of chemicals, some of which may have short- and long-term adverse health effects. Health effects include eye, nose, and throat irritation, headaches, loss of coordination, nausea, and damage to liver, kidney, and central nervous system. Some organics are known to cause cancer in humans.

## **ACTION LEVELS AND EXPOSURE LIMITS**

According to OSHA (29 CFR 1926.55 Appendix A, Footnote (A (3))), the composition of TPH varies greatly and thus a single Threshold Limit Value (TLV)<sup>1</sup> for all types of these materials is not applicable. The OSHA Short Term Exposure Limit (STEL)<sup>2</sup> for compounds commonly present in TPH-impacted soil is listed below; these concentrations must not be exceeded when working in areas where these hazardous compounds may be present:

VOCs: 100 ppm<sub>v</sub>

If these concentrations are exceeded and cannot be controlled by local methods, an evacuation of the immediate area and possibly the Site will be ordered in accordance with the evacuation route in Section 11.0.

## **DUST MONITORING**

SCAQMD requires that Rule 403 for Fugitive Dust be followed to reduce the amount of particulate matter entrained into ambient air as a result of normal construction activities. This rule is intended to limit the emissions of fugitive dust or particulate matter from a variety of activities and sources such as construction sites, bulk material hauling, unpaved parking lots, and disturbed soil in open areas and vacant lots; this rule applies to any activity or man-made condition capable of generating fugitive dust.

---

<sup>1</sup> TLV refers to airborne concentrations of chemical substances and represent conditions under which it is believed that nearly all workers may be repeatedly exposed, day after day, over a working lifetime, without adverse effects (American Conference of Governmental Industrial Hygienists (ACGIH)).

<sup>2</sup> Defined as a 15-minute time-weighted average exposure which is not to be exceeded at any time during a workday even if the 8-hour time-weighted average is below the PEL.

Rule 403 requires that fugitive dust generated during any activity or man-made condition such as excavation, demolition, construction, and soil disturbance, shall be prevented, reduced or mitigated.

## **9.0 PERSONAL PROTECTIVE EQUIPMENT**

The purpose of PPE is to protect employees from hazards and potential hazards they are likely to encounter during site activities. The amount and type of PPE used will be based on the nature of the hazard encountered or anticipated. Respiratory protection will be utilized when an airborne hazard has been identified using real-time air monitoring devices, or as a precautionary measure in areas designated by the SSO, elevating to level C. If this occurs, contractor personnel shall be respirator approved.

Dermal protection, primarily in the form of chemical-resistant gloves and coveralls, will be worn whenever contact with chemically affected materials (e.g., soils, groundwater, sludge) is anticipated, without regard to the level of respiratory protection required.

Based on evaluation of potential hazards, the following levels of personal protection have been designated for the applicable work areas or tasks:

<u>Location</u>	<u>Job Function</u>	<u>Level of Protection</u>
Controlled Area	All Workers	A B C <b>D</b> Other

Specific protective equipment for each level of protection is as follows:

**Level A**

- Fully-encapsulating suit
- SCBA
- Disposable coveralls

**Level C**

- Splash gear
- Half-face canister respirator with H<sub>2</sub>S/VOC cartridge
- Mouth/nose canister respirator
- Efficiency 100 (HEPA)

**Level B**

- Splash gear
- SCBA

**Level D**

- Hard hat
- Ear plugs
- Neoprene or leather gloves - nitrile gloves
- Safety vests and Glasses
- Hard toe boots

NO CHANGES TO THE SPECIFIED LEVELS OF PROTECTION SHALL BE MADE WITHOUT THE APPROVAL OF THE SSO OR PROJECT MANAGER.

## **10.0 DECONTAMINATION PROCEDURES**

Despite protective procedures, personnel may come in contact with potentially hazardous compounds while performing work tasks. If so, decontamination needs to take place using an Alconox or tri-sodium phosphate (TSP), followed by a rinse with clean water. Standard decontamination procedure for levels C and D are as follows:

- Equipment drop
- Boot cover and outer glove wash and rinse

- Boot cover and out glove removal
- Suit wash and rinse
- Suit removal
- Safety boot wash and rinse
- Inner glove wash and rinse
- Respirator removal
- Inner glove removal
- Field wash of hands and face

Workers should employ only applicable steps in accordance with level of PPE worn and extent of contamination present. The SSO shall maintain adequate quantities of clean water to be used for personal decontamination (i.e. field wash of hands and face) whenever a suitable washing facility is not located in the immediate vicinity of the work area. Disposable items will be disposed of in an appropriate container. Wash and rinse water generated from decontamination activities will be handled and disposed of properly. Non-disposable items may need to be sanitized before reuse. Each site worker is responsible for the maintenance, decontamination, and sanitizing of his/her own PPE.

Used equipment may be decontaminated as follows:

- An Alconox or TSP and water solution will be used to wash the equipment.
- The equipment will then be rinsed with clean water.

Each person must follow these procedures to reduce the potential for transferring chemically affected materials offsite.

## **11.0 EMERGENCY PROCEDURES**

In the event of an emergency, site personnel will signal distress with three blasts of a horn (a vehicle horn will be sufficient), or other predetermined signal. Communication signals, such as hand signals, must be established where communication equipment is not feasible or in areas of loud noise.

The SSO will designate evacuation routes and refuge areas to be used in the event of an emergency. Site personnel will stay upwind from vapors or smoke and upgradient from spills. Workers should exit through the established decontamination areas wherever possible. If evacuation cannot be done through an established decontamination area, site personnel will go to the nearest safe location and remove contaminated clothing there. Personnel will assemble at the predetermined refuge following evacuation and decontamination. The SSO will count and identify site personnel to verify that all personnel have been evacuated safely. Please refer to Figure 1.0 for the evacuation route and refuge location.

FIGURE 1.0 – EVACUATION ROUTE AND REFUGE AREA

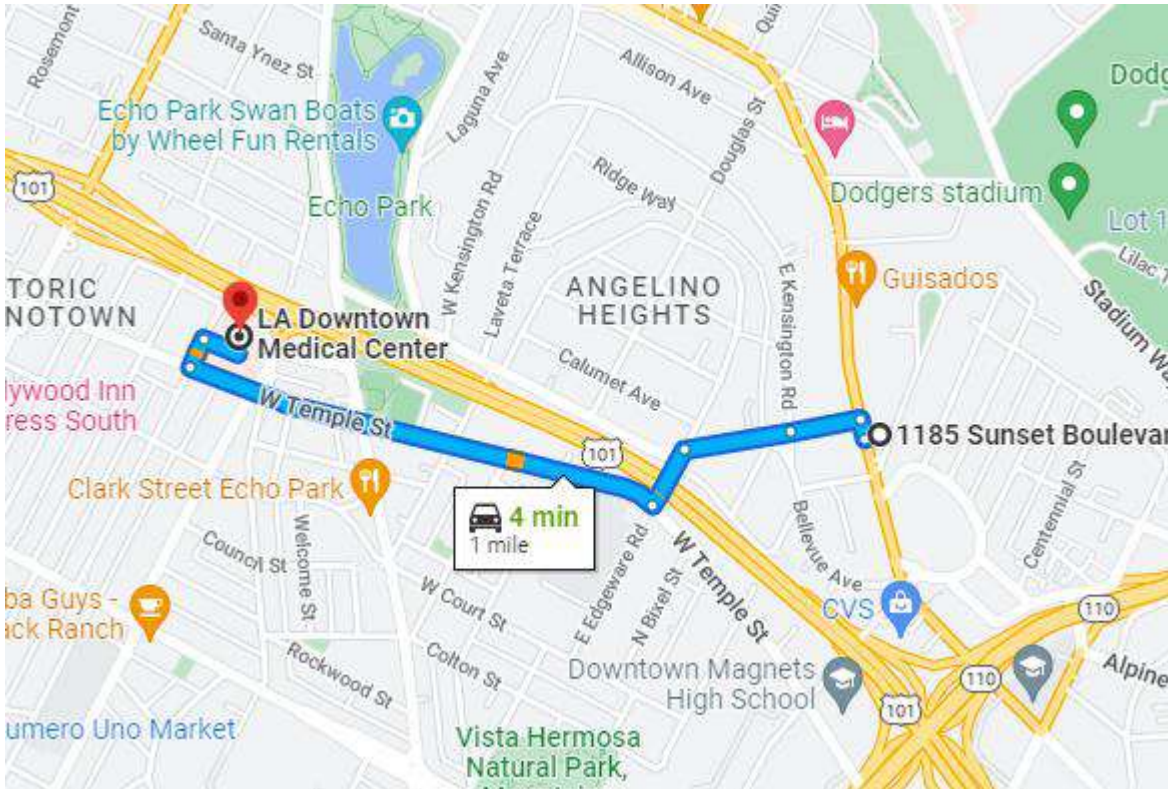

-  = Approximate Project Boundaries
-  = Refuge Area
-  = Evacuation Route

**FIGURE 2.0 – DESIGNATED MEDICAL FACILITY**

The designated medical facility is:

L.A. Downtown Medical Center  
 1711 W Temple St,  
 Los Angeles, CA 90026  
 (213) 989-6100

**Directions:**

- Head north on Sunset Blvd toward Marion Ave 131 ft
- Turn left onto Marion Ave 463 ft
- Continue onto Bellevue Ave 0.1 mi
- Turn left onto E Edgeware Rd 410 ft
- Turn right onto W Temple St 0.6 mi
- Turn right onto N Burlington Ave 203 ft
- Turn right, Destination will be on the left 240 ft

Local ambulance service is available from:

**Name:** Local Paramedics

**Phone:** 911

First-aid equipment is available in the SSO's vehicle.

PROJECT LOCATION	1185 Sunset Boulevard		

TIME	FIELD NOTES
0900	CITADEL REP ARRIVES ON SITE. SITE PRE ASSESSMENT.
0913	HOIST IS UNACCESSIBLE TO SAMPLE. CEMENTED SHUT.
0930	FIRST SAMPLE IS TAKEN FROM WOT1 AND COLLECTED IN 40Z JAR. FREE PRODUCT OILY SUBSTANCE.
0945	UST1 IS UNACCESSIBLE BECAUSE VENT PIPE IS CORRODED AND PORT IS OBSTRUCTED BY ROCKS.
0958	SAMPLE IS TAKEN FROM UST2 AND PLACED INTO 40Z JAR. DEPTH TO BOTTOM OF UST2 IS 10FT, VENT TUBE IS 4FT IN LENGTH.
1011	SAMPLE IS TAKEN FROM UST3 AND COLLECTED IN 40Z JAR. DEPTH TO BOTTOM OF UST3 IS 10FT. VENT PIPE WAS UNACCESSIBLE BECAUSE IT WAS COMPLETELY SEALED OFF. SAMPLE IS TAKEN FROM UST4. COLLECTED IN 40Z JAR. DEPTH TO BOTTOM OF UST4 IS 14FT AND VENT TUBE IS 4FT IN LENGTH. SLUDGE LIKE SUBSTANCE WAS TAKEN FROM MUD SUMP 1 AND COLLECTED IN 40Z JAR. SLUDGE LIKE SUBSTANCE WAS COLLECTED IN 40Z JAR.
1215	CITADEL REP HAS LEFT THE SITE.

PROJECT NUMBER	0942.1020.0	CITADEL REPRESENTATIVE	Scott Grasse <i>Tim Lambert</i>
PROJECT NAME	UST Removal	CONTRACTOR	- IDR
PROJECT WORK AREA	Vacant Land	SUPERVISOR	Scott Grasse
PROJECT LOCATION	1185 Sunset Boulevard		

TIME	FIELD NOTES		
0700	Citadel on site. Meet with IDR, discuss SOW. Crew will be exposing all five USTs on site. All excavated soil will be placed on plastic and covered. Crew is currently unloading delivery of a compressor and an excavator.		
0710	Excavator was delivered with no hydraulic oil.		
0800	Crew brings oil and preps excavator. Begin setup.		
0823	Digging begins at southern most UST.		
0830	Soil has strong odor of gasoline.		
0900	VOC detections fall below 50ppm with observable odor. Begin segregating soil.		
0930	Tank is larger than assumed. Crew begins removing more fencing to expose full length of UST #4.		
0940	UST #4 is found to be 16' long.		
1020	Crew begins cutting open UST #1.		
1045	Crew begins cutting open UST #3.		
1100	UST #3 is full of mostly solids with a small amount of liquid on the west end below the ports. North State will not be able to clean this tank today as they will need to enter the tank and they are not currently equipt for confined space entry.		
1110	Crew breaks for lunch.		
1145	Return from lunch. North State begins setup to clean UST #1.		
1200	IDR begins shifting stockpile to make room for more soil.		
1205	Begin cutting open UST #2.

## **1.0 INTRODUCTION**

Citadel EHS (Citadel) is pleased to provide this Soils Report for the removal of five single-wall steel underground storage tanks (USTs) located at 1185 Sunset Boulevard, in the City of Los Angeles, California (Site). Refer to Figure 1 for a Site Location Map.

On May 27, 2022, the Los Angeles City Fire Department (LAFD) approved the Division 5 permit application and issued permit number SR0034881. A copy of the LAFD Division 5 permit is included in Appendix A. A copy of the LAFD UST Soil Report Requirements is included in Appendix B.

## **2.0 SITE IDENTIFICATION**

### **2.1 Current Owner**

The Site is owned by Aragon (Sunset/Everett) Properties Corp (Owner) and is currently being redeveloped with a multi-level apartment building. The Assessor's Parcel Number (APN) associated with the Site is 5406-016-028.

### **2.2 Current Business Activities**

The Site is a graded lot. Demolition of historical buildings occurred in June 2022. The Site will be redeveloped with a multi-level apartment building.

### **2.2 Spill, Leak, and Accident History**

The Site is not listed on the LAFD active, inactive, or historical UST lists, and no historical spills have been reported.

### **2.3 Number, Capacity, and Contents of Tanks and Other Components**

The Site had five USTs described as follows<sup>1</sup>. Refer to Figure 2 for a Site Map showing the locations of the USTs.

- UST-2: 6,000 gallon capacity single-wall steel UST that contained approximately 100 gallons of gasoline.
- UST-3: 6,000 gallon capacity single-wall steel UST that contained approximately 100 gallons of gasoline.
- UST-4: 2,000 gallon capacity single-wall steel UST that contained approximately 100 gallons of gasoline.
- UST-5: 2,000 gallon capacity single-wall steel UST that was empty of contents.
- UST-6: 150 gallon capacity single-wall steel UST that contained approximately 2 gallons of waste oil.

---

<sup>1</sup> Numbering sequence was chosen to begin with "2"; the five USTs are therefore numbered UST-2 through UST-6.

## **3.0 BACKGROUND AND SUMMARY**

### **3.1 Site Description**

A review of a Phase I Environmental Site Assessment (Phase I) prepared by AEI Consultants (AEI) on February 26, 2013 showed the following:

- From at least 1906, the Site consisted of single-family residences. From at least 1927 to at least 1961, the Site was developed with a gas station and auto repair facility. Gas station operations were conducted until at least 1970 and were subsequently phased out. At the time of AEI's Phase I, the Site was operated as an auto repair facility and car wash.
- During AEI's site reconnaissance, AEI observed patched areas of asphalt on the southern portion of the Site. The patched areas appeared to be the locations of USTs associated with the historical gas station. According to the property owner at the time, four USTs were located at the Site.
- AEI observed two clarifiers at the Site. One clarifier was located in the auto repair garage and the other clarifier was located in the car washing area. Based on the presumed use of a the clarifier for auto repair operations and the on-site historical use of hazardous materials, AEI identified the clarifier located in the garage as a recognized environmental condition (REC).

### **3.2 Previous Investigations**

As part of the Phase I, AEI reviewed a portion of a Phase I and Limited Subsurface Investigation (Phase II) for the Site, prepared by Petra Geotechnical, Inc. (Petra) in 2005. According to AEI's review, a subsurface geophysical survey conducted at the Site delineated the location of four USTs and one waste oil UST in the rear of the car wash. Petra conducted soil sampling in the vicinities of the USTs. The results of the soil sample analyses were that trace amounts of total petroleum hydrocarbons (TPH) were encountered in one sample collected at 22 feet below ground surface (bgs) from the vicinity of the waste oil UST. Petra was unable to find evidence that the site had been impacted from petroleum hydrocarbons and/or volatile organic compounds (VOCs) related to the former site use. However, borings could only be collected from the vicinity of the USTs and not directly below them, and soil vapor testing was not conducted. AEI identified the presence of the USTs as a REC.

Citadel reviewed a Phase II Subsurface Investigation (Phase II) Report prepared on March 22, 2013, by AEI. AEI advanced eight borings across the Site to depths between 16 and 20 feet bgs and collected soil and groundwater samples. The samples were analyzed for VOCs and TPH. No VOCs or TPH were detected in the samples.

## **4.0 GEOLOGY AND HYDROLOGY**

### **4.1 Geology**

The Site is at an elevation of approximately 404 feet above mean sea level (AMSL). The Site is identified on the geologic map of the Hollywood and south half Burbank quadrangles (Dibblee and Ehrenspeck, 1991) as being Miocene age bedrock consisting of gray to light brown thin-bedded silty clay shale, that is soft and crumbly, locally contains scattered hard calcareous nodules, and in places contains laminae of fine grained soft sandstone.

## 4.2 Hydrology

The Site is underlain by bedrock and not located within a groundwater basin. According to AEI's review of Petra's Phase II, soil borings were advanced across the Site to 30 feet bgs and groundwater was not encountered. According to the State Water Resources Control Board (SWRCB) Geotracker online database, groundwater was encountered in 2011 at approximately 12 to 20 feet bgs and flowing to the southwest at the G.H. Palmer and Associates leaking UST (LUST) cleanup site, located at 867 Cesar Chavez Avenue, approximately 0.42 mile southeast of the Site. Groundwater was not encountered during this investigation.

## **5.0 TANK REMOVAL ACTIVITIES, PROCEDURES, ON-SITE INSPECTION**

### 5.1 Tank and Clarifier Contents Sampling

On June 27, 2022, Citadel visited the Site to collect samples of the contents from the USTs and clarifiers. A sample could not be collected from UST No. 5 due to inaccessible ports. Access to the clarifier in the auto repair garage was not accessible due to the presence of trash and other debris. Citadel observed an uncovered concrete drainage sump with dimensions of approximately two feet wide and long, and one foot deep, and containing a dark sludgy material. Samples were collected from UST Nos. 2, 3, 4 and 6, the clarifier located in the car wash area, and the sump.

The samples were analyzed for TPH by EPA Method 8015B, VOCs including fuel oxygenates and naphthalene by EPA Method 8260B, and Title 22 Metals by EPA Method 6010B/7471. Due to the historical usage of UST No. 6 as a waste oil UST and lack of historical information regarding the use of the clarifier and sump, the samples from UST No. 6, the clarifier and sump were also analyzed for polychlorinated biphenyls (PCBs) by EPA Method 8082.

The results are presented in Tables 1 and 2. The laboratory reports are included in Appendix C. Based on the analytical results, Citadel finds the following.

- The contents of USTs No. 2 through 4 consisted of gasoline and diesel range hydrocarbons, hydrocarbon-related volatile organic compounds, and lead. The contents of UST No. 6 consisted of diesel range hydrocarbons, hydrocarbon related VOCs, and lead.
- TPH as diesel (TPHd) and TPH as oil (TPHo) were reported in the clarifier and sump samples, at concentrations above construction worker exposure screening levels in the sump sample.
- Copper and lead in the clarifier sample, and chromium, copper and lead in the sump sample were reported at concentrations that were above their respective Soluble Threshold Limit Concentration (STLC) thresholds<sup>2</sup>. The samples were therefore analyzed for these constituents by the STLC procedure. Results of the analyses were STLC concentrations below their respective STLC regulatory limits, and therefore are not classified as hazardous waste.

---

<sup>2</sup> California Code of Regulations, Title 22, Division 4.5, Chapter 11, Article 3, Section 66261.24 (CCR T22:66261.24).

## 5.2 Tank Removal Activities

A site-specific health and safety plan (HASP) was prepared prior to on-site activities. This HASP identified existing and potential hazards for workers at the Site during excavation, UST removal, and sample collection activities. Refer to Appendix D for a copy of the HASP, Appendix E for Citadel's Field Notes, and Appendix F for a Photographic Log.

On July 12, 2022, Citadel, Integrated Demolition and Remediation, Inc. (IDR), located in Anaheim, California, and North State Environmental (North State), located in Rialto, California, mobilized to the Site to begin the process of exposing and cleaning the USTs. Approximately 285 cubic yards (cy) of soil was removed and stockpiled adjacent to the USTs. Citadel performed air monitoring during all excavation activities using a photoionization detector (PID) calibrated to hexane gas, in accordance with SCAQMD Rule 1166 requirements. During excavation activities, VOCs were detected from some of the excavated spoils, at concentrations between 4 and 162 ppmv. Upon measuring VOCs of 50 ppmv or greater, the soil was segregated into a separate stockpile. Refer to Appendix G for Rule 1166 air monitoring log records.

The top of each UST was located at approximately four feet bgs. Following exposure of the top of the UST, North State remove residual fluids from the USTs and cleaned the USTs. During the UST cleaning process, 1,575 gallons of residual fluids and rinsate were produced. North State placed the fluids into 50-gallon totes and 55-gallon steel drums. The totes and drums were removed from the Site on July 12, 2022, by North State, and transported to US Ecology Inc. (US Ecology) in Beatty, Nevada. The fluids disposal manifest is included in Appendix H.

On July 14, 2022, Citadel and IDR mobilized to the site to begin the process of removing the USTs. The USTs were certified clean by Ms. Nancy G. Carraway, a Certified Industrial Hygienist (CIH), prior to removal. Ms. Carraway labeled each UST with white paint. The USTs were then placed on a flatbed truck by IDR for transportation to Advanced Steel Recovery, in Fontana, California for recycling. A copy of the Hazardous Waste Tank Closure Certification Report processed by Ms. Carraway is included as Appendix I. The UST Certificate of Destruction is included as Appendix J.

The soil directly beneath the west end of UST No. 3 was stained and emitted a strong gasoline odor. VOC concentrations when measured with the PID exceeded the instrument upper limit of 10,000 ppmv. No other evidence of contamination of the USTs was observed. The integrity of the USTs did not appear compromised after being pulled out of the excavation area.

## 5.3 Soil Sampling

On July 14, 2022, and at the direction of LAFD Inspector Belknap, soil samples were collected from approximately two feet beneath the east and west ends of each UST. Samples are identified by the sample date, UST number, and cardinal direction relative to the tank ends. For example, 0714-5-EAST was collected from beneath the east end of UST No. 5 on July 14, 2022. Inspector Belknap directed the collection of stockpile samples from the north and south ends of the excavated soil stockpile, identified as samples SP-UST-North and SP-UST-South, and from the segregated VOC-impacted soil, identified as SP-1166. Soil samples were collected by State Professional Geologist Mr. Scott Grasse under EPA 5035 protocol using the TerraCore sampling system.

## 5.4 Excavation and Removal of Impacted Soil

On August 11, 2022, Citadel and IDR mobilized to the Site to excavate and remove the gasoline-impacted soil beneath the west end of UST No. 3. Under the direction of Inspector Belknap, the impacted soil was removed, and a soil sample collected at the base of the excavated area,

identified as UST-SOIL-081122. A total of 21.36 tons (approximately 14 cy) of gasoline-impacted soil was segregated and removed from the Site to Waste Management Simi Valley under waste tracking number 2022-336. A total of 25.84 tons (approximately 17 cy) of stockpiled VOC-impacted soil was segregated and removed from the Site to Waste Management Simi Valley under waste tracking number 2022-337. Refer to Appendix K for the Hauling Manifests.

## 5.5 Clarifier and Sump Removal

On August 11, 2022, following removal of the gasoline-impacted soil, IDR removed the clarifier located in the car wash area, and the sump. Citadel was not present during these removal activities.

## 5.6 Laboratory Analyses

Based on the historical usage of each UST and under the direction of Inspector Belknap, the soil samples were analyzed per LAFD analytical group requirements as follows.

- UST Nos. 2 through 4: Group A requirement to include TPH as gasoline (TPHg), benzene, toluene, ethylbenzene and xylene (BTEX), fuel oxygenates, and naphthalene.
- UST Nos. 5 and 6: Group C requirement to include TPH full carbon chain and VOCs including fuel oxygenates and naphthalene.

Soil samples collected from beneath the USTs and the stockpiles were analyzed for TPH by EPA Method 8015B and VOCs by EPA Method 8260B. To profile the stockpiled soil for potential removal, SP-UST-North, SP-UST-South and SP-1166 were also analyzed for Title 22 metals by EPA Method 6010B/7471.

Laboratory results are presented in Tables 1 and 2. Refer to Appendix C for the Laboratory Reports. Results of the analyses are the following.

- TPHg was reported in 0714-2-EAST, at a concentration of 2.4 mg/kg, below the LAFD minimum action level (MAL) of 100 mg/kg.
- TPH as diesel (TPHd) and TPH as oil (TPHo) were reported in 0714-5-WEST, at concentrations of 6.1 and 4.5, mg/kg, respectively, below the LAFD minimum action level (MAL) for TPHg of 100 mg/kg.
- TPHg was reported in 0714-3-WEST, at a concentration of 740 mg/kg, above the LAFD minimum action level (MAL) of 100 mg/kg. However, the soil represented by this sample was removed from the Site as described in Section 5.3, and is no longer present at the Site. No TPHg was reported in the confirmation sample UST-SOIL-081122 that was collected subsequent to excavation of the impacted soil.
- TPHg, TPHd and TPHo, and a total of six VOCs were reported in SP-1166, at concentrations that are below their respective residential and construction worker exposure screening levels.
- TPH and TPHo were reported in SP-UST-North and SP-UST-South, at concentrations that are below their respective residential and construction worker exposure screening levels.
- TPH and VOCs were not reported at concentrations above the laboratory method detection limit (MDL) in any of the other soil samples.
- Concentrations of reported heavy metals in soil were reported below respective residential and construction worker exposure screening levels, Total Threshold Limit Concentration (TTL) regulatory limits, and Soluble Threshold Concentration Limit (STLC) thresholds. The exception is arsenic reported in all samples at concentrations

that are above the residential screening level of 0.11 mg/kg, but below the DTSC background arsenic level of 12 mg/kg.

## 5.7 Statement of Responsibility

The tasks and activities associated with this project were conducted under the supervision of Mr. Scott Grasse, PG#9878. Mr. Grasse is a Professional Geologist as defined in the Geologist and Geophysicists Act.

## **6.0 FINDINGS AND RECOMMENDATIONS**

Based on the laboratory analytical results, Citadel finds the following:

- Five USTs, one clarifier, and one sump were removed from the Site.
- Samples from the UST contents, the sump and clarifier were collected and analyzed.
  - The contents of USTs No. 2 through 4 consisted of gasoline and diesel range hydrocarbons, hydrocarbon-related volatile organic compounds, and lead. The contents of UST No. 6 consisted of diesel range hydrocarbons, hydrocarbon related VOCs, and lead.
  - TPH as diesel (TPHd) and TPH as oil (TPHo) were reported in the clarifier and sump samples, at concentrations above construction worker exposure screening levels in the sump sample.
  - Copper and lead in the clarifier sample, and chromium, copper and lead in the sump sample were reported at concentrations that were above their respective Soluble Threshold Limit Concentration (STLC) thresholds, and below their respective STLC regulatory limits, and therefore are not classified as hazardous waste.
- Gasoline-impacted soil with reported TPHg above the LAFD MAL was excavated and removed from the Site.
  - A total of 21.36 tons (approximately 14 cy) of gasoline-impacted soil was segregated and removed from the Site.
  - A total of 25.84 tons (approximately 17 cy) of VOC-impacted soil was segregated and removed from the Site under AQMD Rule 1166 protocol.
  - Under LAFD oversight, a confirmation soil sample identified as UST-SOIL-081122 was collected following the removal of impacted soil.
- Under LAFD oversight, soil samples were collected from beneath each UST.
  - TPH was reported in soil samples collected from beneath UST Nos. 2 and 5, at concentrations that are below the LAFD MAL.
  - TPHg was reported in 0714-3-WEST, at a concentration that was above the LAFD MAL. However, the soil was removed from the Site and the area was resampled. No TPHg was reported in the confirmation sample.
  - TPH and VOCs were not reported at concentrations above the MDL in any of the other soil samples,
  - Reported concentrations of heavy metals were below exposure screening levels, TLC regulatory limits and STLC thresholds.
- Under LAFD oversight, soil samples were collected from two stockpiles of soil.
  - TPH and VOCs were reported in stockpile soil samples at concentrations that are below exposure screening levels.
  - Reported concentrations of heavy metals were below exposure screening levels, TLC regulatory limits and STLC thresholds.

Due to the absence VOCs and TPH above LAFD MALs, Citadel recommends no further action with respect to the USTs removal. Citadel respectfully requests that LAFD grant a closure letter for the USTs.

### Renewal Confirmation

*This is a confirmation receipt for your submitted renewal. Please print and keep this receipt for your records.*

#### Transaction Information:

Your Renewal was submitted and received on 01/28/2022.

The confirmation number for this transaction is **F0002921760000162022**

Your on-line payment for \$399.40 was submitted and received.

The payment reference number is 2226575200

Based on the information that you have submitted thus far, the following are your identified taxable business activities.

*Note: The issuance of a Tax Registration Certificate and the payment of the business tax do not authorize the conduct or continuance of any illegal business or of a legal business in an illegal manner within the City of Los Angeles. The City has enacted regulatory ordinances in areas such as zoning, building safety, police, fire, hazardous material disclosure, sanitation, health, etc., which must be complied with in order to lawfully conduct a business within the City. Failure to comply with these regulatory ordinances may result in legal action being taken against the taxpayer.*

#### **Taxable Activities:**

Business Activity

Basis for Tax

Contractor(L188)

300000

CA STATE FEE (SB 1186)	\$4.00
<b>Total Amount Due:</b> (Total tax due, including any interest and penalties for late payment. If total amount due is zero then no tax is due.)	▶ \$399.40
Six (6) digit Primary/Principal Business or Professional Activity Code Number as reported on your Federal tax return: Refer to the instructions with your Federal tax return to determine this code. (Copies of Form 1040 Schedule C instructions are available on-line at <a href="http://www.irs.ustreas.gov">www.irs.ustreas.gov</a> ( <a href="http://www.irs.ustreas.gov">http://www.irs.ustreas.gov</a> ) under Forms and Publications.)  Note: If your business was newly established in 2021 and you have not yet filed a Federal Tax Return, you may leave this line blank.	None
Six (6) digit Primary/Principal Business or Professional Activity Code for any secondary business activity that comprises at least \$1,000,000 and 40% of your gross receipts:	None

**Please provide us with additional information below:**

Is this business Female Owned?  Yes  No

- A Female-Owned Business is defined as a business with at least 51% owned by one or more women.

Is this business Minority Owned?  Yes  No

- A business is minority owned if it is at least 51% or more owned by an ethnic minority. An ethnic minority is an individual of African-American, Hispanic American, Native American, Asian American, Pacific Islander, Asian Indian American origin or heritage.

Is the aggregate cost of your business personal property \$100,000 or more?  Yes  No

- Each year the Los Angeles County Assessor is responsible for the assessment of business personal property for property tax purposes. Examples of business personal property are machinery, equipment, furniture, computers, tools and supplies, etc. Business inventory is exempt and not subject to property tax. A business property statement, Form 571-L, is required to be filed if the aggregate cost of your taxable personal property is \$100,000 or more on January 1 of each year, or if the Assessor requests you to file a statement. To learn more about Los Angeles County business personal property tax, visit the [Assessor's website \(https://assessor.lacounty.gov/\)](https://assessor.lacounty.gov/)

## 2022 City of Los Angeles Business Tax Renewal

Thank you for filing your 2021 Business Tax Renewal online! We encourage you to continue using our **E-Filing System for your 2022 renewal**. Please note that this postcard is your only official reminder concerning your 2022 renewal requirement for the account shown on the front of this card.

Visit [finance.lacity.org/renewal](https://finance.lacity.org/renewal), enter a few details and the system automatically calculates your business tax liability, if any. To access E-Filing, you can use either your **account number, your Social Security Number, or your Federal Employer Identification Number**. If a tax liability is due you can pay online via e-check, credit card (a service fee will apply), or by ACH (required if your tax liability is \$50,000 or more).

Business tax renewals are due on January 1, 2022 and delinquent if submitted after **February 28, 2022**. **Even if no tax is due, you must submit a completed renewal!** For more information, please visit our website at [finance.lacity.org](https://finance.lacity.org) or contact us at (844) 663-4411.

California Assembly Bill 1379 – As required by State Law, a \$4.00 fee must be paid for each year that you report a tax liability to the City. The \$4.00 fee will **not** apply to any year in which you are exempt from a tax liability. For more information visit: [finance.lacity.org/AB1379](https://finance.lacity.org/AB1379)

As many business owners have been affected as a result of the COVID-19 pandemic, the City of Los Angeles along with other entities have enacted programs that may assist businesses during this time. Please visit our website at <https://finance.lacity.org/blog/covid-19-business-resources> for a list of organizations and websites that provide information regarding assistance. For updates from the Mayor's office please visit [corona-virus.la](https://corona-virus.la).

**PLEASE DO NOT REPORT TO OUR PUBLIC COUNTERS**

## Contractor's License Detail for License # 1003504

**DISCLAIMER: A license status check provides information taken from the CSLB license database. Before relying on this information, you should be aware of the following limitations.**

- ▶ CSLB complaint disclosure is restricted by law (B&P 7124.6) If this entity is subject to public complaint disclosure click on link that will appear below for more information. Click [here](#) for a definition of disclosable actions.
- ▶ Only construction related civil judgments reported to CSLB are disclosed (B&P 7071.17).
- ▶ Arbitrations are not listed unless the contractor fails to comply with the terms.
- ▶ Due to workload, there may be relevant information that has not yet been entered into the board's license database.

## Site Plan and Vicinity Map

Map Source: Google (2022)

- ┌ Site Boundary
- UST

**Scope of Work:** Abandon by removal five (5) underground storage tanks (UST). A Site Plan and Vicinity Map is provided at left. A detailed Scope of Work for the abandonment by removal is outlined below:

1. Four 500-gallon capacity fuel USTs and one 150-gallon capacity waste oil UST from historical gasoline station operations are buried at the site. Access to the fuel USTs is via a surface access port that is presently sealed with asphalt. An access port for the waste oil UST is not observable due to the presence of trash and debris. Citadel believes the USTs to be buried approximately two to four feet underground and are of single-walled steel construction. The fuel USTs are assumed to be of approximately 6 feet in length and 48 inches in diameter. The waste oil UST is assumed to be approximately 4 feet in length and 30 inches in diameter. The contents of each UST is unknown.
2. Prior to beginning work, a Health and Safety Plan (HASP) will be prepared and implemented.
3. All tank identifications shall remain on the tank. Do not remove the Underwriter's Laboratory tag or any other identification from the tank. The Division 5 Permit number and "LAFD" will be painted on the side of the UST.
4. A combustible gas indicator (properly calibrated) will be on the job site during the entire operation.
5. During soil disturbance and removal processes, Citadel will monitor air emissions at 15-minute intervals using a direct reading portable photo-ionizing detector (PID), or equivalent, and record the measurements.
6. Prior to excavation, place a minimum of 20 pounds of dry ice per 1,000 gallons capacity into each tank at least TWO HOURS PRIOR to any further work being performed. All excavated soil (from the unearthing of the UST) must be retained on site and covered until determination of contamination and disposal has been made. Soil may be removed only with approval from the LAFD Inspector.
7. No cutting torch, open flame, or spark-producing equipment shall be used on the tank or piping. Electric lines, piping, and other tank apparatus shall be isolated or disconnected. All piping shall be left intact until the tank is exposed and ready to be removed.
8. Check the tank for an explosive atmosphere utilizing a combustible gas indicator. Air purging of the tank shall be initiated whenever the atmosphere inside the tank is above 20 percent of the lower explosive limit (LEL).
9. If the tank is not empty, remove residual product with a vacuum truck using a high-pressure water rinse with a minimum 2,000 psi, and detergent (if necessary). All interior rinse water and sludge shall be manifested and transported to a licensed hazardous waste disposal site or licensed TSD by a licensed hazardous waste transporter and a copy of the manifest will be supplied to the LAFD inspector.
10. A certified Industrial Hygienist or Marine Chemist will certify that the tank is clean and supply a copy of the certification to the LAFD Inspector.
11. Lift the tank from the excavation and inspect for signs of leakage then secure it on an appropriate transport vehicle with its openings at the top. The UST shall be removed intact and not punctured or crushed on-site. The licensed transporter shall transport the tank to a licensed recycler or waste disposal site, subject to all applicable government regulations.
12. The LAFD Inspector witnessing the abandonment shall be given a copy of the transport manifest, and shall be given the address as to where the tank will be transported.
13. Soil samples shall be obtained from beneath the tank, piping, and spoils pile at the direction of the LAFD Inspector. Soil sampling shall be performed by a Professional Geologist, or a trained technician deemed qualified to take soil samples if they have a letter in their possession certifying their training and experience in taking soil samples and are under the supervision of the Professional Geologist.
14. Soil samples will be analyzed for the full range of total petroleum hydrocarbons as gasoline (TPHg) by EPA method 8015M, benzene, toluene, ethylbenzene, and xylene (BTEX), oxygenates and naphthalene by EPA Method 8260B. Additional analyses may be required per the LAFD inspector.

**Facility Owner:**

COMMENTS

The soil report should follow the Los Angeles Fire Department's General Report submittal guidelines. To assist you, the guidelines are available at [http://www.lafd.org/sites/default/files/pdf\\_files/fpb41\\_tank\\_aband.pdf](http://www.lafd.org/sites/default/files/pdf_files/fpb41_tank_aband.pdf).

**The following documentation shall be included as part of your report:**

- A copy of the Los Angeles Fire Department Division 5-Permit
- Marine Chemist Certificate
- Copy of the Hazardous Waste Manifest for Disposal of Tank's Rinsate
- Certificate of Tank Disposal/Destruction and associated piping
- Soil manifest for soil removed from the site
- Scaled plot plan, clearly illustrating the location and depth of all the samples collected
- All analytical results should be presented in milligram per kilogram (mg/kg)
- All names in the chain of custody must be legible
- A copy of this page
- **If soil analysis results exceed the LAFD Minimum Action Levels, include an Unauthorized Release Report (URR) with your soil report**

### ANALYTICAL REQUIREMENTS

Group A <i>Gasoline</i>	Group-B <i>Diesel</i>	Analytical Method	Required MDL's (ug/kg)	LAFD Minimum Action Levels mg/kg
Analyte	Analyte

# UST SOIL REPORT REQUIREMENTS

## 1.0 Cover Letter/Introduction/Table of Contents

## 2.0 Site Identification

- 2.1 Current owner/s
- 2.2 Current business activities
- 2.3 Spill, leak, and accident history
- 2.4 Number, capacity, and contents of tanks and other components

## 3.0 Background and Summary

- 3.1 Site description
- 3.2 Previous investigation
- 3.3 Wet ink signature
- 3.4 Geologist Seal with I.D number and expire date (stamp)
- 3.5 Name and address of individual that produced the report

**NOTE:** All reports must include the wet-ink signature and seal of one of the following licensed professionals: Professional Civil Engineer (PE), Professional Geologist (PG), Certified Engineering Geologist (CEG), Certified Hydrogeologist (CHG), Professional Petroleum Engineer (PPE)

## 4.0 Geology and Hydrology

- 4.1 Geology
- 4.2 Hydrology

## 5.0 Tank Removal Activities, Procedures, On-site Inspection

- 5.1 Tank Removal/or abandonment in place activities
- 5.2 Clarifier Removal/associated with a UST **only**
- 5.3 Dispenser Replacement/Upgrade activities
- 5.4 Piping Replacement/Upgrade activities
- 5.5 Laboratory Analyses and Chain-of –Custody
- 5.6 Condition of tanks and pit upon removal
- 5.7 Date of removal activities & sampling protocols
- 5.8 Name & address of Removal Company

## 6.0 Soil Disposal Operations/Contaminated soil

## 7.0 AQMD Rule 1166 Air Monitoring

## 8.0 Recommendations/Conclusion

## 9.0 List of Figures/Maps

- 9.1 Site Location Map with cross streets
- 9.2 Site Plan (soil sample locations)

## 10.0 List of Tables

- 10.1 Soil analytical Laboratory Results per LAFD guidelines
- 10.2 Indicate which analytical method and detection limit used
- 10.3 Report all “non-detect” (ND) with < numerical MDL value (not just the ND without the detection limit value)

## 11.0 List of Appendices

- 11.1 Copy of the LAFD Div-5 Permit
- 11.2 UST Certification for Removal
- 11.3 Tank Rinsate Disposal Manifest
- 11.4 Analytical Results with chain of custody
- 11.5 Soil Disposal Manifest
- 11.6 AQMD Rule 1166 Field Monitoring Data Sheets
- 11.7 Tank disposal manifest/with facility address
- 11.8 UST Soil Report Requirements

Location: UST Sampling, 1185 Sunset Blvd., Los Angeles, CA

Irvine, CA 92606

Date Received: 06/27/22

Scott Grasse

---

This data package contains sample and QC results for one oily sludge sample, requested for the above referenced project on 06/27/22. The sample was received intact.

### **TPH-Extractables by GC (EPA 8015M):**

- ORO C28-C44 was detected between the MDL and the RL in the method blank for batch 292101; this analyte was detected in the sample at a level at least 10 times that of the blank.
- No other analytical problems were encountered.

### **Volatile Organics by GC/MS (EPA 8260B):**

- CLARIFIER1 (lab # 464925-001) was diluted due to foaming.
- No other analytical problems were encountered.

### **PCBs (EPA 8082):**

- CLARIFIER1 (lab # 464925-001) was diluted due to the viscous nature of the sample extract.
- No other analytical problems were encountered.

### **Metals (EPA 6010B and EPA 7471A):**

- Low recoveries were observed for antimony in the MS/MSD for batch 292010; the parent sample was not a project sample. High recoveries were observed for vanadium; the associated RPD was within limits. High RPD was observed for antimony.
- No other analytical problems were encountered.

## SAMPLE ACCEPTANCE CHECKLIST

### Section 1

Client: Citadel EHS

Project: Limited Phase II SI

Date Received: 6/27/22

Sampler's Name Present:  Yes  No

### Section 2

Sample(s) received in a cooler?  Yes, How many? 1  No (skip section 2)

Sample Temp (°C) (No Cooler): \_\_\_\_\_

Sample Temp (°C), One from each cooler: #1: 24.4 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

*(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)*

Shipping Information: \_\_\_\_\_

### Section 3

Was the cooler packed with:  Ice  Ice Packs  Bubble Wrap  Styrofoam  
 Paper  None  Other \_\_\_\_\_

Cooler Temp (°C): #1: 23.0 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

### Section 4

	YES	NO	N/A
Was a COC received?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are sample IDs present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are sampling dates & times present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is a relinquished signature present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the tests required clearly indicated on the COC?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are custody seals present?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
If custody seals are present, were they intact?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Did all samples arrive intact? If no, indicate in Section 4 below.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Did all bottle labels agree with COC? (ID, dates and times)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Were the samples collected in the correct containers for the required tests?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the containers labeled with the correct preservatives?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Is there headspace in the VOA vials greater than 5-6 mm in diameter?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Was a sufficient amount of sample submitted for the requested tests?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Section 5 Explanations/Comments

\_\_\_\_\_

### Section 6

For discrepancies, how was the Project Manager notified?  Verbal PM Initials: \_\_\_\_\_ Date/Time \_\_\_\_\_  
 Email (email sent to/on): \_\_\_\_\_ / \_\_\_\_\_

Project Manager's response: \_\_\_\_\_

Location: UST Sampling, 1185 Sunset Blvd., Los Angeles, CA

Irvine, CA 92606

Date Received: 06/27/22

Scott Grasse

---

This data package contains sample and QC results for one oily sludge sample, requested for the above referenced project on 06/27/22. The sample was received intact.

### **TPH-Extractables by GC (EPA 8015M):**

- ORO C28-C44 was detected between the MDL and the RL in the method blank for batch 292101; this analyte was detected in the sample at a level at least 10 times that of the blank.
- No other analytical problems were encountered.

### **Volatile Organics by GC/MS (EPA 8260B):**

- SUMP 1 (lab # 464924-001) was diluted due to foaming.
- No other analytical problems were encountered.

### **PCBs (EPA 8082):**

- SUMP 1 (lab # 464924-001) was diluted due to the viscous nature of the sample extract.
- No other analytical problems were encountered.

### **Metals (EPA 6010B and EPA 7471A):**

- Low recoveries were observed for antimony in the MS/MSD for batch 292010; the parent sample was not a project sample. High recoveries were observed for vanadium; the associated RPD was within limits. High RPD was observed for antimony.
- No other analytical problems were encountered.

## SAMPLE ACCEPTANCE CHECKLIST

### Section 1

Client: Citadel EHS

Project: Limited Phase II SI

Date Received: 6/27/22

Sampler's Name Present:  Yes  No

### Section 2

Sample(s) received in a cooler?  Yes, How many? 1  NO (skip section 2) Sample Temp (°C) (No Cooler) : \_\_\_\_\_

Sample Temp (°C), One from each cooler: #1: 24.4 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

*(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)*

Shipping Information: \_\_\_\_\_

### Section 3

Was the cooler packed with:  Ice  Ice Packs  Bubble Wrap  Styrofoam  
 Paper  None  Other \_\_\_\_\_

Cooler Temp (°C): #1: 23.0 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

### Section 4

	YES	NO	N/A
Was a COC received?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are sample IDs present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are sampling dates & times present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is a relinquished signature present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the tests required clearly indicated on the COC?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are custody seals present?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
If custody seals are present, were they intact?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Did all samples arrive intact? If no, indicate in Section 4 below.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Did all bottle labels agree with COC? (ID, dates and times)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Were the samples collected in the correct containers for the required tests?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the containers labeled with the correct preservatives?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Is there headspace in the VOA vials greater than 5-6 mm in diameter?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Was a sufficient amount of sample submitted for the requested tests?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Section 5 Explanations/Comments

### Section 6

For discrepancies, how was the Project Manager notified?  Verbal PM Initials: \_\_\_\_\_ Date/Time \_\_\_\_\_  
 Email (email sent to/on): \_\_\_\_\_ / \_\_\_\_\_

Project Manager's response: \_\_\_\_\_

Date Received: 06/27/22

Scott Grasse

---

This data package contains sample and QC results for four oil samples, requested for the above referenced project on 06/27/22. The samples were received intact.

### **TPH-Extractables by GC (EPA 8015M):**

- ORO C28-C44 was detected between the MDL and the RL in the method blank for batch 292101; this analyte was not detected in samples at or above the RL.
- No other analytical problems were encountered.

### **Volatile Organics by GC/MS (EPA 8260B):**

- Response exceeding the instrument's linear range was observed for 1,2,4-trimethylbenzene in UST3 (lab # 464923-003); affected data was qualified with "E".
- No other analytical problems were encountered.

### **PCBs (EPA 8082):**

- A number of samples were diluted due to the dark and viscous nature of the sample extracts.
- No other analytical problems were encountered.

### **Metals (EPA 6010B and EPA 7471A):**

- Low recoveries were observed for antimony in the MS/MSD for batch 292010; the parent sample was not a project sample. High recoveries were observed for vanadium; the associated RPD was within limits, and this analyte was not detected at or above the RL in the associated samples. High RPD was observed for antimony; this analyte was not detected at or above the RL in the associated samples.
- No other analytical problems were encountered.

 Sample Temp (°C), One from each cooler: #1: 24.4 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_  
*(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)*  
 Shipping Information: \_\_\_\_\_

**Section 3**  
 Was the cooler packed with:  Ice  Ice Packs  Bubble Wrap  Styrofoam  
 Paper  None  Other \_\_\_\_\_  
 Cooler Temp (°C): #1: 23.0 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

Section 4	YES	NO	N/A
Was a COC received?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are sample IDs present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are sampling dates & times present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is a relinquished signature present?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the tests required clearly indicated on the COC?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are custody seals present?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
If custody seals are present, were they intact?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Did all samples arrive intact? If no, indicate in Section 4 below.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Did all bottle labels agree with COC? (ID, dates and times)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Were the samples collected in the correct containers for the required tests?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the containers labeled with the correct preservatives?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Is there headspace in the VOA vials greater than 5-6 mm in diameter?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Was a sufficient amount of sample submitted for the requested tests?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Section 5 Explanations/Comments**  
 \_\_\_\_\_  
 \_\_\_\_\_

**Section 6**  
 For discrepancies, how was the Project Manager notified?  Verbal PM Initials: \_\_\_\_\_ Date/Time \_\_\_\_\_  
 Email (email sent to/on): \_\_\_\_\_ / \_\_\_\_\_  
 Project Manager's response:

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

## Qualifiers

### GC/MS VOA

Qualifier	Qualifier Description
*1	LCS/LCSD RPD exceeds control limits.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

## Job ID: 570-103103-1

### Laboratory: Eurofins Calscience

#### Narrative

#### Job Narrative 570-103103-1

#### Comments

No additional comments.

#### Receipt

The samples were received on 7/14/2022 4:56 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 4.9° C.

#### GC/MS VOA

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-249502. The laboratory control sample (LCS) was performed in duplicate (LCSD) to provide precision data for this batch.

Method 8260B: The initial calibration curve analyzed in batch 570-249502 was outside method criteria for the following analyte(s): Bromomethane. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte(s) is considered an estimated concentration.

Method 8260B: The following samples were diluted due to the nature of the sample matrix / hydrocarbons: 0714-3-WEST (570-103103-7) and 0714-2-EAST (570-103103-10). Elevated reporting limits (RLs) are provided.

Method 8260B: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for analytical batch 570-249628 recovered outside control limits for the following analyte: Acetone. The Laboratory control sample / laboratory control sample duplicate (LCS/LCSD) percent recovery is in control for affected analytes.

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-249628.

Method 8260B: The initial calibration curve analyzed in batch 570-249628 was outside method criteria for the following analyte: Bromomethane. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered an estimated concentration.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC VOA

Method 8015B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-249519. The laboratory control sample (LCS) was performed in duplicate (LCSD) to provide precision data for this batch.

Method 8015B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with batch 250244.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC Semi VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### Metals

Method 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries of Antimony and Barium for preparation batch 570-249451 and analytical batch 570-249591 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.(570-103076-H-1-B MS ^5) and (570-103076-H-1-C MSD ^5)

Method 6010B: The post digestion spike % recovery for Antimony associated with batch 570-249591 was outside of control limits. The

### Laboratory: Eurofins Calscience (Continued)

associated sample is: (570-103076-H-1-A PDS ^5).(570-103076-H-1-A PDS ^5)

Method 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries of Antimony for preparation batch 570-250204 and analytical batch 570-250336 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries of Antimony for preparation batch 570-249804 and analytical batch 570-250354 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

### Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

### VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

# Detection Summary

Client: Citadel Environmental Services Inc  
Project/Site: 1185 Sunset Blvd.

Job ID: 570-103103-1

## Client Sample ID: 0714-6-EAST

## Lab Sample ID: 570-103103-1

Analyte	Result	Qualifier	RL	Unit	Dil Fac	D	Method	Prep Type
Arsenic	4.63		3.00	mg/Kg	5		6010B	Total/NA

# Surrogate Summary

Client: Citadel Environmental Services Inc  
 Project/Site: 1185 Sunset Blvd.

Job ID: 570-103103-1

## Method: 8015B - Gasoline Range Organics - (GC) (Continued)

Matrix: Solid

Prep Type: Total/NA

### Percent Surrogate Recovery (Acceptance Limits)

Lab Sample ID	Client Sample ID	BFB1 (42-126)
LCSD 570-250244/4	Lab Control Sample Dup	104
MB 570-249519/5	Method Blank	72
MB 570-250244/5	Method Blank	98
MB 570-250244/6	Method Blank	93

#### Surrogate Legend

BFB = 4-Bromofluorobenzene (Surr)

## Method: 8015B - Diesel Range Organics (DRO) (GC)

Matrix: Solid

Prep Type: Total/NA

### Percent Surrogate Recovery (Acceptance Limits)

Lab Sample ID	Client Sample ID	OTCSN1 (60-138)
570-102864-A-3-B MS	Matrix Spike	132

Virendra,

Please cancel the request for ethanol analyses for all samples on this project. Also, please add TPH full carbon chain and T22 metals 6010B/7471A for sample 0714-3-WEST.

Thank you, Scott

Question	Answer	Comment
Radioactivity wasn't checked or is <math>\leq</math> background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

**Site Address: 1185 Sunset Blvd. Los Angeles**

Enclosed are the results of analyses for samples received by the laboratory on August 11, 2022. If you have any questions concerning this report, please feel free to contact us.

**Molky Brar**

**Laboratory Director**

American Scientific Laboratories, LLC (ASL) accepts sample materials from clients for analysis with the assumption that all of the information provided to ASL verbally or in writing by our clients (and/or their agents), regarding samples being submitted to ASL, is complete and accurate. ASL accepts all samples subject to the following conditions:

- 1) ASL is not responsible for verifying any client-provided information regarding any samples submitted to the laboratory.
- 2) ASL is not responsible for any consequences resulting from any inaccuracies, omissions, or misrepresentations contained in client-provided information regarding samples submitted to the laboratory.

### ASL Sample Receipt Form

Client: Citadel Environmental Services, Inc.

Date: 8-11-2022

#### Sample Information:

Temperature: 5.4°C IR Gun # 1

Blank  Sample

Custody Seal:

Yes  No  Not Available

Received Within Holding Time:

Yes  No

#### Container:

Proper Containers and Sufficient Volume:

Yes  No

Soil: 1  4oz  8oz  Sleeve 5  VOA (4 Sodium Bisulfate + 1 Methanol)

Water:  500AG  1AG  125PB  250PB  500PB  VOA  Other

Air:  Tedlar®

Sample Containers Intact:

Yes  No

Trip Blank:

Yes  No

#### Chain-of-Custody (COC):

Received:

Yes  No

Samplers Name:

Yes  No

Container Labels match COC:

Yes  No

COC documents received complete:

Yes  No

Proper Preservation Noted:

Yes  No

Completed By: Janet Chin

### Notes and Definitions

- S-04 The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
- QM-05 The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
- J Detected but below the Reporting Limit; therefore, result is an estimated concentration (CLP J-Flag).
- DET Analyte DETECTED
- ND Analyte NOT DETECTED at or above the practical quantitation limit (PQL)
- NR Not Reported
- dry Sample results reported on a dry weight basis
- RPD Relative Percent Difference

## **1.0 SITE DESCRIPTION**

Citadel EHS (Citadel) has prepared this Health and Safety Plan (HASP) for use during soil and soil vapor sampling activities conducted at 1185 Sunset Boulevard, in the City of Los Angeles, California (Site). The Site consists of approximately 0.34 acres of vacant land.

Activities conducted under Citadel's direction at the Site will be in compliance with applicable Occupational Safety and Health Administration (OSHA) regulations, particularly those in Title 8 California Code of Regulations (CCR) 5192, and other applicable federal, state, and local laws, regulations, and statutes. A copy of this HASP will be kept onsite during scheduled field activities.

## **2.0 BACKGROUND**

Citadel EHS (Citadel) was contacted by Integrated Demolition and Remediation, Inc. (IDR) to provide a soil sampling and underground storage tank (UST) services for the Site. Citadel understands from the Client that four steel 500-gallon, single-wall fuel USTs and one waste oil UST of unknown size are believed to be present at the Site. The Client has also requested sampling services for one hydraulic hoist and three 3-stage clarifiers that are present at the Site.

## **3.0 SAFETY POLICY**

Safety will be given primary importance in the planning and operation of this project. The safety policy shall strictly adhere to current EPA and OSHA standards, and local government agency requirements having authority over the project as regards to Client employees, as well as to public safety. Some of the applicable health and safety standards are listed below:

- 40 Code of Federal Regulations Part 261, Identification and Listing of Hazardous Waste;
- Health and Safety Code, Division 20, Chapter 6.5, California Hazardous Waste Control Act;
- Title 8, California Code of Regulations, Section 1510, Safety Instruction for Employees;
- Title 8, California Code of Regulations, Section 3380, Personal Protective Equipment;
- Title 8, California Code of Regulations, Section 5144, Respiratory Protection;
- Title 8, California Code of Regulations, Section 5194, Hazard Communication; and
- Title 22, California Code of Regulations, Division 4.5, Environmental Health Standards for the Management of Hazardous Waste.

Each subcontracting firm will assume primary responsibility for the safety of their own work in regard to their employees and other persons. Subcontractors will assume the duty to comply with OSHA, and all other federal, state and local regulations.

The subcontractors work will be monitored by Citadel project managers for implementation of this HASP, while adhering to their own safety program. Citadel will retain the authority and power to enforce this HASP during the progress of the work. Any deficiencies in safe work practices will be brought to the attention of the subcontractor firm's supervisor for immediate corrective action. If the subcontractor fails or refuses to take corrective action promptly, a stop work order shall be issued and the subcontractor or the subcontractor employee may be removed from the Site.

## **4.0 WORK DESCRIPTION**

To profile the vessel contents, liquid samples will be collected from each UST and the hydraulic hoist and analyzed for VOCs including oxygenates and naphthalene by EPA Method 8260B, total petroleum hydrocarbons (TPH) full range by EPA Method 8015B, and polychlorinated biphenyls (PCBs) by EPA method 8082. A sample from each clarifier will be collected and analyzed for VOCs, TPH full range and Title 22 Metals.

Citadel will coordinate with LAFD and the Client to schedule LAFD oversight for the removal of the USTs. Citadel personnel will be present on site during any UST removal activity that disturbs soil including excavation to expose the USTs and associated piping and lifting, moving or removing the USTs and associated piping, to continuously monitor air emissions for volatile organic compounds (VOCs) and record measurements using a direct reading organic vapor analyzer (OVA), or equivalent such as a photoionization detector (PID). Monitoring will be in accordance with South Coast Air Quality Management District (SCAQMD) Rule 1166. The Client is responsible for submitting the required Rule 1166 notification to SCAQMD prior to the commencement of soil disturbance activities.

Following removal of the USTs confirmation soil samples will be collected from the vicinity of the USTs as directed by an LAFD inspector and analyzed per LAFD requirements. At a minimum, two soil samples will be collected beneath each UST, one sample collected beneath each fitting, one sample collected from beneath every 20 feet of piping, one from each spoils pile of up to 250 cubic yards (CY), and any additional sampling at the LAFD inspector's direction. The soil samples will be collected in 40-milliliter glass vials by EPA Method 5035 for analysis of VOCs, oxygenates and naphthalene by EPA Method 8260B and total petroleum hydrocarbons as gasoline (TPHg) by EPA Method 8015B. A soil sample from each sampling location will also be collected in laboratory supplied glass jars and analyzed for TPH full carbon chain by EPA Method 8015B. To pre-profile the excavated soil for disposal, samples collected from the spoils pile(s) will also be analyzed for Title 22 Metals by EPA methods 6010B/7471A. Soil samples will be placed in a cooler packed with ice prior to transport to an Environmental Laboratory Accreditation Program (ELAP) state-certified laboratory under standard Chain-of-Custody (COC) procedures.

## **5.0 KEY PROJECT PERSONNEL AND RESPONSIBILITIES**

Project Manager	Scott Grasse (Citadel)
Site Safety Officer (SSO)/Project Monitor	Scott Grasse (Citadel)
Subcontractor Personnel	IDR

### **PROJECT MANAGER**

The Project Manager has the ultimate responsibility for the health and safety of personnel at the Site. The Project Manager is responsible for:

- Ensuring that project personnel review and understand the requirements of this HASP;
- Keeping on-site personnel informed of the expected hazards and appropriate protective measures at the Site; and
- Providing resources necessary for maintaining a safe and health work environment.

## **SITE SAFETY OFFICER/PROJECT MONITOR**

The SSO is responsible for enforcing the requirements of this HASP once site work begins. The SSO has the authority to immediately correct situations where noncompliance with this HASP is noted and to immediately stop work in cases where an immediate danger to site workers or the environment is perceived. Responsibilities of the SSO also include:

- Obtaining and distributing PPE and air monitoring equipment necessary for this project;
- Limiting access at the Site to authorized personnel;
- Communicating unusual or unforeseen conditions at the Site to the Project Manager;
- Supervising and monitoring the safety performance of site personnel to evaluate the effectiveness of health and safety procedures and correct deficiencies;
- Conducting daily tailgate safety meetings before each day's activities begin; and
- Conducting a site safety inspection prior to the commencement of each day's field activities.

## **SUBCONTRACTOR PERSONNEL**

Subcontractor personnel are expected to comply with the minimum requirements specified in this HASP. Failure to do so may result in the dismissal of the subcontractor or any of the subcontractor's workers from the job site. Subcontractors may employ health and safety procedures that afford them a greater measure of personal protection than those specified in this plan as long as they do not pose additional hazards to themselves, the environment, or others working in the area.

## **6.0 SITE CONTROL MEASURES**

The SSO or Project Manager has been designated to coordinate access and security on site. The Client is responsible for general Site safety and each on-Site contractor must comply with their site-specific safety plan.

## **7.0 STANDARD OPERATING PROCEDURES**

### **GENERAL SAFETY**

- Maintain good housekeeping at all times in all project work areas.
- Check the work area to determine what problems or hazards may exist.
- Designate specific areas for the proper storage of materials.
- Store tools, equipment, materials, and supplies in an orderly manner.
- Provide containers for collecting trash and other debris.
- Clean up all spills quickly.
- Report unsafe conditions or unsafe acts to your supervisor immediately.
- Report all occupational illnesses, injuries, and vehicle accidents.
- Do not wear loose clothing, wristwatches, and other loose accessories when within arm's reach of moving machinery.
- Emergency exits and evacuation areas should be clearly marked during work activities.
- Personnel fall protection is required when climbing to perform maintenance six feet or higher above ground.
- Inspect hand tools and use proper PPE.
- Ensure proper grounding and guarding of equipment.
- Keep hands and fingers out of pinch points.
- Use good ergonomic posturing when working with heavy items and when using the Hammer

Drill.

## COMMUNICATION PROCEDURES

Due to the close proximity of all field crew members, the necessity for radio communication is not necessary.

The following standard hand signals will be used:

Hand drawn across throat .....Cease operation immediately  
 Hand gripping throat ..... Out of air, cannot breathe  
 Grip partner's wrist or both hands around waist ..... Leave area immediately  
 Hands on top of head .....Need assistance  
 Thumbs up ..... OK, I am alright, understood  
 Thumbs down.....No, negative

## FIELD VEHICLES

- Equip vehicles with emergency supplies and equipment.
- Maintain both a first aid kit and fire extinguisher in the field vehicle at all times.
- Utilize a rotary beacon on vehicle if working adjacent to active roadway.
- Always wear seatbelt while operating vehicle.
- Tie down loose items.

## MANUAL LIFTING

- Personnel shall seek assistance when performing manual lifting tasks that appear beyond their physical capabilities.
- Assess the situation before lifting, ensure good lifting and body positioning practices, and ensure good carrying and setting down practices.

## HEAT EXPOSURE

- Limit exposure to the sun or take extra precautions when the UV index rating is high.
- Take lunch and breaks in shaded areas.
- Create shade by using umbrellas, tents, and canopies.
- Wear proper clothing: long sleeved shirts with collars, long pants, and UV-protective sunglasses or safety glasses.
- Apply sunscreen generously to all exposed skin surfaces at least 20 minutes before exposure. Re-apply sunscreen at least every 2 hours, and more frequently when sweating or performing activities where sunscreen may be wiped off.
- Communicate any concerns regarding heat stress to a supervisor.
- Keep hydrated throughout the day (about 4 cups per hour).
- OSHA's Heat Index:

Heat Index	Risk Level	Protective Measures
Less than 91°F	Lower (Caution)	Basic heat safety and planning
91°F to 103°F	Moderate	Implement precautions and heighten awareness

103°F to 115°F	High	Additional precautions to protect workers
Greater than 115°F	Very High to Extreme	Triggers even more aggressive protective measures

**Utilities (Under Ground and Above Ground):** Low Hazard. All boring locations will be hand drilled and stop work will be enforced if any utilities are encountered.

**Biological Hazards:** Low to Medium Hazard. Beware of spiders, insects and other possible animals.

**Site Instability:** Low to Medium Hazard. The Site will be inspected prior to equipment placement and closely monitored. Any settling of the equipment will cause the work to stop immediately.

**Equipment Refueling:** Low Hazard. Equipment shall not be refueled with the engine running. Cigarettes, open flames, or other ignition sources are not allowed within 50 feet of the fueling location.

**Personnel Injury:** Upon notification of an injury, the Project Field Leader should evaluate the nature of the injury, and the affected person should be decontaminated to the extent possible prior to movement. The Project Field Leader shall initiate the appropriate first aid, and contact should be made for an ambulance and with the designated medical facility (if required).

**Fire/Explosion:** The fire department shall be alerted, and all personnel moved to a safe distance from the involved area.

**Other Equipment Failure:** If any other equipment on site fails to operate properly, the Project Team Leader shall be notified and then determine the effect of this failure on continuing operations on site. If the failure affects the safety of personnel or prevents completion of the Work Plan tasks, work will cease until the situation is evaluated and appropriate actions taken.

## COVID-19 FIELD WORK PREVENTION GUIDELINES

The following guidelines were prepared to prevent COVID-19 transmission while performing essential field work activities at the Site:

1. **Stay at least 6 feet from others** whenever possible. Avoid, or at least **minimize close contact with others**. Close contact means being within 6 feet of someone else for more than 15 minutes. By CDC guidelines, it doesn't matter if you are wearing face covering or not to be consider as being in close contact. Even with face covering, being close for extended periods of time, can greatly increase your risk of exposure. *Keep your distance even when wearing face covering or PPE.*
2. **Wear face covering in public and anytime you will interface with others**, regardless of time. *Distance and face covering are likely the two best methods available to minimize exposures.*
3. **Wash your hands frequently and avoid touching your face, nose and mouth with unwashed hands**. Also, don't be fooled into a false sense of security, believing gloves will fully protect you from COVID-19. Even when you wear gloves for protection against chemicals, you still need to wash your hands to minimize exposure.

Be careful when putting on and taking off PPE to be sure we do not contaminate our hands in the process and then touch our face, nose or mouth with unwashed hands. In doing so, we defeat the purpose of wearing PPE. *Also, don't overdo the hand sanitizer – choose to use soap and water as much as possible.*

4. **Clean and disinfect surfaces you come into contact and minimize touching commonly used surfaces whenever possible**. Cleaning and disinfecting surfaces would not be as important if everyone were wearing face covering and washing their hands more regularly. But because individual behaviors vary quite a bit, we need to do what we can

to protect ourselves and others by routinely cleaning and disinfecting the things we touch. How often will depend on how often you touch a surface or object and whether others are likely to come into contact with it as well. *Cleaning and disinfecting helps reduce exposure, but don't rely on it as a replacement for distancing, face covering and hand washing.*

5. **Monitor your own health** for COVID-19 symptoms and **stay at home**, away from others, if symptoms develop. The sooner you self-isolate, the more you lessen the chance of spreading it to others, regardless of whether it is COVID-19, the flu or some other contagion.

## **8.0 EXPOSURE MONITORING**

The following substances may be encountered on site. The primary hazards of each are identified as follow:

<u>Substances</u>	<u>Concentration</u>	<u>Primary Hazards</u>
Lead	Various	Ingestion, inhalation, skin, eye contact
Heavy Metals	Various	Ingestion, inhalation, skin, eye contact
Polychlorinated Biphenyls	Various	Ingestion, inhalation, skin
Total Petroleum Hydrocarbons	Various	Ingestion, inhalation, skin
Volatile Organic Compounds	Various	Ingestion, inhalation, skin

Lead: Acute exposure to lead via ingestion or inhalation can cause impaired kidney function, high blood pressure, nervous system and neurobehavioral effects, cognitive dysfunction later in life, and subtle cognitive effects attributed to prenatal exposure. Pregnant women need to be especially concerned since exposure can have serious impact on the developing fetus. Even low levels of lead in the blood of children can result in behavior and learning problems, lower IQ and hyperactivity, slowed growth, hearing problems and anemia. In rare cases, ingestion of lead can cause seizures, coma and even death.

Heavy Metals: The main threats to human health from heavy metals are associated with exposure to lead, cadmium, mercury and arsenic. Cadmium compounds are currently mainly used in rechargeable nickel-cadmium batteries. Recent data indicate that adverse health effects of cadmium exposure is primarily in the form of kidney damage but possibly also bone effects and fractures. The general population is primarily exposed to mercury via food, fish being a major source of methyl mercury exposure, and dental amalgam. The general population does not face a significant health risk from methyl mercury, although certain groups with high fish consumption may attain blood levels associated with a low risk of neurological damage to adults and a risk to the fetus in pregnant women. The general population is exposed to lead from air and food in roughly equal proportions. Children are particularly susceptible to lead exposure due to high gastrointestinal uptake and the permeable blood-brain barrier. Recent data indicating that there may be neurotoxic effects of lead at lower levels of exposure than previously anticipated. Exposure to arsenic is mainly via intake of food and drinking water, food being the most important source in most populations. Long-term exposure to arsenic in drinking-water is mainly related to increased risks of skin cancer, but also some other cancers, as well as other skin lesions such as hyperkeratosis and pigmentation changes. Occupational exposure to arsenic, primarily by inhalation, is causally associated with lung cancer.

Polychlorinated Biphenyls (PCBs): PCBs are a group of man-made organic chemicals consisting of carbon, hydrogen and chlorine atoms. They belong to a broad family of organic chemicals known as chlorinated hydrocarbons. They have been demonstrated to cause a variety of adverse health

effects. They have been shown to cause cancer in animals as well as a number of serious non-cancer health effects in animals, including: effects on the immune system, reproductive system, nervous system, endocrine system and other health effects. The different health effects of PCBs may be interrelated. Alterations in one system may have significant implications for the other systems of the body.

Total Petroleum Hydrocarbons (TPH): TPH is a term used to describe a large family of several hundred chemical compounds that originally come from crude oil. A complex blend of petroleum-derived normal and branched-chain alkane, cycloalkane, alkene, and aromatic hydrocarbons. May include benzene and its derivatives, sulfur, and naphthalene. Danger of serious damage to health by prolonged exposure in contact with skin. Possible risk of harm to the unborn child. Repeated exposure may cause skin dryness or cracking. Breathing of high vapor concentrations may cause dizziness, light-headedness, headache, nausea, and loss of co-ordination. Continued inhalation may result in unconsciousness. Prolonged or repeated contact with skin may cause redness, itching, irritation, eczema/chapping and oil acne. Components of the product may be absorbed into the body through the skin. Prolonged and repeated contact with the product may cause skin cancer. May cause damage to the liver.

Volatile Organic Compounds (VOC): VOCs include a variety of chemicals, some of which may have short- and long-term adverse health effects. Health effects include eye, nose, and throat irritation, headaches, loss of coordination, nausea, and damage to liver, kidney, and central nervous system. Some organics are known to cause cancer in humans.

## **ACTION LEVELS AND EXPOSURE LIMITS**

According to OSHA (29 CFR 1926.55 Appendix A, Footnote (A (3))), the composition of TPH varies greatly and thus a single Threshold Limit Value (TLV)<sup>1</sup> for all types of these materials is not applicable. The OSHA Short Term Exposure Limit (STEL)<sup>2</sup> for compounds commonly present in TPH-impacted soil is listed below; these concentrations must not be exceeded when working in areas where these hazardous compounds may be present:

VOCs: 100 ppm<sub>v</sub>

If these concentrations are exceeded and cannot be controlled by local methods, an evacuation of the immediate area and possibly the Site will be ordered in accordance with the evacuation route in Section 11.0.

## **DUST MONITORING**

SCAQMD requires that Rule 403 for Fugitive Dust be followed to reduce the amount of particulate matter entrained into ambient air as a result of normal construction activities. This rule is intended to limit the emissions of fugitive dust or particulate matter from a variety of activities and sources such as construction sites, bulk material hauling, unpaved parking lots, and disturbed soil in open areas and vacant lots; this rule applies to any activity or man-made condition capable of generating fugitive dust.

---

<sup>1</sup> TLV refers to airborne concentrations of chemical substances and represent conditions under which it is believed that nearly all workers may be repeatedly exposed, day after day, over a working lifetime, without adverse effects (American Conference of Governmental Industrial Hygienists (ACGIH)).

<sup>2</sup> Defined as a 15-minute time-weighted average exposure which is not to be exceeded at any time during a workday even if the 8-hour time-weighted average is below the PEL.

Rule 403 requires that fugitive dust generated during any activity or man-made condition such as excavation, demolition, construction, and soil disturbance, shall be prevented, reduced or mitigated.

## **9.0 PERSONAL PROTECTIVE EQUIPMENT**

The purpose of PPE is to protect employees from hazards and potential hazards they are likely to encounter during site activities. The amount and type of PPE used will be based on the nature of the hazard encountered or anticipated. Respiratory protection will be utilized when an airborne hazard has been identified using real-time air monitoring devices, or as a precautionary measure in areas designated by the SSO, elevating to level C. If this occurs, contractor personnel shall be respirator approved.

Dermal protection, primarily in the form of chemical-resistant gloves and coveralls, will be worn whenever contact with chemically affected materials (e.g., soils, groundwater, sludge) is anticipated, without regard to the level of respiratory protection required.

Based on evaluation of potential hazards, the following levels of personal protection have been designated for the applicable work areas or tasks:

<u>Location</u>	<u>Job Function</u>	<u>Level of Protection</u>
Controlled Area	All Workers	A B C <b>D</b> Other

Specific protective equipment for each level of protection is as follows:

**Level A**

- Fully-encapsulating suit
- SCBA
- Disposable coveralls

**Level C**

- Splash gear
- Half-face canister respirator with H<sub>2</sub>S/VOC cartridge
- Mouth/nose canister respirator
- Efficiency 100 (HEPA)

**Level B**

- Splash gear
- SCBA

**Level D**

- Hard hat
- Ear plugs
- Neoprene or leather gloves - nitrile gloves
- Safety vests and Glasses
- Hard toe boots

NO CHANGES TO THE SPECIFIED LEVELS OF PROTECTION SHALL BE MADE WITHOUT THE APPROVAL OF THE SSO OR PROJECT MANAGER.

## **10.0 DECONTAMINATION PROCEDURES**

Despite protective procedures, personnel may come in contact with potentially hazardous compounds while performing work tasks. If so, decontamination needs to take place using an Alconox or tri-sodium phosphate (TSP), followed by a rinse with clean water. Standard decontamination procedure for levels C and D are as follows:

- Equipment drop
- Boot cover and outer glove wash and rinse

- Boot cover and out glove removal
- Suit wash and rinse
- Suit removal
- Safety boot wash and rinse
- Inner glove wash and rinse
- Respirator removal
- Inner glove removal
- Field wash of hands and face

Workers should employ only applicable steps in accordance with level of PPE worn and extent of contamination present. The SSO shall maintain adequate quantities of clean water to be used for personal decontamination (i.e. field wash of hands and face) whenever a suitable washing facility is not located in the immediate vicinity of the work area. Disposable items will be disposed of in an appropriate container. Wash and rinse water generated from decontamination activities will be handled and disposed of properly. Non-disposable items may need to be sanitized before reuse. Each site worker is responsible for the maintenance, decontamination, and sanitizing of his/her own PPE.

Used equipment may be decontaminated as follows:

- An Alconox or TSP and water solution will be used to wash the equipment.
- The equipment will then be rinsed with clean water.

Each person must follow these procedures to reduce the potential for transferring chemically affected materials offsite.

## **11.0 EMERGENCY PROCEDURES**

In the event of an emergency, site personnel will signal distress with three blasts of a horn (a vehicle horn will be sufficient), or other predetermined signal. Communication signals, such as hand signals, must be established where communication equipment is not feasible or in areas of loud noise.

The SSO will designate evacuation routes and refuge areas to be used in the event of an emergency. Site personnel will stay upwind from vapors or smoke and upgradient from spills. Workers should exit through the established decontamination areas wherever possible. If evacuation cannot be done through an established decontamination area, site personnel will go to the nearest safe location and remove contaminated clothing there. Personnel will assemble at the predetermined refuge following evacuation and decontamination. The SSO will count and identify site personnel to verify that all personnel have been evacuated safely. Please refer to Figure 1.0 for the evacuation route and refuge location.

FIGURE 1.0 – EVACUATION ROUTE AND REFUGE AREA

0945	UST1 IS UNACCESSIBLE BECAUSE VENT PIPE IS CORRODED AND PORT IS OBSTRUCTED BY ROCKS.
0958	SAMPLE IS TAKEN FROM UST2 AND PLACED INTO 402 JAR. DEPTH TO BOTTOM OF UST2 IS 10FT, VENT TUBE IS 4FT IN LENGTH.
1011	SAMPLE IS TAKEN FROM UST3 AND COLLECTED IN 402 JAR. DEPTH TO BOTTOM OF UST3 IS 10FT. VENT PIPE WAS UNACCESSIBLE BECAUSE IT WAS COMPLETELY SEALED OFF. SAMPLE IS TAKEN FROM UST4. COLLECTED IN 402 JAR. DEPTH TO BOTTOM OF UST4 IS 14FT AND VENT TUBE IS 4FT IN LENGTH. SLUDGE LIKE SUBSTANCE WAS TAKEN FROM MUD SUMP 1 AND COLLECTED IN 402 JAR. SLUDGE LIKE SUBSTANCE WAS COLLECTED IN 402 JAR.
1215	CITADEL REP HAS LEFT THE SITE.

PROJECT NUMBER	0942.1020.0	CITADEL REPRESENTATIVE	Scott Grasse <i>Tim Lambert</i>
PROJECT NAME	UST Removal	CONTRACTOR	- IDR
PROJECT WORK AREA	Vacant Land	SUPERVISOR	Scott Grasse
PROJECT LOCATION	1185 Sunset Boulevard		

TIME	FIELD NOTES		
0700	Citadel on site. Meet with IDR, discuss SOW. Crew will be exposing all five USTs on site. All excavated soil will be placed on plastic and covered. Crew is currently unloading delivery of a compressor and an excavator.		
0710	Excavator was delivered with no hydraulic oil.		
0800	Crew brings oil and preps excavator. Begin setup.		
0823	Digging begins at southern most UST.		
0830	Soil has strong odor of gasoline.		
0900	VOC detections fall below 50ppm with observable odor. Begin segregating soil.		
0930	Tank is larger than assumed. Crew begins removing more fencing to expose full length of UST #4.		
0940	UST #4 is found to be 16' long.		
1020	Crew begins cutting open UST #1.		
1045	Crew begins cutting open UST #3.		
1100	UST #3 is full of mostly solids with a small amount of liquid on the west end below the ports. North State will not be able to clean this tank today as they will need to enter the tank and they are not currently equipt for confined space entry.		
1110	Crew breaks for lunch.		
1145	Return from lunch. North State begins setup to clean UST #1.		
1200	IDR begins shifting stockpile to make room for more soil.		
1205	Begin cutting open UST #2.

## EXECUTIVE SUMMARY

---

AEI Consultants (AEI) was retained by Aragon Properties, Ltd. to conduct a Phase I Environmental Site Assessment (ESA), in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 1185-1245 West Sunset Boulevard in the City of Los Angeles, Los Angeles County, California. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report.

### PROPERTY DESCRIPTION

The subject property, which consists of a hardware store with associated storage buildings, a residence, a car wash, a vacant lot, and a restaurant, is located on the east side of West Sunset Boulevard in a mixed commercial and residential area of Los Angeles, California. The property totals approximately 2.66 acres and is improved with ten (10) single-story, slab-on-grade buildings totaling approximately 30,000 square feet. The subject property is currently occupied by a car wash business, Reliable Do It Center, film storage company, and residential tenants. On-site operations include car wash and small-scale auto repair operations, retail of home improvement goods, film storage, and daily residential activities. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping.

During the site reconnaissance, hazardous materials consisting of containers of waste oil and oil filters were observed in connection with auto repair operations. Environmental concerns associated with the storage and/or use of these materials were noted during the site reconnaissance and/or during the review of regulatory records. Please refer to the *Findings* section below and Section 7.1 for additional information.

From at least 1906, the entire subject property consisted of vacant lots with single-family residences on the southern and eastern portions.

From at least 1927 to at least 1961, the southern portion of the subject property associated with the addresses 1181 (historical address) and 1185 West Sunset Boulevard, was developed with a gas station. The current structures were developed for gas station and auto repair purposes in the early 1960's. Gas station operations were conducted until at least 1970 and were subsequently phased out.

According to building records, in 1933, the portion of the subject property associated with 1201 West Sunset Boulevard, was issued a permit for an oil depot. No further pertinent information was available from other resources during this investigation.

From at least 1927, the portion of the subject property currently associated with the addresses 1205 and 1207 West Sunset Boulevard, was developed with a commercial building on the western portion and a residential building on the eastern portion. The southern portion of the commercial building, identified with 1205 Sunset Boulevard, was a store in 1950, upholstery company from 1953 to 1954, plastic key tag manufacturer from 1956 to 1958, and time controls manufacturer from 1962 to 1970. The northern portion of the commercial building, identified with 1207 West Sunset Boulevard, was a chemical manufacturer of disinfectants from 1950 to 1954 and a valve manufacturer from 1957 to 1970. Since no information was available regarding the use of the building from 1927 to 1950, there is a possibility that chemical

manufacturing was conducted since 1927. The current tenant, Reliable Do It Center, has occupied the building from at least the mid 1970's. The residential building is currently vacant.

From at least 1927, the portion of the subject property currently associated with the address 1211 West Sunset Boulevard was developed with a commercial/industrial building. This building was occupied by a fruit products company in 1937, a shade manufacturer in at least 1942, and a printing facility from at least 1950 to at least 1971. The current tenant, Reliable Do It Center, has occupied the building from at least the mid 1970's.

In 1906 the portion of the subject property currently associated with the address 1229 Sunset Boulevard, was undeveloped land. According to a 1946 building permit, a gas station building was replaced by a store. No further information regarding this possible gas station was found. From at least 1950, this portion of the property was developed with a commercial building, which was occupied by a furniture company in 1950, a hood & pad manufacturer/sign manufacturer/painting company in 1953, neon sign manufacturer/sign manufacturer/painting company from 1954 to 1960, and a sash and door warehouse from 1964 to 1970. The current tenant, Reliable Do It Center, has occupied the building from at least the mid 1970's.

From at least 1927, the portion of the subject property currently associated with the addresses 1235, 1237, and 1239 Sunset Boulevard was developed with a commercial/industrial building. The building was occupied by a woodworking and sign painting company in 1950, a sign manufacturer and painting company in 1954, a sash and door warehouse from 1957 to 1960, and sign painting company from 1964 to 1970. The current tenant, Reliable Do It Center, has occupied the building from at least the mid 1970's.

Historical tenants/operations of concern are further discussed in the *Findings* Section and Sections 3.1, 3.2, 3.3, 3.4, 4.1.3, 4.1.7, 5.1, and 6.1.1.

The remaining portions of the subject property have been used for residential purposes from at least 1906 to the present.

The subject property was identified in the regulatory database report as an EDR US Historical Auto Station site, and is further discussed in Section 5.1.

The immediately surrounding properties consist of the following:

Direction from Site	Address-Tenant/Use
<b>North</b>	Single- and multi-family residences
<b>Northeast</b>	Everett Street, followed by single- and multi-family residences
<b>East (abutting)</b>	Single- and multi-family residences
<b>Southeast</b>	Everett Street, followed by multi-family residences and Seng Auto Repair (1165 West Sunset Boulevard)
<b>Southwest</b>	West Sunset Boulevard, followed by single- and multi-family residences and API Audio Products (1176 West Sunset Boulevard)
<b>West</b>	West Sunset Boulevard, followed by multi-family residences, a vacant lot, and a multi-tenant commercial building (1218 West Sunset Boulevard)

The adjacent site to the west, identified as 1218 West Sunset Boulevard, was listed in the regulatory database report as an EDR US Historical Auto Station site. The adjacent site to the

south, identified as Seng Auto at 1165 West Sunset Boulevard, was listed in the regulatory database report a California Facility Inventory Database Underground Storage Tank (CA FID UST), Statewide Environmental Evaluation and Planning System (SWEEPS UST), EDR Historical Auto Station, Historical Cortese (HIST CORTESE), and Leaking Underground Storage Tank (LUST) site. Please refer to Section 5.1.

Based upon topographic map interpretation and the *Underground Storage Tank Low Risk Case Review Form* for G.H. Palmer & Associates at 867 Cesar Chavez Avenue, located approximately 0.42 mile southeast of the subject property, obtained from the Regional Water Quality Control Board's (RWQCB's) GeoTracker website, the direction of groundwater flow beneath the subject property is inferred to be to the southwest. According to the Phase II Investigation conducted in 2005 for the subject property, soil borings were advanced to 30 feet below ground surface (bgs) and groundwater was not encountered. However, according to the *Underground Storage Tank Low Risk Case Review Form* for G.H. Palmer & Associates at 867 Cesar Chavez Avenue, located approximately 0.42 mile southeast of the subject property, depth to groundwater occurred at 12 to 20 feet bgs.

## FINDINGS

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-05 as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. AEI's assessment has revealed the following RECs associated with the subject property or nearby properties:

- According to historical sources, in 1927, the southern portion of the subject property associated with the addresses 1181 (historical address) and 1185 West Sunset Boulevard, was developed with a gas station. The current structures were developed for gas station and auto repair purposes in the early 1960's. Gas station operations were conducted until at least 1970 and were subsequently phased out. During AEI's site reconnaissance, AEI observed patched areas of asphalt on the southern portion of 1185 West Sunset Boulevard. The patched areas appear to be the locations of USTs associated with the historical gas station. According to Mr. Steve Wintner, subject property owner, four USTs are currently located at the subject property. No information regarding the sizes or dates of installation of the USTs was available. AEI reviewed a portion of the 2005 *Phase I Environmental Site Assessment and Limited Subsurface Investigation for the Property Located at Sunset Boulevard and Everett Street*, prepared by Petra Geotechnical, Inc. (Petra). According to this previous report, a subsurface geophysical survey conducted at the subject property delineated the location of four UTs and a waste oil UST in the rear of the car wash. Petra conducted soil sampling in the vicinities of the USTs. The results of the soil sample analysis were that trace amounts of TPH were encountered in one sample collected at 22 feet bgs from the vicinity of the waste oil UST. Petra was unable to find evidence that the site had been impacted from petroleum hydrocarbons and/or VOCs related to the former site use. However, borings could only be collected from the vicinity of the USTs and not directly below them. In addition, the subsurface sampling was conducted over 7 years ago and soil vapor testing was not conducted. The presence of the USTs at the subject property represents a REC.
- AEI observed two clarifiers at 1185 West Sunset Boulevard. One clarifier was located in the garage and the other clarifier was located in the car washing area. According to records

from the Los Angeles Bureau of Sanitation Industrial Waste Management District (LABS IWMD), permits to operate a clarifier were issued to the subject property in 1961, 1994, 2009, and 2011 for auto wash activities. It is unknown if all of the permits refer to the same clarifier. However, since the permits were issued for auto wash activities, it is presumed that these permits refer to the clarifier located in the current car washing area. This clarifier is further discussed in the BER Section, below. The clarifier located in the garage appears to have been associated with auto repair operations. Clarifiers are used to treat waste water streams. There is a potential that oils or solvents present in the waste stream could impact the subsurface of the subject property if the clarifier or drain system was compromised. The collection and analysis of soil samples would be necessary to determine if the use of the clarifier has impacted the subject property. Based on the presumed use of this clarifier for auto repair operations and the on-site historical use of hazardous materials, the clarifier located in the garage represents a REC.

- Areas of the subject property have historically been used for various industrial purposes since the 1920's. The southern portion of the subject property associated with the addresses 1181 (historical address) and 1185 West Sunset Boulevard, was used for car washing and auto repair operations from the mid 1960's to the present. These operations are typically associated with the use of hazardous materials, including solvents and oils. According to building records, in 1933, the portion of the subject property associated with 1201 West Sunset Boulevard, was issued a permit for an oil depot. The portion of the subject property currently associated with the addresses 1205 and 1207 West Sunset Boulevard, was historically used for industrial purposes. The southern portion of the building was occupied by a plastic key tag manufacturer from 1956 to 1958, and time controls manufacturer from 1962 to 1970. The northern portion of the building was occupied by a chemical manufacturer of disinfectants from 1950 to 1954 and a valve manufacturer from 1957 to 1970. Since no information was available regarding the use of the building from 1927 to 1950, there is a possibility that chemical manufacturing was conducted since as early as 1927. These manufacturing operations are typically associated with hazardous materials including petroleum hydrocarbons and solvents. The portion of the subject property currently associated with the address 1211 West Sunset Boulevard was developed with a commercial/industrial building from at least 1927. This building was occupied by a shade manufacturer in at least 1942 and a printing facility from at least 1950 to at least 1971. Many printing industries generate waste ink and ink sludges that might contain solvents or heavy metals. Photographic processes are also typically associated with major printing operations for image conversion and plate making. Photographic wastes, including heavy metal solutions, developers, hardeners, plating chemicals, and spent solvents, make up a large portion of the hazardous waste generated in these industries. Solvents used during printing operations may include chlorinated solvents, which are highly mobile and can easily accumulate in the soil. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. The portion of the subject property currently associated with the address 1229 Sunset Boulevard was historically occupied by a hood & pad manufacturer/sign manufacturer/painting company in 1953 and a sign manufacturer/sign manufacturer/painting company from 1954 to 1960. In addition, the portion of the subject property currently associated with the addresses 1235, 1237, and 1239 Sunset Boulevard was developed with a commercial/industrial building. The building was occupied by a woodworking and sign painting company in 1950, a sign manufacturer and painting company in 1954, a sash and door warehouse from 1957 to 1960, and sign

painting company from 1964 to 1970. It is likely that these former industrial tenants utilized hazardous materials including oils, lubricants, and solvents. Records pertaining to the use of hazardous materials for the previous industrial tenants were not available as they operated during a time when the regulatory measures governing the use of hazardous materials of this nature were not as stringent as they are today. Based on the length of time the industrial operations were conducted, the historical on-site industrial operations represent a REC.

- In 1946, a building permit was issued to 1229 West Sunset Boulevard for an alteration of a present gas station building into a store. The next earliest historical information available was a 1906 Sanborn that depicted this portion of the property as undeveloped. There is a possibility that a gas station was present from sometime after 1906 until 1946. In the 1938 aerial photograph, there is a small structure present in this portion of the property, however, due to the resolution of the photograph, additional details were not reasonably ascertainable. No other pertinent information was available regarding the potential historical gas station. The possibility of a historical gas station at 1229 West Sunset Boulevard represents a REC.

Historical Recognized Environmental Conditions (HRECs) are defined by the ASTM Standard Practice E1527-05 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's assessment has revealed the following HRECs associated with the subject property or nearby properties:

- No on-site HRECs were identified during the course of this assessment.

De Minimis Environmental Conditions include environmental concerns identified by AEI that warrant discussion but do not qualify as RECs, as defined by the ASTM Standard Practice E1527-05. AEI's assessment has revealed the following de minimis environmental conditions associated with the subject property or nearby properties:

- AEI observed four 55-gallon drums of waste oil and two 55-gallon drums of used oil filters in the hazardous materials storage area located on the eastern portion of 1185 West Sunset Boulevard. The drums were equipped with secondary containment. However, staining was observed on the ground in the vicinity of the drums. The staining appears to be surficial and therefore represents a de minimis condition.

Business Environmental Risks (BERs) include risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the subject property, not necessarily limited to those environmental issues required to be investigated in the standard ASTM scope. BERs may affect the liabilities and financial obligations of the client, the health & safety of site occupants, and the value and marketability of the subject property. AEI's assessment has revealed the following BERs associated with the subject property or nearby properties:

- According to the City of Los Angeles Department of Building & Safety and Department of Planning, the subject property is located near significant oil production areas known as "Methane Zones". Methane Zone sites include sites immediately surrounding gas sources and where testing and mitigation are required by the City of Los Angeles Department of

Building and Safety. Due to the potential environmental risk associated with construction in Methane Zones, the property owner is required to conduct a methane assessment prior to the redevelopment of the subject property (Division 71 of the Los Angeles Building Code). AEI recommends that a methane assessment be conducted for the subject property prior to any future redevelopment activities.

- AEI observed two clarifiers at 1185 West Sunset Boulevard. One clarifier was located in the garage and the other clarifier was located in the car washing area. According to records from the LABS IWMD, a clarifier permit was issued to the subject property in 1961 for occasional auto wash activities. A permit was issued in 1994 for a three-stage clarifier for auto wash activities. This permit was reissued in 2009 and in 2011. It is unknown if the permits issued in 1961 and 1994 refer to the same clarifier. However, it appears that the clarifier located outside is used for car washing. No heavy machinery or industrial vehicles are washed at the facility, which is designed for automobile use only. The interior engine compartment and vehicle undercarriage is not washed at the facility. The washing solutions used on site, though stored in concentrated form, do not contain hazardous solvents. Although concentrations of detergents and oil residues may accumulate in the subsurface in the event the separator is compromised, a significant release of hazardous materials or petroleum products at the subject property is unlikely. Based on the presumed use of this clarifier for car washing activities, the clarifier located in the car washing area represents a BER.
- The subject property is equipped with one above-ground hydraulic lift within the garage at 1185 West Sunset Boulevard. In addition, AEI observed an area within the garage that is indicative of a former underground hydraulic lift. It is unknown when the lifts were installed; however, the subject property has operated as a gas station from at least 1927 and as an automotive repair from at least the mid 1960's. Therefore, it is possible that the former underground lift was installed as early as the 1960's. Polychlorinated biphenyls (PCBs) were used in the past in dielectric fluids and oils in a variety of equipment, including hydraulic lift equipment. Soil testing was reportedly conducted by Petra in 2007 and no significant impacts were reported. Since redevelopment of the subject property is planned, additional testing may be warranted at that time.
- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) are present. During the site inspection damaged vinyl floor tiles were observed in 1229 West Sunset Boulevard. Based on the potential presence of ACMs, AEI recommends the property owner implement an Operations and Maintenance (O & M) Plan which stipulates that the assessment, repair and maintenance of damaged materials be performed to protect the health and safety of the building occupants. Additionally, according to Mr. Fred Shaffer, representative of the client, Aragon Properties Ltd., demolition of the buildings are planned for the near future. Regardless of building construction date, the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) requires that an asbestos survey adhering to Asbestos Hazard Emergency Response Act (AHERA) sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by the local air pollution control or air quality management district, and specifies that all suspect asbestos-containing materials (ACMs) be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, Occupational Safety and Health Administration (OSHA)

regulations require that specific work practices be implemented when handling construction materials and debris that contain lead-containing materials.

- Due to the age of the subject property buildings, there is a potential that LBP is present. All painted surfaces were observed in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. However, based on the potential presence of LBP and nature of occupancy, AEI recommends the property owner implement an Operations and Maintenance (O & M) Plan to protect the health and safety of the building occupants. Local regulations may apply to lead-based paint in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing *any amount* of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62. Additionally, AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing *any amount* of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

#### **CONCLUSIONS, OPINIONS AND RECOMMENDATIONS**

We have performed a Phase I Environmental Site Assessment for the property located at 1185-1245 West Sunset Boulevard in the City of Los Angeles, Los Angeles County, California, in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312). Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed no evidence of RECs in connection with the property except for those previously identified in the *Findings* section. AEI recommends the performance of a Phase II Subsurface Investigation.

## **1.0 INTRODUCTION**

---

This report documents the methods and findings of the Phase I Environmental Site Assessment (ESA) performed in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 1185-1245 West Sunset Boulevard in the City of Los Angeles, Los Angeles County, California (Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs).

### **1.1 SCOPE OF WORK**

The purpose of the Phase I Environmental Site Assessment is to assist the client in identifying potential environmental liabilities associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property, as well as regulatory non-compliance that may have occurred at the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

The goal of AEI Consultants in conducting the Phase I Environmental Site Assessment was to identify the presence or likely presence of any hazardous substances or petroleum products on the property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, groundwater, or surface water of the property.

### **1.2 SIGNIFICANT ASSUMPTIONS**

The following assumptions are made by AEI Consultants in this report. AEI Consultants relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI Consultants has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data, or well data from adjacent sites are assumed based on contours depicted on the United States Geological Survey topographic maps. AEI Consultants assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

### 1.3 LIMITATIONS

Property conditions, as well as local, state, tribal and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, vapor intrusion, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-05.

If requested by the client, these non-scope issues are discussed in Section 7.2. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). ASTM Standard Practice E1527-05 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

- 1) 42 U.S.C § 9601(35)(B), referenced in the ASTM Standard Practice E1527-05.
- 2) Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
- 3) 42 U.S.C. 9601(40) and 42 U.S.C. 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property visit.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted

procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

#### 1.4 LIMITING CONDITIONS

The performance of this Phase I Environmental Site Assessment was limited by the following conditions:

- AEI did not have access to the residential buildings associated with 1245 West Sunset Boulevard, the single-family residence associated with 1205 West Sunset Boulevard, and the commercial building associated with 1201 West Sunset Boulevard. Based on the use of the buildings for typical residential activities and film equipment storage, this limitation is not expected to significantly alter the findings of this report.
- On February 5, 2013, AEI contacted the Los Angeles Fire Department Hazardous Materials Division (LAFD HAZMAT) for information on the subject property to identify any evidence of previous or current hazardous material usage. AEI received a response stating that files exist for 1185 and 1229 West Sunset Boulevard. However, the files have not been made available at this time. Upon reviewing pertinent information in connection with the subject property, AEI will immediately issue an addendum to this report if items of environmental concern are identified. However, based on the quality of information obtained from other sources, this limitation is not expected to significantly alter the findings of this assessment.

#### 1.5 DATA GAPS AND DATA FAILURE

According to ASTM E1527-05, data gaps occur when the Environmental Professional is unable to obtain information required, despite good faith efforts to gather such information.

Data failure is one type of data gap. According to ASTM E1527-05 "data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met". Pursuant to ASTM Standards, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier.

The following data gap was identified during the course of this assessment:

Data Gap:	The earliest historical resource obtained during this investigation was a 1906 Sanborn map which indicated that the subject property was developed with single-family residences and vacant lots. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure.			
Does this data gap affect the EP's ability to identify RECs?	Yes	<input type="checkbox"/>	No	X
Rationale	AEI presumes that prior to 1906 the subject property would have been used for residential purposes, if not undeveloped. Based on this notion, this data gap is not expected to significantly alter the findings of this investigation.			
Information/ sources consulted	Sanborn Maps, Aerial Photographs, City Directories, Building Records			

## 1.6 RELIANCE

All reports, both verbal and written, are for the benefit of Aragon Properties, Ltd. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's Proposal and Standard Terms & Conditions executed by Aragon Properties, Ltd. on February 1, 2013. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

## 2.0 SITE AND VICINITY DESCRIPTION

### 2.1 SITE LOCATION AND DESCRIPTION

The subject property, which consists of a hardware store with associated storage buildings, a residence, a car wash, a vacant lot, and a restaurant, is located on the east side of West Sunset Boulevard in a mixed commercial and residential area of Los Angeles, California. The property totals approximately 2.66 acres and is improved with ten (10) single-story, slab-on-grade buildings totaling approximately 30,000 square feet. The subject property is currently occupied by a car wash business, Reliable Do It Center, film storage company, and residential tenants. On-site operations include car wash and small-scale auto repair operations, retail of home improvement goods, film storage, and daily residential activities. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping.

During the site reconnaissance, hazardous materials consisting of containers of waste oil and oil filters were observed in connection with auto repair operations. Environmental concerns associated with the storage and/or use of these materials were noted during the site reconnaissance and/or during the review of regulatory records. Please refer to Section 7.1 for additional information.

The subject property was identified in the regulatory database report as an EDR US Historical Auto Station site, and is further discussed in Section 5.1.

The Assessor's Parcel Numbers (APNs) for the subject property are 5406-016-003, 5406-016-006, 5406-016-007, 5406-016-010, 5406-016-011, 5406-016-013, 5406-016-016, 5406-016-018, 5406-016-019, 5406-016-021, 5406-016-023, and 5406-016-028. According to Mr. Fred Shaffer, representative of Aragon Properties Ltd., heating and cooling systems on the subject property are fueled by natural gas and electricity provided by Southern California Gas and Los Angeles Department of Water and Power (LADWP), respectively, and potable water and sewage disposal are provided by LADWP.

Refer to Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs for site location.

### 2.2 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed commercial and residential area of Los Angeles. The immediately surrounding properties consist of the following:

Direction from Site	Address-Tenant/Use
North	Single- and multi-family residences
Northeast	Everett Street, followed by single- and multi-family residences
East (abutting)	Single- and multi-family residences
Southeast	Everett Street, followed by multi-family residences and Seng Auto Repair (1165 West Sunset Boulevard)
Southwest	West Sunset Boulevard, followed by single- and multi-family residences and API Audio Products (1176 West Sunset Boulevard)

<b>West</b>	West Sunset Boulevard, followed by multi-family residences, a vacant lot, and a multi-tenant commercial building (1218 West Sunset Boulevard)
-------------	---

The adjacent site to the west, identified as 1218 West Sunset Boulevard, was listed in the regulatory database report as an EDR US Historical Auto Station site. The adjacent site to the south, identified as Seng Auto at 1165 West Sunset Boulevard, was listed in the regulatory database report a CA FID UST, SWEEPS UST, EDR Historical Auto Station, HIST CORTESE, LUST, Please refer to Section 5.1.

### 2.3 PHYSICAL SETTING

<p><b>Geology:</b> According to the United States Department of Agriculture’s Report and General Soil Map for Los Angeles County, the area surrounding the subject property is underlain by soils of the Altamont-Diablo Association. The soils of this association occur throughout the Los Angeles basin and along the Ventura County line north of Highway 101. Elevations range from near sea level to 1,500 feet with 30 to 50 percent slopes. Altamont soils make up about 60 percent and Diablo soils 30 percent of this association. These soils are used extensively for residential development, for watershed and wildlife.</p> <p>Altamont soils are 24 to 36 inches deep, are well drained, and have slow subsoil permeability. They have dark brown, neutral, clay surface layers about 12 inches thick underlain by a brown, calcareous clay subsoil. Partially weathered calcareous soft shale or sandstone occurs at depths of 24 to 36 inches. Available water-holding capacity is 4 to 6 inches for 24 to 36 inches of soil depth.</p> <p>Diablo soils are 22 to 52 inches deep, are well drained, and have slow subsoil permeability. They have dark gray, neutral, clay surface layers about 20 inches thick underlain by dark grayish-brown strongly calcareous clay subsoils. Very strongly calcareous shale occurs at depths of 22 to 52 inches. Outcrops of hard shale make the surface rocky in a few places. Available water holding capacity is 3.5 to 7.5 inches for 22 to 52 inches of soil depth.</p> <p>According to information obtained from the Underground Storage Tank Low Risk Case Review Form for G.H. Palmer &amp; Associates, located at 867 Cesar Chavez Avenue, located approximately 0.42 mile southeast of the subject property, soil in the vicinity of the site consists of silty clay, and silty sand to a depth of 40 feet bgs.</p>	
<b>USGS Topographic Map:</b>	Los Angeles, California Quadrangle (1966)
<b>Nearest surface water to subject property :</b>	Echo Lake/0.56 mile west
<b>Gradient Direction/Source:</b>	Southwest/RWQCB’s GeoTracker
<b>Estimated Depth to Groundwater/Source:</b>	12-20 feet bgs/RWQCB’s GeoTracker

### 3.0 HISTORICAL REVIEW OF SITE AND VICINITY

---

#### 3.1 HISTORICAL SUMMARY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-05 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historic city directories, Sanborn fire insurance maps and agency records is as follows:

Date Range	Subject Property Description/Use	Source(s)
1906	Vacant land and residential buildings	Sanborn Maps
1927-present	Residential and commercial/industrial buildings used for manufacturing, printing, gas station servicing, auto repair, and retail	Sanborn Maps, Aerial Photographs, City Directories, Building Records, Interviews

From at least 1906, the entire subject property consisted of vacant lots with single-family residences on the southern and eastern portions.

From at least 1927 to at least 1961, the southern portion of the subject property associated with the addresses 1181 (historical address) and 1185 West Sunset Boulevard, was developed with a gas station. The current structures were developed for gas station and auto repair purposes in the early 1960's. Gas station operations were conducted until at least 1970 and were subsequently phased out.

From at least 1927, the portion of the subject property currently associated with the addresses 1205 and 1207 West Sunset Boulevard, was developed with a commercial building on the western portion and a residential building on the eastern portion. The southern portion of the commercial building, identified with 1205 Sunset Boulevard, was a store in 1950, upholstery company from 1953 to 1954, plastic key tag manufacturer from 1956 to 1958, and time controls manufacturer from 1962 to 1970. The northern portion of the commercial building, identified with 1207 West Sunset Boulevard, was a chemical manufacturer of disinfectants from 1950 to 1954 and a valve manufacturer from 1957 to 1970. Since no information was available regarding the use of the building from 1927 to 1950, there is a possibility that chemical manufacturing was conducted since 1927. The current tenant, Reliable Do It Center, has occupied the building from at least the mid 1970's. The residential building is currently vacant.

From at least 1927, the portion of the subject property currently associated with the address 1211 West Sunset Boulevard was developed with a commercial/industrial building. This building was occupied by a fruit products company in 1937, a shade manufacturer in at least 1942, and a printing facility from at least 1950 to at least 1971. The current tenant, Reliable Do It Center, has occupied the building from at least the mid 1970's.

In 1906 the portion of the subject property currently associated with the address 1229 Sunset Boulevard, was undeveloped land. According to a 1946 building permit, a gas station building was replaced by a store. No further information regarding this possible gas station was found. From at least 1950, this portion of the property was developed with a commercial building, which was occupied by a furniture company in 1950, a hood & pad manufacturer/sign manufacturer/painting company in 1953, neon sign manufacturer/sign manufacturer/painting company from 1954 to 1960, and a sash and door warehouse from 1964 to 1970. The current tenant, Reliable Do It Center, has occupied the building from at least the mid 1970's.

From at least 1927, the portion of the subject property currently associated with the addresses 1235, 1237, and 1239 Sunset Boulevard was developed with a commercial/industrial building. The building was occupied by a woodworking and sign painting company in 1950, a sign manufacturer and painting company in 1954, a sash and door warehouse from 1957 to 1960, and sign painting company from 1964 to 1970. The current tenant, Reliable Do It Center, has occupied the building from at least the mid 1970's.

The subject property was historically used for various manufacturing and auto repair operations since at least the 1940's. These operations are typically associated with the use of hazardous materials, including solvents and oils. In addition, the subject property was also historically used for printing operations. Many printing industries generate waste ink and ink sludges that might contain solvents or heavy metals. Photographic processes are also typically associated with major printing operations for image conversion and plate making. Photographic wastes, including heavy metal solutions, developers, hardeners, plating chemicals, and spent solvents, make up a large portion of the hazardous waste generated in these industries. Solvents used during printing operations may include chlorinated solvents, which are highly mobile and can easily accumulate in the soil. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. The historical on-site industrial operations represent a REC. Historical tenants/operations of concern are further discussed in Sections 3.2, 3.3, 3.4, 4.1.3, 4.1.7, 5.1, and 6.1.1.

In addition, the subject property was historically a gas station from at least 1925 until at least 1970. Environmental concerns associated with the former gas station are further discussed in Section 7.1.

The remaining portions of the subject property have been used for residential purposes from at least 1906 to the present.

Based on a review of historical sources, the following historical addresses were associated with the subject property: 1181-1253 Sunset Boulevard (odds) and 917, 959-965 Everett Street (odds). These addresses were also researched as part of this assessment.

If available, copies of historical sources are provided in the report appendices.

### **3.2 AERIAL PHOTOGRAPH REVIEW**

AEI Consultants reviewed aerial photographs of the subject property and surrounding area. Aerial photographs were reviewed for the following years:

Date(s)	Scale	Subject Property Description	Surrounding Area Descriptions
1927	1"=500'	The southern portion is developed with buildings. Due to the poor quality of the aerial photograph, features on the southernmost lot are not discernable. The central portion is developed with two commercial buildings, identified as 1205, 1207, 1211 Sunset Boulevard from Sanborn maps, and a residential building. The central portion further north is vacant land. The northwestern portion is developed with a commercial/industrial building, identified as 1235, 1237, 1239 Sunset Boulevard from Sanborn maps. The northernmost and northeastern lots are developed with residential buildings.	<b>North:</b> Residential development <b>Northeast:</b> Residential development <b>East (abutting):</b> Residential development <b>Southeast:</b> Developed with a residential or commercial building <b>Southwest:</b> Residential development <b>West:</b> Residential development and vacant lots
1938	1"=500'	No significant changes; except a small structure is present in the central portion of the property.	<b>North:</b> No significant changes <b>Northeast:</b> No significant changes <b>East (abutting):</b> No significant changes <b>Southeast:</b> Developed with a commercial/industrial building consistent with current auto repair structure <b>Southwest:</b> One of the multi-family residences is not longer present <b>West:</b> No significant changes
1947	1"=500'	The northwestern portion is developed with a commercial building, identified as 1243 Sunset Boulevard. The western portion is developed with a commercial/industrial building, identified as 1229 Sunset Boulevard.	No significant changes
1956	1"=500'	A parking lot has been added to the central portion, north of 1211 Sunset Boulevard. The commercial/industrial buildings on the northwestern portion have been extended.	No significant changes with the exception that a structure consistent with a gas station has been developed on the adjacent site to the southeast
1965	1"=500'	The southern portion is developed with the two current commercial/industrial buildings	No significant changes with the exception that a commercial building has been developed on the adjacent site to the northwest

1976	1"=500'	The southern portion is developed with the current commercial/industrial building. The central western portion is developed with a parking lot.	No significant change with the exception that a commercial building has been developed on the adjacent site to the west
1989, 1994, 2005, 2009, 2010	1"=500' 1"=500' 1"=500' 1"=500' 1"=500'	No significant changes	No significant changes with the exception that a commercial building has been develop on the adjacent site to the southwest

### 3.3 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of EDR's collection of Sanborn Fire Insurance maps.

Sanborn maps were available and reviewed for the years 1906, 1950, 1953, 1954, 1957, 1960, 1964, 1965, 1968, and 1970.

Date(s)	Subject Property Description	Surrounding Area Descriptions
1906	The southern portion of the subject property is developed with three single-family residences with the addresses 1193, 1197, and 1201 Sunset Boulevard. The northwestern portion is developed with a single-family residence associated with the address 1243 Sunset Boulevard. The northeastern lot off of Everett Street is developed with a single-family residence associated with the address 959 Everett Street.	<p><b>North:</b> The portion off of Sunset Boulevard consists of vacant lots. The portion off of Everett Street is developed with single-family residences, out houses, and a stable</p> <p><b>Northeast:</b> Single-family residences</p> <p><b>East (abutting):</b> Single-family residences and vacant lots</p> <p><b>Southeast:</b> Single-family residences and vacant lots</p> <p><b>Southwest:</b> Single-family residences and vacant lots</p> <p><b>West:</b> Single-family residences and vacant lots</p>
1950	The southernmost lot is developed with a gas and oil station associated with the address 1181 Sunset Boulevard. According to building records, gas station structures were developed in 1925. The northernmost single-family residence is also associated with the address 1203 Sunset Boulevard. The lot to the north of that is developed with a store and "chem" manufacturing building on the western portion, associated with 1205 and 1207 Sunset Boulevard, respectively. Storage, garage, and duplex are present on the central and eastern portions. A printing facility, associated with the address 1211 Sunset Boulevard, is present further to the north. Vacant lots are present further to the north, followed by a furniture	<p><b>North:</b> The lot off of Sunset Boulevard is developed with ten single-family residences. The lots off of Everett Street are developed with several single- and multi-family residences.</p> <p><b>Northeast:</b> Single-family residences</p> <p><b>East (abutting):</b> Several single- and multi-family residences.</p> <p><b>Southeast:</b> The northern lots are developed with single- and multi-family residences. The southern lot is developed with a gas and oil station (900 Everett Street) and building used for auto painting, a battery shop, stores, and auto repairing.</p> <p><b>Southwest:</b> No significant changes</p> <p><b>West:</b> Single- and multi-family residences, retail stores, and vacant lots</p>

	<p>building, associated with 1229 Sunset Boulevard. Further north is a building used for wood working, a store, and sign painting, associated with 1235, 1237, and 1239, respectively. The single-family residence formerly on the northwestern portion has been replaced by Latter Rain Church, associated with 1243 Sunset Boulevard, on the western portion, and a single-family residence, associated with 1245 Sunset Boulevard, on the eastern portion. The northwestern-most lot is developed with a single-family residence associated with 1247 Sunset Boulevard. The northeastern lot is developed with an additional single-family residence associated with 959½ Everett Street.</p>	
1953	<p>The former store at 1205 Sunset Boulevard is now used for upholstery. The former furniture building at 1229 Sunset Boulevard has been extended and is now used for hood &amp; pad manufacturing (1229) and sign manufacturing &amp; painting (1231). The former wood working and store spaces, associated with 1235 and 1237 Sunset Boulevard, have been combined. Due to the poor quality of the Sanborn map, the use of this new space is not clear. The sign painting unit has been extended. The church is now occupied by a Jewish temple.</p>	No significant changes
1954	<p>The building at 1229 and 1231 is now used for neon sign manufacturing and sign manufacturing and painting. It appears to be associated with the adjacent building to the north, which is also used for sign manufacturing and painting.</p>	<p><b>North:</b> No significant changes  <b>Northeast:</b> No significant changes  <b>East (abutting):</b> No significant changes  <b>Southeast:</b> The former auto painting space is now used as storage  <b>Southwest:</b> No significant changes  <b>West:</b> An additional building with two stores has been added</p>
1957	<p>The building associated with 1205 and 1207 Sunset Boulevard is now used for plastic key tag manufacturing and valve manufacturing, respectively. The building associated with 1235 and 1237 Sunset Boulevard is now used as a sash and door warehouse.</p>	No significant changes
1960	<p>The building associated with 1205 Sunset Boulevard is no longer used for plastic key tag manufacturing.</p>	No significant changes with the exception that an office building has been constructed to the northwest
1964	<p>The gas and oil station on the southern portion of the property has been developed with a building and structure</p>	No significant changes

	and is associated with 1185 Sunset Boulevard. The single-family residences on the southwestern portion are no longer present. 1205 Sunset Boulevard is now used for time controls manufacturing. The adjacent storage and auto garage building is no longer present. The building at 1227 and 1231 Sunset Boulevard is now used for sash and door warehouse purposes. The building previously associated with 1235 and 1237 Sunset Boulevard is now associated with 1239 Sunset Boulevard and is used for sign printing.	
1965	No significant changes	No significant changes with the exception that a single- and multi-family residence to the east has been replaced with a larger multi-family residence
1968	No significant changes	No significant changes with the exception that two of the multi-family residences to the west are no longer present
1970	The eastern portion of the building associated with 1227 and 1231 Sunset Boulevard has been removed.	No significant changes

### 3.4 CITY DIRECTORIES

A search of historic city directories was conducted for the subject property by EDR. Directories were available and reviewed for the years 1924, 1929, 1933, 1937, 1939, 1942, 1958, 1962, 1967, 1971, 1976, 2000, 2006, and 2012. The following table summarizes the results of the city directory search.

#### *City Directory Search Results for 1185 Sunset Boulevard*

<b>Date(s)</b>	<b>Occupant Listed</b>
1962	J & R Richfield Service A Center
1967	Hernandez Richfield Service
1971, 1976	Hernandez Arco Service

According to a review of historical city directories, portions of the subject property have been occupied by private residential tenants from at least 1924. The southern portion of the subject property, associated with the address 1185 Sunset Boulevard was listed as a gas station from 1962 to 1976 as well as a car wash and auto repair facility from 2000 to 2012. The address 1205 Sunset Boulevard was listed as an engraving company from 1956 to 1958 and a time controls manufacturing company (as identified in Sanborn maps) from 1962 to 1967. 1207 Sunset Boulevard was listed as a chemical manufacturer of disinfectants in 1951, and valve manufacturer from 1958 to 1967. 1211 Sunset Boulevard was listed as Rollaway Screen Co. Shade Manufacturers in 1942 and a printing company from 1951 to 1971.

### **3.5 HISTORICAL TOPOGRAPHIC MAPS**

In accordance with our approved scope of services, historical topographic maps were not reviewed as a part of this assessment.

### **3.6 CHAIN OF TITLE**

In accordance with our approved scope of services, a Chain of Title search was not performed as part of this assessment.

## **4.0 REGULATORY AGENCY RECORDS REVIEW**

---

### **4.1 REGULATORY AGENCIES**

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to Activity and Use Limitations (AULs), defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

#### **4.1.1 HEALTH DEPARTMENT**

On February 5, 2013, AEI contacted the Los Angeles County Public Health Investigation (LACPHI) for information on the subject property and nearby sites of concern. Files at this agency may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

No information indicating current or prior use or storage of hazardous materials, or the existence of AULs was on file for the subject property with the LACPHI.

#### **4.1.2 FIRE DEPARTMENT**

On February 5, 2013, AEI contacted the Los Angeles Fire Department Underground Storage Tank (LAFD UST) for information on the subject property to identify any evidence of previous or current USTs.

No information indicating current or prior use or storage of hazardous materials, or the existence of AULs was on file for the subject property with the LAFD UST.

On February 5, 2013, AEI contacted the Los Angeles Fire Department Hazardous Materials (LAFD HAZMAT) for information on the subject property to identify any evidence of previous or current hazardous material usage.

AEI received a response stating that files exist for 1185 and 1229 West Sunset Boulevard. However, the files have not been made available at this time. Upon reviewing pertinent information in connection with the subject property, AEI will immediately issue an addendum to this report if items of environmental concern are identified. However, based on the quality of information obtained from other sources, this limitation is not expected to significantly alter the findings of this assessment.

#### **4.1.3 BUILDING DEPARTMENT**

On February 25, 2013, AEI visited the Los Angeles Department of Building and Safety (LADBS) for information on the subject property in order to identify historical tenants and property use. Please refer to the following table for a listing of permits reviewed:

*Building Permits Reviewed for 1181-1187 West Sunset Boulevard*

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description of Permit/Building Use</b>
1914	Schermerhorse	Building Permit for a tenement house (1181)
1925	Shell Co. of California	Building Permit for a service station (1181)
1938	Moroney	Building Permit for service station restrooms and office (1181)
1948	Not legible	Building Permit for an ice box (1181)
1960	Richfield Oil Co.	Building Permit for a service station, new building (1185)
1960	Richfield Oil Co.	Building Permit for a pump island and roof sign (1185)
1961	Richfield Oil Co.	Building Permit for a new service station building (1185)
1961	Richfield Oil Co.	Building Permit for a single-story shelter and roof sign (1185)
1963	Richfield Oil Co.	Building Permit for alteration (1185)
1964	Richfield Oil Co.	Certificate of Occupancy for a single-story canopy (1185)
1967	Richfield Oil Co.	Building Permit for sign and shelter (1185)
1967	Richfield Oil Co.	Building Permit to install cornice and relocate bathroom
1967	Richfield Oil Co.	Building Permit to change footing only (1185)
2002	Steve Wintner	Building Permit for a new detached patio accessory use to car wash (1185)
2004	Steve Wintner	Building Permit for use of land permit for used auto sales

*Building Permits Reviewed for 1189-1195 West Sunset Boulevard*

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description of Permit/Building Use</b>
1924	Grover	Building Permit for dwelling (1193)
1975	Steve Wintner	Certificate of Occupancy for a single-story warehouse (1195)

*Building Permits Reviewed for 1197- 1203 West Sunset Boulevard*

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description of Permit/Building Use</b>
1905	Stebbin	Building Permit for alteration (1201)
1908	Richert	Building Permit for a barn (1201)
1915	Stuart	Building Permit for a dwelling (1201)
1917	Grinn	Building Permit for a residence (1197)
1922	Heath	Building Permit for a store (1201)
1923	Heath	Building Permit for a private garage dwelling and farm (1203)
1933	Heath	Building Permit for an oil depot, retail refractory oil (1201½)
1945	Weiss	Building Permit for residences (1197)
1965	Foster and Kleiser	Certificate of Occupancy for a single-story shelter and sign (1197)

*Building Permits Reviewed for 1205-1207 West Sunset Boulevard*

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description of Permit/Building Use</b>
1922	Stires	Building Permit for stores (1205-1207)
1922	Barnett	Building Permit for dwellings (1205½ -1207½)
1952	Rosen Cross Store	Building Permit for alteration
1963	Emanuel Day	Building Permit for existing three commercial and one residence buildings (1205-1207½)
1964	Day	Certificate of Occupancy for single-story stores and two-story duplexes (1205-1207½)
1989	Mr. Yu	Electrical Permit (1205)
2012	Steve Wintner	Building Permit to relocate a water heater (1207)

*Building Permits Reviewed for 1209-1231 West Sunset Boulevard*

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description of Permit/Building Use</b>
1926	Barnett	Building Permit for public garage (1211)
1934	American Linen Exchange Co.	Building Permit to alter use from a garage to a towel store (1211)
1937	California Food Products Inc.	Building Permit for a market (1211)
1945	Cox et al	Building Permit for a dwelling (1215)
1946	Irving Koller	Building Permit for a present gas station building to be altered into a store (1229)
1950	Koller	Certificate of Occupancy for addition to an existing store (1229)
1955	Koller	Building Permit for a sign shop (1227-1231)
1956	Koller	Certificate of Occupancy for addition to an existing sign shop (1227-1231)
1961	Not legible	Building Permit for a vacant lot (1219)
1965	Bodoni Limited	Building Permit for a parking lot and print shop (1211-1215)
1990	Wintner	Building Permit for a warehouse (1211-1229)

*Building Permits Reviewed for 1233-1239 West Sunset Boulevard*

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description of Permit/Building Use</b>
1922	Kane	Building Permit for stores (1233-1237)
1922	Kane	Building Permit for a garage (1233)
1930	Pipolo	Building Permit for a store (1237)
1931	Borardino	Building Permit for a poultry market (1233)
1933	Pipolo	Building Permit to alter use from a store to a restaurant (1239)
1934	Red Gluch Inn	Building Permit for a Beer Parlor (1239)
1938	Bookstein	Building Permit for a store (1235)
1950	Koller	Certificate of Occupancy for addition to alter; change occupants
1951	Koller	Certificate of Occupancy for alteration of a portion of a store to a café (1235)
1967	Koller	Building Permit to repair fire damage for a sign company

*Building Permits Reviewed for 1241-1253 Sunset Boulevard*

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description of Permit/Building Use</b>
1922	Stires	Building Permit for a residence (1251-1253)
1922	Ouz	Building Permit for a residence (1247½)
1937	Harvard	Building Permit for a residence (1251-1253)
1947	Not legible	Certificate of Occupancy for a commercial building (1247)
1948	Koller	Certificate of Occupancy for offices (1243)
1962	Sherman	Certificate of Occupancy for single-family residence (1245-1247½)
1962	Posner	Certificate of Occupancy for single-family residence (1251)
1962	Posner	Certificate of Occupancy for single-family residence (1251½)
1962	Posner	Certificate of Occupancy for single-family residence (1253-1253½)
2002	Eldoyle Co.	Grading Permit (1251-1253½)
2002	Eldoyle Co.	Building Permit for single-family residence (1251)
2009	Eldoyle Co.	Building Permit for a retaining wall

*Building Permits Reviewed for 917 and 959-965 Everett Street*

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description of Permit/Building Use</b>
1906	Emoch	Building Permit for a new single-family residence
1909	1193 Sunset Boulevard	Building Permit for a new single-family residence (917)
1909	Emoch	Building Permit for a new single-family residence (959)
1922	Ostrander	Building Permit for a single-family residence (965)
1926	Ostrander	Building Permit for a single-family residence (965)
1945	Halorow	Building Permit for dwelling alteration (917)
1965	Koller	Certificate of Occupancy for a single-family residence (959)

Based on a review of building records, the subject property has been used for residential, commercial and industrial activities from at least 1905. The subject property associated with the addresses 1181 and 1185 West Sunset Boulevard was a tenement house in 1914 and was redeveloped as a gas station in 1925. Various service station structures were altered or constructed from 1925 to 1967. In 1933, 1201½ West Sunset Boulevard was issued a building permit for an oil depot (see the Section 3.1 for further discussion). No further pertinent information was available from other resources during this investigation. In 1965, 1211-1215 West Sunset Boulevard was issued a building permit for a parking lot and print shop. In 1946, a building permit was issued to 1229 West Sunset Boulevard for an alteration of a present gas station building into a store. The next earliest historical information available was a 1906 Sanborn that depicted this portion of the property as undeveloped. There is a possibility that a gas station was present from sometime after 1906 until 1946. However, no other pertinent information was available regarding the potential historical gas station. Based on the limited information, the possibility of a historical gas station at 1229 West Sunset Boulevard represents

a REC. Please refer to Section 3.1 for further discussion of the historical operations at the subject property.

#### **4.1.4 PLANNING DEPARTMENT**

On February 5, 2013, AEI contacted the Los Angeles City Planning Department (LACPD) for information on the subject property in order to identify AULs associated with the subject property.

According to the LACPD, the subject property is located near significant oil production areas known as "Methane Zones". Methane Zone sites include sites immediately surrounding gas sources and where testing and mitigation are required by the City of Los Angeles Department of Building and Safety. Due to the potential environmental risk associated with construction in Methane Zones, the property owner is required to conduct a methane assessment prior to the redevelopment of the subject property (Division 71 of the Los Angeles Building Code). AEI recommends that a methane assessment be conducted for the subject property prior to any future redevelopment activities.

#### **4.1.5 COUNTY ASSESSOR OFFICE**

On February 5, 2013, AEI visited the Los Angeles County assessor's office for information on the subject property in order to determine the earliest recorded date of development and use.

According to the Los Angeles County assessor's office, the earliest recorded date of development on the subject property (APN: 5406-016-007) was 1922, and the subject property was utilized for commercial/industrial purposes.

#### **4.1.6 DEPARTMENT OF OIL AND GAS**

California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) maps concerning the subject property and nearby properties were reviewed. DOGGR maps contain information regarding oil and gas development.

According to the DOGGR map, there are no oil or gas wells within 500 feet of the subject property. No environmental concerns were noted during the DOGGR map review.

#### **4.1.7 OTHER AGENCIES SEARCHED**

On February 5, 2013, AEI contacted the **Los Angeles Bureau of Sanitation (LABS) Industrial Waste Management Division (IWMD)** for records of a clarifier system, historical or present permits and certifications for the discharge or disposal of wastewater, and any NOV's or NTCs issued.

In 1961, Richfield Oil Corporation at 1185 Sunset Boulevard was issued a permit for use of a clarifier for occasional auto wash activities. In 1994, Best Way Hand Car Wash at 1185 Sunset Boulevard was issued a permit to use a three-stage clarifier for auto wash activities. The clarifier permit was reissued in 2009 to Infinity Car Wash and again in 2011 to Friend's Car Wash. Please refer to Section 7.1 for further discussion of the clarifiers at the subject property.

On February 5, 2013, AEI visited the **Regional Water Quality Control Board (RWQCB)** GeoTracker Website for information on the subject property to identify any evidence of

unauthorized releases of hazardous materials to the groundwater. Cases typically handled by the RWQCB include releases from USTs.

No information indicating the existence of any unauthorized releases of hazardous materials to the groundwater was on file for the subject property with the RWQCB.

On February 5, 2013, AEI visited the website maintained by the **South Coast Air Quality Management District (SCAQMD)** for information regarding any records of Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) issued to occupants of the subject property and associated with air emission equipment primarily related to stationary sources of air pollution, such as dry cleaning machines, boiler, and/or underground storage tanks.

No information indicating the existence of any PTOs, NOVs, or NTCs was on file for the subject property with the SCAQMD.

On February 5, 2013, AEI visited the Hazardous Waste Tracking System (HWTS) online database maintained by the **Department of Toxic Substances Control (DTSC)** for information regarding documented hazardous wastes generated at the subject property.

No information indicating the generation of hazardous wastes was on file for the subject property with the DTSC. However, the subject property was listed in the DTSC HWTS under the tenant O & J Auto Repair in 2002 and 2006. Auto repair operations at the subject property are further discussed in Section 7.1.

## 5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted Environmental Data Resources (EDR) to conduct a search of federal, state, tribal, and local databases containing known and suspected sites of environmental contamination. The number of listed sites identified within the approximate minimum search distance (AMSD) from the Federal and State environmental records database listings specified in ASTM Standard E 1527-05 are summarized in the following table. A copy of the regulatory database report is included in Appendix B of this report.

The subject property was identified in the databases reviewed as an EDR US Historical Auto Station site.

In determining if a site is a potential environmental concern to the subject property in the records summary table below, AEI has applied the following criteria to classify the site(s) as low concern: 1) the site(s) only hold an operating permit (which does not imply a release), 2) the site(s) have been granted "No Further Action" by the appropriate regulatory agency, and/or 3) based upon AEI's review, the distance and/or topographic position relative to the subject property reduce the level of risk associated with the site(s).

### 5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property Listed	Total Number of Listings	Potential Environmental Concern to the Subject Property (Yes/No)
NPL	1	No	0	
DELISTED NPL	0.5	No	0	
CERCLIS	0.5	No	0	
CERCLIS NFRAP	0.5	No	0	
RCRA CORRACTS	1	No	0

Distance: N/A  
Direction: N/A

Comments: The subject property was identified as Sempe Auto Repair from 1999 to 2001 and O&J Auto Repair and Sales from 2004 to 2012. No additional pertinent information was provided by the regulatory database report. According to historical sources, the subject property was a gas station from at least 1950 and conducted auto repair services from at least the mid 1960's. Based on the length of time the subject property has been used for auto repair or servicing purposes, there is a possibility that a release of hazardous materials into the subsurface has occurred at the subject property. The clarifiers and hydraulic lifts associated with the auto repair operations are further discussed in Section 7.1.

Site Name: R&R Auto Accessories  
Database(s): EDR US Historical Auto Station  
Address: 1218 West Sunset Boulevard  
Distance: West  
Direction: 100 feet

Comments: The adjacent site to the west was identified as R&R Auto Accessories from 2003 to 2008. This site was not identified as a release site in the regulatory database report or the GeoTracker website and is located hydrologically downgradient with respect to the subject property. Additionally, this site is not associated with any hazardous materials listing and is potentially an auto parts retailer. Based on these factors, this listing is not expected to represent a significant environmental concern.

Site Name: Seng Auto

Database(s): CA FID UST, SWEEPS UST, EDR Historical Auto Station, HIST CORTESE, LUST

Address: 1165 West Sunset Boulevard

Distance: 60 feet

Direction: Southeast

Comments: The adjacent site to the southeast was identified as Seng Auto Repair from 1999 to 2012. According to historical sources, this adjacent site has been used for auto repair purposes since at least 1950. This site was also identified as a LUST site. The soil at this site was reportedly impacted by other solvent or non-petroleum hydrocarbons. This case was opened in 1990 and received closure in 1998. Soil was listed as the only media impacted and no groundwater impacts were listed. AEI requested information from the Los Angeles RWQCB. However, as of this report date, no response has been received. This site is located hydrologically cross-gradient with respect to the subject property. Based on the current regulatory status, media impacted, and inferred direction of groundwater flow, this adjacent site is not expected to represent a significant environmental concern to the subject property at this time.

## 6.0 INTERVIEWS AND USER PROVIDED INFORMATION

### 6.1 INTERVIEWS

Pursuant to ASTM E1527-05, the following interviews were performed during this investigation in order to obtain information indicating RECs in connection with the subject property.

#### 6.1.1 INTERVIEW WITH OWNER

The subject property owner, Mr. Steve Wintner, was interviewed in person on February 19, 2013. Mr. Wintner has been associated with the subject property for approximately 55 years. His family purchased the southern portion of the property approximately 55 years ago and overtime acquired the additional properties. According to Mr. Wintner, the southern portion of the property was formerly a gas station and four USTs are currently in ground. When his family purchased the property the southern portion of the property was no longer operating as a gas station and was only used for auto repair and car washing operations. The current Reliable Do It Center buildings were operating since the 1970's. Mr. Wintner was asked if he was aware of any of the following:

Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.	Yes	X	No
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.	Yes	X	No
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	Yes	X	No
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.	Yes	X	No

#### 6.1.2 INTERVIEW WITH KEY SITE MANAGER

The key site manager, Mr. Fred Shaffer, representative of Aragon Properties Ltd., was contacted by phone on February 6, 2013. Mr. Shaffer has been associated with the subject property since approximately 2013. Mr. Shaffer provided general information regarding historic and current operations at the subject property.

Mr. Shaffer was asked if he was aware of any of the following:

Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.	Yes	X	No
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.	Yes	X	No
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	Yes	X	No
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.	Yes	X	No

#### 6.1.3 PAST OWNERS, OPERATORS AND OCCUPANTS

Interviews with past owners and occupants regarding historical onsite operations were not reasonably ascertainable. However, based on information obtained from other sources

including aerial photographs, Sanborn maps, city directories, and building records, it is likely that the information provided by past owners and operators would have been duplicative.

#### **6.1.4 INTERVIEW WITH OTHERS**

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

### **6.2 USER PROVIDED INFORMATION**

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-05 and EPA's AAI Rule, certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the environmental professional. The responsibility for qualifying for Landowner Liability Protections (LLPs) by conducting the inquiries ultimately rests with the User, and providing the information to the environmental professional would be prudent if such information is available.

#### **6.2.1 ENVIRONMENTAL LIENS**

AEI was not informed by the User, Aragon Properties Ltd., of any environmental cleanup liens encumbering the subject property that are filed or recorded under federal, tribal, state or local law.

#### **6.2.2 ACTIVITY AND LAND USE LIMITATIONS**

AEI was not informed by the User of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state or local law.

#### **6.2.3 SPECIALIZED KNOWLEDGE**

AEI was not informed by the User of any specialized knowledge or experience related to the subject property or nearby properties.

#### **6.2.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES**

The User did not indicate to AEI any information to suggest that the valuation of the subject property is significantly less than the valuation for comparable properties due to environmental factors.

#### **6.2.5 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION**

The User did not inform AEI of any commonly known or reasonably ascertainable information about the subject property which aided AEI in identifying conditions indicative of a release or threatened release.

#### **6.2.6 KNOWLEDGE OF PRESENCE OR LIKELY PRESENCE OF CONTAMINATION**

The User did not inform AEI of any obvious indicators that pointed to the presence or likely presence of contamination at the subject property.

### **6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION**

Documentation was provided to AEI by Mr. Fred Shaffer during this assessment. A summary of this information follows:

Executive Summary of Phase I Environmental Site Assessment and Limited Subsurface Investigation for the Property Located at Sunset Boulevard and Everett Street, prepared by Petra Geotechnical, Inc. (April 14, 2005)

According to the executive summary (entirety of report not provided) of the previous report conducted by Petra Geotechnical, Inc. (Petra), the subject property consisted of a hardware store with associated storage buildings, a residence, a car wash, multiple bungalows, a vacant lot and a restaurant. Petra identified historical land use to consist of multiple residences, a janitorial supply/disinfectant manufacturer, a sprinkler/valve manufacturer, a gas station, a temple, a car wash, and a restaurant. Based on the date of construction of the current buildings at the subject property, Petra determined that asbestos-containing materials (ACM) and lead-based paints (LBP) may be present. In addition, based on the age of the buildings, the fluorescent light fixtures present throughout the hardware store and associated storage buildings may contain polychlorinated biphenyls (PCBs). According to the owner of the property, four gasoline underground storage tanks (USTs) are currently present beneath the car wash on the southern portion of the property. Petra identified a REC for the former gas station, which was present from the 1960's to the mid-1970's. Petra recommending a Limited Phase II Subsurface Investigation to determine if a significant release occurred in the past.

The Limited Phase II Subsurface Investigation was conducted on March 31, 2005. A subsurface geophysical survey was conducted on site to delineate the location of the four USTs and fuel distribution lines heading to a fuel island. A waste oil UST in the rear of the car wash was delineated, as well as an area within an auto shop site which appeared to have formerly had a hydraulic hoist present. Petra advanced 15 borings in the vicinity of the delineated areas based on proximity to the areas of concern. The borings were drilled to a total depth of approximately 25 feet below ground surface (bgs). The samples were analyzed for volatile organic compounds (VOC) and total petroleum hydrocarbons (TPH). The results of the soil sample analysis were that trace amounts of TPH were encountered in one sample collected at 22 feet bgs from the vicinity of the waste oil UST. No detectable concentrations were found in a five feet bgs sample taken from the same boring. Petra concluded that these levels did not indicate a significant release from the waste oil tank. Petra was unable to find evidence that the site had been impacted from petroleum hydrocarbons and/or VOCs related to the former site use. However, borings could only be collected from the vicinity of the USTs and not directly below them. Therefore, Petra stated that there is a potential that impact to site soils is present directly below the USTs. Petra stated that the fact that no lateral contamination was detected in samples deeper than the bottom of the UST appears to indicate that a large scale release has not occurred. Petra recommended removing and disposing of all USTs on site in accordance with current regulation, prior to site development. Petra also recommended that if the current buildings were to be demolished or upgraded, a survey for asbestos and lead-based paint be conducted and any identified materials be abated.

The executive summary (entirety of report not provided) of the previous report is provided in Appendix F.

## 7.0 SITE INSPECTION AND RECONNAISSANCE

On February 19, 2013, a site reconnaissance of the subject property and adjacent properties was conducted by Mr. Daniel Huerta of AEI in order to obtain information indicating the likelihood of RECs at the subject property and adjacent properties as specified in ASTM Standard Practice E1527-05 §8.4.2, 8.4.3 and 8.4.4. During the on-site reconnaissance, AEI was accompanied by Mr. Steve Wintner, subject property owner, and Mr. Fred Shaffer, representative of Aragon Properties Ltd. AEI did not have access to the residential buildings associated with 1245 West Sunset Boulevard, the single-family residence associated with 1205 West Sunset Boulevard, and the commercial building associated with 1201 West Sunset Boulevard. Based on the use of the buildings for typical residential activities and film equipment storage, this limitation is not expected to significantly alter the findings of this report.

### 7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

Yes	No	Observation
X		Hazardous Substances and/or Petroleum Products in Connection with Property Use
X		Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)
	X	Hazardous Substance and Petroleum Product Containers and Unidentified Containers not in Connection with Property Use
	X	Unidentified Substance Containers
X		Electrical or Mechanical Equipment Likely to Contain Fluids
	X	Interior Stains or Corrosion
	X	Strong, Pungent or Noxious Odors
	X	Pools of Liquid
X		Drains, Sumps and Clarifiers
	X	Pits, Ponds and Lagoons
	X	Stained Soil or Pavement
	X	Stressed Vegetation
	X	Solid Waste Disposal or Evidence of Fill Materials
	X	Waste Water Discharges
	X	Wells
	X	Septic Systems
	X	Other

The subject property is currently occupied by a car wash business, Reliable Do It Center, film storage company, and residential tenants. On-site operations include car wash and small-scale auto repair operations, retail of home improvement goods, film storage, and daily residential activities.

The above identified observed items are further discussed below.

## **HAZARDOUS SUBSTANCES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE**

AEI observed four 55-gallon drums of waste oil and two 55-gallon drums of used oil filters in the hazardous materials storage area located on the eastern portion of 1185 West Sunset Boulevard. The drums were equipped with secondary containment. However, staining was observed on the ground in the vicinity of the drums. The staining appears to be surficial and therefore represents a de minimis condition.

AEI also observed several containers of paint within the retail portions of the subject property buildings. No spills or staining were observed in the vicinity of the containers. Based on the good housekeeping, the presence of the containers of paint is not expected to represent a significant environmental concern.

## **ABOVEGROUND & UNDERGROUND HAZARDOUS SUBSTANCE OR PETROLEUM PRODUCT STORAGE TANKS (ASTs / USTs)**

AEI observed patched areas of asphalt on the southern portion of 1185 West Sunset Boulevard. The patched areas appear to be the locations of USTs from the historical gas station. According to Mr. Steve Wintner, subject property owner, the subject property is currently equipped with four USTs. No information regarding the sizes or dates of installation of the USTs was available. AEI reviewed a portion of the 2005 *Phase I Environmental Site Assessment and Limited Subsurface Investigation for the Property Located at Sunset Boulevard and Everett Street*, prepared by Petra Geotechnical, Inc. (Petra). According to this previous report, a subsurface geophysical survey conducted at the subject property delineated the location of four USTs and a waste oil UST in the rear of the car wash. Petra conducted soil sampling in the vicinity of the USTs. The results of the soil sample analysis were that trace amounts of TPH were encountered in one sample collected at 22 feet bgs from the vicinity of the waste oil UST. Petra was unable to find evidence that the site had been impacted from petroleum hydrocarbons and/or VOCs related to the former site use. However, borings could only be collected from the vicinity of the USTs and not directly below them. The presence of the USTs at the subject property represents a REC. Please refer to Section 6.3 for further discussion of the previous report.

## **ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS**

Toxic polychlorinated biphenyls (PCBs) were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

### *Hydraulic Lifts*

The subject property is equipped with one above-ground hydraulic lift within the garage at 1185 West Sunset Boulevard. The lift is equipped with a container of hydraulic fluid totaling approximately ten gallons situated approximately four feet above the ground surface. No evidence of stains or leakage from the units was observed, and the lifts are therefore not expected to represent a significant environmental concern.

AEI also observed an area within the garage that is indicative of a former underground hydraulic lift. It is unknown when the lifts were installed; however, the subject property has operated as a gas station from at least 1927 and as an automotive repair from at least the mid 1960's. Therefore, it is possible that the former underground lift was installed as early as the 1960's. Polychlorinated biphenyls (PCBs) were used in the past in dielectric fluids and oils in a variety of equipment, including hydraulic lift equipment. Soil testing was reportedly conducted by Petra in 2007. Since redevelopment of the subject property is planned, additional testing may be warranted at that time.

#### **DRAINS, SUMPS AND CLARIFIERS**

AEI observed two clarifiers at 1185 West Sunset Boulevard. One clarifier was located in the garage and the other clarifier was located in the car washing area. According to records from the LABS IWMD, a clarifier permit was issued to the subject property in 1961 for occasional auto wash activities. A permit was issued in 1994 for a three-stage clarifier for auto wash activities. This permit was reissued in 2009 and in 2011. It is unknown if the permits issued in 1961 and 1994 refer to the same clarifier. However, it appears that the clarifier located outside is used for car washing. Based on the presumed use of this clarifier for car washing activities, the clarifier located in the car washing area represents a BER.

The clarifier located in the garage appears to have been associated with auto repair operations. Clarifiers are used to treat waste water streams. There is a potential that oils or solvents present in the waste stream could impact the subsurface of the subject property if the clarifier or drain system was compromised. The collection and analysis of soil samples would be necessary to determine if the use of the clarifier has impacted the subject property. Based on the presumed use of this clarifier for auto repair operations and the on-site historical use of hazardous materials, the clarifier located in the garage represents a REC.

## **7.2 NON-ASTM SERVICES**

### **7.2.1 ASBESTOS-CONTAINING BUILDING MATERIALS**

#### OSHA

For buildings constructed prior to 1981, the Code of Federal Regulations (29 CFR 1926.1101 and 29 CFR 1910.1001) define presumed asbestos-containing material (PACM) as 1. Thermal System Insulation (TSI), e.g., boiler insulation, pipe lagging, fireproofing; and 2. Surfacing Materials, e.g., acoustical ceilings. Building owners/employers are responsible for locating the presence and quantity of PACM. Building Owners/employers can rebut installed material as PACM by either having an inspection in accordance with Asbestos Hazard Emergency Response Act (AHERA) (40 CFR Part 763, Subpart E) or hiring an accredited inspector to take bulk samples of the suspect material.

Typical materials not covered by the presumptive rule include but are not limited to: floor tiles and adhesives, wallboard systems, siding and roofing. Building materials such as wallboard systems may contain asbestos but unless a building owner/employer has specific knowledge or should have known through the exercise of due diligence that these other materials contain asbestos, the standard does not compel the building owner to sample these materials.

#### NESHAP

The applicability of the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP, 40 CFR Chapter 61, Subpart M) apply to the owner or operator of a facility where an inspection for the presence of asbestos-containing materials (ACM), including Category I (asbestos containing packings, gaskets, resilient floor coverings and asphalt roofing products), and Category II (all remaining types of non-friable asbestos containing material not included in Category I that when dry, cannot be crumbled, pulverized or reduced to powder by hand pressure), non-friable ACM must occur prior to the commencement of demolition or renovation activities. NESHAP defines ACM as any material or product that contains *greater than 1%* asbestos. It should be noted that the NESHAP regulation applies to all facilities regardless of construction date, including: 1. Any institutional, commercial, public, industrial, or residential structure, installation, or building; 2. Any ship; and 3. Any active or inactive waste disposal site. This requirement is typically enforced by the EPA or by local air pollution control/air quality management districts.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. The condition and friability of the identified suspect ACMs is noted in the following table:

Suspect Asbestos Containing Materials (ACMs)

Material	Location	Friable	Condition
Drywall Systems	Throughout Building Interior	Yes	Good
Vinyl Floor Tiles	1229 W. Sunset Blvd.	No	Damaged
Roofing Systems	Roof	Not Inspected	Not Inspected

All observed suspect ACMs were in good condition with the exception of damaged vinyl floor tiles were observed in 1229 West Sunset Boulevard. The identified suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Based on the potential presence of ACMs, AEI recommends the property owner implement an Operations and Maintenance (O & M) Plan which stipulates that assessment, repair and maintenance of damaged materials be performed to protect the health and safety of the building occupants.

Additionally, according to Mr. Fred Shaffer, representative of Aragon Properties Ltd., demolition activities are planned for the near future. Regardless of building construction date, the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) requires that an asbestos survey adhering to Asbestos Hazard Emergency Response Act (AHERA) sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by the local air pollution control or air quality management district, and specifies that all suspect asbestos-containing materials (ACMs) be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, Occupational Safety and Health Administration (OSHA) regulations require that specific work practices be implemented when handling construction materials and debris that contain lead-containing materials.

### 7.2.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has  $\geq 1 \text{ mg/cm}^2$  (5,000  $\mu\text{g/g}$  or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from  $0.5 \text{ mg/cm}^2$  to  $2.0 \text{ mg/cm}^2$ . Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact lead-based paint on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition and monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on lead-based paint and lead-based paint hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, federally owned or subsidized housing are affected by this rule.

Lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state or local regulations in regards to lead-containing paints.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960's should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. All painted surfaces were observed in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. However, based on the potential presence of LBP and nature of occupancy, AEI recommends the property owner implement an Operations and Maintenance (O & M) Plan to protect the health and safety of the building occupants. Local regulations may apply to lead-based paint in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing *any amount* of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62. Additionally, AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing *any amount* of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

### **7.2.3 RADON**

Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2.0 pCi/L and 4.0 pCi/L, equal to or below the action level of 4.0 pCi/L set forth by the EPA.

### **7.2.4 DRINKING WATER SOURCES AND LEAD IN DRINKING WATER**

The Los Angeles Department of Water and Power (LADWP) supplies potable water to the subject property. The most recent water quality report states that lead levels in the areas water supply were 5.6 micrograms per liter ( $\mu\text{g/L}$ ) for the 90<sup>th</sup> percentile and therefore are well within standards established by the US EPA.

### **7.2.5 MOLD/INDOOR AIR QUALITY ISSUES**

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI observed interior areas of the subject property buildings in order to identify the significant presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to mold appears to be warranted at this time.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, heating, ventilation and air conditioning (HVAC) systems and behind enclosed walls and ceilings, may be present on the subject property.

### 7.3 ADJACENT PROPERTY RECONNAISSANCE FINDINGS

Yes	No	Observation
	X	Hazardous Substances and/or Petroleum Products in Connection with Property Use
	X	Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)
	X	Hazardous Substance and Petroleum Product Containers and Unidentified Containers not in Connection with Property Use
	X	Unidentified Substance Containers
	X	Electrical or Mechanical Equipment Likely to Contain Fluids
	X	Strong, Pungent or Noxious Odors
	X	Pools of Liquid
	X	Drains, Sumps and Clarifiers
	X	Pits, Ponds and Lagoons
	X	Stained Soil or Pavement
	X	Stressed Vegetation
	X	Solid Waste Disposal or Evidence of Fill Materials
	X	Waste Water Discharges
	X	Wells
	X	Septic Systems
	X	Other

None of the above listed items were observed during the site inspection.

## 8.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

---

By signing this report, the senior author declares that, to the best of his or her professional knowledge and belief, he or she meets the definition of *Environmental Professional* as defined in §312.10 of 40 CFR Part 312.

The senior author has the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. The senior author has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

1185 WEST SUNSET BOULEVARD  
LOS ANGELES, CA 90026

#### COORDINATES

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR MGP..... EDR Proprietary Manufactured Gas Plants

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

#### ***State- and tribal - equivalent NPL***

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 12/05/2012 has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

#### ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State

## EXECUTIVE SUMMARY

Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 12/05/2012 has revealed that there are 14 ENVIROSTOR sites within approximately 1 mile of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 8 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 5 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect: Aquifer used for drinking water supply, Soil  
Potential Contaminants of Concern: Benzene, Gasoline  
Site History: The Installation Restoration (IR) Site 1 at Naval and Marine Corps Reserve Center - Los Angeles (NMCRC-LA) consists of a former service station and vehicle lube rack area. The site located on approximately six acres of land, about 1 mile northeast of downtown Los Angeles,

and is currently used by the City of Los Angeles Fire Department for training purpose. The former gasoline UST and the presence of several drums of unknown waste at the lube rack are potential historical sources of contamination at the site. Contaminated subsurface soils and groundwater below the area of concern are potential current sources of contamination. Type of contaminants identified in soil and groundwater consisted primarily of petroleum hydrocarbons in gasoline and diesel ranges. Analytical results from site investigations identified subsurface soils in the 15 to 25 feet below ground surface (bgs) depths as the soil strata of greatest contamination. Depth to water is approximately 30 feet bgs. The risk to human health from exposure to soil and groundwater is below the level of concern. Currently there is no drinking water wells on the property or within 1-mile radius in the area. The nearest well is located about 3 miles north of the site, which is upgradient to the source area. As of April 2007, groundwater data collected from the site show steady decrease trends and the plume has contained on site. Of the volatile organic compounds detected in groundwater, only 1,2-dichloroethane exceeded the screening level of 0.5 micrograms per liter (ug/l). Benzene concentration has decreased close to its cleanup goal of 1 ug/l.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 01/18/2005  
Comments: The SI included Geophysical survey; soil sampling and analysis; groundwater sampling and analysis; assessing the nature and extent of contamination; assessing the fate and transport of contaminants and assessing potential risk to human health. Based on the results, it is recommended that the site no longer considered a CERCLA IR site, and should fall under State of California UST program. DTSC concurs with this recommendation.

**S101584386**

Alternate City,St,Zip: LOS ANGELES, CA 90012  
Background Info: The Naval and Marine Corps Reserve Center, Los Angeles (NMCRC-LA) consists of approximately 6 acres of land, approximately 1 mile northeast of downtown Los Angeles. This site is a closed reserve center where Naval or Marine Corps activities are no longer conducted. NMCRC-LA was constructed from 1938 to 1940 by the Works Progress Administration and was commissioned in 1940 to provide administrative, training, and logistics support to reserve units. The facility has one Installation Restoration site, identified as Site 1, the former Service Station and Vehicle Lube Rack. The former service Station was built in 1943 and was used for fueling vehicles on site. The aboveground portion of the station has been removed. Adjacent to the former Service Station, the Vehicle Lube Rack was used for vehicle maintenance and drained directly to a waste of oil underground storage tank(UST). Between 1987 to 1989, hazardous substances (including used oil, solvents, hydraulic fluid, and other new and used vehicle maintenance products) were stored in 55-gallon drums on the Vehicle Lube Rack. In November 1994, the waste oil UST was removed in 1994 under supervision of the Los Angeles Fire Department. Soil with detected levels of total recoverable petroleum hydrocarbons was excavated and disposed off site. In 1995, an Environmental Baseline Study (EBS) was conducted. The EBS identified the Vehicle Lube Rack and the former Service Station gasoline UST as areas requiring further investigation. In 1996, a subsurface soil investigation conducted for Site 1 indicated the presence of gasoline-range hydrocarbons, benzene, toluene, ethylbenzene, total xylenes, and 1,2-dichloroethane.  
Comments Date: 01182005  
Comments: The SI included Geophysical survey; soil sampling and analysis;  
Comments Date: 01182005  
Comments: groundwater sampling and analysis; assessing the nature and extent  
Comments Date: 01182005  
Comments: of contamination; assessing the fate and transport of contaminants  
Comments Date: 01182005  
Comments: and assessing potential risk to human health. Based on the results,  
Comments Date: 01182005  
Comments: it is recommended that the site no longer considered a CE  
Comments Date: 01182005  
Comments: RCLA IR site, and should fall under State of California UST program.  
Comments Date: 01182005  
Comments: DTSC concurs with this recommendation.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/01/2012	Source: EPA
Date Data Arrived at EDR: 10/11/2012	Telephone: N/A
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 01/04/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

#### **NPL Site Boundaries**

EPA Region 10  
Telephone 206-553-8665

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/01/2012	Source: EPA
Date Data Arrived at EDR: 10/11/2012	Telephone: N/A
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 01/04/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/01/2012	Source: EPA
Date Data Arrived at EDR: 10/11/2012	Telephone: N/A
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 01/04/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/02/2012	Source: EPA
Date Data Arrived at EDR: 11/28/2012	Telephone: 703-412-9810
Date Made Active in Reports: 01/07/2013	Last EDR Contact: 01/04/2013
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/31/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2012	Telephone: 703-603-8704
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 01/11/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 11/02/2012	Source: EPA

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2012

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2012

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 12/05/2012	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 12/06/2012	Telephone: 916-323-3400

	Data Release Frequency: Varies

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/10/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/11/2012	Telephone: 202-566-2777

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date Data Arrived at EDR: 12/18/2012	Telephone: 916-323-3400
Date Made Active in Reports: 01/21/2013	Last EDR Contact: 12/10/2012
Number of Days to Update: 34	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/10/2012	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 12/11/2012	Telephone: 916-323-3400

## **Other Ascertainable Records**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2012	Telephone: (415) 495-8895
Date Made Active in Reports: 12/04/2012	Last EDR Contact: 01/03/2013
Number of Days to Update: 61	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: Varies

## DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 07/31/2012	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 08/07/2012	Telephone: 202-366-4595
Date Made Active in Reports: 09/18/2012	Last EDR Contact: 02/05/2013
Number of Days to Update: 42	Next Scheduled EDR Contact: 05/20/2013
	Data Release Frequency: Varies

## DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 01/17/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 04/29/2013
	Data Release Frequency: Semi-Annually

## FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2009	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 08/12/2010	Telephone: 202-528-4285
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 12/10/2012
Number of Days to Update: 112	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Varies

## CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 10/01/2012	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 10/19/2012	Telephone: Varies
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 12/28/2012
Number of Days to Update: 62	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: Varies

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 02/27/2012	Source: EPA
Date Data Arrived at EDR: 03/14/2012	Telephone: 703-416-0223
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 12/11/2012
Number of Days to Update: 92	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010	Source: Department of Energy
Date Data Arrived at EDR: 10/07/2011	Telephone: 505-845-0011
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 11/28/2012
Number of Days to Update: 146	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Varies

## US MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 08/18/2011	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 09/08/2011	Telephone: 303-231-5959
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 12/05/2012
Number of Days to Update: 21	Next Scheduled EDR Contact: 03/18/2013
	Data Release Frequency: Semi-Annually

## TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 09/01/2011	Telephone: 202-566-0250
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 11/28/2012
Number of Days to Update: 131	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Annually

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2006	Source: EPA
Date Data Arrived at EDR: 09/29/2010	Telephone: 202-260-5521
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 12/28/2012
Number of Days to Update: 64	Next Scheduled EDR Contact: 04/08/2013
	Data Release Frequency: Every 4 Years

## FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 11/26/2012
Number of Days to Update: 25	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Quarterly

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act) A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 11/26/2012
Number of Days to Update: 25	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2008
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 12/10/2010	Telephone: 202-564-4203
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 01/28/2013
Number of Days to Update: 77	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Annually

## ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 07/20/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/10/2011	Telephone: 202-564-5088
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 01/17/2013
Number of Days to Update: 61	Next Scheduled EDR Contact: 04/29/2013
	Data Release Frequency: Quarterly

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010	Source: EPA
Date Data Arrived at EDR: 11/10/2010	Telephone: 202-566-0500
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 01/16/2013
Number of Days to Update: 98	Next Scheduled EDR Contact: 04/29/2013
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 07/15/2011	Telephone: 301-415-7169
Date Made Active in Reports: 09/13/2011	Last EDR Contact: 12/10/2012
Number of Days to Update: 60	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/02/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/02/2012	Telephone: 202-343-9775
Date Made Active in Reports: 11/05/2012	Last EDR Contact: 01/09/2013
Number of Days to Update: 34	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/23/2011	Source: EPA
Date Data Arrived at EDR: 12/13/2011	Telephone: (415) 947-8000
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 12/11/2012
Number of Days to Update: 79	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## RMP: Risk Management Plans

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 05/08/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/25/2012	Telephone: 202-564-8600
Date Made Active in Reports: 07/10/2012	Last EDR Contact: 01/28/2013
Number of Days to Update: 46	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Varies

### BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2009	Source: EPA/NTIS
Date Data Arrived at EDR: 03/01/2011	Telephone: 800-424-9346
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 11/30/2012
Number of Days to Update: 62	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Biennially

### CA BOND EXP. PLAN: Bond Expenditure Plan

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989	Source: Department of Health Services
Date Data Arrived at EDR: 07/27/1994	Telephone: 916-255-2118
Date Made Active in Reports: 08/02/1994	Last EDR Contact: 05/31/1994
Number of Days to Update: 6	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### NPDES: NPDES Permits Listing

A listing of NPDES permits, including stormwater.

Date of Government Version: 11/19/2012	Source: State Water Resources Control Board
Date Data Arrived at EDR: 11/19/2012	Telephone: 916-445-9379
Date Made Active in Reports: 01/15/2013	Last EDR Contact: 11/19/2012
Number of Days to Update: 57	Next Scheduled EDR Contact: 03/04/2013
	Data Release Frequency: Quarterly

### UIC: UIC Listing

A listing of underground control injection wells.

Date of Government Version: 10/17/2012	Source: Department of Conservation
Date Data Arrived at EDR: 12/21/2012	Telephone: 916-445-2408
Date Made Active in Reports: 01/25/2013	Last EDR Contact: 12/21/2012
Number of Days to Update: 35	Next Scheduled EDR Contact: 12/31/2012
	Data Release Frequency: Varies

### CORTESE: "Cortese" Hazardous Waste & Substances Sites List

The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Last EDR Contact: 01/08/2013  
Next Scheduled EDR Contact: 05/13/2013  
Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

## SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

## BOARD OF PUBLIC WORKS DEPARTMENT OF BUILDINGS

### Application for the Erection of Frame Buildings CLASS "D"

To the Board of Public Works of the City of Los Angeles  
 Application is hereby made to the Board of Public Works of the City of Los Angeles, through the office of the Chief Inspector of Buildings, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim or title to, or right of possession in, the property described in such permit.

## BOARD OF PUBLIC WORKS DEPARTMENT OF BUILDINGS

### Application to Alter, Repair or Demolish

To the Board of Public Works of the City of Los Angeles:  
 Application is hereby made to the Board of Public Works of the City of Los Angeles, through the office of the Chief Inspector of Buildings, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

AEI CONSULTANTS  
5933 WEST CENTURY BOULEVARD SUITE 360  
LOS ANGELES CA 90021

Attention: JANN YAMAUCHI

**RE: 917 EVERETT ST, LOS ANGELES CA 90026**

I, the undersigned, being the Custodian or the Keeper of Records, certify that a thorough search for the records you requested was carried out under my direction and control.

**This search revealed no records.**

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, name, or classification; or were not located. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

If you have any questions regarding your request, please contact our office at (323) 890-7801.

Very truly yours,

A handwritten signature in black ink, appearing to read "Yvonne Curtis".

YVONNE CURTIS, Deputy Health Officer  
Public Health Investigation

**Subject: Records for Clarifier Systems and Industrial Wastewater  
Discharge Permits**

To Whom It May Concern:

I am conducting an environmental assessment at the following locations:

**1181-1253 Sunset Boulevard (odds)  
Los Angeles, CA 90026**

For the purposes of my report, I am requesting any records that your department may have on:

- Records of a clarifier system
- historical or present permits/certifications for the discharge/disposal wastewater
- any Notice of Violation and/or Notice to Comply issued.

Please fax me any information that you may have regarding this matter. I can be reached at (310) 798-4255 ext. 208, should you have any questions or require more information. I appreciate your prompt assistance in this matter!

Sincerely,

Jann Yamauchi

**ASTM USER QUESTIONNAIRE**

## ASTM E 1527-05 User Questionnaire

In order to qualify for the protection offered under the EPA All Appropriate Inquiry (AAI) Standard, the **User** (entities seeking to use the ASTM E1527-05 Practice to complete an environmental site assessment of the property; i.e. Lenders and/or Borrowers) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that AAI is not complete. This information should be the collective knowledge of the entities relying on the Phase I. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Site Name/Address: \_\_\_\_\_

Person Interviewed/Title: \_\_\_\_\_ Date: \_\_\_\_\_

If known, when was the property initially developed? \_\_\_\_\_

If different, when were the current building(s) on the property constructed? \_\_\_\_\_

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law? (**Note:** If unknown, a review of title records or an environmental lien search is recommended)

Yes\_\_\_ No\_\_\_ If you answer yes, please include an explanation in the space provided below:

---

---

---

---

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

*Engineering Controls* are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). *Institutional Controls* are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Yes\_\_\_ No\_\_\_ If you answer yes, please include an explanation in the space provided below:

---

---

---

---

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the *User* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes\_\_\_ No\_\_\_ If you answer yes, please include an explanation in the space provided below:

---

---

---

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?

Yes\_\_\_ No\_\_\_ If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the *property*?

---

---

---

5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *User*:

a. Do you know the past uses of the *property*?

Yes\_\_\_ No\_\_\_

b. Do you know of specific chemicals that are present or once were present at the *property*?

Yes\_\_\_ No\_\_\_

c. Do you know of spills or other chemical releases that have taken place at the *property*?

Yes\_\_\_ No\_\_\_

d. Do you know of any environmental cleanups that have taken place at the *property*?

Yes\_\_\_ No\_\_\_

If you answered yes to any of the questions above, please include an explanation in the space provided below:

---

---

---

6. The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the *User* of this *ESA*, based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

Yes\_\_\_ No\_\_\_ If you answer yes, please include an explanation in the space provided below:

Subject: Phase I Environmental Site Assessment and Limited Subsurface Investigation; Property Located at Sunset Boulevard and Everett Street, Los Angeles, California

Dear Ms. Karageorge:

The Environmental Division of Petra Geotechnical, Inc. (Petra) is pleased to present this Phase I Environmental Site Assessment for the above-referenced site. This investigation has been conducted in accordance with our proposal No. 1077-05 dated February 9, 2005 and with the current Standards of Practice for Phase I Environmental Site Assessments as adopted by the American Society for Testing and Materials (ASTM Practice E 1527-00).

This opportunity to be of service to you is sincerely appreciated. Please do not hesitate to call this office if you have questions pertaining to this report.

Respectfully submitted,

Petra Geotechnical, Inc.

**EXECUTIVE SUMMARY**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT**  
**AND**  
**LIMITED SUBSURFACE INVESTIGATION**

**Limited Subsurface Investigation; Property Located at Sunset Boulevard  
and Everett Street, Los Angeles, California**

**INTRODUCTION**

The information presented in this report includes the results of our recent site reconnaissance, a review of pertinent literature, and recent federal, state, and local government agency records, and interviews with persons familiar with the subject site. Our field reconnaissance, data gathering and compilation was performed by Mr. Joe Carrey, with oversight by Callie L. Cullum, Registered Environmental Assessor and Mr. Brian Villalobos, Certified Engineering Geologist.

**SITE DESCRIPTION AND GENERAL INFORMATION**

1. The subject site is located north of the intersection of Sunset Boulevard and Everett Street, in the City of Los Angeles, California. At the time of our inspection, the site consisted of a hardware store with associated storage buildings, a residence, a car wash, multiple bungalows, a vacant lot and a restaurant.
2. The site has been developed since at least 1909. Historical land use on site included multiple residences, a janitorial supply/disinfectant manufacturer, a sprinkler/valve manufacturer, a gas station, a temple, a car wash, and a restaurant.
3. Based on the date of construction of the current buildings on site, it is possible that asbestos-containing materials and lead-based paints may be present.
4. Fluorescent light fixtures were present throughout the hardware store and associated storage buildings. Based on the age of the buildings, it is possible that the light fixture ballasts contain polychlorinated biphenyls (PCBs).
5. According to the property owner, four gasoline underground storage

tanks (USTs) are currently present beneath the car wash (a former gas station) in the southern portion of the site.

### RECOGNIZED ENVIRONMENTAL CONDITIONS

Recognized environmental conditions are defined by the American Society of Testing and Materials (ASTM) as any hazardous substance or petroleum product under conditions that indicate an existing, past, or material threat of release into the structures, ground, groundwater, or surface water at the site. If the presence of recognized environmental conditions are identified on a subject site, it may warrant additional research, site investigation, and/or action.

1. A gas station was present on the southern portion of the site from the 1960's until the mid-1970's. No documented releases were discovered in the course of this investigation. However due to the age of the USTs and the lack of available data, Petra recommended conducting a Limited Phase II subsurface Investigation to determine if a significant release may have occurred in the past.

#### *Phase II Investigation*

2. On March 31, 2005, Petra contracted a subsurface geophysical survey on the site to delineate the location of the four USTs and fuel distribution lines heading to a fuel island. Additionally, a waste oil UST in the rear of the car wash was delineated, as well as an area within an auto shop on site, which appeared to have formerly had a hydraulic hoist present. Petra selected boring locations in the vicinity of the delineated areas based on proximity to the areas of concern while allowing room for existing underground electrical and water lines.
3. Fifteen borings were advanced on the site using a hydraulically-driven drill probe. The locations of the borings are discussed above. The borings were drilled to a total depth of approximately 25 feet below grade (fbg). The boring locations are shown on Figure 3. To prevent cross-contamination, all sampling equipment was washed with an Alconox<sup>TM</sup> and water solution prior to introduction into the subsurface and between borings.

Samples were collected at depths of up to 30 feet below ground surface at 2 2 and 5 foot intervals. Soil samples collected were kept on ice, transported to and analyzed by Orange Coast Analytical Laboratory in Tustin, California, an Environmental Laboratory Accreditation Program (ELAP) accredited laboratory. Sample security was maintained and documented using sample labels and chain-of-custody records. Selected samples were analyzed for volatile organic compounds (VOCs) using Environmental Protection Agency (EPA) Method 8260 and for total petroleum hydrocarbons (TPH), carbon chain identification (CCID) using EPA Method modified 8015. Copies of the official laboratory reports and chain-of-custody records are included in Appendix B.

#### *Discussion of Results*

Trace amounts of TPH were encountered in one sample collected at 2 2 fbg from the vicinity of the waste oil UST. No detectable concentrations were found in a five fbg sample taken from the same boring. These levels do not indicate a significant release from the waste oil tank.

No concentrations of TPH or VOCs above the detection limits were identified in any of the remaining samples analyzed.

Based on the findings stated above, Petra was unable to find any evidence that the site had been impacted from petroleum hydrocarbons and/or VOCs related to the former site use. It should be noted that borings could only be collected from the vicinity of the USTs and not directly below them. Therefore there remains the potential for impact to site soils directly below the USTs. The fact that no lateral contamination was detected in samples deeper than the bottom of the USTs appears to indicate that a large scale release has not occurred.

Prior to site development, all USTs on site will need to be removed and disposed of in accordance with current regulation.

#### SITE CONSIDERATIONS

Items are often encountered during the site reconnaissance which are not considered recognized environmental conditions in accordance with ASTM 1527-00 but may warrant consideration in conjunction with any planned development activities. These items are addressed as site considerations.

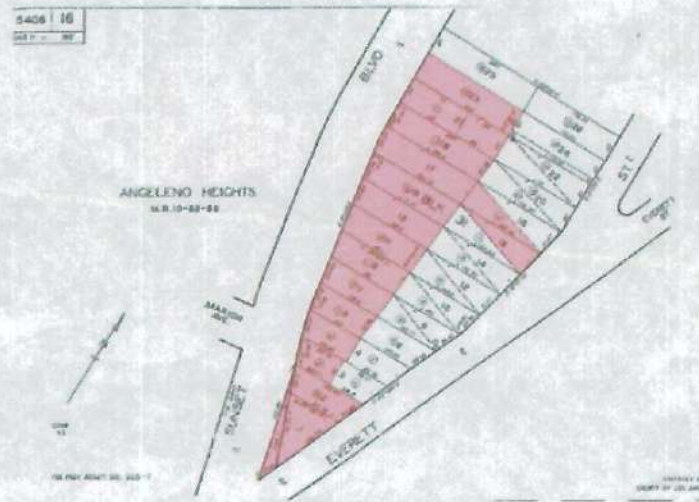

1. If the current buildings are to be demolished or upgraded, it is recommended that a survey for asbestos and lead-based paint be conducted and any identified materials be abated.

**APPENDIX H**  
**QUALIFICATIONS**

## **Danny Huerta – Project Manager, Due Diligence Services**

---

BA-Environmental Studies, University of California Santa Barbara

Mr. Huerta has five years experience in the environmental service industry. His past experience includes working as a chemist for an environmental laboratory, as well as a hazardous materials specialist for the Santa Barbara County Fire Department. His project experience has exposed him to working with the interpretation and application of environmental regulation to various facilities including residential, commercial, and industrial sites.

Project experience for Mr. Huerta includes:

- Phase I Environmental Site Assessments and Real Estate Transaction Screens
- Implementation of California's environmental regulations and laws to commercial and industrial facilities
- Investigations of complaints regarding the use, disposal, and storage of hazardous materials
- Inspection and report write-ups for environmentally permitted facilities
- Review of business plan and contingency plan documents for permitted facilities

Mr. Huerta has worked in the environmental industry for the past five years. He has attended various conferences, meetings, and training seminars regarding environmental laws and regulations. Mr. Huerta has also worked with government agencies such as the State Water Board, Fire Departments, and the EPA.

## **Jann Yamauchi – Project Manager, Due Diligence Services**

---

B.S.-Environmental Engineering, University of Southern California

Ms. Yamauchi has two years of experience in the environmental field. Her past experiences include working at an environmental engineering firm and a start-up solar power technology company.

Project experience for Ms. Yamauchi includes:

- Phase I Environmental Site Assessments
- Regulatory Database Review
- Historical Records Review

Ms. Yamauchi has worked in the environmental field for two years. She has attended various conferences regarding environmental issues.

## **Victor T. DeTroy – Due Diligence Manager, Southern California Region**

B.A. - Earth and Environmental Science, Columbia University, Cum Laude

OSHA 40-Hour Hazardous Waste Operations  
Emergency Response (HAZWOPER) Training  
EPA AHERA 24-hour Asbestos Building Inspector

Mr. DeTroy has over five years experience in the environmental service industry and provides project management to ensure compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Transaction Screens, limited due diligence assessments, Phase II and Phase III subsurface investigations, and quarterly groundwater monitoring events. He has successfully completed assessments on a variety of residential, commercial, and complex industrial sites. Mr. DeTroy is accustomed to all aspects of Due Diligence Property Assessments and the needs and requirements of a variety of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Freddie Mac, Fannie Mae, HUD, and customized client formats.

Project experience for Mr. DeTroy includes:

- Phase I Environmental Site Assessments
- Telecommunication Phase I Environmental Site Assessments
- Environmental Transaction Screens
- Environmental Transaction Analyses
- Limited Environmental Site Assessments
- Regulatory Database Reviews
- Historical Records Reviews
- Project Coordination and Setup
- Due Diligence Portfolio Management
- The design and implementation of Phase II soil and groundwater investigations and Phase III subsurface characterizations for a variety of suspected contaminants for due diligence and liability purposes

Subsurface investigations have included extensive soil and groundwater testing, identification of petroleum hydrocarbons and volatile organic compounds contamination in near surface soils, and contaminant plume delineation in soil vapor, soil, and groundwater. Mr. DeTroy's management and technical experience has allowed AEI's projects to be performed in a cost effective and timely manner to the satisfaction of AEI's clients and regulatory agencies.

**Subject: Phase II Subsurface Investigation**  
1185 – 1245 West Sunset Boulevard  
Los Angeles, California 90026  
AEI Project No. 316456

AEI Consultants (AEI) is pleased to provide this report which describes the activities and results of the Phase II Subsurface Investigation (Phase II) performed at the above referenced subject property (Figures 1 and 2). This investigation was completed in general accordance with the authorized scope of services outlined in our authorized proposal number 33288.

## 1.0 SITE DESCRIPTION

The subject property, which consists of a hardware store with associated storage buildings, a residence, a car wash, a vacant lot, and a restaurant, is located on the east side of West Sunset Boulevard in a mixed commercial and residential area of Los Angeles, California. The property totals 2.66 acres and is improved with 10 single-story, slab-on-grade buildings totaling 30,000 square feet. The subject property is currently occupied by a car wash business, Reliable Do It Center, film storage company, and residential tenants. On-site operations include car wash and small-scale auto repair operations, retail of home improvement goods, film storage, and daily residential activities. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping (Figure 2).

Based on a review of the US Geological Survey (USGS) Hollywood, California Quadrangle Topographic Map, the subject property is at an elevation which ranges from approximately 410 feet above mean sea level in the southern portions to approximately 500 feet above mean sea level in the northeastern portion. The nearest surface water is Echo Lake, located approximately 0.56 mile to the west of the subject property.

Based upon topographic map interpretation and the *Underground Storage Tank Low Risk Case Review Form* for G.H. Palmer & Associates at 867 Cesar Chavez Avenue, located approximately 0.42 mile southeast of the subject property, obtained from the Regional Water Quality Control Board's (RWQCB's) GeoTracker website, the direction of groundwater flow beneath the subject property is inferred to be to the southwest. According to a Limited Phase II conducted in March 2005 by Petra Geotechnical, Inc., (Petra) for the subject property, soil borings were advanced

to 30 feet below ground surface (bgs) and groundwater was not encountered. However, according to the *Underground Storage Tank Low Risk Case Review Form* for G.H. Palmer & Associates at 867 Cesar Chavez Avenue, located approximately 0.42 mile southeast of the subject property, groundwater was encountered at approximately 12 to 20 feet bgs.

## **2.0 BACKGROUND AND PURPOSE**

A Phase I Environmental Site Assessment (Phase I) was performed by AEI as detailed in a report dated February 26, 2013. According to the Phase I, in 1927, the southern portion of the subject property associated with the addresses 1181 (historical address) and 1185 West Sunset Boulevard, was developed with a gas station. The current structures were developed for gas station and auto repair purposes in the early 1960's. Gas station operations were conducted until at least 1970 and were subsequently phased out.

During AEI's Phase I site reconnaissance, AEI observed patched areas of asphalt on the southern portion of 1185 West Sunset Boulevard. The patched areas appear to be the locations of underground storage tanks (USTs) associated with the historical gas station. According to Mr. Steve Wintner, subject property owner, four USTs are currently located at the subject property. No information regarding the sizes or dates of installation of the USTs was available.

AEI reviewed a portion of the 2005 Phase I and Limited Phase II for the property located at Sunset Boulevard and Everett Street, prepared by Petra. According to these previous reports, a subsurface geophysical survey conducted at the subject property delineated the location of four UTs and a waste oil UST in the rear of the car wash. Petra conducted soil sampling in the vicinities of the USTs. The results of the soil sample analysis were that trace amounts of total petroleum hydrocarbon (TPH) were encountered in one sample collected at 22 feet bgs from the vicinity of the waste oil UST. Petra was unable to find evidence that the site had been impacted from petroleum hydrocarbons and/or volatile organic compounds (VOCs) related to the former site use. However, borings could only be collected from the vicinity of the USTs and not directly below them. Based on the findings of the Phase I, the presence of the USTs and that subsurface sampling was conducted over 7 years ago at the subject property represents a recognized environmental condition (REC).

AEI observed two clarifiers at 1185 West Sunset Boulevard. One clarifier was located in the garage and the other clarifier was located in the car washing area. According to records from the Los Angeles Bureau of Sanitation Industrial Waste Management District (LABS IWMD), permits to operate a clarifier were issued to the subject property in 1961, 1994, 2009, and 2011 for auto wash activities. It is unknown if all of the permits refer to the same clarifier. However, since the permits were issued for auto wash activities, it is presumed that these permits refer to the clarifier located in the current car washing area. The clarifier located in the garage appears to have been associated with auto repair operations. Based on the presumed use of this clarifier for auto repair operations and the on-site historical use of hazardous materials, the clarifier located in the garage represents a REC.

Areas of the subject property have historically been used for various industrial purposes since the 1920's. The southern portion of the subject property associated with the addresses 1181 (historical address) and 1185 West Sunset Boulevard, was used for car washing and auto repair

operations from the mid 1960's to the present. These operations are typically associated with the use of hazardous materials, including solvents and oils.

According to building records, in 1933, the portion of the subject property associated with 1201 West Sunset Boulevard was issued a permit for an oil depot. The portion of the subject property currently associated with the addresses 1205 and 1207 West Sunset Boulevard, was historically used for industrial purposes. The southern portion of the building was occupied by a plastic key tag manufacturer from 1956 to 1958, and time controls manufacturer from 1962 to 1970. The northern portion of the building was occupied by a chemical manufacturer of disinfectants from 1950 to 1954 and a valve manufacturer from 1957 to 1970. Since no information was available regarding the use of the building from 1927 to 1950, there is a possibility that chemical manufacturing was conducted since as early as 1927. These manufacturing operations are typically associated with hazardous materials including petroleum hydrocarbons and solvents.

The portion of the subject property currently associated with the address 1211 West Sunset Boulevard was developed with a commercial/industrial building from at least 1927. This building was occupied by a shade manufacturer in at least 1942 and a printing facility from at least 1950 to at least 1971. Many printing industries generate waste ink and ink sludges that might contain solvents. Photographic processes are also typically associated with major printing operations for image conversion and plate making. Photographic wastes, including heavy metal solutions, developers, hardeners, plating chemicals, and spent solvents, make up a large portion of the hazardous waste generated in these industries.

The portion of the subject property currently associated with the address 1229 Sunset Boulevard was historically occupied by a hood & pad manufacturer/sign manufacturer/painting company in 1953 and a sign manufacturer/sign manufacturer/painting company from 1954 to 1960. In addition, the portion of the subject property currently associated with the addresses 1235, 1237, and 1239 Sunset Boulevard was developed with a commercial/industrial building. The building was occupied by a woodworking and sign painting company in 1950, a sign manufacturer and painting company in 1954, a sash and door warehouse from 1957 to 1960, and sign painting company from 1964 to 1970. It is likely that these former industrial tenants utilized hazardous materials including oils, lubricants, and solvents. Records pertaining to the use of hazardous materials for the previous industrial tenants were not available as they operated during a time when the regulatory measures governing the use of hazardous materials of this nature were not as stringent as they are today. Based on the length of time the industrial operations were conducted, the historical on-site industrial operations represent a REC.

The purpose of this Phase II at the subject property is to assess subsurface soils and groundwater with regard to the historical and current on-site operations.

### **3.0 INVESTIGATION EFFORTS**

#### **3.1 Health and Safety Plan**

A site-specific health and safety plan was prepared, reviewed by onsite personnel, and kept onsite for the duration of the fieldwork.

### **3.2 Permitting and Utility Clearance**

A soil boring into groundwater service request application was submitted to the Los Angeles County Department of Public Health – Drinking Water Program for this investigation (pending). The public underground utility locating service Underground Service Alert (USA) was notified to identify public utilities in the work area. This work was performed under the oversight of a California-licensed Professional Geologist.

### **3.3 Geophysical Survey**

On February 28, 2013, prior to drilling activities, Subsurface Surveys & Associates, Inc. (Subsurface Surveys) of Carlsbad, California, (Appendix A) under the supervision of AEI, conducted a geophysical survey throughout the property addressed as 1185 West Sunset Boulevard (Figure 2). The purpose of the geophysical survey was to locate and identify any potential USTs, associated piping, conduits, and other buried features (i.e. septic tank, excavations, and/or drums) that may exist on the subject property.

The equipment used in this investigation consisted of a Geonics electromagnetic (EM)-61 high sensitivity metal detector, a Fischer M-Scope, and ground penetrating radar (GPR). A utility locator with line tracing capabilities was also used, where risers exist, onto which a signal could be induced and traced.

Items detected were marked on site in industry standard colors including red for electric, blue for water, green for sewer and drain lines, and white for the edge of the UST tank vault.

Within the area surveyed, the USTs were identified and mapped along the southwestern property addressed as 1185 West Sunset Boulevard. No other undocumented USTs, buried drums or any other anomalous buried objects were detected.

### **3.4 Drilling and Soil Sample Collection**

On February 28 and March 1, 2013, 17 soil borings (AEI-B1 through AEI-B17) were advanced throughout the subject property (Figure 2). All borings were advanced by Minuteman Drilling of Simi Valley, California using a limited-access or truck-mounted direct-push drilling rig. The borings were advanced to depths of 4.5 to 20 feet bgs. The location and purpose of each boring are listed below:

- Boring AEI-B1 was advanced near the northwestern property boundary of 1185 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B1 was advanced to a refusal depth of approximately 16 feet bgs.
- Boring AEI-B2 was advanced northwest of the clarifier located in the car washing area of 1185 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B2 was advanced to a refusal depth of approximately 17.5 feet bgs.
- Boring AEI-B3 was advanced adjacent to the east of the USTs located at 1185 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B3 was advanced to a maximum depth of approximately 20 feet bgs.

- Boring AEI-B4 was advanced southwest of the clarifier located in the car washing area of 1185 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B4 was advanced to a maximum depth of approximately 20 feet bgs.
- Boring AEI-B5 was advanced southwest of the USTs located at 1185 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B5 was advanced to a maximum depth of approximately 20 feet bgs.
- Boring AEI-B6 was advanced adjacent to the north of the waste oil storage area located at 1185 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B6 was advanced to a refusal depth of approximately 10 feet bgs.
- Boring AEI-B7 was advanced south of the clarifier located in the car washing area and southwest of the USTs located on 1185 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B7 was advanced to a maximum depth of approximately 20 feet bgs.
- Boring AEI-B8 was advanced adjacent to waste oil UST located at 1185 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B8 was advanced to a refusal depth of approximately 14 feet bgs.
- Boring AEI-B9 was advanced adjacent to west of the subject property building addressed as 1201 & 1197 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B9 was advanced to a terminal depth of approximately 10 feet bgs.
- Boring AEI-B10 was advanced in the northern interior of the subject property building addressed as 1233 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B10 was advanced to a refusal depth of approximately 4.5 feet bgs.
- Boring AEI-B11 was advanced in the southern interior of the subject property building addressed as 1233 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B11 was advanced to a refusal depth of approximately 8.5 feet bgs.
- Boring AEI-B12 was advanced in the northern interior of the subject property building addressed as 1229 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B12 was advanced to a terminal depth of approximately 10 feet bgs.
- Boring AEI-B13 was advanced in the southwestern interior of the subject property building addressed as 1229 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B13 was advanced to a refusal depth of approximately 6 feet bgs.
- Boring AEI-B14 was advanced in the northwestern interior of the subject property building addressed as 1211 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B14 was advanced to a terminal depth of approximately 10 feet bgs.
- Boring AEI-B15 was advanced in the southeastern interior of the subject property building addressed as 1211 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B15 was advanced to a refusal depth of approximately 6.5 feet bgs.
- Boring AEI-B16 was advanced in the southern interior of the subject property building addressed as 1205 West Sunset Boulevard. For the purpose of soil sampling, boring AEI-B16 was advanced to a terminal depth of approximately 10 feet bgs.
- Boring AEI-B17 was advanced near the southern property boundary of 1185 West Sunset Boulevard. For the purpose of groundwater sampling, boring AEI-B17 was advanced to a terminal depth of approximately 20 feet bgs. Groundwater equilibrated at approximately 16 feet bgs.

All borings were advanced using 2-inch outer diameter rods and samples were collected by advancing the rods with acetate sample liners. At designated sampling intervals, the core was

retrieved, core barrel disassembled, and the sample liner was removed and transferred to the onsite geologist.

All soil borings were logged using the Unified Soil Classification System. A photo ionization detector (PID) was used to screen soil samples in the field and the PID readings for each sample were included on the boring logs (Appendix B). Boring depths and sampling schedule are also included on the boring logs.

Down-hole equipment was decontaminated using a triple rinse system containing detergent.

### **3.5 Groundwater Sample Collection**

Groundwater was collected from boring AEI-B17 using the truck-mounted direct push drilling rig by advancing a Hydropunch<sup>®</sup> equipped with a 4-foot screen to approximately 20 feet bgs. The Hydropunch<sup>®</sup> was opened to expose the screened interval and allow groundwater to enter the screen. Before extracting samples, groundwater was permitted to equilibrate to a static level. Groundwater equilibrated at approximately 16 feet bgs. New ¼-inch diameter polyethylene tubing was inserted into the Hydropunch<sup>®</sup> and groundwater was sampled utilizing low flow methods and transferred into three clean, laboratory-supplied 40-mL VOA containers with hydrochloric acid (HCl) preservative. Neither headspace nor air bubbles were visible in the vials once capped.

### **3.6 Boring Destruction**

Following sampling, each boring was backfilled with hydrated granular bentonite and capped with concrete at ground surface.

### **3.7 Laboratory Analyses**

All samples were labeled and placed into a cooler with ice following sampling. The samples were transferred under appropriate chain-of-custody documentation by AEI to Alpha Scientific Corporation (ASC), a state-certified laboratory (California DHS Certified Laboratory) in the City of Cerritos, California. Laboratory analytical documentation is provided in Appendix C.

Laboratory analysis of soil and groundwater consisted of the following:

- VOCs by EPA Method 8260B
- Total Petroleum Hydrocarbons (TPH) following carbon-chain methods and reported as gasoline range (C4-C12), diesel range (C13-22) and oil range (C23-C40) (TPH-g, TPH-d and TPH-o) via USEPA Method 8015M

### **3.8 Investigation Derived Wastes**

No investigation derived waste was created during this investigation.

## **4.0 FINDINGS**

The soil results of this investigation were reviewed and compared to the United States Environmental Protection Agency (USEPA) Regional Screening Levels (RSLs). The RSLs are risk-based concentrations derived from standardized equations combining exposure information

assumptions with EPA toxicity data. The RSLs are used for site "screening" and as initial cleanup goals, if applicable. The RSLs are considered by the USEPA to be protective for humans (including sensitive groups) over a lifetime; however, they are not always applicable to a particular site and do not address non-human health endpoints, such as ecological impacts.

The results of this investigation were also compared to the Environmental Screening Levels (ESLs) from the California Regional Water Quality Control Board. The ESLs are considered to be conservative. Under most circumstances, and within the limitations described, the presence of a chemical in soil, soil gas or groundwater at concentrations below the corresponding ESL can be assumed to not pose a significant, threat to human health and the environment. Additional evaluation will generally be necessary at sites where a chemical is present at concentrations above the corresponding ESL.

#### **4.1 Geology and Hydrogeology**

The soils encountered at the subject property primarily consisted of interbedded well and poorly graded sands and gravels, and silty clays and sands from ground surface to a depth of approximately 20 feet bgs (Appendix B). Groundwater was encountered and equilibrated at approximately 16 feet bgs in boring AEI-B17.

#### **4.2 Soil Sample Analytical Results**

The following information is a summary of the soil sample analytical test results (Appendix C). This information has also been included in Table 1.

- VOCs and TPH were not detected in soil samples above the laboratory detection limits.

The following information is a summary of the groundwater sample analytical test results (Appendix C). This information has also been included in Table 2.

- VOCs and TPH were not detected in the groundwater sample above the laboratory detection limits.

### **5.0 SUMMARY AND CONCLUSIONS**

AEI has completed a Phase II at the property to evaluate if the current and historic on-site operations had adversely impacted the subject property. A total of 17 borings were advanced throughout the subject property for the collection of 1-groundwater sample and soil samples. Borings were advanced at select locations of current and previously suspected industrial operations that could have impacted the subject property.

The results of this investigation were compared to USEPA RSLs and California RWQCB ESLs.

Due to the lack of a release detected, AEI does not recommend any further action for the subject property at this time.

## 6.0 REPORT LIMITATIONS AND RELIANCE

This report presents a summary of work completed by AEI Consultants. The completed work includes observations and descriptions of site conditions encountered. Where appropriate, it includes analytical results for samples taken during the course of the work. The number and location of samples are chosen to provide the requested information, subject to scope of work for which AEI was retained and limitations inherent in this type of work, but it cannot be assumed that they are representative of areas not sampled. This report should not be regarded as a guarantee that no further contamination beyond that which could have been detected within the scope of this investigation is present beneath the subject property. Undocumented, unauthorized releases of hazardous material, the remains of which are not readily identifiable by visual inspection and are of different chemical constituents, are difficult and often impossible to detect within the scope of a chemical specific investigation.

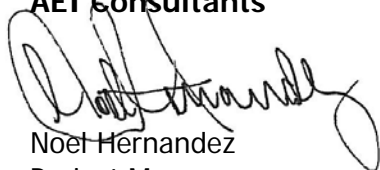

Any conclusions and/or recommendations are based on these analyses and observations, and the governing regulations. Conclusions beyond those stated and reported herein should not be inferred from this document. These services were performed in accordance with generally accepted practices, in the environmental engineering and construction field, which existed at the time and location of the work. No other warranty, either expressed or implied, has been made.

This investigation was prepared for the sole use and benefit of Mr. Fred Shaffer of Aragon Properties, Ltd. All reports, both verbal and written, whether in draft or final, are for the benefit of Aragon Properties, Ltd. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's Proposal and Standard Terms & Conditions executed by Mr. Shaffer on February 18, 2013. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

If there are any questions regarding our investigation, please do not hesitate to contact AEI at 310-798-4255.

Sincerely,

**AEI Consultants**

Re: Geophysical Investigation Report, 1185 West Sunset Blvd, Los Angeles, California.

This report is to present the results of our geophysical survey carried out over an area located at 1185 West Sunset Blvd, Los Angeles, California (Figure 1). The survey was performed on February 28, 2013, and its purpose was to locate and identify, insofar as possible, pipes, conduits, utilities, and other underground obstructions within a 10 foot radius of four (4) proposed borehole.

A combination of electromagnetic induction (EM), magnetometry, and ground penetrating radar (GPR) were applied to the search. Utility locators with line tracing capabilities were also brought to the field and used where risers exist onto which a signal could be impressed and traced.

**FIGURE 1. Site location map.**

**Survey Design** – The area to be surveyed was indicated in the field by the client and included four (4) boreholes located on a former gas station which is currently a car wash.

In site situations and survey objectives such as this, the best use of time is achieved by systematically free-traversing with the instruments while monitoring them continuously to determine which responses are significant and due to true subsurface targets, and which are due to other non-target or above-ground features and must be ignored (an example being nearby cars). Where applicable, the EM devices, magnetic gradiometer, and GPR were traversed systematically over the survey areas in multiple, organized directions. Other traverses were taken for detailing and confirmation where anomalous conditions were found.

In addition, the line tracers were used to impress signals onto pipes, generally through accessible risers and tracer wires when present, to delineate the lines' locations and orientations. The instruments were also used in passive mode, configured to detect 60 Hz electrical signals and other common radio-frequency signals found in active electrical and communication lines.

Hard copy of the EM data was not acquired, that is, discrete readings on the nodes of a grid were not recorded that could be put into a contoured map format. Rather, the instruments' meters were read continuously, and in real-time, during each traverse. This free-traversing method allowed for immediate detection of anomalous objects and facilitated the opportunity to investigate them further, without the need to first download and process data in the office. The lack of hard copy for EM data sets does not degrade the quality of the survey in any way. Hard copy merely provides a basis for report documentation of these geophysical fields, if such documentation is needed.

A Geonic's model EM61, and a Fischer M-Scope, was used for the EM sampling. A Sensors & Software Noggin Ground Penetrating Radar unit with a 500 MHz antenna produced the radar images. The magnetic gradiometer was a Schonstedt GA-52, and a Metrotech 9890 and RIDGID SR-60 SeekTech utility locator rounded out the tools applied.

**Brief Description of the Geophysical Methods Applied** – The EM61 instrument is a high resolution, time-domain device for detecting buried conductive objects. It consists of a powerful transmitter that generates a pulsed primary magnetic field when its coils are energized, which induces eddy currents in nearby conductive objects. The decay of the eddy currents, following the input pulse, is measured by the coils, which in turn serve as receiver coils. The decay rate is measured for two coils, mounted concentrically, one above the other. By making the measurements at a relatively long time interval (measured in milliseconds) after termination of the primary pulse, the response is nearly independent of the electrical conductivity of the ground. Thus, the instrument is a super-sensitive metal detector. Due to its unique coil arrangement, the response curve is a single well-defined positive peak directly over a buried conductive object. This facilitates quick and accurate location of targets.

The M-Scope device energizes the ground by producing an alternating primary magnetic field with AC current in a transmitting coil. If conducting materials are within the area of influence of the primary field, AC eddy currents are induced to flow in the conductors. A receiving coil senses the secondary magnetic field produced by these eddy currents, and outputs the response as anomalous conditions. The strength of the secondary field is a function of the conductivity of the object; say a pipe, tank or cluster of drums, its size, and its depth and position relative to the instrument's two coils. Conductive objects, to a depth of approximately 7 feet below ground surface (bgs) for the M-Scope are sensed. The device is also somewhat focused; that is, it is more sensitive to conductors below the instrument than they are to conductors off to the

side.

The magnetic gradiometer has two flux gate magnetic fixed sensors that are passed closely to and over the ground. When not in close proximity to a magnetic object, that is, only in the earth's field, the instrument emits a sound signal at a low frequency. When the instrument passes over a buried iron or steel object, so that locally there is a high magnetic gradient, the frequency of the emitted sound increases. The frequency is a function of the gradient between the two sensors.

The line locator is used to passively detect energized high voltage electric lines and electrical conduit (50-60 Hz), VLF signals (14-22 kHz), as well as to actively trace other utilities. Where risers are present, the utility locator transmitter can be connected directly to the object, and a signal (9.8-82 kHz) is sent traveling along the conductor, pipe, conduit, etc. In the absence of a riser, the transmitter can be used to impress an input signal on the utility by induction. In either case, the receiver unit is tuned to the input signal, and is used to actively trace the signal along the pipe's surface projection.

The GPR instrument beams energy into the ground from its transducer/antenna, in the form of electromagnetic waves. A portion of this energy is reflected back to the antenna at a boundary in the subsurface across which there is an electrical contrast. The instrument produces a continuous record of the reflected energy as the antenna is traversed across the ground surface. The greater the electrical contrast, the higher the amplitude of the returned energy. The radar wave travels at a velocity unique to the material properties of the ground being investigated, and when these velocities are known, the two-way travel times can be converted to depth. The depth of penetration and image resolution produced are a function of ground electrical conductivity and dielectric constant.

**Interpretation and Conclusions** - The interpretation took place in real time as the survey progressed, and accordingly, the findings of our investigation were marked on the ground cover at the site using spray paint, reported to the client, and are further documented with site photographs of the areas investigated (Figures 2-5).

Items detected in the vicinity of the compound were marked in industry standard colors including green for sewer, red for electric, white for the edge of the tank pits and blue for water

As shown in Figure 3, white was used to mark the edge of the pea-gravel in which onsite USTs reside in. Note that the proposed borehole was placed outside this region. Please refer to the site photographs for the locations of the boreholes and the orientation of all items found in their vicinity.

At the conclusion of the survey, the proposed boreholes were placed, so as to avoid all detected obstructions. The boreholes were marked in white with a yellow "SSS" to indicate that they had been checked by company personnel.

**Limitations and Further Recommendations** - It should be understood that limitations inherent in geophysical instruments and/or surveying techniques exist at all sites, and nearly all sites exhibit conditions under which such might not perform optimally. Consequently, the detection of buried objects in all circumstances **cannot be guaranteed**. Such limitations are numerous and include, but are not limited to, rebar-reinforced ground cover, abrupt changes in ground cover type, above-ground obstacles preventing full traverses or traverses in one direction only, above-ground conductive objects interfering with instrument signal, nearby powerlines or EM transmitters, highly conductive background soil conditions, limited GPR

penetration, non-metallic targets, shallower or larger objects shielding deeper or smaller targets, tracing signal jumping from one line to another, and inaccessible risers, cleanouts, valve boxes, and manholes. If one or more geophysical instrument is rendered ineffective and cannot be utilized, the quality of the survey can be somewhat degraded.

For the above reasons, and in the interest of maximum safety, we encourage our clients to take advantage of Underground Service Alert (USA), Dig Alert, or other similar services, when possible. Furthermore, we recommend hand-auguring and the use of a drilling method known as air knifing or vacuum extraction, when feasible or if applicable to this project. These methods may significantly limit damage to underground pipes, conduits, and utilities that might not have been detectable during the course of this survey. Please bear in mind, that geophysical surveying is only one of several levels of protection that is available to our clients.

SubSurface Surveys may include maps in some reports. While they are an accurate general representation of the site and our findings, they are not of engineering quality (i.e., measured and mapped by a licensed land surveyor).

SubSurface Surveys and Associates makes no guarantee either expressed or implied regarding the accuracy of the findings and interpretations present. And, in no event will SubSurface Surveys and Associates be liable for any direct, indirect, special, incidental, or consequential damages resulting from interpretations and opinions presented herewith.

All data generated on this project are in confidential file in this office, and are available for review by authorized persons at any time. The opportunity to participate in this investigation is very much appreciated. Please call, if there are questions.

## BORING LOGS

# AEI CONSULTANTS

5933 West Century Boulevard, Suite 360  
Los Angeles, California 90045

**LOG OF BOREHOLE: AEI-B1**

<b>PROJECT NUMBER:</b> 316456 / Phase II Subsurface Investigation		<b>CLIENT:</b> Aragon Properties, Ltd.	
<b>PROJECT ADDRESS:</b> 1185 - 1245 W. Sunset Blvd., Los Angeles, CA 90026		<b>ELEVATION:</b> Ranges from 410 to 500 feet amsl	
<b>DRILLING CONTRACTOR:</b> Minuteman Drilling		<b>START DATE:</b> 2/28/13	<b>END DATE:</b> 2/28/13
<b>DRILLING METHOD:</b> Truck mounted direct-push drill rig		<b>TOTAL DEPTH:</b> Approx. 16 feet bgs	
<b>DEPTH TO FIRST GROUNDWATER:</b> Not encountered		<b>DEPTH TO STATIC GROUNDWATER:</b> Not encountered	
<b>LOGGED BY:</b> N. Hernandez	<b>CHECKED BY:</b> B. Campbell	<b>NOTES:</b> Backfilled with hydrated granular bentonite and concrete capped.	

DEPTH (feet bgs)	SAMPLE DATA				SOIL DESCRIPTION	REMARKS
	SAMPLE NUMBER	PID (ppm)	USCS	LITHOLOGY		
1					Approximately 1" of asphalt at ground surface	
2						
3						
4						
5	AEI-B1-5	0.0	ML		Clayey SILT, trace gravel, light brown, moist, firm to stiff, homogeneous	
6						
7						
8						
9						
10	AEI-B1-10	0.0	SM		Silty SAND, trace clay, light brown, moist, stiff to very stiff, homogeneous	
11						
12						
13						
14						
15	AEI-B1-15	0.0	SM		As above, very stiff to hard	
16						
17					Boring advanced to a refusal depth of approx. 16 feet below ground surface (bgs). Soil samples collected at 5, 10, and 15 feet bgs. Borehole backfilled to ground surface with hydrated granular bentonite and concrete capped after soil sampling.

**APPENDIX C**

**LABORATORY ANALYSES**

**Alpha Scientific Corporation**  
Environmental Laboratories

---

03-08-2013

Mr. Noel Hernandez  
AEI Consultants  
5933 W. Century Blvd, Suite 360  
Los Angeles, CA 90045

Project: Sunset/316456  
Project Site: 1185-1245 W. Sunset Blvd., Los Angeles, CA  
Sample Date: 02-28/03-01-2013  
Lab Job No.: AI303008

Dear Mr. Hernandez:

Enclosed please find the analytical report for the sample(s) received by Alpha Scientific Corporation on 03-04-2013 and analyzed by the following EPA methods:

EPA 8015M (Total Petroleum Hydrocarbons)  
EPA 8260B (VOCs & Oxygenates by GC/MS)

All analyses have met the QA/QC criteria of this laboratory.

The sample(s) arrived in good conditions (i.e., chilled, intact) and with a chain of custody record attached.

Alpha Scientific Corporation is a CA DHS certified laboratory (Certificate Number 2633). Thank you for giving us the opportunity to serve you. Please feel free to call me at (562) 809-8880 if our laboratory can be of further service to you.

Sincerely,

Roger Wang, Ph. D.  
Laboratory Director

Enclosures

This cover letter is an integral part of this analytical report.

**OTHER ENVIRONMENTAL CONDITIONS**

Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?  No  Yes If yes, provide brief explanation.

Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?  No  Yes If yes, provide brief explanation.

Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?  No  Yes If yes, provide brief explanation.

**SIGNATURE INFORMATION**

Person completing questionnaire: Jeffrey Farrington

Title/Affiliation to property: General Manager - Aragon

Number of years associated with property: 1

Date: 5/24/23

**SITE VISIT INFORMATION**

- A person knowledgeable of current property use/business operations should be present during the site visit.
- Access to a percentage of units should be provided as requested by the field professional.
- Access to the following areas should be provided: all common areas, storage areas, and utility areas; all underground features and chemical storage/disposal areas.
- The following documentation should be provided for review if applicable: all hazardous waste manifests, environmental permits, and any previous environmental reports.

# CALIFORNIA - EPA Map of Radon Zones

<http://www.epa.gov/radon/zonemap.html>

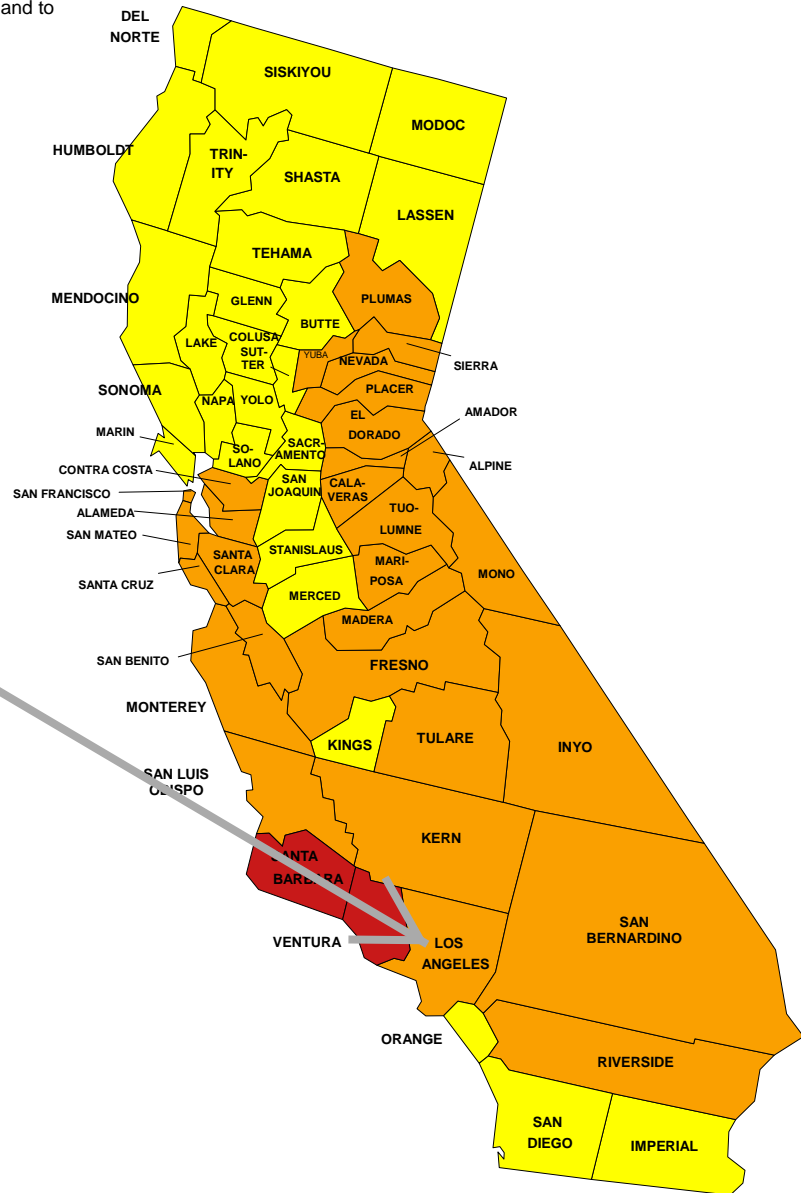

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

**All homes should be tested, regardless of zone designation.**

**IMPORTANT:** Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of California" (USGS Open-file Report 93-292-1) before using this map. See <http://energy.cr.usgs.gov/radon/grpinfo.html> This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

**Warning: Soil Map may not be accurate at this scale.**  
You have zoomed in beyond the scale that the maps were mapped at 1:24,000. The enlargement of maps beyond this scale may cause contrasting soils that could have been mapped at a particular scale.

Map Unit Description

[Printable Version](#)

Report – Map Unit Description

**Los Angeles County, California, Southeastern Part**  
**1240—Urban land-Dapplegray complex, 5 to 20 percent slopes**  
**Map Unit Setting**

National map unit symbol: 2tb7w  
Elevation: 230 to 1,300 feet  
Mean annual precipitation: 16 to 19 inches  
Mean annual air temperature: 64 to 66 degrees F  
Frost-free period: 320 to 365 days  
Farmland classification: Not prime farmland

**Map Unit Composition**

Urban land: 70 percent  
Dapplegray and similar soils: 20 percent  
Minor components: 10 percent

Estimates are based on observations, descriptions, and transects of the mapunit.

**Description of Urban Land Setting**

Landform: Hillslopes

**Properties and qualities**

Slope: 0 to 20 percent  
Depth to restrictive feature: 0 inches to manufactured layer  
Runoff class: Very high

**Interpretive groups**

Land capability classification (irrigated): None specified  
Land capability classification (nonirrigated): 8  
Hydric soil rating: No

**Description of Dapplegray Setting**

Landform: Hillslopes  
Landform position (two-dimensional): Backslope  
Landform position (three-dimensional): Side slope, tread, riser  
Down-slope shape: Linear  
Across-slope shape: Linear  
Parent material: Human-transported material consisting mostly of colluvium and/or residuum weathered from sedimentary rock

**Typical profile**

^A - 0 to 2 inches: loam  
^Au - 2 to 7 inches: loam  
^Cu - 7 to 19 inches: loam  
^C1 - 19 to 52 inches: clay loam  
^C2 - 52 to 69 inches: clay loam  
^C3 - 69 to 79 inches: clay loam

**Properties and qualities**

Slope: 5 to 20 percent  
Depth to restrictive feature: More than 80 inches  
Drainage class: Well drained  
Runoff class: Medium  
Capacity of the most limiting layer to transmit water (Ksat): Moderately low to moderately high (0.06 to 0.20 in/hr)  
Depth to water table: More than 80 inches  
Frequency of flooding: None  
Frequency of ponding: None  
Calcium carbonate, maximum content: 5 percent  
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)  
Available water supply, 0 to 60 inches: High (about 9.5 inches)

**Interpretive groups**

Land capability classification (irrigated): None specified  
Land capability classification (nonirrigated): 4e  
Hydrologic Soil Group: C  
Ecological site: F019XG913CA - Loamy Hills <30"ppt

# APPENDIX H

## QUALIFICATIONS

# Caroline Hanna

## Project Manager, Due Diligence

---

### EDUCATION

- B.S. - Environmental Science and Management, University of California, Davis

### SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Hanna provides expertise in environmental project management, consulting, and due diligence services to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database and Historical Records Reviews for large- and small-scale industrial, commercial, multi-tenant residential, and rural properties.

### PROJECT EXPERIENCE

Project experience for Ms. Hanna includes:

- Phase I Environmental Site Assessments (PHI ESAs)
- Limited Environmental Site Assessments (LESAs)
- Environmental Transaction Screens (ETs)
- Records Research with Risk Assessments (RSRAs)
- Regulatory Database Reviews
- Historical Records Reviews

As a Due Diligence Project Manager, Ms. Hanna provides project management and technical expertise to ensure ASTM compliance and satisfaction of client requirements in California.

In addition, prior to joining the environmental consulting industry, Ms. Hanna spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.

# Justine Stefanelli

## Senior Project Manager, Due Diligence

---

### EDUCATION

- M.P.S. - Environmental Management, Stony Brook University, 2011
- B.S. - Aviation Administration, Farmingdale State College, 2010
- A.A. - Airport Management, Vaughn College, 2009
- A.S. - Liberal Arts, Farmingdale State College, 2007

### CERTIFICATIONS

- New York State DOL Asbestos Inspector (License No. 17-26714)
- NYC Office of Environmental Remediation, Brown Field Turbo Training, Bronze Certified
- NYSDEC Erosion and Sediment Control SWPPP Training, 2018
- US Fish and Wildlife Service Threatened and Endangered Species Training
- SCUBA open-water certification, 2014
- OSHA 40-Hour HAZWOPER

### SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Stefanelli is a Senior Project Manager for the Due Diligence Division, providing management of environmental due diligence projects to ensure ASTM compliance and satisfaction of client requirements. Ms. Stefanelli has completed hundreds of environmental assessments for a variety of sites including apartment buildings/complexes, commercial office buildings, shopping centers, multi-tenant commercial and industrial complexes, industrial warehouses, agricultural land, manufacturing facilities, gas stations, auto repair facilities, plating facilities, and dry-cleaning facilities. In addition, Ms. Stefanelli has experience with conducting field sampling, Asbestos surveys, Phase II investigations, airport environmental projects, ecological monitoring, and business development.

### PROJECT EXPERIENCE

Project experience for Ms. Stefanelli includes:

- Phase I / II Environmental Site Assessments
- Environmental Transaction Screens
- Groundwater, surface water, soil, sediment, and air sampling
- Sanitary sampling
- Petroleum and dry-cleaning solvent remediation
- Ecological Surveys
- Health and safety planning
- Asbestos surveys

Ms. Stefanelli's experience also extends to endangered species and avian monitoring projects, health and safety facility inspections, surface water sampling for municipal clients, environmental impact statements, environmental permitting, grant writing, brownfield remediation projects, and ecological surveys including vegetation surveys, wetland species identification, shellfish surveys, and underwater benthic surveys.

# Adam J. Bennett

## Regional Director

---

### EDUCATION

- B.A. - Geology, Whittier College

### CERTIFICATIONS

- 40 Hour HAZWOPER

### SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Bennett has fifteen years of experience in environmental consulting. Mr. Bennett is the regional director for the Southern California area including the Los Angeles and Irvine offices of AEI Consultants, and oversees all daily activities throughout the offices. He is responsible for development of new business with banking institutions, development companies, mortgage brokers, and real estate firms; and for maintaining existing client satisfaction and relationships. Also responsible for providing quality assessment/quality control for various Environmental Site Assessment reports prepared for clients located throughout the United States. Advised and consult clients and staff to make the proper environmental decisions and recommendations. His project experience includes but is not limited to: Phase I Environmental Site Assessments, Real Estate Transaction Screens, radon screening projects, asbestos inspections, lead-based paint inspections, and reviewing/evaluating Phase II and Phase III reports. His experience includes management of portfolio projects involving numerous properties throughout the US.

### PROJECT EXPERIENCE

Project experience for Mr. Bennett includes:

- Phase I Environmental Site Assessments, Real Estate Transaction Screens and Property Condition Assessments
- The design and implementation of numerous Phase II soil and groundwater investigations for a variety of suspected contaminants for due diligence and liability purposes Methane testing (LADBS)
- Research, procure, catalog, interpret historical aerial photographs, and report through written declarations and depositions as an expert witness on major local, state, and federal cases throughout the United States
- LAUSD new school site safety assessments
- Installation of groundwater monitoring wells
- Hazardous waste disposal, clarifier, UST/AST removals
- Successfully negotiating with regulators for site closures across California.

Mr. Bennett also has extensive experience in the use of aerial photograph interpretation and has been retained as an expert witness for the interpretation of historical aerial photographs on several class action lawsuits.
